Corn—The movement of new corn showed only a moderate increase the past week, but the demand was improved and prices less affected by option influences. Offerings consisted mainly of low grades and sample of heavy moisture content but steady prices were in most instances realized. Old corn was also scarce and sold at a premium of 3c to 4c over new. Ear corn was in good demand but the few arrivals showed considerable rotten ears and nubbins. Prices held steady. Closing quotations: No. 1 white, $1.51@1.52; No. 2 white, $1.49@1.51; No. 3 white, $1.45@1.47; No. 4 white, $1.40@1.42; No. 5 white, $1.37 @1.39; No. 6 white, $1.35@1.37; No. 1 yellow, $1.49@1.50; No. 2 yellow, $1.47@1.49; No. 3 yellow, $1.44@1.46; No. 4 yellow, $1.38@1.41; No. 5 yellow, $1.35@1.37; No. 6 yellow, $1.33@1.35; No. 1 mixed, $1.48@ 1.49; No. 2 mixed, $1.46@1.48; No. 3 mixed, $1.42@1.44; No. 4 mixed, $1.37@1.39; No. 5 mixed, $1.34@1.36; No. 6 mixed, $1.31@1.33. New Ear Corn—New yellow ear corn, $1.33 @1.35; white ear, $1.34@1.36; mixed ear, $1.33@1.35. Ear corn, old sound white ear, $1.50@1.55; yellow ear, $1.45@1.50; mixed ear, $1.45@$1.50.

Oats—The movement of oats was extremely light the past week, in fact the smallest reported of the crop, and as a result the market was independently strong and demand steadily increasing. No. 2 white, 78c; No. 3 white, 77½c; No. 4 white, 76@77c; No. 2 mixed, 76@76½c; No. 3 mixed, 75½@76c; No. 4 mixed, 74½@75c.

Rye—The demand was active and following reports of export buying, prices advanced 6c to 7c per bushel. No. 2 billing, $1.41@1.43; No. 3, $1.39@1.41; No. 4, $1.36 @1.38.

CHICAGO.

John Owen, a broker of Lynchburg, Va., visited his Chicago shippers last week.

W. F. Murphy and H. J. Wendel are newly elected members of the Chicago Board of Trade.

Memberships are again on the wing, a new record of $11,000 net to the buyer having been established last week.

J. A. Cavers, an extensive operator at Omaha until several years ago, visited his Chicago friends last week, promising to get back into the game before long.

On Dec. 12 at 2 o'clock Eastern time, the final Government report on crops for the year will be issued. Reports on winter wheat and rye acreage and condition for the 1920 harvest will be issued Dec. 15 at 12:30 o'clock Eastern time.

C. E. Beall in charge of the Des Moines office of Mayer-Holbrook Co., was approved by the directors of the Chicago Board of Trade as a solicitor on Monday. This firm has considerably extended their operations, handling a nicely growing business

The following were among those who visited the Chicago Board of Trade floor last week: Chas. E. Barr, Clinton, Ia.; Wm. Sheridan, Lexington, Ky.; W. Eikenberry, Charitan, Ia.; Frank Moore, Green Bay, Wis.; John McVay, Great Falls, Mont.; H. B. Mayhew, Bradford, Ill.; J. H. McNamara, Keokuk, Ia., and G. H. Lewis, Lawrenceburg, Ind. The latter and other delegates to the Federation of American Corn Millers annual convention, reported in another column, unanimously agree on the better business outlook for their industry.

A meeting was held in the smoking room of the Board of Trade Tuesday afternoon at 5 o'clock, Nov. 25, at which plans were discussed for increasing the membership of Post No. 304 of the American Legion. F. W. Sherwood, temporary secretary, is urging all the boys connected with any of the Board of Trade houses in any capacity whatever, whether with telegraph houses or in whatever branch of the trade they may be, to join Post No. 304 if they served the United States at home or abroad during the great war. At this meeting a temporary chairman was to be elected to succeed Mr. Hood who finds it necessary to spend much of his time away from the city.

New Partnership.

The recently organized firm of H. Hunton & Co., brokers and commission merchants in foreign and domestic hides, skins, fertilizers, animal and vegetable oils, etc., have opened offices at 1847 Conway Bldg., 111 West Washington St., Chicago. The personnel of the company is composed of Harry Hunton, J. F. Nicolas, H. A. Voedisch and A. F. Rinder. Mr. Hunton for the past 25 years has been associated with the Cudahy Packing Co., and having been in charge of the sales of hides and other by-products, has a broad acquaintance in the trade. Mr. Nicolas, for the past two years with the Cudahy company in charge of the wool-pulling department and sales of sheepskins, has also been well grounded in his particular line, having put in his apprenticeship with Charles Friend & Co., remaining in their employ for 18 years, after which time he was manager of the hide department of the Wilder Tanning Co. Mr. Voedisch is a chemical engineer and an expert in the manufacture of grease, tallow, glue, animal foods, etc., and Mr. Rinder, for 20 years with the Northern Trust Co., will handle the banking, foreign and domestic exchange affairs of the company. So able a partnership should achieve the success that their many friends in the trade prophesy for them.

ST. JOSEPH, MO.

W. H. Moore, Correspondent.

W. H. Huff, J. M. Flynn, G. W. Gunnell, W. H. Daley, W. W. Simmons, Emmett Flynn, W. A. Wilkins and others attended the convention of the Nebraska Farmer elevators at Omaha last week.

C. D. Gilbert, of the St. Joseph Hay & Grain Co., returned from an extended trip throughout the territory, and advises that there will be a big movement of corn as soon as cars can be secured. Ear corn can be moved freely, but the demand to the interior is practically nothing.

The past week brought out several inquiries for memberships in the St. Joseph Grain Exchange, with none being offered for sale. Several outsiders are looking for these memberships, with a view of opening up offices. One membership was offered at $4,500, but was not sold, as the party who offered it decided not to sell.

The following visitors registered on the Grain Exchange floor during the week. W. R. Hill, Mound City, Mo.; G. K. Walton, Kansas City, Mo.; P. D. Settle, Hastings, Nebr.; A. W. Pieper, Sequin, Texas; Thos. Jackson, Edgerton, Mo.; C. A. Krazlen, Rea, Mo.; B. G. Franklin, Hamburg, Iowa; J. J. Comer, Willis, Kansas; W. P. Burrow, Bois D'Arc, Mo.; J. P. Glandon, Omaha; Henry Lichtig, Kansas City; G. Luhrs, Nishabotna, Mo.

A meeting of the members of t Joseph Grain Exchange was held for the purpose of protesting agai Western Weighing and Inspection moving their office from the Corby- Building. This is a question of vit portance to grain firms, as all tonna rangements, etc., are handled b bureau, and should they move it necessitate dealers making numerou across town in order that they may and complete billing on grain c ments.

Cash Markets.

Wheat—Receipts generally light, ordinary quality. Record values 1919 crop were established during th part of the week. All varieties of have sustained heavy losses since day, however, and the prices on Sa were below those of a week ago. T sale proposition of the Grain Corp has attracted requisitions far in ex the supply for sale, and this fact, gether with generally ample re owing to the fact that most mills a stocked, has brought about a rathe placent attitude on the part of buye this tendency is accentuated by th situation, which threatens to close industries, unless immediate relief tained. Cash wheat follows: No. hard, $2.42@2.60; No. 2 dark hard, 2.58; No. 3 dark hard, $2.36@2.55; dark hard, $2.34@2.53; No. 5 dark $2.32@2.45; No. 1 hard, $2.34@2.57; hard, $2.30@2.53; No. 3 hard, $2.2 No. 4 hard, $2.20@2.48; No. 5 har @2.32; No. 1 yellow hard, $2.34@2. 2 yellow hard, $2.31@2.33; No. 3 hard, $2.27@2.30; No. 4 yellow har @2.25; No. 5 yellow hard, $2.10@2. 1 red, $2.29@2.31; No. 2 red, $2.2

). 3 red, $2.24@2.25; No. 4 red, $2.20@ 3; No. 5 red, $2.11@2.17.

Corn—Receipts moderate, but capable of pplying the demand. Old corn is given e preference by virtually all buyers. Per- ntage of arrivals of new corn has been creasing daily, and is meeting with a ther slack demand. The coal shortage s forced a number of large buyers at rious points to withdraw from the mar- t, bearish influence of this character off- tting the naturally bullish tone which uld naturally be occasioned by light re- pts. Cash corn follows: No. 2 yellow, 56@1.58; No. 3 yellow, $1.54@1.56; No. yellow, $1.53@1.54; No. 5 yellow, $1.50@ 3; No. 2 white, $1.54@1.56; No. 3 white, 52@1.54; No. 4 white, $1.50@1.52; No. white, $1.48@1.50; No. 2 mixed, $1.54@ 6; No. 3 mixed, $1.52@1.54; No. 4 mixed, 50@1.52; No. 5 mixed, $1.48@1.50; ear n, $1.40@1.42.

Oats—Demand, though moderate, has been so urgent as during the previous ek. As high as 76c was paid for No. 3 hite oats during the week, but closing ues were 74@75c on this grade. Good mand for oats for shipment to the coun- t but buyers do not care to pay these h prices. Cash oats follow: No. 2 te, 75½@76c; No. 3 white, 74@75c; No. nixed, 73@74c; No. 3 mixed, 72@73c; N 2 red, 74½@75c; No. 3 red, 73½@74c.

rthern spring wheat sold at record- ing prices in the Omaha market last A car of No. 1 dark northern spring hursday for $3.05 and the next day a f No. 2 dark northern spring sold for price.

new board of directors of the Omaha Exchange elected these officers of xchange: President, Otis M. Smith, ger of the Updike Grain Co.; first resident, Charles H. Wright, of the ska-Iowa Grain Co.; second vice- ent, C. S. Rainbolt, of the Rainbolt Co., and treasurer, E. E. Huntley, of Rosenbaum Grain Co. Three new ors were last week elected by the ers of the exchange. They are E. ntley, S. S. Carlisle of the S. S. de Grain Co. and W. T. Burns, of the Peters Mill Co. Mr. Smith succeeds T. Buchanan of the Omaha Elevator s president of the exchange, Mr. has been prominently identified with pdike interests for twelve years, and of the most widely known and r grain men in this market.

Story of a Gold Coin.

les T. Neal, second vice-president onal agent at Omaha of the United Grain Corporation, received from H. Barnes the other day a little gold coin and with it a letter from arnes in which he tells the story of in and explains why he sent it to al. Last winter Mr. Neal was sent ope to assist Herbert C. Hoover in ating foodstuffs. Part of the time abroad was spent by him at Ham- Germany, and part of the time at . On his return to Omaha several ago he again took active charge government's wheat business in the zone. During the war Mr. Neal e of the government's dollar-a-year n his letter to Mr. Neal, Mr. Barnes, president of the United States Corporation, says:

"New York City, Nov. 11, 1919.

"Mr. Charles T. Neal, Omaha, Nebr.

"My Dear Neal: One of the most interesting phases of the Grain Corporation's service and one most typical of the resourcefulness of Herbert Hoover and the effectiveness of such support to him as the Grain Corporation can give was the Bulgarian episode. Bulgaria never was technically at war with us. Her food needs were pressing. It was agreed that food should be furnished Bulgaria to the extent of about $5,000,000 worth, and that the ships that took food into her ports would carry out her export products, which, when sold, might pay for that food, but meantime she should deposit from her national gold reserve on board a United States warship $5,000,000 in gold coin. The warship sailed for Constantinople and carried this gold security for several months. The export products of Bulgaria did not develop of sufficient value to liquidate the food bill. The gold was sent from Constantinople on a navy destroyer to New York, to the Grain Corporation, has been transferred to the Sub-Treasury and melted into gold bullion, and the proceeds used to discharge the food bill of Bulgaria.

"This transfer has only just been completed, and within the last few days out of that gold coin I have selected some old French Louis d'Or. I am sending you one of these as a souvenir, with some considerable sentiment attached. I know you will value it as a reminder of what has proved to be days of great world interest, in which, as I look back, I see very little of

Otis M. Smith, Updike Grain Co., New President Omaha Grain Exchange.

regret that in any way the Grain Corporation and its organization fell short of its great opportunity. Please accept this coin as a reminder which should give you a measureable pride whenever you see it, because you were a part of that machine; and also accept it as a token of the personal affection and appreciation which I have for every man carrying a part in that load.

"Sincerely,

"JULIUS H. BARNES."

DETROIT.

John Barr, Correspondent.

Fred C. Hoose, representing the Norris Grain Co., of Kansas City, was in this city on business last week.

There is not much barley in this market and trading is slow, but the tone is strong and prices are up 10c for the week at $2.80@2.90 per cwt. for cash No. 3.

Beans are inactive. Buyers are holding off and dealers have trouble making sales. The price declined 15c early in the week and the market is quoted easy at $6.85 per cwt. for immediate and prompt shipment.

Oats advanced ½c, but dropped back, and the market was easy at the close. There was a decrease in shipping demand and local consumers were not active buyers. Receipts were fair early in the week and light later. Quote: Cash No. 2 white, 76½c; No. 3 white, 75½c; No. 4 white, 74½c

B. F. Schwartz & Co.

RECEIVERS AND EXPORTERS

WHEAT - CORN - OATS - BARLEY

CONSIGNMENTS AND C.I.F. OFFERS SOLICITED

PRODUCE EXCHANGE NEW YORK

Demand for rye has been sustained all week. The market shows an advance of 9c at $1.43 for cash No. 2. Shippers are the leading buyers, although there has been some demand from local millers. Receipts are not large.

Wheat receipts here are falling far short of the movement of a year ago and business is slow. Millers buy sparingly and there is not much shipping. The east took only a few cars during the week. Country points have been quoting higher than city prices and the market here closed with an advance of 3c and not much offering. Quote: No. 1 red, $2.30; No. 1 mixed, $2.28; No. 1 white, $2.28.

The corn market is easy and 3c lower. Prices held very well during the early days of the week, although there was weakness in other markets. This was because of the small stocks here and the fact that corn was not offered freely. Receipts were light all the time and demand was lacking. New corn is quoted but there is no business passing in this market. The feeling at the close was easy. Quote: Cash No. 3, $1.53; No. 2 and No. 3 yellow, $1.55; No. 4 yellow, $1.53; No. 5 yellow, $1.52; No. 6 yellow, $1.51. New corn: Cash No. 3 yellow, $1.50; No. 4 yellow, $1.45; No. 5 yellow, $1.41; No. 6 yellow, $1.39.

NEW YORK.

J. M. Nugent, Correspondent.

Among the visitors upon the floor of the New York Produce Exchange last week were the following gentlemen: N. C. Hart, of Toronto; Edward Banon, of Chicago; R. Christensen, of Chicago; A. S. Jackson, of Chicago, and Chr. Falkers, also of Chicago.

The market for spot oats appears somewhat steadier, especially for the better quality, for which there has been an improved export demand in evidence. Some business was worked for Rotterdam on the basis of 16c over Chicago December option for 38 lb. No. 2 white clipped oats. Present indications do not point to any narrowing of this stiff premium for the good quality oats, as at present amounts available in this market are not large, although there appear to be quite liberal quantities of the inferior sorts. Quotations as follows: No. 1 white, 83c; No. 2 white, 82½c; No. 3 white, 82c, and No. 4 white, 80½c to 81½c.

During the early part of the week, cash corn displayed a heavy tone owing to the absence of any active demand, but prices toward the close of the period were inclined to firm slightly. There was some inquiry from foreign interests and bids were at a working basis. It is believed a fair quantity of corn has been taken for shipment to the United Kingdom. This business was made possible by a decline in freights between the United States and the United Kingdom. Old No. 2 yellow ruled at $1.66¼; old No. 2 mixed at $1.62¾; new kiln dried No. 3 yellow at $1.55¼, and new kiln dried No. 4 yellow at $1.52½, cost and freight New York, ten days' shipment.

BALTIMORE.

Robert C. Neu, Correspondent.

J. L. Rodney, president of the Abilene Flour Mills Co., of Abilene, Kans., was a visitor on the floor of the Baltimore Chamber of Commerce last week.

There has been a fair business put through here in No. 2 rye western for export, the price paid having been 12 cents over the December option in Chicago.

M. E. Grant, of the Van Dusen-Harrington Co., grain merchants of Minneapolis, Minn., was a visitor on the floor of the Baltimore Chamber of Commerce last week.

The name of Albert K. Taylor, president of Taylor & Bournique Co., of Milwaukee, Wis., is posted as an applicant for membership in the Baltimore Chamber of Commerce.

Nearly one hundred ocean-going vessels are at anchor in the Baltimore harbor at present writing, ascribed largely to the establishment of many new steamship lines here recently.

Receipts of new water-borne wheat in the Baltimore market so far this season amount to 1,435,000 bus., compared with 1,182,000 bus. arrived up to the corresponding time last year.

At the regular monthly meeting of the board of directors of the Baltimore Chamber of Commerce last week the annual assessment for membership in the Chamber was fixed at $30 for the year 1920.

The annual Corn Congress of the Agricultural High School at Sparks, Baltimore county., Md., was held on November 21

and 22, and many special exhibits of agricultural products were on the program.

There has been a sharp reduction in the stocks of wheat here in the last week or two as a result of freer withdrawals on export account, and the room thus created for new business should result in a larger number of cars coming through shortly.

The British steamship Kepwick Hall, Captain Harris, cleared from Baltimore last week with 300,000 bus. of wheat for Italy. The ship will stop at Gibraltar for orders and the identity of the port in Italy to which she is bound. The cargo of wheat is said to be one of the largest shipped out of this port for some time past.

PHILADELPHIA.

Geo. A. Rudderow, Correspondent.

Exports of grain for the week ending Nov. 21 were 1,212,732 bus.; oats, 275,727 bushels.

Samuel H. Young, grain broker and formerly of S. H. Young & Co., has made application to the Commercial Exchange for an individual membership.

Albert C. Smith, Philadelphia, has instituted proceedings against the Director General of the Railroad Administration to recover $1,920, the value of a shipment of corn meal.

Receipts for the week ending Nov. 22 were 800 bbls. and 10,070,634 pounds of flour in sacks; 952,147 bus. wheat; 16,371 bus. corn; 169,424 bus. oats; 32,835 bus rye; 13,750 bus. malt and 460 tons of feed.

The Commercial Exchange, at a meeting held on Monday last, voted to have a car examination bureau in accordance with the proposition printed in our columns last week. The bureau shall be under the general supervision of the grain committee, whose duty it shall be to fix the charges from time to time for car examination, to support the bureau, appoint and fix the salaries of the supervisor and other employes, provide a proper office for the same and perform such other duties as may be necessary for the proper conduct of the bureau; all of which shall be submitted to the approval of the board of directors.

The following out-of-town visitors were registered at the Commercial Exchange during the week: J. W. Mashek, of the Empire Milling Company; W. G. Crocker, secretary and treasurer of the Washburn-Crosby Milling Co., and E. N. Best, Minneapolis; Thomas A. Wood, of the Ansted Burk Co., flour millers, Springfield, Ohio; John M. Kellogg and J. B. Curry, of the Armour Grain Co., Chicago; Wilbur S. Barker, of the Harrisburg Feed & Grain Co., Harrisburg, Pa.; G. L. Jacobson, president of the Atchison Mills Corporation Co., Atchison, Kans.; W. J. Brewer, Lockport, N. Y.; A. Harvey Feldman, New York City; J. M. Cormac, Washington, D. C.; A. R. Newberry, New York City, and Oscar J. Richards, Chicago.

Jacob Michel, secretary and treasurer of the Merchants Warehouse Company, this city, died at his home, 1223 North Eighth street, on Monday night, the 17th instant. Mr. Michel, who was 65 years of age, had not been well for some time but attended to his business the day of his death and died suddenly at his home in the evening. He was a member of the Commercial Exchange and formerly a member of the flour firm of Jacob Michel & Sons, Fifteenth and Carpenter streets. He left this firm shortly after the organization of the Merchants Warehouse Company. Nearly 34 years ago he accepted a position with them as superintendent, which he filled with the strictest fidelity to his employers and credit to himself. Two or three years since, upon a reorganization of the company, Mr. Michel was made secretary and treasurer of the organization, occupying the same at the time of his death. Deceased leaves a widow and eight grown-up children, two daughters and six sons.

LOUISVILLE, KY.

A. W. Williams, Correspondent.

The Board of Trade at Paducah, Ky., reports that the Vincent-Hudgens Company, Nashville, Tenn., one of the largest elevator concerns in the South, will establish a new elevator at Paducah, Ky., and that temporary offices will be opened at once with the Lack-Redford Grain Elevator.

Demand locally for corn is almost entirely for old white corn for milling purposes, millers preferring to pay premiums on good corn to taking a chance with new kiln dried corn. There is now a big demand for corn products and mills are operating twenty-four hours a day on full capacity basis.

Higher prices on cotton bags are predicted by the Louisville trade. Ninety-eight-pound cotton flour sacks are now costing 57 cents per barrel of flour, and 100 lb. meal sacks are costing 25 cents each. Cotton is selling at extraordinary prices in the South, and higher bag prices seem inevitable.

There is a better movement of new corn, but most of the corn moving so far is of lower grades, as farmers are cleaning out low grades first. Due to high water through bottom lands, early in the month, there is a good deal of damaged corn throughout the state, most of which will probably be fed on the farm

The continued miners' strike is causing a shortage of coal which is now threatening a number of industrial consumers. To date none of the mills or elevators has had any trouble to speak of in securing coal, but several industries report that they will be down, and that their employes will be out of work if the situation does not ease.

The car shortage during the past week has been so severe that one large mill reports that it was on the verge of closing down several times, as milled products stacked up so rapidly that it couldn't take care of stock while waiting for cars. Starting Monday with a minimum weight of 60,000 pounds on all cars that can carry that load, the millers will be loading out at capacity.

DULUTH.

S. J. Schulte, Correspondent.

ank R. Tenney, of the Tenney Grain is away on a three weeks' vacation to pent at his old home at Boston, and ther points in the East.

ie boat rate on wheat and other grain Buffalo delivery from here now stands 2c, or at 5c to include winter storage. ient chartering to clean out the bulk ie 9,500,000 bushels of all grains now ie elevators at the head of the lakes, pected to be made before the season avigation closes.

erators on this market are hopeful a more favorable line-up for this in lake and rail freight rates on grain differentials between the markets will rought about as a result of the re- hearings before the Interstate Com- e Commission. Charles F. Macdon- secretary of the board of trade here, ded the final arguments at Washing- ast week.

ding in rye was the outstanding fea- in the market here during the last . Under the spur of active bidding, pot quotation in No. 2 rye was ad- d 8c to $1.42. Good eastern demand, of it for export, was reported, and space was chartered for rye to be ed to Buffalo next week. Stocks of n the elevators here now aggregate 00 bushels.

vator interests here are looking for- to a good movement of grain this as soon as freight cars are available. ts received by them lately were to ffect that substantial stocks are held ny country houses, especially along ie of the Great Northern Railroad. As evators here will probably have nearly 000 bushels space available after ation closes down, they will be able te care of any run likely to develop the winter months.

son S. Moore, secretary of the l States Grain Corporation, was a here during the week. He con- the message that Julius H. Barnes rmulated a plan whereby the corpor- standard grade of flour will be ble to consumers at much lower He attributed the high figures rul- r special patent flours to the big millers are compelled to pay for wheat owing to the partial failure of op in the Northwest and its slow ent to the markets. If consumers content to take good standard flour of substitutes, the opportunity will rded them. Mr. Moore asserted that H. Barnes, wheat administrator, mself, would return to Duluth to re- heir grain businesses as soon as they leased from government service at 1 of the present crop year.

Notice.

the members of Duluth Board of had voted practically unanimously r of the resolution presented by its of Directors, said resolution making seed which grades No. 1 deliverable tracts, the president of the board, ckman, addressed the members as

re has been considerable criticism siders, and even by certain mem- the board, on the action taken by ectors in fixing a limit of price which future trades in flax would cleared through the Duluth Clear- use. It has been stated that this was taken to protect the Clearing and even to protect the interests idual members. This is absolutely t and unwarranted.

action taken was to protect the me of the board and the interests who use this market as a conve- nd protection. The interest of the shipper, who sells flaxseed or any ain against his receipts, is as im- to us as the interest of either the House or any individual member oard, but we object to something e consider to be a trade conveni- ng manipulated so as to become a a medium for profiteering.

ers of seed do not suffer by this on. There is absolutely no limit pon the price at which country of actual cash seed may be sold. directors have acted strictly ac- to rule and to the best of their t, and, if this criticism is suffi- eneral to be worthy of notice, they er have to ask the membership to heir action or to accept their res- s."

ST. LOUIS.

E. Reeves, Correspondent.

i B. Immer, the well-known suc- pit speculator, will depart next th his family for Palm Beach, re they will spend the winter. Mr. wns a lot at Palm Beach and ex- erect a bungalow there.

rships in the Merchants' Ex- re scarce, and in good demand at as there are not enough for sale to supply the demand from out-of-town merchants who desire to join the Exchange. It is expected, however, that after the first of the year, when certificates can no longer be used for minor messenger boys, several memberships will be offered for sale.

Horace F. Ketchum, who for the past 15 years has been with the C. H. Albers Commission Co., has formed a co-partnership with A. G. Anderson, who formerly was in the grain business at Little Rock, and at New Port, Ark., and under the name of the Anderson-Ketchum Grain Co. they have embarked in the grain, hay and commission business, with offices in the Pierce building.

With the object of bringing about greater co-operation between the officers of the various farmers' elevators in this trade territory, the Champaign County Farmers' Co-operative Marketing Assn. has been organized at Champaign, Ills. This is the first organization of the kind to be chartered in Illinois. R. J. McCabe, of Rantoul, Ills., was chosen as president. Any farmers' elevator or live stock shipping association in Champaign county is eligible for membership.

Owing to the high price of wheat and other food grains, rice growers are receiving more for their crops this year than ever before, and this industry, which has assumed large proportions in some sections of this state is proving quite profitable. The rice crop grown on the Begley seed rice farm, near Dudley, Mo., has been sold to Southern buyers for $3 per bushel by Receiver Doane, under an order from Judge Knehans, referee in bankruptcy at Cape Girardeau. The crop is estimated at 15,000 bushels

Two steel barges loaded with iron ore from Minnesota, and convoyed by the U. S. dredge H. S. Tabor, and two coal barges, arrived last week, and the barges are being loaded for their return trip to St. Paul. The two barges are the first of the upper river fleet to make the trip to St. Louis. They are built with whaleback hulls and sloping sides. Each barge has a capacity of 3,000 tons. They are 300 feet long and 45 feet beam, and 10 feet deep. They each brought 650 tons of iron ore on their maiden trip to St. Louis, but later may be used for grain.

Four of the new 2,000-ton barges, containing 250,000 bushels of grain, and two of the smaller type barges, containing 1,000 tons of merchandise, representing the largest load ever taken in one tow on the new Mississippi government barge-line service, left yesterday from St. Louis for New Orleans. The load is equivalent to 300 freight carloads and the revenue to the river service in freight will be $22,500. The Government River Service expects to deliver the cargo in New Orleans in four and one-half days, which is less time than is required by the railroads to deliver shipments from St. Louis to New Orleans. The cargo is four times greater than any previously shipped down the river at one time on the barge lines. The grain was loaded for the Grain Corporation by the Marshall Hall Grain Co., and the J. H. Teasdale Commission Co. and consisted of milling wheat, which was purchased here by the Grain Corporation, for export.

TRADE MENTION

The office of the Williams Patent Crusher and Pulverizer has been enlarged in the same former building, the Old Colony, Chicago, Ill. M. J. Williams, general sales agent at this address and his associates are holding open house, Room 1615, with an excellent machinery display of their several models of mills, grinders, shredders, granulators, crushers, cutters, pulverizers, disintegrators, mixers, screens and accessories.

Gumbinsky Brothers Co., large Chicago bag operators, are installing a machine which will clean 40,000 bags daily. They are increasing their working floor space and contemplate handling even larger quantities of bags and burlap. It is interesting to note the care employed in such plants. This concern, for instance, vacuum cleans all their bags, giving seconds the advantage and almost the life of new bags. Gumbinsky Bros. Co. is making special effort with our trade and will quote spot or contract business in grain, feed, seed, bean and meal bags. Address the Company, Union and Lumber Sts., Chicago, Ill.

A new warehouse is to be erected for Fairbanks, Morse & Co., manufacturers and dealers in gasoline and oil engines, steam pumps, electrical and railroad equipment, etc., at Thirty-eighth Street and Loomis Place. The lot has a frontage of 300 ft. and a depth of 150 ft. The building will be of brick and concrete construction and will be three stories in height, however, foundations will be so arranged that two additional stories may be added when necessary. Approximate cost of the structure will be $315,000. Fairbanks, Morse & Co. are prominently identified with the grain trade as having exclusive sales privileges in the West for the scales of the E. T. Fairbanks Co.

The Monroe Calculating Machine Co. has removed its Chicago offices to 537 S. Dearborn St. Their equipment is finding growing favor with operators of grain elevators, mills, feed plants, as well as cash commission and brokerage firms handling such commodities. At this time of the year, when audits, tax returns and other bookkeeping details are kept closely cleaned up for the cut off of Dec. 31, such time and money saving machines as the "Monroe" are of course particularly valuable. This is true not only in the big cities but in country points; and such trade should be prepared for the big run of corn and have everything ship shape in their offices to handle the bookkeeping accounts on time and correctly.

Des Moines Booklet.

The Board of Trade of Des Moines, Ia., is distributing through its membership a most attractive booklet descriptive of Des Moines as a grain and milling center and the advantages which accrue to shippers of grain, seeds, feed, flour, hay and live stock to that market. Something of the city's transportation facilities, inspection and weight departments, advantages of Des Moines as a seed market, the industrial and civic life of the community are contained within its pages and numerous half-tone engravings make the reader familiar with the capital of Iowa. Geographically Des Moines is a logical terminal market for the surplus of a large part of the grain producing country of the United States, and this factor, accessibility to the great grain supplies of the country, coupled with the fact that the great railroads interchange freight at this point, justified the establishment of a grain exchange which undoubtedly will command a large share of the business of contiguous territory within a very short time. The compilation of the booklet is indicative of the care and forethought bestowed by the Des Moines Board of Trade to every detail which will promote the efficiency of the market, for it is admirably printed and most artistic in every respect.

Europe Coming Back?

A shipment of flax from Russia arrived in Vancouver on Nov. 21. The amount was small, being 150 tons of flax fiber consigned to New York interests, but it tended to verify Broomhall's prediction, made some time ago, that Russia would export wheat and Roumanian corn this year.—*Hulburd, Warren & Chandler, Chicago.*

RECEIPTS AT FEEDING STATIONS.

According to reports for the first nine months submitted to the Bureau of Markets by the various feeding stations tributary to Omaha market, big increases are noted in the receipts of cattle, hogs and sheep. This is especially noticeable for the months of July, August and September. While the movement to feeding stations has been unusually large, there has not been the corresponding increase in the movement to market centers. This has been traceable to the transfer of stock from the drought-stricken areas direct to new pastures and to leased feed yards.

Another cause for the gain in arrivals at feeding stations has been the enforcement of the 36-hour feed-in-transit law which compelled many producers to unload their stock at those points where a few hours more would have enabled them to reach a market center.

According to managers of feeding stations, 20 per cent of the receipts during the nine months went to pastures, 10 per cent direct to packers, and 70 per cent to market.

Kindly say: "I saw your ad in THE PRICE CURRENT-GRAIN REPORTER."

ARGENTINE CROPS AND PRICE COMMENT.

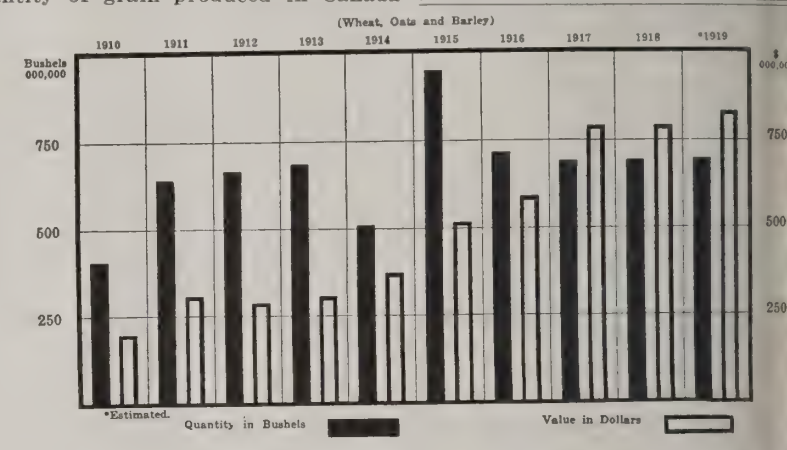
The weather during the past week has been decidedly favorable, the heavy rains having been followed by spring-like days. The result is that all growing crops are in excellent condition and will enter the critical November-December period in a good state to resist any climatic setbacks that may occur then. It is now generally acknowledged that the area sown this year is far more than had been only recently expected, and for our part we are convinced that there is almost a 20 per cent augmentation in linseed.

All these rumors and reports, combined with the favorable weather and a steady disinclination on the part of exporters to buy heavily, has caused quite a sensational slump in values of wheat, linseed and maize. This is a move which we had been expecting for many a week past. The recent level of values in this country has been absurdly high, and was only attained by an enormous speculative movement. Now that everyone realizes that prospects here are good, that they are above the average in other parts of the world, that there is no fear of starvation in any country unless the ocean transportation suddenly expires, a solid selling movement has sprung up.

ON LINSEED PRICES.

When linseed for February was quoted in the neighborhood of $37 we strongly advised all who could to sell for that date and to plant linseed heavily. Most of our growers followed the last part of the advice but neglected to make certain of the price by selling futures, and the result is that there will probably be a big crop and small prices. A twenty dollar drop in quotations in the course of six or seven weeks must be something of a record, in the same way as the sudden jump of that amount was unheard of. It is something the same in wheat, although in this cereal we think that there is scope for more reduction than in linseed, although this has by no means reached its lowest or its normal.

APROPOS CORN PRICES.



Wheat at $15 per 100 kilos is still in war value, and linseed in peace is worth little more than $12. Maize has been dropping steadily in sympathy with the other markets and due to the fact that selling pressure is now heavy as the stocks have been brought into good shipping condition. This great downward move in Argentine cereals has certainly not surprised us and should not have surprised any of our readers. We have been expecting it for some time past.

FOLLY OF ATTEMPTS TO CONTROL.

We are especially glad to discover that the Rosario brokers have given up their absurd attempt to maintain a fictitious level, by refraining from selling. The result is that they are now forced to sell at considerably less than the prices they would have attained if they had been less certain of their power to affect all the markets of the world. Some very big people have found it impossible to control grain values throughout the world and it is ridiculous for any one country to attempt it. The Rosario brokers have now failed twice in this sort of thing and we sincerely hope, for their own sakes and for that of their clients, that they have now learned their lesson. International values now prevail once more and it is absolutely impossible for any small group of operators to impose their will on the world. The realization of their lack of power created the record slump of the past week, for all the brokers in the northern market seemed to get weak at the knees at the same moment, although the first man to let go is probably bearing the brunt of the complaints, though possibly he does not worry, inasmuch as he must have skimmed the cream off the milk.—*Times of Argentina, Oct. 8.*

CANADIAN GRAIN YIELDS AND THEIR VALUES.

According to the official estimates, the yield of wheat this year will be 248,000,000 bus., as compared with 189,075,350 bus. in 1918. From recent threshing returns it is evident that the official estimates are approximately 10% over the actual yields, but even making due allowance for this, the crop for the whole Dominion will be slightly in excess of that of last year as shown in the graph below. There is a small falling off in the yield of other grain, but their value on the basis of the present prices will be greater than that of last year. The value of the chief cereal products, wheat, oats, and barley, on the basis of last year's prices, is $829,479,950 for this year's crop, as compared with $790,413,770 for last year's. Taking the grain crop as a whole the realizable value to the producer will be considerably in excess of that of a year ago. The graph below shows that the quantity of grain produced in Canada this year is considerably less th the year 1915, the value has inc very largely. Fodder crops su corn, hay and clover will yield than in any previous year since th began. The increase in the volu tobacco, fibre flax and linseed gro Canada will add substantially thi to the value of field crops.

Effect of Embargo Removal

The effect of removal of emba on wheat is variously construed. have in mind a recent newspaper that the Canadian Wheat Control had commandeered various grad wheat. This report was not confi Nonetheless, its publication su that the movement of Canadian into this country in any volum not be permitted. On the other release of export control by the G ment may increase the Europea mand, particularly so in case cred extended or the exchange market itself.—*Thomson & McKinnon, Ch*

BARLEY MARKETS.

WAUKEE.—The local barley mar- as rather unsettled throughout the opening strong and firm the fore- and showing a slight dullness to- the latter part of the week. While ots are light, all descriptions were y taken by industries and ship- though heavy qualities had the call. In the early part of the sharp competition resulted for the d offerings. Prices for the week 5@6c additional on export buy- ut eased off toward the close. Re- for the week were 151 cars, st 108 cars a week ago and 167 n 1918. Current quotations are: to choice, 48 to 50 lb. test, is le at $1.54@1.56; bright, $1.56 ; fair to good, 45 to 47 lb. test, 1.54; low, 41 to 44 lb. test, $1.41 36@40 lbs., $1.35@1.43; feed, 1.45. Iowa quoted $1.38@1.55; ht to fancy; Wisconsin, $1.42@ Minnesota, $1.35@1.54; Dakota, 1.54; feed and rejected, $1.35

UTH.—The barley market here feless during the last week as tt of lack of outside inquiry. Re- were limited, amounting to only s, compared with 343 cars during me period last year. Stocks of in the elevators here now ag- 443,000 bushels. The market rmly held closing 2c up at $1.15

ALO.—Barley dealers did a fair t of business this week, the first consequence in some time. Sev- und lots were sold, spot and for nt. This went to outside parties, naltsters not being in the mar- d acted as though they were to close up shop. Old malting oted $1.55@1.60, and feed $1.45 new malting, $1.48@1.52, and .40@1.46, on track or in store.

AS CITY.—Although receipts of increased 8 cars, to a total of market was strong. Shipping nd local manufacturing demand d the offerings and took 10,000 t of store. Most of the barley sample grade and went to fill orders. Oklahoma sent in the r grading No. 2 and it brought The market advanced 4@7c, to .33 for No. 3 and $1.28@1.30 4. Stocks fell to 121,000 bus. 178,000 a year ago.

AND.—Choice barley is in fair and plenty of it is offered at d prices. Nevertheless, the during the past week, the *Commercial Review* says, was very erratic as to prices. Receipts were small and the quality only fair to good, so that prices were up one day and down the next. Eastern shipments into the Pacific Northwest territory continued good but little is going to the Coast markets. There is quoted for No. 3 blue $66.50@67, feed quality, $66@66.50, and No. 2 Eastern, $65.

SAN FRANCISCO.—The barley spot market is quiet; futures a little more active. Buyers are rather scarce and little grain is being offered from the country. Values nominally $3.35@3.50 per cental, according to quality.

CHICAGO.—The barley market for the week opened very strong, with prices advancing. Receipts were very moderate and there was an excellent demand from all quarters, including shippers and the industries. With the turn of the week the market began to show some weakness; Wednesday prices, while firm, ceased to advance as had been the rule almost daily for the previous seven days, notwithstanding the fact that outside markets were generally higher. Receipts, however, were larger, but quality was not particularly good, and the latter part of the week there was a very decided slump. On Thursday, however, a choice car of Iowa barley weighing 48 lbs. was sold at $1.58, which was the top price of the season and 3c higher than general recent averages. Friday the market was decidedly lower with a large supply of grain of indifferent quality and by Saturday the collapse was quite marked. The unsatisfactory condition of the market from the sellers' point of view continued at the opening of Monday this week. Receipts were quite heavy and buyers slow to take hold, the result was a decline of 2@4c, which perhaps would have been still greater but for the industries taking the better grades at the decline. Sales of 22 cars were reported at a range of $1.36 @1.52. Futures, however, were firm—December at $1.44; May at $1.36½, after selling as high as $1.37½. Exports for the week from Atlantic ports were 377,000 bus., compared with 62,000 bus. a year ago.

RECEIPTS AND PRICES OF RYE

Receipts of rye at the principal primary markets of the Central West for the week ended November 21, and for the corresponding week last year as compiled by the Minneapolis *Market Record* were:

	1919, cars.	1918, cars.
Minneapolis	86	157
Duluth	122	430
Chicago	47	101
Omaha	25	36
Milwaukee	54	74
Total	334	798

Closing outside prices of rye of standard quality and spot cash for each day of the week beginning November 14 were:

	Mpls.	Dul.	Chi.	Oma.	Mil.
Nov. 14....	$1.32	$1.34	$1.35	$1.28	$1.36
Nov. 15....	1.33¼	1.34	1.35¾	1.29	1.36
Nov. 17....	1.35½	1.37½	1.36½	1.30	1.37
Nov. 18....	1.38	1.40½	1.39	1.33	1.39
Nov. 19....	1.37⅝	1.39½	1.39½	1.30	1.43
Nov. 20....	1.38⅞	1.39⅞	1.40	1.32	1.40
Nov. 21....	1.38⅜	1.40¼	1.42½	1.31	1.42

RELATIVE VALUE OF WHEAT AND RYE.

Increased domestic consumption of rye, heavy buying for export, and a higher market for corn have all united in advancing sharply the price of rye. Over $1.75 now measures the difference between the domestic prices of wheat and rye of the highest grades, while even wheat of the cheapest milling grade costs 90c over rye. As a breadstuff, a difference of from 20@30c has always been considered normal from a domestic standpoint, while the present world's difference in value is 25c, if the recent action of Sweden in fixing the price of wheat at $2.75 and rye at $2.50 can be considered as governed by world conditions. A readjustment is overdue. —*Blodgett-Holmes Co., Janesville. Wis.*

BROOM CORN.

The weather in the Southwestern broom corn area having been very good for farm work, not much activity was manifested in broom corn. Besides the weather it appears that Oklahoma districts are pretty well cleaned up, while in the Lindsay area there were still only small quantities in growers' hands. Generally speaking the balance of the crop which remains to be marketed, says the *Broom Corn Review*, is held principally in southwestern Kansas and adjoining sections of Oklahoma, Colorado and New Mexico. Prices, however, are not high enough to suit farmers and there is no rush to sell. The quality of the remaining stock is reported to be common only. Prices have not materially changed, ranging in southern and central Oklahoma from $100@200, with some extra quality commanding a little more. In western Kansas prices ranged from $100@150, with very best bringing only $175, while the standard and poorer grades sometimes fall below $100. The Wichita market is quiet; holdings in warehouses show a curtailment, but prices remain on the same general level, ranging from $100@300 with bulk at $125 @250. In Illinois there is no change, the better part of this crop has been put up and the remainder is held firmly by farmers, prices ranging from $265 @325 a ton.

BAG SITUATION.

Burlap prices have been well maintained in spite of arrival of goods from Atlanta within the past fortnight, and there now seems little reason to expect any material decline in prices, at least, before after the end of January. However, some think there may and will probably be a slight decline, possibly around 10c a thousand, due to the lessening cost of manufacturing brought about by actual conditions which arise when the amount of goods turned out in a day more nearly approximates the capacity of the plant.

Orders for arrival after New Year's are considerably stronger than they were a couple of weeks ago and the entire tone has extended into the latter part of April deliveries.

It appears inevitable cotton bag prices must advance, even though raw cotton for the moment appears to be somewhat weak. The mills are holding firm for prices on bag construction.

Flour Department

Reaching grain dealers who handle flour as a side line and for millers, flour brokers and distributors who wish to interest grain and feed dealers in the handling of their product.

The Northern Flour Mills Co. of Portland, Ore., has been incorporated with a capital stock of $500,000.

The Astoria Flouring Mills Co. of Portland, Ore., has increased its capital stock from $200,000 to $1,000,000.

The Valley City Milling Co. of Grand Rapids, Mich., has increased its capital stock from $500,000 to $1,000,000. A mill will be erected with a daily capacity of 16,000 bbls.

Construction will start immediately on a seven-story reinforced concrete mill for the Eagle Flouring Mills Co. at Portland, Ore., on the tract adjoining the 2,000,000-bushel municipal grain elevator. The company has secured a 50-year lease on the property. The plant will have a daily capacity of 2,000 bbls.

Another page in THE PRICE CURRENT-GRAIN REPORTER refers to new flour mills and increased production in several places in North Carolina. Much has appeared regarding the increased milling operations of the South, and there is still room to grow. North Carolina, for instance, still imports 75 per cent of the flour consumed.

In return for the use of one side of the Government dock the Imperial Rice Milling Co. of Vancouver, B. C., Canada, offered the Government $42,900 rental and the guarantee to allow the Canadian National Railway to haul all the company's grain to the coast. It was estimated that the milling company would use 15,000,000 bushels of grain in its new mill; would ship 88 cargoes of flour annually and would bring 10,980 cars of wheat to Vancouver.

FLOUR MARKET.

The flour market seems, so far as price advances are concerned, to have come to a temporary halt. In the East, while nominally prices were unchanged at the close of the week, as a matter of fact, it was an open secret that some holders were willing to make some sacrifices in order to make sales. The family trade seemed to be pretty well filled up and the demand from that source has been decidedly slack. The same tendency appears to less degree in the West, all of which was probably due to the big advance in wheat premiums in the Northwest. The Grain Corporation's operations in flour also had some, but not apparent, effect upon the market, it being the policy of the Government at this time to reduce the price of flour as much as possibly, probably for sympathetic effect, as it really has very little to do with the general complaint as to the high cost of living, which is due to entirely different causes than to the price of bread. The *Northwestern Miller's* report for last week says the situation in general is "frankly unreasonable. Millers want to dispose of their clears and can find no market for them."

Wheat-Flour Production.

The Grain Corporation's weekly bulletin covering the wheat and wheat flour movement throughout the United States for the week ending Nov. 7th, in comparison with the figures for the same period a year ago, is as follows:

	1919.	1918.
Wheat receipts—	Bus.	Bus.
From farms.....	15,160,000	13,673,000
Previous week.....	18,819,000	15,597,000
June 27 to Nov. 7...	569,282,000	544,578,000
Flour produced—	Bbls.	Bbls.
Week	3,209,000	2,194,000
Previous week.....	3,340,000	2,294,000
June 27 to Nov. 7...	52,433,000	43,176,000
Total wheat stocks—	Bus.	Bus.
All elvtrs. and mills.	294,406,000	292,435,000
Previous week.....	293,993,000	287,881,000
Change	+413,000	+4,554,000

EXPORTS WHEAT AND FLOUR.

Exports of wheat and flour, July 1 to Nov. 7 amounted to 59,327,000 bus. of wheat and 6,154,000 bbls. of flour, a total equal to 87,020,000 bus., compared with 67,273,000 bus. of wheat and 6,104,000 bbls. of flour last year, first seven days in November prorated from monthly report, making a total equal to 94,741,000 bus.

FLOUR MARKETS.

KANSAS CITY, MO.

Kansas City, Nov. 22.—With wheat offerings more liberal and the distribution of federal stocks impending, there was an easier feeling in the flour market this week. Most of the mills reported very light new sales, but several sold as much as they made. There was encouragement in the Government's announcement of intention to resume purchases of straight and first clear for export. Eastern demand was curtailed by the United States Grain Corporation's plan to resell stocks of the straight flour at retail. Operations of mills were heavy, and shipping directions on old bookings were larger. The week's output was 85,500 bbls., against 76,000 a week ago and 54,300 a year ago.

Following are the Kansas City prices of flour in carlots, sacked in 98-lb. cotton bags, per bbl.:

Hard wheat—	Nov. 22.	Nov. 15.
Short patent	$12.30@12.90	$12.50@13.50
Long patent	12.00@12.50	12.25@12.75
Straight	11.00@12.00	10.25@10.65
1st clear	9.50@10.50	10.50@11.50
2nd clear	8.50@ 9.50	8.50@ 9.50
Low grade	6.00@ 7.50	6.00@ 7.50
Soft wheat—		
Fancy patent	11.00@11.30	11.10@11.40
Standard patent..	10.60@11.00	10.75@11.15
Straight	10.10@10.50	10.25@10.65
Clear	9.50@ 9.90	9.50@10.00
Low grade	6.50@ 7.50	6.50@ 7.50

BALTIMORE.

Baltimore, Nov. 22.—There is a firmer feeling in spring wheat flours and such are not freely offered. Soft winters are in ample supply and unaccountably dull, considering the discount at which these are underselling springs. Rye flour is very draggy. Quotations, per 98 lb. cotton or jute sacks, follow: Spring patent, $13.50@14; straight, $12.75@13.25; winter patent, $10.50@10.75; straight, $9.50@9.75; rye flour, pure to blended, $6.75@7.75.

PHILADELPHIA.

Philadelphia.—Flour receipts for the week were 800 bbls. and 10,070,634 lbs. in sacks. The market maintains its firmness in sympathy with the high cost of wheat and prices on spring wheat products are generally held 50c to $1 per bbl. higher, but demand is slow and most buyers are able to supply their wants for present requirements through resales which are available below mill limits.

Quote 198 lbs. packed in 140-lb. jute sacks: Soft winter straight, western, $10@10.50; soft winter straight nearby, $9.50@10; hard winter straight, $12@12.50; hard winter short patent, $13@13.50; spring first, clear, $9.75@10.25; spring first, patent, $13@13.75; spring first, short patent, $13.80@14.50; fancy spring and city mills, patent, family brands, $14.50@15.

Rye Flour—$7.50@8 bbl. in sacks, as to quality.

CINCINNATI.

Cincinnati, Nov. 22.—Both millers and jobbers reported a brisk demand for flour the past week, with buying for family use especially active at unchanged prices. The market continued to reflect the strength of the Northwestern situation, but further advance in wheat in the local market prices steady to firm. The removal of embargo restrictions on imports and ports of wheat and flour, effective De as announced by the Grain Corpor late in the week, is expected to further present prices in wood unless othe prove the flour situation. Quotations stated. Wood basis is 45c over jute. ter patent, per bbl., $10.85@11.15; hard ent, bbl., $12.80@13.50; bakers Kan. 140 jute, $11.75@12.35; corn flour, 100 s inc., $3.30

NASHVILLE.

Nashville, Tenn., Nov. 24.—Deman flour from the southeast continues for this season, and indications are business will continue heavy until the of the year. Soft wheat flour is very s on account of the high price of whea

Nashville and southeastern mills, capacity of 209,790 barrels, had output week of 153,870 barrels, or 73.3 per ce capacity, which compared with 71.5 cent the preceding week, 44.5 per cen same week in 1918, 81.5 per cent in 73.2 per cent in 1916 and 68.3 per ce 1915.

Prices: Best soft winter wheat pat 98 lbs. cotton, f. o. b. Ohio river p $11.50@11.85; standard patents, $10.80 straight patent, $10.50@10.70; first cl $8@8.50.

BOSTON.

Boston, Nov. 22.—Local trading has somewhat irregular, some dealers repo a fair business doing, while others finding the market dull. In spite o the factors tending to create uncerta prices have been steadily advancing, cially for spring patents, which are 2 50c higher than a week ago, and winter patents, which are up 25c to Current quotations, f. o. b. Bostor carload lots, mill shipment, for 196 in 98-lb. sacks, are $13@14.25 for stan spring patents; $14@14.50 for special patents; $9.25@10 for spring clears; $12 13.50 for hard winter patents; $11@ for soft winter patents; $10.25@10.7 soft winter straights, and $10@10.5 soft winter clears. Receipts for the ending Nov. 22 were 159,140 bus.

DULUTH.

Duluth, Nov. 22.—Flour prices again advanced to new high points on movement during the last week. Me were compelled to pay fancy premium spring wheat for mixing. Millers rep a record rush to load last package fr boats for season with flour for the Ea markets. Prices of flour in barrels in lots at mill are as follows: Family ents, jute, $13.45@14; bakers' patents, $13.20@13.75; clears, $9.75@10; se clears, $6.75@7.

MILWAUKEE.

Milwaukee, Nov. 22.—The local market continues very strong with v showing decided increases for the v Premiums for the cash stuff have t a tremendous leap forward, which i flected in the greatly increased pric flour—spring wheat patent being qu 95c@$1 higher, straight $1 higher on and 70c higher on outside prices, and clear 50c@$1 advanced.

Buyers from every source are very a and are particularly anxious to get pr shipments. East is buying freely and ping directions are free.

The rye flour situation remains s neutral to little improvement. Value up slightly, largely in sympathy wit increases on wheat.

The Milwaukee flour mills produc total of 21,020 barrels of flour the week, of which 17,520 barrels were flour or approximately 73 per cent of capacity, and 3,500 barrels of rye Current quotations in carlots, per bb cotton, are:

Spring wheat patent, $13.45@14; stra $12.65@12.95; first clear, $9@10; rye pure, white, $7.60@7.95; rye flour stra $7.20@7.35; rye flour, dark, $6.05@ Corn flour is nominally quoted at cornmeal, white, $3.90, and corn $3.85.

NEW YORK.

New York, Nov. 22.—Very impo moves by the Government in conne with the flour trade were the prin factors in flour last week. The anno ment that the Grain Corporation wil through retail channels to consum straight flour in small packages at based on cost was an entirely new of the situation, and was resorted order to place before the consum cheaper flour than the fancy grades have recently advanced to unusually levels.

Furthermore, the Grain Corporatio nounced that it will on Nov. 25 re making purchases of straight flour on Dec. 4 will buy first clears. On Su day, the announcement was issued Washington that on Dec. 15, import export restrictions on wheat and flou be removed, and that after that date commodities can be imported free of and exported without restrictions.

It was the consensus of opinion i flour trade here that all of these r by the Government might be expect have depressing influences on values in consequence, the market was very ous and developed an easier under Prices were not greatly altered, but in close touch with the flour situatio pressed the belief that the family which has been the principal buyer of has been about filled up, and that the look is for a less active demand this source. What actual influence ings of soft flours to the public an

noval of restrictions on importations will ve remains to be seen, and it will de- id largely on the attitude of buyers and volume of importations. Quotations ged as follows: Spring patents, $13.25@ 25; Kansas straights $12.50@13.25, and t winter straights $10.10@10.30.

TOLEDO.

oledo, Nov. 22.—Flour production of edo mills this week was better, at 00 bbls. or 60 per cent of capacity, as inst 29,700 bbls. last week and 25,160 s. the corresponding period last year. h the Government returning to the ing side next week the situation is ted upon with more optimism. Wheat es advanced during the week, No. 1 winter selling at $2.28½; No. 2, $2.27¼; 3, $2.22@2.23½, basis Toledo, rate of to New York. The Government price, edo, is $2.39, and millers are still able purchase well under that figure. Win- patent about 40c up, to $10.50@10.70; ng and winter blended patent, $11.20; ight Kansas hard patent, $12.20 per basis 98-lb. cotton.

E CORPORATION WILL BUY FLOUR.

he Grain Corporation having re- ed offers, for one day only, ending m., Nov. 26, for "straight" flours, ounces a similar offer for one day, ng 12 m. Dec. 4, for the "First Clear rs" subject to the flour purchase of July 7, 1919, with the following tions and amendments: Shipment in sixty days. The Corporation re- es the right to order shipments to seaboard or inland destination and make proper freight adjustments rdingly. Millers will make price "straights" in specification jutes in bulk; if packed in buyers' sacks, ers' National Federation differen- to apply; purchases to be based on samples now on file unless other- specified. For clears, 1 pound le shall be mailed at once properly ted with brand and date, to F. O. er, Flour Department, United s Grain Corporation, 42 Broadway, York, N. Y., same to be basis of s. Mixed clears are not wanted. s already packed in good ten and alf ounce common jutes accept- at 5 cts. per barrel allowance.

CORPORATION WILL ALSO SELL.

heat Director Julius Barnes has put olution of one phase of the high of living directly up to the con- r, by making it possible for the aser of flour, says a circular from ew York office, "to decide for him- whether he will continue to pay prices for special brands or buy lower price pure straight flour from the finest wheat. Following ference of the vice-presidents of astern zones of the Grain Corpo- with Mr. Barnes, the Corporation nnounced that it will offer to the trade, particularly in the large under its own brand, standard wheat straight flour in 24½ and b. packages, at prices which will the Grain Corporation's buying of the flour. This will place in the of the consumer a class of flour from the best wheat and used in quantities before the war by both and the grocery trade. The offered is the regular straight It is in no way identified with r grade flour, a distinction which be fully appreciated by the con-

mors, possibly inspired by over- flour salesmen, have been cur- n the market from time to time impending flour shortage and the lity that the use of substitutes be resumed. Mr. Barnes asserts here is no authority whatsoever present food regulations for the tement of the use of substitutes var flour.

ng to the short crop of spring this year, 203,000,000 bushels against 359,000,000 bushels last year, certain grades of flour are scarce. However, figures for the total crop of wheat show 918,000,000 bushels against 917,000,000 bushels last year. In addition to this 57,000,000 bushels of old wheat were carried over. The production of flour has been extremely heavy; for the season ending Nov. 7 it has amounted to 52,433,000 bbls. against 43,174,000 bbls. last year. Exports have been only about the same as last year. Consequently flour stocks are very heavy and amounted to about 50 per cent more than a year ago on Nov. 1. Many reports concerning scarcity of flour and advancing prices for certain grades have reached Mr. Barnes. The facts are that stocks of flour are very large and production enormous. Therefore, the Wheat Director has determined to place in the hands of the retail trade in the large cities, particularly, a supply of straight flour from the immense stocks of the Grain Corporation at nominal prices. This flour will be available in about three weeks in the larger cities. It is expected the retail price will be about 75c for a 12¼-lb. sack."

"Unquestionably this decision was reached," says Pope & Eckhardt Co., Chicago, "to counteract the steadily advancing prices for the millers' brands, which apparently have been marked up by giving too generous consideration to fancy prices paid for the spring wheat selections. To an interested observer it is gratifying that the big stocks of wheat, and possibly flour, owned and controlled by the Government, will to some extent be used to modify 'costs at home.'"

Monday's Corn Market.

The Chicago corn market on Nov. 24 was weak and strong by turns. The early strength was due to short covering; and after it had been accomplished, the market relapsed and sold off over a cent a bushel, but rallied sharply near the close with final figures ½@1⅜c higher than Saturday. The news was generally bearish. Other primary markets were not so good, Kansas City 5@7c lower, Omaha 3@5c lower and generally a slow demand. There was further talk of export business, but nothing confirmed. The weather map and predictions suggested colder weather. The coal situation is still the vital force causing narrow markets and trade Monday was mostly professional. —*Barlett-Frazier Co.*

It was announced early that the plants of the Corn Products Co. would be in operation this Monday morning, and this industry was a buyer of cash corn in consequence. Hogs were strong and higher early, but much of the early advance was lost. Local receipts were disappointing. The possibility of war with Mexico proved a bullish factor, particularly in oats.—*Hulburd, Warren & Chandler.*

Corn strong over a higher range; the close a net gain of ⅝ for December and about 1⅜ for January and May. With the larger arrivals came also a better demand for the cash offerings; local industries again actively in the market and competing with the shipping houses.—*Pope & Eckhardt Co.*

The preliminary census of the live stock of Germany taken on Jan. 2 last shows the following comparisons:

	1919. June 2.	1918. June 2.	1913. Dec. 1.
All cattle...	16,798,815	17,228,855	20,443,827

FOREIGN

The peanut crop of India is forecasted this year at 1,274,000 acres.

Food shortage is reported in Hungary and all symptoms point to a very hard and severe winter, with the Danube frozen over early.

Rot disease of potatoes is spreading very rapidly throughout Great Britain and reaching districts where it was never previously known.

Foot and mouth disease is now ravaging all parts of Switzerland and the affected cattle are being slaughtered by the military authorities.

It appears that the manufacture of linseed oil cake in England is not equal to the demand. Nevertheless, a considerable proportion of the production has been shipped to Scandinavia.

The estimated yield in South Africa, according to latest official returns, is approximately 24,000,000 bus., compared with 24,400,000 in 1918, and 32,000,000 as the 5-yr. average 1913-17.

A White Paper issued by the Board of Agriculture of Great Britain says that prices of grain, livestock and other farm produce of England and Wales are 153 per cent of those of 1918.

The estimated yield of wheat in Holland this year is 750,000 qrs., against 601,000 in 1918; of rye, 1,639,000 qrs. vs. 1,189,000 a year ago. Barley and oats also show material increases.

Secretary of the Board of Agriculture of Great Britain says that the average price of imported wheat is approximately 15sh. per quarter above that paid to farmers for home grown grain.

Oats on the Hamburg Grain Exchange have been released and are now on a free market basis. Consequently they have advanced rapidly, because wheat and barley are still under the control of the government.

Although weather conditions have been more encouraging, wheat sowings in England up to Nov. 1 were small. The price fixed by the Food Controller is said to be too small to stimulate culture, and farmers are giving their attention to other products.

Lloyds correspondent at Constantza, Roumania, says that country expects to export from 500 to 100 tons of oil cake in Nov.-Dec., and that all told about 15,000 tons out of a year's production of 35,000 tons will be available for shipment. The government also expects to ship about 10,000 tons of beans. Bran also has been made available for shipment. The government will allow the exportation of about 90,000 tons also of wheat, rye, oats and barley. No large quantities of corn will be available for export until spring time.

ARGENTINE EXPORTS.

Con. Gen. Robertson, Buenos Aires, reports following among other figures showing the principal Argentine exports in long tons for the first eight months of 1919, the principal countries of destination, and the total amounts for the corresponding periods of the preceding five years:

In addition to the foregoing, barley exports were nearly five times as great as during the first eight months of 1918, 15,828 tons being exported from January to August, 1919. Only 460 tons of bran were shipped, all of which went to Denmark.

September's exports were 361,231 tons of wheat, 263,113 of corn, 125,217 of linseed and 28,300 of oats.

FRENCH CROPS IN 1913.

Con. Gen. Thackara, Paris, reports that the *Journal Officiel* on Oct. 10 published on authority of the French Ministry of Agriculture, the following approximate figures of the French crops during the present year (comparison with 1918 and 1914, the latter having been the last normal year under survey):

Crop and year.	Acreage.	Production. Metric tons.
Wheat:		
1919	11,315,724	4,843,817
1918	10,992,957	6,143,584
1914	14,975,410	7,693,606
Spelt:		
1919	223,926	92,733
1918	206,418	95,982
1911	295,198	135,355
Rye:		
1919	1,816,637	707,001
1918	1,745,718	734,986
1914	2,613,991	1,114,714
Barley:		
1919	1,339,922	514,392
1918	1,371,083	598,200
1914	1,780,302	975,815
Oats:		
1919	6,815,410	2,442,932
1918	6,720,868	2,561,976
1914	8,872,727	4,620,634

During the war it will thus be seen that the French cereal production decreased on an average about 40 per cent, while the falling off in oats reaches nearly 50 per cent. It is estimated, on the basis of the above figures, that imports to cover the deficit in wheat will amount to some 3,500,000 tons, and the leading French newspaper *Le Temps*, states that even this figure will be insufficient unless steps are taken to stop the present waste caused by feeding stale bread to animals.

Canadian Exports of Wheat.

The exports of wheat and flour, as wheat, reported by the Customs Department of Canada:

	1919-20.	1918-19.	1917-18.
September	4,279,000	3,529,000	6,156,000
October	.....	8,325,000	17,176,000
November	.....	7,023,000	29,192,000
December	.....	13,426,000	33,756,000
January	.....	10,164,000	8,492,000
February	.....	4,149,000	9,573,000
March	.....	6,766,000	13,500,000
April	.....	6,613,000	11,074,000
May	.....	11,923,000	7,765,000
June	.....	11,612,000	8,613,000
July	.....	13,648,000	3,501,000
August	.....	9,562,000	3,791,000
Season	.....	106,740,000	152,590,000

BELGIUM'S RECOVERY.

Belgium is recovering from the effects of the war more rapidly than any other country. In all lines of production and trade the Belgians are at work—hard at work. As is their natural characteristic, they are producing and saving. They never "lost their heads" during the war and her working people are as sane now, an example to all people of rational living in these days when most men live and act like fools. During the first half of 1919 the imports reached 1,648,513 metric tons, valued at 2,206,467,000 francs; while the exports were 3,550,680 tons, valued at 590,824,000 francs. Among the articles traded in (measured in kilos) were the following (prices are really to uncertain a measure of trade that they are here omitted):

	Imports.	Exports.
All live animals	16,979,699	252,866
Cows	6,113,195	56,260
Heifers	1,221,967	43,973
Swine	70,047	2,050
All food stuffs	346,530,752	132,829,225
Milk, etc.	1,320,573	260,201
Butter	2,325,940	260,471
Margarine	5,335,463	1,738,157
Grains:		
Wheat	8,739,705	395,969
Rye	2,030	200
Barley	18,199,417	1,627,039
Oats	28,553,103	188,465
Corn	13,573,446	1,774,512
Rice—		
In the husk	6,580	.....
Husked	6,609,760	2,418,272
Buckwheat	78	191,414
Flour:		
Wheat	58,144	913,545
Oat	247,131	27,600
Corn	537,675	5,365,379
Other	168,778	1,130,506
Malt	4,582,858	483,795
Dried beans, peas, etc.	1,237,038	17,943,197

CANADIAN WHEAT CROPS.

Frank O. Fowler of the Northwest Grain Dealers' Association, at Winnipeg, on Nov. 21, published a crop estimate for Manitoba, Saskatchewan and Alberta, as of Nov. 15, as follows:

	Acres.	Yield per acre.	Total, bus.
Wheat	16,085,000	10.5	168,892,000
Oats	9,626,000	25.2	242,575,000
Barley	1,955,000	19.0	37,145,000
Flax	1,000,000	7.0	7,000,000
Rye	216,000	11.0	2,376,000

The wheat situation on Nov. 15, as follows:

	Nov. 15, 1919, bus.	Nov. 1918,
Inspected to date	60,329,000	53,015
In store country points	24,500,000	30,536
In transit, not inspected	4,500,000	5,200
Allowed for seed, etc.	36,000,000	36,000
	125,329,000	.....

This leaves a balance in farmers' hands to market 43,563,000 bus., the amount yet to be inspected 72,563,000 bus. Other grain inspected to date and in store country points as follows:

	Inspected to Nov. 15, bus.	In store country points,
Oats	16,269,000	10,900
Barley	4,731,000	2,227
Flax	601,000	502
Rye	1,023,000	.....

Merely as a matter of curious interest it may be stated that a thoroughbred Wyandotte hen was buried under hay for 121 days at Fontanelle, Ia., and subsisted on timothy and clover hay and came out of its exile in pretty good shape. Nothing was said about any "booze" it had to drink.

Michigan expects to have the largest state exhibit of farm products that will be seen at the International Hay and Grain Show at Chicago on Nov. 29 to Dec. 6. The exhibit will feature Michigan's seed industries and include pure greed seed of all types.

Foreign Importers, Manufacturers and Dealers

In the resumption of exports from the United States and Canada, it is desirable to be properly represented abroad for the distribution of grain, seeds, flour, millfeeds, provisions, concentrates and feedstuffs of all kinds. We suggest that correspondence be opened with the following specialists:

A. RAVAUD
Grain and Flour Agent

A. D. HARBIN, - - Chattanooga, Tenn.

Fergus Falls, Minn.—The elevator of the Ulland Land Co. recently burned to the ground. It was situated on the Downing farm.

Chatfield, Minn.—Fire caused a loss of approximately $5,000 to the Halloran Flour Mills at Chatfield. Loss covered by insurance.

Sauk Rapids, Minn.—Frank Perske is the proprietor of the Neils elevator and will change the name to the Sauk Rapids Elevator Co.

Argyle, Minn.—The Argyle Farmers Grain Co. has been incorporated with a capital of $25,000. L. B. Riopelle, Edwin J. Riopelle, Oliver Riopelle and others are the incorporators.

Minneapolis, Minn.—The state will have experimental state-owned and operated flour mill when plans authorized by recent special session of state legislature are carried out, to be located in either St. Paul or Minneapolis.

MISSOURI.

Success, Mo.—W. N. Huskey has sold his mill to Geo. Jackson.

Center, Mo.—H. J. Smith is now manager of the elevator here.

Nevada, Mo.—The Moss & Mead Milling Co. has begun the operation of its new mill.

Seymour, Mo.—The Ozark Milling Co. has completed its new 9,000-bushel elevator.

Princeton, Mo.—The I. N. Fehr Milling Co. has opened a new branch house at Princeton.

Eminence, Mo.—The Electric Light & Milling Co. has bought a flour mill and will install it this winter.

Osage City, Mo.—The James M. Hays Wood Products Co. will probably construct a large elevator at Osage City to care for the wheat crop of next year.

Bowling Green, Mo.—Petitions are being circulated here to know if the people of Bowling Green want Mayor W. J. Hume to rebuild the mill which recently burned.

Rayville, Mo.—An elevator having a capacity of 10,000 bushels of grain and a modern brick business building will be erected in Rayville early next spring by Elwood Clark & Co. The improvements will cost $10,000.

St. Joseph, Mo.—A chemical laboratory is being opened up at the Grain Belt Mills to work in co-operation with the other plant departments. V. S. Bentley is the chemist in charge. The management of the mills is also constructing a corrugated iron garage to accommodate the motor cars of its employes.

MONTANA.

Square Butte, Mont.—H. H. Hillman of Oshkosh, Wis., is the new manager for the McCaull-Webster Elevator Co., having succeeded A. J. Fuller who resigned.

Winifred, Mont.—The recently incorporated Winifred Mill & Elevator Co. has succeeded the Farmers Elevator Co. and is operating the elevator, but not the mill, which has not as yet been completed.

NEBRASKA.

Osmond, Nebr.—W. O. Trotter has succeeded the Atlas Elevator Co.

Loup City, Nebr.—The Farmers Union contemplates the erection of an elevator.

Bushnell, Nebr.—The Lexington Mills & Elevator Co. has just completed a new elevator at this place.

Howe, Nebr.—R. E. McTaggert resigned as manager of the Farmers Union Elevator Co. and Frank McCoy succeeds him.

Gresham, Nebr.—R. L. Thompson is now in possession of the elevator he recently purchased from the Updike Elevator Co.

Norfolk, Nebr.—Articles of incorporation have been filed for the Farmers Union Co-operative Association by W. B. Rice, Gustav Schultz, etc.

Friend, Nebr.—The Acme Mill & Elevator Co.'s plant was damaged in a recent storm to the extent of $500, which was partly covered by insurance.

West Point, Nebr.—The new 50,000-bushel elevator of the Farmers Elevator Co. is completed. The house is of cement concrete tank construction and cost $50,000.

Royal, Nebr.—Farmers who are organizing a company in this vicinity have purchased the elevator of Staat & McGubb and will take possession and operate it at an early date.

NEW JERSEY.

Hoboken, N. J.—The Apex Flour Co. has been granted a new charter; capital, $50,000. D. G. Marotta, M. J. Tackelia of Hoboken and C. M. S. Langione of Newark are among the incorporators

NEW YORK

Rochester, N. Y.—The Rochester Parquet Flour Co. has increased its capital from $10,000 to $25,000.

Brooklyn, N. Y.—The Liberty Hay & Grain Co. of Brooklyn has been chartered with a capital of $10,000. Directors are Simon A. Pode, I. Goldberg and Sam Pedelsky of Brooklyn.

Why Corn Prices Hold.

To restore the market to normal conditions, a complete reversal of the present situation is absolutely essential. The tendency of prices bears this out very forcibly. So long as stocks remain small, receipts light and the cash demand of sufficient proportions to prevent accumulations, prices are not apt to yield perceptibly. This is based on a purely supply and demand basis, barring entirely other factors that enter into the situation as dominating influences. Spring wheat, for instance, is selling for more than double the price of corn. A car of No. 3 northern spring sold at $3.10 per bushel, which is proportionately higher than $3.20 paid for No. 1 Northern spring this week.—*Simons, Day & Co., Chicago.*

Transient corn huskers around Webster City, Ia., refused to abide by the husking prices fixed by the county agent and farmers are now hunting huskers.

Field Seeds

Ernest Blayock plans opening a general seed store at Blythe, Ark.

The Emery Scott Seed Co. has filed articles of incorporation under the laws of Kentucky, to conduct a general seed merchandising business at Louisville. Incorporators are Wm. M. Scott, Chas. M. Scott and Raymond C. Emery. Capital stock, $10,000.

Kansas City Seed Market.

KANSAS CITY, Nov. 22.—The seed situation exhibited no remarkable changes this week. Interest continued to concentrate in millet and cane, the season for movement of which has begun. There were scattered offerings of millet seed and inquiries for bids on cane seed denoted good shipments next month or before. Not much was done in Sudan grass seed, or houses here had handled considerable quantities from Texas previously. Alfalfa seed moved lightly and maintained its firm tone. There was a normal trade in timothy seed. Very little clover seed was available, owing to the short crop in Kansas City's territory. Bluegrass seed arrivals were light and the trade was mainly in the way of distributing cleaned seed bought earlier.

Following are the prices of seeds, quoted as firm first hands, in carload lots, sacked:

Alfalfa—Per cwt., $25@30.

Timothy—Per cwt., $9@10.

Bluegrass—Per cwt., rough, $10@15; cleaned, $17@27.

Clover—Per cwt., $35@45.

Millet—Per cwt., German, $3@3.25; Siberian, $2.50@3; common, $2.25.

Sudan—Per cwt., $9@11.

Cane—Per cwt., red top, $2.25; orange, $2; amber, $1.50@1.75.

Toledo Seed Movement.

Following is a comparative statement of receipts and shipments in bags of forage grain seeds at Toledo for week ending Nov. 22:

Weekly Linseed Review.

NEW YORK, Nov. 22.—*United King-* There were quite liberal ar- of linseed into the United King- uring the past week and sup- re now of satisfactory propor- A fair business has been pass- the new crop Plate grades for shipment, but this is mostly tive. Indians continue to be of- sparingly with shippers' prices ly out of line, and trade in these remains stagnant. Linseed oil trong at three shillings per cwt. e on the week.

.—Receipts at the shipping ports een very light, and shipments to only 144,000 bushels, practi- ll of which is destined to the Kingdom. More rains are need- the new seedings.

routine.—New crop deliveries to- e close of the week, turned easy peculative offerings increasing and farmers displaying a more willing attitude to sell. However, the nearby position in the Southern grower remains very firm with exporters absorbing. Old supplies of seed are rather scarce, and offerings are light.

The weather continues fine and cutting of the new crop has been making good progress. On the whole the outlook for the new crop, despite the recent frost, is generally favorable, and a substantial outturn is expected. There have been no changes in the tonnage situation, boats being still scarce, and rates remaining very firm.

Milwaukee Seed Movement.

Movement of seeds at Milwaukee during week ending Nov. 22, 1919, reported to PRICE CURRENT-GRAIN REPORTER by H. A. Plum, secretary of the Chamber of Commerce:

	Receipts 1919.	Receipts 1918.	Shipments 1919.	Shipments 1918.
Timothy, lbs..	30,000	30,571	25,000	335,900
Clover, lbs....	124,761	127,624	96,693	226,400

Toledo Seed Prices.

The following table shows the range of prices for seed on the Toledo market for cash and the futures of clover, alsike and timothy seed for the week ending Nov. 22:

	Rng. for wk. High.	Low.	Close Nov.22.	Close Nov.15.

Duluth Flaxseed Market

DULUTH, Nov. 22.—As result of the interdiction by the board of directors against quotations in futures being advanced over the limits set on Nov. 7, the day of the Standard Grain Company's suspension, operations in the flaxseed market during the last week were confined to readjustments of old trades, and with the exception of the May option, prices held right up at the top. Country selling in the May future was noted on two days, but support appeared whenever prices were carried down a couple of points, and prompt recoveries came about. Spot seed was wanted, and its figure was advanced 5c to a range of from $4.77 to 4.95.

The proposal to make No. 1 flaxseed, wherever grown, regular for delivery on new future contracts, was voted on favorably by the Board members on Saturday, just as had been expected. It is thought that the new regulation should result in the creation of a healthier condition at all times through placing a bar against any possibility of a corner being manipulated in any delivery and the consequence of the market being carried up to unduly high price levels on occasions.

Receipts have been only a fraction of normal for some time back, the aggregate for the six days of the week amounting to 30,254 bus., compared with 297,397 bus. last year, and with shipments of 26,762 bus., stocks in the elevators were brought down to 69,000 bus.

Closing prices of flaxseed on the Duluth market on Saturday compared with the previous Saturday and last year were:

	Saturday.	Wk. ago.	Yr. ago.
On track.....	$4.77-95	$4.77-90	$3.80
To arrive.....	4.76	4.80	3.61
November	4.75	4.75	3.77½
December	4.66	4.66	3.60
May	3.51	4.51	3.56
July	4.50	....	....

SEED SITUATION.

SEED STOCK AND PRICES.

PORTAGE, WIS. (5).—The stocks of alfalfa and alsyke clover seed are exceedingly small and prices high; we believe prices will continue high throughout the year. We are having a good demand for both.

RED CLOVER.—This crop is short and prices high. We rather believe that there is a larger production of Red Clover seed than was first anticipated. We are having a fair demand for seed and do not expect either a large advance or a large decline throughout the season. Carrying charges will of course make clover higher in February, March and April.

Regarding Timothy seed our information leads us to believe that the stock of seed throughout the country is very heavy. In case the political situation clears up and money credits are established with European countries, it is possible that we would have a good export demand for timothy seed and probably a little better price.—*T. H. Cochrane Co.*

Effect of Clover Imports.

Clover seed at $30 is two-sided. The future price depends largely upon imports. It is difficult to get line on them; imports to date are all old seed. New York reported only 650 bags in last week, while Baltimore exported 270 bags. The new crops in Europe are not large, but mostly of better quality.

Decline in foreign exchange makes our prices attractive to them, says Southworth & Co., Toledo. Domestic crop very short, and with lack of reserves from last year, liberal importations is all that has kept clover from reaching higher levels.

Evansville, Ind., Seed Trade.

The past week Evansville had a very brisk trade on grain and seed. There was a very active demand for Red Clover, Alsike, Blue Grass and Orchard Grass, and stocks are moving in satisfactory shape. Cow Peas and Soy Beans are just beginning to come on the market, at prices ranging from $3 to $3.50 per bu. Advices your correspondent has had from the producing sections are that both these commodities will be very short this year.

The fall trade on alfalfa has been very satisfactory and is over now. Prices advanced from $25 per 100 lbs. to $40. The market is still in strong shape, and it looks as though we would have high prices on alfalfa in the spring.

Clover is about all in, but the local crop is very disappointing this year. Last year dealers had from two million to two and one-half million pounds from the local territory, but this year there was less than 50,000 lbs.

Dealers are booking orders from the country dealers for clover, alsike, timothy, and while there seems to be some inclination to hold off buying on account of high prices, the general belief of smaller dealers is that farmers will take the seed at the higher prices, as there is plenty of money in the country; and when a farmer makes up his mind to sow red clover, alfalfa or any other commodity, the price does not affect him as it did a few years ago, and he will sow nearly as much as normal, regardless of prices, providing he can get the quality he is after.

CLOVER SEED AND PEAS.

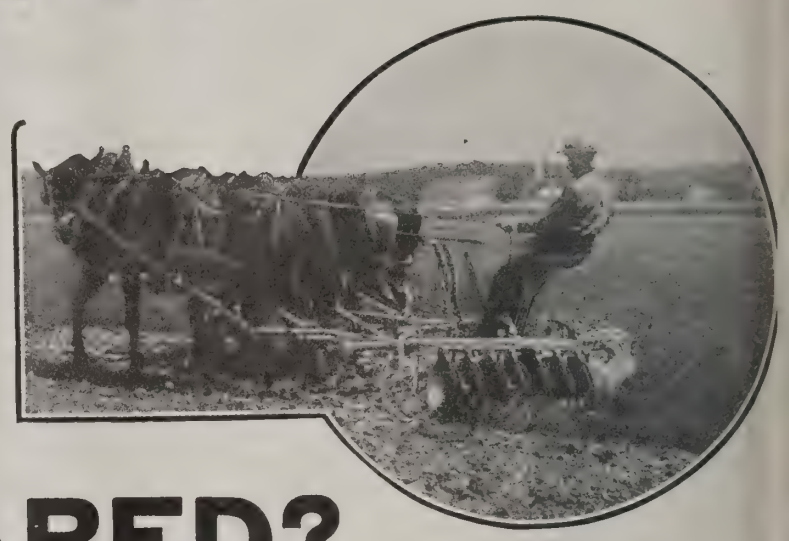
[1]Production compared with a full crop. [2]Thousands: 000 omitted.

Toledo Timothy Seed.



Timothy seed felt the effect of a little liquidation last week. Mar. lost 10c, Dec. 15c. The bulk of December longs switching to March and April at 20c difference, which was cheaper than carrying the actual seed through to spring. The decline was not severe at that, considering the amount that went overboard. It shows the real holders have not changed their minds for the long pull—most little fellows run away from delivery day.

No new features have developed for the week—nothing new can hardly happen. We know the present plenty is still with us, say J. F. Zahm Co., that it's in pretty strong hands, based on the theory that the future promise a big business, both domestic and foreign. Eastern dealer says: "Timothy situation has shown considerable strength during the past few days, and we think we may see higher levels after the first of the new year, as farmers are finally becoming convinced that seeds will not sell lower, and are starting to buy part of their requirements now."

CORN SITUATION CHANGING.

Our Missouri correspondent writes us under date of Nov. 20 as follows: "The situation here on corn seems to be changing rapidly. It is looking as though our Rock Island shipments of corn will be nil. The farmers through this territory seem to be getting ready for an unusually large amount of feeding. Feeders are bidding $1.35. We are having ten times as many inquiries from farmers who want to buy corn than we are from sellers. Those who have a surplus do not show any interest in present values nor any intention of selling now. A feeder at one of stations wants about thirty thousand bushels of corn to feed and said wanted to buy the corn that we purchase at that place. The big feeders wanting to buy enough corn to them through next summer. The is good quality and fair yields, s should have a large surplus if were a normal year in feeding and keting conditions. With the increas activity in feeding and the farm showing no tendency to market freely, we believe that we will have plenty of time to go hunting in the next few months."—*W. P. Anv & Co., Chicago.*

NOW!! ARE YOU PREPARED?

To Meet This Man's Demand for Seed

Fall seeding is still going on and the wise seedsmen or seed dealer is now planning for spring trade. Tell us your requirements for spot or future delivery.

Small's Brands Sell Big

You have seen our former advertising and may have considered getting in touch with us before next season. Good! But next season's business is starting now—seed supplies and values are being determined; so, if you are to be the dealer in Small's seeds in your territory, make inquiries now.

W. H. SMALL & CO., Inc.

EVANSVILLE, INDIANA

"THE CENTER OF THE SEED TRADE OF THE UNITED STATES"

Los Angeles—Limas, $14.50; baby limas, $13; sma.-lge. wh., $6; pinks, $6.25@6.50; blackeyes, $6.20@6.50 ('19), $6 ('18 crop); Mexican reds, $6.50@6.75.

Minneapolis—Navies, h.-p. fancy, $9; soy, $5; Cal. limas, $11; brown, $6.

Montreal—There has been a fairly good demand for Ontario handpicked beans, and the sale is reported of a car at $5.50 per bushel. Two to three-pound pickers have sold at $4.50 to $4.75. A dealer stated that he looked for higher prices soon.—Trade Bulletin.

New York—Marrows, ch., $11.50; com. to fair, $10.50@10.75; pea, ch., $7.75@8; com. to fair, $7@7.50; Lady Washington, Cal., ch., $7.75@8; sm. wh., Cal., $7.75@8; Kotenashi, $6.50@6.75; red kidney, ch., $14@14.25; com. to fair, $13; red marrow, $10@10.50; Kintoki, Manchurian, $4@5.50; yellow eye, $7.25; wh. kidney, ch., $12.25@12.50; Imperials, $9@10; cranberry, Manchurian rnd., $6.75@7.25; long, $6.50@7; short, $5.50@6; Calif. pinks, $7@7.50.

Pittsburgh—Limas, $15@15.50; Cal. navy, $7.50@8; Mich., f. o. b., $7.50.

St. Louis—Quote white beans in car lots—Choice, hand-picked Michigan at $7.75 per 100 lbs.; prime machine-picked, $7.50; orders and small lots, higher; pinto beans, $7; California black eye, $8; choice lima beans at $16; California pink beans at $8, and white, $8.50.—Market Reporter.

Potatoes—

Boston — N. B., $2.75@2.85; Aroostook, $2.75@2.85.

Buffalo—Round No. 1, per bu., $1.70@1.75; fair to good, $1.50@1.65; small or over large, $1.25@1.40.

Chicago—Wis.-Mich.-Minn., rnd., wh., $2.80@2.95; Idaho russets, $3.40@3.45.

Denver — Colo. Greeley, $2.75; western slope red McClures, $2.85@3; russets, $2.70@2.75; red soil stock, $3@3.10; brown beauties, $2.75@2.80; Idaho rurals, $2.60@2.65; Idaho russets, $2.70@2.75.

Kansas City — Minn. Red River, Ohio, $3.15@3.25; Minn.-Ohio, blk., $2.80@2.90; triumphs, Neb., $2.75@2.85; northern wh., $2.90@3; western wh., $2.85@3; russet Burbank, $3.15@3.25; h.-g., bu., $1.60@1.75.

Minneapolis—Red River Ohios, $2.90@2.95; wh. stock, $2.75@2.80.

Montreal—Receipts last week were 3,933 bags, against 10,464 bags the week previous and 10,279 bags last year. Good demand, supplies scarcely equal. Bad roads has kept the usual run of supplies off the market, and sales of car lots of Quebec whites are reported at $2 to $2.10 and in a jobbing way $2.20 to $2.25 per 90 lbs.—Trade Bulletin.

New York—Me., $4.75@5.25 180-lb. bulk; L. I., $5.25@5.75 per 165-lb. bg.; Jer. rnd., $4@4.75; lng., $3.75@4.25 per 165-lb. bg.

Pittsburgh — York State, $2.75@2.80; Mich., No. 1, 150-lb. sks., $4.35@4.40; Pa. rnd. wh., $2.75@2.80.

St. Louis—Minn. rurals, $2.50@2.85; Wis. rurals, $2.85@3.—Market Reporter.

San Francisco—Salinas, $3.65@3.75; river, fcy., $3.25@3.50; rivers, ch., $2.75@3; Ore. garnets, $2.50@2.75; Yakima gems, $3.25@3.50.

CORN AND THE BEARS.

For something like three years the bears have been banking on an overwhelming movement of corn to break the price. Good breaks have occurred during that period, but the receipts have almost invariably failed to reach expectations, and the breaks as a rule have been short lived. Frequent disappointments have failed to shake the faith of the bears in promises of big receipts, and each fresh promise brings a fresh flood of short selling in its wake, only to result in covering at higher prices. And so the life of the bear seems to be a progress from want to want, not from enjoyment to enjoyment.—*Hulburd, Warren & Chandler.*

THE GRAIN SORGHUMS.

The *Monthly Crop Reports* for November gives the following data on the grain sorghums crop for 1919 with comparisons:

	Yld. per ac.		Production.		Forage.[1]	
	1919.	9-yr.av.	1919.	1918.	1919.	1918.
	Bu.	Bu.	Bu.[2]	Bu.[2]	T'ns.	T'ns.
Kansas	12.5	16.4	17,951	20,107	2.8	2.2
Texas	33.0	24.8	59,334	24,057	3.4	1.7
Okla.	23.0	17.9	31,188	15,060	2.5	1.6

U. S.	23.8	20.1	123,343	66,396	2.9	2.0

[1]Average yield per acre. [2]Final 000 omitted.

The Nebraska Seed Co., Omaha, Neb., is erecting a three-story addition to its present warehouse and will build an eight-story warehouse 66x132 ft. adjoining the present location. The warehouse will be of reinforced concrete and modern in every respect.

Feedstuffs

Edwin L. Solfisburg, vice-president of the Golden Grain Milling Co., of East St. Louis, Ill., announced that he has disposed of his stock in the corporation and will resign his office. His health will not permit him to continue longer in business.

Theo. Franks of Owensboro, Ky., and Felix Sermershein of Huntingburg, Ind., will in the near future open a complete wholesale and retail feed plant in Huntingburg, Ind.

The Delat Commission Co. of Lake Village, Ark., has been incorporated with a capital stock of $25,000 to engage in the feed and grocery business.

Wm. A. Adams of Clanton (mail to Cochrane), Ala., proposes to erect a feed mill in Tuscaloosa, Ala.

The Tri-State Milling Co. has been incorporated at Memphis, Tenn., with a capital of $10,000 and will engage in the manufacture of stock feed. F. S. Millington, J. D. Faison and E. W. Smith are the proprietors. Installation of several 10,000-gallon tanks is now under way.

Stock growers in southwestern Iowa report an abundance of feed this year and it is being used and feeders are not throwing the stock on the market immaturely finished.

Stock growers in the neighborhood of Burns, Kans., report feed as "a little scarce" and that comparatively little feeding will be done in that section this winter.

The experiment station at the Kansas Agricultural College has been testing dairy cows with a diet, including sunflower silage. The results of the testing have not been published, but dairy men are somewhat hopeful that the sunflower, the most persistent weed of Kansas, can be made useful for butter making.

Thousands of cattle are grazing on wheat, chiefly volunteer, in Thomas County, Kans. Considerable wheat also, for which there is no storage and which is still on the ground unthreshed, is also being fed.

Muskogee County, Okla., is said to be well supplied with feed this fall and up to the middle of this month at least no frost had occurred sufficiently hard to kill the grass which is still good.

Stock feeders from New Castle, Colo., report enough feed to carry the cattle through the winter with heavy snow on the mountains which insures good pasturage next season.

Rice Bran Moving Freely

Liberal purchases of rice bran were made during the past week, especially on the part of mixed feed manufacturers. It is generally conceded that the article is selling below its intrinsic value, but last week's heavy sales should put the market in a good position. The end of the week finds rice bran in splendid demand at prices ranging from $32@34 per ton f. o. b. mill according to location.

Chicago Horse Publicity Banquet.

Geo. S. Bridge, president of the Chicago local of the Horse Publicity Association of America, and his associates are sparing no effort to make the second meeting of the body at the Congress Hotel banquet Dec. 4 a big success. Our readers are all interested in the subject and many may find it convenient to be present and may reserve banquet tickets through Joseph Badenock, chairman of the Chicago Board of Trade committee for this purpose; H. H. Austrian of Rosenbaum Bros., handling the Chicago Feed Manufacturers' tickets, or Fred Jahp of 2536 West Lake St., of the Chicago Feed Dealers' Ass'n.

Easier Tone in Cottonseed Feeds.

KANSAS CITY, Nov. 22.—Less activity was noted in the market for cottonseed cake and meal in Kansas City this week. Excellent weather conditions in the leading feeding states and good condition of pastures proved a serious restricting influence on the demand from cattle feeders. Sales to consuming interests generally are light. Fertilizer manufacturers are taking moderate quantities of off grade cottonseed feed. Little export business is reported. For 43 per cent protein cake or meal, mill agents and jobbers in Kansas City are asking around $77.50 to $78.50 a ton, sacked. Only small quantities of cake and meal are being offered by Texas mills.

THE FEED SITUATION.

FEED OUTLOOK GOOD.

ST. LOUIS, MO.—We are regarding the ensuing heavier feeding season with the utmost confidence. Milk and butter are selling at the highest prices ever known, hence the dairy farmer should, we believe, be a liberal buyer of good feeds.—*K. & E. Neumond, Inc.*

DEMAND FOR FEEDS LIGHT.

SIOUX CITY (1).—Indications are that the demand for feedstuffs through this section is very indifferent. Buyers are not taking new supplies readily, as the feeders seem to be using home grown products rather than commercial feeds. The demand for the better grades of alfalfa and prairie hay is good and increasing at fairly strong prices.—*C. J. Milligan Co., Inc., by H. W. Milligan.*

SHIPPING ORDERS AHEAD.

BUFFALO, N. Y.—Very little mill feed is in transit to Buffalo from the West, and the Eastern demand is easily taking care of arrivals, although Eastern inquiry is light.

Buffalo flour mills have shipping orders ahead on feeds and holding prices equal to or above current quotations from the West. Considerable heavy protein feeds have been purchased during the past few weeks. The Buffalo oil meal mills claim to be sold up into January and are not booking for shipment prior to January.

We believe a few weeks of cold weather would deplete the stocks in Eastern feed dealers' hands, and bring spot and nearby feeds to a premium over shipment stuff. We have been running from hand to mouth for the past 30 days on corn, spot corn selling at 8 to 10c a bushel over prompt Western shipment.

Embargo of import on Canadian feeds has curtailed the supply of feeds which ordinarily are distributed at points in New York State and nearby Buffalo. Our reports show light stocks in hands of our Eastern trade and for a brisk demand with any fa ter weather.—*H. T. Morey, Inc.*

Cottonseed Products.

The amount of cottonseed re at American mills from Aug. 1 1, 1919, reported by the Bureau f Census, was 1,557,310 tons vs. 1. in same period of 1918. Th crushed during the three amounted to 972,203 tons in 19 914,297 tons in 1918; and the q on hand at the end of the peri 608,832 tons for 1919, and 1,039,8 for 1918.

Certain cottonseed products m tured and on hand Oct. 31 were s lows:

Item.	Year.	Produced Aug. 1 to Oct. 31.	O
Crude oil, lbs...	1919	296,714,072	114
	1918	254,397,547	85
Refined, lbs. ...	1919	162,426,243	11
	1918	157,951,871	10
Cake and meal, tons	1919	444,014	
	1918	450,011

During the three months under review 8,432,477 pounds of cottonseed oil were imported in 1919 and 4,286,870 pounds in 1918. Exports of cottonseed products in the 1919 period were 26,752 pounds of oil vs. 9,347,964 in 1918; 54,452 tons of cake and meal vs. 8 tons.

THE FEED MARKET.

BALTIMORE.

Baltimore, Nov. 22, 1919.—Spot feed prices hold their own under a more or less steady demand for sacked bran and middlings and no pressure of first hand offerings of feed on spot. Western advices are firm. Quotations follow: Spring bran, per ton, in 100 lb. sacks, $44.50@45.00; Western bran, sacks, per ton, in 100 lb. sacks, $47.50@48.00; winter mills' winter bran, per ton, in 100 lb. sacks, $48.00; brown middlings, per ton, in 100 lbs. sacks, $52.00; white middlings, per ton, in 100 lb. sacks, $65.00.

PHILADELPHIA.

Philadelphia, Nov. 22.—The market for mill feeds is generally steady under light offerings and moderate demand. Quotations on prompt car lots in 100 lb. sacks at cost and to arrive: Winter bran, $44@45; standard wheat bran, $44@45; standard wheat middlings, $47@48; flour middlings, $55@56; red dog, $7.50@8.50; shorts, $47@48; low grade flour, $68@69; rye middlings, $48@49; fine white hominy, $62@63; fine white hominy, $63@64; reground oats feed, $28.50@29; cotton seed meal, 41% protein, $85@86; cotton seed meal, 20% protein, $63@64.

CINCINNATI.

Cincinnati, Nov. 22.—There were no important price changes in mill feeds the past week, but the active demand for both wheat and bulk bran and middlings and the light receipts gave the market a firm tone. Quotations represent 100 lb. sacks: bran, $42.50@43.00; mixed feed soft, $47.00@47.50; mixed feed hard, $46.50@47.00; shorts, $48.00@48.50; grey middlings, $53.00; standard fine middlings, $48.00@48.50; hominy feed, sacks 100 lbs., $59.00@60.00.

MEMPHIS.

Memphis, Nov. 22.—Dullness continues to be the chief feature of the feed market and price changes are few and unimportant. There is a little larger supply of mill feeds and the price of shorts has declined about $1 a ton. For gray in transit the asked price Saturday was $54, while choice pure wheat feed was offered at $51. Cash bran was $40 bid and $41 asked. Slight easiness has resulted in cotton seed meal, due to interrupted demand and improved quality of the seed supply. Nice weather has turned off so much feed. All the cotton seed crushing mills have been worrying over the coal supply situation, being threatened with closing down but an order has just come from Washington allowing them to get fuel. A movement went from here to Washington to demand that they be supplied, the fact that they turned out food products having been over the fuel administration. Some of the mill mills and elevators will be forced to close soon if the situation is not relieved but it will come at a good time, as business is very quiet anyway.

NASHVILLE.

Nashville, Tenn., Nov. 24.—The mill feed situation was without new features of interest last week. Wheat bran was in fair demand and unchanged. Middlings were unchanged and some lower. Prices: Soft wheat bran, 100 lb. bags, per ton, $43.70; standard middlings or shorts, $56@58.50.

BOSTON.

Boston, Nov. 22.—A very quiet demand prevails for feeds of all kinds during the past week, with following prices quoted: Bran, winter, $45 per ton; bran, winter, sacked, $49.50@52.00; mixed middlings, sacked, $51@55; gluten feed, sacked, $68.50; red dog, sacked, $64; second clear, $68.50; stock feed, sacked, $61.50; mixed mills, reground, sacked, $28; hominy feed, sacked, $64.50; cotton seed meal, $79.50@86. Receipts for the week ending November 22nd were 25 tons.

DULUTH.

Duluth, Nov. 22.—A good demand for feeds as reported by dealers here during the past week. Dairymen in this territory are doing more feeding and an increased demand is being met with from outside points. Prices per ton are unchanged as follows: Bran, $39.50; ground oats, $48.25; No. 1 ground feed, $52.50; No. 2, $51.50; No. 3, $50.50; shorts, $44.50; flour middlings, $55; coarse corn meal, $55; red dog, $64; Boston mixed, $46; cracked corn, $55; rye feed, $42.

DETROIT.

Detroit, Nov. 22.—The flour trade is slow and market firm. Spring wheat flour is quoted higher and the best winter grades show a small advance, but there is no life in the buying. Mills are working on old orders and the larger bakers and dealers are well loaded up. All the feeds are in demand and there is not much change in prices. Quote: Fancy spring patent, $14.25@14.50; fancy winter patent, $12.75@13; second winter patent, $12; winter straight, $11@11.25 per bbl.; bran, $46; standard middlings, $51@51.50; fine middlings, $61@61.50; coarse corn meal, $60@62; cracked corn, $66; chop, $53@55 per ton, in 100-lb. sacks.

MILWAUKEE.

Milwaukee, Wis., Nov. 22.—The continued mild weather throughout this district is holding mill feed business back considerably for this time of the year. Bran was in fair demand the past week while the balance of the items were neglected. The market ruled slightly unsettled to slow. The supply is moderate. Prices are steady. Current quotations are:

Bran, per ton, $40.50; standard middlings, $42@43; flour middlings, $50@51; red dog, $63@64; hominy feed, $61; rye feed, $42.50@43; old-process oilmeal, $76@83; brewers' dried grains, $64; gluten feed, $66.

NEW YORK.

New York, Nov. 22.—The market for mill feed was very inactive and price changes were not important. The undertone was a trifle easier on account of the attitude of buyers, but sellers were not disposed to press the market, nor to make important concessions.

Consumers in this neighborhood were apparently quite well supplied and they have not been disposed to load up very heavily at present levels. Some traders thought that the proposed removal of important restrictions may have a depressing influence on the entire wheat situation, and it was evident that buyers were awaiting further developments in this connection.

City bran was quoted at $45; middlings, $54, and red dog at $69, while Western bran was quoted at $44; middlings, $47@48, and red dog, $68.

TOLEDO.

Toledo, Nov. 22.—The mill feed market is generally quiet with prices unchanged from previous week. Bran, $38.50 per ton, bulk; middlings, $49 per ton, bulk, carlots, f. o. b. Toledo. Bag prices are $5 higher. There is not much demand for manufactured feeds. Farmers in this territory are feeding their own products and the big corn and oats crop in the East forestalls any immediate demand from there. Scratch feed, best grades, $65.50@67.50; corn and oats chop, $57.50; cracked yellow corn, $62; dairy feed, $66 per ton, carlots, f. o. b. Toledo.

LOUISVILLE, KY.

Louisville, Ky., Nov. 23.—Demand for feed is good, with leading mills reporting excellent sales and that they are behind on shipping. Manufactured feeds are also in good demand, and with pasturage gone the outlook is for an active period.

Principal quotations are: Bran, $44@46 a ton; mixed feed, $53@56 a ton; middlings, $59@61 a ton. Hominy feed meal is quoted at $60 a ton; scratch feed, $70; cracked yellow corn, $64.50; corn and oat feed and corn and oat chop, $62.50.

NEW ORLEANS, LA.

New Orleans, La., Nov. 22.—Bran has been sold from $2.10, tagged, and under, delivered New Orleans. Shorts are offered freely at $2.60 per hundred delivered New Orleans for November and December shipment. Our market uses very little shorts, in fact the demand is very limited indeed.

MONTREAL.

Montreal, Nov. 21.—The market is unchanged but steady under a good inquiry. Straight cars of bran have sold at $45 per ton, and shorts at $52, including bags. Dairy feed is more inquired for with sales at $56 per ton including bags. Pure barley meal is quoted at $65@66.—Trade Bulletin.

ST. LOUIS.

St. Louis, Mo., Nov. 22.—The feed market is quiet, as sellers are holding at stiff prices, while there is not much demand. Wheat feeds are in the best request. Quotations are as follows: Bran, hard, $40@40.50; soft, $41@41.50 per ton, in 100-lb. sacks; middlings, gray, $50@53; brown, $46.50@47; mixed feed, $44; red dog, $64@65; white hominy feed, $57@58; oat feed, $24@24.50; alfalfa meal, No. 1, $38@39; No. 2, $34, all per ton, in 100-lb. sacks.

PITTSBURGH.

Pittsburgh, Nov. 22.—Arrivals have been more plentiful in the past week, with 24 cars bulletined from local yards. Included in the shipments were 7 of bran, 6 of feed and 6 of white middlings. The demand appears to be more for mixed feeds just now and prices on these grades are firm. Some talk is heard of regular quotations being established, but this is rather difficult to accomplish owing to the special conditions which surround the local feed market. Prices range from $35 to $55 a ton on regular lines of feeds.

The annual convention of the Potato Association of America will be held with the Wisconsin State Potato Growers Ass'n at Milwaukee on Dec. 5-13.

SUCRENE FEEDS

The Feeds That Nourish The Stock

Bring Repeat Orders

Almost any feed can be sold to some stock raisers **ONCE.**

Sucrene Feeds are the "Come-Back-For-More" Feeds, because the quality is always there.

You have Sucrene reputation pulling for you all the time—the reputation that's based on 19 years of recognized leadership—more firmly established in the good-will of the stock feeding world today than ever before.

The Till Tells the Tale

Keep your mind's eye on the Sucrene Line. In the near future our big new mill—larger, more modern, than the one destroyed by fire recently—will turn out Sucrene Feeds of standard quality, which will be offered to the trade at money-making prices. Due announcement will be made to the trade.

Send in your orders for Sucrene Poultry Scratch Feeds. We fill orders promptly on the full line.

Alfalfa Department

lfa is being introduced quite rap- the valleys of the Ozark Moun-

aveling hay buyer in Kansas re- ll kinds of good hay as plentiful rmers anxious to sell but unfor- y lack of cars makes it difficult summate purchases.

fa in Logan County, Okla., was ar very good, four crops in some es having been cut. Other feeds, r, are rather reduced by the t and feeders will have to rely upon alfalfa this winter.

e the dry weather in the neigh- l of Houston, Ark., was fatal to n crop the alfalfa made a lot , several cuttings having been ff. As late as early this month were still cutting their alfalfa.

ha County, Kans., reports a fine alfalfa hay this year, three big s in most sections and quality ly good. Dairies have been good but only a small part of the s thus far been marketed. The ation if improved would bring deal of this hay to market.

e Saline River Valley of Rus- nty, Kans., the alfalfa this year e farms made three cuttings, from 1½ tons for the first cut- most a ton for the second and over a ton for the third, aver- t least three tons per acre this d at the current invoice of hay er crop of hay was raised in this year.

lfa Meal Trade Moderate.

AS CITY, Nov. 22.—A fair to e demand prevailed for alfalfa Kansas City this week. Many arger Colorado and other West- lers report being sold up for r and December shipment, sequently are not pushing trade. inquiries were received from in the Southeast and central he consuming trade being dis- to carry large stocks of meal, City mills operated actively, well sold up. Sales for long livery were light, few being the basis of current prices or ht premium.

alfalfa meal closed at $40@42 arlots, basis Kansas City, in s, about steady for the week. eld around $37.50@38.50; No. 4.50; and brown, $31 @32.50. weather tends to reduce de- alfalfa mixed feed, but manu- report a good trade. Fairly ales were made in Kansas, a and other Southwestern nd the Central states also n a moderate scale. Retail in the interior are preparing er needs. Prices were un- as follows: No. 1 molasses @42; No. 2, $37@39; brown, alfalfa grain molasses feed,

AFA SITUATION STRONG.

CITY.—The alfalfa situation, hay, is exceedingly strong. s are within $1 or $2 of sacked es of same grade basis Kansas of course under these circum- ncommitted hay is being sold d not as meal.

t is the belief of a majority de that this heavy bull price is very largely due to the f cars, the fact remains that e past week Kansas City for time this year received more cars of alfalfa in a single week, total being 522 cars. In the ese heavy receipts, the mar- dvanced on hay from $2@3 and this does not look like ; with an increasing supply n fact, the market on no kind s decreased and the tendency be even higher.

farmers in particular are holding their hay for cold weather, believing they are going to get from $5@10 a ton more than at present, and while there is still a heavy tonnage of hay in the field, more especially in Kansas, in the latter state it is low in grade and the present railroad embargoes against Kansas City and St. Louis markets together are certainly not helping for lower prices.

The writer has believed consistently for three months that a free supply of empty cars would mean much lower prices of hay of all kinds, but as the season advances it seems we get further and further from a free supply of empty cars, and the market keeps on climbing. As far as the writer can see there is nothing in the situation that would indicate lower prices in anything, even after Jan. 1 and the chances are pretty good for considerably higher prices instead of lower.—*Bryan Haywood of The Haywood Alfalfa Warehouse Co.*

ALFALFA SITUATION.

ALFALFA MOVING IN SOUTHEAST COLORADO.

TRINIDAD, COLO. (9).—Shippers are loading alfalfa hay at several stations in this county and shipping the same out to several different places in Kansas and Texas, and there are a number of buyers here at all times to buy the hay as fast as it is baled. They are paying the farmers here $24 per ton for the baled alfalfa. The crop is very good this year—better than last year, for it was put up without very much rain on the various cuttings, and the most of it is a good quality.—*The Jamison-Conger Grain and Produce Co., per M. McDermott, Sec'y.*

Fattening Lambs on Alfalfa and Corn.

It is perfectly logical and there is a growing tendency to finish lambs where they are produced, although the practice of shipping lambs to distant places to be finished for market is still common. This is typically exemplified in the case of New Mexico, which ships most of its lambs to distant points to be finished for market. With improved local markets and increased production of feeds, however, attention is being turned to home finishing of the lambs. The New Mexico station therefore undertook a few years ago to determine the best way to utilize the available feeds of the state in the finishing of range lambs. As the most abundant feed available alfalfa was used alone or as the basis of the rations fed, being supplemented in some cases with varying amounts of shelled corn, one-fourth, one-half and one pound per day.

It was found that mutton of a quality suitable for the local market demands could be produced with alfalfa hay alone and that the feeding of lambs is profitable if dealers are willing to pay the same price for the home-fed product that they must pay for the imported article of equal quality. The addition of corn improved the quality of the mutton and shortened the feeding period.

The general conclusion is that with alfalfa hay alone it requires about 110 to 120 days to fit the lambs for the local market; with light grain ration (¼ lb. per head per day), 100 to 110 days; with medium grain ration (½ lb.), 90 to 100 days; and with heavy grain ration (1 lb.), 70 to 80 days. Gains were as great but not as rapid with ¼ lb. of corn per head per day as with ½ lb. The cost of gain increased with an increase in the grain ration.

Farmers are being urged to select enough seed corn for a two years' supply in view of the generally excellent condition of such seed this season. As insurance against a possible poor seed showing next year the idea is an excellent one.

Hay Department

The City Council of Battle Creek, Mich., is talking of buying a site for a local hay market to be equipped with a city scale.

Hay shippers from Greenwood County, Kans., report an abundance of hay but inability to move it on account of transportation.

Farmers from Porter, Okla., report a heavy hay crop in that neighborhood, also a good pasture so that there will be hay to market.

Mercer County, Mo., this year had wonderful hay crops and both prairie and timothy are still plentiful. Clover, however, is rather short.

Kansas City reports that buyers from Chicago have been in that market hunting both prairie and alfalfa hay, owing to light receipts in the Chicago market.

The prairie hay crop in the neighborhood of Louisburg, Kans., was fair this year, but other feeds were rather scarce so that herds are being reduced somewhat.

Snow about the first week in November caused considerable loss of hay to farmers in Northwestern states who had been unable to stack their harvest on account of shortage of help.

Stock growers of Saline County, Mo., report plenty of hay, both prairie and timothy, in that section. Some clover hay is to be found also, but the yield was reported lighter than ever before.

Hay shippers in southwestern Kansas report exceeding difficulties in getting cars. Dealers report a very large surplus of good prairie and alfalfa available for market as soon as it can be moved.

Hay growers in Bryan County, Kans., report plenty of both alfalfa and prairie hay this season. Considerable of both crops has already been marketed and more would have been but for the shortage of cars.

The Memphis Grain Exchange has completed arrangements with the Missouri Pacific for the establishment of the track plug inspection system for hay arriving in that market over the lines of the M. P. and the Cotton Belt Roads.

It is reported by stockmen that Ray, Carroll and Clay counties of Missouri have a superabundance of hay as well as good late grass. Considerable of the hay crop has already been marketed to dairymen in that particular part of the state.

Storing loose hay in sheds prior to moving the crop for shipment has the advantage that it can be baled at times when the weather outside is bad and a good many Colorado ranchers are doing this. However, it involves some extra handling.

Farmers from the neighborhood of Carter, Wyo., say that the drought this year has been the worst known in that section since 1889. Wild hay made only about half a crop and the usual amount of alfalfa was cut in two, there being no second cutting whatever.

Hay Weighing Law in California.

An assembly bill, known as the Hay Bill, has become law in California. It provides for the sale of baled hay by net weight and that bales broken at point of destination shall be included in the weight forming the basis of settlement. The bill also requires the hay dealer to base his charge upon the true record of weight and will prohibit the old practice of adding 15@20 lbs. to each bale and recording such weights as "stick or tag weights." Balers are further forbidden to sophisticate bales by the addition of any foreign matter in the hay. In short, the law is trying to make the balers' business respectable.

KANSAS CITY HAY NOTES.

Sanders Sosland, Correspondent.

The Kansas City chapter of the Horse Publicity Association of America, in which hay dealers are taking a leading part, was organized last week. At a meeting held in the directors' room of the Kansas City Hay Dealers' Association, W. H. North of North Bros., C. D. Carlisle of the Carlisle Commission Co., and R. E. Huffine of Huffine & Co., were members of the hay trade who were chosen among the officers. Frank H. Sweet, a horse dealer, is president, and A. H. Servatius, an official of the Kansas City Stockyards Co., who supervises the purchase of its hay, is vice-president. A membership campaign will be inaugurated soon, and it is hoped to have a total of at least 100 members of various industries closely associated with the horse in the Kansas City chapter. George Forsee, president of the United States Feed Mills Co., reported on his trip to New York, where he represented this market at the dinner given by the Horse Publicity Association.

"Demand for timothy is improving," declared C. F. Arnold of C. F. Arnold & Co. "More inquiries are being received for this variety of hay than has been reported for some weeks, and while tame hay has not shared in as broad a demand as has been enjoyed by alfalfa and prairie, there is a more even distribution on the current market. Comparatively liberal sales of timothy are being made in the South and Southwest, including Texas. Graziers and other consumers of the Lone Star state have seldom been buyers of any significance in the tame hay market, having taken practically no timothy in recent years. However, there is a good movement of timothy to Texas. A moderate inquiry prevails for alfalfa from the Lone Star state, too."

Running cattle on new wheat pastures is effecting a considerable saving in the feed bills of cattle feeders in the Southwest, and, at the same time, reducing the demand for hay. The excellent condition of some wheat fields, and all fall pastures, is a bearish factor in the hay trade, and may be felt in an easier market later in the season. At the moment the market is not noticeably affected by excellent pasture conditions, owing to the broad demand prevailing for hay from other sections of the country. Not only is the open weather allowing farmers to carry their stock without making purchases of hay, consumption of hay produced in the Southwest is smaller, with the probability that feeders will enter the winter with larger stocks on hand than usual.

"Cars are becoming more plentiful in the country, and a liberal movement of hay from Kansas, Colorado and other large producing states may be expected for some time," said F. F. Bushmeyer of E. B. Bruce & Co. "Growers as a rule are anxious to dispose of their hay at current price levels, and, with a free supply of cars, receipts will continue large. The car situation is not yet normal; in fact, the supply of rolling equipment in the West and Southwest still is seriously short of the requirements of the trade. But the free movement under present transportation conditions indicates the position of the interior as regards stocks of hay. Colorado is the heaviest shipper of alfalfa to Kansas City, and a moderate movement is being witnessed from Kansas. Nebraska hay is moving largely direct to the East without passing through Kansas City. Prices are holding up well in the face of the large movement, due, of course, to the unprecedented demand prevailing, doubtless the heaviest on record for this period of the year. But a continued free movement will soon fill up the holes among the buying trade, and without any unusual developments, an easier market may be witnessed around holiday period of the year."

"The coal strike has stimulated mand for hay," remarked B. M. Hu of Huffine & Co. "Many growers, ing a forced letup in the movemer hay to market as a result of the sh age of coal, were buyers of hay, spective of the fact that they are rying sufficient forage to meet current requirements. For instanc interior Missouri cattle feeder formed us that he desired two of alfalfa. We advised that we w make delivery from another int point as soon as cars were avai for the shipment, thus effecting a ing of $2 to $3 a ton for the fe However, he wanted the hay imm ately, not particularly for immed use, but to store and have avai in the event a tieup results. Bu of this character in the past week served to hold up the market in face of a liberal movement."

OMAHA HAY NOTES.

J. C. PEDERSON, CORRESPONDENT.

Receipts light, demand good, ma firm and steady. Not much hay ing in country as the weather has been very favorable.

Milling activities, directly par ling the hay business of the ma are growing. The Millers Cereal the Casco Mills and others are pr ing a large daily grind with cons able tonnage of by-products.

The Omaha Chamber of Comm through W. A. Ellis, who is like secretary of the Omaha Hay Exch is planning an energetic season t velop the market still further, pe ing inspection, weighing, storing ceiving and shipping facilities.

Buyers of hay on the Omaha ket are now finding it possible to purchase feeds of all kinds thr hay firms who realize the direct nection of the two lines of bus and are prepared to ship millf cottonseed products, as well as usual lines of bagged feed for cows, horses, poultry, etc.

CHICAGO HAY NOTES.

A new plan, effective Nov. 15, cha the method of hay purchases the fore followed through the U. S. supply officers in Chicago. They clean up the enormous business ducted both during and since the for the entire United States and ab New commitments, however, here will be separately handled by zone, Washington being for Ea camps, San Francisco for Pacific camps and the dozen other zone cordingly. Chicago is Zone 7, bu

Camps Dodge, Custer, Grant, Benn Harrison, probably the largest on the entire list. These zone hay hases will be paid for in the same ner, making quicker returns prob- than under the old plan. Such hases will also be made under ed bids whereas they can be con- ed in open market.

veral notices in this place relative he possibility of collecting claims the U. S. Army make the follow- especially interesting. Refunds are being paid when such army pur- ers did not in their details prompt- ivise the party making the sale of rejection of hay on grades. Such es often discovered that deduction $1.00@3.00 per ton had been made ales from six months to a year be- final returns showed. The Gov- ent realizes that this is not er, and is not seriously contesting refunds when papers in their s indicate that the seller of such ad no knowledge of rejections and rtunity therefore to otherwise dis- of it.

E. Haynes, the hay commission in Chicago for some time, has ged his firm name, which is now l Swift-Haynes Co. Those who Mr. Haynes at the last National Convention in Detroit, as well as shippers handling their Chicago ess through him commend his en- ise, so essential in getting the top and otherwise showing satisfac- hay commission service. The firm is W. J. Evans and is a member e National Hay Association and to work in on their proper share icago business.

H. Van Horn of Clinton, Wis., one of the visitors on the Chicago tracks last week.

Chicago hay trade is continually to secure and pass on to their mers freight rate advantages; and teresting period in contemplating harge on reconsignments has just completed. We all know that many things as well as much good was done under Government con- and minor tariff changes worked y individual railroads differed in important details from those of railroads. For instance, the C. Q., in Supplement 34 to Tariff G, I. C. C. 11444, changed the re- nents on hay and straw so that commodities might be consigned ld on inspection tracks without e if reconsigned within 24 hours arrival at first destination. Re- mments were $2 per car after- . This is now all off, because roads did not place the same in- on on the 24-hour privilege, and bulletin from the Chicago Board ade advises its members that a 2 reconsigning charge applies.

THE HAY SITUATION.

FARMERS HOLD HAY.

FIELD, N. Y. (2).—While we have crop of hay the farmers are not free sellers at the prices the deal- e able to offer on the basis of the t market, but we look for a bet- rket in the future when it will btedly move more freely.—*Geo. xton & Son.*

l Agent Kirk reports that flax- n Minnesota matured this year t frost but there was consider- amage to the crop by grasshop- he plague of which was so bad n certain restricted areas the were not cut at all. The state is placed at 2,727,00 bus., or 9 r acre compared with 3,120,000 r 10.4 bus. per acre last year.

Hay Markets

BALTIMORE.

Nov. 22.—On the better grades of timothy, mixed, and No. 1 clover hay the market is steady and in fair shape, with only a small percentage of the receipts consisting of this class of hay. The poorer grades of hay, however, are in ample supply and dull even at a material discount.

STRAW is selling principally in a jobbing way, and under these conditions it does not take a great deal of stock to go 'round. Quotations follow: No. 1 timothy, $31.50 per ton; standard timothy, $30.50@31.00; No. 2, $30.00@30.50; No. 3, $25.00@27.00; No. 1 light clover mixed, $29.50@30.50; No. 2 light clover mixed, $27.00@28.00; No. 1 clover mixed, $27.50@28.00; No. 2 clover mixed, $25.00@27.00; No. 1 clover nominal $27.00; No. 2 clover nominal, $25.00; sample hay, $20.00@22.00; straight rye, $17.00@18.00; No. 1 tangled rye, $14.00@14.50; No. 1 wheat, $12.00@13.00; No. 1 oat, $14.00@15.00.

BUFFALO.

Nov. 22.—Hay is scarce and strong, farmers holding and dealers have paid as high as $30 for No. 1 and $28 for No. 2. No decline is looked for until later on and in the meantime higher prices may be the rule as the farmer says he don't have to sell. Straw is quoted at $13.00@14.00 and scarce.

PHILADELPHIA.

Nov. 22.—Baled hay and straw. The market for hay is firm under a good inquiry and light supplies. Straw is quiet, but with limited offerings prices are well maintained.

Timothy Hay—No. 1, $33; No. 2, $30@31; No. 3, $27@28. Clover Mixed Hay—Light mixed, $30@31; No. 1 mixed, $27@28; Straw—No. 1 straight rye, $15@15.50; No. 2 straight rye, $13@13.50; No. 1 tangled rye, $14; No. 2 tangled rye, $12.50@13; No. 1 wheat straw, $13.50@14; No. 2 wheat straw, $12.50@13; No. 1 oat straw, $14.50@15; No. 2 oat straw, $12.50@13.

ST. LOUIS.

Nov. 22.—The receipts of hay have been very light for the past week, and the demand was fully equal to the supply, but prices show little change.

Timothy hay continues to rule steady under moderate receipts and a good local demand for the better grades. The medium and low grades are in good shipping inquiry but common hay, hay that is musty or unsound, is dull and hard to place.

Light clover mixed hay steady, receipts light and demand excellent. Anything offered is readily absorbed at full prices.

Heavy clover mixed hay scarce and wanted. There is an urgent local demand for good heavy clover mixed hay at prices equal if not better than timothy. This demand will continue throughout the winter and dealers would advise liberal consignments.

Pure clover hay scare and wanted. Very little clover among the offerings and demand is urgent. Anyone having clover would do well to ship it here.

Alfalfa hay strong and higher offerings of alfalfa continue very light and demand is urgent, particularly for good soft, leafy alfalfa suitable for dairy purposes. There is also a good demand from the mills. Conditions warrant steady prices.

Prairie hay market steady, offerings of prairie moderate and while demand is limited the light receipts are readily absorbed.

STRAW—Scarce and wanted.:

Track Sales—Timothy, No. 1, $31.00@33.00; standard, $29.00@30.00; No. 2, $25.00@28.00; No. 3, $22.00@23.00; headed timothy, $23.00@25.00; threshed timothy, $16.00@20.00; light clover mixed, $29.00@30.00; No. 2, $25.00@28.00; heavy clover mixed, No. 1, $31.00@32.00; No. 1, $29.00@30.00; clover hay, No. 1, $31.00@34.00; No. 2, $30.00@31.00; alfalfa hay, choice, $40.00; No. 1, $36.00@38.00; standard, $35.00@36.00; No. 2, $30.00@33.00; prairie hay, choice, $27.00@28.00; No. 1, $26.00@27.00; standard, $24.00@25.00; No. 2, $21.00@23.00; straw, $10.00.

MEMPHIS.

Memphis, Nov. 22.—Receipts of hay have been light and demand not any better. Dealers are somewhat disappointed at failure of demand to pick up, but they are confident that it will not be long before they will have all they can do. Light clover mixed was quoted on call today at $31 bid and no offers, while No. 1 clover mixed at $30 bid. December standard alfalfa was $37 bid and $37.50 asked, while No. 2 in transit was offered at $34. Same grade sold yesterday at $33. In timothy there has been almost nothing doing.

BOSTON.

Boston, Nov. 22.—Receipts of hay locally were very light durng the past week. Top grades especially are in light supply, but the trade is not buying these grades at the high prices quoted, but turning more to the lower grades on account of the lower prices quoted. The trade is generally of the belief that the present rise in prices is only temporary and is waiting for prices to drop back. The small amount of No. 1 timothy hay offering is quoted at $34@$35 per ton for large bales and $32@33 for small bales. No. 2 timothy ranges at $31@32 for large bales and $30@31 for small bales. No. 1 Eastern is unchanged at $31@32 with No. 2 Eastern at $28@30. Receipts for the week ending Nov. 22 were: Local, 96 cars; export, 22 cars.

The straw market is quiet but steady. Rye straw is quoted at $15.50@16 per ton, with oat straw at $14. Receipts for the week ending Nov. 22 were: Local, 2 cars.

OMAHA.

Omaha, Nov. 22.—Receipts light on both prairie hay and alfalfa, and the demand continues good, while the market remains firm and steady with no change in prices. Oat and wheat straw in good demand with prices some higher.

No. 1 upland prairie hay, $23@24; No. 2 upland prairie hay, $18@21; No. 3 upland prairie hay, $14@17. No. 1 midland prairie hay, $22@23; No. 2 midland prairie hay, $18@21. No. 1 lowland prairie hay, $17@18; No. 2 lowland prairie hay, $13@15; No. 3 lowland prairie hay, $10@11. Choice alfalfa, $32@33; No. 1 alfalfa, $30@31; standard alfalfa, $27@29; No. 2 alfalfa, $24@25; No. 3 alfalfa, $19@21. Oat straw, $11@12; wheat straw, $10@11.

DULUTH.

Nov. 22.—Receipts were in good volume on the market here this week, but prices held firm and are unchanged in timothy and midland. Quotations eased $1 in prairies, which were in over supply. Consumption of hay on this market was reported to have shown a material increase. Prices follow: Timothy, No. 1, $24@25; No. 2, $22@23; mixed timothy, No. 1, $23@24; No. 2, $16@20; prairie, No. 1, $22@23; No. 2, $20@21; No. 3, $15@16; Midland, No. 1, $15@16; No. 2, $10@12; straw, rye, $9@10; oat, $9@10.

DETROIT.

Nov. 22.—Timothy is in good supply, but there is a scarcity of clover and straw, both of which are quoted firm. Some hay is coming in from Canada, but not much as prices there are about as high as on this side of the line. There is a little hay being shipped south. Quote: No. 1 timothy, $28.50@29; standard and light mixed, $27.50@28; No. 2 timothy, $26.50@27; No. 3 timothy, $23@25; No. 1 mixed, $26.50@27; No. 1 clover, $26.50@27 per ton in car lots.

MILWAUKEE.

Nov. 22.—The local hay market ruled steady and firm for the week, buying being confined purely to immediate needs. Conditions are still very favorable for out-of-door feeding which is somewhat retarding activity. Receipts are moderate, yet sufficient to satisfy the demand. Prices remain unchanged. Current quotations are: Choice timothy, $28.25@28.50; No. 1, $27@28; No. 2, $24@26.50; No. 1 clover, $22@23; light clover mixed, $24@25; red top and timothy mixed, $24@25; marsh feeding, $14@15; packing, $10.50@11.50; rye straw, $11@11.50; oat straw, $10.50@11.

TOLEDO.

Nov. 22.—Demand is now good for all grades of hay, with prices higher than last week. Receipts are extremely light, due principally to car shortage. No. 1 timothy, $28; No. 2, $26.50; No. 1 light mixed, $28; No. 1 clover, $30 per ton, carlots, basis Toledo rate point.

LOUISVILLE, KY.

Nov. 23.—Demand for hay continues fair, and is picking up due to shortage of stocks in some sections of the country, and the fact that grass is done for. Local dealers report a very fair demand for hay. Quotations are: No. 1 timothy, $29@30 a ton; No. 2, $27.50@28.50; No. 1 clover mixed, $27@28; No. 2, $25@26; No. 1 clover, $29@30; No. 2, $27@28; local alfalfa, $30@31; wheat and oat straw, $9.50@10; rye straw, $11@12.

NEW ORLEANS, LA.

Nov. 22.—The car situation and the movement of hay from farms has caused hay offerings to shrink considerably. Recent sales of No. 2 have been made at $32 per ton, delivered, with $1.00 discount if No. 3 New Orleans weights and grades to govern.

KANSAS CITY.

Nov. 22.—A continued liberal movement of hay caused some weakness in the hay market in Kansas City this week, though no important price changes were recorded. The better grades of alfalfa were strong, advancing 50c on the best offerings to $23.50 a ton. Weakness was noticeable principally in the poorer offerings, which eased off about 50c@$1. While the better offerings of alfalfa closed firm, No. 2 and No. 3 hay were down 50c@$1 a ton. Tame hay was firm, with a fairly good inquiry for timothy coming from the South, Southeast and Southwest, including Texas. Demand for alfalfa continued broad, and heavy shipments were made to the East and Southeast. How long this demand will hold up in the face of large offerings. dealers expressed doubt. Receipts were 1,177 cars, compared with 960 cars last week and 805 a year ago. Straw was unchanged.

Prairie—Choice, $22@23.50; No. 1, $21.50@22.50; No. 2, $19.50@21; No. 3, $16@19; packing hay, $10@12.

Midland prairie—No. 1, $16@18.50; No. 2, $13@15.50.

Alfalfa—Choice, $35@36; No. 1, $33.50@34.50; standard, $29.50@33; No. 2, $25@29; No. 3, $20@24.

Timothy—No. 1, $26@26.50; standard, $24.50@25.50; No. 2, $22.50@24.50; No. 3, $18.50@22.

Clover mixed—Light, $26.50; No. 1, $24.50@25.50; No. 2, $18.50@24.

Clover—No. 1, $24@26.50; No. 2, $16@23.50.

Straw, $10@10.50.

CINCINNATI.

Nov. 25.—Prices for all classes of hay were the highest of the present crop the past week, but the firmness of the market was not of a nature to encourage the shipper with large stock of high-priced hay, as the advance was only a spasm, and more an artificial forcing of the market, due to the very light movement and to a stocking up by a few dealers, who feared the coal troubles and winter freight congestion would eventually affect the movement. The market seemed to have reached a point beyond which it was difficult to "bull" it, and any advances made were soon followed by greatly reduced shipping orders and a consequent slump in prices. However, after declining from $31, the high point, timothy was still $1 above last week's closing prices. $1.50 for mixed, 50c for clover and $1 higher for alfalfa. The firmer tone had the effect of materially increasing country loadings, and invoices to the trade were larger at the close, indicating probably easier conditions. The quality of the offerings, though, were mostly ordinary and common hay.

No. 1 timothy, $30.00@30.50; standard timothy, $29.50@30.00; No. 2 timothy, $28.50@29.50; No. 3 timothy, $25.50@28.50; threshed timothy, $17.00@19.00; light clover mixed, $28.50@29.50; No. 1 clover mixed, $28.00@28.50; No. 2 clover-mixed, $26.00@28.00; No. 1 clover, $31.50@32.50; No. 2 clover, $30.00@31.00; sample, grassy, $22.00@25.00; No. 1 western alfalfa, $39.00@40.00; No. 1 local alfalfa, $34.00@35.00; standard alfalfa, $33.00@34.00; No. 2 local alfalfa, $31.00@32.00; wheat straw, $10.00@11.00; rye straw, $11.00@12.00; oats straw, $10.00@11.00.

MONTREAL.

Nov. 21.—With no government buying, as was the case last year, and with much larger supplies in barns and stacks of this year's crop than that of 1918, it is difficult to see what growers are waiting for. Last year the Government was only paying farmers $26 delivered in sheds here, but there was a greater demand all round then, and a much shorter crop. Comparing the supplies of the two years, $25 today is a better figure than $26 a year ago, taking into consideration actual supply and demand. The local market is quoted firm at $24@25 for No. 2 and $22@23 for No. 3.

Most of the hay is coming in from the North Shore, as the crop there is large and of fine quality. The crop around the Howick section is also of good average quality and quantity. Of course the bad roads are against deliveries, but as soon as winter roads set in, they should be more liberal. A few cars are said to have been taken for prompt shipment to Boston, but this is said to be a mere transitory movement.—Trade Bulletin.

NEW YORK.

Nov. 21.—The New York Hay Exchange reports the hay situation as follows:

	Hay tons	Straw tons
Receipts for week	4,722	430
Receipts last week	4,219	380
Receipts Sept. 1 to date	50,151	4,040
Receipts same time last year	70,478	4,000

Our market has ruled very quiet and somewhat easier with a slight lowering of values on medium and top grades of timothy hay. On Wednesday a little activity occurred with the placing of orders for a dozen cars of hay needed in feeding export cattle, but market was again quiet on Thursday and scarcely any improvement is noted in selling values. A number of cars of high grade timothy hay have arrived from Western sections, more than satisfying immediate requirements for this class of goods, and the lower grades have cleared up in good shape. New invoices are naturally light because of continued embargo against 33rd St. shed but rail receipts are steadily supplemented with boat arrivals, one river boat coming in last Monday and another boat, carrying 20 cars, is now due. Offerings in Brooklyn have been light and market is sustained though buying is very restricted. Quotations:

	Large bales per ton	Small bales per ton
No. 1 hay	$34.00@	$ @35.00
No. 2 hay	32.00@33.00	30.00@32.00
No. 3 hay	29.00@30.00	28.00@29.00
Shipping hay	27.00@29.00	26.00@27.00
Fancy light clover mixed hay	32.00@33.00	31.00@32.00
No. 1 clover mixed	30.00@31.00	28.00@30.00
No. 2 clover mixed	27.00@29.00	25.00@27.00
No. 1 rye straw	14.00@15.00	.....
No. 2 rye straw	@13.00	.....
No. 1 oat straw	14.00@15.00	.....
No. 1 wheat straw	@13.00	.....

Effective Nov. 14th, the N. Y. C. road removed embargo from 60th St., 130th St., Melrose Junction, Port Morris, Claremont Park and Inwood stations.

The demurrage tariff of the U. S. Railroad Administration, effective Dec. 1st, applying to all lines under federal control as well as lines not under federal control, continues the present rates of $2 per car for the first four days (after the usual free period) and $5 per car for each succeeding day. Refrigerator cars not unloaded at the expiration of five days (including the free period) will be subject to an additional storage charge of $10 per day.

ST. PAUL-MINNEAPOLIS.

Nov. 21.—Quote hay prices for the Twin Cities as follows:

No. 3	23.00	.....

ST. JOSEPH.

Nov. 22.—The hay market continued strong during the past week with an advance of 50c@$1 on both alfalfa and prairie. The demand for alfalfa and prairie has been in excess of the supply. The outlook is for a weaker market as soon as cars become more plentiful, and shippers are urged to get their hay shipments loaded now and take advantage of these high prices. Quotations follow:

Prairie—Choice, $22.50@23; No. 1, $21.50@22.50; No. 2, $19.50@21; No. 3, $16@19. Midland—No. 1, $17@18; No. 2, $14@15. Alfalfa—Choice, $35@35.50; No. 1, $33@34; standard, $29.50@32.50; No. 2, $25@28.50; No. 3, $20@24. Timothy—No. 1, $26@26.50; standard, $24.50@25.50; No. 2, $22.50@24.50. Clover light mixed—No. 1, $25.50@26.50; No. 2, $22@24. Clover—No. 1, $25.50@27; No. 2, $20@24. Straw, $10@10.50.

SAN FRANCISCO.

Nov. 20.—The car situation is still in the same deplorable state and it is next to impossible to get any cars along the various railroad lines to make shipment of hay either to this city or to interior points. Such hay as has arrived in San Francisco by rail has been for government account only, to be double-compressed for shipment overseas; and there seems no immediate relief in sight.

Owing no doubt to the dry weather which has existed for so long, demand from country districts has been very good. This demand, together with the natural disinclination of farmers to dispose of their holdings until such time as they have had sufficient rains to start the grass and enable them to plow and put in their crop, has naturally created quite a firmness throughout the general hay market.

Fancy red oat and wheat hay are in demand and higher. Stock hay of good quality is also in good demand. The same may be said of alfalfa, for which the demand continues good throughout the country districts.

Export trade is somewhat handicapped by the stevedores' strike, but these conditions are improving slowly and it is believed that the strike on the waterfront is in course of settlement, which will improve export conditions at once.

CHICAGO.

Nov. 24.—The following is a statement of the receipts and shipments of hay in tons in the Chicago market for the week ending Nov. 22, also the total receipts and shipments of hay from Jan. 1, 1919:

	Nov. 22, 1919.	Nov. 15, 1919.	Nov. 23, 1918.
Total receipts	3,425	3,258	5,866
Total shipments	205	223	527
Rcpts. since Jan. 1	212,993	209,568	289,128
Shpts. since Jan. 1	40,799	40,594	82,362

Receipts were nominally larger last week, but still insufficient for the demands on the market, and all prices were firm and all arrivals well cleaned up. Monday's receipts of the week were the largest for a long time, 123 cars of timothy and prairie (686 tons), and 8 of straw, but the hay was mostly delayed shipment that should have come on the market last week. The great Live Stock Exposition, beginning this week for ten days, the extra demand will be large without doubt and prices strong. Quote Monday, Nov. 24:

Timothy—Choice, $31@32; No. 1, $29@30; No. 2, $27@29; No. 3, $23@27; standard, $29@30; sample, $22@25; threshed, $14@18.

Clover—No. 1 light mixed, $29@30; No. 1 mixed, $27@28; clover, $26@30.

Alfalfa—$20@36.

Prairie—Kans., Okla., Mo., choice, $24@26; No. 1, $22@24; No. 2, $20@22; No. 3, $18@20; Ill., Ind., Wis., Northwestern, $16@25.

Marsh hay—Feeding, $16@20; packing, $12@15.

Straw—Rye, $13@14; oat, $12@13.50; wheat, $11@12.

PITTSBURGH, PA.

Nov. 22—A number of special conditions have entered into the local market for hay at this time. There is still a lot of good pasture, demand for hay is not at all keen and there was about 50 per cent more grain grown at nearby points than ever before. All arrivals are being moved without difficulty, owing to the fact that receipts are far below normal, and prices remain firm for the same reason. It is not expected that there will be any change in the situation until receipts are more nearly normal. Cars are becoming more scarce and harder to get, since the government appears anxious to get wheat from the West, and in all probability this condition will prevail for a few weeks longer. There can be no doubt, according to local dealers, that a bumper crop of hay for all needs and purposes still exists. Total receipts for the period, 1,404 tons, as compared with 2,650 tons during the preceding week, and 2,600 tons a year ago. Quotations unchanged since last issue.

INDEX NUMBERS OF MEAT ANIMALS.

The prices of meat animals—hogs, cattle, sheep and chickens—to producers of the United States decreased 9.1 per cent from Sept. 15 to Oct. 15, 1919; in the past nine years prices decreased in like period 1.8 per cent. On Oct. 15, 1919, the index figure of prices for these meat animals was about 11.4 per cent lower than a year ago, 6.3 per cent lower than two years ago, and 45.9 per cent higher than the average of the past nine years on Oct. 15.

The following table gives the United States estimated average of the monthly index number of prices to producers of meat animals on the 15th day of each month for the years named:

	1919.	1918.	1917.	1916.	1912.	Av.[1]
Jan.	13.46	12.59	8.53	6.46	5.44	7.35
Feb.	13.51	12.65	9.42	6.94	5.54	7.54
Mar.	14.06	13.06	10.70	7.53	5.69	7.93
Apr.	15.01	13.55	11.71	7.85	6.30	8.25
May	15.34	13.83	11.84	7.98	6.39	8.24
June	14.98	13.62	11.72	8.00	6.27	8.18
July	15.61	13.68	11.47	8.04	6.23	8.16
Aug.	15.56	14.21	11.84	8.05	6.56	8.31
Sept.	13.44	14.50	12.79	8.38	6.74	8.52

Nov.		13.37	12.47	8.09	6.45	8.05
Dec.		13.40	12.74	8.15	6.42	8.00
Avg.		13.52	11.52	7.79	6.24	8.07

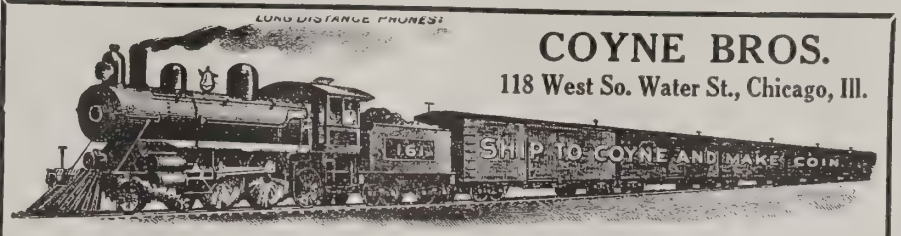
[1]Average, 1910-1918. —Monthly Crop Report.

MEAT CONSUMPTION IN THE UNITED STATES, BY SECTIONS.

In the tabulation relative to the per capita consumption in pounds of meat in the United States, appearing in the October *Crop Reporter*, the figures relating to pork and mutton, for the population, were inadvertently transposed. The figures corrected are as follows, estimated per capita consumption in the United States:

Population.	Total. Lbs.	Beef. Lbs.	Veal. Lbs.	Pork. Lbs.	M... L...
N. A...	168.8	59.6	12.8	67.7	10
N.C., east	186.0	62.7	9.5	88.5	6
N.C., west	202.3	64.1	8.1	97.8	8
S. A...	168.9	35.2	3.8	107.1	7
S. C. ...	181.6	36.3	2.3	112.8	9
West. ...	183.1	70.3	12.7	71.3	7
Total ...	179.9	54.0	8.4	89.6	8

The different divisions are: ... Atlantic States, North Centra... North Central, west, South ... South Centdal, Western (m... and Pacific Coast).



Seed corn at $5 per bu. me... per acre, whereas seed wheat d... $2.50 to $3 per acre; red clov... Grimm alfalfa $7, the curren... prices in Missouri; and yet thes... at Columbia says "most farm... sider that $5 per bu. is a high p... seed corn." As a matter of fa... cheap at that price if good.

CHICAGO'S HAY MARKET

Plans for Plugging Inspection at Chicago—Accurate Weights—Favoring Shipping and Buying Trade—Market Facilities Being Improved.

Hay receivers in Chicago have known for some time that improvements must be made in their systems of handling receipts and shipments. The market has always enjoyed good storage facilities, but the hay trade now demands something more. Country shippers, getting their business possibly with other markets, have found by comparison that Chicago needed a house cleaning. The hay receivers of the city were not entirely at fault, because as every one knows the railroads are the big factor and must be considered, and their approval secured for changes in system as broad as is the inspection and weighing of hay.

A hay shipper in the Chicago district recently said when commenting on the efforts the market is now making to get on a better basis, that the larger the returns had been received on hay shipments to a market where hay is inspected on plugging tracks, even though that market was more than $10 per ton under Chicago for the grade of hay in that particular car.

In the first place, our readers may have been accustomed to think of a "plugged" car as meaning one with inferior grade in the ends, purposely built up with fancy grades at the door. This unfair practice has likewise been termed a veneered car. But at any event its the word "plugged" has nothing to do with inspecting hay under the plugging system which means pulling from both ends of the car some 50 or 60 bales out on the track where they are neatly piled, thus permitting full inspection of the remaining bales in both ends of the car as well as those inside. It is self-evident that under this plan the shipper receives the value for the actual grades in the car and the buyer is likewise exactly posted on the character of his purchase.

The Chicago market has had up with the railroads, which are still under Government control of course, the establishment of centrally located paved plugging tracks at several desirable sites: one on the South Side, another on the West Side and possibly a third on the North Side. The final approval of the Railroad Administration is expected soon, and then the details will be a matter of negotiation with each individual railroad. This is work that will not be a "cinch" but will require a lot of hard work; but this the Chicago hay receivers are planning to spend upon the desirable result. They understand that the building up of the hay business, which the geographic location, enormous consuming buyer and shipping advantages of Chicago require, is a task worth while. When this work has been carried through, the railroads will of course give up the present team tracks because the plugging tracks will do it all at one operation. The cars will be plugged out in the morning, sold by auction and shipped out in the evening or loaded out onto wagons if a local dealer is the buyer.

EFFECT OF THE PLUGGING SYSTEM.

Hay rejections under the plugging inspection system are impossible, thus changing an aggravating detail of the present system, under which sales of today may be radically changed within a few days or even a week if that time is required, as sometimes it is, to switch a car to its proper location for unloading. As it now stands, the hay shipper in the country gets his sale report on which is stamped "Door Inspection," and he knows that when this car is unloaded there may be some rejection for inferior bales within.

To overcome this bad feature is alone commendable; but when we consider that the plugging inspection shortens the time of definite returns to the country hay shipper by the same several days or week, its real importance is better realized. The Chicago hay commission trade want to satisfy their shippers on whom they depend for their business; and they will be able with the plugging inspection system to show equal satisfaction to the hay buyer. If, for instance, the hay is sold to a local feed dealer, when it is plugged he knows approximately how many wagon loads of just the kind of hay necessary for a certain warehouse or customer are required to unload it.

HORSE PUBLICITY ASSOCIATION AT THE INTERNATIONAL LIVE STOCK EXPOSITION.

The Horse Publicity Association, which recently held a meeting in New York City for the purpose of working out the preliminary plans for a national organization which will have as its purpose publicity relative to the horse and the important part he plays in our national economy, has decided to hold a meeting of national scope during the International Live Stock Exposition to be held at Chicago Nov. 26-Dec. 6. This meeting will be held in the Elizabethan Room, Congress Hotel, Michigan Boulevard, Chicago, at 2 o'clock on Thursday afternoon, Dec. 4, and a banquet will be held in the same room at 7 o'clock that night, which will be attended by a large number of men and women who believe in the horse and in the part which he has played in the development of our Nation.

It must be stated at the outset that the Horse Publicity Association is not concerned with any other interests and has not been organized for any other purpose than that of bringing before the public the essential facts relative to the great value of horses as power units in agriculture, commerce and transportation.

At the afternoon session, which will be a business one, plans will be completed for carrying out the work of the Association for the ensuing year, and the report of the Saddlery Associations, which have been carrying out a most exhaustive survey of the place of the horse in production and transportation, will be presented. This survey-investigation has been financed by the Saddlery interests, and is the most complete of any inquiry ever made into this particular subject. Interesting facts will be presented in this report, which will be of value to every man who is engaged in agriculture or transportation.

The meeting will be open to the public and those who are interested will be cordially invited.

MEAT STOCKS.

The Bureau of Markets reports the following holdings of frozen and cured meats in cold storage on dates named. The tabulation includes holdings of a few unreported firms. The estimated holdings are in every case less than 2¼ per cent of the total stocks, which include holdings in both cold storage warehouses and packing plants and also meats held in the process of curing as well as the cured products:

Commodity.	Nov. 1, 1919.	Oct. 1. 1919.	Nov. 1, 1918.
Fr'z'n beef.	184,120,509	166,243,870	224,320,731
Cured beef.	37,504,421	37,327,531	29,376,151
Lamb and mutton	7,893,989	8,318,390	8,644,785

Provisions, Etc.

CHICAGO PROVISION REVIEW.

CHICAGO, Nov. 24.—Provision prices moved quite rapidly at times within a liberal range last week, lard closing with losses of 60 to 87½c, while short ribs gained 5 to 42½c, the latter on January, and pork was 15c higher and 75c lower.

The big interest was in lard, it being under pressure a greater part of the week. Cross, Roy & Saunders sold 5,000,000 lbs. January in three days and followed with the buying of 1,000,000. There was also selling by other interests and good buying by brokers who usually work for outside packers, particularly in Milwaukee.

The lard situation is a most interesting one. Speculators in New York were heavy buyers some time ago in expectation of being able to export the lard at good profits. The break in foreign exchange made business profitable and many have sold out and it is understood that some of the big packers have had to cancel sales made to the Seaboard. They in turn have sold January and with lard the highest of any speculative product in provisions, it has suffered the most serious decline. The make of lard continues large and the distribution heavy, shipments last week being 15,781,000 lbs., an increase of 1,425,000 lbs. over the previous week and compared with 11,386,000 lbs. last year. Were it not for the low prices prevailing for German marks, making it uncertain as to what an exporter could get in the way of money, it is believed that there would be a very large export business. It looks to some of the exters as though the price of foreign nge was unduly depressed to pre- countries needing supplies the ting them.

developed tightness in the but loosened materially later on increased offerings and a reduction in the short interest. Ribs and lard line, but the advance in ified this condition to a limi tent. Domestic demand for meats was fair and it is understood that a few more ribs are being made, although the packing here since Nov. 1 shows a decrease of 142,000 hogs from last year. Fresh meat trade, which has been active, was less so at the close of the week and it will be no surprise to see a reduced buying and consumption from now on, as is usually the case, owing to poultry being more largely consumed during the Thanksgiving and Christmas period. There have been large sales of side meats and hams made for export in January and February and some in December. One of the packers claim that an immense business has been done in this way, which has enabled the packers to hedge the output of their houses by such sales. Hog supplies were larger and prices dropped to the lowest in several weeks, with a rally at the close.

Loose lard was neglected at 75c under November and there were deliveries of 200,000 lbs. of lard on November trade during the week. Leaf lard has declined to $27.50, or 1½c a pound within a week.

Range of prices in October and previous and for the week follow:

	High.	Low.	Close Nov.22, 1919.	Close Nov.15, 1919.	Close Nov.23, 1918.

Kansas City Provision Review.

KANSAS CITY, Nov. 22.—Reflecting the unsettled labor situation in the United States and the strained financial structure abroad, the provision market in Kansas City this week was quiet, displaying less activity than has been evident in recent weeks. Price changes were irregular, the market advancing slightly in the forepart of the week, and turning down later, closing with recessions of ¼c to ¾c. Favorable weather restricted domestic buying, with only a fair to light business with the East and locally. The South is buying on a larger scale than other sections, due doubtless, to the high level of prices for cotton. A good movement of dry salt and heavy smoked meat to the South was reported. Fancy hams and bacons met with a fair demand in local territory, closing unchanged to fractionally lower. A good demand prevailed for lard and substitutes.

Export of Hog Products.

The past week's export clearance of hog products, compared with previous week (last year's reports suppressed by the Government):

	Nov. 22, 1919.	Nov. 15, 1919.
Pork, bbls.	780	300
Pork, lbs.	148,200	57,000
Meats, lbs.	25,560,000	21,919,000
Total meat	25,708,200	21,976,000
Lard	9,573,000	11,165,000
Total products	35,281,200	33,141,000

Summary of Live Stock Markets.

The Pittsburgh Situation.

Walter C. Merritt, Correspondent.

Pittsburgh, Pa., Nov. 22.—Our butchers' strike is not yet settled, but will most likely be terminated early the coming week. Some of the small slaughterers are working probably 25 to 50 per cent capacity and some of the biggest packing houses are operating on a small scale, some of the old employes dribbling back gradually.

Receipt of hogs late in the week very heavy for this market. Today they came pouring in on every train. We had over 5,000 hogs here today, whereas the normal Saturday run is about 1,000 or 1,200 head. The market broke rather sharply at the finish and quite a lot of hogs were held over unsold. When our packing houses get going again will be able to handle everything coming here.

Live Stock Markets

CHICAGO LIVE STOCK.

CHICAGO, Nov. 24.—Hog prices slid f sharply during the greater part of t week with an advance of 30 to 40c r Saturday. The low point brou prices down to under $13 as the a age, Friday's being $13.60, a loss 80c in a week. Saturday's average $13.90, against $17.58 a year ago $17.78 two years ago. The top p at the close was $14.25, or 60c un the best at the opening of the w There were 4,000 hogs carried over unsold. Average weight for the w was 224 lbs., against 226 lbs. the p vious week and 220 lbs. last year. Sp plies were liberal, Chicago having 2 575, the largest since last Februa and 44,300 above the eight-year a age. The twenty markets had 819,0 hogs, against 727,500 the previous w and 1,025,000 last year.

Chicago packers bought 208,300 the week, against 188,700 the previ week and 224,400 last year.

Cattle prices were on the down gr last week with the receipts the larg on record, Chicago having 109,5 against 109,692 last year. At the se markets there were 399,000, or 67 more than the previous week and 000 in excess of last year. The price for fancy steers was $20, there were very few of that grade, medium and poorer grades being $1 to $2 and in a few instances a shi more. It was the most unsatisfact market for sellers that they have experienced in a long time. While took the few fancy offerings, not m steers sold above $18.50 and the s grade that brought $16 to $17.50 the previous week went at $15 to $16 a loss of $1. The greatest depreciat was in the short fed line of stee selling at $12 to $14. Those that brou $10 and under did not suffer the s decline as those above, the loss a aging around 50c. The average p of beef steers for the week dropped to $14.50 and was $1.15 under year's, compared with $9.60 as the year average.

Butchers' stock lost 50 to 75c for week, canners 25c. Yearling heif sold at $11 to $13.50, a drop of Cows, $7.50 to $9, with a loss of Bulls were taken freely by shipp the bologna kinds at $7 to $8, w a few fat ones at $10 to $10.50. Tr were a good many thin range cows the week's offerings that went into canning trade. Veals were off $1 $1.50, a few selling above $17, and g light calves at $16 and $16.50.

Feeders were active buyers of kinds of steers available for killing feeding purposes and prices were lower and in some instances were with $11.50 to $13, taking the bes the offerings. Light stockers bro $7.50 to $8.50 and were slow Southwestern markets were very dra at $8 to $10, so that Chicago had the trade with northern Illinois and diana feeders the principal buyers.

Sheep and lambs generally were more for the week with the best la at $14.75 and the average $14.40, a of 10c for the week, and of 85c f last year. Sheep sold up to $10 as top with $8.75 the average, a gain 75c for the week, and a loss of $1 f last year. Quality of the sheep greatly improved, which had much do with bettering the price. Recei for the week were 132,148, against 589 the previous week, and about same as last year.

Estimated receipts at Chicago week are: cattle, 86,000; hogs, 200,0 sheep, 110,000. Last year they w cattle, 102,367; hogs, 221,973; sh 126,504.

Kansas City Live Stock Marke

Sanders Sosland, Correspondent.

Kansas City, Nov. 22.—Weakness dominated in the trade in live stock Kansas City this week, with the shar

dines on cattle and the best tone noted in the trade in sheep. Receipts showed little change from the preceding week and were generally lighter than a year ago.

In the hog market receipts were slightly more than half the total of a year ago, but the trade here was affected by weakness at other markets, notably Chicago, and final prices were 30 to 40 cents lower for the week. Owing to the light receipts of cattle, the average cost of droves in Kansas City was higher during the week than at Chicago or at Omaha, and the best tops were also paid here. Packers indicate that they expect continued reductions in local receipts as compared with a year ago, owing to the fact that supplies on farms in the Southwest have been reduced by the drouth. The top price on hogs for the week was $14.85, and the best price today is $15, compared with a top of $15.50 in the preceding week. The average cost of hogs was figured at $14.42, compared with $14.62 in the preceding week.

Cattle were affected by reports of excessive supplies of short-feds at Chicago and by indications of continued liberal runs of grassers here for some weeks. Short-feds fell $1 to $1.50 on this market, with better grades of fed cattle about 50 cents lower. Butcher stock was mostly 25 to 50 cents lower. Veal calves declined 50 cents to $1. The top on range cows was $11 and the best fed offerings brought $11. Top on steers was $17.50, with one animal at $20. Shortfed steers closed in range of $11 to $14. Top on veal calves was $16.50. The better grades of stockers and feeders sold well, while plain kinds moved slowly. The better grades were unchanged, and some feeders took a little at prices as much as $1 more than packers would pay.

The sheep and lamb market closed firm to 25 cents higher. The offerings were unchanging in quality. There was considerable buying of fine wool ewes here by Denver interests. The heavy trade in feeding lambs at Denver is taking some receipts away from this market, the buying at Denver being by Colorado feeders. Fed lambs sold at a range of $13.50 to $14.50, ewes between $6 and $8.25 and wethers at $9.50 to $10.50. Yearlings sold up to $11.75.

Oklahoma Live Stock Market.

Thusnedia Haehnke, Correspondent.

Oklahoma City, Nov. 22.—The cattle receipts for the week showed up better than last week. The fore part of the week a few loads of grass-feds from southern Oklahoma made $10.75 as top, the highest price in weeks. Although receipts have been better, packers are still complaining that not receiving a sufficient number of cattle to keep their killing gangs going and are still drawing supplies from nearby markets. The market has been in very good shape this week and everything sold early on arrival. Steers have been scarce and at least 15@25c higher; $10.75 was the top. Fair to good quality 875-lb. steers fed cotton seed and hulls forty days, sold early at $10. Steers were oddities throughout the week and naturally packers could not side-line paying steady on the handful here, but plain and common kinds. Anything in the steer line gets quick action, prices are stronger if any different from last week.

Cows as well as canners are about 25c higher as compared with last week. Some fifteen to fourteen loads of good fleshy cows weighing 925 lbs. sold at $8.50@8.75, with a few odd heifers as high as $9.50 at the opening of the week. Some say the $8.50 quotation is misleading due to the fact that beef of this class required is so much that they are selling steady with a good demand by feeder buyers. Calves are strong on all grades, $15.00 being top for light weights. Bulk of calves now being marketed are quite "woody." However, calves are closing lower. Stocker cattle have been going at steady prices. Buyers are trying to keep young stock on a $5.25@5.50 basis; some got by at $5.75 basis. It must be something extraordinary to beat $6.00.

The top on hogs was $15 on Monday, which stood good for the week. Light runs failed here put pep into the deal. Quality and average make-up, heavy butchers below the $15 turn. Packers are paying more here than at any of the northern markets. The week closed with a 35@50c break, which was more than the popular decline in the north, but it put local rates in line with the line. The market is on a par with last Thursday, and a little less than $1 per cwt. under a year ago. Stockers have been scarce and steady.

St Louis National Stock Yards.

National Stock Yards, Nov. 22.—Liberal receipts in all departments characterized the market this week. The quality of our receipts was very plain, there being very few good cattle on sale and nothing choice or prime. Anything that could be called really good, and especially if it was choice, would have stuck to a good basis as the buyers were all out of cattle of this class, but the plainer kinds and therefore practically all of our cattle suffered a very sharp decline. There was demand for canners and cutters and sold this grade a little steadier than buyers and the decline on them was not quite as sharp as in the other classes. Stockers and feeders are in fair demand, but prices have been affected down-right sympathy with slaughter cattle. Prices came in for another trimming this week. Early in the week it showed more strength and a top of $15.10 was paid Wednesday. Since that time the market has been steadily downward and we close the week 85c lower than the close of last week. Regardless of lower prices the market has been active and clearances good. The quality of the offerings continues to improve and averaged very fair indeed for the week. The closing quotations are: Mixed and butchers, $13.50@14.05; good heavys, $13.90@14.05; rough, $11.00@12.75; light, $13.50@13.90; pigs, $13.25@13.75; bulk, $13.65@13.90.

There is very little change in the tone of the sheep market for the week. In fact, on aged stock the quotations have not changed at all during the period. Lambs hold to about a steady basis, although the tendency is towards lower prices. We calculate, however, that this condition is due for the most part to the very common quality of the lambs. There are a few good ones coming in but the bulk cannot be called better than medium.

South Omaha Live Stock Market.

Bruce McCullough, Correspondent.

Omaha, Nov. 22.—Fine open weather throughout the Northwest was responsible for a liberal cattle movement this week and receipts, 62,000 head, were 13,000 heavier than last week and 11,000 heavier than a year ago. The arrivals consisted very largely of belated Western rangers and the proportion of corn fed stock is still rather small in point of numbers and not very desirable in point of quality.

Excessive receipts at outside markets and sharply lower prices at all points in a measure account for the slumpy condition of the local trade. Packers backed away from the warmed-up and short-fed natives and prices declined all of 50c@$1. On the other hand Western grass beeves have held up in price fairly well. No choice long-fed beeves are coming, but such would sell readily around $15@17. Fair to good 1,150- to 1,300-lb. steers sold at $12.50@14, with short-feds largely around $10.50@12 and warmed-up steers and odds and ends around $10 and from that down.

Cows and heifers have been in liberal supply all week and they have sold very unevenly, closing prices being around 25@50c lower for the week. The bulk of the stuff has been going to the packers on account of a lack of demand from the country. Prices range from $5@11, the big bulk of the fair to good butcher and beef stock going at a spread of $7.50@9. Veal calves have held steady at $7.50@14.50 and there has been little change in the market for bulls, stags, etc., common to best grades going at a spread of $5.25@8.75.

Dullness has been the outstanding feature if the trade in stockers and feeders and volume of business has shown some decrease as compared with recent weeks. Prices have held up fairly well on the strictly attractive offerings but medium and common kinds have sold off 25@40c. Best feeders are going around $10@11 with fair to good kinds at $8.50@9.50 and the commoner kinds from $8 down. Stock heifers are moving slowly at $6@8 and stock cows at $5.25@7.50.

While there was some improvement in hog receipts for the week the total continues to fall short of a year ago. Some 44,000 head arrived this week as against 60,000 for the corresponding week last year. Demand for shipping accounts is still somewhat restricted and local packers have taken the big bulk of the hogs lately, prices being very uneven and showing considerable fluctuations from day to day. Compared with a week ago the decline in prices has been about 50c and undertone to the trade is rather bearish than otherwise. With 4,100 hogs here today the market opened 15@25c higher but closed weak with the advance lost. Tops brought $14.25 as against $14.75 last Saturday and bulk of the trading was at $13.90@14.10 as against $14.30@14.60 a week ago.

The market for sheep and lambs has been a rather featureless affair the past week with prices working lower for fat stock and somewhat higher for feeder grades. Feeder buyers are active competitors of the packers for the short fed and warmed up stuff as well as for good grassers. Best fat lambs are selling at $14.25@14.60, yearlings at $10.50@11.50, wethers at $9@9.75, and ewes at $7@8. Best feeder lambs are bringing $13@13.50 and feeders and ewes are going at $6.25@6.75.

Denver Cattle Market.

Denver, Nov. 21.—The receipts of cattle continue liberal but not excessive. The weather has been bad and the demand is not so brisk. There has been less urgency for feed lot cattle. Many trashy cattle are coming in and a class of cows that were going to feed lots at from 6c to 6½c per pound earlier are now selling as canners and cutters at from 5c to 5½c, and bulls 5c to 5½c. Veal calves are selling from 10c to 11c for best. Choice cows 9c or better, but good cows sell around 8c. All classes of cattle are steady to higher than last week's close, but 25c to 50c under the high time of three or four weeks ago. Prospects are that present values will be maintained, except perhaps a further weakness on common, plain or trashy kinds.

Canadian Livestock.

Winnipeg, Nov. 22.—The embargo against shipments of livestock into the Union Stock Yards was lifted Monday noon but receipts proved to be light during the first few days of the week due to its influence. Select hogs opened the week at $16 but on Wednesday lost 25c and suffered a like decline the following day. However, closing quotation of the week was $15.75. Cattle market eased off 25c all around on Monday but closing quotations Saturday were $11@12 for choice butcher steers, fair to good quality, $9@10.85.

Movement of Hogs.

Weekly receipts and shipments of hogs at western centers the week of Nov. 22, and totals with comparisons for corresponding time last year compiled by THE PRICE CURRENT-GRAIN REPORTER:

The Fine Art of Service

FROM the beginning to the end of your stay in Chicago you can be under the responsible protection of La Salle service. This Hotel owns and operates a large fleet of taxicabs and limousines primarily for convenience of guests. Luxurious cars with careful, courteous chauffeurs are at your command at most reasonable rates.

Hotel La Salle

Chicago's Finest Hotel

—is located in the heart of Chicago, yet the unobtrusive courtesy, perfect appointments and service insure all desired privacy.

RATES

One person *Per day*
Room with detached bath, $2, $2.50 and $3
Room with private bath, $3, $3.50, $4 and $5

Two persons *Per day*
Room with detached bath, $3, $3.50 and $4
Room with private bath—
Double room - - - $5 to $8
Single room with double bed $4, $4.50 and $5

Two Connecting Rooms with Bath
Two persons - - $5 to $8
Three persons - - - $6 to $9
Four persons - $7 to $12

1026 rooms—834 with private bath

LXXXII. No 23 WEEKLY | CHICAGO, DECEMBER 3, 1919 | $3.00 A YEAR. SINGLE COPIES 10 CENTS

JSINESS AND TRADE CONDITIONS

ELATIONS with Mexico are again strained, as they have been for some years. Mr. Taft juggled with this "hot poker" in his last Washn days; and Mr. Wilson let his absurd prime ter, Mr. Bryan, burn not only their own fingers it but those also of pretty much every one else sted. Never, in our history, perhaps, were the fruits of a mushy sentimentality in foreign s so quickly harvested as by this Administrandling the "Mexican Question." The country urfeited with Mr. Bryan's "calls of humanity" he became Secretary of State, but a man who such sublimated views of humanity's sufferings olesale might easily overlook those of individ-mere citizens; while the type of statesmen bsorb their social science from "copy-book head- as Kipling has just put it, might as easily ve as sordidness the repeated protests of suf- against the sacrifices of their property. With ype of statesmen at the helm it was not sur- g, though unexpected, that the blunder should been committed, on becoming at last conscious existing "strain," of undertaking to relieve it versing all American precedent and practically rowing a *de facto* government which gave promise of restoring order in Mexico in order up a so-called *de jure* constitutional govern- and dictator who has proved impotent at home espised abroad. "To use the word 'government' lood-stained anarchy and radical chaos is a ation of terms."

rvention in the crisis of a revolution is always stionable procedure, of course. It usually has erior motive and is attended with evil effects both peoples. Both the Administration's efforts Mexico were utter failures, aggravating, not ng, the situation. But now, in the light of cur- onditions in Mexico, although in part due to vn dalliance, it has again become a question er it be not justifiable, even necessary, to make able "retort, in preservation of our self-respect, hameless oligarchy using us as an ogre where- o lash a barbarous people into frenzy for the t of their own ambitions."

Mexico at this moment is in the heat of a l election campaign, and the politicians as are making capital of the United States' atti- almost literally, certainly oratorically, pulling s out of the American Eagle as in times past it e American politicians' habit, sought now for asons to be revived, to "twist the British Lion's appendage." Which doubtless explains in part esent impudence of the Carranza government is to a degree only more offensive than habit- There is, therefore, admittedly some appear- f unseasonableness, which assuredly will be he most of in Mexico, in the present American e of protest against outrages to our people and ult to the dignity of the Government itself in rson of a consular officer held by bandits (?) nsom. But at any rate it is only a matter of unless happily the A. B. C. group of republics, be about to use their influence, shall be suc- in bringing Mexican politicians to their —when the United States will be obliged, in o maintain its own feeling of self-respect, to p Mexico as Cuba was quieted, and to give 's common people, for once in their history ortez, a chance to work out their own material oral betterment, a privilege which certainly they are not enjoying at the hands of their present law makers and rulers.

The Steel Strike has resulted in the failure of the radicals to get soviet control of a great industry; and the failure saved to that extent the integrity of the open-shop. The struggle with the radical miners may, perhaps must, finally, turn on the same hinge. For as unions are now ruled by the radicals the closed-shop means the beggary of humanity and the ruin of civilization. The Steel Corporation, however, conducted its own campaign with public sympathy on its side. The struggle with the miners is more serious, having unfortunately become one between the Government and the radical unionists, and the situation is surcharged with not a few unpleasant possibilities. Washington administrations have been drawing away for some years from the sane Kantian, and sometime Democratic, doctrine, that "the 'state' exists not for the promotion of happiness, but for the conservation and administration of justice," and the natural result has come to pass. The worst now is that even outsiders, like McAdoo, the past week, have begun to mix in to make the strike serve as political fertilizer to their own ambitions. The present disorder of labor, created for the most part by aliens and moral dead-beats, and by the philandering of senators, is too rapidly drifting toward the political excess common enough in the history of democracy at periods of crisis. In times past Americans and the English escaped the worst phases of this blot on popular self-government; but militant aliens have begun to repeat here the program to make the American Republic what that of France has long been, a government by a coterie of politocrats,—in France concentrated at Paris, against which in France sound public opinion hurls its protests in vain. It is this oligarchy of professional politicians and grafters, which in Paris includes all the "high financiers," and the "intellectuals," with their corrupt editors and manipulators of the press, which the young business men, members of the new Chamber of Deputies, elected on Nov. 16th, hope to break down and so save France from certain bankruptcy unless her wasteful governmental expenditures be stopped. The French politicians in the past have successfully organized the "efficiency of the mob" for their own profit; now the common sense of all democracies must be mobilized or universal bankruptcy will result.

There are those who will refuse to take seriously the new National Labor Party organized at Chicago on Nov. 24, with a platform the most radical ever put out by any American political organization, but there must be considerable nascent radicalism afloat in unsuspected places to warrant the Guaranty Trust Company of New York saying in its circular of Nov. 22 that, "From many parts of the country come reports indicating that the thought of the people on the subject of Bolshevism is taking clear and definite form and that the time is rapidly approaching when war will open in earnest upon those who purpose the overthrow of Government and industry as now constituted in this country." Isn't it about time? "The emphatic repudiation of socialistic and anarchistic tendencies by the voters of Massachusetts," and the stand taken by some farmers' organizations "against the appeals of some labor leaders for shorter hours and more pay," may be "indicative of fundamental rightness on the part of the masses of our people toward readjustment problems," but it can not be overlooked that "the masses" are not so well organized on the side of rightness, when the great party leaders pander to the radicals for their votes, that any one wishing his country well can afford to pass up these new ideas as mere vaporings. It did not so work out in North Dakota, and evidently Minnesota and Michigan will be put on their mettle to overwhelm at the polls the radical tendencies developing there.

The enormous trade balance piling up in American favor this year as last ($3,388,536,522 for ten months of this year, against $2,491,646,683 in 1918, an increase of $1,440,168,474) continues to emphasize the question of regulating exchange. But "the depreciation in foreign exchange is not due merely to the heavy trade balances," the National Bank of Commerce in New York says in the December issue of *Commerce Monthly*, but is due to the further fact that foreign moneys are depreciated at home; the gold standard has been suspended in most European countries, and the money is merely irredeemable paper. The abnormal exchange conditions are probably due more to the latter than to the former fact. As the outward flow of grain, other than wheat, of meats and other farm products is in large measure dependent on the value of exchange, naturally the questions are asked, "How far will the exchange rates fall? When will they recover? How rapidly will they recover?" These "are questions to which no one can give confident answers," the *Commerce Monthly* says. "It is the general expectation that so long as the heavy excess of imports over exports continues for the European countries, their exchange will go lower. On the other hand, there are some observers who express the opinion that much of this has already been discounted in the existing exchange rates by short selling and that the demand from these short sellers themselves will take up the new supply of foreign exchange growing out of the exports for a considerable period. Other observers, however, maintain that the general tendency of speculation has been bullish rather than bearish. This view is strongly buttressed by statistical arguments: the long time loans to Europe in the past year fall far short of the balance of Europe's current debt to the outside world and speculation of one kind or another must have absorbed the difference, either by buying exchange, or by letting balances accumulate in European banks, or by withholding exchange from the market and allowing 'open accounts' to run. There would thus be an enormous volume of exchange hanging over the market. Definite prediction is dangerous where so many uncertainties exist."

Whatever view one, therefore, may take, the fact remains that goods continue to go out in large quantities (at least as measured by money values) and in some way they are financed. The October excess of exports was $216,000,000, and as there were no gold imports, "the presumption favors," as Goodman's "Comments" says, "an extension of credit to that amount. The quantity of exports has not increased materially over the pre-war average, the valuations being largely due to the high prices prevailing. Quantity rather than value is the true gauge of economic wealth, and the figures are more interesting in the light of advancing values than in consideration of actual business transacted." The enlarged valuation total therefore measures the penalty Europe and America alike are paying now for both Europe's enormous currency inflation of practically irredeemable paper money and the scarcity forced upon us and Europe by the war and by the ruinous heresy of all labor advisors, that men can use and enjoy wealth merely by multiplying the worthless counters of its market value, not by reproducing more wealth, the things themselves that are consumed.

The import valuations of goods coming from Europe reflect the same inflated values rather than larger

quantities, Dr. Kennedy of the Bureau of Foreign and Domestic Commerce having explained the other day that "dutiable value for assessing *ad valorem* duties is the foreign value converted into American dollars," and showing the depreciation of the foreign currency in current circulation at time of consular certification of value. However, the movement tendency should be in the direction of increasing imports rather than of increasing exports; but as long as Europe is in dire need of foods and raw materials the export side of the foreign trade will continue to show an excess, with more credits extended to buyers. The state of exchange has this virtue, however, in the American eye, that its depreciation affords a rare opportunity for foreign investment to those informed as to securities offered, the state of exchange meaning a heavy exchange premium on the American dollar invested in addition to the profit on the investment itself.

RULING ON ELEVATOR SITE RENTALS

THE Western Grain Dealers' Ass'n has obtained from the Iowa Railroad Commission a ruling on the equity of elevator site rentals (printed on another page), which, if not overturned by a court of record, will materially reduce elevator expense on that score in that state and perhaps in others. The reasoning is that the country grain elevator is a part of the facilities of the railroad itself, without which it would not be able to give the public the service which it has a right to expect at the carrier's hands. Such service being provided at private expense wholly, the elevator owner or operator should not be penalized by the carrier for having thus contributed to the carrier's ability to serve the public, more particularly since the carrier itself is not permitted under the law, as expounded a generation ago by the U. S. Supreme Court in the famous Munn case, cited in this ruling. Therefore the Commission fix as a "just rental" a nominal sum only; that is to say, 6 per cent on the value of the land actually occupied by the elevator and its own contiguous buildings and roadways necessary to conduct of the business, not included sidings. The ruling even goes so far as to attribuute to the elevator itself, the same quasi public character inherent in the carrier which obtains that character, the Board of Commissioners neglect to say, not so much because it performs a service for the public as does an elevator, since all lines of private business also serve the public, but because the carrier has been endowed by the law everywhere with a portion of the sovereignty of the state government itself, to-wit, the right of eminent domain, which certainly does not and cannot inure to any private individual or company doing strictly a private business as does an elevator. The Board's zeal to support its main proposition, which is a sound one, has undoubtedly carried it farther than the record warranted.

WHAT CAN BE HAD

THE Nebraska coöperative association at Omaha adopted a resolution asking for better crop reports from Europe. The Myers effort to organize a farmers' institute is based on the same "long felt want." Well, there is the Institute of Rome which is doing the work and the U. S. is paying its part of the cost. Its reports are accessible to all who have energy enough to go get them. Our own Bureau of Crop Estimates also publishes a mimeograph report fortnightly giving all crop data that is available from dependable foreign sources. The Bureau can not print and widely circulate this report (it even has to cut down the circulation of the *Monthly Crop Reportcr*) because this Bureau, which is doing something worth while all of the time, has to be content to take the leavings of appropriations (always too small), after the Bureau of Markets, which is not doing much to speak of at any time outside of the grain inspection supervision, gets what it wants.

It isn't necessary then to organize more institutes to get information which is already available and long has been; but more money from Congress might spread it over a wider field, among men who probably would not read it or use it intelligently if they had it, but who can be made to think by agitators that they need it most badly and are wickedly deprived of it. But it is all there ready to hand for those who read and can use it and make an effort to get it.

TELEGRAPH COMPANY LIABILITY

THE decision of the Illinois Supreme Court on telegraph company liability on unrepeated messages, previously mentioned in these columns, is reviewed in another column. In this decision the ruling was made that a telegraph company could not avoid its liability for loss caused by error in an unrepeated message. As this judgment, made on an interstate message, contravenes the ruling on the same matter of the Interstate Commerce Commission, based on the act of 1910, by which the Commission was endowed with full supervision over contracts, operation *and rates* of the communication wire companies, the decision is highly important, if it be OK'd by the Supreme Court of the United States. The equities are certainly against the Postal Company, defendant in this case; but whether the law as it stands does support the equities, as the Illinois court thinks it should, will not in all probability be finally disposed of by this decision. At any rate, in *Primrose* vs. *W. U. Tel. Co.*, 154 U. S. 25, the higher court has already said in substance that since the telegraph companies have been placed under the regulation of the Commerce Commission the former common law ruling, holding the telegraph companies liable for errors of this nature, has been modified; therefore, unless there is a specific contract with the telegraph companies by which the message is repeated and the repetition is paid for, the sole liability of the telegraph company in the case of a blunder in an unrepeated message is not the damage that the blunder has caused, but simply the price of the message itself.

If, as seems to be the Illinois Court's opinion, the Carmack amendment to the Commerce Act takes away from the Commission the power given by the Act of 1910 to regulate the terms of a telegraph company's contract with a message sender, the Illinois decision, if it stands, reverses the present rule of law as to unrepeated messages. That is the only point of the decision.

THE RAILROADS AFTER NEW YEAR'S

IT IS certainly of more than casual interest to the shipper of grain, livestock and feedstuffs of any description to consider where he will get off after Jan. 1, 1920, while the railroads struggle to get out from under the burden of the impediments passed on to them with their abandonment by the Government, should that happen. It is one of the very big subjects before the country at this moment, and few men are really in a position to intelligently discuss it, much less to dogmatize about it. As to the grain trade, one interesting fact at least may not be without interest.

It is, for example, most important for the country and terminal market shipper alike to know with some degree of certainty what railroad equipment will be available to move grain and products when the time is right for them to move. For two years past, the public has been told why the equipment of our great railroads is inadequate—lack of funds; and now the public is again advised that from 350,000 to 400,000 box cars are on sidings and in the shops east of the Indiana line, to say nothing of those in the West, but that the Railroad Administration's allowance for repairs is inadequate to even start the necessary work of fitting these cars for use. Yet the country needs box cars by the thousands for the current grain crops movement even with the objectionable permit system, market or individual, in force and effect. Where are the cars coming from?

One cannot withhold saying to all those who may still be in doubt regarding the relative merits of public and private ownership of the roads, that one glance at their pitiable condition today should convince all thinking and voting citizens that s should whenever opportunity is presented throw e influence in favor of private operation.

WEEKLY STATISTICAL SUMMARY

The following tabulation is a summary of figures o various statistical exhibits appearing weekly in det "The Price Current-Grain Reporter," these figures r senting the past week, the preceding week and c sponding time last year, here assembled for ready re ence:

	Nov. 29.	Nov. 22.	Nov. 3
Wheat—			
Primary receipts.....	8,333,000	8,066,000	8,1

EDITORIALETTES

THE new demurrage rules as to grain, seeds, t and the order regarding grain inspection i Chicago and Kansas City Terminal District a reprinted on another page. Business men negle keep these important things constantly before tho

THE buying of mill feeds on the 60-day bas holding up well. The mills, however, are not sel freely, which particularly applies to country p where the serious shortage of coal and cars is m felt. The situation is bullish for the present; b conditions should return quickly to somewhat n normal basis, this holding attitude of the mills m prove a large potentially bearish factor.

IT IS regrettable that advertising should ev referred to as a "game." Nothing could be more leading; nor more erroneous. Those who know principles and how to apply them make big m But many who neglect to study and master the ciples and simply follow the "other fellow," get i "rut" and fail to get results. Success is obtain knowing how and "beating a shorter path" of own.

THE reader who follows the stock reports publi herein from week to week will have no great diffi in understanding why cattle prices are low. Omaha correspondent, than whom there is no bt informed man, this week covers the situation in w words most admirably. Our St. Louis stock re contribute to the same thought. All theoretical about the market melts away before plainly s facts.

THREE DOLLARS a year in the United States and Mexico; $4.00 a year for Canada, the United Kingdom, the Continent of Europe, Australia, and other countries in the Universal Postal Union. Less than a year at the same rate. Single copy 10 cents.

LETTERS on subjects of interest to those engaged in the grain trade, news items, reports of crops, grain movement, new grain firms, new grain elevators, contemplated improvements and cars leaking grain in transit are solicited.

THE ADVERTISING value of The Price Current-Grain Reporter as a medium for reaching the buying power of the grain elevators is unquestioned. The character and number of advertisements in its columns tell their own worth. If you would be classed with the leading firms catering to the grain trade, have your announcements in the trade's only paper, which is always first to get the live, up-to-date news to its readers.

ADVERTISEMENTS of meritorious grain elevator or machinery and supply houses and of responsible grain firms who seek to serve the grain dealers are solicited.

CHICAGO, DECEMBER 3, 1919.

GRAIN TRADE REVIEW

Sentiment and the coal strike dominated the corn market; and with sentiment rather in favor of higher prices the level of values has been advanced around the best figures within a month. The coal strike caused some of the industries to close down, and should there is a quick change in the situation practically all of the corn grinding companies in the West are likely to shut down, temporarily at least. There is a good demand for all products, but with coal short the mills cannot operate to capacity. While this has reduced the buying of cash grain, the latter has shown a very strong undertone and prices have advanced. There seems to be something under the market. It may be that all the bearish developments of late have been fully discounted. Unless the coal situation improves the movement of corn to terminal markets is likely to fall off sharply, especially as the producer wants higher prices. Grain and hogs alone of commodities have declined materially from the recent high point, and while they seem to be trying to adjust themselves to a level commensurate with other foodstuffs.

A heavy reduction in the Government crop report next week is expected to be shown from the figures presented by the November returns. The latter are preliminary and based on the acreage reported earlier in the year. From this must be deducted the amount going to silos, etc., which should result in a reduction of over 100,000,000 bus. under the recent estimates. This would bring the crop down to 2,818,000,000 bus. as compared with 2,583,000,000 bus. last year. Old corn is being very scarce. For several weeks the run has been light from the new crop, and the quality has been excellent. Very few cars No. 6 and sample grade have been received, the average moisture content being at least 2 points below last year's. Favorable weather has also been favorable for handling, and under such conditions the 1919 crop has commenced to move into commercial channels nearly a month earlier than usual. This has relieved the shortage caused by small supplies of old.

An export demand for American corn developed earlier in the week but fell off as quickly as it came. It was strange for the United Kingdom to be buying at around $1.90 when the maximum price on the Argentine grain in that country was around only $1.35, based on prevailing rates of exchange. However, in view of the maximum it would not be surprising if the same condition prevailed again. It appears to have been a case where there was a maximum and no corn. Practically all efforts to stabilize prices below their natural level have resulted in this condition, as shown by the sugar shortage. There is plenty of the latter in some sections and very little in others. If the Government were as active reducing prices as it is in disturbing business, it would give orders to the railroads to move sugar and corn instead of automobiles and other luxuries. The car situation is reported as improving, and the trade has an idea that corn will receive preference in some sections of the belt before long. However, no deluge of grain seems probable.

A scarcity of cash oats is developing. Despite limited exports stocks are decreasing and are now about 13,000,000 bus. less than last year at visible supply points. Light weight No. 3 whites are bringing a premium over December at Chicago, although they cannot be delivered except at a round discount. It is expected that the situation will be rather slow in developing strength, but sooner or later higher prices are generally looked for by the trade. Several sales as high as 80c for No. 1 white have been made, or far above the December. Exporters have taken liberal quantities of heavy weight grain. Barley-mixed oats seems out of the question at the present time, in view of the high prices for the barley. Rye has advanced sharply, with exporters free buyers of this grain for winter storage at Eastern lake ports. Considerable was sold abroad. A good part of this is regarded as speculative, the extent of the sales abroad being determined by the exchange. German citizens have $443,000,000 in the hands of the Alien Enemy Property Custodian which must be turned over to them when peace is signed.

Wheat prices continue on the upgrade even in the face of the recent big sales by the Grain Corporation, and the removal of the embargo on imports from Canada and Argentina. Dark spring wheat seems to be well established above $3 per bu., and a movement is under way in Canada to advance the price to mills in that country. Only limited quantities of good wheat would be received at best, as Canadian wheat was badly damaged by blight and rust, as it was in the American Northwest. There is a growing shortage of good quality wheat in this country, and it sells readily. It would not be surprising if the final Government crop report showed less wheat than the preliminary returns, especially in the Northwest, where the damage was the most severe. There were many acres that were not harvested. The world's situation has also changed materially as the result of the heavy losses in Australia. The latter country has a yield of around 40,000,000 bus., about equal to domestic requirements. The extent of the Argentine loss from recent frost cannot be determined as yet. The northern hemisphere, exclusive of Russia, is considerably short of normal production. The growing crop is not promising by any means, the ravages of fly in Ohio, Indiana and Illinois are far greater than in many previous "fly years," when the losses from this source attracted attention. The acreage continues to shrink in all the private reports coming in.

Grain Market Summary.

Receipts of wheat, corn and oats at primary points the past week follow:

	Nov. 29, 1919.	Nov. 22, 1919.	Nov. 30, 1918.
Wheat	8,333,000	8,066,000	8,103,000
Corn	4,391,000	3,952,000	2,549,000
Oats	3,117,000	3,989,000	6,446,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1919.	1918.
Past week	15,841,000	17,098,000
Preceding week	15,107,000	16,806,000
Since July 1	411,555,000	515,969,000

Corn prices were on the upgrade throughout the week, the inside figures being made early, and the highest at the last, the finish being on a fair reaction from the top, due to week-end evening up and profit taking with net gains of 4½@6⅜c, July leading. The December closed 9¼c above a year ago. Shorts in December covered freely, especially those who did not have a Food Administration license, without which no one can handle cash grain. Receipts of cash grain were fair, but readily absorbed, and prices more than reflected the upturn in futures, shippers taking hold freely. Weather conditions were somewhat unfavorable part of the time; but no great movement of grain is expected until there is a material change in the car situation.

Oats held within a range of 2⅛@2½c and closed with a net gain of ⅞@1¼c, the latter on December. Bulk of the trade in the latter was of an evening up character, with commission houses active on both sides of the market. Cash demand was fairly brisk and receipts small while stocks at terminal markets are gradually decreasing. The country continues to hold and is expected to for some time to come unless prices for the cash grain advance considerably. The cash showed relatively more strength than the December.

Despite all depressing factors, cash wheat prices continue very much over the guaranteed figure. Choice kinds of all varieties are rather scarce, and no relief seems to be in sight. While the embargo on imports from Canada will be removed on Dec. 15, it is not expected that sufficient good quality wheat will be received to have more than a temporary effect. Prices at Minneapolis advanced to new high figures for the season and springs at Chicago were likewise affected. Government buying of flour is again a factor in the market, providing as it does an outlet for some of the gardes below patents. Family demand for the latter is still fairly brisk. There is no great abundance of wheat in Europe, especially of choice varieties. Prices for the week follow:

	High.	Low.	Close Nov.29, 1919.	Close Nov.22, 1919.	Close Nov.30, 1918.
Corn—					
Dec.	$1.39⅝	$1.31	$1.36¼	$1.31¾	$1.27
May	1.33⅞	1.26	1.31	1.25⅞	.....
July	1.33¾	1.25	1.31	1.24⅝	.....
Oats—					
Dec.	.74½	.72	.73⅝	.72⅜	.72½
May	.77¾	.75⅝	.76¾	.75⅞	.....
July	.74¾	.72⅜	.73⅛	.72⅛	.....

World's Oats Exports.

Exports of oats last week, compared with previous week and a year ago as reported to the New York Produce Exchange by the George Broomhall service and forwarded to this paper:

	Nov. 29, 1919.	Nov. 22, 1919.	Nov. 30, 1918.
American	48,000	918,000	2,007,000
Argentine	618,000	558,000	909,000
Total	666,000	1,476,000	2,916,000

Exports of oats since Aug. 1, 1919, and comparison for three years:

	1919-20.	1918-19.	1917-18.
American	19,985,000	45,378,000	52,578,000
Argentine	10,258,000	13,541,000	2,356,000
Total	30,243,000	58,919,000	54,934,000
Season	.....	113,282,000	140,826,000

Wheat Stocks and Consumption.

Statement of the movement of wheat and consumption in primary markets, compared for three years:

	1918-19.	1917-18.	1916-17.
P. stocks at July 1	2,942,000	226,000	4,289,000
P. receipts to Nov. 29	276,361,000	296,202,000	118,406,000
P. shipments to Nov. 29	123,192,000	143,465,000	54,876,000
P. stocks on Nov. 29	55,275,000	77,656,000	6,156,000
P. consumpt'n to Nov. 29	100,836,000	75,307,000	61,663,000

Wheat in Primary Markets.

Receipts of wheat in eleven primary grain markets from Jan. 1, 1919, to Nov. 29, 1919, with comparisons with 1918:

	1919-20.	1918-19.
Chicago	63,546,000	60,618,000
Milwaukee	4,385,000	10,093,000
Minneapolis	64,026,000	64,442,000
Duluth	9,741,000	57,373,000
St. Louis	33,887,000	32,062,000
Toledo	6,489,000	4,434,000
Detroit	1,254,000	1,003,000
Kansas City	56,732,000	44,331,000
Peoria	2,139,000	2,976,000
Omaha	17,867,000	12,866,000
Indianapolis	6,295,000	6,104,000
Total	266,361,000	296,302,000

Receipts of wheat the past week at primary markets compared with the preceding week and corresponding week last year:

	Nov. 29, 1919.	Nov. 22, 1919.	Nov. 30, 1918.
St. Louis	704,000	819,000	345,000
Kansas City	2,795,000	2,474,000	120,000
Omaha	548,000	506,000	185,000
Toledo	77,000	88,000	153,000
Detroit	25,000	34,000	52,000
Indianapolis	44,000	73,000	37,000
Peoria	26,000	15,000	15,000
Chicago	826,000	658,000	1,200,000
Milwaukee	101,000	78,000	471,000
Minneapolis	2,855,000	2,638,000	2,175,000
Duluth	332,000	683,000	3,350,000
Total	8,333,000	8,066,000	8,103,000
Shipments	5,664,000	4,833,000	12,756,000

World's Wheat Exports.

Exports of wheat last week, compared with previous week and year ago as reported to the New York Produce Exchange by George Broomhall's service and forwarded to this paper:

	Nov. 29, 1919.	Nov. 22, 1919.	Nov. 30, 1918.
American	5,916,000	7,626,000	9,053,000
Indian	.....	.....	205,000
Argentine	5,134,000	3,263,000	1,442,000

On the Matter of Rentals

Ruling by the Iowa Board of Railroad Commissioners on Rental Charge for Elevator and Coal Shed Leases

By GEO. A. WELLS

'e Iowa Board of Railroad Commisio·rs has made a ruling on the peti·i filed by the Western Grain Deal·rs Association in behalf of the Staceyil Grain & Coal Company of Staceyll Iowa. Under this ruling the Stay lle Grain & Coal Company are reii d to pay as rental for an elevator n·oal shed lease only $12 per annum, h·eas the Illinois Central Railroad o·any demanded $85 per annum.

Tis is the first opportunity that the ss·iation has had to obtain a ruling ı ıe reasonableness of elevator site as·s by the Iowa Board of Railroad o·missioners under the Iowa Statute, e·on 2110 of the Code of 1913, which i luded in the report of the Commisoı given below. This law was enacted o· a bill prepared by the Legislative o·ittee of the Association and this li; is the first knockout blow that s s yet been given the railroads askg ıcreased charges for elevator site as.

Commerce Counsel, Judge Henderson, d is assistants, Messrs. Condran and o·pson, are entitled to much credit ·e able manner in which the case s·repared and presented to the Iowa a on behalf of the Association and ·rain shippers, all of whom are a· interested in the question of t charges for elevator site leases. H Helsell, Ft. Dodge, Ia., represented ·efendant railroad company.

Tl report of the Iowa Board is in·ng and merits a careful reading a country grain shippers. It is as os:

Ie Report of the Commission.

'l complainant states: That it is a·d in the buying and selling of i· coal, feed and other products at c· ille, having its elevator and coal d on the right of way of the Illinois t·l R. R. Co. and for a number of r· has held a lease for the ground n which its elevator and coal sheds ·ected, the elevator and coal shed t·eing 200 feet along the sidetrack. ·ental from August, 1911, to Feb·· 1915, was $7.20 per annum. From me to 1918, $12 per annum. That ·ailroad company now asks as a d· on of renewal $85 per annum. t· disagreement exists between it t· e carrier company as to the terms ·nditions on which the lease is to ·tinued. That the rental asked is s ve and the conditions of the lease e· onable. Complainant asks that r· nearing, this Commission grant ·elief as should be granted under i· 2110-1, 2110-m of Code Supplet· f 1913, which are as follows:

c·110-1. That whenever a disagreer·ises between the owner of an ele·r grain warehouse, coal shed, ice e buying station, flour mill, or any r uilding used for receiving, storing a· facturing any article of commerce s·ted or to be transported, situated ·ailroad right of way, or on land d· or controlled by a railroad com·· id such railroad company, as to the s· nd conditions on which the same is ntinued thereon, or removed there·· whenever application is made by p·son, firm or corporation for the a site for such elevator or grain h·se, coal shed, ice house, buying p· flour mill, or any other building f· receiving, storing or manufactur·· article of commerce transported e transported, and such railway ·· and said applicant cannot agree ·ether said elevator or grain ware·· iall be so placed on said right of ·n property owned or controlled by ·oad company, or as to the char·· the buildings to be erected and hereon, or the place where the to be so erected and maintained the terms and conditions under ·e same may be so placed or op·hen, and in every such event on application to the board of railroad ·ioners by such railroad company, ·irm or corporation the said board of railroad commissioners shall have authority, and it is hereby made their duty, as speedily as possible after the filing of such application, to hear and determine such controversy, and make such order in reference thereto as shall be just and right between the parties under all the facts in the case, which order shall be enforced as other orders of said commission.

Sec. 2110-m. In the event that any elevator, warehouse, coal shed, ice house, buying station, flour mill or any other buildings used for receiving, storing or manufacturing any article of commerce transported or to be transported, situated on the right of way or other land of a railroad company shall be injured or destroyed by the negligence of any railroad company, or the servants or agents of any railroad company in the conduct of the business of such company, the railroad company so causing such injury or destruction shall be liable therefor to the same extent as if such elevator, warehouse, coal shed, ice house, buying station, flour mill, or any other building used for receiving, storing or manufacturing any article of commerce transported or to be transported was not situated on the right of way of other land of such railroad company, any provision in any lease or contract to the contrary notwithstanding.

The carrier for answer says:

(1) A minimum rental of $60 for elevator and $25 for coal shed site is reasonable. That the track facilities of complainant would now cost $500 and turn out $420 with annual maintenance charges of $40. That complainant is served with 200 feet of track not available for use by others.

(2) That if this Board has any jurisdiction in this matter, it is limited to whether any discrimination is exercised by the railroad company as between complainant and other parties similarly situated. That there is no power under the Iowa statute for this Board to pass on the question of rentals for elevator sites on private property of the carrier.

(3) That if by the terms of the statute, jurisdiction is given the Board of Railroad Commissioners to determine such rentals, the said statute is invalid and unconstitutional. (a) Being an illegal interference with the right of parties to make contracts affecting their private property. (b) A taking of private property without due compensation. (c) The taking of private property for alleged public use when in fact the use is purely private.

(4) That by the act of Congress of March, 1918, and the preceding acts relating to the taking over of the railroads by the United States Government and by proclamation of the President of the United States, this defendant is under the exclusive possession, control, use and operation of the Railroad Administration of the United States and the state of Iowa and its officers have no power to make the orders asked by complainant. By reason of all of which its asks the complaint be dismissed.

[The report then describes the situation at Stacyville with railroad grounds 400x1,200 feet, two tracks with coal sheds, elevator, oil tank, stock yard and team track for handling ice in loading season, all on one side of a track not connected to the main at the east end.]

The elevator in question was built about 16 years ago, has a capacity of about 25,000 bus.; been owned by complainant about ten years, handles from 150,000 to 250,000 bus. of grain and 30 cars of coal per annum. The rental for the years 1911, 1912, 1913 and 1914 was $7.20, for 1915, 1916 and 1917, $12 per annum; in 1918 the defendant demanded an annual rental of $85. The lease under which the complainant has been occupying the site in question describes only the land covered by the buildings, being less than one-fifth of an acre but in the use of the elevator and coal sheds the lessee and its patrons in common with others necessarily use the grounds between the south side of the elevators and coal sheds and the south line of the station grounds which is about 300 feet south of the team and industry track. It is perhaps fair to say that lessee has the use of one-half acre in its operations. The land nearest this is worth about $300 per acre and the highest rental value shown was $20 per acre. The Railroad Company and the elevator people heretofore appraised the station grounds at $400 per acre. No value of adjoining town lots is shown. The manager of complainant testified it would be willing to pay $20 rental per year. No showing whether or not the elevator received grain on storage nor of any discrimination as between shippers nor any showing that the site used by complainant interfered with other shippers.

LEGALITY OF THE COMMISSION.

[The first question taken up in the hearing of the above testimony was the question of the constitutionality of the Commission itself, and considerable of the report is covered by that topic. The Commission held that, "The Board is a commission, not a court, although some of the powers are of a quasi judicial character." [B Public Utilities Reports, 1918, 644; Re Southern Sierras Power Co., 2 Calf. Re Comrs. Rep. 647; B Public Utilities Reports, 1918, 357; *State of Missouri* vs. *Atkinson* et al., 204 S. W. 897-8.]

Under the statute creating this Iowa Commission, provision is made for an appeal which may be taken by the carrier from an order of this Commission, but no provision has been made for an appeal by any other person making complaint. If, therefore, this Commission should hold the statutes in question to be invalid and should be clearly mistaken, the complainant would be without the right of appeal.

Another reason why the Commission should not determine the validity of statutes is that it was not contemplated that the members of this Board should be learned in the law or constitutional lawyers but that they should be persons of administrative ability. This Commission has no power to render judgments or decrees, and its orders if not obeyed are to be enforced by action of the District Court. Certainly it was never intended that such a Commission should determine constitutional questions. We have reached the conclusion that it is not within the scope of the authority of this Commission to determine the validity or invalidity of an act of the legislature of this state. It is our duty to administer it until it is held invalid by a proper court. . . . .

EFFECT OF GOVERNMENTAL OPERATION.

As to the jurisdiction of this Commission of the matters involved in this case while the railroads are being operated and controlled by the Government, Section 15 of the Act of Congress of March 21, 1918, being the statute which provides for the operation of transportation systems while under Federal control, provides:

That nothing in this act shall be construed to amend, repeal, impair, or affect the existing laws or powers of the states in relation to taxation or the lawful police regulations of the several states, except wherein such laws, powers, or regulations may affect the transportation of troops, war materials, Government supplies, or the issue of stocks and bonds.

Under the provisions of this section, it was contended by nearly all of the regulatory bodies of the different states and by some of the courts that the rate fixing body of each state had reserved to it the right to regulate purely intrastate rates and to exercise police powers relative to the rule and practices which should prevail in matters properly coming before said commissions within the exercise of police power.

[However, this Commission with others conceded for the purposes of the War all rate making power to the Railroad Administration, but as to purely local matters, police regulations, etc., after a conference had at the Director General's request, the latter on Feb. 20, 1919, issued G. O. No. 58, in part as follows:]

In order to clarify the relationship between the United States Railroad Administration and the state railroad and public service commissions, all officers and employees of the United States Railroad Administration shall be governed by the policies and regulations herein set forth.

1. Transportation systems under Federal control continue subject to the lawful police regulations of the several states which were and are applicable to privately operated transportation systems, in such matters as spur tracks, railroad crossings, safety appliances, track connections, train service, the establishment, maintenance and sanitation of station facilities, the investigation of accidents, and all other matters of local service, safety and equipment. It will be the policy of the Director General to cause the orders of the state commissions in these matters to be carried out.

2. In all proceedings of the character specified in Paragraph 1 hereof, formal or informal, officers and employees of the United States Railroad Administration shall recognize the jurisdiction of the state commissions and shall assist them in developing the facts and in applying such remedy as may be necessary and shall fully co-operate with them.

Without setting out the whole of the order, it may be sufficient to say that the interpretation and construction then placed upon the act of March 21, 1918, by the Director General of Railroads required the railroad companies to submit all local matter to state commissions conformable to the state laws, but left the question of control over intrastate rates to be settled by the Supreme Court of the United States. This order is yet in effect, having never been modified or revoked. . . [See also *Nueces Valley Town Site* vs. *McAdoo*. 257 Fed. 143.]

It is not alleged in the answer, or shown in the proof, that the increased rental in this case is sought to be put into effect by the Railroad Administration. The files in this case indicate that the proposed increase in rental is only the plan or policy of the I. C. R. R. Co. Our conclusion is that jurisdiction of this Commission of the matter herein in controversy is not in conflict with any provision of the Act of Congress for railroad control.

ARGUMENT VS. TAKING PRIVATE PROPERTY.

The defendant denies our power to pass on the question of rentals for elevator sites, etc., on station grounds or railroad ways, and asserts that its railway grounds are private property and that it "is entitled to the highest return it can obtain for the use of this land in the market for the purpose for which it is fitted and to command any advantage that any private property would command."

Now, railroad property is in a certain sense private property; but the owner has devoted it to a public use, and it is impressed with limitations which must be recognized so long as it is used for transportation purposes; one of which limitations is that the owner shall make only reasonable charges for its use or service. For its carrier lands, when used to expedite or aid in carrier purposes, the carrier should be subject to the same principles of regulation as its charges for transporting freight or passengers.

Under the laws of Iowa, railroads are permitted to build spur or branch tracks from their lines across and to industries on other lands, but they are not required to do so. At the ordinary stations throughout this state, the building of such spur tracks to elevators off line would be an unnecessary expense. The result is that

THE RAILROAD HAS A COMPLETE MONOPOLY

of the only lands which can be economically used for elevator and other shipping purposes, lands which the railroad company was only permitted to acquire for its public use and which at almost every station is sufficient to accommodate every elevator and every other shipping interest and purpose to which such lands should be put. It is contemplated by our statutes and recognized by the railroads that they are permitted to acquire station grounds in addition to the right of way for the purpose of providing proper facilities for shippers as well as for passing, switch and storage tracks.

The case before us is perhaps a fair example of the fact that the station grounds are generally of sufficient size to accommodate the shipping public.

To recognize that the carrier may exercise its discretion as to the charges it would make for a site for shipping facilities and demand the hghest rentals it could obtain and to take advantage of its situation, would be to permit a public service corporation to use property devoted to a public use in an oppressive manner; and while we admit that this is seldom done, yet the wisdom of the legislature in attempting to regulate the use of such property is apparent.

A side track which is used as a team and industrial track is a necessary part of the station equipment. Upon such tracks the track shipper and track-receiver loads and unloads his freight and pays nothing for track maintenance or rental, the right to such use being included in the rate charged upon the commodity. The elevator or coal shed owner who has located upon the same track, who has capital invested in his loading and unloading facility, which is to the mutual advantage of the carrier and such owner, and who otherwise receives only the same use of the track as the track shipper, should not be required to pay for track maintenance. Such charge would certainly be discriminatory.

A country grain elevator, like that at Staceyville, located on station grounds, is a freight accumulating, storing and handling facility and is so recognized by the carriers. Indeed, the establishment of such facilities has been considered so necessary to the service of the railroads that it has been the practice of the roads, since the early history of railroading in this state, to solicit the building of such elevators on the stations grounds to enable the carrier to obtain the haul and provide proper loading facilities and thereby improve and expedite the service. So necessary have the railroads considered elevator owners that special rates upon the materials to be used in their construction have been made.

On account of which complaint was made to this Commission in 1882 by Spencer Bros., who shipped brick to build a store building. They complained that Johnson was given a lower rate. It was shown that Johnson's brick were used in the construction of an elevator. This Commission said: "The railroad company evidently considered an elevator different from a private building. * * * The local business of the railroad requires elevators. * * * It is customary for companies to give rates to public enterprises. * * * Both shippers are private individuals, but the use to which they applied the brick is different as regards their relations to the public. * * * Elevators are often built by public enterprise to assure general convenience, the railroad company hauling the material usually at reduced rates." [*Spencer Bros.* v. *C. B. & Q. Rd. Co.*, 182 Iowa Commrs. Rpts., 540.]

GRAIN ELEVATORS QUASI PUBLIC IN CHARACTER.

The service of an elevator is of a quasi public character. It is true that the elevator is largely a private business, but so far as it concerns the railroad it merely furnishes it with facilities for shipping. Filling the place and purpose as respects the commodity handled by the public freight houses at the stations. *U. S.* ex. rel *Northwestern Warehouse Co.* v. *Oregon R. & N. Co.*, 159 Fed. 975. Railroads have found it to be impractical to own and operate elevators and public policy forbade the transaction of such business by the carriers. *Munn* v. *Illinois*, 94 U. S. 113.

The fact that the state has not attempted to regulate the charges for handling grain does not take an elevator out of the class of utilities which may be regulated. It is the character of the business, regardless of legislation by the state, which impresses it with its public character and determines whether or not it is a public utility.

We have knowledge sufficient on which to base the conclusion that without the grain elevators, the carriers of this state and of the country at large would be utterly lacking in terminal facilities. For forty years and more it has been the policy of the railroads to develop the grain business and facilitate its movement by having these elevators built upon its station grounds; and so universal has this method become that it is difficult to conceive of any other manner of conducting the great traffic in grain in this country without the building of spur tracks to locations off the land of the carrier which if voluntarily done by the railroads would generally be an unnecessary expense both of construction and operation.

The system is a necessity both to the carrier and the public under the modern conditions of business and transportation. The practice has such a long history and been so universal that it would seem to constitute a substantial admission by the carriers that these elevators, coal sheds, etc., constitute a part of the station facilities.

The handling and transportation of grain constitutes a very important part of the business of the railways in this state and grain elevators are reasonably necessary, if not absolutely essential, to the feasible, prompt and economical handling, storing and transportation of grain by railroads. *Gurney* v. *Minneapolis Union Elev. Co.*, 63 Minn. 70. Elevators, corn cribs, etc., are permissible on station grounds in order to facilitate the business of the railway. *I. C. R. R.* v. *Wather*, 12 Ill. App. 582. And to the same effect see *Danville & Western Ry. Co.* v. *Laybrook* et al., 111 Va. 623. "An elevator is a means or instrumentality for loading and unloading grain into and out of cars." *Richmond* v. *Dubuque & Soiux City Rd. Co.*, 26 Ia. 191. And might have been built and used by the railroad company. *Anderson* v. *Interstate Mfg. Co.*, 152 Ia. 455.

STIPULATIONS OF THE LEASE.

The lease under which the site has been held in this case provides among other things that the site will be used only for an elevator and coal sheds and the tenant will build and put to use a good elevator and coal sheds of certain capacity and shall handle only such grain and coal as have, if brought by rail, been carried over the rails of lessor and without exception to leave said premises by rail over the I. C. R. R. Co. Lessee assumes all risk of loss, injury and damage by fire, even though through negligence of lessor's employes, and all such loss or damage which the lessor may suffer by fire to any car or contents on track, if fire originates on leased premises, attributable to occupance of lessee, provided not caused proximately by negligence of lessor; and agrees to indemnify the carrier from liability on account of loss or injury to the property or persons of the lessee, his agents, servants, employes, tenants, patrons, agent, employe or servants of such patrons attributable to the operation of the road connecting leased premises with main line or on any part of the leased premises. Lessor may terminate lease any time on sixty days' notice.

Some of the considerations moving to the railroad company are that it is relieved of the expense of buildings and maintaining an elevator, the hazards of fire and is indemnified against damages to the persons operating the elevator and as to their property and secures without cost the operation of an elevator.

Grain can be loaded on team track from wagons but it generally takes about two days to load a car. One like car is loaded through an elevator in three or four hours, making a great saving in car use. The country grain elevator affords storage and handling facilities as well as loading facilities at the times when the railroads are unable to furnish cars and move the grain as fast as it is offered. Even with these facilities, railroads are always, in the grain moving seasons, unable to move the traffic as fast as it is offered to them. Large amounts of grain are accumulated and thus held until there is sufficient equipment to move it; and thereby there comes to the railroad a more steady flow of business, which is greatly to its benefit. The carrier must at all times be in proper condition both to receive from the shipper and to deliver to the consignee according to the nature of the property to be transported as well as care for the necessities of the respective localities in which it is received and delivered. *Covington Stock Yard Co.* v. *Keith*, 139 U. S. 128. An elevator upon station grounds is a necessary station facility for the transportation of the great quantities of grain offered for transportation in this state. They form a link in the chain or process of transferring the grain from the local station to the markets of the world. It is essential to the public that the carriers have adequate facilities for speedy loading the movement of this traffic.

JUSTICE OF THE RENTAL.

The uncontradicted showing in this case is that in the early days of the elevator in this state "the rental charge for an elevator site was nominal," varying from $1 to $5 per year. Some years ago the Interstate Commerce Commission found that the railroads were leasing valuable lands to large grain handling corporations at only a nominal rental, which the Commission considered to be in the nature of rebate, and ruled that all leases of right-of-way and station grounds should be on such basis as to give a reasonable return on the value of the land so leased, after which the railroads made re-surveys and valuations of their station grounds, and fixed the rental charged at 5 or 6 per cent of the valuation of the site covered by the lease, making a minimum charge of $5.

In view of the history of the building up of the elevator business in this and many other of the grain producing states, it would be manifestly unfair for the carriers to be permitted, now that the people have invested large sums in the construction of elevators, etc., to exact such rental as the advantage of its position might enable it to command or that the owner of private property might command.

The defendant raised the rent for this site from a nominal sum to the sum of $7.20 in 1911, then to $12 in 1915, and in 1918 to $85, a raise of more than 700 per cent in three years. The Railroad Company attempts to justify this by reason of the adaptability of the site for the particular business, the grading, ties, rails and maintenance of the track; and that the owner of the elevator handles 250.000 bushels of grain per year, and claims that it has the 'right to have all these elements contributing to rental value taken into consideration the same as any private individual would have." In this it is certainly mistaken. As we have said above, the carrier was permitted to acquire this property only for transportation purposes and it has devoted it to the use of the public for carrier purposes.

Certainly the necessity of the sidetrack at Staceyville upon which this elevator stands cannot be attributed to this elevator. The uncontradicted showing is that it is the general purpose track used by the railroad in the conduct of its business; that it could not operate without it and the public uses the track at times along this site as a team track loading and unloading from the side of the track opposite the elevator.

Having in mind the history of the country station elevator, the necessity of such station facility, that the railroad is relieved of the investment and expense of maintenance and operation of the elevator and by the terms of the lease is relieved of practically all the hazards of the business, and that the elevator people are given a lease of such uncertain tenure and such drastic terms, we are inclined to think that such a lease is of little if of any more value than a mere nominal rental. However, we must also have in mind the ruling of the Interstate Commerce Commission as above stated.

What, then, is the fair rental value of this site and what should be taken into consideration in arriving at such rental?

Rates for the railroad are based upon the value of the service, and this is based upon the value and character of the property transported and the e[q]ment used; the cost of operation maintenance; and in general the in[v]ment of the carrier for such pur[p]including its right of way and st[a]grounds and facilities. If the rat[e] arrived at is sufficient to meet th[e] come to which the carrier is reason[a]entitled, then an additional rental[f]station grounds would be unreason[a]"The American railroad rate has al[w]been recognized as covering the u service which the carrier gives in [f]nishing the car, a proper place to [l]it and the conveyance of the loaded[c]and the use of its terminal at both [e]of the line." *Associated Jobbers of Angeles* v. *A., T. & S. F. R. R.*, 18 C. 310-14. See same case, 234 U. S.

The rate fixed takes into consi[d]tion all of the property used by the [c]rier, including the station grounds, t[r]tracks, industry tracks, all station f[a]ities, as well as the use of the main When the carrier has in its rate[s]ceived a fair return for the use of [t]station ground, it is in our judgm[e]not entitled to receive an additi[o]compensation by way of rental for [t]elevator site, the lessee of which [h]abled the carrier to perform its ser[v]with a shorter term of use of its eq[u]ment and improved its service.

If these things be true, then the re[a]value of the site can be no more [t]the rental value on like land in [a]vicinity, either as town lots or f[a]lands, and stripped of its characte[r]railroad land and facilities as s[u]There is no formula for ascertaining [t]fair value of property used for the [c]venience of the public, but there mus[t]a reasonable judgment, having its b[a]in a proper consideration of all rele[v]facts. The railroad company can l[a]no ground of complaint if allowe[d]value equal to the fair average ma[r]value of similar land in the vici[n]This is the reasoning in the Minne[s]Rate Case, 230 U. S. 352, wherein [t]value of the property of the railr[o]was sought to be shown for the pur[p]of determining the reasonablenes[s]rates and this is the rule of the I[n]state Commerce Commission in the [v]uation of the railroads of the Un[i]States. See *Texas Midland R. R.*, F[o]Valuation Rpt., I. C. C. 1.

There was no showing of the valu[e]rental value of any town lots in [t]near vicinty: "three acres north of [t]depot sold for $300 an acre." Be[t]this controversy arose the railroad [c]ple and the owners of the elevator [p]praised the station ground lands at [$]per acre. Accepting this appraisal [a]the value of the land and the amo[u]occupied and used by the complain[a]as one-half of an acre, we have a l[o]of $200 upon which to fix a fair ret[u]Land seldom pays a net cash renta[l]more than 6 per cent of the ma[r]value, which would make a rental o[f]$12 per year. Remembering that [t]owner received a return on this s[u]land in its rates, this certainly is s[u]cient.

In the foregoing ruling we have [c]fined our remarks almost wholly to [t]matter of the elevator. The history [o]coal sheds on station grounds is alm[o]if not quite the same in point of [f]with the elevator; and while they [d]not accumulate traffic, they are v[e]valuable as an unloading facility, [s]ing a great deal of time in unloadi[n]and thus returning the car to act[i]earning use. The owner of the [c]shed unloads and handles his coal m[o]economically than the dealer whose y[a]is not on a track; therefore he can [o]frequently does purchase and store [c]at the seasons of the year when it [i]to the advantage of the carrier to h[a]the tonnage. In principle and practi[c]they are much like the elevator. T[h]differ most in degree.

As to the other terms of the lease, th[e]was but little complaint in this [c]During a long period of years subst[a]tially the same conditions have b[e]incorporated in the leases and less[e]have been willing to accept them [i]build up their business under su[c]terms. These matters among ot[h]things have been considered above [i]

ring at the value of the lease. For
es reasons we will not, at this time,
te ere with such other terms, except
g that Section 2120-m makes the
ro ions of this lease as to damages
su ing from negligence of the carrier
va l.

It s therefore ordered that the Illi-
is Central Railroad may charge as a
nt for the site of the Staceyville
ra & Coal Co. now occupied and used
not to exceed twelve dollars
12)) per annum and that a lease not
at ally different from its old lease
al be executed or the present lease
te ed therefore.

ERCHANTS' ELEVATOR—DAVENPORT.

Th business of merchandising grain,
ic has become such a science in this
ur y, is exact and particular; with
phazard methods permissible. It
ke up-to-date machinery equipment,
th adequate grain storage and clean,
ic workhouse facilities to do the
ght.

Th briefly outlines the work that is
t it for the enterprising handlers
g in who expect to compete with
ne on to the same tricks and using
e act program followed by the Mer-
ar Elevator Co., Davenport, Ia., in
e liminary planning of the construc-
n id the present announcement that
ei enlarged plant is now completed.
Th illustration shows both the old
d ew houses with a total storage of
0,0 bushels, a model plant erected
t Burrell Engineering & Construc-
n o. of Chicago, a firm which has
of d through years of experiences
d as been particularly fortunate re-
nt in handling some of the big jobs
th country. Their good points were
co orated in the actual concrete stor-
e ected for the Davenport business
tl Merchants' Elevator Co.

rary, and H. J. Hall, assistant sec-
ar, is the official roster, but the live
str directly in charge of the Dav-
po business and through whose
or the present property was ac-
ir and completed is W. H. Holliday.
justifiably proud of the new
an and in telling his friends and
d about it speils as follows:

Th enlarged Merchants' Terminal
ev or of Davenport, Iowa, is ar-
ranged so that grain can be received either in the new or the old elevator for storage in either or in both. It is also arranged so that grain can be transferred from the new storage to the old by special spouting system. The capacity of the new legs is 7,000 bushels per hour. The house has a double receiving track with capacious hoppers and a tunnel and belt conveyor installed in the new annex. One of the most interesting features in connection with the storage that has not been in very general use is a sprinkler system throughout. This work was handled by the Equipment Investment Co. of Chicago, through a plan meeting with the trade's approval, covering the full financing and equipping of elevators and mills with either a wet or dry sprinkler system, a most important step in advance of present day construction. It affords added protection to both the old and the new house. A 25,000-gallon concrete tank erected on the top as shown in the photograph provides the necessary force for the sprinklers. A modern man-lift, receiving, conditioning, storing and shipping machines and equipment completes one of the best interior terminal elevators in the country.

TELEGRAPH CO.'S LIABILITY.

The Supreme Court of Illinois in a case entitled *Bowman & Co., plaintiff*, vs. *Postal Telegraph Co., defendant*, on Oct. 27 rendered a decision in which it was ruled, in substance, that the small type stipulations on the back of telegraph company message blanks, which refer to the company's liability for an unrepeated message, are without effect and void.

The case at bar was one to collect $360, being the difference in the value of 12,000 dozens of eggs offered by telegraph at 23c, the Columbus telegram when delivered reading only 20c, on which basis there was an acceptance of the offer. The Bowman Co. brought suit at Chicago; and the trial court entered judgment cancelling the charge of 63c for the message, but holding that that amount was the full extent of the Postal Company's liability under the terms and conditions under which it received the message. The Bowman Company thereupon appealed to the Appellate Court, by which court the ruling of the trial court was sustained. An appeal was thereupon taken to the Supreme Court of the state, by which court the lower judgments were reversed and a judgment entered against the Telegraph Company in favor of Bowman & Co. for the full amount sued for with costs.

The Illinois Court thus sets aside the ruling of the United States Supreme Court in *Primrose* vs. *Western Union Telegraph Co.*, 154 U. S. 25, which holds, in a few words, that since the communication wires came under the control as to rates and management of the Interstate Commerce Commission that body has the power to fix the terms of the contract under which telegrams are received and sent. In other words, the Court held that if a telegraph company cannot charge more for an unrepeated message than is set forth in its schedule, neither can the patron of the company, as a sender of a telegram, obtain greater protection nor impose greater liability on the company than that which the sender has specifically agreed to abide by when the message is sent.

The entire force of the Illinois decision is measured by a view of the effect on the Commerce Commission's power to fix the basis of the contract under which messages are now sent, under the Act of 1910 giving the Commerce Commission regulation control over the communication wires. As to this point the Illinois Court says:

> Defendant contends that its liability in this case is controlled by the Interstate Commerce Act and the Federal law, to the exclusion of the state law, by reason of the fact that by the amendment of June 18, 1910, to the Interstate Commerce Act the provisions of that act were made to apply to telegraph companies and their contracts for the transmission of interstate messages. The holdings of the state courts of this Union are in hopeless conflict on this point and we make no effort to harmonize the decisions. The United States Supreme Court has not passed on the question since the amendment of 1910 became effective, so its decisions are not necessarily conclusive here. [Apparently the case of Primrose vs. W. U. Tel. Co., supra, was not called to the court's attention.]
>
> Interstate common carriers of messages are now in the same situation that interstate common carriers of goods were after the passage of the interstate commerce act and prior to the Carmack amendment. Before this amendment, the Interstate Commerce Act did not take over from the states the field of liability for negligence of interstate carriers of goods. Prior to 1910 Congress had passed no regulatory statutes concerning telegraph companies. In that year it amended Section 1 of the Interstate Commerce Act so that, so far as it refers to telegraph companies, it reads as follows: "The provisions of this act shall apply to telegraph, telephone and cable companies engaged in sending messages from one state, territory or district of the United States to any other state, territory or district of the United States, or to any foreign country, who shall be considered and held to be common carriers within the meaning and purpose of this act."

The rest of the decision relating to the equity of relieving the telegraph companies of liability as stipulated on the back of the message blank and that as being against public interest, etc., is quite indisputable; but unless the U. S. Supreme Court reverses the ruling in the Primrose case, the equity is not the law of the case.

OCTOBER EXPORTS.

The following statement of exports of domestic breadstuffs, cottonseed oil, meat and dairy products, cotton and mineral oils from the United States was on Nov. 25 completed by the Bureau of Foreign and Domestic Commerce, Department of Agriculture (000 omitted):

	October.		10 months ended October.	
	1919.	1918.	1919.	1918
Exports by groups.

WHEAT EMBARGO LIFTED.

Wheat Director Barnes on Nov. 25 announced that effective on the 15th inst. the export and import embargoes on wheat and wheat flour will be eliminated. Discussing the lifting of the embargo, Mr. Barnes said:

"This is one step in the necessary reconstruction of trade facilities broken by the war, which must function when the Grain Corporation terminates its three years' work. While ocean transport conditions and also disorganized international finance will probably prevent free trading between merchants of the various countries for some time, it is expected that, step by step, international trade may be reknit in the usual channels. Until this is fully accomplished, the Grain Corporation will continue to sell from its stocks of wheat and wheat flour the foreign trade that is not supplied under private business initiative.

"This release of embargo also permits Canadian wheat and wheat flour to enter American markets free of duty under rulings of the customs service. It is expected that this will greatly enlarge the United States' supply of spring wheat flours which are favorites in the baking trade and which, because of the partial crop failure in the Northwest this year, have been relatively in light supply."

He stated also that the sales of the Corporation from its accumulated stocks, largely in Western markets to American mills, under its advertised offer have amounted to about 30,000,000 bushels, and that in his opinion, the mills in all sections are now amply supplied with wheat, though some particular qualities of wheat are relatively in light supply.

MERCHANTS ELEVATOR CO.'S PLANT, DAVENPORT, IA.

BUYING GRAIN ON GRADES

Criticism of the Way in Which Many Country Grain Buyers Deal With Farmers When Buying Grain

By ROLLIN E. SMITH,
Grain Supervisor, Bureau of Markets.
Office at Chicago.

It is asserted by critics of the Federal grades for wheat that the grades can not be applied by country buyers, because of the lack of time. But that is not the real reason, in most instances, where grain is bought of the farmer on some basis other than the Federal grades.

The attention of the Bureau of Markets has been called to many instances where country elevator managers make no attempt to apply the Federal grades. A well-known Southwestern grain dealer who recently completed a tour of country stations has advised the Bureau of Markets of the conditions that he encountered. He said:

"Not only is there a lack of knowledge of the Federal grades among country dealers, but the most primitive methods are used by many in buying grain. Buyers rely almost wholly on the weight-per-bushel test. Yet some were using testers that had the teams fastened to the rings by wire or a bent nail. Furthermore, the weight was taken on the wheat without removing the dockage. Buyers are afraid to assess dockage against the farmers. They attempt to buy wheat with the dockage in at a reduced price."

The points brought out, which are charged to country grain buyers—(there are exceptions, of course) are:

(1) Lack of knowledge of the Federal grades; (2) only one test for wheat is made and that for the weight per bushel; (3) testers are often in such poor condition that an accurate test can not be made, and furthermore correct methods of filling the kettle are not followed; (4) weight per bushel test made on dirty wheat, that is, wheat from which the dockage has not been removed; and (5) buyers are afraid to assess dockage against farmers, but try to buy cheaply enough to offset the dockage.

Such conditions should not exist. For example, no man who buys grain from farmers should be ignorant of the Federal grades for wheat, shelled corn, and oats. Any grain buyer can easily familiarize himself with the few primary features of the grades. Every farmer has a right to demand, if he wishes to do so, that his wheat, shelled corn and oats, when he sells them, be graded and the price made accordingly, on a basis of the Federal grades.

This touches upon the fifth point in the above quotations, namely, "buyers are afraid to assess dockage against farmers but try to buy cheaply enough to offset the dockage." Thus the farmer, in effect, forces the buyer to ignore a correct and accurate method of arriving at the price basis but makes nothing by it.

Some line elevator companies complain that they lose on grade on the wheat bought in the country by their elevator managers. The wheat is graded lower, as a rule, at the terminal market than the grades given to the farmers by the companies' buyers. The companies do not tell the whole of the story, however. For not only are many buyers "afraid to assess dockage against the farmers," but they are also "afraid" to buy on grade, even when they are familiar with the grades. The farmer, as a rule, wants No. 1 grade for his wheat; or, if it is obviously not No. 1, he wants No. 2. So the buyer gives him his grade but offsets the grade by paying a little lower price than No. 1 or No. 2, or by not allowing full weight; or, in states where dockage is charged, one or two pounds a bushel is discounted for dockage. The farmer is pleased, for he got the grade he wanted, and the buyer holds his customer. If the buyer is buying and shipping on his own account, the incident is closed when the farmer is paid; but if the buyer is an agent for others, the incident is the beginning of trouble and dissatisfaction. Much of the wheat bought from the farmer as No. 1 does not grade No. 1 at the terminal market to which it is shipped because it wasn't No. 1 when bought and the buyer knew it; and he didn't pay for No. 1. But when the buyer is the agent for a line elevator company or a farmers' elevator company, the company is dissatisfied because it "loses on grade"; dissatisfied because the licensed inspectors at the terminal do not give the same grade as their agent gave to the farmer.

It is a mistaken policy on the part of the farmer to insist that his wheat shall be graded No. 1 when the grain is not entitled to that grade. The buyer who overgrades in order to please his customers and then underweighs or assesses more dockage than is justified is equally unfair both to the farmer and to the company for whom he is buying.

Reports from the different grain states, however, are to the effect that here and there country grain buyers are buying wheat from the farmers by Federal grades. Such buyers are holding their customers and the farmers, when they understand that the elevator manager is buying strictly by Federal grade, seem better satisfied than to have a buyer make a price without any definite standard as a basis.

It is, of course, impossible for a buyer to apply many tests to every load of wheat hauled to his elevator, nor is this necessary. An elevator has a limited number of customers and the buyer usually knows every farmer personally. Furthermore, he knows the quality and condition of his grain after a load or two has been marketed. The buyer may easily make the necessary tests on a sample from the first load and keep the sample as a type sample of that farmer's wheat or corn or oats for the remainder of the season. It is not unusual, in some localities, for a farmer to bring a sample of his wheat to the buyer soon after thrashing and offer to sell his crop on the basis of a price made on the sample, with the understanding that the wheat when hauled shall be equal to the sample. This gives the buyer plenty of time to apply all tests necessary to establish the correct grade of the grain.

Buying by Federal grade in the country seems largely a matter of inclination on the part of the buyer, except when the buyers are not familiar with the grades. When the Federal grades are not applied, it is not because of lack of time nor for any other logical reason. One point should be borne in mind in this connection: that is, it is not necessary for the country buyer to test every load of wheat, corn or oats that is offered at his elevator. As a rule, he knows every farmer in his locality. A test of the first load or two of a farmer's crop will, under normal conditions, give a fairly correct idea of the quality and condition of that farmer's grain. Every load hauled will, of course, be closely examined. If there is any material difference between later loads and the first two or three, the buyer will at once detect it. A country buyer should know every customer's grain at the beginning of every crop season just as well as he knows every team, and he can tell his customer's horses as far as he can see them.

COMING CONVENTIONS.

Jan. 13, 14, 15, 16.—Farmer Grain Dealers' Ass'n of South Dakota, at Aberdeen.

Feb. 10, 11, 12.—Farmers' Grain Dealers' Ass'n of Illinois, at Peoria.

June 22-24.—American Seed Trade Ass'n, Milwaukee, Wis.

Officers Elected.

Officers elected at Omaha of the Nebraska State Farmers' Co-operative Grain and Livestock Ass'n were J. C. Canady of Minden, president for his seventeenth term; E. P. Hubbard of Juanita, vice-president; John W. Shorthill, secretary. New directors for the year are Eric Johnson of Hastings and J. R. Morrison of Chappell.

FROM SHANTUNG, CHINA

Immense Population of the Famous Peninsula—How Agriculture Is Carried On—Some of the Principal Products.

By WILLIAM BOOTH.

CHEFOO, NORTH CHINA.—[Special correspondence.]—Next to Belgium, Shantung is the most densely populated place in the world. Its thirty-eight and odd million people result in a density of 683 men, women and children to the square mile. But, unlike Belgium, Shantung's mining and manufacturing industries have not yet become developed, so that the population is dependent very largely upon the land for a livelihood. Needless to say, farming and gardening are along intense lines.

In the main, agriculture is devoted to the producing of food supplies. Little if any cotton, hemp, etc., are grown. At the present time, probably no opium is cultivated. However, within the last few years, along the Shantung Railway, in the neighborhood of Weihsien, large tracts, I understand, are being planted to tobacco under the direction of the British-American Tobacco Co.

PRINCIPAL PRODUCTS.

The principal grains grown are wheat, millet corn, a kind of broom-corn called kao-liang, and the oil bean, if such may be considered grain. Perhaps half of the land each year produces two crops. If a field is allowed to rest during the winter, kao-liang and millet are planted in the spring. If not, winter wheat or winter peas are planted in the fall and harvested in May or June, after which corn and beans, generally planted together, or sweet potatoes, are put in.

The climate of Shantung is somewhat like that of Virginia; and this is shown by the similarity of crops. Chinese tobacco has been grown for hundreds of years and the same is true of native peanuts. About sixty years ago, Rev. Charles R. Mills introduced the cultivation of western peanuts, which are several times as large as Chinese peanuts, and today in all the less fertile, sandy districts big crops of western peanuts are produced.

INFLUENCES AFFECTING AGRICULTURE.

Agriculture is governed very much by the wet and dry seasons. July and August, and sometimes September, are the rainy months, and outside of these months there are very few extended rain spells. May and June are the driest months of the year. In the autumn there are occasional rainfalls and in the winter moderate snowfalls. As soon as the spring crops are harvested the fields are prepared so that with the first shower the second crop may be put in. Kao-liang, which is planted in the spring, is a very sturdy grain, living through the driest weather, and thriving in the rainy season, suffering little harm from the heavy rains, unless they continue too late into the fall.

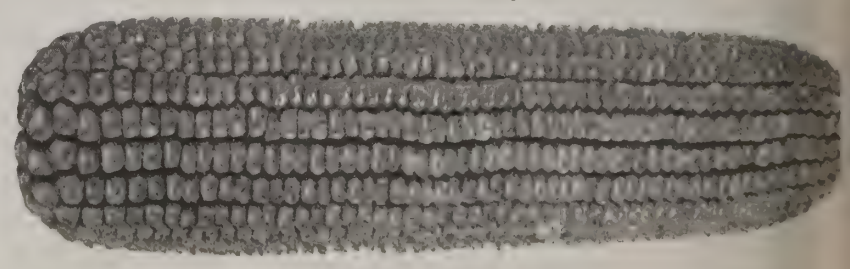
The winter wheat flourishes from the moisture received from the snowfalls and the occasional spring rains, and unless it is too dry it ripens beautifully and yields a bountiful harvest in the dry months of May or June. Corn, of course, prospers in the rainy season, if it is not overwhelmingly wet.

SIZE OF SHANTUNG FARMS.

The average farm is about twenty mu of land. It takes six mu to make an acre, so that three or four acres make a fair farm in Shantung. If a man has more land than that, he generally rents it out. The size of a farm is determined by the amount of land which the average family can handle to advantage. As farming is still done in a very prim way, as far as handling the lan crops is concerned, the employme too many animals or too much help renders larger farms unprof Further, the amount of fertiliz one's disposal is bound to limi amount of land cultivated by an family.

THE DEMAND FOR FERTILIZER.

Perhaps nothing is so importa all China as fertilizer and no p are more resourceful than the Ch in procuring it. Commercial ferti has of course not become a large with the Chinese farmer; and as usually a man of small means, he depend almost entirely upon wh can secure from his own closets barns or from the highways. In winter, the farmer, having little e do, spends most of his time on the lic roads with a basket and a small gathering up every chance dro that he can find. If a traveler ha to be near a village (and all the ers live in small hamlets and villa when his horse or mule, or possibl donkey, lets fall a dropping, thes sourceful fertilizer gatherers, boys and grown men, will all scra to see who can get it, as street ur in America scramble for a chance per let fall on the sidewalk near t Every possible bit of manure, hum animal, is diligently gathered da day the year round, mixed with soi formed into the sun dried cake stored in pits ready for use at proper time.



Harvest time in Shantung, a America, is a very important time in the days of Naomi and Ruth, s day in China, men, women and dren all take a hand; and the w gleaners are present as well. In ea Shantung, the grain is all pulle by the roots, bound into bundles, carried to the threshing floor, whe is dealt with just as it was in the of old.

Corn Market Outlook.

Our corn market is feeling the e of light receipts and no stocks, w together with the apparently hop coal strike situation and the Me situation, is giving the bulls more age, while the bears are covering short corn freely. The prospect o creased receipts is some better, as t seem to be a few more cars, and farmer is ready to sell his surplus and particularly in Iowa the pros are for a large movement if the roads can haul it. So it is large case of cars and coal, with no im diate prospect of the situation bein lieved, so for the present we must pect a nervous market with wide tuations.—*W. H. Perrine & Co., Chic*

WILL THE STRAIN WIN?

Fred C. Palin, Newton, Ind., who the Kellogg prize for the best ea corn during the 1909 season, which $1,000. Although a renter (at l until recently, if not now) he is a cessful farmer, an investigator everything combined that a succes farmer should be. As an expert bre of corn he brought this ear of c shown in the picture, down to date, proved and enlarged from 1909, and hibited it with 270 others at the In national Show at Chicago, now draw to its close. The question was, at of this writing, winners then not ing been announced, will the strain f the 1909 prize bring down the m this year as it did then?

INDIANA PRIZE EAR.

AR DEMURRAGE RULES

Car Demurrage Rules by the Rail-Administration as Embodied in I. C. C. No. 4 Universally Applicable.

Transportation Department of icago Board of Trade says: "The ing demurrage rule has been pub- to become effective Dec. 1, 1919, ain, seeds, grain screenings and creenings:

all grain held in transit, sub- Federal or State inspection, and ds (field or grass, grain screen- r seed screenings, held in transit, to recognized official inspection, me for disposition will expire at . of the day that inspection is ed by the inspection authorities before 11 a. m. No additional me will be allowed for reinspec- r appeal. The bulletin form of may be used in lieu of written of arrival to the consignee.'

ached hereto is copy of the in- ons issued by the terminal man- re giving the details of the oper- f the new rule.

ase note that prior and subse- to the time that the representa- f the carriers are on the exchange disposition orders may be filed nd bills of lading receipted for by esentative of the carriers con- with the Transit Department, n Freight Inspection Bureau, now ted in Room 14 Board of Trade g. While the time for filing dispo- orders free from demurrage runs m. of the day that inspection is rd by 11 a. m., the trade is urged inue the present practice of giv- ders by 2 p. m. to the greatest possible. It is readily appre- that orders not in the hands of d men by at least 4:30 p. m. can- acted upon the same day, result- the cars not being switched out yards until the following day. a very important matter, both per and carrier, in the interest erving the use of equipment and as many car days as possible, lly at this time of extreme car e.

to seeds, grain screenings and reenings, where sampled by the of Trade Sampling Department, time for disposition will expire m. of the day that samples are d by the Board of Trade Sam- epartment on or before 11 a. m. ry important, therefore, that the o-operate with the Board of Sampling Department in giving partment prompt advice of ship- these commodities.

Bulletin 493 (published herein k on p. 11 (1243), sets forth the consignment Rule effective on or Dec. 1, 1919. Under such rule s a reconsignment charge of $2 in addition to any demurrage where disposition order is given ent to the expiration of the free der the demurrage rule."

s Governing Grain Inspection Subsequent to Nov. 30th.

new demurrage rule governing ne for the disposition of grain, ld for Federal, state or official on, effective Monday, Dec. 1, eads as follows:

2. FREE TIME ALLOWED (Ex- .—

Chicago, Illinois, and Kansas an.-Mo. On all grain held in subject to Federal or state in- , and on seeds (field or grass), creenings or seed screenings, transit, subject to recognized of- spection, free time for disposi- l expire at 6:00 p. m. of the day spection is reported by the in- authorities on or before 11:00 No additional free time will be for reinspection or appeal. The form of notice may be used in written notice of arrival to the ee.'

he free time for furnishing dis- under the new grain inspection ires at 6:00 p. m. of the date on is reported on or before 11:00 a. m., it has been deemed advisable in order to promote coöperation and effect the prompt handling of disposition orders filed by consignees, to establish a central office in the Board of Trade building where consignees may lodge orders and surrender bills of lading for which a proper receipt will be given up to 6:00 p. m. This will be accomplished by designating the Board of Trade Agency as representative of all lines to accept and act upon disposition orders filed there. Agents who are now sending representatives to the Board of Trade to pick up orders filed prior to 2:00 p. m. may continue that practice.

"To promote car efficiency, also uniformity in the handling of grain, there has been adopted for this district a combination grain bulletin notice and car card. This combination bulletin notice and car cards (sample attached) is put up in sets consisting of the following:

"(1) A white copy to be delivered to consignee with the grain sample by the State Grain Inspection Department, after sample has been graded.

"(2) A pink copy for use of agent only, as a record from which demurrage free time will be computed.

"(3) A yellow copy for use of the State Grain Inspection Department as a permanent record.

"(4) A car card, distinctive in appearance and entirely different from any other card in use. It first serves as notice to yardmen and grain samplers that the car so carded is a car of grain held for sampling. The end portion of the card is perforated and is to be removed by the grain sampler after sample has been drawn, the removal changing the card so that it is distinguishable from its original appearance, and in its changed form serves as notice to yard men and others concerned that the car has been sampled and is now being held for disposition. The back of the removed portion of the card is to be used by the sampler for making memorandum of car initial, number, name of consignee, contents, and the number of the seals broken.

"This office (district manager U. S. R. administration) will furnish an initial supply for approximately thirty days' use and it is desired that each road furnish their own future supplies.

"Attention is called to the importance in the issuance of bulletin notices of showing all the information called for by the form, especial attention being drawn to the necessity of showing the hour as well as the date such bulletin notices are issued. The bulletin notices may be numbered. The lower portion of the white copy of the bulletin notice below the heavy black line headed 'For use of State Grain Inspection Department' is for their sole use.

"All three copies of the bulletin notice must be delivered by the yard office to the sampler, who will indicate in space headed 'Sampler receipt stamp here' the date and hour bulletin notices are received by him.

INSPECTION OF GRAIN AT STATE GRAIN INSPECTION HEADQUARTERS.

"Where grain is inspected at the main office of the State Grain Inspection Department all three copies of the bulletion notice will be placed by the grain sampler in the bag with the sample and when grade is given the date of inspection and whether before 11:00 a. m. or after 11:00 a. m. will be stamped on all three copies in the space headed 'Grain Inspector's Stamp here.' The consignee's copy will then accompany the grain sample to the Board of Trade, the agent's copy will be retained in the Grain Inspection Office to be later gathered up by the carrier's representatives, and the State Grain Inspection Department's copy will be retained on file as a permanent record.

INSPECTION OF GRAIN AT OUTER YARDS.

"Where grain is given in one of the outer inspection offices, the samplers will handle the bulletin notices in like manner; but the grain inspectors, in addition to placing the consignee's copy in the bag with the sample, will place the agent's copy and the State Grain Inspection Department's copy in packages in the baskets containing the inspected samples, also a list made up in triplicate which will show date, name of inspector and number and initial of the cars represented by the samples in the basket. If such samples reach the floor of the Board of Trade before 11:00 a. m., demurrage free time will be computed from the inspection stamp date shown on each of the bulletin notices.

"However, if such samples do not reach the Board of Trade until after 11:00 a. m. then a representative of the carriers stationed on the floor of the Board of Trade will stamp each of the sheets showing inspection reported after 11:00 a. m., the copy of such sheet to be retained by the carrier's representative, the second copy to be sent to Mr. J. S. Brown of the Chicago Board of Trade (and similar officer at Kansas City), representing the consignees, and the third copy to be given to the State Grain Inspection Department for a permanent file. Where the sheets are so stamped, the State Grain Inspection Department's representative will at once re-stamp the agent's and State Grain Inspection Department's copies of the bulletin notices and the free time for disposition will be computed according to the corrected stamped date. The delivery of the samples to the consignees will not be delayed for the purpose of re-stamping the consignee's bulletin notice.

"The Joint Railroad Office will collect agent's copies of bulletin notices from Grain Inspection Department and arrangements should be made by agents to have a messenger call at that office at stated times for the purpose of picking up such bulletin notices, also any disposition orders, bills of lading, etc., taken up by him.

"It is understood that the procedure outlined with respect to grain inspected by the State Grain Inspection Department will apply also to seeds and screenings (grain or seeds) sampled by the Board of Trade Sampling Department.

STATION DEMURRAGE RECORDS ON GRAIN.

"With the inauguration of the new grain inspection rule effective Dec. 1st, it is essential that an accurate record of the handling of cars loaded with grain, be maintained, this record to give a complete history of each car of grain from the time of its arrival until its final forwarding.

"The importance of keeping this record cannot be too strongly urged so that you can readily determine whether cars are being unnecessarily delayed and if so where such delay is occurring and apply the necessary remedy."

J. H. BRINKERHOFF.

General Rules.

The new car demurrage rules of the Railroad Administration are embodied in Tariff I. C. C. No. 4, containing charges applicable under Federal-controlled and non-Federal roads, becoming effective Dec. 1. This tariff, making numerous changes in the rules now effective, contains the important new provisions. The section imposing additional penalties for detention and equipment, which applies only in connection with lines under Federal control, provides as follows:

1. On refrigerator cars, $10 per day after 5 days.

2. On cars loaded with lumber held for consignment, $10 per car after 48 hours.

3. These charges will be assessed regardless of whether cars are held on railroad hold tracks or delivery tracks, including consignee's or other private holdings, and will be in addition to any existing demurrage and storage charges. While no change is made in the free time allowance for loading or unloading, the new tariff contains the following explanations: "Loading" includes the furnishing of forwarding directions on outbound cars.

"Unloading" includes (a) surrender of bill of lading on shipments billed "to order"; (b) payment of lawful freight charges when required prior to delivery of the car; (c) furnishing a "turnover order" (an order for delivery to another party) after car has been placed for delivery and no additional movement of the car is made.

"When the same car is both unloaded and reloaded," says the tariff, "each transaction will be treated as independent of the other. This will also apply to industries performing their own switching service, in which case the industry must notify the carrier date and time car was unloaded.

"When the address of a consignee does not appear on billing, and is not known, the notice of arrival must be deposited in the United States mail, enclosed in a standard envelope bearing return address, same to be preserved on file if returned. An impression copy shall be retained, and when notice is sent or given on a postal card the impression shall be of both sides.

"When the owner requests that original point of shipment be omitted on reconsigned cars, this information shall not be shown on notice of arrival at destination.

"When carload freight is refused at destination, notice of such refusal shall within 24 hours thereafter, be sent by wire to consignor, when known, to agent at point of shipment, who shall be required promptly to notify the shipper if known.

"When unclaimed perishable carload freight has not been disposed of within two days from the first 7 A. M. after the day on which notice of arrival has been sent or given to consignee, notice to that effect shall be sent by wire.

"When other carload freight is unclaimed within five days from the first 7 A. M. after the day on which notice of arrival has been sent or given to the consignee, a notice to that effect shall be sent by wire."

In the event consignee or party entitled to receive shipment serves notice upon the delivering carrier of refusal to accept delivery at the point named in the notice sent or given, the car will be held awaiting opportunity to deliver on the specially designated track.

"Private cars which have been loaded on the tracks of their owners, received from such tracks and held by the carrier for forwarding directions, are subject to demurrage charges from the first 7 A. M. after they are received until proper forwarding directions are furnished, with no free time allowance and without notice.

"When the consignee makes request in writing for the name of the consignor, point of shipment and (or), if transferred in transit, the initials and number of the original car, to enable him to identify the shipment in a car placed or tendered for delivery on other than public delivery track, such information will be furnished; but consignee shall not be entitled to additional free time unless such request has been served on the carrier's agent within the prescribed free time, in which event the time between the receipt of the request and the compliance therewith will not be computed against the consignee."

Exports of Corn.

The exports of corn from principal United States ports, as reported by the Chief of Bureau of Statistics of the Department of Commerce, for each month, for four years:

Mos.	1919.	1918.	1917.	1916.
Jan.	1,177,297	1,952,528	7,253,348	3,498,443
Feb.	975,830	3,203,459	6,596,680	5,150,945
Mar.	683,064	7,658,166	10,333,771	4,837,452
April	698,665	8,644,588	6,462,802	5,106,518

Market Uncertainties.

No one knows what this market will do. This coal strike and the general business of the country is certainly in a chaotic condition. Unless the shorts in December corn can get under cover, they may force the cash considerably higher.—*Elmore-Schultz Grain Co., St. Louis.*

The Letter Box

Will Build.

Price Current-Grain Reporter: We expect to build a new elevator at Cooks, Ohio, early next spring and will soon purchase some belting, elevator supplies, cleaners, etc., for its equipment.—*C. H. Clark Grain Co., per C. H. Clark, Mt. Sterling, Ohio.*

Will Build This Winter.

Price Current-Grain Reporter: I expect to build a new elevator this winter and will make some repairs in the three-story building in which I am now installing some machinery. I will want a lot of elevator equipment.—*Geo. W. Parker, Kingsley, Mich.*

Closed Out Seed Department.

Price Current-Grain Reporter: We have closed out our seed department as a separate department of our business and have no manager in charge of this branch as formerly, and confine ourselves to only a very few items in the seed line.—*Rumble & Wensel Co., Natchez, Miss.*

New Change.

Price Current-Grain Reporter: I. R. Roamer & Son have sold their interest in the Sylvia Milling Co. and purchased the Larned Mill & Elevator plant at Larned, Kans., and intend rebuilding the elevator and enlarging it and modernizing the mill plant and put it in operation next season.—*I. R. Roamer, Larned Milling Co., Larned, Kans.*

Sold Elevator and Bought Mill.

Price Current-Grain Reporter: We have sold the elevator which we recently purchased from Newman & Morton, to James Lacey, formerly with J. F. Westrand & Co. We have bought the Laurel Milling & Grain Company's house at this place, taking possession the 18th of November. We will conduct a general flour, feed and grain business. —*J. R. Durrie, Laurel, Nebr.*

Resigned—New Corn.

Price Current-Grain Reporter: F. V. Uridil has resigned his position as manager for the Farmers' Co-operative Mercantile Company at this place. Up to this writing they have not been able to find a man to fill the vacancy. Mr. Uridil has accepted a position with the Crowell Lumber and Grain Company, at Clarkson, Nebr.

Corn picking in this vicinity is nearly completed. The corn is of a good quality and averages about 45 bu. per acre.

The new crop of corn has not started to move to the market yet, but will in the course of a week or ten days.—*Herman Hamel, agent, Nye Schneider, Fowler Company, Leigh, Nebr.*

Telegraph Company Liability.

Price Current-Grain Reporter: In your issue of Nov. 5th you carried an item stating that the Supreme Court of Illinois on Oct. 31st handed down an opinion holding void the provisions in telegraph blanks which exempt the telegraph companies from liability for their errors unless the message is repeated or insured. Moreover, you state that in light of this decision the sender can therefore recover damage he sustains by errors made by the telegraph company. We would like to know whether or not this decision was rendered in a case wherein the message was an interstate or an intra-state one. It is our understanding that in all cases wherein an interstate message is in question the provisions referred to herein have been held as binding on the sender, but we believe it is the practice of state courts where the message in question is an intra-state one that the provisions referred to are held void.

We have a case regarding the liability of the Mackey Telegraph Company for error in transmission on an unrepeated, uninsured, interstate message, and we have been advised by different authorities that the clause limiting liability for errors in transmission as carried in these blanks is binding. Possibly the case to which you refer in the item, as noted, was opposite to all previous opinions we have had respecting a similar matter.—*Westbrook Grain & Milling Company, Pine Bluff, Ark.*

[The decision in the case mentioned appears on another page, with editorial comment in second editorial page.—EDITOR.]

BUCKWHEAT IS THE NATIONAL PANCAKE.

When buckwheat years ago first secured its supremacy as the premier product for the "National Pancake," it was largely used in what we now call the "old-fashioned" way—a sour batter, kept in a stone jar, renewed each night and sweetened by soda before baking; although it was also used in the old days as the chief ingredient in "self-rising" buckwheat, which was the original "ready-for-use" pancake flour of this country. By this same "old-fashioned" method the greater part of what we now call "plain" buckwheat is still used by the private consumer. However, the introduction of the so-called "pancake flours" within recent years and the education of the public by lavish advertising to the merits of this innovation has made the "old-fashioned" way of making buckwheat cakes obsolete in many households, so that today far more buckwheat is consumed in this country in the shape of "self-rising" mixtures than in the "old-fashioned" way.

The mixtures differ from the so-called "pancake flours" only to the extent that buckwheat is the principal cereal used, the purpose being to secure from it the necesary buckwheat flavor, while lightness in texture is procured from other cereals. Buckwheat flavor in the maximum degree can only safely be incorporated in the product when the most efficient process of "kiln-drying" is used, and while flavor has always been the principal factor in differentiating one mill's product from another, when used in the "old-fashioned" way this factor of flavor is far more important when the product is to be used in "self-rising" mixtures. For this purpose also the "kiln-drying" process is not only necessary as a *sine qua non* of flavor, but absolutely essential in reducing the moisture contents to such a degree that premature chemical action will not be excited between the "self-rising" elements, otherwise quick deterioration would occur.

Of all cereal products that enter into these mixtures, buckwheat is the highest priced. Therefore, costs of these mixtures are materially governed by the degree of flavor possessed by the buckwheat product that is used. To secure a common degree of flavor in the mixture, the stronger the buckwheat flavor the less percentage that need be used and the lower the cost; while the weaker the flavor the greater percentage required and the higher the cost. Or of two mixtures, each having an equal percentage of buckwheat but differing only that in one is used a patent white buckwheat and in the other a straight dark, the latter will be found by actual baking test to possess over double the buckwheat flavor of the other.—*Blodgett-Holmes Co., Janesville, Wis.*

The farmers affiliated with the Society of Equity, the Nonpartisan League and the other radical misfits, which recently held a convention or conference at the Morrison Hotel, Chicago, adopted a resolution urging Government ownership of probably everything in sight except their own property—land. Among the distinguished speakers at this conference was Carl Vrooman, some time assistant secretary of agriculture and a very large land owner in Illinois, who 'fessed he had while in the Department work urged strongly all coöperative organizations.

CORN PRICES.

Higher prices for corn have been predicted on the ground that all other commodities were advancing. Action of markets during the war, particularly a spread of $1.50 between corn and oats, thoroughly demonstrated that the theory of relative prices is untenable. Now, if there be no relation between the various grains, on what assumption can higher corn values be argued because clothing, shoes, etc., ad infinitum, are advancing? If we are forced to paw two or three prices for some one article, it does not follow that we will voluntarily pay a like proportion for other necessities. The recent advance in price is simply a natural adjustment between the deferred deliveries and the "spot" market, the deferred deliveries having been prematurely depressed below the present worth, viz: the price of current arrivals. The crop is sufficiently large to insure ultimately lower prices, but faulty distribution will delay the decline to normal levels. World's crop 15 per cent greater than last year and 5 per cent larger than five year average does not suggest permanent enhancement of prices.—*Thomson & McKinnon, Chicago.*

DE-CONTROL OF WHEAT.

"Subscribers write to us to ask if it is not now possible to give the Government a lead in the direction of de-controlling trade in the least objectionable manner possible," says *Broomhall.* "We are quite of opinion that it would be to the benefit of the grain trade as a whole, and it would favor the best interests of our country if control could be done away with, and trading resumed on prewar lines; but, although we should very much like to see the end of control at an early date, yet we very much doubt whether it is possible to de-control the wheat trade in this country whilst control is maintained in the United States, in Canada, Australia, India, Russia and Roumania. There is, in fact, at the present time practically no free trade in wheat, Argentina being the only exporter where export purchases on the open market are possible."

FOOD PRICES INCREASE.

Despite the Government's spectacularly wordy campaign to reduce living costs, the prices of many articles of food showed further advances in October. The monthly report of the Bureau of Labor Statistics listed increases as follows: Eggs and rice, 6 per cent each; potatoes and raisins, 4 per cent; evaporated and fresh milk, coffee and prunes, 3 per cent; pork chops, butter, cornmeal, rolled oats, navy beans and sugar, 2 per cent; canned salmon, oleomargarine, cheese, bread, macaroni and oranges, 1 per cent; ham, nutmargarine and tea showed an increase of less than five-tenths of 1 per cent.

Effect of Profit Taking.

The gradual but persisent rise for the past ten days has brought out enough profit taking to keep the market in a healthy condition; and the outlook from the supply and demand viewpoint is more encouraging to holders than to short sellers.—*Logan & Bryan, Chicago.*

Visible Supply of Oats.

Official statement of the visible of oats weekly, compared with weeks of previous three years:

JAMES J. GERBER SEND FOR CATALOGS 128 Sixth Avenue South **Minneapolis, Minn.**

Junction City: About 75% of corn husked. 50% decrease in cattle feeding. Corn crop very light and practically none will be marketed. We pay $1.14 for ear corn, 70 lbs.

Sedan (9): Very little corn raised here this year. No increase in cattle feeding. Very little corn to sell. $1.50 to $1.60 per bushel offered to farmers.

Greensburg (6): 75% of the corn has been husked. Crop very poor and not enough for local consumption. Would pay $1.50 bu.

Concordia (4): 10% of corn husked. No corn being offered. $1.25 being offered for ear corn.

Hoxie (1): 20% of corn crop husked. Very little increase in feeding. $1.10 to $1.15 is being offered for ear corn.

Minneapolis (4): 50% of corn crop husked. Some increase in feeding. Very little corn being offered. $1.40 is being paid by feeders for corn.

Makeeney (4): There will be no corn marketed in this locality this season.

OKLAHOMA.

Altus: No corn husked, or offered for sale.

Miami (7): 30% of corn husked. We paid $1.40 for corn up to today, now $1.25.

El Reno (5): 25% of corn husked. We pay $1.25 per bu. for corn, ear mixed.

Kingfisher (4): 80% of corn husked. $1.25 to $1.40 is paid for corn.

Enid (4): 60% of corn husked. Decrease in cattle feeding. We pay $1.50 for corn.

Marshall (5): 50% of the corn crop now husked. Do not expect any increase in cattle feeding. No corn offered for sale. Farmers busy seeding late wheat and plowing for oats crop. Offering $1.50 for bushel corn to farmers.

Geary (2): 60% of corn husked. We pay $1.30 for corn.

Crop Reports

Compiled by GEO. A. WELLS

PROBLEM OF BUYING CORN.

The general reports of our correspondents as given below indicate that the prices paid to farmers for corn cover rather of a wide range, varying from $1.00 to $1.50, depending no doubt upon the quality, local demand, general market outlet and the courage of the country buyer. The college professor or Bureau of Markets expert, in considering the prices being offered for corn as indicated in these reports, would no doubt say that there is unnecessary discrimination and that an injustice is being done which should be prevented and that in some instances that the prices are indicative of profiteering.

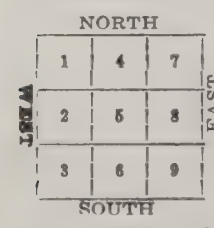
Neither the college professor or the Bureau of Markets expert has probably ever had sufficient experience to know anything of the risk of ownership involved in the buying, handling, shipping, selling and delivering corn, the possibility of deterioration, the fluctuation of market values, loss in transit, delays in transit, freight charges, interest charges, and all other incidental charges that must be covered by the difference between the price paid to the farmer and the price received for the grain after it is unloaded at destination.

Just at present cars are not available for the movement of corn from the surplus producing sections and there is not a sufficient amount of corn, notwithstanding the large quantity on the farms ready for shipment, being received at markets to give balance and maintain anything like normal conditions and relations between the cash and the future values.

The country shipper should carefully consider whether the market values as reflected at the present time on the grain exchanges is abnormal or not, because of the scarcity owing to transportation conditions, and whether he can afford to base his price to the farmer on the spot market value or should base his price on bids to arrive or the future delivery. If the present spot market is abnormal and the movement should increase, then in a comparative sense, the country shipper would probably be unable to realize on his corn accumulated in store and in transit during the time of such abnormal terminal market values.

What the Reports Show.

The general reports also indicate that there is some increase in cattle feeding in Iowa, South Dakota and Nebraska but no increase in the other surplus corn producing states.



The reports also indicate that the percentage of the corn crop that has now been husked is approximately as follows: Ohio, 60; Indiana, 65; Illinois, 75; Iowa, 75; Nebraska, 70; Kansas, 50, and Oklahoma, 50.

General Reports.

The following general reports as to the percentage of the corn crop that has now been husked, cattle feeding and prices being paid to the farmers for corn are self-explanatory.

LOCATION KEY.

Explanation.—In order to give the reader as intelligent an idea of the districts from which all crop and local trade condition reports are received, they are numbered to correspond with divisions shown in the accompanying diagram, the numbers 1, 2 and 3 representing the western one-third of the state from north to south; 4, 5 and 6 in central third, and 7, 8, 9 the eastern third. Figures indicating these locations will appear in all crop reports, in letters referring to trade situations in beans, feed, hay, etc. Each state will be treated as a square body.

OHIO.

Camden (2): 65% of corn is huked. We pay $1.10 to $1.20 per bushel of 70 lbs.

Bucyrus (4): 40% of corn husked. Just now the farmers are hurrying their hogs off to market on account of the prevalence of hog cholera. It is quite bad in this country just now. The hogs are only half fat, but better a little than nothing.

Xenia (3): 60% of corn husked. Decreased feeding of cattle. Farmers are not selling corn freely. Elevators are paying $1.10 to $1.15 per bushel for corn.

Eaton (2): About 70% of the corn husked. One dollar and ten cents to $1.20 is paid for corn.

Upper Sandusky (4): 60% of corn husked. We pay about $1.10 per bushel.

Blanchester (3): About 50% of corn husked. We pay $1.15 to $1.25 for 70 lbs. of corn.

Agosta (5): About 75% of corn husked. We pay $1.50 per cwt. for corn.

Circleville (6): About 20% of the corn has been husked. Do not anticipate an increase in cattle feeding. Corn is being offered freely by the farmers. Paying $1.10 to farmers for 70 lbs.

Greenville (2): 65% of corn husked. We pay $1.55 per cwt. for corn.

Sidney (2): 80% of corn husked. We are paying $1.15 per bu. for corn now. We look for steady movement of corn for next 30 days.

Portsmouth (6): 40% of corn husked. We pay $1.10 for corn.

Springfield (2): 20% of corn husked. We pay $1.00 to $1.10 for corn.

Rockford (1): 90% of corn crop has been husked. Do not anticipate increase in cattle feeding. We are paying $1.80 to $1.90 per cwt. to the farmers for corn.

Lima: About 75% of corn crop has now been husked. Most of the corn is being fed to cattle, etc., not much offered for sale at this time. It does not seem that there will be an increase in cattle feeding. We pay 90c per bu. for corn.

Liberty Center: About 80% of corn husked. Paying $1.65 per bu. for corn, 20% moisture. Corn good in this section.

Ansonia: About 45% of corn husked. We are paying $1.70 per cwt. for good corn.

Middletown: 60% of corn husked. We pay $1.20 per bu. for corn, 70 lbs.

INDIANA.

Winchester (8): 50% of the corn is husked. There will be 25% less cattle feeding than last year. Farmers are not selling corn.

Monticello (1): 75% of corn now husked. Do not anticipate increase in cattle feeding. Corn is not yet being offered freely by the farmers. One dollar and twenty-five cents down to $1.22 is being paid farmers for corn.

Waveland (2): 65% of corn husked. Corn selling around $1.25 per bushel at present time.

Kendallville: We think 75% of corn is husked. We will have an increase of 25% in feeding cattle. What corn is being sold is changing hands at $1.20 to $1.25 for 70 lbs.

Princeton: About 60% of corn is husked. $1.25 to $1.40 is being offered here for corn, but not much surplus.

Rensselaer: 90% of corn husked. $1.25 for ear corn.

Jasper: 60% of corn crop has been husked. $1.25 to $1.40 by bushel for corn.

Winimac: 80% of corn crop husked. We pay $1.05 to $1.25 for corn.

Tipton: 75% of corn is husked. Not much corn being offered. We pay $1.10 per bu.

Portland: About 50% of corn husked. No increase in cattle feeding. We pay $1.05 to $1.10 per bu. for corn.

Decatur: 75% of corn husked. We pay $1.75 per cwt. for corn.

Wabash: 90% of corn husked. We pay $1.20 per bu. for corn.

Rushville: About 75% of corn husked. We are offering $1.25 for corn, but feeders are paying as high as $1.35 to $1.40 at the cribs.

Marion: 70% of corn husked. We pay $1.70 per cwt. for corn.

ILLINOIS.

Sparta (6): No corn here to husk. One dollar and forty cents to $1.50 being offered for corn.

Eureka (1): 95% corn husked. One dollar and twenty-six cents offered for corn.

Decatur (5): 85% of corn husked. One dollar and twenty cents to $1.30 is being offered for corn.

Belleville (3): 25% of corn husked. One dollar and thirty-five cents is offered for corn.

Jefferson (5): 90% of corn hus No increase in cattle feeding. We $1.05 for ear corn, $1.10 December livery $1.15 November delivery.

Marcus (1): 60% of corn hus weather too wet. Increase in c feeding. Farmers won't sell cor present price. One dollar and ten c offered for yellow corn.

Corydon (6): 80% of corn hus Yes, there is increase in cattle fee No corn sold here. One dollar to per bu. for corn.

lbert (5): 85% to 90% of corn
ed. Farmers can sell faster than
lators can take care of corn.

thur (2): 90% of corn husked. We
from $1.10 to $1.25 for corn.

awa (2): 90% of corn husked. We
$1.27 for No. 3 yellow corn.

uesdale (1): 75% of corn husked.
pay $1.15 for corn.

MINNESOTA.

and Meadow (9): 75% of the corn
been husked. No increase in cat-
eeding. Corn is being offered free-
One dollar and ten cents paid to
ers for corn.

Ben Prairie (6): Two-thirds of corn
sed. One-fourth fed to cattle and
g No corn to be offered. Would
bout $1.25.

Connelly (2): 95% of corn husked.
crease in cattle feeding. Not much
for sale. Offerings $1.30 for corn
esent.

Worthington (3): 75% of corn husked.
crease in cattle feeding. No corn
ng in. Offering $1.10 for corn to
ers.

Anderson (6): Corn all husked.
ot same amount of feeding as last
a. Very little corn offered for sale.
ers offering $1.17 for corn.

Albert Lea (6): 75% of corn is husked.
crease in cattle feeding. Am of-
ri; $1.05 to $1.10 for corn. The
ather was wet and then turned cold
at farmers got behind with their
r but it has turned warmer and the
st ten days have been more favorable
tit they are catching up with their
r work.

Lydon (6): 80% of the corn is
s d. There is no increase in cattle
ed g. Corn is not offered freely. Am
ying $1.10 for corn to farmers.

Warren (1): All the corn is in the
o No increase in cattle feeding. No
rn s being offered.

Wells (6): About two-thirds of corn
r husked. No increase in cattle
ed g. No corn being offered. Am
ying $1.34 to farmers for corn.

Minnesota (3): 75% corn is husked.
crease in cattle feeding. Very little
rn offered. Am paying $1.25 to farm-
s r corn.

NORTH DAKOTA.

Clyton (2): There is no corn mar-
ce here. We are shipping in corn
eeding, though the tendency has
en to rather freely market the hogs
d cattle.

St Thomas (7): Not much corn
s here. None for sale. Corn good
s year. Most of it put into silos.
ll have to ship some corn in for
d Expect to pay $1.50 per bu.

Sloan (7): No corn marketed at
tin. Must ship some in for feed.

Cavalier (7): No corn grown here
arket.

Carrington: No corn for market in
s erritory.

Great Bend (9): Corn all husked
re Cattle feeding about the same.
rn handled here. What is mar-
e here is ear corn and prices paid
.10 per bu.

Dakota: In this vicinity most of the
n s fed without husking. About the
n number are cattle feeding. No
n s offered for sale. We would pay
4 or shelled.

Cayo (8): Early snow has given
husking a bad "set back." Most
n shocks in heavy drifts. Very
le being offered. Elevators don't
nt o buy as there is too much snow
e on ears. Early cold and stormy
ter among ranchers in the west-
rt of the state caused uneasiness.

SOUTH DAKOTA.

Ladreau (8): 65% of the corn crop
en husked. There will be about
n crease in cattle feeding. The
n s not being offered freely now,
think it will be by Dec. 1. We
ying $1.20@1.25 for corn.

Mitchell (8): 75% of corn husked.
se in cattle feeding. Moderate
ut of corn being offered. We pay
5 o $1.25 for corn.

Armour: 75% of corn husked possibly. No increase in cattle feeding. We pay $1.00 to $1.15 for corn to farmers.

Mitchell (8): 75% of corn husked. Normal number of cattle on feed. No corn being offered by farmers. We pay $1.20 for No. 4.

Miller (5): 75% of corn husked. Two Two hundred per cent increase in cattle feeding as compared with last year. Corn not being offered by farmers. We pay $1.15 for shelled corn.

Canton (9): 90% corn husked. No increase in cattle feeding. Corn is being offered freely by farmers. We offer $1.23 for grade No. 4 corn.

Bridgewater (8): 95% of corn husked. No increase in cattle feeding. Corn moving slow on account bad roads and weather. We pay $1.20 to $1.25 for No. 4 mixed or No. 4 yellow corn.

Clark (7): About 30% corn husked. No increase in cattle feeding. No corn being offered by farmers. We would pay $1.10 to $1.20 for 70 lbs. ear corn.

Brookings (8): About 50% corn husked. No increase in cattle feeding as farmers say there is no money in cattle now. Corn offered sparingly. Paying $1.05 to $1.10 for 70 lbs. ear corn. No new corn offered.

NEBRASKA.

Harvard (9): About 70% of corn husked. No increase in cattle feeding. Too early for corn to be offered. We pay $1.20 to $1.30.

Beatrice (9): 80% corn husked. No increase in cattle feeding. No corn offered.

Nebraska City (9): 75% corn husked. Some increase in cattle feeding. Not much corn offered. We pay $1.20 to farmers for corn.

Schuyler (7): About 98% corn husked. Not much increase in cattle feeding. Not much corn offered, but think partly due to bad roads and weather. We pay about $1.20 to $1.30, depending on test for corn.

Belden (7): About 90% corn husked. Not much increase in cattle feeding. Some corn coming in, not selling freely. We pay $1.18 to $1.27.

Humphrey (8): About 80% corn husked. No increase in cattle feeding. We pay $1.10 to $1.20 to farmers for corn.

McCook (6): 25% of corn husked. Some increase in cattle feeding. We pay $1.25 to $1.30 for corn.

Orleans (6): 10% of corn husked. Possibly some increase here but not general. One dollar and ten cents to $1.30 being offered for corn.

Superior (9): Corn 80% husked. Decrease in cattle feeding. No surplus of corn here. One dollar and twenty-five cents per bu. of 75 lbs. being offered for corn.

Humboldt (9): 85% corn is husked. No decrease in cattle feeding. Just starting to move. One dollar and twenty-five cents offered for corn.

Pierce (7): 90% of corn is now husked. Anticipate about 20% increase in cattle feeding. Corn is being offered freely. We are paying about $1.25 for corn.

Central City (9): 75% of corn husked. No increase in cattle feeding. We pay $1.25 for No. 4 and $1.20 for No. 5.

Swanton (9): 75% of corn husked. Cattle feeding about same as last year. Farmers slow to sell new corn. One dollar and twenty cents is being offered for corn.

Winnetoon: 85% of corn husked. No increase in cattle feeding. We pay $1.15 to $1.25 to farmers for corn.

Oakland: 90% of corn husked. Not much corn offered yet, but there will be next week and after. We pay $1.25 for No. 4 yellow.

Superior: 75% of corn husked. Decrease of 50% in cattle feeding. No corn offered by farmers. Dealers are paying $1.25 for corn.

Wood River: 65% of corn husked. There will be some increase in cattle feeding. We pay $1.25 to $1.30 for corn.

News of the Terminal Markets

SIOUX CITY, IOWA.

Paul Larson, Correspondent.

The thirteenth annual meeting of the stockholders of the Sioux City Board of Trade will be held Tuesday, December 2nd, at 6:45 p. m., at the Marten Hotel. Four directors will be elected at this meeting. Three for three years, and one for one year, to fill the expired terms of Messrs. Hutton, King, Webster and Slaughter.

Visitors on the floor during the week were Wm. A. Verzani, New Castle, Nebr.; L. C. Husby, manager of the Farmers Elevator Co., Osmond, Nebr.; Sam Lassen, manager of the Farmers Elevator Co., Pierson, Iowa; Chas. Corr, manager of the Farmers Elevator Co., Salix, Iowa; C. Brown, manager of the Farmers Elevator Co., Jefferson, S. Dak.

A decision by the Interstate Commerce Commission favoring proportional rates on grain shipments to Duluth and St. Louis, will give the Sioux City market decided advantages in rates to the north and south, according to J. P. Haynes, traffic commissioner, who returned from Chicago and Washington. A favorable decision will give this market a reduction of 4½c per hundred to Duluth and 5½c per hundred to St. Louis.

CAIRO, ILL.

John Travis, Correspondent.

The receipts of oats the past week have been fair. Shipments have fallen off owing to the shortage of cars, which is becoming worse daily.

The famous N-C 4, with Lieutenant Commander Read in charge, spent two days at Cairo the past week doing recruiting work for the navy.

Ellet Antrim, son of H. S. Antrim, who is gaining quite a reputation as a cartoonist, is spending a month visiting his parents before leaving for Honolulu, where he has accepted a position with one of the daily papers of that city.

All hope of getting in over sixty per cent of the wheat crop has passed. Wet weather has prevented sowing of wheat and gathering of corn. A large number of young farmers are leaving southern Illinois and southeastern Missouri for Detroit and other large manufacturing centers, as they can make more money there than farming.

The shortage of coal is so great that the traction company, which supplies power to most of the industries of Cairo, has shut off the power from a number of manufacturing plants, all display lights and picture shows. The five elevators which are using power have kept going to date. Unless more coal is given to the power plant the elevators may have to work less hours than at present.

DETROIT.

John Barr, Correspondent.

Demand for barley has been active here for several days, but offerings are not large and business did not amount to much. The market is quoted firm at $2.80@2.90 per cwt. for cash No. 3.

Buying of rye for eastern shipment has been active all week and the price is up 5c. Offerings are not large. Millers are in the market almost every day. Cash No. 2 is quoted firm at $1.48.

The Lewis E. Sands Co., with headquarters at Albion, N. Y., has opened a branch office in San Francisco under the management of George Croke, formerly Mr. Sands' chief assistant. This company has several branch offices, one being situated here.

Beans are easy and lower. The market is off 10c and trade is dull. Some dealers look for a return of activity and firmness should the trouble with Mexico become more acute. The market is quoted at $6.75 for immediate and prompt shipment per cwt.

Oats are up 2½c and firm. Buying has been active for both local and eastern account and offerings show no increase. Fear of an embargo owing to scarcity of coal is causing some anxiety and gets credit for part of the strength. Quote: No. 2 white, 79c; No. 3 white, 78c; No. 4 white, 77c.

Old corn is 2c higher and new 2@4c higher. The strength in old corn came late in the week and was the result of the general feeling of strength shown in all markets since the trouble with Mexico got prominent in the daily papers. Trade here is slow and stocks are small. New corn weakened several days ago and declined 3@5c, but 2c of this was recovered later. There is no increase in receipts and not much demand. Quote: Cash No. 3, $1.55; No. 2 and No. 3 yellow, $1.57; No. 4 yellow, $1.55; No. 5 yellow, $1.54; No. 6 yellow, $1.53. New corn: Cash No. 3 yellow, $1.54; No. 4 yellow, $1.47; No. 5 yellow, $1.43; No. 6 yellow, $1.36.

Wheat has been in shipping as well as milling demand in this market, and the tone is firm. Receipts have been small all week. The mills report enough wheat offering to fill their needs. Quote: Cash No. 1 red, $2.30; No. 1 mixed, $2.28; No. 1 white, $2.28 and the usual discounts for the lower grades.

Jefferson D. Hardin, Jr.
Foreign Grain Freights
Grain Forwarding
NEW ORLEANS, LA.

NASHVILLE.

John Leiper, Correspondent.

The Railroad Administration has made an order granting Nashville elevators enough coal to operate to prevent damage to grain by moisture.

Receipts of grain at Nashville last week totaled 96 cars. Stocks at the close of the week were as follows: Flour, 43,600 bbls., decrease of 1,700; wheat, 831,000 bus., increase of 117,000; corn, 145,000 bus., increase of 120,000; oats, 416,000 bus., increase of 32,500.

Demand for corn meal was moderate last week. Nashville and southeastern corn mills with capacity of 135,000 bus. had output of 18,268 bus., or 13.2 per cent of capacity, which compared with 20.9 per cent the preceding week. Prices: Bolted meal, per 100 lbs., sacked, f. o. b. Ohio River points, $3.20@3.50; unbolted, $3.10@3.30.

Wheat was strong at the close last week, with receipts to meet requirements of mills. Corn was in light supply, and steady. Rains have prevented movement of local corn. Oats were in moderate demand, and steady. Prices: Wheat—No. 2 red western, $2.40@2.45. Corn—No. 2 white, $1.65@1.70; No. 3 white, $1.63@1.68; No. 3 mixed, $1.60@1.65. Oats—No. 3 white, 83c; No. 3 mixed, 82c; No. 3 red, 83½c.

DES MOINES, IA.

A. J. Cheeseman, Correspondent.

J. A. Pirie has purchased the elevator of P. J. Harvey at Gowrie, Ia., and will take possession at once.

Receipts: Wheat, 2 cars; oats, 19; corn, 37 cars; flax, 4 cars; ear corn, 8 cars. Shipments: 30 cars oats; 10, corn; 4, wheat; 2, ear corn.

Demand rather light past week, 3 white oats selling average 72c; 4 white, 71½@72c. Four yellow corn, $1.32@1.33½; 5 mixed ear corn, $1.30¾.

Delbert Cramer has purchased the elevator of the Farmers Grain Co., at Grand Junction, Ia., and the new firm will be known as the Junction Grain Co.

The following dealers were visitors on the Board the past week: N. S. Beale, Tama, Ia.; Thos. Woof, Stuart, Ia.; Jay Thorpe, Lohrville, Ia., and Pat Guthrie, of Elkhart, Ia.

W. N. Boyden, formerly in the office of W. H. Perrine & Co., Chicago, will travel in central Iowa for that firm, commencing December 1st. Mr. Boyden has a good knowledge of the grain business and we predict a successful future for him.

Severe snowstorm in progress here yesterday and today. About seven inches of snow. Clearing today, Saturday, with prospects of zero weather tonight and Sunday. This severe weather and shortage of fuel, will, no doubt, lessen the receipts for the coming week.

Our Board of Trade is progressing rapidly and the finishing touches will be applied in the next thirty days. By-laws rules and regulations will be received from the printers this coming week, when the various committees will be made up. Expect within the next two or three weeks to publish a daily market report, for distribution to the trade in Iowa, and adjacent territory.

DULUTH.

S. J. Schulte, Correspondent.

Trading in rye was active during the last week on this market, with eastern and export demand reported. Its spot price was advanced 3¼c, to $1.48¾.

C. T. Mears of the Itasca Elevator Co. has been elected to fill the vacancy on the Duluth Board of Trade directorate brought about through the resignation of John H. Ball.

Charles F. Macdonald, secretary of the Duluth Board of Trade, has returned from Washington, where he attended the final arguments in the lake and rail grain freight case before the Interstate Commerce Commission. Duluth's contentions were argued by Francis W. Sullivan, attorney.

After an experience of ten years, the United Grain Co. is closing out its business on the Duluth market. The dullness of trade during the last two years and the consequent losses involved in operating an elevator and cleaning plant at Superior, are given as the reasons for the decision to wind up the company's operations. General regret over the outcome is expressed for John B. Ball, the manager of the company, who is held in high esteem by traders on the Duluth market.

As showing the difficulties that operators on this market have had this fall in drumming up grain to complete shipping contracts owing to scarcity of supplies, it may be mentioned that the steamer Tioga, recently wrecked off Keweenaw Point, Lake Superior, had 100,000 bushels of grain loaded in four lots at different elevators. She had wheat shipped by Hallett & Carey and S. H. Jones and barley shipped from the Itasca and Capitol elevators. In a rush at the end of last week 1,745,000 bus. of grain was loaded out, including 857,000 bus. of wheat, 663,000 bus. of rye and 225,000 bus. of barley.

Franklin Paine has retired as manager of the Duluth Board of Trade clearing house after an experience extending back over twenty-five years, and George F. Foster, for the last seven years manager of H. L. Hankinson & Co.'s Duluth office, has been appointed to the position. George W. Higby, for several years connected with H. L. Hankinson & Co. at Minneapolis, has been appointed to the vacancy in that firm's Duluth office, brought about through Mr. Foster's retirement. Mr. Paine was one of the oldest operators in the grain trade here, being one of the original members of the Duluth Board of Trade. He was elected manager of the Clearing House Association back in 1894. He has announced that he proposes to take a well-earned rest, and that he will probably spend the winter in Florida. The new manager of the clearing house has operated on the Duluth market for eighteen years and he is rated high for his judgment and ability.

BOSTON.

R. S. Wallace, Correspondent.

Exports of grain and flour for the week ending November 29th were as follows: Wheat, 48,000 bus.; flour, 53,549 sacks.

Stocks of grain in regular elevators November 24th were: Wheat, 1,248,305 bus.; oats, 124,919 bus.; rye, 43,638 bus.; barley, 5,372 bus.

The following were visitors on 'Change during the past week: L. Johnson, Hutchinson, Kans.; R. Sauger, Hongkong, China; J. J. Weldon, Watertown, N. Y.; W. R. Heidtman, Buffalo, N. Y.; E. D. George, New York City; Munroe A. Smith, Philadelphia, Pa.

Somewhat better demand was noted for nearby corn during the past week, with prices quoted a little higher than last week. Prices range as follows: For shipment, new fancy 38/40 lbs. clipped white oats, 87½c to 88c per bushel; new 38/40 lbs. regular clipped white oats, 86½c to 87c per bushel; new 36/38 lbs. clipped white oats, 85½c to 86c per bushel. Receipts for the week ending November 29th were 8,065 bushels.

The demand for nearby corn showed a little improvement during the past week with offerings somewhat liberal. The following was quoted at the close: Old No. 2 yellow corn, $1.72 to $1.73 per bus.; old No. 3 yellow corn, $1.69 to $1.71 per bus.; new No. 2 yellow corn, $1.70 to $1.71 per bushel; No. 3 yellow corn, $1.65 to $1.67 per bushel; new No. 4 yellow corn, $1.62 to $1.64 per bushel. Receipts for the week ending November 29th were 1,000 bushels.

NEW YORK.

J. M. Nugent, Correspondent.

The following gentlemen were visitors upon the floor of the New York Produce Exchange during the past week: George H. Fletcher of Montreal, E. L. Dan of San Francisco, H. C. Pohlzon of Chicago, and H. D. Yokes of Topeka, Kansas.

The market for corn meal was more or less erratic during the week owing to the action of the corn market. The volume of business was small as both domestic consumers and exporters were not disposed to pay high prices being asked by the mills.

Spot oats in New York ruled strong with the better qualities very scarce and the premium firmer, being quoted on the close of the week at 19c over the Chicago December option, for 38-lb. No. 2 white clipped. The export demand for heavy oats continues fairly active, and in addition, more interest is being manifested on the part of exporters for light-weight oats seeing that the good qualities are difficult to obtain. Quotations as follows: No. 1 white, 85½c; No. 2 white, 84½@84¾c; No. 2 white, 84@84½c, and No. 4 white, 83@83½c.

The trade in cash corn during the week was not active, but prices held very firm and the market appeared to be inclined to follow the upward tendency in evidence in the West. The domestic demand for spot corn was fair, but at the close of the week it was reported that considerable corn sold for English account was being cancelled owing to the sharp break in the United Kingdom market. Old No. 2 yellow was quoted at $1.70¼; old No. 3 yellow, $1.70¼; old No. 2 mixed, $1.68¼; new No. 3 yellow, $1.64¼; five days shipment and new No. 3 yellow, $1.63¼ ten days' shipment.

MEMPHIS.

George Williamson, Correspondent.

Business continues very quiet and the dealers see but little hope of early improvement. They also see little chance of prices getting any lower than they are now.

A. R. Woolen, secretary and treasurer of the Phoenix Cotton Oil Co., is very low and not expected to recover. He has been closely identified with the Merchants Exchange for many years.

A Louisville grain man in discussing the wheat situation said: "The Government crop report for November promises the country 918,000,000 bushels of wheat. The Grain Corporation has stopped selling wheat, though it owns practically the entire visible supply in this country, of about 97,000,000 bus. It is impossible to sell any considerable quantity of wheat to the home markets and yet keep export contracts with Europe. Europe has no Thanksgiving Day this year. There is too much suffering, too much unrest, too much pessimism over the food outlook for winter. The potato crop, upon which Europe is dependent, is short this year 2,250 million bushels. America, in truth the land of plenty, must help out."

S. JOSEPH.

W. H. Moore, Correspondent.

Miss Vogelman of the St. Joseph Hay & Grain Co., has been confined to her home the past week on account of sickness.

Several St. Joseph dealers went to Atchison last Tuesday to attend the meeting of Kansas dealers, called by Secretary Smiley.

W. W. Simmons of the Sloan-Simmons Grain Co. returned from a trip through the northern Nebraska and Iowa the past week and advises that cars are scarce in that territory and very little corn is being offered for future shipment.

The following visitors registered on the Exchange during the week: E. A. Allgaier, Easton, Mo.; R. J. Pendleton, St. Louis; F. P. Logan, Chicago; T. V. Morrow, Plattsburg, Mo.; Luke Brewer, Bolckow, Mo.; J. F. Kellogg, Skidmore, Mo.; Pete Ramsel, Blair, Kan.; D. L. Haas, Arkoe, Mo.; J. S. Jones, Wymore, Neb.; Major Moberly, Des Moines; Chas. Davis, Plattsburg, Mo.; W. T. Lingle, Bethany, Mo.; Clark Kirk, Gower, Mo.; H. B. Clark, city.

The Hauck Milling Co. closed down on Saturday, Nov. 29th, on account of the coal shortage. Other mills and elevators were also closed down on account of no power. The latter are furnuished power by the electric plant, but a breakdown shut all of them down for the entire day.

Cash Markets.

Wheat—Wheat arrivals all throughout the week were not very large and wheat of good milling quality remained in very small supply. All samples brought on the floor met with good demand. Cash market was somewhat lower the latter part of the week, but on account of coal shortage, etc., buyers are not quite as active. Cash wheat as follows: No. 1 dark hard, $2.50@2.70; No. 2 dark hard, $2.48@2.68; No. 3 dark hard, $2.44@2.64; No. 4 dark hard, $2.38@2.59; No. 5 dark hard, $2.33@2.46; No. 1 hard, $2.42@2.70; No. 2 hard, $2.40@2.65; No. 3 hard, $2.35@2.60; No. 4 hard, $2.28@2.58; No. 5 hard, $2.19@2.45; No. 1 yellow hard, $2.41@2.44; No. 2 yellow hard, $2.36@2.40; No. 3 yellow hard, $2.31@2.35; No. 4 yellow hard, $2.24@2.29; No. 5 yellow hard, $2.10@2.21; No. 1 red, $2.39@2.43; No. 2 red, $2.36@2.40; No. 3 red, $2.33@2.35; No. 4 red, $2.25@2.30; No. 5 red $2.22@2.25.

Corn—Unfavorable aspect of the coal situation, generally bad weather conditions and higher hog values started the corn market on the rise. Advances of approximately 5@10c took place during the week. Yellow ear corn was in good demand, being sold in a shelled basis. The close of the week brought a very poor demand for corn and several cars were carried over on Saturday. Very few offerings from the country and receipts light. Cash corn as follows:

No. 2 yellow, new, $1.48@1.51; No. 3 yellow, new, $1.46@1.50; No. 4 yellow, new, $1.43@1.45; No. 5 yellow, new, $1.37@1.40; No. 2 white, old, $1.51@1.52; No. 3 white, new, $1.45@1.46; No. 4 white, new, $1.40@1.43; No. 5 white, new, $1.36@1.40; No. 2 mixed, old, $1.46@1.50; No. 3 mixed, new, $1.42@1.45; No. 4 mixed, new, $1.40@1.43½; No. 5 mixed, new, $1.36@1.39; ear corn, new, $1.42@1.44.

Oats—Receipts practically nothing and demand remained good all throughout the week. Offerings from the country were small and very few bought to arrive. Cash oats follow: No. 2 white, 76½@77c; No. 3 white, 75½@76½c; No. 2 mixed, 74@75c; No. 3 mixed, 73@74c; No. 2 red, 74@75c.

BUFFALO.

E. Bangasser, Correspondent.

Receipts of grain have dropped off this week but a number of cargoes for winter storage in vessels are expected.

There was a good export demand for rye and little offered at present prices. No. 2 was quoted $1.55 on track, through billed.

The Oswego Milling Co., Inc., has opened an office in the Chamber of Commerce Bldg. here and is ready for business. H. E. Bradt, secretary and treasurer of the company, is well known in the trade and will handle affairs at this end. Poultry and stock feeds are specialties. R. C. Seavey is president and manager, and S. Cobean vice-president and general superintendent at Oswego.

Oats advanced steadily after the opening on Monday and on Friday there was a sudden spurt of 1¾c, seemingly without other reason except that oats were scarce and hard to get at the prices prevailing.

Buyers took hold and before the close of the week the market was 4½c higher than last Saturday. All the mills wanted supplies at the close this week and willing to pay the advance. With only about 50 cars here for the week, not a small day's receipts, it looks as if the market here had been a little out of line. Closing: No. 1 white, 83½c; No. 2 white, 83c; No. 3 white, 82c; No. 4 white, 81c on track, through billed.

There was a little steadier corn market but prices are not as yet well settled down, buyers paying a cent or two more for the same grade when they liked appearance of the sample offered. It seems to be a matter of fancy in most cases. Buyers held off particularly on the lower grades but took quite a little corn later on and at the closing the offerings were light and the demand fair. Sellers here have been getting a good big price for corn but had their ideas screwed up by the advance in cash corn on Friday in the west. Fair prices at the close were: No. 1 yellow, $1.62; No. 2 yellow, $1.61; No. 3 yellow, $1.60; No. 4 yellow, $1.53; No. 5 yellow, $1.48; No. 6 yellow, $1.51 on track, through billed.

Inspection track receipts for the week: No. 2 red, 4 cars; No. 3 red, 10 cars; No. 4 red, 4 cars; sample, 6 cars; No. 3 soft white, 2 cars; No. 2 mixed, 2 cars; No. 3 mixed, 2 cars; No. 4 mixed, 2 cars; No. 2 hard winter, 8 cars; No. 3 hard winter, 55 cars; No. 4 hard winter, 7 cars; No. 5 hard winter, 2 cars; sample, 1 car; No. 2 Northern, 1 car; No. 3 Northern, 14 cars, No. 4 Northern, 4 cars; No. 5 Northern, 3 cars; No. 2 dark Northern, 4 cars; No. 3 dark Northern, 3 cars; No. 5 amber durum, 1 car. Corn—No. 1 yellow, 2 cars; No. 2 yellow, 17 cars; No. 3 yellow, 16 cars; No. 4 yellow, 50 cars; No. 5 yellow, 15 cars; No. 6 yellow, 8 cars; sample, 3 cars; No. 1 mixed, 10 cars; No. 2 mixed, 30 cars; No. 3 mixed, 11 cars; No. 4 mixed, 3 cars; No. 5 mixed, 4 cars; No. 6 mixed, 2 cars; No. 2 white, 1 car. Oats—No. 1 white, 4 cars; No. 2 white, 30 cars; No. 3 white, 19 cars; No. 4 white, 1 car; sample, 1 car. Rye—Sample, 2 cars. Barley—16 cars.

CLEVELAND.

F. R. Sowers, Correspondent.

Due to the recent scare that was started by some unknown force, the flour men of Cleveland have been unusually busy trying to supply the demand that was created by the false report circulated to the effect that there would probably be a shortage in flour the first of the year similar to the sugar shortage. The Cleveland Milling Co. has been rushed to capacity to supply the unusual demand upon them for their product.

The Manufacturers and Wholesale Merchants Board of the Cleveland Chamber of Commerce on November 25 announced that the forty-ninth trade extension excursion would take place, leaving Cleveland Saturday night, February 7, 1920, to visit approximately twenty-two western cities. This trip will consume approximately thirty days' time. As most of the members of the Exchange are also members of the Chamber of Commerce, no doubt some of them will take advantage of this opportunity to tour the West and become better acquainted with those in like lines of business in other cities.

The movement in all grains for the past week or ten days has been light and in the oats market it has been particularly true even though prices on the whole have advanced from two to three and one-half cents per bushel for Number 3 white. In the corn market the old crop is practically a thing of the past. Quotations on the new crop on November 26th were from three to eight cents lower than a week ago. The Union Elevator Co. reports a good movement of ear corn into their house for shelling. The quality of such has been good and the corn crop of Ohio is an especially fine one though delayed in marketing on account of the unsatisfactory weather conditions for the past week. Seven Buckeye farmers raised over one hundred bushels of corn per acre of plots of ten or more acres this year. The yields are based on shelled corn with a moisture content of twenty per cent.

On Wednesday noon, November 26, the traffic managers of the Grain and Hay Exchange members met at the Chamber of Commerce for a round table conference to discuss the minimum weight rules. At this conference the following firms were represented: Cleveland Grain Co., Union Elevator Co., Lake Shore Elevator Co., Sheets Elevator Co., Shepard, Clark & Co., and the Cleveland Milling Co. The discussion was opened by President Robinson and the meeting was later placed in charge of C. G. Clark of Shepard, Clark & Co., who introduced Mr. Brown, Assistant Traffic Commissioner of the Chamber of Commerce, to explain to those present the application of the new rules pertaining to minimum weights on grain and grain products. It was the consensus of opinion of all that attended the meeting that it had been very profitable and indications are more such meetings will be held during the winter season to give traffic men an opportunity to get better acquainted with each other and discuss matter of mutual interest.

WESTERN CANADA.

A. Caldwell, Correspondent.

Sharp advances in flax and rye took place during the week, but local speculative interest in these grains is insignificant. Rye flour has also advanced 60c per cwt.

Hon. T. A. Crerar, ex-minister of agriculture and president of the United Grain Growers' Co., Ltd., has been seriously ill with blood poisoning, but is recovering.

Western weather has gone to extremes and country roads have been in bad shape for practically the whole of the month of November. This has no doubt tended to cut down deliveries at country points and may in large measure account for the lightness of receipts, which is causing the Wheat Board considerable anxiety, as it is a long way behind in filling contracts with European countries.

Navigation closes officially Dec. 5, but for all practical purposes it is already closed for the season, the last boats to take on loads leaving Saturday. It is probable that the all rail route will be practically commandeered by the Canadian Wheat Board for rushing wheat to the seaboard to the exclusion of other grains. This will naturally lead to accumulations of oats at the terminals and have a bearish effect on the oat market.

Liquidation in December futures closed the week and the month with declines in oats and barley. There was evidence of considerable spreading, for the May options were comparatively strong. There are enough oats to supply all Canada's needs and some to spare for export. While the export demand is good from time to time there does not seem any disposition on the part of foreign buyers to follow our advances and it is quite possible that our producers will make the mistake of holding too long. Present prices may be considered fair and equitable and further advances would mean inflation.

Little stir was created locally by the news that the embargo on free entry of Canadian wheat into the United States had been removed. The probability is that very little if any Canadian wheat is available for export to other destinations than were contracted for. A certain quantity of Canadian grown wheat along the border has been hauled in wagon loads across the boundary line and sold at attractive prices ever since the crop started to move. This movement will probably increase and many farmers will undertake long hauls to get the Minneapolis prices, which are about 80 cents higher than obtainable here.

CHICAGO.

Board of Trade memberships were selling around $11,500 last week.

One holiday enjoyed by all the grain trade, Thanksgiving Day, saw the Board of Trade closed up tight for the day.

Chris. Peterson, formerly with Block, Maloney & Co., is now associated with Bartlett-Frazier, assisting in the handling of corn business.

Lawrence Rice of the Star & Crescent Milling Co. is taking a trip to Cuba accompanied by his wife. He will remain there until after Jan. 1.

Emanuel Bernek of Babcock, Rushton & Co., 137 S. LaSalle street, Chicago, Ill., died Nov. 26. He had been prominently identified with the stock and grain LaSalle street trade for many years.

Harry Halliday of Cairo, when on the Chicago floor, confirmed the statements relative to the exceedingly scarce corn crop in southern Illinois. He says corn, however, is no scarcer than cars, which are absolutely unavailable.

Jas. R. Stewart, president of the Banner Grain Co., Minneapolis, when in Chicago recently said Minneapolis' extremely small wheat stocks would probably not be increased for Canadian wheat would quite likely go East. He believes as the winter progresses Minneapolis millers will go further for wheat purchases.

James J. Fones, head of the cash grain department of E. W. Wagner & Co., having served as director of the Board of Trade for the past six years, will probably be placed on the ballot as a candidate for the second vice-presidency, as his term on the directory will expire this year. The present second vice-president succeeds automatically to the first vice-presidency.

Listed among visitors to the Chicago floor last week were the following: C. E. Roach, Kansas City, Mo.; Geo. Moulton, Fonda, Ia.; Geo. Spangler, Winthrop, Ia.; Ed Ultang, Westgate, Ia.; C. F. Holmes, Cincinnati, O.; E. L. Nagle, Deep River, Ia.; W. A. Golden, Milwaukee; E. G. Cool, Mason City, Ia.; W. E. England, Monticello, Ill.; A. S. Dumont, Detroit; H. Vest Lancaster, St. Louis.

Friends of the Horse Banquet.

The banquet following the meeting of the Horse Publicity Association at the Congress Hotel on Thursday evening, Dec. 4, will be a most enjoyable affair. The speaker of the evening will be Major General Leonard A. Wood, one of the presidential possibilities. He is a good talker and a fine man to meet. Those who attend the banquet will have the pleasure and opportunity of meeting him personally.

CINCINNATI.

George Mosbacker, Correspondent.

There was an improved demand for r here the past week, but mainly for expo Local consumption continues slow.

A number of former Cincinnati distille are taking active interest in the manufa ture and distribution of industrial alcoh and non-beverage whisky for use in man facturing plants, the arts and sciences.

S. W. Kemp, with the Dorsel Co., w highly honored in an appointment as member of the committee of three to awa the prizes for the best bales of hay su mitted at the International Show held Chicago this week, fully reported in a other column.

Frank Brown of W. L. Brown & C sold two cars of water-soaked ear cor redeemed from the recent flood of t Ohio river at 80c per bushel. The corn w very soft, rotten, mouldy and steaming a was purchased by William Fedders, New port, Ky., feed dealer.

The American Diamalt Company, locate at Riverside, this city, is planning t erection of a large grain drying plant addition to the building now occupied a formerly owned by the Fleishman interest The addition will be of concrete constru tion, three stories and 53x55 feet. T architect will submit plans this week.

Ohio's bumper corn crop gets bigger e ery time the Department of Agricultu makes an estimate in regard to it. Th department's estimate for November places the Ohio corn crop at 159,544,000 b an increase of 1,052,000 bushels over th October estimate. This is an increase more than 26,000,000 bu over the actu yield of 1918.

'he coal situation is growing acute here
l several large industries have been
pelled to shut down because of the dif-
lties incurred by the strike. Local
in elevators still have fair supplies of
l, but are saving it as far as possible
burning wood and corn cobs to keep
its in operation.

Vm. R. McQuillan of McQuillan & Cur-
, who was scheduled to speak to visitors
the Tri-State Farm Products Show,
sic hall, Dec. 6, regarding the Hay
gging System as operated by the Cin-
nati Grain and Hay Exchange, has been
ged to cancel the engagement owing to
evere attack of rheumatism which has
sed confinement to his home the past
e weeks.

incinnati freight officials are trying to
v an order issued by the Railroad Ad-
istration that minimum weights of
00 pounds on carloads of flour in bar-
are to be enforced. It is claimed that
shipments are not practicable unless
lower tiers of barrels are braced to
up under the weight of the other
s of barrels. Shifting of the weight in
sit, it is said, causes barrels to buckle
spill contents.

ne Ohio River is again on a rampage,
to the heavy rains of the past week.
farmers in the Little and Big Miami
Whitewater valleys and Kentucky side
he river, who have not recovered fully
the effects of the flood of two weeks
are fearing further losses. There is
iderable corn again under water in
e sections and many farmers are ap-
ensive that great quantities will be
ied away by the flood water.

MILWAUKEE.

Erich E. Meyer, Correspondent.

Milwaukee cash grain advancing mar-
were the rule during the past week,
being 10@20c higher for this period.
78c, oats 3@5c, corn 3@5c, and bar-
23c. Receipts are light and the de-
good.

ments of grain from Milwaukee for
eek ending Nov. 29, were 446,340 bu.
35,340 bu. corn, 143,940 bu. barley,
bu. wheat, —— bu. rye, total, 719,-
., against 711,704 bu the preceding
nd 1,131,207 bu. a year ago.

Receipts of grain at Milwaukee for the week ending Nov. 29, were 137 cars barley, 228 cars corn, 165 cars oats, 89 cars wheat, 51 cars rye, 2 cars flax; total, 672 cars, against 684 cars the week before, 1,280 cars a year ago and 839 cars in 1917.

Visitors registering at the Milwaukee Chamber of Commerce during the past week included the following: B. Millard, Omaha, Neb.; C. G. Weinert, Chicago, Ill.; L. P. Kohl, Waupun, A. F. Hoffman, Madison; W. Gregory, Palmyra; A. D. Guthrie, Waukesha, Wis.; H. Vest Lancaster, St. Louis, Mo.; M. J. Cohn, R. P. Purchase, Minneapolis, Minn.; Nels Hintze, Puckwana, S. D.; W. A. Golden, Chicago, Ill.; Richard Martin, Beaver Dam; G. C. Sevellin, Kenosha, Wis.; W. H. Noyes, E. H. Reynolds, R. L. Morrell, Chicago, Ill.; Miles Shevlin, Humble, Tex.; R. W. Smith, Madison; G. A. Hall, Waukesha, Wis.; H. J. Hughes, Winnipeg, Man.; John A. Castello, Chicago, Ill.; W. Coughlin, Clyman; Leo Coughlin, Clyman, Wis.

Regarding Rates.

There will be no immediate change in the freight rates from Buffalo and other Lake Erie ports to points in trunk line territory on grain originally shipped from Milwaukee via the great lakes to such Lake Erie ports, George Schroeder, traffic manager of the Milwaukee Chamber of Commerce, has been notified by Edward Chambers, traffic director of the United States railroad administration.

It is also stated if federal control extends beyond Dec. 31, the railroad administration will call a conference at Washington to consider the advance of 2 cents per 100 pounds proposed by roads running east from Buffalo. This increase was opposed at a conference of shippers held at New York on Nov. 10.

"Milwaukee elevators shipped more than 6,000,000 bushels of grain via the great lakes to Buffalo during the last season of navigation. This was made possible by the present rail rates east from Buffalo," Mr. Schroeder declared. "Any advance in those rates will tend to prevent shipments by lake and force shippers to use all rail routes from Milwaukee, which is inadvisable because of the perpetual shortage of box car equipment."

New Home for Grain Men.

Plans for a new building for the Milwaukee Chamber of Commerce have been revived. It is estimated that the site and building will cost more than $1,000,000. At a meeting held Nov. 26 a building committee of fifteen members, headed by H. M. Stratton, president, was elected. Four subcommittees on finance, sites, construction and special requirements were appointed.

The building committee consists of:

H. M. Stratton, chairman; H. W. Ladish, vice chairman; J. H. Crittenden, William O. Goodrich, George J. Zimmerman, L. G. Bournique, C. E. Dingwall, J. M. Hackler, Hugo Stolley, Albert R. Taylor, A. R. Templeton, A. C. Elser, C. A. Krause, W. A. Hottensen and H. A. Plumb.

Sub-Committees.

Committee on Finance—L. G. Bournique, A. C. Elser, William O. Goodrich and C. A. Krause.

Committee on Space Requirements—Albert R. Taylor, A. R. Templeton and W. A. Hottensen.

Committee on Construction—H. W. Ladish, C. E. Dingwall, George J. Zimmerman and J. M. Hackler.

Committee on Site—Hugo Stolley, Albert R. Taylor, J. H. Crittenden.

A meeting of the committee and subcommittees will be held in the near future and plans will be outlined.

PEORIA, ILL.

L. L. Eckard, Correspondent.

Cattle market steady. Light receipts were taken actively. Demand strong.

Oats receipts were 9 cars. Good demand with market unchanged. No. 2 white sold at 77c.

The top price of $13.60 was paid on several sales of hogs on the local market Saturday, which showed an advance of 15c over Friday's market. The bulk of sales were 20@25c higher. Demand from all sides was strong. Receipts 1,000, and market very active. Lights, $13.20@13.60; mediums, $13.20@13.60; heavies, $13.25@13 60; heavy packing, $12.25@12.50; pigs, $10@13.

Reopening of the Corn Products plant in Pekin after a two-weeks' shutdown due to the coal shortage was effected by the use of a mixture of coal and coke for fuel, returning to work about 600 men. The use of coal and coke, which is said to be experimental, if effective in this plant, may be followed by other plants which were forced to close on account of coal supply.

Peoria corn market remains firm and Saturday's prices were quoted 1c higher on the new corn and about unchanged on the old corn. Receipts were 51 cars, with good demand from shippers and local industries. Old No. 2 white corn, $1.50; No. 4 white, $1.39@1.41; No. 3 yellow, $1.44; No. 4 yellow, $1.41@1.42; No. 5 yellow, $1.37@1.38; No. 3 mixed, $1.42; No. 4 mixed, $1.39; No. 5 mixed, $1.37.

TOLEDO.

Carl Bryant, Correspondent.

C. F. Wood, well-known seed broker of Chicago, was a visitor on 'Change Saturday.

S. P. Louys, elevator operator at Stryker, O., visited on the floor with his friends last week.

George Newman, of the Northwest Grain & Warehouse Co.; Otto Waitzman, of Rosenbaum Bros., and Edward McDougal, of Armour & Co., were visitors on 'Change last week, returning to Chicago from Columbus, where they attended the fall meeting of the Ohio State Millers' Ass'n.

Geo. Woodman, of the Rice Grain Co., found several things to be thankful for in their Thanksgiving market letter, none more pat, however, in referring to the Toledo street car strike when he says, "We are thankful that we have only been walking two weeks instead of four—that we are able to walk and that this situation cannot last forever."

Elevators and mills in Toledo are not suffering for want of coal as a result of the miners' strike. Flour mills generally are operating at about half time and in some cases one-third time. Most of them will be able to continue a month on basis of present operation. One mill will be compelled to close down if coal is not received by Monday. Five cars have been promised by the regional director and this will last another week.

The game of volley ball must have been "made to order," for Earle B. Slawson, grain and bean dealer, because they had to cripple him to beat him in a lively game at the Y. M. C. A., a week ago. He returned to the floor Saturday after spending several days at home nursing a sprained ankle. When he is in town he spends an hour each day at the local "Y," and he would rather go without lunch than miss his daily "workout."

The trade was notified last week of the Railroad Administration's new order that cars of grain and grain products must be loaded to the marked capacity of the car, or when destined to a point where Federal inspection is maintained, within 24 inches of the roof. Produce Exchange inspectors will record on each inspection ticket the marked capacity of the car and the distance between grain and the roof. This is a precautionary measure deemed advisable by the inspection committee and will serve as a protection should the order be violated.

Joe Doering of Southworth & Co., who is in close touch with conditions in the country and is a capable judge of the situation because of his years of service as a country elevator operator, says farmers and dealers simply do not care to sell their corn and oats at present prices. With talk of high cost of living subsiding the public is becoming acclimated to the high levels, and farmers feel that as long as wheat prices remain up, the comparative value of corn and oats will be higher. The week's primary receipts of oats decreased from last week and are less than half of a year ago. There is an urgent demand right here at Toledo for oats and corn and the receipts are disappointing. Loading points generally are paying $1.60 to $1.80 for corn, but the price is not attracting much corn.

Were not his services (and others like him) so necessary to the continued growth and prosperity of the Toledo market, we would recommend another line of occupation for John Luscombe, the man who puts much of the "worth" in Southworth & Co.'s service. Once before we called attention in this column to the vivacious John and his "sixth sense" when applied to activities of the sport world. That was following the heavyweight championship contest July 4th, and during the world series baseball games. He foretold the Dempsey victory and his choice of Cincinnati gave his "sixth sense" ten correct results of world series games in eleven years. Since then in the big football games we note on the credit side of his ledger: Ohio to beat Michigan; Chicago beat Michigan; Ohio beat Wisconsin; Illinois beat Ohio; Harvard beat Yale; Princeton beat Yale. No, he didn't bet on the Army and Navy game Saturday. Moral: "Ask John, he knows."

Cash Markets.

Oats are scarce and in good request. Despite sales at 3½c over last week, few cars are arriving. No. 2 white ranged during the week at 77⅜@79⅜c, highest price being paid Saturday. No. 1 white, 36 pounds, sold Saturday at 80½c.

Corn receipts are not nearly sufficient to fill demand. Prices ranged during the week at: No. 4 yellow, $1.36½@1.42½; No. 5 yellow, $1.33½@1.37½; No. 6 yellow, $1.27¾@1.34½. Premiums for spring wheat are mounting daily. No. 3 dark northern spring sold at $3.02@3.05. Millers and dealers have advanced their bids for No. 1 red winter to $2.35, track Toledo. Mills in the Northwest are said to be buying considerable soft red in this territory, which is said to be a precedent in the history of the trade. Good demand noted for rye. Considerable was shipped out of here the past week for export. Market strong; No. 2 quoted at $1.47½. Barley quiet; No. 2, $1.47. Receipts for the week: Wheat, 82 cars; corn, 45; oats, 18; rye, 27; barley, none.

BALTIMORE.

Robert C. Neu, Correspondent.

New black-eye peas are selling on this market at 5½ cents per pound, with the supply fair for the season.

W. L. Harvey and A. H. Porter, flour men of New Prague, Minn., were visitors on the floor of the Baltimore Chamber of Commerce last week.

There has been a fair export demand in this market during the past week for corn and rye, and a freer trading in corn merely awaits the movement of the new crop.

The receipts of water-borne wheat in the Baltimore market so far this season amount to 1,470,000 bushels, compared with 1,190,000 bushels arrived up to the corresponding time last year.

Attracted by the big spurt in shipping which is indicated for the port of Baltimore, the Donaldson Line promises to increase the number of its regular sailings from this city in the near future.

Superintendent J. A. Peterson, of the Western Maryland and Baltimore & Ohio elevators in this city, is bewailing the loss of his automobile which was stolen in the vicinity of one of Baltimore's markets, while his chauffeur was making some purchases. Yes, it WAS a Ford!

DONAHUE — STRATTON CO. MILWAUKEE WISCONSIN

The name of John Sonderman, steamship agent and freight broker, is posted on the official bulletin board of the Baltimore Chamber of Commerce as an applicant for membership in this organization.

I. Jamieson, one of the apprentice grain inspectors attached to the inspection Department of the Baltimore Chamber of Commerce, has resigned his position, to engage in the paint manufacturing business with his father.

The name of Carl R. Gray, president of the Western Maryland Railroad Co., who is regarded as one of the most capable railroad men in the country, is mentioned as likely to become the head of the Union Pacific Railroad system.

The Merchants & Miners' Transportation Co., one of the largest coastwise companies in the United States, has announced that, beginning December 15, it will inaugurate a regular service from Baltimore to Bremen. Shipping Board vessels are to be employed on the route. The Merchants & Miners' hopes to acquire that trade between Bremen and Baltimore which the North German Lloyd had prior to the war. At first it will maintain monthly schedules, but it is planned to increase the frequency of the sailings as the cargo movement enlarges.

The recently-organized hay and grain firm of Bruton, Runge & Morrison, Inc., of this city, on last Monday morning, when it opened its doors for business, was given an agreeable surprise in the shape of a mammoth floral horseshoe, from which hung a white satin ribbon, bearing the words "Good Luck" and a card conveying the best wishes of Messrs. Egil and Edwin Steen, comprising the firm of E. Steen & Bro., of this city, the donors. Mr. Morrison, of the new firm, was formerly with the house of E. Steen & Bro., and this "send-off" nearly took George "off his feet."

KANSAS CITY.

T. J. Tanner, Correspondent.

Steps have been taken toward the organization of a flour and feed dealers' club in Kansas City.

The Moffat Grain Co. received a car of unthreshed kafir from Texas one day this week, said to have been the first ever shipped to Kansas City in that condition. It weighed 40,000 lbs. The grain was sold to a feeder in Montana.

The federal license of the Lawton Grain Co., at Lawton, Okla., was revoked this week by Wheat Director Barnes for alleged failure to reflect the guarantee price basis in buying wheat. Many country elevators are operated by the company.

The fact that requisitions for the Kansas City stocks of wheat held by the United States Grain Corporation were five times the amount available for allotment is regarded by D. F. Piazzek, agent for zone No. 5, as a high compliment to the quality and kinds of grain grown in the Southwest.

B. C. Christopher & Co. sold a car of wheat this week for $5,189.31, said to have been the largest sum paid here this year for a similar amount of grain. The car contained 134,310 lbs. and graded No. 2 hard. It was shipped from Eureka, Kan. The shipper received a net return $4,950.91.

Efforts are being made to restore traffic on the Kansas City Northwestern railroad, which closed a month ago, owing to financial difficulties. The plan includes a new receiver and help from the Railroad Administration. Among the shippers along the line who have suffered from the stoppage of operations are several grain elevator companies in Northwestern Kansas and Southeastern Nebraska.

Rain and snow, which fell over the Southwest this week, was timely, saving the wheat crop from exposure to freezing temperatures. The last weekly report of S. D. Flora, Kansas meteorologist, was generally optimistic as to growing wheat in that state, despite some private complaints. Threshing of the last crop is not yet complete in the Northwestern counties.

Receipts of wheat in Kansas City for November were 8,714,250 bus., as compared with 6,056,100 for October and 2,492,100 a year ago. The increase was largely in the latter part of the month, after cars became more plentiful as a result of the Railroad Administration's efforts. Corn receipts were 615,000 bus., against 583,750 in October and 875,000 last year; oats, 671,500 bus., against 793,900 in October and 751,400 in 1918. Other arrivals were: Kafir, 20 cars, against 46 a year ago; rye, 30 cars, against 30; barley, 97 cars, against 314; millfeeds, 295 cars, against 16; flour, 297 cars, against 122. Shipments during November were: Wheat, 3,298 cars; corn, 165; oats, 299; kafir, 13; rye, 36; barley, 63; millfeeds, 609; flour, 1,046.

The Smith-Whyte Grain Co., with Joseph Whyte, formerly of Omaha, as the head, is a new candidate for business in the Kansas City grain market. Mr. Whyte has sold his interest in the Adams-Whyte Grain Co. of Omaha and organized the Kansas City firm, with W. D. and W. E. Smith of Macedonia, Iowa, as partners. W. D Smith will be active with Mr. Whyte in Kansas City. Seeking a Board of Trade membership and finding none for sale, Mr. Whyte has deposited $15,000 with Secretary E. D. Bigelow for a treasury membership. This will increase the exchange's members to 201, unless somebody decides to sell a certificate to Mr. Whyte. The last membership sold brought $14,500, including the transfer fee of $500

Coal Shortage and Strikes.

As this week ended the fuel and transportation situations in Kansas City were the most serious yet experienced since the nation-wide strike of coal miners began. Conditions were rendered more acute by a sudden walk-out of 1,400 switchmen employed on all railroads entering the city except the Rock Island and the Burlington lines. Ostensibly the switchmen's grievance is their wage scale, but opposition to handling cars containing non-union coal is said to be the main cause of trouble.

Shortage of coal in Kansas has resulted in an effort by Governor Allen to operate strip mines in the Southeastern counties with volunteer labor. The week brought the coldest weather of the winter thus far, with snow varying from an inch to a foot and a considerable amount of rain. It is reported that many localities in both Kansas and Missouri are without coal, and are compelled to use wood of any kind available. Industries, such as flour mills and

ors, have in some cases been com- to shut down.
ck of fuel in Kansas City have run that desperate measures of economy ontemplated. One proposition is to all business houses, office buildings, and factories, whether using coal, electricity, for three days. Another place a general limit of seven hours siness until relief comes.
strike of switchmen, while not au- ed by the National Brotherhood of ay Trainmen, caused such consterna- hat an embargo on incoming and out- freight was at once ordered by the representatives of the Railroad Ad- ration.
ss conditions improve by Monday oard of Trade may find difficulty in ing. The supply of coal for heating uilding will last only two or three days. Elevator service was curtailed iday and Saturday, and lights and re to be restricted to the hours be- 9 a. m. and 4 p. m., if not entirely off.

Cash Grain Markets.

Wheat—Receipts for the week, 1,962 cars, t 2,114 a week ago and 115 a year ago. tion of offerings, due to the coal situation and a development of ex- y bad weather late in the week, was f the price sustaining factors. An- was the excess of nearly 20,000,000 n the requisitions of mills through- e country over the amount of wheat here for allotment by the United t Grain Corporation. The exact ty allotted was 6,720,000 bus., in- g 2,449,000 bus. of hard winter and 00 of red. Missouri mills, including of Kansas City on the Missouri side State line, were awarded 489,950 bus. d and 765,000 red. Most of the re- er went to mills in the Northwest outhwest. Mills in Kansas, includ- ose of Kansas City on the Kansas f the State line, got 1,014,000 bus. d and 990,000 bus. of red, a total of 00 bus. Texas mills were allotted bus. of hard and red and 321,000 ere sold to Oklahoma mills. Requi- from mills east of the Mississippi were denied. No wheat went to St. as stocks at that center were not ked for. All allotments were pro- Kansas City mills received one- one-twelfth as much as requested. began to move out on the allot- at the rate of about 50 cars a day, was expected that 1,000,000 bus. be shipped in the near future if ortation conditions permit. Much of heat allotted will be left in the ele- until needed. Because of disap- ent in the distribution of stocks, outside millers, especially eastward, brisk buyers of choice grades in en market. Some of the larger ele- companies said they had sold all dared to the Northwestern mills. wheat advanced 1@13c and red wheat 1@17c. The week ended with a ed feeling in the trade, due to ess of the fuel situation in Kansas d a sudden strike of switchmen in al yards, which threatened to par- oth incoming and outbound freight ry kind. The closing prices were: hard and dark, $2.42@2.72; No. 2, 2.72; No. 3, $2.32@2.70. Local decreased 17,000 bus. for the week, 70,000 bus., against 15,267,000 bus. a go.

Corn—Receipts, 259 cars, against 115 a go and 156 a year ago. The pres- offerings and indications of an in- g movement from now on broke 10@12c, but the market made some y in the latter part of the week, to stormy and cold weather and the ness arising from the coal and ci situations. Demand was good on ines, with scattered outside feeding and local buying in evidence. Stocks ed 5,000 bus. to 20,000 bus., against a year ago. Closing quotations were down, with No. 2 mixed at $1.47@ 3 at $1.45@1.48; No. 2 yellow at .52, No. 3 at $1.48@1.50; No. 2 at $1.47@1.53 and No. 3 at $1.45@

Oats—Receipts, 156 cars, against 132 a go and 57 a year ago. The demand r, including some buying by eleva- cerns. Stocks increased 16,000 bus., 21,000 bus., against 2,259,000 last Prices advanced, but showed a re- tendency at the week's end, clos- erally higher than a week ago, 2 white at 76c, No. 3 at 75@75½c, mixed at 74@75c, No. 3 at 73@74c, ed at 75@76c, and No. 3 at 74@75c.

Kafir and Milo—Receipts, 23 cars, against k ago and 20 a year ago. Dealers ated in the first half of the week creased arrivals and reports that eshing and movement had begun est. Before the market had time ct the improved supply situation, the weather turned wintry and ike situation threatened to check vement. Demand was very good es advanced 10@25c, closing as fol- o. 2 white kafir, $2.80@2.85; No. 3, 80; No. 2 milo, $2.80; No. 3, $2.75@ tocks decreased 1,000 bus., leaving s. in store, against 36,000 a year

ST. LOUIS.

E. E. Reeves, Correspondent.

Edward B. Immer departed with his family for Palm Beach, Florida, where he expects to erect a bungalow and spend the winter.

Secretary Eugene Smith of the Merchants Exchange, has been confined to his home for over a wek by a severe attack of gastritis, but is reported to be improving.

James P. Condon of the Stanard-Tilton Milling Co., has purchased the certificate of John Scullin, and is an applicant for membership in the Merchants' Exchange.

Thomas W. Carter, who has been absent from the floor for some time. was on the floor of the Merchants' Exchange last week, shaking hands with his many friends and getting in touch with the market.

Members of the Merchants' Exchange suspended business for a few minutes last Monday at noon and devoted their attention to charity when a committee of ladies sold tickets for the benefit of the St. Louis Protestant Orphans' Home. The ladies were assisted by Messrs. Sam Plant, Alden Little and L. Ray Carter in the sale of tickets.

Governor Gardner has appointed the following members of the Merchants' Exchange to represent Missouri at the fifteenth annual convention of the National Rivers and Harbors Congress, which will meet in Washington, D. C., Dec. 9 to 11: Charles L. Niemeier, vice-president of the Exchange; Eugene Smith, secretary; Marshall Hall, Thomas B. Teasdale, F. W. Seele, John O. Ballard and John L. Messmore. Mayor Kiel, W. F. Carter, president of the chamber of commerce; Postmaster Selph, Clarence H. Howard and G. A. Buder, as well as J. E. Smith, were also appointed on the St. Louis delegation.

For the purpose of boosting the Red Cross Saturday and Sunday Hospital Collections, a reception was tendered to Ambassador to Russia, Former Governor D. R. Francis, by the Merchants' Exchange Saturday afternoon. A rousing speech by the Governor was sandwiched between selections by the band, and an enjoyable time was had.

By mutual agreement effected by Second Vice-President Bert H. Lang of the Grain Corporation, between the State Warehouse Commissioner and the Merchants' Exchange, the weighing of all wheat for the Government for export by way of the Barge Line has been placed under the supervision of the Merchants' Exchange and Mr. Dower.

Owing to an accident which necessitated some repairs to the Government's tow boat which was expected to take out a large fleet of barges last week, three of the new steel barges loaded with wheat for export by way of New Orleans, were sent out as a special tow by the tow boat Oscar F. Barret. Although there were four barges of wheat ready, laden with a quarter of a million bushels of wheat, the three barges contained 187,500 bushels, which still made it the largest tow which has been taken out since the Federal Barge Line has been in operation. Supervisor of Weights John Dower of the Merchants' Exchange, who is a Mississippi River enthusiast, has issued a circular caling attention to the "Banner tow" and to the achievements of the Government Barge Line.

Regina, Sask., reports several hundred thousand bushels of Canadian wheat hauled by wagon across the boundary and marketed in the United States this season. No. 1 Northern wheat was quoted about 65c a bu. higher in Minneapolis than in Winnipeg. Most of this grain was, we presume, "courtesy grain," entered free by agreement for local exchange with Canada, car shipments of course not being so admitted.

LICENSES REVOKED.

The United States Wheat Director announced Nov. 24 that he has revoked until further notice, effective at noon on Nov. 25, 1919, the license granted to the Lawton Grain Co., whose main office is at Lawton, Okla., and which does business at Lawton, Tinney, Holliday, Faxon, Chattanooga, Devol, Snyder, Indiahoma, Cache, Fletcher, Cyril, Cement, Richards Spur, Mt. View, Gotebo, Granite, Cordell, Bessie, Bridgeport, Ryan, Waurika, Hastings, Temple, Big Cabin, Chelsea, Manitou, Catalo, Whiteoak, Vanita, Dinger and Roosevelt, all in Oklahoma, for violations of the Act of Congress and the regulations and requirements of the Wheat Director, particularly including its failure to display the Wheat Director's Notice to producers as required; failure to furnish information to Vice-President D. F. Piazzek, Kansas City, as required; and for failure to follow Government grades.

Also, for a period of ten days, he has revoked the license granted to the Consolidated Flour and Feed Co., 405-8 Keith Theatre Bldg., Syracuse, N. Y., as wholesaler or jobber of wheat flour, effective at noon, Nov. 24. This company admitted having violated Condition 4 of its license, which prohibits a licensee dealing with a person, firm, corporation or association, which does not hold at the same time such license as is required under proclamations issued in pursuance of the Act of Congress approved March 4, 1919.

Oats in Primary Markets.

Receipts of oats in eleven primary grain markets from Aug. 1, 1919, with comparisons with 1918:

	1919-20.	1918-19.
Chicago	35,019,000	57,023,000
Milwaukee	12,368,000	18,471,000
Minneapolis	8,893,000	16,654,000
Duluth	429,000	2,273,000
St. Louis	9,986,000	9,950,000
Toledo	1,432,000	4,886,000
Detroit	984,000	1,714,000
Kansas City	3,175,000	7,777,000
Peoria	3,226,000	4,198,000
Omaha	3,879,000	9,350,000
Indianapolis	4,738,000	6,989,000
Total	84,129,000	139,285,000

Receipts of oats the past week at primary markets, compared with preceding week and corresponding week last year:

	Nov. 29. 1919.	Nov. 22. 1919.	Nov. 30. 1918.
Chicago	1,154,000	1,275,000	2,849,000
Milwaukee	317,000	567,000	98,000
Minneapolis	237,000	282,000	1,065,000
Duluth	9,000	27,000	121,000
St. Louis	522,000	818,000	358,000
Toledo	24,000	24,000	166,000
Detroit	48,000	94,000	52,000
Kansas City	273,000	190,000	87,000
Peoria	206,000	285,000	153,000
Omaha	218,000	291,000	346,000
Indianapolis	109,000	136,000	267,000
Total	3,117,000	3,989,000	6,446,000
Shipments	3,294,000	4,007,000	5,496,000

Interesting Price Phenomenon.

In passing from a small crop period to a large crop period, experience shows that strong markets frequently rule just after the movement of the big new crop gets under way. The reason for this may be found in the fact that scarcity at the end of the small crop creates a good demand for the first run of the new crop. Traders are prone to anticipate lower prices as soon as the new crop movement starts, but when prices fail to break as expected, they become impatient, decide that the demand is such that it cannot be satisfied, and turn to the bull side of the market, just as they have done in the present instance. Eventually, however, the weight of the big new crop is felt, the natural result being that the abundant supply is reflected in lower markets.—*L. L. Winter, with Hulburd, Warren & Chandler.*

Toledo Timothy Seed.

Timothy seed made an effort to get out of the rut last week, and succeeded finally. Prices were about 20c higher than on Nov. 22 and the bulls think it will soon sell over $6, even though Toledo's stocks always loom up big, say J. F. Zahm & Co. Compared with world prices on everything else, timothy does not look high, but the stuff in Toledo's show windows looks large to most of the trade and they won't anticipate next spring's wants. The domestic demand is expected to be enormous next spring, and may put a dent in stocks all over, but in the meantime nearly 100,000 bags concentrated at Toledo menaces the weak ones. At that the cash stocks are owned probably by fewer people than ordinarily, and may not come out only on a substantial increase in values. They have hung on a long time and may be rewarded this season.

L. C. L. Terminal Charge.

The Commerce Commission has granted authority to establish at Chicago a terminal charge of 2c per cwt. to apply on interstate less-than-carload traffic between points beyond Chicago and industries and universal freight stations located on the Chicago Warehouse & Terminal Co. This grant is based on the testimony that labor and other cost advances have been so great that higher rates are necessary to keep the service in operation.

Kindly say: "I saw your ad in THE PRICE CURRENT-GRAIN REPORTER."

Movement of Wheat.

Following is a statement of the receipts and shipments of wheat at the primary markets of the West for the weeks named:

	Receipts. (Final 00 omitted)		Shipments (Final 00 omitted)	
Week of—	1918.	1917.	1918.	1917.

Senator Capper, publisher of several agricultural papers out of Topeka, Kans., predicts greatly reduced crops next year because of low profits, labor shortage and high wages. "The American farmer won't go on a strike, but he is getting mighty sullen." Senator Capper seems to be doing his damndest to keep him in that state of mind. A little optimism would help the senator and also his readers.

Total Grain Stocks Visible.

The aggregate stocks in the United States and Canada, east of the Rocky Mountains, on Nov. 22, 1919, and corresponding weeks of previous years as reported by *Bradstreet's*, were as follows, with comparisons:

	Wheat.	Corn.	Oats.	Barley.
	(Final 00 omitted)			
1919	139,505,0	1,987,0	24,674,0	5,332,0
1918	191,151,0	4,554,0	33,929,0	8,020,0

Weekly comparisons since July, 1919, follow:

July 5	20,815,0	4,570,0	25,699,0	14,918,0
July 12	17,946,0	4,592,0	24,586,0	14,301,0
July 19	18,774,0	4,806,0	23,248,0	13,507,0
July 26	25,220,0	3,813,0	25,000,0	13,448,0

BARLEY MARKETS.

WAUKEE.—The local barley market ather unsettled during the week, gh prices rose 1@3c. Receipts een very light. The demand from shippers and industries is good, ularly for heavy grades, the light being rather slow. However, the t is kept well cleared. Receipts e week were 137 cars, against 151 week ago and 237 cars in 1918. t quotations are: Good to choice, 50-lb. test, is quotable at $1.55@ bright, $1.57@1.58; fair to good, 47-lb. test, $1.46@1.55; low, 41 to est, $1.42@1.53; 36 to 40-lb., $1.38 feed; $1.35@1.45. Iowa quoted 1.55 for light to fancy; Wiscon- .40@1.58; Minnesota, $1.40@1.55; t, $1.40@1.55; feed and rejected, 1.45.

TH.—Business in barley was in volume during the last week, perators endeavoring to pick up to complete their shipments be- e close of the navigation season. he loading out of a cargo, only bushels of barley were left in the rs at the end of the week. Re- were merely nominal, amounting 26 cars, against 348 last year.

CHICAGO, ILL. MILWAUKEE, WIS.

Prices for spot barley were advanced 1c at $1.16@1.44.

BUFFALO.—Barley dealers disposed of a few small lots to exporters, but local buyers were out of the market entirely. Offerings were light, but it was thought some lots to arrive by lake would come on the market. Bids as a rule from exporters were too low. Quoted: Old malting, $1.58@1.63; feed, $1.48@1.53; new malting, $1.51@1.55; and feed, $1.43 @1.48 on track or in store, Buffalo.

PORTLAND.—Barley trading during the past week was on a more liberal scale than usual, with advanced prices, and dealers are feeling much more encouraged, says the *Commercial Review*. Receipts continue light and prices are advancing, both here and in 'Frisco, while Eastern barley seems to be holding up better than a fortnight ago. The feed qualities have so advanced that the spread under No. 3 blue is only 50c a ton, the latter being quoted at $67.50 with the feed at $66.50@67 and No. 2 Eastern strong at $65.50.

SAN FRANCISCO.—While there is no noticeable change as to the barley market as to prices, the spot grain is very firm but most of the business being transacted is at country points. Country dealers are particularly strong in their views, so much so that dealers here claim that they cannot afford to pay the prices country dealers expect. The local demand, the *Commercial Review* says, is mostly for small lots, from 100 to 500 tons. The future market is firm, with some trading at higher values. Shipping barley is quoted $2.27½@2.35 per cental with the feed which is also firm ranging from $3.25@3.27½.

CHICAGO.—The barley market was not particularly satisfactory to sellers during the past week. Opening with a decidedly unsatisfactory Monday, prices, in spite of small receipts, were only steady with the demand centering, the early part of the week on the best grades only and not very insistent at that. Shippers were the best buyers. The Thanksgiving holiday, of course, broke the week in two, and on Friday and Saturday, while the demand was considerably better, elevators and shippers being the leading buyers, the demand was centered on the medium and lower grades only, the better qualities being not particularly sought after by anybody. The present week opened with a slow market. A few choice cars were taken on Monday by the industries at a small advance over last week but all other qualities, good and poor, were hard to sell, in spite of the fact that offerings were not particularly heavy and the market was under the pressure of the carry-over brought from the previous week. Exporters were not heard of at all during the past week or this. Sales on Monday as reported were 15 cars of malting at a range of $1.43@1.54 and five of feed at $1.25@ 1.39, total receipts for the day being 49 cars. Futures, however, closed a little higher. December at $1.49, after selling up to as high as $1.50; May closed at $1.40½, a ¼ under the top for the day. Exports from Atlantic ports last week were 500,000 bus., compared with 46,- 000 same week of 1918.

KANSAS CITY.—Strength again characterized the barley market this week, with feeding and local manufacturing demand absorbing more than the arrivals. Prices advanced about 5c a bushel. No. 3 was quoted nominally at $1.35@1.38 and No. 4 sold at $1.33@1.35. Receipts were 28 cars, against 28 a week ago and 25 a year ago. Stocks decreased 11,000 bus. to 110,000 bus., against 182,000 last year.

It is reported from California that the home crop of barley in that state allowing for home feed consumption has practically all been sold. England has been a free buyer and European brewing requirements are expected to make a heavy demand the balance of the season, which, however, if made will have to be supplied from the central states.

Some Price Factors.

Recent grain firmness is due to the chance of moderate December corn and oats receipts, talk of a great final crop year food scarcity in 30 per cent of Europe, Australia drouth so severe that it has affected their business, mention of a 40 per cent loss to Mexican bean and corn crops, presence of a near record small corn visible at 1,200,000, arrival or crucial four weeks in Argentine oats and wheat crops, rise of Argentine freights to a point where U. S. corn prices permit sales to England, signs that Argentine corn will not press on New York seaboard for many weeks.—*Jos. Wild, with E. W. Wagner.*

October in Iowa.

The Weather Bureau office at Des Moines says that the month of October was generally favorable for pastures and the seeding and germination of winter wheat, but too wet for corn husking, and this condition in connection with the large number of cloudy days and deficient sunshine delayed the drying of corn so that at the end of the month very little had been cribbed.

Winter wheat in the early sown fields is up to a good stand but the acreage has been greatly reduced.

Flour Department

Reaching grain dealers who handle flour as a side line and for millers, flour brokers and distributors who wish to interest grain and feed dealers in the handling of their product.

The United States Grain Corporation announces that it purchased last week 560,000 barrels of straight grade flour at an average price of $10.29.

The Gurly Flour Milling Co. has been formed at Gurly, Nebr., by Frank X. Rihn, C. E. Weyerts, J. A. Poppen and others.

Contracts for the office building and warehouse of the Ruehlman Flour Co., Cincinnati, Ohio, have been awarded by Dittoe, Fahnstock and Ferber.

The Shenandoah Valley Milling Co., of Riverton, Va., propose to make extensive improvements and enlargements, entailing an expenditure of $100,000 or more.

Small Spring Wheat Stocks.

Extremely small Northwestern wheat stocks are justifying extensive purchases from distant points, as items in THE PRICE CURRENT-GRAIN REPORTER from our various terminal market correspondents indicate. Those posted on the Canadian wheat situation, where there is also a considerable tonnage of poor wheat, believe but little will cross the border in the Northwest, although badly needed by Minneapolis millers. Such comments usually suggest that this wheat will be hauled on Canadian railroads to Eastern provinces, and if it enters the United States at all, it will be through Buffalo. This unusual factor of domestic flour trade should interest those with surplus wheat supplies who want broader distribution which they can unquestionably stimulate by soliciting Northwestern millers.

Flour Production.

The Grain Corporation's weekly bulletin covering the wheat and wheat flour movement throughout the United States for the week ending November 14, in comparison with the figures for the same period a year ago, is as follows:

	1919.	1918.
Wheat receipts—	Bus.	Bus.
From farms.....	12,376,000	14,349,000
Previous week.....	15,460,000	13.673.000
June 27 to Nov. 14..	581,658,000	558,927,000
Flour produced—	Bbls.	Bbls.
Week	3,130,000	2,532,000
Previous week.....	3,209,000	2,194,000
June 27 to Nov. 14..	55,571,000	45,708.000
Total stocks wheat—	Bus.	Bus.
All elvtrs. and mills.	288,432,000	291,089.000
Previous week.....	294,406,000	292,435,000
Change for week....	—5,974,000	—1,346,000

FLOUR EXPORTS.

Exports of wheat and flour, July 1 to Nov. 14, amount to 62,576,000 bus. of wheat and 6,763,000 bbls. of flour, making a total equal to 93,009,000 bus. of wheat compared with 71,026,000 bus. of wheat and 6,495,000 bbls. of flour last year to November 14, the first fourteen days of November prorated from monthly report, making a total equal to 100,253,000 bus. of wheat.

FLOUR MARKET.

Director Barnes' supposition, that the removal of the import and export restrictions on wheat and wheat flour, to go into effect on Dec. 15, would result in much lower prices on those commodities, has not been reflected as yet in the market, since cash wheat has advanced since the announcement was made, on the better sorts at any rate. Indeed, the effect of the removal has been, if such was the cause, exactly the opposite to that anticipated by Director Barnes, flours as well as wheat having advanced. The reason may appear in the fact that the Wheat Commission in Canada on the afternoon of Nov. 23, just as Mr. Barnes' notice appeared, advanced the price of Canadian flour for export to $13 per bbl., and on Wednesday marked the price up to $14, although the price for export to the West Indies was not changed. Apparently the policy of the Wheat Commission in regard to letting shipments of wheat and flour into the United States has not been decided upon to the advantage of large American consumers. This advance brings Canadian flour up to a parity with American spring patents so that there is nothing to be gained by shipments to this side.

Generally in New England and New York in the East the trade is quiet and prices continue to advance, in which movement the soft winters are sharing. Generally the mills throughout the country are running at a good rate, including all of the soft winter wheat mills. The Pacific Coast also is running practically up to full capacity. Only a few centers make any complaint or show decreases of production, the retail trade only being affected by the uncertainty that attends the proposed retail sales of the Corporation.

FLOUR CONSUMPTION.

Julius H. Barnes, Wheat Director, announced on Nov. 24 that, effective on Dec. 15, 1919, the export and import embargoes on wheat and wheat flour will be eliminated. Later he issued a long statement on the present wheat and flour situation, in the course of which, he said:

"The elimination of import restriction will probably attract into the United States Canadian wheat and wheat flour which is of that strong type that is in relatively light supply in the United States, owing to the partial crop failure in our Northwestern states, and on these particular grades of wheat and wheat flour the elimination of the import embargo should probably tend to reduce United States prices, which are far above the Government guarantee price basis; to the extent of even 80 cents per bushel in some varieties.

"The export record for the four and one-half months shows exports of 62,576,000 bushels of wheat and 6,763,000 barrels of flour, or the equivalent of 93,000,000 bushels of wheat, compared with the same period last year of 71,026,000 bushels of wheat and 6,495,000 barrels of flour, or a total equivalent of 100,000,000 bushels of wheat.

"In the four and one-half months the mills of the United States have produced 55,571,000 barrels of flour, against the same period last year, 45,708,000 barrels of flour. That is, the mill production of four and one-half months has exceeded last year's record by almost 10,000,000 barrels, while flour exports have been almost identical. This indicates, either that the people of the United States are eating flour and bread at a greatly expanded ratio, or else that the invisible stocks of flour in the United States are increasing idly. Probably the truth lies betv the two, and that there has been expansion of bread consumption (w is distinctly in the national inte because bread is still the cheapest and replaces necessarily higher pr foods), and also there is possibly enlargement of domestic flour st This latter phase may even have dered on flour hoarding, as a great n irresponsible stories have circulate the effect that flour will be scarce, w a study of the figures of wheat su does not indicate, and that ther contemplated the putting into us substitute and war flours.

"On this latter point I desire to n it clear that the Wheat Director see no authority in the Wheat Act prescribing or controlling the chara of flour manufactured from wheat, percentage of extraction, nor sep tion, nor is there any authority to pose the use of substitute flours, wh or by admixture, on the people of United States."

Exports of Flour.

Exports of flour bid fair to cut q a figure during the coming winter European ports, in the opinion of York shipping agents. Four steam have already been chartered ther load straight cargoes of flour, and doubtedly others will follow. The *Faxon*, at Montreal, and the *Beth* at Philadelphia, both Shipping B boats, have been chartered to carry t to the United Kingdom. Another l built steamer, at Montreal, is also load flour, and it is said the Fra Canada Line will send a boat to York very shortly for a similar ca The rate for grain shipments from nadian ports to the United Kingdo 10s 6d. and for flour 57s 6d. F Portland, Me., to the United King the rate for grain is 8s 6d per qua and for flour 50s per ton, Noven December loading.

FLOUR MARKETS.

BALTIMORE.

Baltimore, Nov. 29.—The strength Spring wheat grades of flour continue be the principal feature of the ma Soft winters are feeling the effects renewed selling "drive" on the part o Grain Corporation which is arrangin place such flour on sale to the consum trade in a retail way. Public announ ments to this effect are appearing in daily papers, and the promise is held that the U. S. Grain Corporation stan flour will be decidedly cheaper than cur prices asked for "patents." Rye flou dull. Quotations, per 98 lbs. cotton or sacks, follow: Spring patent, $13.50 straight, $12.75@13.25; winter patent, $ @10.75; straight, $9.50@9.75; rye flour, to blended, $7@8.

CINCINNATI.

Cincinnati, Nov. 29.—The flour ma was somewhat irregular the past w millers reporting a good business, and bers only a fair trade. The statement is by Julius Barnes, that the removal o import embargo on wheat should prob tend to reduce prices, which are far a the government's basic, to an exten about 80c per bu. for springs, had t effect on local flour conditions, and p for all patents showed a slight adv Wheat advanced from 1½@3c per bu. during the week. Quotations repre prices in wood. Wood basis is 45c jute. Winter patent, per bbl., $11@1 hard patent, bbl., $13.75@14.50; bakers patent, 140 jute, $12.15@12.65; corn 100 sacks inc., $3.25@3.30.

Local freight officials are trying to an order issued by the Railroad Ad istration that minimum weights of 5 lbs. on carloads of flour in barrels are enforced. It is claimed that such ments are not practicable unless the tiers of barrels are braced to hold up u the weight of the other tiers of ba Shifting of the weight in transit, it is causes barrels to buckle and spill cont

MILWAUKEE.

Milwaukee, Nov. 29.—The local market has not been as active during past week as in several weeks prev Millers report that the demand has slig fallen off, although business is of fair satisfactory proportions. Premiums cash wheat remain stiff while prices wheat flour have again shown a slight crease over last week, with spring w patent and straight being quoted 10c 20c higher, respectively, on inside pric

The rye situation is slightly improv better demand being reported from sources. Prices also show some be ment.

The Milwaukee flour mills produc total of 19,150 barrels of flour for the w

hich 16,000 barrels were wheat flour, or oximately 67 per cent of total capacity, 3,150 barrels were rye flour. Wheat uction showed a falling off of 6 per as compared with last week.

rrent quotations, in carlots, per bbl., tton, are: Spring wheat patents, $13.55 straight, $12.85@12.95; first clear, $9.25 5; rye flour, pure, white, $7.95@8.15; flour, straight, $7.40@7.55; rye flour, . $6.40@6.75. Corn flour is nominally ed at $3.95; cornmeal, white, $3.90, and grits, $3.85, all in 100-lb. sacks.

NEW YORK.

w York, Nov. 29.—The flour situation developed unusual and most interest- eatures. The announcement that the rt and export restrictions had been ved on wheat and flour lead to expecta- of large importations from Canada. dian authorities, however, declared home needs and overseas require- s must first be taken care of, and irst real result of the removal of re- ions was a jump of nearly two dollars arrel in the price of Canadian flour practically has removed it as a com- or with the American product. The gth in American cash wheat prices re- l in a very firm market for hard t flours, but the volume of business was extremely light.

Government reported purchases of 0 barrels of flour, and the average was $10.29. These purchases by the nment and the fact that a broader a of soft wheat flours is being recom- ed had a firming influence on this acter of flour, and there were evi- s that the baking trade is beginning ake purchases. On the whole, the ion was too much mixed to encourage operations, and buyers here were as s possible awaiting developments. patents were quoted $13.25@14.25; winter straights, $10.25@10.50, and s straights, $12.50@13.

DETROIT.

oit, Nov. 29.—Buying of flour is slow market and the tone is firm. Buy- short time ago purchased all the ould permit and are loaded up. It is these orders that the mills are work- present. Fresh business amounts e. All of the mill feeds are firm and ive demand. Quote: Fancy spring flour, $14.25@14.50; fancy winter flour, $12.75@13; second winter pat- 12; winter straight, $11@11.25 per Bran, $46; standard middlings, $51@ fine middlings, $61@61.50; cracked $64; coarse cornmeal, $60@62; chop, per ton, in 100-lb. sacks.

NASHVILLE.

ville, Tenn., Dec. 1.—The demand ur continues heavy in the Southeast. ual slowing down in demand for this is not being experienced. Prices rm, notwithstanding action by the Corporation. Mills are getting short l and have been forced to curtail on account of the coal situation. ville and Southeastern flour mills, apacity of 210,090 bbls., had output ek of 147,368 bbls., or 70.1 per cent city, which compared with 73.3 per e preceding week, and 59.9 per cent ne week in 1918.

s for soft winter wheat flour, 98 lbs., f. o. b. Ohio river points: High patents, $11.50@11.90; standard pat- 0.80@11.20; straight patents, $10.50@ irst clears, $8@8.50.

DULUTH.

h, Nov. 29.—The flour market was during the last week and prices in were marked up 20 cents. Local were rushed in the effort to get its from their mills shipped away the close of the lake navigation Good general demand was also re- from over the district. Prices of barrels in carlots at mill are as Family patents, jute, $13.65@14; patents, jute, $13.40@13.75; clears,); second clears, $6.75@7.

PHILADELPHIA.

lelphia, Nov. 29.—Flour receipts for k were 600 bbls. and 5,633,770 lbs. . The market continues quiet but sympathy with the West. Buyers rating chiefly from hand to mouth iness is confined mostly to sales of hand stocks available below mill

uote per 196 lbs., packed in 140-lb. ks: Soft winter straight, Western, 0; do., nearby, $9.65@10; hard win- ight, $12@12.50; do., short patents, 0; spring, first clear, $9.75@10.25; nt, $13@14; do., short patent, $14@ ncy spring and city mills patent, rands, $14.50@15; rye flour, $7.40@ bbl. in sacks, as to quality.

NASHVILLE.

lle, Tenn., Dec. 1.—Wheat bran illings are in only fair demand and ound feed is without important Prices: Soft winter wheat bran, bags, per ton, $43.70; standard s, $58.50; horse and mule feed, $45 iry feed, $56@67; hog feed, $63; eed, $68@75.

BOSTON.

, Nov. 29.—The retail demand has again, although it is a question the consumer will not suffer in from the multiplicity of counsel, varying opinions as to the wisest pursue. Dealers say that they ng a little trade, in spite of the listurbing elements in the current The larger bakers are said to supplied for the time being, the he current demand coming from t wish to renew their stocks as they become depleted. Naturally this demand is of limited volume, though it is healthy in that it springs from actual consumption, and merely aims to keep stocks on a prudent basis. Compared with a week ago, all patent flours have advanced 25c to 50c a barrel, soft winter patents having at last felt the upward impulse. Current quotations, f. o. b. Boston, in carload lots, mill shipment, for 196 lbs., in 98-lb. sacks, are $13.50@14.50 for standard spring. $14.50@15 for special short patents, $9.25@10 for spring clears, $12.40@13.75 for hard winter patents, $11@11.75 for soft winter patents, $10.35@10.85 for soft winter straights, and $9.75@10.50 for soft winter clears. Receipts for the week ending Nov. 29 were 63,448 bbls.

TOLEDO.

Toledo, Nov. 29—Flour production as reported by Toledo mills this week was 23,800 bbls. or 47 per cent of capacity, against 20,300 bbls. last week and 33,100 bbls. corresponding period last year. Flour prices have advanced, reflecting increased premiums for red winter wheat. Northwestern mills are heavy purchasers of soft red in this territory and receipts in this market as a result are light. The situation is more complicated in view of the high prices asked by the Grain Corporation, which figures about 10c over the Government basic price. Millers have forwarded their bids on flour and are awaiting developments. Resale of straight winter wheat grades of flour by the Grain Corporation has not met with much success in the past, due principally to the package used. And, too, it is declared, bakers and housewives are used to a better grade of flour. Doubt is expressed if the domestic trade will accept this quality in lieu of the blended variety. Soft winter patent, $12.15@12.20; straight, $11.15; clears, $10.70@10.95; low grade, $7.25 per bbl. in halves cotton, carlots, f. o. b. Toledo.

KANSAS CITY.

Kansas City, Nov. 29.—Except sales of special brands, flour trade this week was slow, with some evidence of stocked up conditions and approaching holiday dullnes. However, all mills were active in filling old orders, and the output was 79,200 barrels, against 85,500 a week previous and 62,000 a year ago. The allotment of federal wheat stocks had a confusing effect on the market, but advances in carlots since has about offset the discount on purchases from the United States Grain Corporation. It is not believed that the lifting of import and export embargoes December 15 will result in bringing wheat into this country or facilitating exports of wheat or flour, at least for some time. A report received Saturday said the Corporation had bought 560,000 barrels of straight grade flour from mills in different parts of the country at an average of $10.29 a barrel, sacked in jute. Mills here were encouraged by the resumption of Government buying, though their own prices were mostly too high to permit sales for that account. On Dec. 4 the Government will buy first clear, and it is likely that mills in Kansas City and the Southwest will have some to offer. The coal shortage, resulting from the strike, has caused several shutdowns of plants in Kansas and Missouri, including a large corn meal and rolled oats mill in Kansas City.

Following are the Kansas City prices of flour in carlots, sacked in 98-lb. cotton bags, per bbl.:

Hard wheat—	Nov. 29.	Nov. 22.
Short patent	$12.35@13.10	$12.30@12.90
Long patent	12 00@12 60	12.00@12.50
Straight	11.50@12.10	11.00@12.00
1st clear	10.25@11.10	9.50@10 50
2nd clear	9.00@10.00	8 50@ 9.50
Low grade	6.00@ 7.50	6.00@ 7.50
Soft wheat—		
Fancy patent	11.15@11.75	11.00@11.30
Standard patent	10.75@11.25	10.60@11 00
Straight	10.00@10.50	10.10@10.50
Clear	9 50@10.00	9.50@ 9.90
Low grade	6.50@ 7.50	6.50@ 7.50

Toledo Clover Seed Market.

Scattered selling as delivery day approached increased offerings last week. The short interest was not large and mostly in the way of hedges, some by interior dealers and some by Seaboard dealers against purchases from abroad. A premium was paid for cash seed and December throughout the week, probably more to strengthen position of longs than the desire for the actual seed.

Receipts here are light and shipments last week very small. New York reported no imports. The bulk of old seed from Europe has arrived, although we know of a considerable amount which will not come in until after the first of the year. Imports of new seed will probably not equal the amount of old seed that has come from Europe, although of better quality. The demoralized foreign exchange encourages imports and restricts exports.

This is true of alsike, and has prevented much large amounts of this variety leaving our country. Alsike made further gains on clover last week, and holders are reluctant to part with their seed, even though many now have excessive profits.—*Southworth & Co.*

M. A. Blair, owner of farms in the vicinity of Ojata, Grand Forks Co., N. D., a large grower of clover seed, this year shipped one car valued in excess of $12,000.

FOREIGN

The Supreme Economic Council was called to meet at Rome this week to consider the international food situation.

Fall wheat sowing in France has been carried on under favorable conditions and the area is larger than that of a year ago.

The monthly report of the British Board of Agriculture says that wheat fields this year are short but quality and conditions are everywhere good.

A newspaper forecast of the South Australian wheat crop at Nov. 15 was 15,000,000 bus., as average of 7 bus. to the acre, of which two-thirds will be available for export.

The planting season in Great Britain has been entirely unsatisfactory. The area sown to wheat, however, is about 20 per cent less than last year but that to barley and catchcrops is larger.

The new crop of soya beans is gradually appearing on the Dalney market but generally the crop in Manchuria has been very poor. In some places only 30 per cent of normal has been harvested. Beans also have been stained by rain.

Gross imports of linseed into the United Kingdom for the 10 months ending Oct. 31, 1919, was 2,488.000 qrs. against 971,000 qrs. in 1918 and 864,000 in 1917. Soya bean imports for the month of October were 3,298 tons and of cottonseed 54.878 tons.

Speaking of the Australian wheat crop and the outturn elsewhere mention of South Australia *Reuter* cables that it is believed that other states of the Commonwealth will be required to import more than the 10,000,000 surplus of South Australia next season.

General crop conditions in India are good, but rain is needed in many provinces of the Punjab where crops are already suffering from drought. The food condition has been so generally relieved that 32,000 bus. of Australian wheat were during the first week of November exported to London

WORKING OFF L. G. WHEAT.

At present our home millers in many districts are very discontented at the uneven way in which the little strong wheat arriving is being distributed. The small allocations of red wheats put out in recent weeks for London have been totally inadequate to meet the demands of the millers, and though Plate wheat can hardly be classed as strong, it is a great improvement to a grist that consists of little beyond Australian. The order issued early in November calling upon millers to "get in sufficient wheat to maintain not less than three weeks' supply regardless of whether the wheat obtainable is exactly the kind that they might most desire," goes to show that some of the sorts available are not meeting with the approval of the trade and that the Commission is having some difficulty in placing poor quality arrivals. State control and international reasons are obviously keeping some of the less desirable wheats at a price relatively above that of the better grades.—*London Grain and Seed Reporter.*

ARGENTINE ACREAGE, 1919-1920.

The Ministry of Agriculture has issued its preliminary estimate of area sown with grain in Argentina, and all that we can say is that we are very surprised that the figures are as low as officially declared. We rather think that our government is again trying to persuade foreigners that this country has less grain than generally thought, in order to influence the price upward. If this is the idea, then all that we can say is that it has lamentably failed, for the market hardly varied as a result of the publication of the figures. It is generally considered that the condition of the crops is so favorable that even a considerable reduction in area will have no appreciable effect on the exportable surplus. We have so often seen years of reduced seeding turn out well and *vice versa* that the official figures of area are not given the importance they really deserve. Nevertheless, we cannot but express our disbelief in the accuracy of the estimates, and we think that when the officials make their second calculation they will have to increase the figures, if only due to the fact that planting has been effected much later this year than ever before and that land was cultivated after the inspectors had paid their first visits.

Below we append the official figures or area sown in hectares (1 hectare = 2.47105 acres), together with last year's figures for purposes of comparison:

	Hectares—		
	Wheat.	Linseed.	Oats.
Total 1919-20	6,053,000	1,425,200	931,000
Total 1918-19	6,870,000	1,383,650	1,206,000
Change, '19-20.	—817,000	+41,550	—275,000

The decrease of cereal cultivation, per province, has been as follows (final 00 omitted):

Province.	1919-20.	1918-19.	De-crease.
Buenos Aires	3,469,6	2,680,2	789,4
Santa Fe	1,525,0	1,689,0	164,0
Cordoba	2,325,0	2,255,0	70,0
Entre Rios	810,0	670,0	140,0
Pampa	1,080.0	880,0	200.0
Others	250,0	235,0	15.0
Totals	9,459,6	8,409,2	1,050,4

—*Times of Argentina, Oct.* 20.

VANCOUVER AS A GRAIN SHIPPER.

Col. Kirkpatrick, chairman of the Harbor Board of Vancouver, recently on their way eastward to Ottawa, reported that the construction will begin, they hope, in January of a wharf 1,250 feet long, with two-story sheds of reinforced concrete equipped with up-to-date loading devices. In view of the opening of the Panama Canal the Board expect a large percentage of the wheat grown west of Moosejaw will be sent to Europe by way of Vancouver. At present it appears that about 60 per cent of the cars shipped east with Oriental goods are returned to Vancouver practically empty and therefore the belief is that a rate can be made on wheat to load these cars.

PREFERENCE TO CANADIAN PRODUCTS.

A preferential arrangement has been entered into by Canada with the British West Indies, being a resumption of the agreement of 1913 which apparently had been nullified by the war. The agreement affects exports from Canada to British Guiana, Trinidad, Tobago, Granada, Barbadoes, St. Vincent, St. Lucia, Dominica, Montserrat, Antigua, St. Kitts, Nevis and the Virgin Islands. Certain other British West Indies refused for one reason or other to enter into the arrangement, probably owing to local politics.

The principal articles on which a preferential duty is granted by the communities named are in part as follows: Agricultural implements, biscuits, bacon, bran, butter, cheese, cereals, condensed milk, flour, lard, oats. The preferential varies, running from 20 to 25 per cent.

New Zealand gives the British Empire a preference varying on different articles, but averaging about 12½ per cent. Australia gives a preference to Great Britain, but not to Canada. South Africa gives a preference of about 3 per cent to any British dominions which reciprocate.

The *Financial Post* of Canada, from which the above information is gleaned, adds: "It is likely that the United Kingdom will extend the tariff and the preference with a number of other articles in the near future and that the tendency of the future will be an extension of preferential treatment among British dominions generally."

Thus one of the chief causes, in our opinion, which led up to the great war, restrictions on trade, is deliberately continued and made the more aggravating to non-preferential peoples. The selfishness of men will never cease to manufacture causes and conditions which make warfare perpetual.

The new wheat of Tunis is said to be of excellent quality but it is all under requisition by the state. There is, however, a question as to the limit of the quantity which the government will accept, in case more than the prescribed 130,000 tons are offered. But there seems, according to American Consul Cookingham at Tunis, no doubt that as a result of the depletion of the 1918 crop and the cessation of the French government bonus of 58c per cwt. kilos on shipments to France, the Tunesian government will be forced to approve an increase in the domestic price of flour and a corresponding rise in the price of bread throughout the regency from the present low price of 12½c per kilo.

The promise of the French government to furnish brewers of France with 20,000 metric tons of barley from North Africa has caused the Consumers' League of Tunis to make a strong protest that the supply, at least in Tunis, is insufficient to allow this exportation. It is stated, however, that the 1919 crop of barley is fully adequate for domestic requirements and that some 15,000,000 metric tons of the 1918 crop, already much damaged by insect pests, are still on hand in government warehouses.

Already suffering from a shortage bread, which had extended to all s tions of the population, Madrid, Spa is now threatened with a meat shorta This has still further complicated t food troubles, to say nothing regardi the continued rise in the price of co modities. Yet it is only a few sh weeks ago that a much self-advertis American traveler told Americans th Spain would have wheat to export—fi time in history, wasn't it?

No Pressure by Argentine Corn.

Apparently there will be little serio pressure by Argentine corn in New Yo until coal and ships are plentiful. A gentine carrying costs are a great f tor. The Argentine wheat rate to L erpool has recently risen to $1.25 per and corn to 85c per bu. Apparently t wheat rate New York to Liverpool around 60c and corn 40c; specific ra are difficult to obtain.—*E. W. Wagn Chicago.*

Austria Desperate.

The needs of Europe were once m emphasized by Lloyd George's statem that America must help Austria, a that Germany had reduced her br ration in order to supply Austria w more food.—*Hulburd, Warren & Ch dler, Chicago.*

Foreign Importers, Manufacturers and Dealers

In the resumption of exports from the United States and Canada, it is desirable to be properly represented abroad for the distribution of grain, seeds, flour, millfeeds, provisions, concentrates and feedstuffs of all kinds. We suggest that correspondence be opened with the following specialists:

Wheat Still Advancing.

United Grain Growers' Associa-
Canada petitioned the Canadian
ent to raise the price of wheat
estic millers to a point which
represent an export basis. The
price to millers is $2.30, and it
l that with American import re-
is removed, Canadian wheat
e worth $3. In view of the fact
ice northern spring wheat in the
States is selling at $3.20, and that
stern interests are predicting $4
great while, the petition of the
n growers does not seem unrea-

..... 1,569,000	1,151,000	2,245,000

v. 19 wheat was quoted at $2.63
in Great Falls, Mont., which is
ave been the highest price ever
that state. This rate applied
istricts whose rate to Minneap-
6c; and yet there are farmers
e complaining all over that
that their wheat is not bringing
l price.

CORN STATISTICS FOR WEEK.

The following table showing the statistical position of cotton figured up to Saturday morning, compiled by the *Financial Chronicle*, has for several weeks been omitted from these columns because the New York Printers' strike had made its reproduction here impossible in time to give it value. We are pleased to note that our valuable contemporary is again coming out "on time":

	Nov. 28, 1919. Bales.	Nov. 21, 1919. Bales.	Nov. 29, 1918. Bales.

More Jute Landed.

Another large cargo of raw jute from Calcutta was landed at New York on Nov. 22 by the steamer *City of Hankow*, which left Calcutta on Sept. 26. The vessel also carried burlap and burlap bags. The following are some of the items of interest in its cargo, says the *Journal of Commerce:* 10,484 bales of raw jute, 666 bales jute cuttings, 2,085 bales burlap, 1,082 bales sugar bags, and 414 bales raw cotton.

Alberta farmers are wondering where they are going to get off with the official price of wheat in Canada fixed at $2.44 per bu. at Atlantic Seaboard, freight and handling being about 44c a bu.

Field Seeds

The field agent of South Dakota estimates that the average yield of alfalfa seed of that state was about 1¾ bus. per acre, and of good quality. The counties of Butte, Meade, Pennington, Hughes, Fall River and Lyman are, however, the only ones having excess of seed to enter into the commercial movement, and in these the surplus is only moderate.

Weekly Linseed Review.

NEW YORK, Dec. 1.—*United Kingdom:* After a short period of weakness, the market for linseed in the United Kingdom has turned very firm. Arrivals of seed of both Plate and Indian sorts have been rather light, and it is predicted they will continue light during the near future. A good part of the recent strength has been the result of speculative and consumptive buying on the talk of light arrivals. It is noticeable that American interests have also been buying. The sharp advance in linseed oil also had a sympathetic influence on the market for linseed.

India: Receipts of linseed at the ports have been small and shipments amount to only 72,000 bushels.

Argentina: Weather continues fine and cutting is proceeding rapidly with a substantial outturn becoming increasingly assured. The markets, generally, have been erratic with considerable speculation in evidence. However, on the whole, the undertone can be regarded as somewhat easier, but American exporters have been absorbing, and the Continent and the U. K. have also been moderate buyers.

The tonnage situation is slowly improving and it is expected clearances of seed will be maintained.

Toledo Seed Movement.

Following is a comparative statement of receipts and shipments in bags of forage grain seeds at Toledo for week ending Nov. 29:

Louisville Seed Market.

LOUISVILLE, KY., Nov. 29.—The seed market is quiet and showing very little activity. Redtop and bluegrass are in better demand than other seeds, and at stiff prices. Redtop has gone up to $20 per hundred, carlots. Bluegrass is quoted at $3.70@3.75 for 21-lb. seed per bushel, with 19-lb. seed 5c less, in carlots. Less than carlots are 5c per l higher. Orchard grass is steady at a bushel, the same being true of r thy at $12.50 a hundred. A few dealers are buying for spring, b mand is quiet.

ONION SETS.—Demand for onio is starting to come in. Stocks are rapidly depleted, and a big mov is expected in late December. F mediate shipment yellows are quo $2.75, and $2.90 future. Whites, and $4.

POTATO SEED STOCK.—Potato seed is now going into storage from th ond crop. Quality is good and heavy stocks will be put away.

Seed Trade in General.

CRAWFORDSVILLE, IND.—Trade i othy seed has been better durin past ten days than previously. movement has been quite satisf and there is a tendency toward values. Country offerings are n numerous as a while ago.

Evidently the trade is holding f the purchase of red clover. It a that the new crop in the Central

own its largest movement and rings are light just now. Prices mo hold with fair firmness with large range in fluctuation. Forferings are made to somewhat ce advantage at this time on acn of the difference in exchange. e domestic clover shows up in at abundance than heretofore a d eal of reliance will have to be e on import stocks now of unw quantity.—*Crabbs, Reynolds, ic Co.*

Milwaukee Seed Movement.

o ment of seeds at Milwaukee durvek ending Nov. 29, 1919, reported PCE CURRENT-GRAIN REPORTER by A. Plumb, secretary of the Chamber 'c merce:

	Receipts— 1919.	1918.	Shipments— 1919.	1918
ot', lbs.		2,725	63,942	170,100
e| lbs....	163,007	88,713	112,363	140,897

Argentine Linseed.

highly probable that if the th clerk continues in an amiable d ntil harvest time, Argentina will e n exportable surplus of more ne million tons of linseed. Natly this is the great speculative pe- the year and we must expect e apid changes on the futures mar-. The slightest hint of damage or nst untruthful report has a great t. It may be said that the market l like a cat on hot bricks for at least six weeks to come, and the careful operator will be completely out of it. We should like to draw special attention to the linseed shipments which have now passed 700,000 tons. When we contended that there was 800,000 tons of new and old linseed in the country (this was at the beginning of the present year) open derision was showered upon us, and throughout the early months of the year it certainly seemed that we were somewhat off the mark. We are very glad now that we stuck to our guns and had confidence in our sources of information, for it is highly probable that the amount we cited will have been shipped by the close of the year.—*Times of Argentina, Oct. 20.*

Duluth Flaxseed Market.

DULUTH, Nov. 29.—Interest of traders in the flaxseed market was revived during the last week as a result of the lifting of restrictions against operations in futures. Notice was served that trades would be cleared as usual but that the clearing house reserved the right to place limits on at any time, should market conditions appear to warrant it.

The direct result of the resumption of open trading on Wednesday was a precipitate advance of 41 cents in the November future, and gains of 29 and 19 cents in December and May respectively. New trades in May in which any No. 1 flax, wherever grown, including from Argentina, is deliverable on contracts, started in at $4.68.

Good progress was reported in the closing out of the old trades in which the recent congestion arose. The representative of one house in fact asserted at the end of the week that its slate in the futures came closer to being rubbed out than in a period of eleven years. Headway in cleaning up old trades was reported by other operators. The cash market was strong, running up to $5.10 on Wednesday, but easing off 6 cents on Friday, and closing on Saturday at $5. Reports were received to the effect that a considerable tonnage of flaxseed remains to be marketed in some parts of the Northwest, and that substantial tonnages would be moving forward from country elevators were it not for the difficulty being experienced in obtaining cars for the traffic. Flax is reported to be still uncut in wide areas in part of the Canadian Northwest on account of the early snowfalls. The cutting and threshing of that seed will now have to wait over until the spring and the condition in which it will eventually come to the markets will depend on weather conditions. It is remembered by specialists that much of the seed brought to the elevators a few years ago when farmers were caught in a similar way in the fall, was damp and was heavily penalized on that account.

Receipts were a mere bagatelle during the week, amounting to 15,932 bus., as compared with 268,134 bus. during the same period last year. Stocks in the elevators at the end of the week aggregated 51,000 bus.

Closing prices of flaxseed on the Duluth market on Saturday as compared with the previous Saturday and the same period last year were:

	Saturday.	Week ago.	Year ago.
On track	$5.00	$4.77-95	$3 54½
To arrive	4.95	4.76	3.51½
November	5.15	4.75	3.54
December (old) ...	4.85	4.66	3.50½
December (new) ..	4.82	....	....
May (old)	4.76	4.51	3.50
May (new)	4.75	....	....

Marquis wheat, according to the *Nor'-West Farmer*, seems to be losing some of its popularity in some parts of southern Manitoba and Saskatchewan, being replaced in part at least with Durum which withstands rust better than the Marquis and gives a larger yield. During the past year one farmer in southern Manitoba reports that Marquis and Durum in adjoining fields showed marked differences, Marquis yielding 8 bus. of badly shrunken grain, owing to rust, while Durum yielded 38 bus. first-class grain, absolutely unaffected by rust. Other farmers report the same experience.

Evansville Seed Market.

EVANSVILLE, IND., Dec. 1.—The Evansville market was fairly active last week, and dealers continue to book nice orders for January shipment of clover, timothy, alsike and alfalfa. The trade on alsike the past week was larger than anticipated and inquiries have been very brisk.

Red top inquiries still continue very brisk and this seed is moving rapidly at higher prices than ruled a week ago.

There are active inquiries for cowpeas and soy beans, and the trade find no trouble in marketing either commodity at a fair price.

There seems to be somewhat more clover shortage in the Central States than looked for sixty days ago. There

have been brisk inquiries for high grades from the producing sections, and the local trade believe that a large acreage will be put into red clover the coming spring.

WINTER WHEAT CONDITION.

About half the usual amount of winter wheat was seeded locally, as the inclement weather prevented the farmers from getting into the fields when they should have. What winter wheat was seeded is in nice shape to carry through the winter, and it is believed there will be an urgent demand for seed wheat in this territory in the spring.

There has been a more urgent demand for timothy the past week than at any time in the past sixty days, and the trade look for a large acreage being put in in the spring.

There is also a good European inquiry for timothy, clover, alsike and bluegrass, and considerable seed is going abroad from Evansville.

Chicago Seed Market.

The timothy market was unchanged from that of previous week, steady prices ruling the entire week. Clover market ruled firm throughout the week and still further gains were recorded on the week's trading. Quotations follow for timothy and clover, cash and the futures:

	Year.		March.	
Timothy—	B.	A.	B.	A.
Nov. 24	$12.20	$12.75	$12.70	$12.90
Nov. 25	12.20	12.75	12.70	12.85
Nov. 26	12.20	12.75	12.70	.....
Nov. 28	.....	12.70	12.50	12.85
Nov. 29	.....	12.80	12.60	12.90

Cash seed range for week, $10.75@11.30.

Country lots—Poor to fancy, $8.50@11.50; fair to good, $10@11; choice, $11.25.

Clover, contract prime—

Nov. 24	$50.30	Nov. 28	$50.90
Nov. 25	50.60	Nov. 29	51.00
Nov. 26	51.00		

Clover, country lots—

	Poor to choice.	Fair to good.
Nov. 24	$30.00@48.00	$43.00@46.00
Nov. 25	30.00@48.00	43.00@46.00
Nov. 26	30.00@48.00	43.00@46.00
Nov. 28	30.00@48 00	43 00@46.00
Nov. 29	30.00@48.00	43.00@46.00

Sales of cash clover seed, $43@47.

Other seeds — Buckwheat, $2.60@2.80; Hungarian millet, $2.75@3.15.

SEED SITUATION.

NO SEED RAISED.

NORTH BALTIMORE, OHIO (1).—No seed raised here worth speaking of.—*Fred Kalmbach.*

Seed Market Review.

CARL BRYANT, CORRESPONDENT.

TOLEDO, Nov. 29.—Market ruled quiet the past week with a firm undertone. Short interest in December, while small and mostly hedges by interior and seaboard dealers, has cause for worry in continued lack of offerings from the country. Cash seed demanded premium this week over December, making the latter hard to buy. Market was up 40@60c at one time during the week from last Saturday, closing the week with gain of 45c for cash, 50c for December, 20c for January and February and 30c for March. Europe is getting close to rock bottom on its old seed, and while there is still some to come out indications are that they will not increase our stocks to any great extent. Imports at New York this week were none, as against only 650 bags last week. The season's total imports are 20,000 bags as compared with usual annual importation of 100,000 bags. Crop news continues to bear out early bad reports. Canada says there is so little red clover there that it will be sold in the interior and never see the market. Only a small amount of alsike remains in farmers' hands in Canada and it is taking highest prices of the season to bring it out. Our small clover reserves are not being added to. Toledo receipts this week were 164 bags, adding only 65 bags to stocks here which are now about 8,700 bags.

Some export demand now would work wonders for timothy bulls who have hung on patiently in face of liberal stocks and a featureless market. Advance this week is 12½@17½c over last Saturday. Considerable switching by longs from December to March at 20c up. We hear of 500 bags being exported during the week to Copenhagen. The week's receipts here only 257 bags against nothing shipped out. Toledo stocks are figured about 97,000 bags.

Seed Season

Will Soon Be Here

Small's brands are fast being recognized as dependable, and this is your strongest argument with Mr. Farmer whose business you expect from year to year.

S ll him Small's seeds and he is your customer forever.

Put up in bushel bags making a hit with the farmer.

Small's seeds are properly bought, cleaned, graded and bagged in convenient lot

EVANSVILLE, INDIANA

"THE CENTER OF THE SEED TRADE OF THE UNITED STATES"

WE SELL TO DEALERS ONLY

Kansas City Seed Market.

KANSAS CITY, Nov. 29.—Everything in the line of seeds is strong, with inward movement light, but dealers are hopeful for better offerings of millet, cane and Sudan grass seed during the coming month. Only the weather, coal and railroad strike situations stand in the way of marketing. Thus far only a car or two of orange cane seed has been shipped to Kansas City. Not much threshing has been done. In millet the offerings have been limited, with the hog variety mainly in evidence and taken for poultry feed. Dealers say the small crop of alfalfa seed is practically all bought up. Demand is sharp and imports may again be necessary, as they were last spring. There is a good demand for clover seed at stiff prices, with nothing offered. Production in Western Missouri and Eastern Kansas, Nebraska and Oklahoma was light. Seed grown in Iowa is not coming here. Timothy seed stocks are liberal, but offerings have decreased and the market is firmer. Supplies of blue grass seed from the last crop were large, but dealers have sold freely and no burdensome stock remains. Farmers parted with their holdings some ago.

Following are prices paid for c of seeds in Kansas City, based c lbs., sacked:

Alfalfa—Per cwt., $25@35.

Timothy—Per cwt., $9@10.25.

Blue grass—Per cwt., cleaned, $2

Clover—Per cwt., $35@45.

Millet—Per cwt., German, $3@3.; berian, $2@2.50; common, $2@2.2

Sudan—Per cwt., $9@11.

Cane—Per cwt., red top, $2.50; o $2@2.25; amber, $1.75@2.

Don't let your subscription lapse may lose valuable numbers.

eans and Potatoes

Lima Bean Pool, known as the rnia Bean Growers' Ass'n, is still eration, and has during the past received considerable additions to embership.

a bean holdings, as reported from d by the Southern Pacific Milling this year about half as large as at me time a year ago. There has, ver, been very little movement of recently, with the exception of going to the Growers' Ass'n. Fig- reported by the authority named 39,110 sacks this year, as against 3 sacks a year ago and 432,590 two years ago. The largest hold- are in the Camarillo warehouse, bags. The next largest in Somis, bags. The movement during the was reported as follows:

	Received.	Shipped.
.....	92,268	63,102
whites	3,277	4,132
whites	136,076	30,027
.....	17,161	6,085
eyes	2,826	7,658
aneous	19,634	7,276

BEAN SITUATION.

ACREAGE SMALLER.

ND LEDGE, MICH. (5).—As regards in this locality, will say that the e was much smaller than usual ield light to normal, probably an e 50 per cent yield per acre and 75 per cent acreage. Quality of was from poor to good, generally good. They have been moving a normal speed we judge. There- ere are not very heavy holdings in rritory.—*N. H. Holt & Co.*

New York Oats Market.

There has been no increase in arrivals of oats for domestic use, the bulk of them (444,000 bus.), as heretofore, being for later shipment abroad. Reported sales for export are believed to have been mainly for account of those having previously sold clipped oats of heavy test, and were unable to fulfill their contracts as originally planned. The scarcity of heavy oats will, doubtless, greatly restrict future sales of them for export, and it is believed that exporters will have to base their contracts on a much lighter test.

New business in volume was retarded by reason of the continued low rate of foreign exchange, which is the most important factor in the situation at this time. A better feeling existed in the city spot market where dealers have found it to advantage to replenish supplies rather than to undergo the uncertainties of rail transportation while the coal strike remains unsettled. A larger business resulted at somewhat increased premiums and they should be maintained in the immediate future as offerings are not pressing and holders do not see the necessity of making more than fractional concessions just now.—*L. W. Forbell & Co., New York.*

CORN EXPORTS.

Corn developed last week a distinctly better tone, with prices advancing under a good general commission house demand based on the fundamentally strong position of the article.

The important development of the week has been undoubtedly the European inquiry for our corn. While the aggregate sales made may not be of extraordinarily large proportions, the fact remains, nevertheless, that the rise in Argentine freight rates permits the shipping of American corn to Liverpool at a lower basis than Argentine corn. The export demand for American corn has seldom, if ever, been a dominating feature in our market. Prices in the past years have been regulated almost solely by the domestic supply and demand situation and foreign influences were mostly of only temporary importance. The possibility, however, exists that this season may bring a change in this respect; at least it is worthy of consideration. While the war is over, its influences are still with us, and in view of the large cereal shortage in important consuming countries, the demand from exporting countries must necessarily be larger.

These conditions have put a different aspect on the grain situation and it certainly encourages the belief that corn exports this season will have an important bearing on prices. The European demand is apparently urgent, as exports of American merchandise continue above the pre-war average, despite unfavorable exchange rates.—*Simons, Day & Co., Chicago.*

A snowfall of 15 inches was reported in Montana late in October which was equal to about half of all the snow which fell last winter. The people of Montana, therefore, anticipate a wonderful agricultural prosperity next season.

A seed dealer at Paris, France, writes C. A. King & Co. that the market there for red clover has declined somewhat, owing to small American orders, and this in spite of the fact that exchange is in the American's favor. However, the French crop is very small and other European countries are buying the surplus quite rapidly.

Feedstuffs

T. D. Hammond has entered the feed business at Hawk Point, Mo.

The Champion Feed Milling Co. intends to build a $150,000 factory in Clinton, Iowa.

The Empire State Alfalfa Mills at Munnsville, N. Y., have installed new alfalfa grinding machinery.

D. A. Miller of Mountain Home, Ark., has built an addition to his mill and will go into the flour and feed business.

At a meeting of the directors of the Butler County Feed & Milling Co., Greenville, Ala., L. J. Beeland was elected secretary, treasurer and general manager.

The Smith Flour & Feed Co. has leased a building in Springfield, Mo., and will remodel it. The company intends to incorporate in the near future with a capital stock of $10,000.

The Larrowe Milling Co. of Detroit, Mich., will build a $500,000 feed plant at Rossford, O., and work will be started at once on the warehouses, 85x400 feet, 85x320 feet and 85x100 feet in size.

The Central Feed & Milling Co. of Memphis, Tenn., has been incorporated with a capital stock of $25,000. Incorporators: F. B. Fuller, J. R. Tilbert, H. H. Cardall and R. B. Henderson.

The Riley Feed Mfg. Co. of Pine Bluff, Ark., has purchased a warehouse and four blocks of ground in the western part of the city from J. M. Cook, of Kansas City. Consideration was $35,000.

The Bristol Milling Co. incorporated some time ago at Bristol, Va., has acquired a plant which is being added to, making it a flour, meal and feed manufacturing establishment with a daily capacity of 50 bbls.

The Opsal-Fleming Co. has entered the millfeed jobbing business at Minneapolis, Minn. The firm is composed of Rudolph Opsal, formerly with the St. Paul Milling Co., and Robt. Fleming, son of H. F. Fleming, president of the St. Paul Milling Co.

The Squibb-Carter-Squibb Feed Mfg. Co. of Lawrenceburg, Ind., has merged its business with the Eikenberry-Fitzgerald Feed Co. of Cincinnati, Ohio. The former will manufacture feeds, while the Cincinnati end of the company will market the product.

Articles of incorporation with a capital stock of $100,000 have been filed by the Paragon Mills Co., of Springfield, Mo. The company is remodeling a building and installing new machinery and will manufacture mixed feeds for animals. A. D. Allen of Springfield and W. E. Widmer of Kansas City are in active charge of the work.

There is no fixed price on blackstrap feeding molasses so widely used by stock feed manufacturers. It is bought in tank cars for 8c per gallon, f.o.b. New Orleans or Mobile. The source of supply and the demand for blackstrap justifies this 8c price, which obtains in practically all sales contracts mutually satisfactory to importer, dealer and feed manufacturer.

FEED SITUATION.

In the country in general, omitting the few sections affected by the summer drought, there is an abundance of roughage, but other feeds are high, especially the protein feeds. Dealers who are studying the situation in order to serve their patrons best will now seek the feeds which offer the most protein for the money. This is the greatest problem of the trade.

The yards have lately been crowded with cattle not by any means ready for market, but these have come from the droughty districts and are sold below their value if they could have been properly finished. There should be good money in that kind of cattle, sent back to the well stocked farms.

Milk continues high and in good demand by both domestic users and by condensers for export.

Rice Bran Stronger.

The market for rice bran was strengthened considerably last week. Most of the mills are now well provided with orders and have advanced, therefore, their prices. On an average they are now asking $34@36 per ton, sacks included, f.o.b. mill for rice bran guaranteed to analyze 24 per cent protein and fat, or better.

Cottonseed.

During the rainy season in the South cottonseed mills and crushers held back a certain percentage of their offers and the active purchase of buyers, coupled with the short cotton crop, steadily built up stronger markets. Now the reverse applies, with but slight interest shown by buyers and free offers from the mills. The large buyers among feed manufacturers and fertilizer interests are well filled up, buying down on the decline, small as it was in the past several weeks. Arkansas prices, for instance, range from $71.50, which was the top, to $70 about the present market.

Country purchases of cottonseed products are slow, due to the continued open weather, but with cold spells due now we may expect a larger number of small purchases for country feeders.

This cottonseed situation, to which THE PRICE CURRENT-GRAIN REPORTER has devoted considerable space, reminding our readers of the short crop and the unquestioned maintenance of high values, has had many important side issues. Those who expected sharp declines have been disappointed in spite of the decidedly logey conditions as above suggested. Just now Texas feeders are showing some activity, indicative of the way the wind blows, and the real effect of wide-spread purchases from feeders elsewhere that will certainly be realized soon.

Meadows, Pastures and Stock.

The weather was favorable for meadows, pastures and ranges during the week of Nov. 25, except in California and in some Southeastern areas where drought conditions prevailed. The warmer weather melted snow rapidly in the Northern range states and considerable grazing of stock was possible. Snow again covered the fields, however, at the close of the week in Montar North Dakota, although not to a depth. Ranges were mostly free snow in the central Rocky Mounta gion. This lack of snow was un able, however, in Utah, because need of water for sheep and other Stock were reported in good con or improving, except in Calif where it was too dry, and in som tral and upper Rocky Mountai Great Plains States, where the pr conditions have been very unfav —*National Weather and Crop Bu*

Protein Feeds Strong.

The shortage of flaxseed and fair country demand balances the ket nicely, firming it up in spite exceedingly dull feed business by open fall weather and other f continually presented in THE PRIC RENT-GRAIN REPORTER. It is our ion that protein feeds and materi all kinds will maintain the presen range of prices, not being solely erned by production details; for v ognize the decidedly bullish effe

al shortage, the lamentably worn- ndition of our railroads, etc. We ather expected, as we have read wspapers from day to day, that reign exchange situation would t even normal foreign purchases. he way or other, however, as is abit when merchants are left to wn devices, those supplies needed uch as concentrates for stock have been worked abroad and doubtedly strong demand for aterials there supports our belief on domestic advices, that the s will be exceedingly valuable the entire winter.

Feed Men Protest.

esentatives of practically all of in and feed jobbers, brokers and at Lynchburg, Va., recently filed st at Richmond before the Fed- reight Commission against the ced increase in rates on grain ain products amounting to sub- lly $1 per ton by the Southern y. The committee selected came e firms of T. A. Jennings & Son, aylor Co. and the Piedmont Mills Lynchburg Milling Co.

THE FEED MARKETS.

MONTREAL.

eal, Nov. 28.—The market is quiet es are irregular, owing to some in prices by Western mills, sales been made of carlots of bran at 0, and shorts at $48@49 per ton g bags on track. Millers here quote bran, and $52 for shorts. Dairy $56 per ton. Pure barley meal is t $65@66.—Trade Bulletin.

CLEVELAND, O.

vand, Nov. 29.—The feed market has no unusual activity in price, al- n some instances it is some $1@1.50 an a week ago. The following ill prevail today: Flour middlings, standard middlings, $47; winter 4.50; spring bran, $34.50; mixed ; hominy, $61; oil meal, $81; 36% ed meal, $78; gluten, $68.68; hog 5.68.

BALTIMORE.

ore, Nov. 29.—The spot feed mar- eady as quoted, with a fair demand ed bran and middlings and first- fferings of feed not burdensome. ns follow: Western spring bran, 100-lb. sacks, $44.50@45; Western s, per ton, 100-lb. sacks, $47.50@ mills' winter wheat bran, per ton, acks, $48@50; brown middlings, per lb. sacks, $52; white middlings, per b. sacks, $62.

CINCINNATI.

nati, Nov. 29.—Prices for feeds dy to firm during the week with from dairymen especially active. d middlings also sold better, but s were somewhat neglected owing reater use of new corn. Principal s, representing 100-lb. sacks, rd bran, $42.50@43; soft bran, $43 xed feed, soft, $47@47.50; mixed d, $46.50@47; brown shorts, $48@ ey middlings, $52.50@53; standard dlings, $48@48.50; hominy feed, 0 lbs., $59@60.

LOUISVILLE, KY.

ille, Ky., Nov. 29.—There is a big or sweet and manufactured feeds, e moving more freely than mill Mill feed is also in good demand, being good and no shortages re- s mills are running full on an ex- lour demand. Flour is firmer, dvanced 25c a bbl. on short pat- 50c a bbl. on low grades, the w being $11.50 short, $11@11.25 .25@10.50 low grade.
s quoted: Bran, $43@45 a ton; d, $48@55 a ton; brown middlings, , $54@60; hominy feed meal, $60@ d, cotton, carlots, Louisville, 100-

NEW YORK.

ork, Nov. 29.—Mill feed in New s very inactive during the week nsequence the tone of the mar- ket was easier. Offers of bran were not particularly large but middlings were in good supply and red dog flour experienced a drop of $6 per ton.

Mills are anxious to make sales, and while they were slow about reducing their prices, it was evident that they would make concessions in order to do business. City bran was quoted at $45; middlings, $54, and red dog, $69, while Western bran ruled at $44; middlings, $47, and red dog, $68.

MILWAUKEE.

Milwaukee, Wis., Nov. 29.—The local mill feed market remains rather unsettled and business is of a spotted nature. Buyers are rather reluctant about taking hold at this time, due possibly to the belief that production of flour will be smaller and bring about a more steady mill feed situation. During the week bran has shown a firmer tone and prices are up 50c, while middlings are reported as easier and $1 lower on inside prices. Red dog is quoted at $4 and hominy feed $1 lower than last week. Current quotations are:

Bran, per ton, $40.50@41; standard middlings, $42@43; flour middlings, $49@51; red dog, $59@60; hominy feed, $60; rye feed, $42@43; old-process oilmeal, $76.50@77.50; cottonseed meal, $76@83; brewers' dried grains, $66; gluten feed, $66, all in 100-lb. sacks.

NEW ORLEANS, LA.

New Orleans, La., Nov. 29.—Recent sales of bran have been made at $2.10 per hundred; shorts offered freely at $2.60, with no sales. The demand for bran is very limited.

MEMPHIS.

Memphis, Nov. 29.—Quietude prevails in the feed market and buyers are taking as little as they can get by with. Changes in price have been slight, especially in mill feeds. For cash wheat bran $40.75 was asked on call, while $53.50 was asked for gray shorts. In cottonseed meal there has been very little activity for several days. Prices have weakened a little, one reason being the reduced demand. Continued damage to seed has lessened the prospective supply of good meal, and a considerable part of that yet to be turned out will go for fertilizer purposes. Some of the mills have been having fuel troubles, but most of them here are now equipped with crude oil burners.

DULUTH.

Duluth, Nov. 29.—Though demand from points in this territory showed improvement and shipments were in better volume, the market in feeds was easier during the last week. Bran is off 75c; shorts, $1.75; red dog, $2.25, and Boston mixed, $4.25. Quotations per ton are unchanged in other lines as follows: Bran, $38.75; ground oats, $48.25; No. 1 ground feed, $52.50; No. 2, $51.50; No. 3, $50.50; shorts, $42.75; flour middlings, $55; coarse corn meal, $55; red dog, $61.75; Boston mixed, $46; cracked corn, $55; rye feed, $37.75.

PHILADELPHIA.

Philadelphia, Nov. 29.—Offerings of feedstuffs are only moderate but the demand is light and the market closes dull with few changes to note in prices. Quotations are for carlots, in 100-lb. sacks, to arrive, at cost, per ton: Winter bran, $43.50@44.50; spring bran, $43.50@44.50; standard wheat middlings, $47@48; flour middlings, $55@56; red dog, $64@65; shorts, $47@48; low grade flour, $64@65; rye middlings, $48@49; fine yellow hominy, $62@63; fine white hominy, $63@64; reground oats feed, $28.50@29; cottonseed meal, 36% protein, $79@80; cottonseed meal, 41% protein, $84@85; cottonseed feed, 20% protein, $63@64.

DES MOINES, IA.

Des Moines, Ia., Nov. 30.—Bran, per ton, $39.50; shorts, $48; low grade, $63; oilmeal, $78; cottonseed, $79; tankage, $100.

Markets steady on all feeds for the past week except wheat feeds which are selling $2 to $3 per ton lower.

BOSTON.

Boston, Nov. 29.—Market on wheat feeds remain quiet. Middlings, red dog and oat hulls are quoted higher than last week, with the rest of the wheat feeds about unchanged. Prices are as follows: Bran, spring, sacked, $45; bran, winter, sacked, $45; middlings, sacked, $49@54; mixed feed, sacked, $50@55; gluten feed, sacked, $72.12; red dog, sacked, $65; second clear, sacked, $68; stock feed, sacked, $61.50; oat hulls, reground, sacked, $29; hominy feed, sacked, not quoted; cottonseed meal, sacked, $79@82. Receipts for the week ending Nov. 29 were none.

ST. LOUIS.

St. Louis, Mo., Nov. 29—The feed market is dull and stagnant, with offerings moderate, but buyers indifferent. Corn feeds are in the best demand, but sales are restricted by the scarcity of offerings. Quotations are as follows: Bran, hard, $40; soft, $41; mixed feed, $44@45; middlings, brown, $47; gray, $49@50; red dog, $62@63; white hominy feed, $60@62; oat feed, $26@27; barley feed, $55; whole ground, $59@60; alfalfa meal, No. 1, $38.50@40.00; No. 2, $35.00@35.50 per ton, in 100-lb. sacks.

TOLEDO.

Toledo, Nov. 29—Cold weather has brought an increased demand for bran and middlings. Prices about unchanged from last week. Bran, $38.50@40.00, bulk; middlings, $50.00@52.00, bulk, per ton, f. o. b. Toledo. Bag prices, $5 higher. Demand for manufactured feeds just fair. Oats scarce and are wanted by feed millers. Prices steady. Scratch feed, best grades, $65.50@67.50; corn and oats chop, $57.50; cracked yellow corn, $62; dairy feed, $66 per ton, car lots, f. o. b. Toledo.

Sec'y Mayes of the Missouri State Board of Agriculture is starting a propaganda to have road sides in that state planted to alfalfa.

Small Demand for Cottonseed Feed.

KANSAS CITY, Nov. 29.—Buying of cottonseed cake and meal in Kansas City territory was quiet on the whole this week. Apparently feeders have accumulated a sufficient stock of meal or cake to carry them through a considerable period during the winter months, though they are feeding the high protein concentrates in small volume. Meal of 43 per cent protein was quoted around $78.50 at the close of the week, practically the same as a week ago. High protein feed is scarce, mills being active in grinding the off-grade seed.

FEED UNIT SYSTEM.

Corn silage does not have a quoted market value and it is, therefore, difficult to put an estimate upon it. Last season we figured that first quality silage was worth up to $7 or $8 per ton. With the present prices of feeds we believe, however, that prime corn silage, considering the cost of concentrates, may be well worth $10 per ton.

For dairy cattle oat and wheat hay have a very much lower feeding value than alfalfa. The chemical analyses of these hays does not indicate this but feeding experiments have definitely shown alfalfa to have an extraordinary value in milk production. If alfalfa can be purchased at $25 our inquirer cannot afford to force cows to consume large quantities of oat and wheat hay. We suggest feeding alfalfa as liberally as it will be consumed without waste, and that if oat and wheat hay are on hand it may be fed also but not to form a large part of the roughage supply. Considering the high cost of concentrates which it would be necessary to use to make up the difference between the proteins in these three hays, we believe there is easily a difference of $8 to $10 per ton in their value.

The feed unit system of F. W. Woll is the system of feed equivalents which has been used to quite an extent in Denmark, and other Scandinavian countries, largely in cow testing associations in measuring the relative production economy of cows.

The feed unit is represented by one pound of standard grain feed, such as corn or barley. All feedstuffs are calculated on this basis in figuring the feed consumption of an animal.

For example, a table which has been calculated for Wisconsin conditions counts that corn, wheat, rye, barley, hominy feed, and the dry matter in roots have about the same value for the dairy cow, one pound equaling one feed unit. On such a basis it requires about 1.1 pounds of wheat bran or oats and 1.5 to 3 pounds of alfalfa or clover hay to equal one unit. Some feeds, such as cottonseed meal, oil meal, and soy bean meal, are rated at a higher value than the same weight of wheat, corn or barley so that in calculating the relation to the unit adopted it is found that it takes less than one pound of these concentrates for a feed unit.

Some of the values which have been assigned are as follows: Corn, wheat, etc., 1 pound, being the equivalent of one unit; cottonseed meal, .8 of a pound; oil meal, .9 of a pound; wheat bran, oats, dried beet pulp, 1.1 pounds; alfalfa meal, 1.2 pounds; alfalfa hay, 2 pounds; timothy hay, 3 pounds, corn stover and marsh hay, 4 pounds; green alfalfa, 7 pounds; carrots, 8 pounds; and sugar beet leaves and tops, 12 pounds.

There has not been an extensive use of this feeding system in this country. It would be of considerable value in comparing the relative production of cows in cow testing associations in various sections of the country. One of the factors which operate to make it somewhat less valuable than would be desired in the variation in the value of feedstuffs in various localities and from year to year.—*Hoard's Dairyman.*

St. Louis Seed Market.

ST. LOUIS, Mo., Nov. 29.—The seed market is quiet, but steady, with spot offerings light, but considerable offered to arrive. Clover seed and sunflower seed are in the best demand. Quotations are as follows: Clover, choice, high-grade, free of buckhorn, $45@49; average country lots, $36@42; buckhorn-mixed, $23@40; poor and trashy, $5@18 per 100 lbs.; millet, golden, $2.75@3.25; Siberian, $2.50@2.75; hog millet, $2.80@2.85; common millet, $2.80 per 100 lbs., bulk basis; sunflower seed, $9.25@10.50 per 100 lbs.; popcorn, white rice, on the cob, $3@4.75 per 100 lbs.; shelled, $4.50@7; yellow, on the cob, $2@2.50; shelled, $3.75@4.50; buckwheat, $3@3.25 per 100 lbs.; stock peas, whippoorwills, $5.50@5.75 per 100 lbs.; alsike, high grade, $40@46; fair to choice, $35@40; low grade, $18@33 per 100 lbs.; timothy, choice, clean seed, $11@11.25; average country lots, $10@10.75; low grade, $5.50@9.50; alfalfa, according to quality, from $37.50 down to $20; redtop, fancy, solid seed, $16.50@17.50; machine-cleaned, $12.50@16; poor and chaffy, $7@11 per 100 lbs.

Feeder Demand Changed Locus.

The demand from Missouri stock feeders for the corn, which Illinois had last year, is not now nor will it be in evidence to any extent on this crop, but never in the writer's experience has there been such an insistent and continuous call from southern Illinois, Kentucky and Tennessee as exists today, from feeders in those states.—*H. I. Baldwin & Co., Decatur.*

Chicago Grain Stocks.

Wheat stocks in all positions in Chicago decreased 1,624,000 bus. last week, oats 363,000 bus. and rye 6,000 bus. Corn increased 79,000 bus. and barley 19,000 bus. Details follow (last three ciphers omitted, except in total):

	Public.	Private.	Total.	Last year.
Wheat ..	5,965	11,240	17,205,000	15,562,000
Corn ...	97	369	466,000	760,000

ner Tone in Alfalfa Meal.

s CITY, Nov. 29.—Slight im- t in the demand for alfalfa eloped in Kansas City this th prices showing an advance 1.50 a ton. Mill offerings, both d from the West, were light, rs advanced bids in order to pplies. Buying was of a gen- acter, purchases being made by n the East, North, Northeast, utheast and Central States. The still is buying rather sparingly. mperatures and storms aided et to a considerable extent.

for alfalfa meal, in carlots, per ton, closed as follows: 40.50@42.50; No. 1, $37.50@39; .50@34.50; brown, $31@32.50.

weather in surrounding terri- ulated interest in the alfalfa d market. Sales, while not of volume, were fairly liberal in Kansas, Iowa, Illinois, Arkan- Oklahoma. Interior retail deal- ccumulating supplies of alfalfa feed for winter needs. Talk of l strike was another factor in ved trade, handlers desiring to pplies before a possible rail tie- s were unchanged, as follows: lasses feed, $40@42; No. 2, $37 wn, $35@37; alfalfa grain mo- d, $42@52.

siness by Permission.

ansas City Chamber of Com- sents a forceful protest against n of the Kenyon-Kendrick hen it says: "However will- ay have been to invest our ad- ive authorities with extraordi- plenary powers to meet the s of war, we are resolutely op- any continuation or extension in times of peace; and we are o any legislation which makes to enter into or continue in depend on the consent of a per- fficial, a department of the Gov- or a bureau." The leading or- ns of stockmen and farmers haxe expressed their views on the Ken- yon and Kendrick bills, which propose to do that which the above resolution denounces. The National Grange is a notable exception, it says nothing either way. Why doesn't the Grange's legis- lative committee, which speaks for it at Washington, get off the fence and let the public know where it stands on this legislation? A clean-cut statement one way or the other would be more credit- able to the Grange than either a strad- dle or continued silence.—*National Stockman and Farmer.*

SHIPPERS AND OVERDRAFTS.

We heard a man say the other day—a man who has been in the commission business at Milwaukee for a great many years: "Why should not a shipper feel obligated to send checks for overdrafts, inasmuch as he expects them for bal- ances with account sales?"

Further conversation brought out the fact that receivers have more or less trouble on that very point—some of them more and some of them less, but in the aggregate, complaints of this abuse amount to a considerable number. On the other hand, there are many re- ceivers who have no trouble whatever along this line, or at least are bothered very little by laxity of this sort on the part of their shippers.

The question then occurred to us, "Why should there be any complaint of this nature at all?" Of course, there are bound to be scattered cases of neglect, but there surely can be no good reason for their being common enough to cause open complaint of it.

As a matter of fact, why should not a shipper remit promptly in case of an overdraft? If the shipper is doing busi- ness with a receiver who makes his re- turns without unnecessary delay, why isn't it perfectly fair and reasonable for the receiver to expect him to make good at once when he has drawn too heavily against a car of grain? It takes a lot of money to keep a receiving business afloat in these days of high prices and the man who is shouldering the respon- sibility of carrying on a large commis- sion trade has enough to think of in providing sufficient funds to enable him to meet drafts that represent a fair ad- vance on the value of the goods, with- out laying himself open for an indefi- nite period to overdrafts that may often run into large sums of money in the aggregate.

We do not know just how common this abuse is. We hope there is not much of it, and that the gentleman whose remark started us out along this train of thought is but one of a small number who are thus unjustly annoyed. —*Doings in Grain at Milwaukee.*

Hog Prices Depend on Demand.

There are enough hogs to keep the market depressed. We have no doubt that hogs will sell down to our former prediction of 11c a lb. some day this winter. This, of course, depends upon Europe not being able to get financial assistance to supply her needs. At the present time the prospects do not seem bright for any immediate assistance. We have no doubt that time will bring assistance to Europe. When that time arrives, we will probably readjust our views on the hog and hog product situ- ation. Our views will be governed by the amount of product they are able to buy.—*W. G. Press & Co., Chicago.*

Feeder Lambs Scarce.

Our latest advices from Colorado and the north Platte country indicate that that district will feed even fewer lambs than anticipated a few weeks ago, for the reason they are unable to get the lambs. The big demand for all classes of sheep and lambs for Texas had cleaned up Montana, Wyoming and Col- orado, and there is in our opinion fewer feeders for sale in the West than has ever been known at this particular time of the year.—*Knollin Sheep Com'n Co.*

Amarillo, Tex., reports a new record for a single day's receipts of sheep in that market, 30,000 having been received on a single day in November. Of these 12,000 were en route to Kansas pens and 18,000 to Texas. The sheep orig- inated in New Mexico and also in part in Wyoming.

Hay Department

Hitchcock County, Neb., reports a good crop of hay with plenty of feed for cattle.

Toberman, Mackey & Co. report that clover hay in that market seems to be in strongest demand and is badly wanted at St. Louis.

The wholesale grain and hay firm of Marks & Anderson of Covington, Tenn., has been sold to the Owen & Moore Grain Co. of Memphis.

A stock feeder from Collins, Neb., in the Sand Hills country, says there is a large stock of hay on hand and more corn than usual with cattle in the best of condition.

A local newspaper at Big Piney, Wyo., reports heavy snow on the mountains and a short crop of hay so that stock men are feeling rather gloomy over the local situation.

Cattle shippers from DeKalb County, Ind., report the bulk of marketable hay in that county as already shipped and farmers are very indifferent about moving out stock still on hand.

A stock shipper from Albion, Neb., says there is plenty of hay and other feeds in that neighborhood but that cattle feeding will be confined to those operating on an extensive scale.

A stockshipper from Randolph County, Mo., says the hay crop raised there this year was the best for a long while; much of it being of fine quality clover. The acreage, however, was comparatively small.

Saguache County, Colo., is reported having plenty of hay and feed, but the cattle men are unloading stock and reducing their herds. This hay is selling in the stack at $10 a ton or on track baled $20.

Greene County, Ia., had a good crop of timothy and clover mixed hay this season, but shippers say very little of the crop is likely to move into market, the local demand of feeders taking all that is offered.

Canadian farmers are still interested in Russian thistles as hay. This plant when cut for hay should be cut before the heads turn hard and woody, in which stage the hay is very juicy and the spines are not harsh. The quality of the hay for feed has not as yet been very satisfactorily demonstrated. Some growers in quantity stack the hay and add a little salt to each load, the object being to take up the excess moisture and render the feed more palatable to the stock.

OMAHA HAY NOTES.

J. C. PEDERSON, CORRESPONDENT.

Not much new among the trade. Everybody busy.

Considerable hot and damaged alfalfa running to the market just now.

Weather here cold and lots of snow. Receipts continue fair with demand quiet, market steady.

Reports from country buyers and shippers indicate plenty of hay, but lack of labor and cars to get it to the market. That only keeps prices up.

With railroad service already crippled account power, these storms only aggravate the coal situation. Movement of forage and feed were limited.

First heavy snow of the season arrived Thursday. It's general, from reports and of goodly quantity. Runs from six to twelve inches in Nebraska.

Demand for hay, especially prairie, from East and North very limited. Apparently good stocks of tame hay in feeders' hands. Some alfalfa going to dairies, but scarcity of quality goods keeps business limited.

KANSAS CITY HAY NOTES.

SANDERS SOSLAND, CORRESPONDENT.

A new record for a single day's arrivals of all hay, also alfalfa, was established on the Kansas City market Monday, Nov. 24, when a total of 333 cars was received. This included a record daily total of 174 cars of alfalfa. The former record for a single day's receipts was established on Feb. 3, of this year, when the total hay receipts were 320 cars. Also included in the day's receipts were 99 cars of prairie hay, 50 cars of timothy, five of clover mixed and five cars of straw. The week's receipts of hay, representing only a five day's supply, also were heavy, though not a new record, amounting to 1,136 cars, compared with 797 cars for the corresponding week a year ago. Large quantities of alfalfa are coming from Colorado and Kansas, with Wyoming contributing small supplies. Missouri is the important source of the tame hay coming to Kansas City, with Kansas, Oklahoma and surrounding states shipping prairie.

Will hay prices hold up under continued heavy receipts? Dealers in Kansas City generally answer this query in the affirmative. "Prices have held up surprisingly well in recent weeks despite the heavy movement to market," remarked J. C. Kerr of the J. C. Kerr Hay Co. "Excellent weather conditions, affording good pasturage in surrounding territory, was a bearish factor, though even this failed to force a downturn. Now, however, the country is under a storm blanket and temperatures are lower. So it is improbable that a decline will result with such a change in weather, which is forcing a sharp increase in the consumption of hay, even should loadings in the country be maintained. A lower market, however, may be witnessed around the holiday period of the year."

"While the large movement of hay to market indicates a free car supply in the country, this is not generally the case," said C. M. Funk of Funk Bros. Hay Co. "Kansas City no doubt would be receiving far more hay than now is arriving were it not for the scarcity of transportation equipment in the interior, particularly in Kansas. Farther west, the situation is more clearly normal, which is indicated by the fact that Colorado is a heavy shipper to the Kansas City market. Nebraska is an important source of hay, but little is moving from that state to Kansas City, going directly to the East."

"More and more brown alfalfa is finding its way into the hands of feeders," declared C. D. Carlisle of the Carlisle Commission Co. "We are making sales of brown alfalfa to sections of the country where the pea-green alfalfa was the only grade taken in previous years. In the South and Southeast, particularly, more brown alfalfa is being sold to feeders. A great saving can be effected by feeders and breeders of live stock by purchasing the brown alfalfa at current price levels, or at current discounts under the fancy grades. The abnormal difference in price, amounting to as much as $16 a ton, is not warranted by the difference in feeding value between brown and choice alfalfa hay. But not until the producers of meat animals generally recognize this fact can the trade expect a narrowing of the sharp premiums now prevailing in Kansas City. The production of brown alfalfa this year was comparatively heavy, larger than in any recent year. Millers, who buy large quantities of good brown alfalfa, cannot absorb the entire offerings. For many years the feeder has been urged to give more consideration to the brown hay, and where the legume has been fed consistently for many years, it is evident that such a change in the feeding is becoming apparent."

While more or less weakness developed in the hay trade in the earlier days last week, owing to the continued free movement to market, dealers confessed that not in recent years has such an active demand prevailed at the close of the trade as was witnessed Saturday. After the bulk of arrivals for the hay ha disposed of, news reached the tr the proposal of the switchmen in K City to walk out at 4 o'clock in the noon, which action was taken lines except the Rock Island and lington railroads. Naturally, the consuming interests made a fran fort to buy hay. Quality was not sideration, at least not so great sideration as under normal cond Keen competition between the buying interests developed, and, itive of their eagerness for hay, prairie sold at the choice prices earlier part of the day, $23.50 a t ing paid for No. 3 wild hay. Many similar sales were made. Of cours was not a barometer of the actual tion on the market, representing the frantic efforts of buyers to stocks for an emergency. What the switchmen's strike will have market is not known, of course, t serious difficulty may result unle early settlement is arranged.

CHICAGO HAY NOTES.

Among recent visitors to the C hay market were Thos. Ramsey Howard W. Smith, both of Ft. Mich., and J. C. Bright, of McComb

A very fine exhibit of hay, bo wisps and bales, at the Interna Livestock Grain and Hay Show i the forerunner of the fine displa we shall have in years to come. report in another column relati prize winners should be read, of c but we desire here to urge our r to tell their farmer friends to p to exhibit next year and thereafte eral bales each of the high qualit varieties of hay. The prize comm desire to state here that bales should be submitted, because the in commercial form, whereas wis hay not subjected to the baling p have an unfair advantage in one and from another standpoint ma come too dry, losing leaves and m inspection difficult.

J. H. Brinkerhof, terminal mana the U. S. Railroad Administratio whom the Chicago trade has bee dressing their efforts to consumma contemplated plugging inspection tem, has just written John H. D chairman of the committee for week, in substance as follows: In of the prospective early return o railroads and the extreme importa the individual carriers of properly ed plugging inspection tracks in Ch Mr. Brinkerhof feels it unwise to nitely suggest a line of action to t perintendents of such roads. The however, and arguments submited may be more easily and succes

THE HAY SITUATION.

OF THE HAY AND WHEAT SHIPPED.

NGWATER, N. Y. (1).—About 75 per f a hay crop was grown in 1919 this 50 per cent has been shipped. 90 per cent of the wheat also has hipped.—*L. J. Hyde & Son.*

Hay Markets

CLEVELAND, O.

29.—The hay prices show a slight y upward, the same being true of nd wheat. The receipts of hay are ormal for the past few days. There to be no intention on the part of er to lay in a stock of hay at the prices. Pasturage is generally good out Ohio and the farmers do not tendency to ship hay even at the d prices. Buyers are willing to pay at hay is worth and the price at is considered a liberal one. No. 1 , $28.50; standard timothy, $27.50@ 2 timothy, $26@26.50; No. 1 mixed, 50; No. 1 rye straw, $12.50; No. 1 wheat straw, $12.

BALTIMORE.

29.—There is a somewhat firmer in the better grades of timothy, and No. 1 clover hay, of which de- ns the offerings are light on spot, emand fair and constant for good he ordinary and commoner grades are in ample supply and dull sale their relative value. is selling along sparingly at about range of prices and the general is quiet and steady. Quotations per ton: hy—No. 1, nominal, $32.50; stand- 1@31.50; No. 2, $30.50@31; No. 3, 29.50. Light clover mixed—No. 1, 30.50; No. 2, $27@28. Clover mixed $28@28.50; No. 2, $25@27. Clover— ominal, $30; No. 2, $28; sample hay. Straw—No. 1 straight rye, $17@ 1 tangled rye, $14@14.50; No. 1 $12@13; No. 1 oat, $14@15.

DULUTH.

29.—Operators on this market noted g demand for hay during the last a result of the incoming of snow- interfering with pasturages and it necessary to bring cattle in. The Grain Co. here reported shipments derable hay to points in Montana farmers lack supplies for their n account of drought conditions last . Advices received by the Duluth e that large numbers of cattle have perished on account of farmers feeds and the sudden deprivation rages on which they had depended. storms. The only change in the is that midlands are advanced $1. follow: Timothy, No. 1, $24@25; 22@23; mixed timothy, No. 1, $23@ 2, $16@20; prairie, No. 1, $22@23; 20@21; No. 3, $15@16. Midland, No. 7; No. 2, $11@13; straw, rye, $9@ $9@10.

NEW ORLEANS, LA.

29.—Hay receipts very small, due act that what cars are being ob- re handled for grain and hay is ded. No. 1 timothy offered at $35@ 2 from $34@35, and No. 3 from $33

OMAHA.

29.—Receipts of prairie hay light. receipts continue large and the continues good, causing the mar- remain firm and steady. Oat and wheat straw steady with no change in prices.

Upland prairie—No. 1, $23@24; No. 2, $18@21; No. 3, $14@17. Midland prairie—No. 1, $22@23; No. 2, $18@21. Lowland prairie—No. 1, $17@18; No. 2, $13@15; No. 3, $10@11. Alfalfa—Choice, $32@33; No. 1, $30@31; standard, $27@29; No. 2, $24@25; No. 3, $19@21. Straw—Oat, $11@12; wheat, $10@11.

ST. JOSEPH.

Nov. 29.—The hay market continued strong with no material change in prices. The demand for alfalfa, heavy clover mixed, clover and prairie is increasing. There are no indications for stronger markets, in view of the high prevailing prices. Shippers are urged to get busy, order cars, and load their hay. Rush it to the market and reap the benefit of the high prices. Nominal quotations are as follows: Prairie—Choice, $22@23; No. 1, $20.50@21.50; No. 2, $19@20; No. 3, $16@18. Midland—No. 1, $17@18; No. 2, $14@15. Alfalfa—Choice, $34.50@35.50; No. 1, $32.50@33.50; standard, $29@32; No. 2, $25@28; No. 3, $20@24. Timothy—No. 1, $26@26.50; standard, $24.50@25.50; No. 2, $22.50@24; No. 3, $18@22. Clover light mixed—No. 1, $25.50@26.50; No. 2, $22@24. Clover—No. 1, $26@26.50; No. 2, $20@23.50. Straw, $10.

LOUISVILLE, KY.

Nov. 29.—Receipts of hay are fair, with demand fair. There is no heavy movement at this time. Colder weather is expected to create a better demand. Car shortage is holding back receipts.

Principal quotations are: Timothy, baled, carlots—No. 1, $30.50 a ton; No. 2, $29. Mixed—No. 1, $29; No. 2, $27. Clover—No. 1, $32; No. 2, $30. Straw—Wheat and oat, $11 a ton; rye, $13.

MILWAUKEE.

Nov. 29.—The local hay market ruled stronger and has shown improvement on several listings. A greatly increased demand prevailed throughout the week. Receipts are moderate. No. 2 timothy is up $2 on inside prices over last week. No. 1 clover and light clover mixed have also improved $2 and $1 respectively. Other listings rule just about steady. Current quotations are: Choice timothy, $28.25@28.50; No. 1, $27.50@28; No. 2, $26@26.50; No. 1 clover, $24@25; light clover mixed, $24@26; red top and timothy mixed, $24@26; marsh feeding, $14@15; packing, $10.50@11.50; rye straw, $12@13; oat straw, $11.50@12.50.

BUFFALO.

Nov. 29.—The offerings of hay continue light, everybody holding on for higher prices, which seem probable should the farmer take it into his head to wait until after the turn of the year. No. 1 is quoted at $30@31; No. 2, $27@29 per ton. No offerings of straw. Quoted at $12@13 per ton.

MEMPHIS.

Nov. 29.—Inactivity and scarcity of good grades continue the leading features of the local hay market. Demand does not improve much, for pastures are still as green as they are in early summer, which lessens demand for roughage. Most of the hay coming is poor in quality and quotations are not easy. On call today $33 was asked for No. 1 clover mixed, prompt, while $40 was asked for No. 1 alfalfa. December standard was offered at $38, while No. 2 and standard were offered at $36.50. No. 2 was $33 bid and $34 asked, while a car was sold yesterday at $34. Cash No. 1 timothy sold at $31. Spot alfalfa meal was $40 bid, while $35 was bid for No. 2.

DETROIT.

Nov. 29.—Hay is not coming freely to this market and dealers quote a firm tone. Demand is brisk. Canada is not contributing as much as in previous years as the price on the other side of the line is pretty high. There is some Southern inquiry here but not much shipping as the Southern bids are not high enough. Clover is very scarce and firm and the same is the case with straw. Quote: No. 1 timothy, $28.50@29; standard and light mixed, $27.50@28; No. 2 timothy, $26.50@27; No. 3 timothy, $23@25; No. 1 mixed, $26.50@27; No. 1 clover, $26.50@27 per ton.

NASHVILLE.

Dec. 1.—Hay trade is quiet with prices maintained as follows: No. 1 timothy, $34; No. 2 timothy, $32; No. 1 clover, $32; No. 2 clover, $30.

PHILADELPHIA.

Nov. 29.—There is a good inquiry for hay which is in light supply and firmly held. Straw quiet but steady under light receipts. Timothy hay—No. 1, $33@34; No. 2, $30@31; No. 3, $27@28. Clover mixed hay—Light mixed, $30@31; No. 1 mixed, $27@28. Straw—No. 1 straight rye, $15@15.50; No. 2, $14@14.50; No. 1 tangled rye, $14; No. 2, $12.50@13; No. 1 wheat straw, $14@14.50; No. 2, $12.50@13; No. 1 oat straw, $14.50@15; No. 2, $12.50@13.

BOSTON.

Nov. 29.—Receipts of hay locally the past week were moderate, showing only a slight increase over the previous week. Receivers, however, report more invoices of hay to arrive with more hay headed this way than for some time. This is especially true of shipments from New York state. Reports also received that Canada is obtaining more cars to load shipments and is now starting hay more freely to this and other markets. Despite the moderate offerings of hay on the local market, trade is dull with receivers finding it almost impossible to interest buyers beyond actual present needs. There is no disposition to purchase ahead, the trade being of the belief that the present high prices prevailing cannot be maintained and that the market will soon show a material decline. About $34 per ton is the general asking quotation for No. 1 timothy hay in large bales. An extra fancy car, if wanted, and strictly up to grade, might bring $1 per ton higher. Small bales are quoted at $31@32. No. 2 timothy is quoted $30@31 for large bales and $29@30 for small bales. No. 1 Eastern ranges at $27@29. No. 3 hay is held at $26@28. Clover mixed is offered at $27@30, with fine hay taking a wider range at $25@28. Receipts for the week ending Nov. 29 were: Local, 131 cars; export, 6 cars.

A dull market for straw with offerings in excess of the demand and some slight accumulation of stocks. Choice rye straw is quoted at $15@16 per ton with oat straw steady at $14 for the bulk of the offerings. Receipts for the week ending Nov. 29 were: Local, 8 cars.

NEW YORK.

Nov. 28.—The New York Hay Exchange reports the hay situation as follows:

	Hay tons	Straw tons
Receipts for week (5 days).....	3,670	190
Receipts last week.....	4,722	430
Receipts Sept. 1 to date.....	53,821	4,230
Receipts same time last year...	74,364	4,280

Arrivals of hay have been very moderate at the principal harbor points, trade has gained some force and market closes rather strong with values averaging about $1 a ton higher on practically all grades. New invoices are generally light though some receivers report more in hand at the close. One river boat came in this week and two more boat loads are due to arrive this week or next probably winding up the season. Quotations:

	Large bales per ton	Small bales per ton
No. 1 hay.....	$35.00@36.00	$34.00@
No. 2 hay.....	33.00@34.00	32.00@33.00
No. 3 hay.....	30.00@31.00	29.00@30.00
Shipping hay.....	28.00@29.00	27.00@28.00
Fancy light clover mixed hay	33.00@34.00	32.00@33.00
No. 1 clover mixed	30.00@32.00	29.00@31.00
No. 2 clover mixed	28.00@29.00	26.00@28.00

Straw—No 1 rye, $14; No. 2 rye, $13; No. 1 oat, $15; No. 1 wheat, $12.

Effective Nov. 26, the N. Y. C. R. R. removed embargo from 33d St. and 36th St. stations.

The demurrage tariff of the United States Railroad Administration, effective Dec. 1st, applying to all lines under federal control as well as lines not under federal control, continues the present rates of $2

PARATIVE RECEIPTS AND SHIPMENTS OF HAY, CHICAGO.

following is a table showing the total monthly receipts and shipments of n tons, in the Chicago market, for the year 1919 and four previous years:

CINCINNATI.

Dec. 2.—Interference to plugging operations by rains on three days of the week, coupled with suspension of trading on Thanksgiving Day, materially reduced the volume of hay business here this week, but the inability of buyers to secure supplies had the effect of creating a decidedly stronger market, and sales made on Friday, the only day trading was possible, resulted in new high levels of the crop for timothy and alfalfa and advances of $1.50 per ton for clover and 25c for mixed. Advices from the country early in the week indicated a large movement, but rains also handicapped shipments to some extent and little accumulation was noted. Receipts totaled 158 cars for the week, the yards being filled to capacity on Saturday and 23 cars reported as held in the terminals.

Timothy—No. 1, $30.50@31; standard, $30@30.50; No. 2, $29@30; No. 3, $26@28.50; threshed, $18@20. Light clover mixed, $29.50@30.50. Clover mixed—No. 1, $29@29.50; No. 2, $27@29. Clover—No. 1, $33@34; No. 2, $30@32. Sample, grassy, $23@26. Alfalfa—No. 1 Western, $40@41; No. 1 local, $35@36; standard, $34@35; No. 2, local, $32@34. Straw—Wheat, $10@11; rye, $11@12; oat, $10@11.

MONTREAL.

Nov. 28.—The market shows no particular change from that of a week ago, the comparatively light receipts keeping local prices firm at $24@25 per ton on track, but the outside price is pretty difficult to get, $24 being considered the ruling figure for No. 2. No. 3 is quoted at $21@23. The light receipts are due to the bad roads and the holding for higher prices on the part of farmers.

The receipts of baled hay last week were 3,751 bales, against 7,961 bales for the same week last year. A few cars continue to be shipped across the line from country points, but these do not seem to affect the large supplies in farmers' hands.—Trade Bulletin.

ST. PAUL-MINNEAPOLIS.

Nov. 29.—Quotations on hay for the Twin Cities are as follows:

	St. Paul.	Minneapolis.
No. 1 timothy	$25.00	$25.50@26.00
No. 2	24.00	24.00@25.00

No. 2 alfalfa	31.00	.....@.....
No. 3 alfalfa	23.00	.....@.....

KANSAS CITY.

Nov. 29.—Despite another heavy movement of hay to the Kansas City market this week, prices held up well. The cheaper grades of prairie lost 50c a ton, and a decline of 50c occurred on standard and No. 2 alfalfa. Receipts amounted to 1,136 cars compared with 1,077 cars last week and 797 a year ago. Alfalfa sales were made over a wide territory, including the East, South, Southwest, Central States and surrounding territory. The cheaper grades of alfalfa are being taken on a larger scale by feeders. Millers also were good buyers. A good demand prevailed for tame hay from the South, prices holding up firmly. No difficulty was encountered in disposing of prairie, the stock yards and feeders being good buyers. When the trade received reports of a switchmen's strike a scramble developed for unsold offerings, up to $23.50 a ton being paid for No. 3 prairie. Colder weather was a factor in the buying during the week. Straw was unchanged.

Prairie—Choice, $22@23.50; No. 1, $21@22; No. 2, $20.50; No. 3, $13.50@18.50; packing hay, $10@12.

Midland prairie—No. 1, $16@18.50; No. 2, $13@15.50.

Alfalfa—Choice, $35@36; No. 1, $33@34.50; standard, $29@32.50; No. 2, $24.50@28.50; No. 3, $20@24.

Timothy — No. 1, $26@26.50; standard, $24.50@25.50; No. 2, $22.50@24.50; No. 3, $18.50@22.

Clover mixed—Light, $26.50; No. 1, $24.50@25.50; No. 2, $18.50@21.

Clover—No. 1, $24@26.50; No. 2, $16@23.50.

Straw—$10@10.50.

SAN FRANCISCO.

Nov. 28.—Receipts of hay have been about half and half water and rail arrivals, but the rail arrivals have been almost all for Government use, which makes the general arrivals by rail practically nothing. In other words, the car situation has not cleared in the least and it is quite impossible to get equipment to load hay at the various shipping points. Naturally, this causes a most unsatisfactory state of affairs in the hay trade, for although sales can be effected, deliveries cannot be made, which causes complaints from all directions. Owing to these conditions, as well as the continued dry weather, the market is stronger with a tendency to higher prices. Demand from country districts has been especially good and hay, as well as alfalfa, is moving to interior points from sections fortunate enough to secure an occasional car. All grades of hay seem to be in good demand and the market can be quoted at least a dollar per ton higher. Export trade is still hampered by the stevedores' strike on the waterfront. Although vessels are working to better advantage daily, conditions are still far from satisfactory.

Alfalfa is in good demand and light supply.

CHICAGO.

Dec. 1.—The following is a statement of the receipts and shipments of hay in tons in the Chicago market for the week ending Nov. 29, also the total receipts and shipments of hay from Jan. 1, 1919:

	Nov. 29. 1919.	Nov. 22. 1919.	Nov. 30. 1918.
Total receipts	4,634	3,425	4,513
Total shipments	211	205	484
Rcpts. since Jan. 1.	217,627	212,993	293,641
Shpts. since Jan. 1.	41,010	40,799	82,846

In spite of materially larger receipts last week, compared with previous week and year, the demand was active and prices held at the top. The receipts today, including delayed hay from some switch yards, were 713 tons, with shipments of 70 tons. The market, as predicted by dealers here, was strong and steady with good demand. Quote as follows:

Timothy—Choice, $31@32; No. 1, $30; No. 2, $27@29; No. 3, $25@27; N. G., f. o. b., $31; threshed, $19; on track, No. 1, $31; No. 2, $28.50.

Prairie—Kans., Okla., Mo., choice, $27@28; No. 1, $25@27; No. 2, $22@24; No. 3, $20@22; Ill., Ind. and Northwest.

Marsh hay—Feeding, $14@20; packing, $12@14.

Straw—Rye, $14@14.50; oat, $13@13.50; wheat, $12@12.50.

ST. LOUIS.

Nov. 29—The receipts of hay for the past week were moderate and consisted mostly of timothy and clover mixed, with a fair amount of alfalfa.

Timothy hay continues to rule steady under moderate receipts and good local demand for the better grades of timothy and a good shipping demand for the medium grades. The movement of hay is light and indications point to continued steady values.

Light clover mixed hay firm and in scant offerings. There is an excellent unsupplied demand for light clover mixed hay which is selling readily at full prices; in fact, selling as well if not better than timothy.

Heavy clover mixed hay scarce and wanted. There is an urgent local demand for good heavy clover mixed hay which is selling well.

Pure clover scarce and wanted; offerings exceedingly light and demand urgent.

Alfalfa hay continues in moderate receipts, with an excellent local and shipping demand. Good No. 1 to choice leafy alfalfa is anxiously sought ofter by the dairy trade and the milling demband taking the coarser hay.

Prairie hay market firm; receipts moderate and demand good.

Straw scarce and wanted.

Track sales: Timothy No. 1, $31.00@33.00; standard, $29.00@30.00; No. 2, $25.00@28.00; No. 3, $23.00@24.00; threshed timothy, $18.00@20.00; light clover mixed No. 1, $30.00@31.00; No. 2, $26.00@28.00; heavy clover mixed No. 1, $31.00@32.00; No. 2, $30.00@31.00; clover hay No. 1, $32.00@34.00; No. 2, $30.00@31.00; alfalfa hay choice, $40.00; No. 1, $37.00@39.00; standard, $35.00@36.00; No. 2, $29.00@30.00; prairie hay, choice, $27.00; No. 1, $25.00@26.00; standard, $23.00@24.00; No. 2, $26.00@27.00; straw, $10.00.

TOLEDO.

Nov. 29.—There is no change in the hay situation. Receipts are light; demand particularly heavy; prices steady. Dealers are unable to secure hay to fill orders and are offering premiums for hay that is loading. Many instances reported where railroad yards are filled with empty cars, but agents refuse to distribute them in view of fuel situation. No. 1 timothy, $28; No. 2, $26.50; No. 1 light mixed, $28; No. 1 clover, $30 per ton, carlots; basis Toledo rate point.

Montana Gets the Blue Ribbons for Timothy and Clover Hay, Wisconsin for Alfalfa, at the International Grain and Hay Show.

At the request of Supt. G. I. Christie, Mr. Frank L. Young, president of the National Hay Association, recommended the following members of the Association to serve as judges at the International Grain and Hay Show in awarding prizes for the best exhibits of hay and alfalfa:

Ex-President Robert B. Clark, Chippewa Falls, Wis.
S. W. Kemp, Spencerville, Ohio.
H. W. Smith, Fredonia, Kans.

Owing to close competition, the judges had an extremely difficult task in making decisions. Swartz Bros., of Waukesha, Wis., the winners of the blue ribbon for alfalfa, won the grand trophy cup offered by the National Hay Association for the best sample of any kind of hay exhibited at the show. This trophy is an authentic copy, entirely wrought by hand, of a silver cup and cover made during the reign of Queen Elizabeth, A. D. 1585. There are very few pieces of this period still in existence, and this particular cup is considered by connoisseurs to be one of the finest examples.

Particular attention is called to the fact that the decoration on the body is executed entirely by hammer work in low relief, and there are very few workmen today sufficiently skilled to carry out this form of ornamentation. The value of the original cup today is approximately $15,000. Swartz Bros. were also the winners of the first prize for their alfalfa at the Panama Exposition, San Francisco. Other prize winners were:

Alfalfa:

Jacob W. Willitt, Hillsboro, O.; D. C. Stephenson, Jr., Manhattan, Kans.; Allen Sales, Bozeman, Mont.; Geo. Fielding & Sons, Manhattan, Kans.; W. F. Olcheck, Grinnell, Iowa; O. N. Atkins, Salesville, Mont.; G. W. Atkins, Salesville, Mont.; J. H. Swanzy, Ridott, Ill.; John Howell, Montrose, Colo.; Paul Conger, Anderson, Ind.; S. T. Sennett, Muscatine, Iowa; George Baier, LaCrosse, Wis.; Fred Rumsey, Elliott, Iowa; Wm. Telyes, Brillion, Wis.; Paul Roseharsky, Princeton, Ill.

Timothy:

Geo. Sterling, Salesville, Mont.; Lewis M. Hanson, Mondovi, Wis; Frank J. Lendley, Fox Lake, Wis.; John Monfoster, Bozeman, Mont.; H. A. Parrott, Spenville, O.; L. H. Laylin, Mason, Mich.; Ert Fulton, Utica, O.; Chas. Schweer, donville, Mo.; Thos. Paluska, Lowder, gamon County, Ill.; Frank E. Culp, Bet to, Madison County, Ill.; A. W. Jerset Sons, Mason, Mich.; Aug. Wallen, E Mich.

Red clover:

Atkins Bros., Salesville, Mont.; Dunbar, Rudyard, Mich.; Allen S Bozeman, Mont.; Paul Roseharsky, Pr ton, Ill.; W. F. Otcheck, Grinnell, Iowa H. Laylin, Mason, Mich.; A. W. Jerse Sons, Mason, Mich.; Frank J. Lendley, Lake, Wis.; Charles Schweer, Gordon Mo.; Arthur O. Popp, Jefferson, Wis.

After giving out the list of prize ners, Supt. Christie stated to our porter that the interest in the show exceeded his fondest hopes, and that Chicago Board of Trade have start great work by making it possible bring about this splendid exhibitio grain and hay. The show is not on success as regards the number of hibits and the quality of exhibits, also from the point of attendance general interest shown; practically e agricultural college in the United St has taken some part. The continua of this show from year to year mean creased production and improvemen the quality of grain and hay throug this and other countries.

NTERNATIONAL SHOW AT CHICAGO

men in the universities were ominent this year during the contests of the International n of Livestock, Grain and Hay ion Stock Yards, Chicago, than re. They gathered from Cali- Eastern states, from all univer- nducting special courses in restock and agricultural work. has appeared in this place re- his coming event, including the rizes and the donors, and the of the Chicago Board of ut when all is said and done, important real gain from this yable annual event is the stim- he coming generation of farm- lemen, meat packers and manu- of feedstuffs. As Prof. G. I. of Purdue and M. G. Thorn- erintendent of the Exposition, oday's educational work of our with its practical results for folks in everyday affairs, is thing in the agricultural suc- our great country."

ill see in succeeding years ncreased attention to the ex- grain and of hay, an innova- strictly livestock display, but ly paralleled feature of it, that o stay. As a matter of fact, it this year was not small in e; more than 2,000 individual which is the largest ever held, l by an excellent display of cultural Department with all nechanical testing appliances, ples and literature galore.

hour this issue of THE PRICE GRAIN REPORTER went to press, kes prizes had not been de- , but it is an open secret that from Indiana are gloating over ellent corn showing, and we ly predict that in addition to minary prizes they have already the final returns will show a umber in the Hoosier state.

ts of baled hay included many of which people had never ich as cheat hay, produced in the states of Washington and Oregon; and the Southern forage crops, to which the hay department of THE PRICE CURRENT-GRAIN REPORTER has made frequent reference, sometimes look queer in the bale, such as Cow Pea and Lespedeza hay. Then there is the barley hay of southwestern California and limed clover which produces 3,650 pounds to the acre, but the unlimed variety produces only 2,610 pounds, so the Agricultural Department tells us.

Geo. Bridge, who has been exceedingly active in the interests of the Chicago Board of Trade and the National Hay Association, is justifiably proud of the hay exhibits. The prize winners will be announced later. Three good friends of the hay trade, regular attendants at all National Hay Association conventions, were the judges: namely, Bob Clark of Chippewa Falls, Wis.; H. W. Smith of Fredonia, Kans., and S. W. Kemp of Spencerville and Cincinnati, Ohio.

The prize ring and the selling ring at the Stock Yards Amphitheatre showed off to fine advantage the thousands of cattle, horses, sheep, hogs, all dressed up in their best clothes, pretty ribbons, enough to make the fair sex envious. It is necessary to assure some of the ladies that the Herefords do not use a curling iron every morning. It may be equally necessary to assure those who stood with gaping mouths before the 37-inch ear of corn that it did not actually grow that way. It was a big job to build it up, however, securing the thousands of uniform kernels and affixing them with putty and shellac on to the carefully turned block of wood.

The surprising accuracy of the university students in judging cattle, hogs and sheep was, however, the natural outcome of the keen rivalry existing between the universities. Their work was approved by the best in the land, representatives of the packers and of the many private exhibitors whose names are recognized wherever blooded stock is discussed. Among the notables, gracing the International with their presence, were Hon. Manning W. Dorothy, Minister of Agriculture from Ontario, Canada, and Duncan Marshall, the minister from Alberta.

All pens for the livestock exhibits were fenced in with the American Steel & Wire's products and the leading lines of manufacturing and testing machinery for the grading of grain were on display.

The Horse Publicity Association, in their selection of Dec. 4 as the Chicago meeting place, will round out an interesting and profitable week for those lovers of horse flesh who attended the livestock show. The banquet at the Congress Hotel on Thursday evening completes their business session of the day.

Chicago News.

Chicago hay advices are few, partly due to a large attendance at the International Show of country shippers who must hold up new consignments until they return.

Among the many Chicago visitors during the International Show particularly known to the hay trade were Messrs. Guild of Dairyville, Ind.; Geo. Wilcox of Wauwautosa, Wis.; G. L. Proctor, Leaf River, Ill.

Geist Bros. Co. have leased the grain elevator and hay shed of John Range & Son, 2350 S. Western Ave. This move was necessitated by the leasing of the Geist properties at 349 W. 31st St. to some steel concern.

The Chicago hay market is strong and the demand good, assisted by the cold snap beginning Nov. 29, the continuance of which is a great thing for the hay dealers who have been working along with an open, springlike fall.

Indianapolis reports a new high record in receipts of hogs in the truck division of the local yards on Nov. 11, when 5,445 head were received and unloaded from trucks on that date. There were 23 unloading shoots provided especially for truck use.

BROOM CORN.

Field operations in the Southwest were interrupted in midweek by storms, snow and cold weather. Up to the beginning of the storm period, however, field buyers took all corn coming into primary points. In southern Oklahoma *The Broom Corn Review* reports prices ranging from $100@175. The quality generally however was not up to early offerings. Anything selling under $100 was weatherstained and poor in quality. The field activity hereafter will have to be concentrated in southwestern Kansas country. Prices quoted in the western areas ranged from $85@125 with the very best reaching up to $150.

The Wichita market while not particularly active has been making more sales than expected and it was somewhat affected by the coal strike situation. Nevertheless the market has a firm and steady undertone, particularly on the medium and better grades. Offerings range from $100@300 with the bulk of the corn $125@250.

Business in Central Illinois is quiet. No active field movement is looked for at any time, as the amount of corn in growers' hands is very light. Some corn changed hands in the past 10 days at $250@325.

Provisions, Etc.

CHICAGO PROVISION REVIEW.

CHICAGO, Dec. 1.—Fully 90 per cent of the speculative trade in provisions last week was in lard. November was under pressure in the closing days, packers trying to liquidate in a market in which the buying support was poor and the price dropped from $25.30 to $23.90, where it closed, a loss of $1.07½. December broke 70c from the high point with a net loss of 62½c, while January moved up 65c from the previous week's close and finished 25c below the top with a gain of 40c.

Support to lard futures came largely from the short interest and it was claimed by some of the packers that January was largely oversold, owing to heavy sales abroad for January and February shipment. There was not the pressure on the January that existed on the near deliveries, hence it responded readily to moderate buying. The shipping business in lard was only fair and hardly enough to keep up with the make, and the week's shipments of 12,512,000 lbs. a decrease of 4,853,000 lbs. from last year. Exporters took refined lard in fair quantities, while loose lard remains draggy at 75c discount under December and leaf lard cropped $1 per 100 lbs. at the close, with sales of 75,000 lbs. at $25, the lowest in a long time, and a break of $2.50 within two weeks. November deliveries were 1,300,000 lbs.

Short ribs and dry salted meats generally came in for limited attention from speculators. Packers are giving a little attention to short ribs and there is a profit estimated at $3 to $5 a hog in making regular product. Domestic trade in dry salted and pickled meats is about up to the average, although from now on consumption is curtailed by the increased use of poultry. The fresh meat trade has fallen off and prices on pork loins declined with heavy loins quoted around 24c, while light ones held at 27½c.

One of the striking features of the provision trade was the indifference of futures to the heavy run of hogs with the sharp break in prices, the average for the week being $13.30, or 80c lower than the previous week and $4.45 under last years, while supplies of hogs were almost the same as a year ago.

Range of prices in October and previous and for the week follow:

			Close

Kansas City Provision Review.

KANSAS CITY, Nov. 29.—Declines were the rule in the provision market in Kansas City this week. Demand was moderate, and possibly greater than a week ago. Talk of a railroad strike during the week, and a walk-out of switchmen in Kansas City today were unsettling influences in the market, causing buyers to increase their orders. The South continues to play an important part in the trade in dry salt and heavy smoked meats, prices on which are about ¼@¾c lower than a week ago. Loins were off as much as 1c, and other fresh prices receded ¾@½c. Fresh pork was in demand both locally and in the East. Fancy hams and bacon also moved well, closing with only slight net losses. Lard was in demand, early recessions being followed by a slight rebound.

Shipments of provisions from packing plants were halted at the close of the week, and unless a settlement in the switchmen's strike is effected, further serious difficulty may result.

Chicago Livestock Movement.

Receipts and shipments of livestock at Chicago the past week follow:

	Hogs.	Cattle.	Sheep.
Receipts—			
Past week	215,512	85,305	104,310

Export of Hog Products.

The past week's export clearance of hog products, compared with previous week (last year's reports suppressed by the Government):

	Nov. 29. 1919.	Nov. 22, 1919.	Nov. 30. 1918.
Pork, bbls.	710	780	710
Pork, lbs.	134,900	148,200	134,900
Meats, lbs.	23,481,000	25,560,000	7,270,000
Total meat	23,615,900	25,708,200	7,404,900
Lard	6,326,000	9,573,000	4,961,000
Total products.	29,941,900	35,281,200	12,365,900

Stocks of Pork, Lard and Meats.

The stocks of mess pork in barrels, lard and short rib sides and total meats in pounds at Chicago were as follows on dates named:

	Dec. 1, 1919.	Nov. 1, 1919.	Dec. 1. 1918.
M.pork, reg.	2,655	1,413	5,444
Other pork	26,528	23,470	43,185
Lard,reg.,lbs.	13,547,155	13,740,390	7, hmh
Other lard	6,220,275	13,551,681	22,946,243
S. rib sides	329,036	2,425,824	1,492,424
S. cl. sides	3,287,446	4,939,565	437,594
Ex. sh. clears	854,622	1,373,320	4,251,385
Total meats	105,494,791	108,319,360	101,911,059

The Pennsylvania corn crop this year is estimated at 72,269,000 bus., which is said to be a record. The buckwheat crop in the state is also equivalent to about one-fourth of the entire crop of the country.

Hog Slaughterings.

Special reports to THE PRICE CURRENT-GRAIN REPORTER show the number of hogs packed since Nov. 1, 1919, at undermentioned places, compared with previous year:

	1919. From Nov. 1 to Nov. 29.	1918. From Oct. 27 to Nov. 30.
Chicago	767,500	1,032,300
Kansas City	218,600	389,000
South Omaha	113,100	238,300
St. Louis	242,500	296,300

Live Stock Mark

CHICAGO LIVE STOC

CHICAGO, Dec. 1.—Hog prices the decline part of the week, extreme low showing a br around $1.25 in the first thr with a reaction at the last. To were $14.55 for the week, ma western point. The high on S was $13.95 and the average t $13.70, with the average for th $13.30, or 80c lower than the l week and $4.45 under last yea

Eastern shippers were large b hogs throughout the week and h turn values upward in the face heavy receipts, which were 205,5 pared with 224,698 the previou and 221,979 last year. At the markets the run was 772,400, 819,000 the previous week, and last year. The average weight lbs., compared with 224 lbs. t vious week, and 226 lbs. last ye

Packers bought 186,200, co with 208,300 the previous week a 800 last year.

Cattle prices improved materia week with sales of yearlings av 1,040 lbs. at $20.25, and while 18 heavy Angus steers brought $20. advance of 50 to 75c was made general run of beef cattle with erage price of $14.90, or 40c high the previous week and only 15c last year. Supplies, while libera not so large as recently and t mand showed a better tone, w vances in some instances of $1 t over the previous week's low Trading throughout the week wa active, although the quality of ferings showed little improveme large percentage of the arrivals western rangers, 22,000 which w better supply than of late, and $8.25 to $15, a gain of 25 to 50. paratively few of the beef cattl good enough to bring over $17 ceipts at Chicago were 85,254, co with 110,386 the previous wee 102,387 last year.

Butchers' stock gained 25 to 50 the choice offerings taken readil the average on fat cows and h was $8.60, or 30c higher than th vious week and a loss of $3.10 fr high average on April. Bulls s about the same level as the pr week, while calves declined fairly a top around $17 to $17.25 and an age of $16.50, compared with $17. previous week and $21.10 the top age for the season.

Stockers and feeders met an trade, with supplies large, Illino diana, Michigan and Ohio being market and there were also som ers from Pennsylvania and New For choice heavy feeders $13 w top, or 60c better than the pr week. The average was $9.90, better than the previous week, a most $3 under the highest estab last April.

Fat lambs advanced 50c to $1 f week, fat yearlings 50c and aged 25c. Feeding lambs closed 25 t higher, while prices on breeding remained unchanged. Supplies we duced to 95,033, compared with 1 the previous week and 126,504 last The twenty markets had 332,200, pared with 446,600 the previous and 355,200 last year. Average of lambs for the week was $14.65, advance for the week, compared $15.10 last year. Sheep averaged or 5c better for the week and $1.(der last year.

Estimated receipts for this we Chicago: cattle, 100,000; hogs, 25 and sheep, 100,000. Arrivals last were: cattle, 99,136; hogs, 30 sheep, 126,257.

Oklahoma Live Stock Market

Thusnelda Haehnke, Corresponden

Oklahoma City, Nov. 29.—Receipts have been fairly liberal this week, but

eers were included in the runs. On y a few odd head brought $11, which for the week. The fore part of the receipts were so light that even r buyers and speculators had to to get even a few. Thursday being lay, a slow and possibly uneven mar- s predicted, but the lay-off on Thurs- d no undesirable effect on the trade. ednesday steer buyers got back into me although but for a few deals. rn Oklahoma marketed several loads 9@10.50, one load bringing the ex- On Friday the market was higher, ing to report, and the packers clear- monstrated the fact that they needed There were some steers on tap, a of short meal-hull-feds around 1,025 verage selling $11, the highest car n months, while plain grassers with weight made around $10. For the steers are 25c higher.

stuff has made a pretty good show- e this week. The boost was 25@50c, treme applying to canners and choice while medium classes are a big r up. The canner and cutter offer- is good, several loads bringing $5@ The calf market is unchanged, good making $15 and heavies around $10. well as the rest of the market, hogs howed the bloom the fore part of ek. The "turkey spread" must have the hog trade because on Friday all ts were going higher toward the rk. However, the market is 50c low- n a week ago. Quality was good, erybody was active and willing to quickly. Stockers are lower, only st in butcher pigs being quotable w $12.75.

Louis National Stock Yards.

H. L. Wyatt, Correspondent.

onal Stock Yards, Nov. 29.—There sharp reduction in cattle receipts eek, due to the Thanksgiving holi- d the consequence has been an ac- d very strong market. The decline k week was fully regained, and the t this week closes fully a dollar high- practically every grade of offerings ore particularly on the fair to pretty cattle. The advance may not be as great on the commoner kinds. repeated statement that anything or prime has held to a fully steady during the weeks when the market ff, was proved to be correct this when two lots of finished yearling sold at $19. This price was the top week as well as of the season.

hog market this week was very ir- . During the middle of the week slow and lower but at the end it egained its loss and closes about with the close of last week. The of the offerings continue to im- and for the week it averages fairly The week's closing quotations are: and butchers $13.50@14; good $13.90@14; rough, $11.50@12.50; 13.60@13.90; pigs, $12.75@13.50; bulk, 14.

sheep market has been strong and all week. This was due in most cause of the light run. All classes e stock show an advance in price. topped at $15.25 and yearlings at These prices are the highest for ber of weeks.

Omaha Live Stock Market.

Bruce McCullough, Correspondent.

ha, Nov. 29.—Receipts of cattle this eld up fairly well in point of num- ut continued to fall down in point ality. The run was 50,000 head, or 2,000 more than a year ago, but the consisted very largely of belated n rangers, called by many the poor- of cattle ever offered on the market. The proportion of corn k was small and not particularly ive, the offerings being largely on rmed up and short fed order. g to the limited offerings of useful eers and the smaller competition on n rangers, the general beef mar- s in very satisfactory shape, steady ng throughout for desirable steers. good to choice beeves were con- sly scarce and quoted nominally $17 or possibly higher. Fair to 50- to 1250-lb. beeves sold around 50 and the common to fair warmed- short-fed grades at $10@12.50 and n. The best of the Western grass sold at $11@13, with common light n the Texas order as low as $7@8. nd heifers sold very unevenly but prices were not much lower than ago. Prime corn fed heifers sold 11@12 and common canning grades as $4.50@5.50. Fair to good butcher s been selling very largely around .50. Veal calves at $8.50@14.50 and stags, etc., at $5@9 show little as compared with a week ago. n weather the latter part of the owed up the trade in stockers and very materially and while good to steers at $11@13 closed fully steady week ago, the common to fair light dium weight grades selling around nd on down were the lowest they en this year. Volume of business fair proportions but a poor clear- as reported.

ugh receipts of hogs were smaller week ago or a year ago, the trade aracterized by sharp advances and and closing values were around 25 wer than the week previous. The luctuations in the market reflect rvous condition of the provision nd the weak tone to the market indicated the doubt in the trade concerning the export outlet for pork product. All classes of buyers continue to show a preference for the light and butcher weight hogs and pay a premium for them while rough heavy packers are slow sale at the bottom of the list. With only about 3,000 hogs here Saturday the market recovered 50@75c of the recent decline and tops brought $14 as against $14.25 on last Saturday. Bulk of the trading was at $13.50 @13.75 as against $13.90@14.15 a week ago.

Supplies of sheep and lamps were of only moderate proportion and the general trade developed considerable strength, closing prices being around 35@50c higher for the week. Best fat lambs are selling at $14.60@15.10, yearlings are quoted at $10.50@11.50, wethers at $9.50@10.50 and ewes at $7.50@8.60. Business in feeders and breeders stock has been comparatively quiet with little change in prices one way or the other.

Kansas City Livestock Market.

Sanders Sosland, Correspondent.

Kansas City, Nov. 29.—Uncertain conditions surround the trade in live stock in Kansas City as the week closes. Serious scarcity of coal as a result of the strike of miners threatens the operations of packers. This afternoon about 1,500 switchmen went on strike here, the walkout being unauthorized, and for a time meat that was loaded in cars awaiting shipment was tied up. Beginning Monday all offices, including those of commission men and packers, will be required to remain open only between the hours of 9 and 4. This also applies to industrial plants and is a step toward coal conservation. With these conditions it is only natural to find the trade in live stock uncertain.

Prices were irregular this week, with hogs closing 25 cents lower after erratic action, cattle about steady and sheep and lambs about 25 cents higher. There was a reduced supply of cattle and sheep, while the hog receipts increased.

A feature of the trade in hogs was the continued premiums on offerings here as compared with the Chicago and Omaha markets, this being attributed to the relative scarcity of supplies in this territory. The top at the close was $14.25, compared with the top of $13.95 at Chicago and $14 at Omaha. Average cost of droves here for the week was figured at $13.65, compared with $14.42 in the preceding week. The market made a favorable showing on the quality of the arrivals. There was small competition from shippers and the trade in stock hogs was fair for this season.

On the cattle yards the quality of the arrivals was rather poor, the top sale being only $15. Range supplies predominated, and there were indications of continued liberal runs out of New Mexico in particular, where shipments have been delayed by lack of cars. The trade was strong early and weakened toward the close. Veal calves broke $1 to $1.50, with a top of $14.50 at the close. Cows from ranges sold up to $11 and canners down to $5.15. Stocker and feeder cattle trade held up well early, but the fuel situation caused weakness late, and some accumulations will be carried into next week. Stock calves were slow at $7 to $11.

A good tone was evident in the sheep trade, with a top of $15 paid for fed lambs and $8.25 for fed ewes. Reduced shipments from ranges helped the trade. There was a good trade in feeding stock, with very light supplies.

Movement of Sheep.

*Fort Worth missing

A resolution favoring public ownership of banks and grain elevators, to be conducted after the manner of the administration by the Nonpartisan League officials in North Dakota, was introduced recently at a session of the National Grange at Grand Rapids, Mich. Another resolution opposed the return of the railroads to their owners until long after Jan. 1 next. The Grange, however, did not accept the invitation of Mr. Gompers to send representatives to a conference of labor unions and farm organizations in Washington on Dec. 13. All of which goes to show, as remarked an editorial last week, that Michigan had better begin to look out for herself.

Canadian Livestock.

Winnipeg, Nov. 29.—On Monday of the week there was a 50c decline from Saturday's close, select hogs being sold at $15, which price held until Friday when $14.50 was the ruling quotation. This figure held good the last day of the week with heavies selling at $12.50, lights $12@13.50 and sows $10.50. Choice butcher steers were quotable at $11@12 50 during the week with fair to good quality $9.25@10.75. At Calgary hogs were quotable at $16 25 for selects.

For quick returns use our Market Place Department, Page 5, for wants and sale announcements.

The Fine Art of Service

FROM the beginning to the end of your stay in Chicago you can be under the responsible protection of La Salle service. This Hotel owns and operates a large fleet of taxicabs and limousines primarily for convenience of guests. Luxurious cars with careful, courteous chauffeurs are at your command at most reasonable rates.

Hotel La Salle

Chicago's Finest Hotel

—is located in the heart of Chicago, yet the unobtrusive courtesy, perfect appointments and service insure all desired privacy.

RATES

One person	*Per day*
Room with detached bath,	$2, $2.50 and $3
Room with private bath,	$3, $3.50, $4 and $5

Two persons	*Per day*
Room with detached bath,	$3, $3.50 and $4
Room with private bath—	
Double room	$5 to $8
Single room with double bed	$4, $4.50 and $5

Two Connecting Rooms with Bath

Two persons	$5 to $8
Three persons	$6 to $9
Four persons	$7 to $12

1026 rooms—834 with private bath

BUSINESS AND TRADE CONDITIONS

THE President's message to the Congress on Dec. 2 contained nothing sensational, because of which some partisans referred to it as so routine only. It did, however, contain, other than the usual persiflage about "profiteering," "rights of labor," etc., enough recommendations to keep the present Congress going for a long, long time at the task of its accomplishments during the extra session. The session, in all its characteristics, recalls vividly to mind a passage in Henry Adams's "Education," in a somewhat surprising chapter entitled "President Grant." Adams was discussing the character of representatives with a Cabinet officer who compared them with swine. In defense of the lowly Adams asked, "What, then, is a Senator?" and invited criticism. "Even Adams admitted that Senators pass belief," the passage continues. "The worst side of their egotism partly disguised its extravagance; but faction had gone so far under Andrew Johnson that at times the whole Senate seemed to catch hysterics of nervous bucking without apparent reason. . . . Even Grant, who rarely sparkled in epigrams, became witty on their account; but their egotism and factiousness were no laughing matter. They did permanent and terrible mischief"—as to all present appearances the present Senate did at the extra session. Every day the spectre of it all, like Banquo's, makes its appearance, now in a new and disquieting from and with a fresh unanswerable question, like the Bœotian Sphinx.

Paramount questions presented were the matter of tax reform and the establishment of a budget system for national finances, in order, in the first instance, to relieve industry of the burden of extraordinary and inequitable taxation, whose ultimate effect will be to discourage industry and to encourage extravagance; and, in the second, to put a check on the waste of public funds which is driving all democratic governments toward bankruptcy. The late Tom Reed of Maine ended the struggle for congressional economy with his deadly epigram, "This is a billion-dollar country." There has not since been a congressman dared imitate Holman of Indiana, once famous as the "watchdog of the Treasury." The history of French budgetless finance since 1830 has been one of amazing politocrat waste, an endless succession of annual deficits. Even Great Britain, which through all the war kept the gap between income and outgo closed, is now, under the type of government familiar at Washington, driving toward the same rock of annual deficit. There seems no way to reduce public expenditure and retain office at the same time—universal suffrage and direct primaries and legislative economy do not go hand-running; that governing is so pleasant, and in these days irresponsible, a trade everyone desires to engage in.

Mr. Glass, who has retired from the Treasury to the Senate, does not encourage the hope of any substantial reduction of taxation for years to come; perhaps because he knows the average congressman as well as did Grant's Cabinet officer quoted by Henry Adams, he is for the budget sytem to put a ring in the snout." The average congressman cares little and cares less about the incidence of taxation as it affects the cost of living. Mr. Wilson himself—speaking with one breath of the influence of high taxation on production and with another of "heartless profiteering resulting in the increase of the cost of living"—seems to have no more idea than has his law minister, that the tremendous taxation of the time, only a portion of which is national, has an effect on the cost of distributing the products of industry. No one connected with the various governments by which Americans are taxed seems to have. Taxation complaints are dismissed with, "Capital pay the taxes," but no explanation is ever made as to where "Capital" gets this wealth which annually is spent for the "public service" by men who themselves seldom contribute much to the sums spent. A policy of diminished expenditure on non-productive public works or on department fads carried over from the classroom of the professor of "sociology" does not appeal to the uneducated who vote but cannot see or understand that the taxes levied on the distributors are necessarily recovered in the way of increases in the prices from consumers who cannot "pass the buck" to the next lower down. Mr. Wilson did not hint at all at this, nor did he call attention to a contemplated military expenditure of 1,500 millions annually for future wars, assessed after a war that was to end all war by a Senate which rejected the most hopeful, if not perfect, plan ever presented to the world for that purpose.

The Administration's effort to control the coal strike was the most serious test it has had to meet of the efficiency of its government in domestic affairs forced to a crisis by radicals; and it is by no means certain that the Government has come out of it first best, as it did when President Cleveland crushed the railway strike at Chicago in 1894. The ominous feature of this strike has been the hardly concealed defiance of the Government by Mr. Lewis and his cabinet, in which they were openly abetted by the railway train men. At Pittsburg, Kan., after volunteer coal diggers had loaded coal, the train men refused to move it. In the non-union coal territory of Kentucky and Tennessee coal operators for a considerable time have for the same reasons been unable to obtain cars to load more than half their capacity; while on one of the principal railways in that section several miles of sidings were for some time crowded with loaded coal cars which the train men would not move until after a personal messenger has gone to Washington for relief. But it does not appear that official cognizance has been taken of this conspiracy against the public.

The contract which the miners signed in October, 1917, granting a huge increase in wages, bound the men "during the continuation of the war and not to exceed two years from April 1, 1918." It was understood by them then that after April 1, 1920, wages should return to the old scale. Now, of course, no one is contending for that now; but every honest man must protest against the brigand methods of the miners in violating their contract and in demanding more wages under the circumstances, and trying, with the aid of the railway trainmen, to freeze the people and stop the industries of the country to force compliance with their demands. No matter what increase is allowed now, whatever it is it is blackmail of the wage payer and the public and amounts to a bonus for the commission of a commercial crime—a standing incentive to the violation of similar contracts in the future at any time and on any pretext; and to that extent it will weaken or destroy the morality of all classes of workers demanding "collective bargaining." If the strike has any permanent moral result, it should be to absolutely discredit the "collective bargain" system and brand it for what it is: simply a weapon for abuse of the public. "Collective bargaining in the coal industry," as the November Review of the National City Bank of New York recalls, "has been under development long enough to now include all parts of the country; so that at the meeting held at Cleveland it was possible to make arrangements for closing nearly all the mines at once. This is collective bargaining developed to its highest efficiency, with the public facing calamity and apparently helpless. The officials authorized to bargain for the miners collectively do not offer to 'bargain' at all." They simply named impossible terms, and in this instance notified the President after his protest that unless their demands were granted the mining of coal would cease; and in spite of the command of the Government through its courts that mining should not cease, it did in fact cease so far as union miners were concerned; and the existing law of conspiracy does not permit any punishment of miners or their leaders for so wicked a procedure. So much for politocratic class legislation.

The strike may not run long enough to accomplish the smothering of industry or to work out its deadly intent of forcing the people to their knees as the price of coal. It has, however, developed enough yellow in certain self-styled great newspapers and officeholders to show how rare are the men in responsible places where public opinion is molded who stand for principle in the face of great inconvenience. The lost days of workmen counted by wages have run into the millions and the cessation of industry at a time when all commodities are running short of demand means still higher prices or the total disappearance of many kinds of goods for most people. The effect of it all on the cost and ease of living will be felt later, without doubt.

As far as November as a whole was concerned, the Federal Reserve Board's summary of reports say that "the eagerness and sustained buying capacity of the ultimate consumer" still kept the distribution of commodities at high tension. The rapid turnover of wholesale and retail dealers is outstripping current production, but of course it is swelling the profits of the merchants and they are content for the time being at least.

Delay in the ratification of the Peace Treaty has served to handicap those endeavoring to find the solution of the European credit problem, says the semi-monthly foreign trade bulletin of the Guaranty Trust Company of New York. Under the circumstances, the review urges that manufacturers and exporters assist the temporary situation by extending as long commercial credits to the responsible European buyers as circumstances permit. "As matters stand today," the review adds, "the United States is still technically at war with Germany and has no consular representation there. Spanish consular officials are offering what assistance lies in their power, which is necessarily limited. American business men seeking to buy goods or to expedite the delivery of raw materials are hedged about with restrictions many times more onerous than will be those of business men of other nations after their governments shall have deposited their ratifications with the Supreme Council. The same difficulty holds true in what remains of Austria. The consequence is that suffering and unrest continue in both these countries. Production is hindered, indemnity payments are delayed, and the remainder of the world bears the burden."

Nat C. Murray of the Bureau of Crop Estimates a few days ago concluded an arrangement at Des Moines by which the crop reporting services in that

state will unite with the Bureau of Crop Estimates in a co-operative state report. This will greatly enlarge the reporting service of the Bureau in Iowa by incorporating the corps of state reporters with its own, and will as greatly benefit farmers and others in the state interested in crop reports by greatly broadening the publication and circulation of the state report. The Bureau is now co-operating in the same way with a number of other states and will extend its co-operation to others as rapidly as the conditions seem ripe to make it mutually profitable.

TO POPULARIZE CHEAP FLOUR

THE statement of Mr. Barnes on another page, in explanation of the Grain Corporation's entry into the retail flour trade, is interesting; but it doesn't sound quite like Mr. Barnes. Mr. Barnes himself cannot believe that the price of flour, were it all patent, is the cause of the "high cost of living" or, indeed, constitutes so considerable a part of the family expenditure as itself to cause suffering through its cost, whatever that may be. Were it so, he might at least recommend to the public to use corn or rye flours, which are wholesome and less costly than even Government "straight."

It is about time the incidence of official comment be shifted from the high cost of living to the folly of paying the cost of high living, which no reduction in the price of flour alone will alleviate. There is no sign that any of the previous efforts of the Government to control the price of foodstuffs has to any material degree reduced "the cost of living"; certainly there has been no evidence of it anywhere. Straight flours have always been made and sold by the interior mills; but housekeepers, poor or rich, of the big cities do not seem to want them or there would be no need to force them, as the Corporation contemplates doing, in the benevolent belief that by so doing "a responsive social conscience," etc., can be "brought into play," or that thereby an opportunity is offered "to practice thrift when so minded." That sounds like some one else, by whom the natural law, which left alone would "adapt consumption to the product which is in ample supply and relax the strain on the flour which is in light supply," has always been ignored.

Mr. Barnes himself, in his letter says, and it is a sentence which seems to characterize the man: "except in time of war, Government should touch the individual preferences of its people with great caution; interference may easily cause distress and disaster; the experience and judgment of men in private business is the safest guide." Then why not practice it? An old French economic saying, perhaps now in democratic France become obsolete, was that, "The cure for high prices is high prices." Revised, this might be a solution of our present difficulties with production and prices. But to do so would mean sacrifice of pleasure, and it is not popular with the Administration for that reason, because the latter early adopted the principle that it is the main duty of the Government to make people happy though the sky falls, and now can't get away from the effort to do so.

CHARACTER OF A REAL FEED LAW

THE Ass'n of Feed Control Officials, at Washington a few days ago did the feed trade a real service by pointing out (we trust to our lawmakers) that the meticulous details proposed to be incorporated in a national feedingstuff act "with respect to percentage composition" are mainly worthless lumber, as has been repeatedly urged in these columns, "which in the minds of many cannot be enforced." Laws providing for a definite proportion of "cottonseed meal," for example, in a feed would be without any value, since the chemical contents of that product are by no means fixed quantities, but vary from many causes. So of other factors. There is but one standard which the label should insist upon, if insistence is to be made by law, and that is, adherence to a definite statement on the tag of the percentages of protein, fat and fiber in the feed. How the manufacturer attains those percentages is quite immaterial to the feeder who wants results, not label legends.

In order that the buyer of feed may obtain these things, which is what he buys feed for, it is not necessary that feed control officials, state or national, should have any power to pry into the factory secrets of formulæ or business office details of agents, customers, methods of purchase of raw materials or sale of the products. A law confined to the particular named would be welcomed by all feed manufacturers; one containing the latter named particulars (which is intended to be used for price control or other illegitimate purpose) would congeal in the law the meanest and most contemptible bureaucratic espionage, which no self-respecting man would tolerate except on compulsion, which would necessarily verge on the tyrannical and is a power which no free government should employ.

SECRETARY HOUSTON'S REPORT

THE annual report of the Secretary of Agriculture is of more immediate interest to farmers than to grain men as such. The progress and great performances of the farmers during the war and the immense values of their products are commented on strictly in conformity to the ebullient traditions of the Department. The farmer is a great fellow, but the program of uplift of this great institution outlined by the Secretary will absorb some millions of Uncle Sam's dollars.

Specifically, the most important new service contemplated is the enlargement of the activities of the Bureau of Crop Estimates, mention of which appears in the news columns, where some brief mention is made of the inability of the Department to grasp the fact that there is some one interested in this commendable work who is not a county agent or paid exploiter of some other Department fad. The great grain marketing machinery of the country, on which the farmer depends almost absolutely for the economical movement of his grain and pork, so far as the report enlightens one, has become as extinct as the dodo since the Bureau of Markets, the county agent and the coöperator were invented during this administration.

As a further apology for its continued existence the Federal Trade Commission again breaks loose on "the packers." Is this another "try" to sidestep Senator Jim Watson's probe for the bowels of this bureaucratic nuisance?

COMPLAINTS OF THE HAY RULES

FROM a shipper of alfalfa hay from the Far Southwest comes to us a complaint that the hay grading rules for alfalfa of the National Hay Ass'n "discriminate against" growers in that part of the country, because inspectors on arrival eastward do not always grade hay as high as the shippers say it graded when it started. He further says that it is well known that hay out 30 days or more between Arizona or New Mexico and Memphis or Atlanta "bleaches"; but as the feeding quality is not injured thereby, it ought to be graded at destination just as the shipper said it was graded when loaded.

The complainant will not get very far with any such criticism or proposition. The buyer will almost always insist on getting what he bought and is expected to pay for as to color and condition; and the fact that color may or may not affect the real feeding value of hay will make no difference as respects a specific contract. The complainant's contention in practice would simply open the door to useless controversy and pave the way for much deliberate swindling. There is only one way for a man to do business who expects to stay in the game —live up to contracts literally.

If it be a fact that whenever alfalfa loses grade

WEEKLY STATISTICAL SUMMARY.

The following tabulation is a summary of figures f various statistical exhibits appearing weekly in detai "The Price Current-Grain Reporter," these figures re senting the past week, the preceding week and co sponding time last year, here assembled for ready re ence:

	Dec. 6.	Nov. 29.	Dec 7
Wheat—			
Primary receipts.....	6,050,000	8,333,000	13,70
Primary shipments....	5,778,000	5,664,000	15,61
Receipts since July 1.	272,411,000	266,361,000	310,00

E ADVERTISING value of The Price ut-Grain Reporter as a medium for ng the buying power of the grain eleva- en is unquestioned. The character and er of advertisements in its columns tell worth. If you would be classed with ading firms catering to the grain trade, your announcements in the trade's only , which is always first to get the live, date news to its readers.

VERTISEMENTS of meritorious grain or machinery and supply houses and of sible grain firms who seek to serve dealers are solicited.

CAGO, DECEMBER 10, 1919

GRAIN TRADE REVIEW

ess the coal situation improves ially within the next few days it ghly probable that the grain trade ome to a standstill. While it is sential industry, still the quality s year's corn crop is so good that is little apprehension as to its g out of condition. Many coun- evators have closed on account of f fuel, and those at terminal mar- nay be forced to follow suit to a r or less extent. In order to pre- a blockade, the railroads would ced to place an embargo on ship- , and part of the arrivals at Chi- ast week looked suspiciously like ng up the lines preparatory for ency measures. What effect the g of the elevators would have on uture markets cannot be deter- , although it would appear that osition of hedgers in the Decem- elivery would be precarious, at There are no stocks of corn of uence at terminal markets, and little grain is in store is held at emiums over the future.

re has been considerable talk of sed country offerings of corn to for nearly a week, but as a mat- fact the quantities offered have ar below normal for this season, hose in closest touch with the y generally report that there is lisposition shown on the part of ers to sell. It is a matter of that unless a stock is accumu- at terminal markets during the supplies will not be burdensome ance of the crop year. The heav- ovement of the 1918 crop came in t two weeks in February and in and unless there is a marked in conditions from those pre- at present the same thing might ressed this season. There is still rable grain sold for December nt that must be taken care of, has had a bearing on the De- future.

ers are reported as free buyers of various parts of the belt, despite peated claims that the amount stock on feed was much smaller ast year. This is particularly true in parts of Illinois and Missouri, and there has also been considerable grain bought in Iowa. In a majority of instances the feeders have paid much higher prices than country dealers could afford, and hence when cars are available part of the movement will be directly to consumers and not to terminal markets. There is also much grain sold from Central Illinois to the east which will not pass through Chicago.

The Government final report on the crops of 1919 will be issued this week, and it would not be surprising if the corn crop was cut 50,000,000 to 100,000,000 bushels from the 2,910,000,000 bushels suggested by the November returns. Last year the final report showed 166,000,000 bushels less than in November, due to a readjustment in the acreage. The figures on the 1918 crop will also be revised. Practically all of the corn moving at the present time grades No. 4 and No. 5, with many above and a very small percentage below.

Argentine corn prices and ocean freights have declined to a point where the United Kingdom can now buy at about the maximum price, so that the demand for American grain has fallen flat and part of the corn reported taken recently has been canceled at a loss.

An increasing shortage of heavyweight oats is developing, and while premiums show little change from the previous week the bulk of the heavy grain received at Chicago last week sold at 80c per bushel or better. The foreign demand has been for 36-lb. oats, with a little 34-lb. taken, and handlers are said to have so much business now on their books for deferred shipment that a maintenance of premiums would seem probable. There is a strong underlying belief that ultimately higher prices will be witnessed. Stocks at terminal markets are decreasing despite the limited export clearance. If the export sales reported for some time past are correct, a considerable portion of the visible supply must be under contract to go out. The shortage in ocean room and the break in foreign exchange tends to hamper fresh business, and unless exchange stengthens, some reselling is probable. Nevertheless, in spite of the exchange situation foreigners continue to take grain. The domestic demand continues good, mainly for deferred shipment, while the country shows little disposition to sell. Perhaps 75c for No. 3 whites at country loading stations would bring out grain, but this remains to be seen.

Cash wheat prices are around the highest of the season, and the demand for choice grain from mills shows no signs of a falling off. The movement of spring wheat is decidedly disappointing, and large amounts of hard winter have been bought in the Southwest by Minneapolis mills. They would also like to secure hard winter at Chicago for Eastern plants, but have been unable to secure any material quantity so far. It is generally believed that the Grain Corporation has little hard winter of desirable grade left unsold at any of its stores. The fact that the Government was forced to resell wheat within such a short time after harvest, in the face of an extremely heavy movement, combined with the high prices, would seem to indicate that there was something wrong in the situation. Millers are inclined to look for very little Canadian grain to enter this country when the embargo on imports is lifted on Dec. 15. Choice springs are selling at $3 per bushel and over in almost every market, and very litle has been moved from the head of the lakes to the East, as has been the case in previous years. The foreign crop outlook is none too favorable from a statistical standpoint, while the winter wheat acreage in the United States has been cut down materially. The first of the private reports, by Goodman, suggests a total of around 39,000,000 acres, or 10,000,000 acres less than last year, and the smallest since 1914. The condition is reported several points below normal, with heavy Hessian fly damage already established in a large part of the soft wheat belt.

Grain Market Summary.

Receipts of wheat, corn and oats at primary points the past week follow:

	Dec. 6, 1919.	Nov. 29, 1919.	Dec. 7, 1918.
Wheat	6,050,000	8,333,000	13,700,000
Corn	3,784,000	4,391,000	3,607,000
Oats	2,713,000	3,117,000	6,611,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1919.	1918.
Past week	12,547,000	23,918,000
Preceding week	15,841,000	17,098,000
Since July 1	424,102,000	539,887,000

At no time during the past week were corn futures lower than the close of the previous week. December showed the most strength and advanced sharply on short coverings, getting into new ground on the present upturn. The market was heavily oversold, and the coal strike led to heavy short covering. Outside interest in the deferred deliveries increased. On the bulge longs took profits and a good reaction followed, but the finish was at net gains of 13@3⅜c, December leading. The latter acts congested, and shorts are nervous. The movement is unusually light for this season of the year. Rapid changes are expected to be witnessed for some weeks.

Oats advanced sharply to new high figures on the crop for the July, while the May only slightly below the outside price made during the summer. At the top prices were up to 3¾@4⅜c over the close of the previous week with December leading. The latter sold at 2c under May at one time, against 3⅛c the previous week, and cash houses were good buyers of that delivery and sellers of May, changing hedges. Final trades were at net gains of 2⅝@3⅜c.

Cash wheat prices continue around the highest figure on the crop, and with a small movement and a good demand depressing influences have been ignored. Demand for flour is still fairly keen, especially for the fancy patents. The Grain Corporation has started an advertising campaign on straight flour in an effort to check the advance. Flour prices have jumped again the past week. Clearances are fairly liberal again, and the visible supply has started to decrease. Range of prices the past week follows:

			Close		
Corn—	High.	Low.	Dec.6, 1919.	Nov.29, 1919.	Dec 7. 1918.
Dec.	$1.43½	$1.36¾	$1.39⅝	$1.36¼	$1.32
May	1.35⅞	1.31¼	1.33⅞	1.31	1.28⅝
July	1.36½	1.30⅞	1.32¾	1.31	.....
Oats—					
Dec.	.78	.73⅞	.77	.73⅝	.72¾
May	.80½	.77	.79¾	.76¾	.71⅜
July	.77	.73¾	.75¾	.73⅛	.....

World's Oats Exports.

Exports of oats last week, compared with previous week and a year ago as reported to the New York Produce Exchange by the George Broomhall service and forwarded to this paper:

	Dec. 6, 1919.	Nov. 29, 1919.	Dec. 7, 1918.
American	847,000	48,000	3,184,000
Argentine	396,000	618,000	779,000
Total	1,243,000	666,000	3,963,000

Exports of oats since Aug. 1, 1919, and comparisons for three years:

	1919-20.	1918-19.	1917-18.
American	20,832,000	48,562,000	52,578,000
Argentine	10,654,000	14,320,000	2,356,000
Total	31,486,000	62,882,000	56,934,000
Season	.....	113,282,000	140,826,000

Oat Stocks and Consumption.

Statement of the movement of oats and consumption in primary markets, compared for three years:

	1918-19.	1917-18.	1916-17.
P. stocks at Aug. 1	13,185,000	4,048,000	539,000
P. receipts to Dec. 6	103,574,000	145,946,000	151,941,000
P. shipments to Dec. 6.	67,702,000	105,938,000	108,468,000
P. stocks on Dec. 6	11,955,000	12,182,000	11,232,000
P. consumpt'n to Dec. 6.	37,102,000	31,874,000	32,720,000

The Missouri and Illinois division of the Community Millers' Ass'n at St. Louis recently approved a proposition to form an association to sell their surplus products in those two states.

Wheat in Primary Markets.

Receipts of wheat in eleven primary grain markets from Jan. 1, 1919, to Dec. 6, 1919, with comparisons with 1918:

	1919-20.	1918-19.
Chicago	64,251,000	62,174,000
Milwaukee	4,528,000	10,632,000
Minneapolis	66,431,000	68,340,000
Duluth	9,977,000	63,327,000
St. Louis	34,353,000	32,542,000
Toledo	6,587,000	4,517,000
Detroit	1,276,000	1,064,000
Kansas City	57,242,000	44,736,000
Peoria	2,177,000	2,984,000
Omaha	18,233,000	13,550,000
Indianapolis	6,356,000	6,136,000
Total	272,411,000	310,002,000

Receipts of wheat the past week at primary markets compared with the preceding week and corresponding week last year:

	Dec. 6, 1919.	Nov. 29, 1919.	Dec. 7, 1918.
St Louis	466,000	704,000	480,000
Kansas City	1,510,000	2,795,000	405,000
Omaha	366,000	518,000	684,000
Toledo	98,000	77,000	83,000
Detroit	22,000	25,000	61,000
Indianapolis	61,000	44,000	32,000
Peoria	38,000	26,000	8,000
Chicago	705,000	826,000	1,556,000
Milwaukee	143,000	101,000	539,000
Minneapolis	2,405,000	2,855,000	3,898,000
Duluth	236,000	332,000	5,954,000
Total	6,050,000	8,333,000	13,700,000
Shipments	5,778,000	5,664,000	15,616,000

World's Wheat Exports.

Exports of wheat last week, compared with previous week and year ago as reported to the New York Produce Exchange by George Broomhall's service and forwarded to this paper:

	Dec. 6, 1919.	Nov. 29, 1919.	Dec. 7, 1918.
American	9,287,000	5,916,000	8,627,000
Indian	.....	.....	.....
Argentine	4,377,000	5,134,000	715,000

HORSE STILL GOING STRONG

More Horses in Use Now Than Ever, Compared with Population, Farms and Improved Acreage of the United States

The Chicago meeting of the Horse Publicity Association of America, held on Dec. 4 and presided over by President Frederick M. Williams, of New York, was something that must be given due heed to by all and could have been attended with great benefit by many more than were present, even at considerable sacrifice of time and money to the absentees. It is a regrettable fact that people in the cities particularly, and a considerable percentage of the country folks also, are unconsciously led into false notions about the use of the horse, through the misinformation absorbed by reading the daily newspapers and magazines, wherein appear articles written mainly by superficial men interested in other things than the above, so misleading in their conclusions as to convey the impression that the rapid elimination of the horse is going on. It is to overcome such incorrect conclusions and to tell the farmer and the public generally just where they stand and what conditions horse owners and breeders and users must meet and compete with that the Horse Publicity Association of America was incorporated. These, the basic considerations of the economies of the situation, were fittingly covered by Pres. Williams in his address as follows:

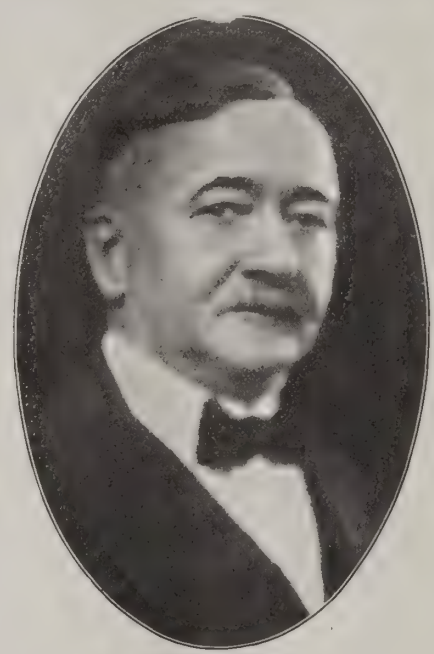
PRES. WILLIAMS' ADDRESS.

Friends of the Horse: In greeting you as friends of the horse I take special pleasure in the fact that we are gathered in the great metropolis of the West, whose every arch and pillar are eloquent of the progress which the Nation made under the time-honored co-partnership of man and horse. The vast prairies which stretch out from this throbbing heart of Western industry and trade, aye, every valley and glen, every mountain pass and trail that mark man's westward march from the Atlantic to the Pacific, bear the record of the inspiring service rendered to our civilization by the faithful friend of man in whose interest we have assembled.

The Horse Publicity Association of America advances no new or novel theory. Our cause is that of a friend, tried through the centuries, bearing the burdens of progress and sustaining a faithful coöperation with man in the development of the natural resources of the earth. We are not inviting the public to any new or doubtful experiment. The horse and his value are established facts. We are not dealing in fads or fancies. The horse stands upon the solid foundation of proved worth, unquestioned loyalty, and the production of billions of wealth for the comfort and happiness of mankind. To give this somewhat tardy recognition is to perform a plain duty, not only to lovers of the horse, but to the Nation whose greatness is largely due to the faithful service of the noble animal which bore its burdens, only to be rewarded with neglect during twenty years of motorized ingratitude.

While the true lover of the horse has been distressed by the apparent abandonment of the horse in the interest of motor-driven vehicles, no one will deny the value of the automobile as a means of transportation under certain conditions. We are not organized for the purpose of driving the automobile from its legitimate field. The mechanically-driven vehicle is here to stay. We make no war upon it. On the contrary, we invite the coöperation of thinking men who may be interested in the success of the automobile industry, but whose interest in their country overshadows all selfish considerations. There is room for the motor and the horse. Both are essential. Neither could be used to the exclusion of the other without irreparable injury to the country. However, we cannot overlook the fact that for at least twenty years the automobile has had a practical monopoly of publicity. The horse has been heard of rarely except in flippant or contemptuous jest. Yet through it all his invaluable service to the world has continued. With patience and fidelity he remains one of the Nation's greatest assets, a producer of wealth, an indispensable adjunct of our industrial, agricultural and commercial life. Not until the great war sent the nations of the earth in search of horses did the people of the United States awaken. Suddenly and with startling emphasis they were reminded that the extinction of the horse would be a national calamity. In every walk of life serious thought was given to the importance of the breeding and protection of the horse. The progressive farmer contemplated his empty stables with misgivings; the great corporations began to study the economic phases of the subject and discovered that in short hauls the economies favored the use of the horse. A wave of that good old-fashioned common sense, which is the salvation of men and nations, swept over the land, and we have as the first significant fruit of the awakening, the "Horse Publicity Association of America."

THE FARMER'S INTEREST.



The farmer's interest in this subject is three-fold: First, he is confronted with the fact that certain necessary work upon the land must be performed by teams. Second, his short hauls are more economically made by horse than by machine. Third, the horse is the very foundation of the market for a large percentage of the products of the farm. In considering the great law of supply and demand upon which the producer must depend for his market, it might be well for the farmer to ask himself whither he is drifting. If he turns his back upon the "old-fashioned horse" for the novelty of the gasoline horse, and if the country at large joins him in the change, where will he find a market for his oats, hay and other products now consumed by the horse? Does he know that horses consume 68 per cent of the oats produced in the United States? Is he aware that 45 per cent, or nearly one-half, of the vast hay crop is fed to the horse? Has he considered the fact that 18 per cent of the Nation's barley, 24 per cent of its corn and 25 per cent of its rye must be added to the demand which the horse creates for the products of the farm?

These are figures that should give the farmer pause. Above all other classes the farmer is vitally and fundamentally interested in the use of the horse. Banish the horse and you rob the farmer of a market which has returned billions of dollars to agriculture and which contributes hundreds of millions annually to the farmer's income. The twenty-five millions of horses in the United States constitute a vast army of protection to the farmer against the attempts of manipulators to lower the price of the products of the farm. When they tell us that the farmer has stopped raising horses because it is more profitable to raise cattle, sheep and hogs, we reply that such a conclusion is superficial and short-sighted. They lose sight of the fact that cattle, sheep and hogs are quickly slaughtered. The moment they are slaughtered they cease to be a source of revenue, while the horse, after leaving the farm, continues during a life-time, wherever he may be, to supply a market for the farmer's hay, oats and other grain. In short, the breeding of horses and the encouragement of their use constitute one of the most profitable lines open to the farmer. To neglect it is to invite depreciation and disaster.

HORSE BREEDING.

One of the important objects of this association is the encouragement of the breeding of horses. Statistics of the Department of Agriculture show that in the pre-motor days the country bred an average of one colt to every farm yearly. Recent figures reveal an average of one colt to every three farms. No wonder the country is becoming aroused on the subject of breeding! It is the hope of our association that the farmer will get below the surface of the subject and that agricultural sections will abandon the suicidal policy which the figures indicate.

If we are to guard against the great national loss that would result from a serious horse shortage, we must act promptly, intelligently, vigorously. Already there is an alarming shortage of heavy draft horses throughout the country, and we are unable to meet the largely increased European demand for American horses. As a result it is freely predicted that the grade of horse now selling for $200 will, within the next thirty years, command from $400 to $500. Horse breeding cannot longer be neglected without disastrous results. It is our aim to awaken an interest in the subject not only among farmers and industrial operators whose prosperity is vitally affected, but among the agencies of Government as well. This is more than a mere question of local or individual gain, it is a national problem of the first magnitude.

FRED. M. WILLIAMS,
New York City.

ROAD CONSTRUCTION AND IMPROVEMENT.

Another subject with which the association must deal is that of public roads. The public roads of the United States have a total of 2,478,552 miles, of which only 299,135 are improved with some form of surfacing. This leaves 2,179,417 miles of unimproved roads in the country. On account of the war new construction was necessarily deferred to a large extent during 1918. During the early part of 1919 forty-four states and county governments began making provision for road funds to an extent entirely unknown before. Thus, between Nov. 1 and July 1, 1919, state highway bonds were voted to the extent of $314,000,000. The Federal Government has also made provisions for a considerable increase in the amount of funds available under the Federal Road Act. The Post Office Appropriation Act carried an amendment which provided an additional appropriation of $209,000,000 for Federal coöperation in the improvement of rural post roads and forest roads. Altogether, there has been provided by the state and Fed governments, for road construction improvement, the generous sum of $ 000,000.

This brings us to a very serious p of the situation with which we confronted. During the present line craze the public roads are built automobiles. A smooth, hard, na strip of road, admirable as a race co for automobiles, but almost useless horse-drawn vehicles, is constructe public expense. Not only are t roads useless for horses, but under tain weather conditions are positi dangerous to horse and man, unless man be in the automobile. The far truthfully and justly reminds us he does not drive horses on the pu highways because there are no h ways for the horse. You cannot pect the farmer to breed horses to have them crippled and disable hard and slippery motor roads. In matter of roads the conditions worse than discouraging—they are tolerable. All authorities on the ject agree that not only are vast s being expended on roads which are clusively for motorized vehicles, but ing to defective construction t roads, within the next few years, be destroyed by the heavy motor tr which are being used in steadily creasing numbers. As a result, makers and users of motor trucks l launched a campaign for the const tion of special roads for their use accommodation. They are urging building of highways everywhere their exclusive use. Nowhere in t propaganda can you find a word in vor of highways for the horse. Sh their program be adopted by the l latures, there will be practical prol tion against the use of the horse public highways. In other words, are here confronted with an issue commands our immediate attention calls for an aggressive and determi campaign. Let it go forth from e farm and village, every valley plain, every city and mountain where friends of the horse abide, this flagrant wrong must be righ "Roads for the Horse!" must be battle cry everywhere at all times at every opportunity until the leg tive authorities put an end to the c and suicidal injustice which is bar ing the horse from the highways our land.

It is our contention that public r should be for the convenience of public; that the horse is too valu an asset to our country to be dri from our highways; and that the l that can be done by legislative thority is to provide a strip of road on either side of the automobile r suitable for horse-drawn vehicles. mistakes of the past should be rected. The plans for future r building must give just recognitio the horse. This question will brought to the attention of the pr authorities in every state in the Un Its importance will be urged upon gress and the Federal authorities. this work the association will need hearty coöperation of every society, sociation and individual in sympa with our aims.

I am confident that we will have coöperation. The business man showing encouraging signs of awa ing to questions of public interest. is beginning to realize that after "politics" is business under ano name. Taking the time to study question, he learns that governm are great corporations and that the government is that to which the business principles are applied. Government of the United States been described as the greatest busi corporation in the world. Yet the interests controlled or regulated by Federal and state governments have frequently been intrusted to professi politicians. The great man in pu life is a source of strength to the tion. We have upon the official of the executive and legisla branches of our Government na which we revere. Many of our pu

ials are entitled to the hearty sup-
t and unstinted applause of the pub-

Resting upon the principles which I have outlined and inspired by the motives to which I have given but slight expression, this association of earnest citizens will, I am sure, receive prompt recognition from the public, and reap the high rewards of success which the justice of its cause should command.

The Saddlery Interests' Survey.

A survey for the saddlery interests prepared at great length of time and money is now incorporated in the files of the Horse Publicity Association of America. It was delivered in full to the delegates and audience present at the Chicago meeting, and from it were drawn facts that may be considered prosy, but are absolutely germane to the full understanding of this subject by our great body of readers, most of whom are interested directly in the continuance of horse transportation with its paralleled large feeding operations. This, perhaps, most vitally affects the oats handlers because the hay interests have an anchor to leeward in the rapidly increasing dairy trade; but at any event and, as suggested herein for several weeks past, effort to awaken interest in the Chicago meeting, and in fully reporting the first meeting held in New York City on Oct. 30, "we must not 'kid' ourselves on the subject," to quote the phraseology of one of the leading speakers at the Chicago meeting. Now to the matter-of-fact figures, to which we urge the very first attention of our readers:

The saddlery survey, the full delivery of which covered two and one-half hours of time of the deliberations at the Chicago convention, using as a base the U. S. Government findings, as released in bulletins of the U. S. Department of Agriculture, show in 1910 a horse and mule population in the world of 105,400,000, of which 23% of the horses were in the United States and 43% of the mules. The U. S. census of 1870 was 8,370,000 horses and mules, and in all instances hereafter the figure cited covers both animals. In 1870 we had 38,000,000 people and the increase in the 20 years to 1900 in animals was faster than population; but from the period 1900 to 1910 the animals increased only 11%, while the population increased 21%, this loss occurring in states other than the Dakotas, Kansas, Nebraska and Iowa. In the period 1910 to 1919 the comparative loss has not been as great, the recovery being mainly in the Southeast and further West, in such states as Wyoming, Montana and Colorado.

We have an automobile census of 7,000,000, one-half million trucks and between 150,000 and 200,000 tractors. The latter are mainly used on farms of 100 acres and up, but in comparison with the total farms in the United States only 3% of the latter have tractors.

The European war drew heavily on our horses. It is significant that we have within a million fewer horses today than we would ordinarily have had if the European war had not occurred.

In considering comparisons of animals with the improved acreage of the United States, starting in 1870, we had 188,000,000 acres and 8,000,000 animals. In the 10 years to 1880, 46% increase in horses and mules compared with 50% increase in acreage. In the period of 1890, a 41% increase in animals and 25% in acreage. In the period to 1900 a 24% increase in animals, 15% in acreage; and to 1910, 11% in horses and mules and 15% in acreage. The estimated period to 1919 would show an increase of 10% horses and mules and 5% acreage. This is explained by the probability that large Southern esstates and Northwestern ranches are no longer being sub-divided to any considerable extent.

In considering the number of farms in the United States in 1850, it was found that 15% of our acreage was in farms averaging 200 acres each, whereas in 1890, 46% of our acreage was in farms, the size of which, however, is decreasing, averaging only 138 acres.

In 1870 we had 2,659,000 farms and 8,000,000 horses and mules. In the period to 1880 there was an increase of 50% in the farms and 46% in the mules. The progress in similar tables shows, for instance, from 1890 to 1900, 25% increase in farms, 24% animals; from 1900 to 1910, 10% in farms, 11% in animals; and to 1919, 3% in farms and 10% in animals. In the absence of census figures on these and other matters in this decade, absolute accuracy is impossible in the last nine years of course, but inquiries from those best posted and expected to know, form the basis of the conclusions drawn.

The survey for the period 1900 to 1910 of the loss in horses and mule population in some 26 states shows that 12 states were located east of the Mississippi and 14 west, 10 of the latter being in the great Northwestern grain producing areas. Tractor sales are not charged with this loss, because the heavier loss in comparison with the increased number of farms (we do not mean actual loss of horses and mules) was not in the leading tractor states. The explanation is offered for the reduced gains in the horse and mule population of the United States, that the demands of the Boer and other wars, which caused exportation of light horses for mounted infantry, was an advantage in one way, by withdrawing relatively inefficient animals and making it possible to centralize on the breeding of horses and better stock.

An analysis of the tractor, when originally announced as about to revolutionize American farming, does not show that it has done so. The tractor is everywhere approved as a supplementary power but not as a replacement of the horse, and its use is not justified in many instances by the cost of operation, as shown in various surveys of the Agricultural Department and experiment stations and other institutions. It is exceedingly valuable, however, for heavy work, for belt drives for certain farming operations, etc., but that the tone of the tractor advertising copy should be changed is clearly admitted in all coöperative meetings of the horse and tractor interests in joint convention, to where shoulder to shoulder work is preferable as likely to yield best results for all. Investigations in this line developed the same fact, that 90% of the farmers using tractors regard them as a profitable investment for the casual work above suggested and on very hot days, but not to replace the horse. The figures shown credited each tractor installation with the displacement of three horses.

There have been displaced, however, only 600,000 of the 26,500,000 horses and mules in the United, or 2% only.

It has been said by the motor-truck industry that farms offered a potential market for 3,000,000 sales. This is, believed to be much too high. At any event, in 1917, 79,000 motor trucks were used on farms, and the War Industries Board report for 1918, 64,000, a total of 143,000, displacing approximately 430,000 horses, or only 1.7% of the horse population.

THE FUTURE.

It is felt that the future will be governed by two things: First, the transportation requirements in the field and on the road; second, the course of development of tractors and trucks which will not displace animals until it is demonstrated that their ability to accomplish the work more effectively and economically is an actual fact. It is assumed, however, that farmers will buy both trucks and tractors without

Banquet of Horse Publicity Ass'n at Congress Hotel, Chicago.

full assurance of their need, economy or a sufficient volume of business to warrant such purchases, because they have the money. Then there are the possibilities of the combination truck and tractor, the latter being even more attractive than trucks to the farmer as a farming utility. The farmer mind, however, is receptive, and being acquainted with the advantages of quick transportation by his automobile he becomes willing to listen to arguments along similar lines with regard to the field and in his product transportation.

Considering the cities and towns, there are approximately 3,000,000 horses and 270,000 mules in urban use, showing for the period 1900 to 1910 an increase of 7%. It seems probable that this may not be mentioned, but it is believed that the next census will show about the same number of city animals as in 1910. It has been impossible to ascertain the percentage of this 3,250,000 city population which were carriage horses, but the opinion of men posted is that carriage horses are hardly a consideration these days.

As previously suggested, the breeding of better horses, heavier stock, with a great reserve power for heavy hauling and field duty, is a remedy for the forbidding aspect of the situation as it now exists.

In concluding, and quite to the surprise of laymen and to many posted on trade affairs, it was shown that there are more horses in the United States today compared with the population than ever before. There are, likewise, more horses when compared with the improved acreage of our country. A third comparison of horses and mules with the numbers of farms in this country shows an increase based on annual figures.

The Banquet.

The banquet of the Horse Publicity Association and allied interests was held in the Gold Room of the Congress Hotel, with about 1,000 in attendance. An interesting program was prepared. M. A. Taylor, president of the First Trust and Saxings Bank, Chicago, was toastmaster, and he introduced the various speakers with much wit. Among the speakers was Fred M. Williams, president of the Horse Publicity Association, who after acknowledging his appreciation of the West, where he resided from 1882 to 1899, when he went to New York, said:

"The Horse Publicity Association of America was organized for the purpose of rescuing the horse from the fate to which continued neglect and indifference would consign him. Our appeal is to the self-interest as well as to the sentiment of the people. The horse represents a source of power and wealth which must be conserved if we are to maintain our high standards of prosperity. It is our mission to bring home to the merchant, to the manufacturer and especially to the farmer, the great loss which the curtailment in the use of the horse would entail upon the country. Our campaign of education can be divided into three major parts:

"1. The value to the Nation and especially to agriculture of the breeding and use of the horse.

"2. The absolute need of public highways for horse-drawn vehicles.

"3. The economic advantage of the horse over the automobile for all short hauls.

"From the inception of this movement I have been confident of its success. Any possible doubts must have been dispelled by the encouraging nature of the present meeting. The great interest manifested, the high character of those who have participated in our proceedings, and the unanimous sentiment expressed, constitutes a guarantee of that harmonious and effective effort which spells triumphant success.

"I can assure you that in the Eastern states there is an awakening which will give to our movement a tremendous impetus. In the state of New York, upon whose farms there are 590,000 horses, the signs are most encouraging. I know from what I have learned during my sojourns in Chicago that the great state of Illinois is alive to the importance of our mission. Representatives from other states have convinced me that the spirit of New York and Illinois is no more enthusiastic than that of every other state in the Union. No geographical lines limit the interest in the horse. North, South, East and West, wherever men and women know and love the noblest and most faithful friend of man, the Horse Publicity Association has been gladly hailed and royally welcomed.

"A simple statement of our object is in itself an irresistible appeal to the intelligence, the gratitude and the patriotism of the country. You who have become the pioneers and pathfinders in this movement are to be congratulated. When the horse shall have been restored to the high place which he has earned among the fundamental contributors to civilization, you can have no prouder boast than the record of your participation in these proceedings.

"As president of the association I thank you heartily and sincerely for the interest you have shown and promise, with your help and coöperation, to keep the horse in evidence where he belongs, at the head of the procession of progress, contributing to the happiness and prosperity of mankind and receiving the recognition and rewards to which he is richly entitled."

Major General Leonard A. Wood made a most interesting address on the horse in the war which was greatly appreciated by all. He then turned his attention to the condition of unrest in the country and spoke ably and bravely about it.

Other speakers were M. B. Ketchem, Walter Monroe, Edw. O. Grady, Frank Young, as president of the National Hay Association, Harry Newman, P. E. Goodrich, as president of the Grain Dealers' National Association, Geo. Wentworth, Wm. E. Murphy, as secretary of the Horse Publicity Association, as well as Leslie Gates, president of the Chicago Board of Trade. Mr. Gates spoke of the intense interest the Board has in agriculture and stated that it is willing to do all it can to stimulate an interest in agriculture and would be glad to help the purposes of this organization, and that if the headquarters of the association were located in Chicago, he knew the members of the Board would give it a willing helping hand.

NEW SUITS FOR LOSSES.

The Farmers Elevator Co. of Coon Rapids, Iowa, has started suit against the C. M. & St. P. Ry. Co. for $700 alleged loss on corn from delay in transit. The car reached Chicago on time but was not delivered at the unloading point until after the lapse of thirteen days from the time disposition of the car was made. The corn went off in grade and a loss of 40c a bushel resulted.

The Farmers' Elevator Company of Ashkum, Ill., have started suit for $1,000 against the Illinois Central for loss on grain in transit. The Mt. Pulaski Grain Co., of Mt. Pulaski, Ill., and the Farmers' Elevator Company of Plainfield, Iowa, has likewise started similar suits against the same railroad for loss of grain in transit. Other suits by the J. S. Coon Grain Co. of Rantoul, Ill., Davis Bros. & Stevenson of La Rose, Ill., and L. M. Walker of Ridgeville, Ill., have been started against the Illinois Central and the Chicago & Alton Railroad. Owen L. Coon, 230 S. La Salle street, Chicago, represents all the shippers in each of the cases above mentioned. The suits represents real effective attempts to force the payment of just claims which have been declined as a result of Order No. 57 of the Railroad Administration.

Imperial, Belfast and Wayside, Neb., report an entire absence of coal and that farmers thereabouts are burning ear corn for fuel.

THE DECIMAL WEIGHT BILL

Bill Passed by the Lower House—Some Excerpts From the Speeches of the Debate—Just a Glimpse at the Congressional Mind

WASHINGTON, Dec. 6.—[Special Correspondence.]—The decimal weights bill, applying to wheat-mill and corn-mill products, namely, flours, hominy, grits and meals and all commercial feeding stuffs, was passed by the House on Monday after three days of discussion. Although its sponsors insisted that all interests approved of the measure and that not a single protest had been made to the committee on coinage, weights and measures, which held hearings upon it, considerable opposition developed on the floor of the House.

The bill now goes to the Senate. It makes 200 pounds the standard weight of a barrel of flour, and provides that the standard packages for wheat-mill and corn-mill products, when they are packed, shipped, sold or offered for sale in packages of 5 lbs. or over, shall be those containing net avoirdupois weight 100 lbs. or multiples of 100 lbs., or for smaller packages, 5, 10, 25 and 50 lbs. For commercial feeding stuffs only packages of 60, 70 and 80 lbs. are permitted in additon to the other weights.

Among amendments adopted was one making the act effective one year after its passage. The original bill had included such a provision applying to corn-mill products but had allowed only 90 days for wheat-mill products. This amendment was offered by Representative Vestal of Indiana, chairman of the committee on coinage, etc., who introduced the bill originally and had charge of it on the floor.

Representatives Mondell of Wyoming, Republican floor leader, and Mann of Illinois were among those who championed the measure. Representatives Wingo of Arkansas and Bankhead of Alabama, Democrats, were among the most active in opposing it.

"The object of the bill is to fix the standard of packages of wheat-mill and corn-mill products," said Representative Vestal in explaining the measure. "There are now in the country at least three standards. Seventeen states of the Union have no laws or statutes in relation to the standard of the flour package. One state, Texas, is now on the 100-lb. weight basis for all of the commodities mentioned in this bill.

"Also by investigation it is found that the standards fixed are not mandatory ones, in all transactions. Illinois, for instance, fixed the barrel whenever no special contract should be made to the contrary. We also find that some unusual units, such as 80- and 175-lb. sacks for feed products in Alabama; 17½- and 8¾-lb. sacks for cornmeal standards in Kansas and Oklahoma; and the 9.8-lb. sack allowed in Oregon.

"Under this bill unfair competition would be avoided. This proposes to standardize the weights in every state in the Nation so that they will all be on the same basis. I think there is no question that if this bill is passed it will benefit the consumer, for the reason that it is going to relieve the manufacturer of hundreds of thousands of dollars of cost that he has to carry now in overhead on account of the different kinds of containers that he has to keep."

Representative Wingo described the bill as "absolute folly." "Gentlemen, what a miserable, petty business this is when you go into it, trying to say how people shall put up their goods. You now have a law to make them brand every sack of flour that is sold with the weight, and the law requires a correct statement of the ingredients. That prevents fraud, but this proposal goes further and changes the customary standard sizes. The committee report admits that the standard barrel of flour is 196 pounds, and you frankly admit that you are going to change the standard to 200 pounds.

"We have fixed the standard of so many pounds to constitute a bushel of the different grains. That is all right. We require them to label the sack and packages with what is in it and the weight so that the purchaser shall not be deceived. That is all right. Say that no one shall put up anything except wholesome stuff, and that the container must state what the ingredients are. Go further and prevent the sale of partially filled packages. Such laws are all right, from the standpoint of protecting the public health and preventing fraud; but to say that you must use packages of only certain sizes and weights, and if you use one of a different size though correctly labeled and full, you shall be punished as a criminal, is foolish and unnecessary."

Representative Mann in advocating the bill referred to his experience when he was in charge of the pure food bill. "I defy any man in this House to tell the difference between a sack of flour containing 40 pounds and a sack of flour containing 35 pounds merely by looking at it. I brought into the House, on the pure food bill, can after can of the same article and defied men who were fighting me on the proposition to come and tell which was the larger of two cans by looking at them. When they would come down and pick out the smallest for the largest, I would put the cans on the scales and show them that they could not tell. The person who buys these things buys largely by the looks, and it is a fraud upon him to have one man selling flour in packages of 40 pounds and another putting up packages of 39 pounds and 35 pounds or somewhere between, and making the purchaser believe that he is getting the same quantity of flour possibly at the same or a slightly reduced price."

Representative Wingo in reply to a lengthy speech by Mr. Mann said: "Even an old experienced legislator as he is will get the headache when he comes to try to analyze this bill. It is like the famous snake railroad, which wriggled in and wriggled out and left the people all in doubt whether in it zigzag track it was going east or coming back."

Representative Bankhead declared that the large milling interests of the country were for the bill, but that there was no evidence to show any general demand for it on the part of the people of the country. "I believe if there is anything that the people of this country as a whole are sick and tired of," he said, "it is a continuance of these stringent Governmental regulations in the private business affairs of the people of this country. During the operation of the war measures extraordinary powers were conferred on the centralized Government here in Washington, and the people bore a great many of those things with patience because they recognized them as necessary. But here under a program of reconstruction there is deliberately brought in for permanent use in this country a series of regulations that violate absolutely, in my judgment, not only the provisions of the Constitution but any existing necessity for the passage of this legislation."

Republican Leader Mondell said it was easy to find fault with a bill of this kind but that "it is tremendously important to have a flour and feed products standard established." He said the people of the country "are being constantly imposed upon because there is no standard."

CORN MARKET FACTORS.

Factors surrounding the corn market at the moment are favorable for lower prices, but the market is so narrow that it congests itself within a limited range. It is well to keep in mind that contract grades are still at considerable premium, practically 1.45 for the December delivery. Market is considered as somewhat oversold and should therefore resist further pressure.—*Thomson & McKinnon, Dec. 6.*

Sec'y J. W. McCord Recovering.

Sec'y J. W. McCord of Columbus, O., who has been in Mt. Carmel Hospital for an operation, is rapidly recovering and by New Year's will be "a new man." Congratulations, Uncle Joe.

DIFFERENTIAL.—Ellsworth Huffman, chairman, Standard Cereal Mills, Chillicothe, O.; J. M. Allen, Shellabarger Elev. Co., Decatur, Ill.; J. L. Ford, Shawnee Milling Co., Shawnee, Okla.

SOME PRICES THEN, TOO.

An interesting relic of the past came recently to the editor's hands in the form of a receipt for money paid for grain sold in Chicago in 1864. It is written on the familiar light blue commercial paper of the time, and has a 2-ct. revenue stamp attached. It reads as follows:

"$8,160. Chicago, Sept. 2/64.

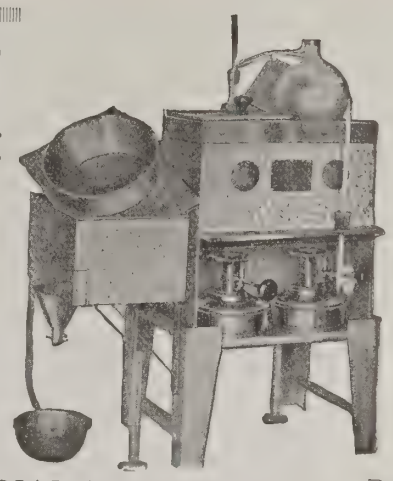
"Received of J. H. Easton, Esq., eight thousand one hundred and sixty dollars in full for four thousand bus. No. 2 Spring. Dow, Quirk & Co.

"Warehouse receipts left at First National Bank, Chicago, Sept. 3/64. Dow, Quirk & Co. instructed to sell when could be done for a profit and deposit proceeds with 1st National, Chicago."

The grain was shipped from Decorah, Iowa, or immediate vicinity.

A meeting has been called of the Inverness Burgh Food Control Committee in Scotland to protest against the ridiculously high price of oatmeal, which has advanced from 48s. per quarter to 70s., although oats are now decontrolled. The leading spirit of the movement says that of course it is a case of "high-handed profiteering."

YOU MUST KNOW!



You can't guess on grades nowadays. The Government standards show a difference of only 1½ to 2% of moisture between grades. A complete grading equipment could be bought with the loss incurred by undergrading ONE car of corn.

Be **sure** of your profits.

Be **sure** you do not pay too much.

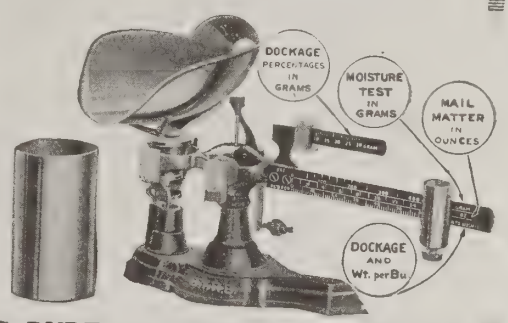
Be **sure** you do not receive too little.

There's only one way to be **sure,** and that is by using the **Government Standard** Grain Grading Equipment.

SEEDBURO (Trade Mark) OFFICIAL BROWN DUVEL MOISTURE TESTER

Official Government Corn Sieves

Made of one piece thick gauge aluminum, 13 in. in diameter, for accurate percentage determinations of dirt, foreign material and cracked corn, as specified in Grain Grades Act.



Light in weight and will not rust. Sieve telescopes into bottom pan, making a compact and convenient outfit.

Effectively used in connection with "Four-in-One" scale.

No. 11—One sieve 14/16 in. perforations and bottom pan.

No. 12—Sieve only.

No. 14 Special Four-in-One Scale

This scale, designed and manufactured by us, is a small, complete office scale for weighing samples for moisture test and for determining test weights per bushel, dockages, weights for mailing samples, etc.

This "Four-in-One" Agate Bearing Scale is the most complete, compact, accurate and adaptable scale made. Quick breaking and guaranteed accurate. Used by thousands of country shippers, receivers and grain men everywhere. Price with weight per bu. cup, $23.00. **Send for Catalogue 621 of Complete Grain Grading Equipment, Grain Triers, Sample Pans, Weight per bu. Testers, Etc.**

THE AGRICULTURAL REPORT

What the Department Proposes to Do in the Way of Collecting and Publishing Crop Condition and Yield Statistics

The annual report of Secretary Houston of the Agricultural Department was made public on Dec. 6. It covers of course all the activities of the Department; but lack of space makes it necessary to limit reproduction to the subject indicated in the caption.

"Did you ever stop to think," asks the clip sheet summary put out by the Department, "how many classes of people are benefited by dependable information on acreage, crop yield, number of live stock, farm surpluses, and the like? Such estimates, of course, are of tremendous importance to the millions of people who are interested in rural life, and especially those who, through legislative and administrative processes, are charged with the responsibility of aiding development of agricultural industry. They are of great importance, also, to county agents and other extension workers. But they are equally important to manufacturers and business men who supply farmers with equipment and machinery, to banks that furnish funds for financing crop production and movement, and to transportation companies for supplying cars when and where needed to move crops."

And incidentally, but of course only incidentally, to all appearances, so far as the report goes, they might be of some use to the men who are occupied with and responsible for the economical marketing of these crops, whose volume in money value runs into billions, finding consumers of them and ascertaining (not by classroom process of philosophical ratiocination, but by the process of paying cash for them) what the great consuming public of the world and in all parts of the world is willing to pay for them. But as to all this nothing is said—the Secretary is quite mum. Presumably he looks to his class of college boys lodged in the Bureau of Markets to attend to all that by "just a slight turn of the wrist—presto!" However—

"The time has arrived," says the Secretary, "for placing the work in all the states on a county basis. It is important that the live stock and feed reporting service be enlarged, that farm surpluses be ascertained, and that information regarding foreign crop and live stock production be more fully secured and reported. It is peculiarly urgent that this be done at this time. The new census is about to be taken. It will furnish new base lines, and the department should be in a positoin, by reason of an improved service, to supply the country each year after the census with as full and accurate data as possible."

ENLARGED FIELD FORCE.

If the enlarged program is approved, the Secretary says, the field force of the Bureau will be strengthened by placing an assistant field agent and a clerk in each state. Additional specialties, also, will be appointed to collect, interpret, and present information regarding special crops and classes of live stock.

"The Bureau then will be in a position to report for the Nation as a whole, for each state, and for each county, monthly or oftener if necessary, acreages to be planted; surpluses or deficiencies of seed, fertilizer, labor and farm machinery; acreages actually planted; progress of farm work; acreages abandoned and harvested; damage from weather conditions, insects, and plant diseases; condition of crops and forecasts of production; yields per acre and production at or near harvest; acreages and yields of principal varieties of each crop; dispositoin and utilization of the crops produced; marketable surpluses and stocks on farms; prices received by farmers as distinguished from market quotations; prices farmers pay for supplies, machinery, and equipment; hours and wages of farm labor; and the foreign situation. These reports will cover about 70 crops, including such special items as vegetables, nuts, fruits, seed, oils, forest products, and nursery stock, for all which adequate reports have not been available, except in the census years.

LIVE STOCK TO BE INCLUDED.

"Likewise, there will be given the number of horses, mules, dairy cattle, beef cattle, swine, sheep, goats and poultry, by age and sex classifications corresponding with the census enumeration of January, 1920; of pure-bred animals of each kind; of those bred, born, or brought onto the farm; of those sold, slaughtered, or lost through disease, exposure, or other causes; of those remaining on hand and on feed; the condition of the various classes of animals; farm prices; and the feed situation, including the carrying capacity of pastures and ranges, the number of silos, the quantity of silage and other forage available, as well as the domestic meat, dairy, poultry, wool, and hide production, and the foreign situation.

"Available foreign crop and live stock estimates will be secured and published, especially for countries of deficient supply and those of surplus production in competition with the United States, and periodical world balance sheets will be prepared, showing for the principal countries of the world the production requirements, imports, exports and net deficiencies or surpluses of the major crops and classes of live stock.

"It is proposed to establish intimate coöperative relations with state departments of agriculture and state assessors. In this way greater accuracy will be secured and the aggregate expense to the states and the Nation reduced. As the value of reports depends not only on their completeness and accuracy but also on their quick availability, they will be issued very promptly and more frequently, summaries will be released on dates of issuance, and the *Crop Reporter* will be changed from a monthly to a weekly basis.

COUNTY ESTIMATES IMPORTANT.

"It need scarcely be pointed out that county estimates are of great importance to the work of the county agents and the extension service in each state to manufacturers and business men w supply farmers with equipment and m chinery, to banks which furnish fur for financing crop production a movements, and to transportation co panies for supplying cars when a where needed to move crops. They ha already been made in a number states. Preliminary estimates of ac ages intended to be planted will ena farmers to determine whether th plans should be modified. Estimates surpluses or deficiencies in the suppl of seed, fertilizers and farm help te to equalize both distribution and pri and to insure adequate farm producti Estimates of acreage, yield per ac and production of each principal vari of a given crop, in addition to to production of the entire crop, will sh the relative adaptability and product ity of varieties, and therefore will be assistance not only to farmers but a to seedsmen and to crop specialists a plant breeders of the state experime stations and of the Federal Departme of Agriculture. Those of crop dama

NOTHING TO SELL
An Industry Explained

You may read this with greater interest when we say to you that it is not intended to sell you anything. Its purpose is merely to give you information of value to every feeder of farm animals.

The manufacture of mixed feeds is just as essential to profitable feeding as is the manufacture of modern agricultural implements to profitable farming. Both are the practical outgrowths of the pressing need for improved methods, greater economy and increased production.

Manufacturers of ready mixed feeds offer dairymen and stock raisers, large or small, important advantages which, in most cases, would not be obtainable in any other way, viz:

1—Their expert knowledge of animal needs for health, growth and greatest production.

2—They put scientific precepts into practice in the preparation of feeding rations for specific purposes.

3—Act as purchasing agents for the feeder, being able to take advantage of favorable market conditions to secure raw materials at the right time and price.

4—With facilities for correct mixing on a large scale, they produce ready-to-feed rations at lowest cost.

5—Maintain chemical supervision and control of manufacture, without which uniform quality of feeds cannot be secured.

6—The manufacturer performs the functions of banker, warehouseman and distributor and is always ready to serve the feeder.

The mixed feed industry has grown to enormous proportions, involving investments in manufacturing facilities running into hundreds of millions. The sale of ready mixed feeds has grown to many millions of tons annually.

These facts are convincing proof that ready mixed feeds have unquestionable merit, and that the industry satisfies a real need. No industry can grow to such proportions and hold the confidence and good will of the buying public for years without giving value for value.

RPORATION AND H. C. L.

Barnes Explains Why the Corporation nters the Retail Flour Trade—To Popularize Straight Flours.

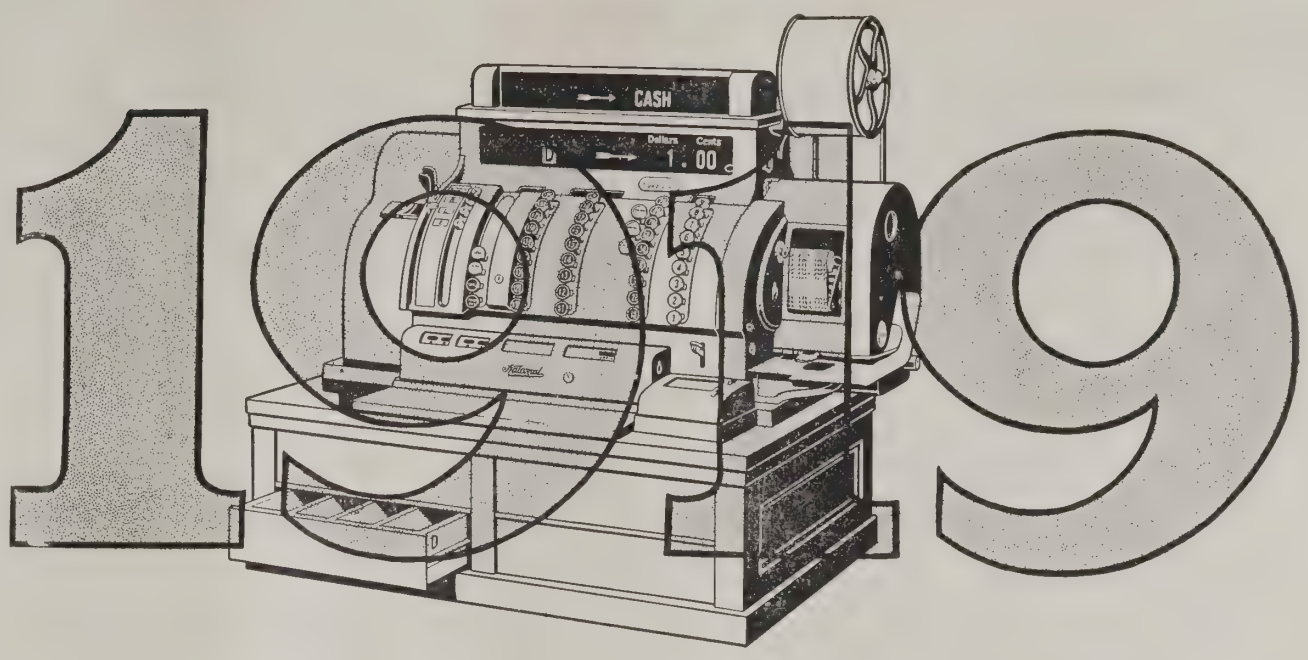
tlius H. Barnes, United States at Director on Dec. 2 addressed an letter to the housewives of Amer- asking their coöperation in the ad- nent of the present flour situation the proposed sale by the Govern- t, within the following two weeks, raight flour in small packages at a inal cost. The letter follows:

'hrift is common-sense spending. ise spending may not always indi- lack of thrift but perhaps ignor- or misconception, or just habit. 'ake the case of flour. Mill prices e from $10@14 per barrel. Why? n, certain varieties of wheat are ng 80c per bushel above the Govern- guarantee price. Why? Last all kinds of wheat and all flours almost uniformly the same.

he Grain Corporation does not de- to replace the usual trade facilities our handling. It much prefers that stablished channels should give the ate consumer the opportunity to ice thrift when so minded. To make ed, however, that such opportunity ffered, the Grain Corporation, by middle of December, will have in of our cities not already provided similar flour at similar prices suit- retail packages [5c and up] under ame "United States Grain Corpora- Standard Pure Wheat Flour." This ing done because from every na- l standpoint it is desirable that individual consumers and our 's re-adapt their consumption to he product which is in ample sup- his year and relax the strain on character of flour which is in light y.

o authority exists in the wheat nty law to control the maximum of wheat or of flour. No authority for prescribing the character of to be made and no authority for ring "war flours" or "substitute ," and no necessity exists for Besides, except in time of war, nment should touch the individual ence of its people with great cau- Interference may easily cause ss and disaster. The experience udgment of honest men in private ess is the safest guide. But the onscience may be succeeded by a sive social conscience and com- ense spending. Price competition he restriction of consumption by influence alone is ungenerous and to those of limited purchasing r.

ese are the facts of a most inter- wheat position which make ad- e a re-adaptation of the habits of our consumers:



st. An increase in flour and consumption. In five months, U. r production records an increase last year of over 10,000,000 bbls., increase has been either eaten or on the shelves of our people or each. This consumption increase irable from every point of view, ing the strain on higher-priced Our large crop of wheat will or it.

nd. A shrinkage in the crop yield ng-sown hard wheats by 150,000,- s., and a corresponding increase yield of winter wheats. This re- for a balanced consumption a g of part of the demand from d to the other. Soft red winters old in the past, more years at remiums than have other kinds, s year they are the lowest priced. rd. The elimination on Dec. 15 export and import embargoes. o years these have been main- to provide equal distribution of plies to ourselves and our Allies. re no longer vital, and their re- will begin the reconstruction of tional trade connections that nction when the Grain Corpora- tires. This may admit Canadian f the strong variety to make up the shortage in our own, but Canadian export, controlled by a Canadian Wheat Board committed to a policy of operating for profit, can not be counted on to respond fluently to the usual play of demand. At all events, is it not in the national interest to consume the product of part of our own farms and at a reasonable cost than to maintain the high premium market for the benefit of Canadian growers?

"This situation requires the consideration of all our people. The grocer should not continue blindly the stocking of accustomed brands regardless of their advancing prices, but should encourage the sale of the lower-priced wheat flours. Not to carry them puts a discount on national thrift. Bakers can increase the mixture content of these flours and by care and skill maintain the quality of bread with benefit to his raw material cost.

"The Bureau of Labor Retail Price Reports indicate that for twenty months the average price of one-sixteenth barrel (12¼ pounds) in this country has been 81 cents to 89 cents. This opportunity offers the retail price of flour at about 75 cents. Let us prove it is not true that our people are reckless in expenditure and exercise no thrift, either for themselves or in protection of those unable to enter into price competition. If retailers represent this flour as unsuitable, our people should by test be their own judges. On and after Dec. 20 the offices of the United States Grain Corporation at New York will answer inquiries as to what retailers handle this flour."

Fred Guthoff in Blackhawk Co., Ia., is boasting of the high average yield of 59 bus. corn per acre from 127 acres; and yet 59 bus. is not over two-thirds of what with a perfect stand every acre in the Corn Belt should produce.

1919

Our business doubled this year

WE did twice as much business this year as we did during any other year in our history.

This shows that merchants realize more than ever before that they should get their store records quickly and economically by machinery instead of by the slow, expensive hand method.

It shows in the best way possible that up-to-date National Cash Registers are helping merchants solve their problems most satisfactorily to themselves, their clerks, and their customers.

It is the very best evidence that our efforts to build a labor and time-saving machine are appreciated by merchants everywhere. It shows that up-to-date National Cash Registers are meeting the needs of retail stores in every country in the world.

Up-to-date National Cash Registers are a business necessity

The National Cash Register Company, Dayton, Ohio
Offices in all the principal cities of the world

News of the Terminal Markets

DES MOINES.

A. J. Cheeseman, Correspondent.

We expect within the next two weeks to publish a daily market bulletin, for distribution to the grain trade tributary to Des Moines.

Receipts for the week were 53 cars corn, 30 cars oats, 2 cars hard wheat and 2 cars dark northern spring wheat. Sales light, consisting of 6 cars corn and 9 cars oats. Cash corn: No. 4 mixed, $1.36; No. 3 yellow, $1.40; No. 3 white oats, 76c, and No. 4 white, 75c to 75½c.

The car and fuel situation the past week has resulted in very light trading. About eight inches of snow fell again yesterday and today, which, on top of what fell a week ago, will make excellent sleighing, and if the car situation should improve next week and weather conditions remain normal, a good movement of corn would follow.

Visitors on the exchange the past week were: George C. Martin, of Goffe & Carkener Co., St. Louis; Robert Lamphear, of Addison Grain Co., Kansas City; John Gannon, Valeria, Ia.; E. R. Schlosser, Colfax, Ia.; O. M. Thompson, Roland, Ia.; Ed. Warner, Bagley; J. B. O'Malley, Bouton, Ia., and H. D. Harding, vice-president W. H. Bartz Co., Rock Creek, Kans.

PITTSBURGH, PA.

H. B. Laufman, Correspondent.

All arrivals of good shelled corn are being taken at better prices than have prevailed for some time. Graded corn is in good demand but soft varieties are difficult to place at any price. Quotations follow: No. 1 yellow, $1.60@1.61; No. 2 yellow, $1.58@1.59; No. 3 yellow, $1.53@1.56; No. 4 yellow, $1.47@1.52. Total receipts of corn for the period were 33,800 bushels, compared with 18,200 bushels for the previous year.

Regular quotations have been resumed on the ear corn market, with all arrivals in good demand. Receipts are nothing to remark about but there is a considerable increase over the number of cars being received a short time ago. Ear corn received here is good sound stock and that is what buyers are demanding at the following prices: No. 2 yellow, $1.40@1.41; No. 3 yellow, $1.32@1.37; No. 2 mixed, $1.38@1.39.

Owing to the good demand for oats and the scanty arrivals there has been a good bulge in the market here. Prices were strong and all arrivals are being readily placed. The oats market is now in the most flourishing condition of the present year and all signs point to a healthy condition for some time to come. Total receipts were 44,000 bushels, as compared with 58,000 for the same period a year ago. Quotations follow: No. 1 white, 86¼@86½c; No. 2 white, 85¾@86c; No. 3 white, 84@85c.

DETROIT.

John Barr, Correspondent.

Barley is quiet and firm. There is not much coming to this market, but demand is active. No. 3 is quoted at $2.80@2.90 per cwt.

Buyers have been in the market all week for rye for export and local mills have shown some interest in the deal. The price advanced 10c, to $1.58 for cash No. 2. Shipping has recently been quite active.

Demand for beans came to life last week and the market gained 25c, selling up to $7. Some dealers believe the improvement comes from the promise of trouble with Mexico, in which case the army will be a buyer of beans.

Wheat has been in pressing demand for several days and the price is up 8c. Receipts are not large and there is competition for all offerings between shippers and local millers. Quote: No. 1 red, $2.38; No. 1 mixed, $2.26; No. 1 white, $2.26.

The corn market is dull and easy. Prices have been working lower and demand is at the vanishing point. Buying is slow and receipts are not large. The market is quoted 2c lower. Quote: No. 3 mixed, $1.50; No. 3 yellow, $1.52; No. 4 yellow, $1.48; No. 5 yellow, $1.44; No. 6 yellow, $1.40.

Receipts of oats have been light all week, falling considerably short of the needs of local consumers. At the same time there has been an increase in demand. The East has been an active bidder and Detroit consumers have been in the market for supplies all the time. The market shows an advance of 6½c. Quote: Cash, No. 2 white, 85½c; No. 3 white, 84½c; No. 4 white, 83½c.

Jefferson D. Hardin, Jr.
Foreign Grain Freights
Grain Forwarding
NEW ORLEANS, LA.

E. G. Tanguay, prominent business man of Quebec, was on 'Change last week, having just returned from a visit to France. He gives a gloomy view of conditions in Europe and says the people must to a great extent be fed by America or perish. They have no money with which to secure fuel or rebuild their ruined homes. Many towns and cities are practically the same as when the Germans left. They lack men and materials with which to build.

NASHVILLE.

John Leipes, Correspondent.

The coal shortage has been steadily growing more serious, and is resulting in slowing down of all business.

Receipts of grain at Nashville last week totaled 109 cars. Stocks at the end of the week were: Flour, 42,100 bbls., decrease of 1,500; wheat, 636,000 bus., decrease of 195,000; corn, 14,000 bus., decrease of 131,000; oats, 394,000 bus., decrease of 22,000.

Demand for corn meal continues below normal. Southeastern corn mills, with capacity of 153,000 bus., had output last week of 19,803 bus., or 12.9 per cent of capacity, compared with 13.2 per cent of capacity for mills reporting the preceding week. Prices: Bolted meal, sacked, f. o. b. Ohio river points, per 100 lbs., $3.40@3.50; unbolted, $3.30@3.40. Prices are stronger.

Millers are buying only enough wheat at recent advances to cover their demands. Most of the purchases are being made in St. Louis. Corn is in very light supply, weather being bad for more than month for local movement by farmers. Oats are in fair demand but car shortage curtails business. Prices: Wheat, No. 2 red, western, $2.45@2.50; corn, No. 2 white, $1.65@1.68; No. 3 white, $1.63@1.65; No. 3 mixed, $1.60@1.63; oats, No. 3 white, 87@87½c; No. 3 mixed, 83½@87c; No. 3 red, 87½@88c.

MEMPHIS.

George Williamson, Correspondent.

The Delta Flour & Feed Company, under the management of M. G. Odoneal, is going to erect a $100,000 concrete warehouse at the corner of Iowa and Kansas street.

John B. Edgar, who will on January 1 share activities between being at the head of the city's fire and police department and his grain and feed business, is just back from New York, where he spent about ten days. He was looking into the operations of the metropolitan police department in his business capacity, but says he spent his evenings enjoying opera, as he is a faddist on fine music.

Although business during the present fall has proven better than expected, since the trade have figured up what they have done, there continues to be little activity. Some are disappointed because demand has been slow opening up, but they realize that abnormal conditions are everywhere and that the grain trade is not immune. Prices are tending a little higher, and oats on Saturday displayed more snap than in some time. Several cars of No. 3 white changed hands at 84c, although the first sale of the day was at 83½c. For cash No. 2 white 84½c was bid and 85c asked, while Texas No. 3 red sacked were offered at 98c. Corn continues to drag, but undertone is steady. Mississippi buys ear corn chiefly, but it is realized that it will not be long before demand will necessarily improve. On call today $1.60 was asked for No. 3 white; for No. 3 yellow, $1.54 was bid. No. 4 white was $1.49 bid and $1.50 asked; No. 4 yellow, $1.49 bid and No. 5 yellow, $1.45 bid and $1.49 asked.

INDIANAPOLIS, IND.

Myron R. Green, Correspondent.

Flour prices are firm and showing a tendency to advance.

A fire which started in the bakery of E. O. Davis, Goshen, Ind., caused a loss to several adjoining business houses estimated at about $75,000.

Demand for corn is stronger this week but the movement is very slow. The car situation is materially relieved, but the farmers appear to be holding off for a better price.

The American Baking Co., of Greensburg, Ind., incorporated with a capital of $100,000, to do general baking business. Directors named are Frank W. Gray, Hammond M. Walker and Earl Likem.

In some parts of the state wheat sowing continued up until almost the first of the month, but the ground was cold and wet and it is thought that the seed planted so late will rot. The acreage is very much shorter than last year.

Members of the Indiana Grain Dealers' Ass'n registering at the secretary's office this week were Elmer Hutchison, Arlington; George W. Rohm, Rockville; William L. Bosley, Midway; John A. Dorsel, Liberty, and George Cain, of Connersville, Ind.

Local business with flour mills has been better this last week than for many weeks past. A greater freedom in the buying of both bakers and jobbers is evidenced and from the volume of orders for future delivery, the trade appears to be taking on a little new life.

Reports of destruction from the Hessian fly are coming in from many parts of the state. No estimate as to the amount of damage done is available at this time but it is generally thought that it will be greater than last year. Some districts show an infected area of about 40 per cent of the field.

SIOUX CITY, IOWA.

Paul Larson, Correspondent.

Mr. McClintock, of St. Joseph, is manager of the D. S. Warwick Grain Co.

H. S. Nevelier, manager of the McCaull-Dinsmore Co., transacted business in Minneapolis the last of the week.

D. J. Kennedy, of the Atlas Elevator Co., of Minneapolis, spent a couple of days with their office here the last of the week.

E. J. Pratt, of Chicago, succeeds V. E. Smith as manager of the Armour Grain Co. branch in the city. Mr. Smith resigned to accept a position with the Slaughter-Burke Grain Co.

W. H. Shepard, who has been manager of the Merriam Commission Co. since they opened offices here, has resigned his position and will be associated with the Sloan-Simmons Grain Co., of St. Joseph, Mo.

The Grain Belt Cereal Co., a Sioux City corporation, capitalized at $500,000, will erect a mill on the site recently purchased in Leeds. The daily output will be 500 barrels of wheat and oats products. The directors of the corporations are Washington Aldrich, Fred. H. Free, Carlton M. Magoun, N. P. Swanson, of Sioux City; R. A. Johnson, of Elk Point, S. Dak., and Reese Harris, of Akron, Iowa. Mr. Aldrich will have charge of the plant. His experience in the cereal mill business has been extensive as he was associated with the Cream of Wheat Company for eighteen years.

The annual meeting of the stockholders of the Sioux City Board of Trade was held at the Martin Hotel on December 2nd and was attended by nearly the entire membership. The following board of directors were elected: H. J. Hutton, Wm. Slaughter, L. C. Button and J. T. Scroggs. J. A. Tiedeman was re-elected as president and L. C. Button was elected treasurer. Mr. Tiedeman, in his address, referred to the necessity of greater storage facilities for the development of the Sioux City grain market. Secretary J. C. Mullaney presented a brief report in which it was stated that the Board of Trade had had the most prosperous year in its history.

BUFFALO.

E. Bangasser, Correspondent.

Feed millers here are reported doing an active business and prices are generally strong. Millfeeds were also higher.

Rye holders in store were asking high prices and some sales were made. No. 2 on track was quoted at $1.60 and No. 3 sold at $1.55.

Several cargoes of winter storage grain arrived here this week, but the amount booked for this port is extremely small, compared with previous years.

There was an active demand for red, white and mixed winter wheat here this week and prices were advanced sharply. Buyers at the close of the week thought sellers were overdoing it and held off. There were only a few cars here, however, at the close and millers were bidding a little lower than the asking price on the best offerings.

There was no trouble in selling oats this week, and the advance was steady, closing 4c higher than last week. The receipts were light and it was easy to get a premium for the heavy weights. Not much doing in store oats. The feeling here is that prices are going higher as the demand exceeds the supply and shipments are expected to be light. Closing: No. 1 white, 87¼c; No. 2 white, 86¾c; No. 3 white, 85¾c; No. 4 white, 84¾c, on track, through billed.

Corn sold up 6c and then started to break after buyers seemed to have supplied most of their immediate wants. At one time it looked as if they could not get enough. On the whole there was a very good trade in all grades and there were few cars unsold today. Closing: No. 1 yellow, $1.64; No. 2 yellow, $1.63; No. 3 yellow, $1.61; No. 4 yellow, $1.58; No. 5 yellow, $1.53; No. 6 yellow, $1.45 on track, through billed. A few cars of yellow ear corn sold at $1.45. Store corn was dull.

Inspection track receipts for the week: Wheat—No. 3 red, 2 cars; No. 4 red, 1 car; sample, 2 cars; No. 3 soft white, 4 cars; No. 2 mixed, 4 cars; No. 3 mixed, 8 cars; No. 5 mixed, 1 car; No. 1 hard winter, 1 car; No. 2 hard winter, 10 cars; No. 3 hard winter, 47 cars; No. 4 hard winter, 16 cars; No. 5 hard winter, 3 cars; sample hard winter, 1 car; No. 1 northern, 2 cars; No. 3 northern, 1 car; No. 4 northern, 5 cars; No. 2 dark northern, 1 car; sample wheat, 2 cars. Corn—No. 1 yellow, 2 cars; No. 2 yellow, 8 cars; No. 3 yellow, 27 cars; No. 4 yellow, 49 cars; No. 5 yellow, 19 cars; No. 6 yellow, 1 car; sample, 8 cars; No. 1 mixed, 3 cars; No. 2 mixed, 1 car; No. 3 mixed, 2 cars; No. 4 mixed, 6 cars; No. 5 mixed, 3 cars; sample, 3 cars; ear corn, 2 cars; No. 4 white, 2 cars. Oats—No. 1 white, 9 cars; No. 2 white, 32 cars; No. 3 white, 19 cars; No. 4 white, 3 cars; sample 3 cars. Rye, 2 cars sample.

UNION TRUST COMPANY CHICAGO
A BANK OF STRENGTH AND CHARACTER

THE B/L BANK OF CHICAGO

With the prospects of bumper crops, the strain of financing on the banks of the country is greater than ever before.

We solicit inquiries regarding facilities for IMMEDIATE CREDIT and DIRECT COLLECTION at MINIMUM COST of Bill of Lading items on all receiving points in the United States and Canada.

Such an arrangement provides the simplest and most convenient, as well as economical, method of crop financing.

FORT WORTH, TEXAS.

G. E. Blewett, Correspondent.

Latest estimates from reliable sou would show at least 40 per cent reduc in acreage of red winter wheat sown very little possibilities of this being creased to any appreciable extent. In hard winter belt this reduction will amo to about 25 per cent, although there is yet for sowing in that section and acreage may run about 15 per cent. decrease is caused by several things, as weather conditions, which were most unfavorable ever known; diffic of securing labor to take care of o crops; dissatisfaction of farmers over t inability of securing threshers for t crop which resulted in thousands of a being lost; scarcity of cars, which vented anything like a normal moven of grain.

Where plant is up it shows good st and plenty of vigor and with abun moisture now in the ground it would s that a good yield might be expected next year. About 90 per cent of the winter wheat has moved from the fa and about 60 per cent of the hard wi Farmers have been free sellers and sufficient rolling stock been procurable elevator space available there would h been a much heavier movement.

Mills and elevators are still payin good price for wheat of milling value v bids made as high as 35c per bushel Government price for hard winter and per bushel for red winter. Practically wheat moving for export as these miums are too attractive.

Supply of red winter is about exhaus and mills are now seeking milling wh from outside sources. Plenty of hard w ter is still available, however, the mo ment is very light.

Mills report good business with he bookings for the holiday trade at g prices. Some apprehension is felt over fuel situation which is causing some ind tries great anxiety for fear they will compelled to close down unless immedi relief is had.

Demand for mill feeds stronger althou prices are sharply under those from Nor ern houses.

Movement of Milo Maize and Kaffir never been so light as this season those who sold these articles short finding it almost impossible to cover th contracts at any price. Prices now b quoted are 50c cwt. over those made thi days ago and as there is quite a la short interest in this for 1919 shipment expect to see these prices maintain th present level should the weather be fav able.

NEW ORLEANS.

Thos. C. Robinson, Correspondent.

Offerings of oats have been free fr primary markets, and, apparently, sh pers there have been faring better th the interior country elevator man. Sacl oats have been quoted at 92c per bus delivered and bulk at 86c. Some few sa of oats have been made. Offerings large, while the demand is slow.

week ended with a more hopepect, owing to milder weather, the of state efforts in Missouri and City to mine coal and the indicarom Washington that the great ould soon be settled.

Cash Grain Markets.

t—Receipts for the week, 1,163 cars, 1,962 a week ago and 359 a year spite of depression in flour trade s from the coal strike and fuel , both local and outside mills con- o be urgent buyers of choice qualthe various grades of hard wheat. es rose to new high levels for the he choice grades were needed for with lower grades or with the cently allotted by the United States orporation. A top price of $2.83 1 hard, registered Friday, was 63c guarantee level. Offerings of the desired were limited. The low nd poor qualities sold slowly, but nced. At the close the market was igher, with No. 1 at $2.53@2.80; No.)@2.78; No. 3, $2.47@2.76. Red vhich had risen sharply during the week, had a slow trade at the outafterward ruled strong, closing ed to 1c higher, with No. 1 at $2.46 No. 2 at $2.44@2.46 and No. 3 at $2.37@2.42. Shipments by elevator men and by the grain corporation were restricted, but stocks were reduced 124,000 bus., to 14,246,000 a year ago.

Corn—Receipts, 167 cars, against 259 a week ago and 273 last year. The falling off was attributed to bad weather and coal strike conditions. Outside feeders and local industries were in the market for limited supplies, but the trade was at no time very active. Nearly all corn offered was new, and farmers in Iowa and other states were said to be anxious to sell, but preferring to consign unless bid more than the Kansas City basis. No corn was delivered on December contracts. Prices closed unchanged to 3c higher on old corn and 1c lower to 3c higher on new. The closing quotations were: No. 2 mixed, $1.46@1.53; No. 3, $1.46@1.50; No. 2 white, $1.50@1.53; No. 3, $1.48@1.50; No. 2 yellow, $1.53@1.55; No. 3, $1.50@1.53. Stocks increased 3,000 bus., to a total of 23,000 bus. A year ago 248,000 bus. were in store here.

Oats—Receipts, 76 cars, against 156 a week ago and 44 a year ago. The market was temporarily depressed by large deliveries on December contracts, but later the decreased arrivals and a good request from local dealers, shippers and elevator men caused a sharp advance. At the close prices were 2@3c higher, as follows: No. 2 white, 78@78½c; No. 3, 77c; No. 2 mixed, 77@78c; No. 3, 76@77c; No. 2 red, 78@79c; No. 3, 77@78c. Stocks increased 20,000 bus., to 1,041,000 bus., against 2,239,000 a year ago.

Kafir and Milo—Receipts, 7 cars, against 23 a week ago and 20 a year ago. Dealers expected a big increase in offerings, but were disappointed by the snow, rain and cold weather and the shortage of cars. Demand for prompt shipment was active, and prices advanced 20@25c, to $3.05@3.10 per cwt. for No. 2 white kafir, $3@3.05 for No. 3, $3@3.50 for No. 2 milo and $2.95@3 for No. 3. Deferred delivery business was light, owing to uncertainty regarding the coal and railroad situations. Stocks here were unchanged, at 2,000 bus., against 31,000 last year.

ST. JOSEPH, MO.

W. H. Moore, Correspondent.

Application has been made for the transfer of membership from F. C. Endelman to C. M. Lightner.

The Endelman Grain Co. will discontinue business in St. Joseph at the end of this month, having sold all their office furniture, etc., to the Vanderslice-Lynd Co.

Vanderslice-Lynd Co., of Kansas City and Omaha, will open up an office in St. Joseph. A membership has been secured and the office will be opened within the next week or ten days.

The Buchanan County Farm Bureau will put on an interstate corn show in St. Joseph this coming year. The show will be held under the direction of the Missouri Corn Growers' Association and will attract exhibits from Kansas, Iowa, Nebraska and Missouri, although the list will be open to all states.

Cash Markets.

Wheat: Extremely light receipts, occasioned by weather and fuel conditions, were almost entirely responsible for a comparatively narrow and featureless market during the week. While wire communications were demoralized early in the week, good demand for practically all varieties has persisted, and advances of 1@3c on hard wheat have been almost daily occurrences. Both hard wheat and yellow hard are approximately 5@10c higher than last week. Red wheat has remained in good demand at steady prices. All buyers are after supplies. Cash wheat follows: No. 1 dark hard, $2.55@2.82; No. 2 dark hard, $2.51@2.79; No. 3 dark hard, $2.47@2.75; No. 4 dark hard, $2.40@2.68; No. 5 dark hard, $2.35@2.60; No. 1 hard, $2.48@2.77; No. 2 hard, $2.42@2.72; No. 3 hard, $2.40@2.69; No. 4 hard, $2.36@2.66; No. 5 hard, $2.23@2.55; No. 1 yellow hard, $2.49@2.51; No. 2 yellow hard, $2.46@2.48; No. 3 yellow hard, $2.40@2.45; No. 4 yellow hard, $2.30@2.36; No. 5 yellow hard, $2.20@2.26; No. 1 red, $2.45@2.46; No. 2 red, $2.42@2.44; No. 3 red, $2.38@2.41; No. 4 red, $2.32@2.36; No. 5 red, $2.21@2.28.

Corn: Receipts are small and hardly sufficient to supply the demand. Industries have been very active in acquiring milling corn, shippers taking bulk of yellow and mixed corn arrivals. Strength in cash prices has been the outstanding feature, spot values advancing steadily, with little regard to fluctuations in options. New corn is selling practically 4@8c over a week ago, best advances being on better grades, and on ear corn. During the past days options have been maintaining a moderate advance over last Saturday's close. Cash corn follows: No. 2 yellow, $1.54@1.56; No. 3 yellow, $1.50@1.53; No. 4 yellow, $1.46@1.48; No. 5 yellow, $1.42@1.45; No. 2 white, $1.52@1.55; No. 3 white, $1.50@1.52; No. 4 white, $1.45@1.56; No. 5 white, $1.42@1.45; No. 2 mixed, $1.51@1.54; No. 3 mixed, $1.49@1.50; No. 4 mixed, $1.45@1.47; No. 5 mixed, $1.41@1.43; ear corn, $1.47@1.49.

Oats: Shortage of supplies is probably the main factor in establishing the prevailing top prices. Thirty-one lbs. No. 2 white oats sold Saturday at 79c, 2@2½c over quotations a week ago. The demand is good. Cash prices follow: No. 2 white, 78½@79½; No. 3 white, 77½@78½; No. 2

DULUTH.

S. J. Schulte, Correspondent.

Operations in rye were on a substantial scale during the last week, and as a net result prices were advanced 11c for spot. No. 2 to $1.59⅜. Stocks of rye in the elevators were reduced 426,000 bus. during the week with the closing lake shipments for the season, and stocks in the elevators were brought down to 2,900,000 bus.

The following applications have been made for transfers of Duluth Board of Trade memberships: George F. Foster to George W. Higby; George Spaisbury to Grover C. Wilson; W. H. Kiichli to Harry J. Croften, of Lewis, Proctor & Co., of New York; Siebel C. Harris to F. H. McCarthy, and Hanes F. Barry to J. F. Carthy.

Receipts here for the crop year from Aug. 1 last to Dec. 1 were only 18,998,805 bus., against 76,547,000 bus. last year. wheat receipts were 9,427,539 bus., against 61,479,507 bus. last year; barley, 1,737,497 bus., against 3,059,626 bus. last year; rye, 6,636,801 bus., against 7,381,479 bus. last year; and flaxseed, 784,845 bus., against 2,760,849 bus. last year.

B. Stockman, president of the Duluth Board of Trade, and Earl M. White have returned from a trip to Port Arthur and Fort William, where they took a look over the elevator and grain handling situation. They were impressed by the plans of the grain interests there to push the erection of additional elevator plants in order to take care of an expected heavier grain movement from over their Northwest.

Grain shipments for the season by lake wound up at this market at the middle of last week and statistics of the Board of Trade show that the movement was about the slowest in the history of this market. Only eleven cargoes of storage grain were shipped out during the closing period of the season, as compared with more than 100 during 1918. During the month of November receipts of all grains were only 4,657,000 bushels, against 2,925,000 bushels last year. Of that wheat accounted for 2,842,000 bus., against 15,599,000 bus. last year.

R. J. Henderson, grain operator at Fort William, was a visitor on this market during the week. He expressed the opinion that comparatively little wheat would be imported from Canada to this country as result of the removal of the prohibition against its importation on Dec. 15. He asserted that all the wheat in the Canadian West has been bought up and is under the control of the government and as the crop in the three western provinces was short last fall, no surplus will remain above their export requirements. Government officials up there are keeping a close tab on all wheat deliveries, he asserted, and they say that there is no prospect of any of that grain being released for shipment to the United States. Mr. Henderson placed the Canadian spring wheat crop of last season at 170,000,000 or 175,000,000 bus., and according to his information considerable wheat and other grains remain in the country to be moved to the terminals.

CHICAGO.

The Railroad Administration states that a National freight embargo is not contemplated.

Adolph Gerstenberg is back at his desk and transacting his usual floor business, following an extended sick spell.

James A. Noble has been appointed by the Chicago Board of Trade directors as Chief Grain Sampler to succeed the late Henry A. Ulrich.

A new high record in memberships has been established by the Chicago Board of Trade, $11,100 net to the buyer topping the market last week.

Newly elected members of the Chicago exchange are Elmore D. Dier, of Hughes & Dier, Philadelphia; Garn B. Zorn, Louisville; E. Davis and R. E. Haggerty, of Chicago.

Rye and barley futures will hereafter be handled in the old oats pit. The justification and popularity of such markets has been proven through an extensive business in both cash and futures.

Visitors to the Chicago floor last week numbered among them Chas. Flanley, of Sioux City, Ia.; John T. Barrett, Montello, Wis.; J. T. Sullivan, Cullom, Ill.; James Thomas, Little Rock, Ark., and John De Haven, Peoria.

A consolidation of the meat packing business of the John Agar Co., Chicago, and Wm. Davies Co. of Canada, gives the merged concerns distribution through Chicago, Montreal and Toronto for domestic and export trade.

New York advice to F. S. Lewis & Co. that exporters are taking lighter oats is significant in connection with the reported favor in foreign markets shown Argentine oats. Later in the week foreigners desired to cancel recent oats purchases.

All railroad passenger service out of Chicago was cut one-third beginning at 1 a. m., Dec. 8, to conserve coal. The 3:30 office closing hour found certain resourceful grain firms removing their books to rooms that had been rented in nearby hotels.

The United States Grain Corporation will hold a meeting Friday, the 12th, at 2 o'clock in their Chicago offices to discuss with flour brokers and wholesalers the larger distribution of flour at low prices as offered for some time by the corporation.

Last week at the annual meeting of Armour & Co., the packers, Philip D. Armour and Frederick W. Croll were elected vice-president, and Everett Wilson, 42 years with the company, and Frank W. Waddell, 30 years in their employ, were elected directors.

Jules Picard, an importing broker of grain and feedstuffs for Switzerland, France and Belgium, is visiting Chicago and other markets. His firm is one of the largest handling such materials with head offices in Zurich, addressing Postfach Bahnhof, and branch offices in Antwerp and Marseilles.

The following members of the Flour Men's Club of Chicago will probably he in attendance at the National Federated Flour Club's special meeting to be held at Buffalo, Dec. 10: J. E. Stephan, president; J. E. Herbert, C. B. Spaulding, John Eckhart, Jr., V. Petersen, H. E. Cotter and Fred. W. Colquhoun.

The Central Trust Co. of Illinois, as trustee in bankruptcy of the Star Cereal & Mlg. Co., about which company there was some little reference in these columns a few months ago, has sold the property at 510-20 North Western avenue to Wm. E. Habel, of the Habel Armbruster Mlg. Co., consideration being $127,500 subject to $80,000.

It is probable that grain elevators here will have to curtail operations if coal is not received by the city, as in checking up the situation it was found that the average elevator has only coal enough to last until Dec. 15. Houses with coal and a fair volume of business will operate in the most advantageous way, while others will open a few days at a time.

The following officers of the International Live Stock Show Association were re-elected last week: C. F. Curtiss, Ames, Ia., president; Alvin H. Sanders, Chicago, vice-president; R. R. Ogilvie, Chicago, vice-president; O. T. Henkle, Chicago, treasurer; B. H. Heide, Chicago, secretary-general superintendent. Gov. Lowden was elected director of the association to succeed the late A. J. Lovejoy, of Roscoe, Ill.

PHILADELPHIA.

Geo. A. Rudderon, Correspondent.

Exports of grain for the week ending Dec. 5 were: 478,742 bus. wheat; 157,677 bus. oats, and 25,000 bus. rye.

C. M. Tyrrell, representing the International Mercantile Marine Company, has been proposed for membership in the Commercial Exchange.

The following is a list of cars of grain unloaded at Girard Point elevator during the month of November, 1919: Wheat, 703; oats, 166; rye, 18. Total, 887 cars.

William B. Schneider, formerly with the Master Bakers' business, has accepted a position as flour salesman with Hubert J. Horan, flour broker and president of the Philadelphia Flour Club.

Exports for November, 1919, were 54,263 bbls. of flour, 3,183,775 bus. wheat, 433,404 bus. oats and 17,465 bus. rye, as compared with 2,367,093 bus. wheat, 475,707 bus. oats and 46,899 bus. of rye in November, 1918.

Receipts of flour and grain for the week ending Dec. 6 were 225 bbls. and 7,838,089 pounds of flour in sacks; 522,574 bus. wheat; 9,664 bus. corn; 134,459 bus. oats; 69,134 bus. rye; 24,299 bus. barley; 3,750 bus. malt and 260 tons feed.

Stocks in public warehouses on Dec. 1, 1919, were: 247,966 bbls. of flour; 1,653,979 bus. wheat; 17,145 bus. corn; and 190,059 bus. oats, as compared with 246,094 bbls. flour, 1,839,675 bus. wheat, 28,949 bus. corn and 370,603 bus. oats on Dec. 1, 1918.

Receipts of flour and grain for the month of November, 1919, were: 242,602 bbls. of flour, 2,382,098 bus. wheat, 50,606 bus. corn, 844,375 bus. oats, 115,595 bus. rye and 4,761 bus. barley; as compared with 171,646 bbls. of flour, 1,902,575 bus. wheat, 53,707 bus. corn, 921,975 bus. oats, 226,516 bus. rye, and 3,750 bus. barley, in November, 1918.

According to the records of the Commercial Exchange, the stock of flour in Philadelphia public warehouses on Dec. 1 was the largest in the history of the Exchange. The total amount on that date was 247,966 bbls., which was 1,872 bbls. more than the stock on hand Dec. 2, 1918. The amount on Nov. 1 of this year was 171,077 bbls.

A delegation from the Philadelphia Flour Club will attend the meeting of the Federated Flour Clubs of America, to be held in Buffalo, N. Y., on Dec. 10. The following brokers and jobbers, members of the Philadelphia Club, comprise the party: William J. Rardon, Thos. K. Sharpless, William McAleer, Jr., Geo. White, J. P. McGarry, C. C. Frazer, James J. Rogers, J. W. Craig, R. E. McCosh, C. C. Richardson and F. D. Baker.

The United States Grain Corporation announces that beginning Tuesday, Dec. 9, it will receive weekly offers of straight flour. All offers shall be subject to flour purchase plan of July 7, with the following additions and amendments: Shipment within sixty days, the Association reserves the right to order shipments to any seaboard or inland destination and shall make proper freight adjustments accordingly. Price quoted in specification jute and in bulk. If packed in buyer's sacks, Millers' National Federation differentials to apply. Purchases based on type sample now on file unless otherwise specified. All offers of flour should be made direct to Mr. F. O. Seaver, Flour Department, United States Grain Corporation, 42 Broadway, New York.

Connie Mack, manager of the Athletics, and Clark Griffith, manager of the Washington team of the American League, were visitors at the Commercial Exchange on Friday and received quite an ovation by the members of the Exchange, many of them having been ball players in their early days. Other visitors registered were T. G. Roddich of H. B. & F. Harrison Co., grain importers, Liverpool, England; H. Alpen, coal and steel importer, Gothenburg, Sweden; J. E. Southwell and Horace Cook, representing grain interests in Boston; Field Wildin and Geo. L. Christian, Jr., grain dealers, Richmond, Va.; Malcom S. Chambers, grain shipper, Elknow, Pa.; J. B. Lewis, New York City, and John McDonald, Marshalltown, Del.; A. M. Kenisston of the Globe Milling Company, Watertown, Wis.; H. W. Hilyard and M. E. Moffett, corn shippers of Kenton, Del.

CINCINNATI.

George Mosbacker, Correspondent.

The Van Leunen Co. have added a feed department to their grain and hay business.

The Simmons Milling Co. expect to market their new Simco Brand of feeds about January 1.

The Wabash, Ind., river bottom corn crop is 100 per cent loss, and the lower Ohio valley corn 50 per cent, according to a local report.

Charles B. Hill, manager of the consignment department of Ralph Gray & Co., is renewing his acquaintance with shippers in Ohio and Indiana.

W. A. Hopkins, member of the Mutual Commission Co., is making his semi-annual business trip throughout Ohio, Indiana and Illinois. "Witt' Daniels is attending to duties during his absence.

Cincinnati shippers of grain have been advised that grain by-products are to be placed in the straight grain class. This would mean an increase of 25 per cent in rates, as it would put the by-products in a higher rate class. It is planned to line up opposition against the proposed change.

For its answer to the Early & Daniels Co.'s suit for $12,655.37 the C. & O. Ry. Co. admits that on Feb. 26, 1916, the company placed 100,000 bushels of oats in its elevator and warehouse at Newport News, Va., for storage, but denies all other allegations. For its cross-petition the railway company declares the Early & Daniels Co. withdrew the oats last April, but failed and refused to pay $1,816.18 claimed to be due for storage charges. The cross-petition seeks judgment for this amount. The Early & Daniels Co. will not permit the evidence to be presented by the railroad to stand unchallenged.

John B. Winspear, flour merchant, fil suit here this week against the Sleepy E Mills of Minnesota, seeking $9,575 as da ages. He also seeks to attach money a credits of the defendant in the hands the Trent Company, Cincinnati. Winsp alleges that on July 14, 1919, he entel into an agreement with the defendants purchase 50 tons of flour middlings $49.85 a ton and 1,000 barrels of flour $11.85 a barrel. He alleges the defend delivered only 55 tons of middlings, a charges this was below the quality spe fied in the contract. He also alleges fl has gone up $2 a barrel since he made purchase.

The Nutritia Company, composed of C cinnati and Lawrenceburg, Ind., memb of the trade, have launched into the fe grain and hay field, and formed the abc named corporation as successors of T Eikenberry-Fitzgerald Co., this city, gether with the property interests of Squibb, Carter, Squibb Co. of Lawren burg. The newly organized company pect to make a special feature of manufacture of animal and human foods addition to their extensive grain and h business, in which the incorporators ha spent the better part of their lives. ticles of incorporation have been filed Ohio at a capitalization of $500,000. officers are: N. E. Squibb, president; C. Eikenberry, vice president; E. A. Fitzg ald, treasurer; R. S. Fitzgerald, secreta E. C. Eikenberry, Robert Squibb a George Squibb, directors.

Cash Markets.

Wheat—All grades again advanced new high prices of the crop, but the quot tion for No. 2 grade was largely conje tural all the week owing to the almost e tire absence of offerings and lack of trad The demand, too, was rather indiffere and only an occasional car was wanted nearby mills and sold at terms not record Saturday the market ruled decidedly firm and higher with demand urgent. No. 1 r winter, track, $2.45@2.46; No. 2 red wint track, $2.43@2.45; No. 3 red winter, trac $2.40@2.42; No. 4 red winter, track, $2.3 2.37; No. 5 red winter, track, $2.30@2.3 sample as to quality, $2@2.30. Smut wheat discounted from 1c to 3c per bush as to grade.

Corn—Local cash corn values we largely governed by option influences t past week, but as a whole the market rul firm with advances of 5c to 7c for whi 3c to 5c for yellow, and 3c to 6c for mixe according to grades. Elevators with dr ing facilities were free buyers of the low grades, while top grades were mainly a sorbed for export, with some trading yellow and white for milling account. E corn continued in good demand and pric showed advances of 6c to 7c per bush Receipts of all corn continued small. N 1 white, $1.57@1.58; No. 2 white, $1.56@1.5

The Milwaukee market now has more than forty firms which receive and sell grain, hay, seeds, etc., on consignment. The elevators have a storage and shipping capacity of about 20,000,000 bus. The milling capacity is approximately 5,400 bbls. of rye and wheat flour per day. The two oatmeal mills in this city have a capacity of about 1,900 bbls. a day. The two corn mills use about 7,500,000 bus. of corn annually and a large linseed mill about 300,000 bus. flax. Industries and shippers are good buyers of all commodities generally at considerable premiums over neighboring competing points.

NEW YORK.

J. M. Nugent, Correspondent.

There has been a fairly steady trade in cash oats during the week, the domestic demand being on a slightly improved scale, and the foreign inquiry active. No. 1 whites were quoted at 88½c; No. 2 white, 87½c to 88c; No. 3 white, 87c, and No. 4 white, 86c per bushel.

During the past week the following gentlemen were visitors upon the floor of the New York Produce Exchange: J. E. Southworth, of Boston; Louis A. Stopp, also of Boston; J. E. Henry and F. Cleary, of Chicago; J. E. Cairns, of Chicago; A. D. Huff, of Montreal; F. C. Thompson, of Toronto, and J. G. Beatty, of Toronto.

Cash corn prices ruled firm but trade was not brisk. Industries were fair buyers early but the demand from this source fell off somewhat toward the end of the period. Old No. 2 yellow was quoted at $1.72¾; old No. 2 white, $1.72¾; old No. mixed, $1.70¾; new No. 3 yellow, $1.62¾, five days' shipment; new No. 3 yellow, $1.62¼, ten days' shipment, and $1.62 for twenty days' shipment, with $1.58½ for all December shipment.

MINNEAPOLIS.

W. A. Riebeth, Correspondent.

He is now the Argentine representative for his company.

The coal shortage is affecting operations of local flour and linseed oil mills.

S. J. McCaull, of McCaull-Dinsmore Co., leaves to night for a vacation in California.

Hans Sorensen of Crosby, S. D., has purchased a membership in the Minneapolis Chamber of Commerce Association.

L. C. Bridgeman, formerly Minneapolis manager for Spencer-Kellogg Sons Co., linseed crushers, is visiting in Minneapolis.

Commission houses report liberal offerings of corn from South Dakota, but the car situation is a hindrance to the movement.

The Fruen Cereal Mill suffered a loss of $15,000 in a fire that broke out Sunday. The buildings were of fireproof construction and 30,000 bushels of grain were saved.

Joe Kelso, of Wernli-Anderson Co., expects to leave for California next week. Herman Wernli of the same company is now in the Southwest visiting the grain trade there.

Cash Wheat.—Up to the time the milling operations were curtailed by the lack of coal and electricity there was a strong demand for cash wheat, but at present the buyers are selecting the good wheat and neglecting the thinner stuff. Medium grades are in fair demand, according to quality. Offerings are light, though heavier receipts are expected as soon as cars are available. Only a few of the interior elevators have wheat supplies of consequence.

There is a strong demand for drum wheat of the amber type and prices are advancing every day. According to estimates there is a decided shortage of durum wheat of a qualitv that will make macaroni and semolina.

Winter wheat is in fair to good demand. Of late the buyers have been more interested in red winter than in the regulation No. 2 hard. Offerings to arrive are very light.

Corn—Good buying orders from Canada and the western part of the United States resulted in a fairly active demand for the corn offerings that came to this market and these offerings were unusually heavy owing to the high prices prevailing here. Corn with transit is taken readily.

Oats.—Receipts are extremely light and the demand from feeders and grinders take care of the offerings. There is very little feature to the trading. Heavy oats call for a good premium over the lightweight stuff.

Rye.—Offerings light every day and there is a good demand from mills and elevators for the amounts obtainable. Very little rye offered to arrive. There was an export inquiry received today for some No. 3 rye.

PEORIA, ILL.

L. L. Eckard, Correspondent.

The large elevator of the Turner Hudnut Co., located at Pekin, Ill., has ceased operation due to coal shortage.

Officials have posted notice that owing to temporary congestion at the Peoria Union stock yards no truck or wagon stock will be received until further notice.

Reports from the country the past week state that many shellers are at work in the various districts and much corn is being received at the country elevators. Car shortage situation appears to be unchanged and many dealers are complaining.

Slow trade due to unchanged condition in car shortage caused a good many of the 2,000 arrivals to be carried over. Quotations were as follows: Light, $12.75@13.15; mediums and heavies, $12.75@13.15; heavy packing, $11.75@12.50; pigs, $9@12.50.

Hog prices broke 25c at local yards Saturday when congestion due to lack of outlet was unchanged. Sales at the morning's market were made at $12.80@13 on the bulk with a top of $13.15 established on sales of two lots of heavy butcher stock, choice.

Receipts of corn at Peoria fairly large past week; a total of 70 cars of corn on the market Saturday, with only fair demand from local industries. Shippers taking practically all offerings to be shipped to other points. Market was quoted unchanged to 1½c higher. 3 Yellow $1.42, destination weights; 4 yellow $1.39@1.41; 3 mixed, $1.42, D. W.; 4 mixed $1.39@1.39½, D. W. Oats, receipts 13 cars, with fair demand and market uncnanged to ½c higher. 2 white selling 78¾@79½.

BALTIMORE.

Robert C. Neu, Correspondent.

T. G. Roddick, a grain importer of Liverpool, England, was a visitor on the floor of the Baltimore Chamber of Commerce last week.

The total number of vessels which arrived in port here during the month of November was 172, as compared with 208 in October.

The name of John Kellogg, of the Armour Grain Co., of Chicago, is posted on the official bulletin board as an applicant for membership in the Baltimore Chamber of Commerce.

The "committee on hay and straw quotations" of the Baltimore Chamber of Commerce for the month of December consists of Messrs. W. F. Macneal, Gustav Herzer and Richard H. Diggs.

Six large ocean liners carrying tons of wheat left the port of Baltimore on November 29 for European ports. Among the vessels which cleared was the Shipping Board steamship "Ophis," carrying 5,600 tons to Danzig.

Supt. J. A. Peterson, of the Western Maryland and Baltimore & Ohio elevators in this city, was one of the exhibitors at the Maryland Poultry Show held at the Fifth Regiment Armory, this city, last week. Mr. Peterson exhibited several English pheasants.

Total receipts of baled hay in the Baltimore market during the month of November were 2,450 tons, compared with 5,702 tons arrived in the same month last year. This, however, does not include the loose hay which arrived from nearby points by farmers' wagons.

Upon the recommendation of Commissioner of Street Cleaning William A. Larkins, a contract was awarded here last week by the Board of Awards to Hopps & Co., at $10,797.92, for providing forage for the horses of the Street Cleaning Department of Baltimore for 1920.

The first carload of new crop corn of the season to reach the Baltimore market came to hand on December 2, a car of No. 5 yellow from Carroll County, Md., consigned to the Gambrill Grain Products Co. The corn, aside from its moisture content, was of good color and in fair condition, and was bought by H. E. Wack & Co., Inc., at $1.45 per bu.

George A. Hax, senior member of the firm of G. A. Hax & Co., grain, hay and feed merchants of this market, is homeward bound from a trip to Denver, Colorado Springs, points of interest in Oklahoma and Missouri. He was accompanied by Mrs. Hax and they have been en-tour since the convention of the Grain Dealers'

ONAHUE — TRATTON & CO. MILWAUKEE WISCONSIN

National Assn. at St. Louis early in October.

Pres. C. H. Bell, Sec. A. B. Clemmer, and Traffic Manager Matthaei, of the Philadelphia Commercial Exchange, spent a day in Baltimore last week to study the methods of the local grain weighing department with a view to inaugurating a similar weighing bureau in conjunction with the existing departments of the Philadelphia Commercial Exchange. Chief Weigher E. A. Kahler, of the Baltimore Chamber of Commerce, explained to the visitors the workings of his department.

The Grain Corporation has advised the grain trade of Baltimore that arrangements have been perfected with the Traffic Control Manager whereby permits will be issued for coarse grain to the extent of one million bushels without the name of steamer being supplied with request for permits. This million bushels to consist of stock in elevator, grain in transit, and grain permitted, and does not cover large transactions from central markets. Exporters desiring to move large quantities of coarse grain from central markets must as heretofore give the name of the steamer with the request for permit. Permits will be issued to those first making application, and the grain arriving in Baltimore under these conditions must be sold and moved within 30 days.

WESTERN CANADA.

A. Caldwell, Correspondent.

There is now an urgent demand from the east for Alberta coal, but conditions in the West indicate that it will be impossible to comply with the eastern requests for relief.

Flax futures have been very strong during the week and for the last few days crushers have been eager to pick up any odd cars of cash flax offered but very little has been released

The movement of grain from the interior to the terminals continues to be slow. There is complaint of car shortage due to the fact of some 48 000 Canadian cars being on the American side of the boundary while there are 23,000 American cars on this side and to the urgency of moving coal and feed to districts in the West where they are badly needed. The extreme weather which set in much earlier than usual found many western points almost without fuel and deliveries generally have not been keeping pace with consumption.

Whether any large quantity of Canadian wheat will find its way to United States markets is problematical. The Canadian Wheat Board is at present silent as to its policy in the matter. Canadian wheat along the border has been dribbling across for some time, perhaps 3,000,000 bus. have so far gone over. The grain trade is of opinion that any large shipments would very soon break the exorbitant premiums being paid for hard spring wheat at Minneapolis and that any advantage in price to the farmers here would be of a temporary nature, everything soon going back to an export basis.

The official close of navigation Dec. 5 and severe weather militating against its further continuance caused a decided slump in premiums on cash grains of Friday last. Both oats and barley were off 4c but milder weather and prospects of its continuance for a few days on Saturday, with the off chance that a few boats might yet venture to pull out with cargoes, caused a reaction on Saturday and premiums gained a cent. There is reported to be a good export demand for the milling grades of oats and higher grades of barley but offerings are light and transportation outlook unsatisfactory.

TOLEDO.

Carl Bryant, Correspondent.

C. S. Coup, vice-president of the Northwestern Elevator & Mill Co., spent the week in New York City.

George Bailey of Montpelier, Vt., and well known in grain and milling circles, was a visitor on 'Change last week.

Harry DeVore of H. W. DeVore & Co., and vice-president of Produce Exchange, was a visitor on the Chicago Board of Trade last week.

"Pick" Pickard of the Hub Grain Co., Bowling Green, O., and Arthur Aungst of Aungst Bros., Fayette, O., were visitors at the offices of J. F. Zahm & Co. last week.

President Fred Mayer of Produce Exchange was notified by his friend Earl Randall of Tekonsha, Mich., that the 100-bbl. flour mill of the Randall Milling Co., at that point, burned Sunday night and is practically a complete loss.

John Wickenhiser, grain dealer, was signally honored on Saturday when Federal Judge Killits appointed him member of the Toledo street railway advisory commission to assist city officials in adjusting the differences between the city and the street railway company. Street cars were the center of interest with their appearance on the streets Friday after a month's absence, and 'Change men were not the only ones to rush to windows as the first cars clanged and banged down the street. With the committee of level-headed business men at work on the proposition the city is assured of a speedy and impartial settlement of the controversy.

Co-operative elevator managers and directors of the Farmers Grain Dealers' Ass'n held a meeting at Wapakoneta, O., Monday evening. Bill Cummings of J. F. Zahm & Co., Joe Doering of Southworth & Co., and Oliver Randolph of the O. W. Randolph Co., manufacturers of grain driers, attended the meeting from Toledo. Mr. Randolph was on the program to discuss "Grain Driers," and his knowledge of the subject, first as a practical grain dealer with years of experience in the handling of grain, and next as inventor and builder of a grain drier that in three years' time has been purchased by elevators, large and small, from Vermont to Louisiana and Pennsylvania to Iowa, and is today leading the field, was a source of inspiration to elevator managers who are confronted every year with the obstacle of turning wet corn and wheat into profits. Mr. Cummings discussed new railroad orders with the dealers, explaining the recent rule with reference to minimum weights in loading. He also acquainted the members with the new system in vogue at Toledo for recording leaky condition of grain cars and the complete seal record of the Produce Exchange inspection department, making it the most complete system in the country and enabling shippers to collect claims for

h grain is in excellent demand at To- There is a dearth of supplies and the article is bringing good prices. All s are wanted, and particularly oats. arrivals here of the latter have not nearly sufficient to fill requirements. white oats sold Saturday at 81½c; white, musty, 79⅞c. Oats, of course, ing held back by farmers, but dealieve the curtailment of railroad servd lack of cars is causing elevators it purchases from farmers as the late apparently satisfied with the price illing to sell. A free movement is oked for until spring as many indusare closing down for want of fuel. yellow corn brought $1.47½ Satur- No. 5 yellow, $1.41@1.41½; No. 5 $1.40½; No. 4 mixed, $1.41; No. 4 $1.40½. Wheat prices are registerily advances. No. 3 red sold at $2.36¼ is of 23c rate to New York, and No. 4 2.31. Prices are above the Grain ation offer. Rye is in good demand. le at $1.60 for No. 2, with barley ed at $1.51 for No. 2 and good grades o buy. Receipts for the week: . 47 cars; corn, 42; oats, 17; rye, 24; 1.

CAIRO, ILL.

John Travis, Correspondent.

Pendleton of St. Louis and Philip ck, district supervisor, were here st week.

her the past week has been bad on Cold rains have prevented the pick- will cause considerable damage to the field.

eceipts of oats the past week have ry light due to the shortage of cars. nts have fallen off and the empty uation is worse than it has been at ne.

oal situation has become more seri- past week. All industries are now on a six-hour basis. None of the s have over a two weeks' supply and the elevators and mills using power are having their supply cut o the minimum.

LOUISVILLE, KY.

W. Williams, Correspondent.

Frankfort Grain Products Co., rt, Ky., capital $100,000, has been ed by J. P. Williams, W. J. Gord H. R. Rodman.

mills are about two weeks behind ments and report active business. atent is quoted at $11.75 a barrel in otton; long patent, $11.25, and low 10.75.

of all corn products were ad- 25c a hundred during the week, the stiff price of corn and heavy . Bolted meal and unbolted meal ted at $3.50 per hundred; pearl 3.80; cream meal, $3.80; hominy .85; corn flour, $3.90.

been learned that the Louisville Freight Traffic Committee has its lease and will go out of busi- Jan. 1, which indicates that all f the Railroad Administration may ntinued, and that railroads will be to private control. That is the uisville business men have conhe action.

rominent miller in discussing the uation said: "Cash corn has been g steadily for several days, and opinion that we will see higher before the month is out. It is that a great many mills will be close down on account of lack of cars. In some sections mills are o 8 hours, and production is being ."

eat news is bullish and the wheat of Louisville expect to see higher both wheat and flour. No. 2 red s now costing $2.50 a bushel, e; and No. 2 spring is quoted at icago. It is claimed that North- mills are now blending a consid- mount of Kansas hard and winter ich is forcing demand and prices winter.

feed, grist mills, etc., also eleva- ve been limited to 48 hours per ice Monday, Dec. 1, by orders of onal Fuel Administrator, Atlanta. mills are allowed to run full and ls are running full on meal, corn . General industry has been lim- all stores, office buildings, etc., exception of grocers and concerns foods, are limited to 7 hours a e regulations, while causing some inconvenience in the grain and feed business, are not seriously affecting business as is the case in many other lines.

ST. LOUIS.

E. E. Reeves, Correspondent.

Secretary Eugene Smith, of the Merchants Exchange, is again at his desk, but is looking much the worse as a result of his illness.

M. U. Norton, of Mexico, Mo., Secretary of the Missouri Grain Dealers Ass'n, was a visitor on the floor of the Merchants Exchange Friday.

Louis Kaufman, formerly with the Food Administration, has accepted a position with the De Armond Grain Company, and will travel for that company.

H. Vest Lancaster returned from a ten days' business and pleasure trip to Duluth, Minneapolis, Chicago and other Northern cities, and reports a most successful trip.

A. G. Anderson, of the Anderson-Ketchum Grain Co., has purchased the certificate of Gustave Richter, and is an applicant for membership in the Merchants Exchange.

Charles F. Beardsley, of the Picker & Beardsley Commission Co., was confined to his home for several days last week by a severe attack of heart trouble, but is improving.

The increased minimum weight on grain and grain products became effective via the Illinois Traction System Dec. 1, on interstate business Dec. 24, and on Illinois State traffic on Dec. 26.

John E. Hall received his long-sought passport for a trip around the world and will depart with Mrs. Hall Monday for New York, where they will sail on the Empress of Asia on Christmas day for Hong Kong, China. From thence they will go to the various points of interest in Japan, and later they will visit Australia. After touching India and Egypt they expect to meet Mr. Hall's nephew, Will Hall, who has been in Europe for several years for the American Red Cross, and make a tour of Europe with him. On their return trip they expect to visit the principal Canadian cities.

G. A. Collier, of the United States Bureau of Markets, Washington, D. C., was in St. Louis, Last week making a survey of the hay market, to enable the Department of Agriculture to determine the advisability of establishing uniform or Federal standards for hay. Mr. Collier will make similar surveys of all of the prominent hay markets in the country.

William C. Bergman, of the C. Bergman Feed Co., who was 45 years old, weighed 220 pounds and had not an ounce of surplus fat, died last week after a four days' illness of pneumonia. His associates on the floor of the Merchants Exchange, John J. Schulte, Walter Toberman, J. S. Cordes, Ernest Kuhlman, Herman Meuser and Edward Meyer, acted as pallbearers.

The members of the Merchants Exchange are preparing for the annual election of officers, which will be held on Wednesday, January 7, 1920, and the political pot is beginning to boil violently. It appears to be the sentiment among the members to choose an administration which will conserve the assets of the Exchange and any reckless expenditures will be discouraged. From the present indications, after a careful canvass of the active members, it appears that Charles L. Niemeier will have no opposition for President and F. B. Chamberlain will have no opposition for first vice-president, as it has been an unwritten rule of the Exchange to advance vice-presidents. Louis A. Valier will be the logical candidate for second vice-president and the following have strong followings for members of the Board of Directors: Henry A. Diamant, H. Vest Lancaster, Otto A. Orvis, J. L. Frederick and O. J. Wooldridge. According to an unwritten rule the retiring president will receive the unanimous nomination for member of the Board of Directors, and President E. C. Andrews will undoubtedly receive that honor. The annual caucus will be announced two weeks prior to the annual election.

CORN IN PRIMARY MARKETS.

Receipts of corn in eleven primary grain markets from Nov. 1, 1919, to Dec. 6, with comparisons with 1918:

	1919-20.	1918-19.
Chicago	7,091,000	8,611,000
Milwaukee	982,000	403,000
Minneapolis	1,057,000	377,000
Duluth	.....	5,000
St. Louis	2,092,000	2,698,000
Toledo	230,000	128,000
Detroit	241,000	345,000
Kansas City	940,000	1,496,000
Peoria	3,163,000	4,089,000
Omaha	1,726,000	1,811,000
Indianapolis	2,010,000	1,842,000
Total	19,532,000	21,805,000

Receipts of corn the past week at primary markets, compared with the preceding week and corresponding week last year:

	Dec. 6, 1919.	Nov. 29, 1919.	Dec. 7, 1918.
Chicago	1,328,000	1,488,000	1,093,000
Milwaukee	234,000	303,000	76,000
Minneapolis	349,000	247,000	77,000
Duluth	.....	.....	.....
St. Louis	417,000	456,000	469,000
Toledo	61,000	50,000	28,000
Detroit	68,000	23,000	63,000
Kansas City	181,000	352,000	329,000
Peoria	558,000	535,000	730,000
Omaha	273,000	422,000	393,000
Indianapolis	315,000	515,000	349,000
Total	3,784,000	4,391,000	3,607,000
Shipments	2,448,000	1,882,000	2,169,000

Two Randolph grain driers, manufactured by the O. W. Randolph Co., Toledo, O., and having a combined capacity of 12,000 bus., were installed in the new transfer house of Springer & McComas, Indianapolis, Ind., which started operation last week.

THE AGRICULTURAL REPORT.

[Concluded from page 14.]

by counties from insect pests and plant diseases will enable the entomologists and plant pathologists to work more intelligently in developing and applying remedies. Those of marketable surpluses on farms, or the portion of the crop sold from the farm and entering the channels of trade, will facilitate the satisfactory marketing and distribution of surplus production. Such estimates have been made for apples, peaches, potatoes, and truck crops, and they were promptly and effectively utilized by growers and marketing agencies.

"Perhaps the most important feature of the enlarged program is that relating to live stock, which represents not only a farm investment of more than $10,000,000,000, but also constitutes the meat supply of the Nation, a considerable portion of the export trade, a very important factor of successful farm management and economy and 50 per cent of all farm sales. Yet for this important industry the bureau, with its inadequate facilities, has been able to estimate, once a year, only the gross number of animals on farms, the number of brood sows, and the total loses from disease and exposure. No attempt has been made in the past to estimate dairy and poultry production between censuses, the annual value of which amounts to approximately $3,000,000,000. The great losses occurring yearly from drought and feed shortage in portions of the Great Plains and in limited areas of other sections might, to a considerable extent, be reduced by having definite and detailed information regarding the feed situation.

"The expenditure of money for the execution of this program will clearly be an investment, which should be made without delay in order that agricultural and business interests may have the benefit of the improved service during the period of readjustment. It should be borne in mind also that the proposals are in no sense experimental. Their feasibility and practical value have been fully demonstrated."

RECEIPTS AND PRICES OF RYE.

Receipts of rye at the principal primary markets of the Central West for the week ended Dec. 5, and for the corresponding week last year, as compiled by the Minneapolis *Market Record*, were:

	1919. Cars.	1918. Cars.
Minneapolis	83	510
Duluth	116	357
Chicago	45	123
Omaha	30	33
Milwaukee	47	97
Total	321	1,120

Closing out prices of rye of standard quality and spot cash for the beginning Nov. 28, were:

	Mpls.	Dul.	Chi.	Oma.	Mil.
Nov. 28..	$1.48⅝	$1.48¼	$1.50½	$1.42	$1.51
Nov. 29..	1.47¾	1.44	1.48½	....	1.48½
Dec. 1..	1.50¼	1.50½	1.51¼	1.39	1.51½

Bean Market.

TOLEDO, O., Dec. 5.—Buyers of beans at present prices have everything to gain and nothing to lose, says The Earle B. Slawson Co., bean dealers. They urge buying now when the market is down, pointing to the low stocks of beans; the fact that the big bean movement from Michigan is over, 2,000 cars having already been shipped, real winter weather is upon us, and cars are a scarce article. They are bullish with prices down almost to actual cost of production and export business increasing daily. Last week $7,000,000 lbs. of California beans were bought for one export order. Old crop Kotenashi beans practically cleaned up except stocks in New York city which are about large enough to take care of one good export order. New crop Kotenashi beans are of inferior quality, very late and their high price prohibits business in U. S. Michigan beans for deferred shipment are selling at premium over immediate or prompt. Prices, carlots or less, per

BARD'S POWER TO REGULATE PRICES SUSTAINED.

udge Williams, in the Municipal rt of Chicago, rendered an impor- decision upholding the powers of Chicago Board of Trade on Dec. W. A. Thomson, a grain dealer of isville, Ky., in June, 1917, contracted ough Thomson & McKinnon, members the Board of Trade, to purchase 00 bus of corn for July delivery, at 18 per bu. The board of directors, sequently to this purchase, and in e, 1917, adopted a resolution fixing aximum price of $1.65 per bushel orn for original purchases and for lements of contracts. On July 5, , the market continuing to advance, directors adopted a resolution stopg all trading in corn for July dery and fixing the price of $1.65 per el as the price at which open conts for July delivery should be set. By a similar resolution the board directors had on May 11, 1917, ped all trading in wheat for May very and compelled a settlement at) per bushel.

r. Thomson, the purchaser of the in question, denied the authority he Board of Trade or its directors nterfere with the then existing conts, and claimed his right to recover Thomson & McKinnon, his brokr the difference between $1.65 per el and the price of $2.40 per bushel, which price car lots of corn had in Chicago on the last day of July.

ne case turned upon the right of board of directors, or the Board of le, to take this drastic action. J. P. n, John J. Stream and John R. ff, who were at that time, respecy, president, vice-presidents and etary of the Board of Trade, testithat the market for wheat and corn become very much over-bought, the cipal buyers being the export com- representing the Allies and neucountries, and that as the result of large number of purchases and the fficient quantity of wheat and corn he market to fill these contracts, itions were such that without the going action of the Board, a corner heat and corn would have resulted, he detriment of the public and with ery large increase in the cost of these two grains to consumers. There was no specific rule of the Board authorizing the directors to take this action, but Judge Williams held that despite that fact they had the power to do so, and that their action was binding not only upon the brokers who were members of the Board but upon their customers who through the brokers availed themselves of the privilege of making contracts on the Board of Trade. As a result, he dismissed the plaintiff's case. The plaintiff's attorney announced that the case would be appealed to the Supreme Court of Illinois, and, if necessary, to the Supreme Court of the United States.

The case is deemed by the officials of the Board to be a very important one, because there are thought to be other persons similarly situated who are awaiting a favorable outcome of this suit in order to institute similar suits against other members of the Board.

KANSAS WHEAT REPORT.

Sec'y Mohler of the Kansas State Board of Agriculture issued on Dec. 4 his report on the acreage and condition of wheat sown this fall for the harvest of 1920, in which in part he says:

The area sown to winter wheat this fall is 8,951,834 acres. This exceeds by 1,232,500 acres the average of the five-year pre-war period (1910-1914), but is 2,658,600 acres, or 23 per cent. less than the record area of 11,610,445 acres sown for the crop of 1919.

A disposition to return to a normal acreage in wheat and a better balanced crop system is apparent.

The average condition of the growing crop for the state is 79.1 per cent. This is 16.9 per cent lower than the condition reported at the same period in 1918, but 9.1 per cent higher than that reported in 1917.

The acreage in volunteer wheat is surprisingly large, 1,262,000 acres. It is confined almost entirely to the western third of the state. Counties in this section report the per cent of the acreage that is volunteer from about 5 to 60.

Seeding was practically completed in all parts of the state by the date upon which reports were made out by correspondents, November 22d.

Except in the western third of the state the crop has afforded little pasture, owing to late seeding and slow growth, both attributable to dry weather in the early fall.

During the last week in November, and preceding the recent low temperatures, the crop received the benefit of an ample covering of snow which will furnish both protection and needed moisture.

If this paper pleases you, kindly recommend it to your neighbors in the trade.

CORN PRIZE WINNERS.

The prize winners at the Board of Trade's Hay and Grain Show at the International Live Stock Exposition make quite a long list. It will be interesting, however, to note that the Grand Trophy, the sweepstakes prize for a single ear of corn, offered by the Grain Dealers' National Ass'n, went this year, not to Indiana, as had been the case in most of the earlier national corn shows, but to Ohio, the winner being John H. Roads of Bainbridge.

Not to lengthen out the list inordinately, our space being limited, we will confine mention of the winners to the blue ribbon holders.

CORN.

Region No. 1—Single Ear—first, E. E. Eiker, Huntley, Mont. Yellow Corn—No award on the first; second prize to E. E. Sterkey, Prasser, Wash. White Corn—No awards first and second; third prize, Mrs. M. E. Medaris, Parker, Wash.

Region No. 2—Single Ear—First, Lewis Scott, Fairmont, Minn. Yellow Corn—First, Jos. A. Bunker, Ridgeway, Wis. White Corn—First, Edward Peters, La Crosse, Wis.

Region No. 3—Single Ear—First, W. R. Butler, Kokomo, Ind. Yellow Corn—First, W. J. Lurey, Attica, Ind. White Corn—First, C. E. Troyer, Lafontaine, Ind.

Region No. 4—Single Ear—First, John H. Roads, Bainbridge, O. Yellow Corn—First, J. B. Hamilton, Shelbyville, Ind. White Corn—First, Peter J. Lux, Shelbyville, Ind.

Region No. 5—Single Ear—First, J. W. Scott, Gallatin, Tenn. Yellow Corn—First, G. T. Buford, Pulaski, Tenn. White Corn—Same.

Region No. 6—Single Ear—First, John Howell, Montrose, Colo. Yellow Corn—No first or second; third, J. E. Morrison, Sterling, Colo. White Corn—No first or second; third, same.

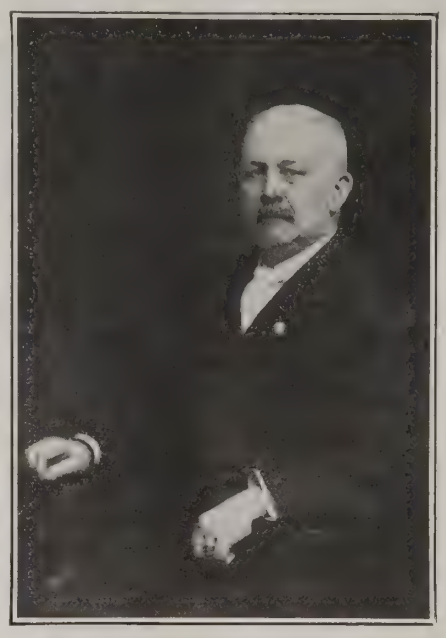
Peter J. Lux was awarded the trophy offered by the Corn Millers' National Federation for the best 20 ears of white corn.

BARLEY.

Two-rowed—First, Sager Wheeler, Rosthorn, Saskatchewan, Canada. Six-rowed—First, L. L. Young, Nampa, Idaho.

RYE.—First, J. J. Davis, Jackson, Mich.

HAY.



Alfalfa—Swartz Brothers, Waukesha, Wis.; red clover hay—Atkins Bros., Salesville, Mont.; timothy hay—First, Geo. Sterling, Salesville, Mont. Sweepstakes, best sample of hay—Swartz Brothers, Waukesha, Wis.

A. S. GARMAN DEAD.

It is with regret that the elevator and milling trade will learn of the death of A. S. Garman, long the representative of Huntley Manufacturing Company in the Ohio-Indiana territory. This event occurred at his home in Akron, on Nov. 9. Mr. Garman had been in poor health for some time but had taken care of his territory almost up to the day of his death. However, he succumbed to a stroke of paralysis, his death following in a few days.

Mr. Garman was born in Wayne Co., Ohio, on Dec. 28, 1852. At an early date in life he entered the milling game, starting in a small mill in Fairview, Ohio. Later, he became associated with mills in Massillon, Mansfield and Akron, Ohio. In 1887 he became engaged in the sale of McNaulty Roller Mill Feeders and in 1888 he associated himself with the Huntley Manufacturing Company of Silver Creek, N. Y.

Continuously since that time, Mr. Garman has represented the "Monitor" Line of Cleaners. Probably no man in the trade today had the personal acquaintance and friends among the millers, grain dealers and canners of the United States, that Mr. Garman had at the time of his death. His was a familiar figure at the National and state gatherings of the various associations

connected with the trade. He will be missed.

Mr. Garman was not only a salesman of rare ability but he was also of an inventive turn of mind and suggested many of the improvements now in common use on grain cleaners.

COTTON STATISTICS FOR WEEK

The following shows the statistical position of cotton figured up to Saturday morning by the *Financial Chronicle*

BARLEY MARKETS.

MILWAUKEE.—The Milwaukee barley market ruled strong throughout the week and prices are 4@5c higher. Receipts continue very light and the demand good from both industries and shippers, all offerings being sharply cleaned up. There were only 114 cars received during the week, against 137 cars a week ago and 176 cars in 1918. Current quotations are: Good to choice, 47 to 50-lb. test, is quotable at $1.61@1.62; bright, $1.62@1.63; fair to good, 44 to 47-lb. test, $1.52@1.60; low, 41 to 43 lb. test, $1.48@1.58; 36 to 40-lb., 1.42@1.52; feed, $1.40@1.50; Iowa quoted $1.55@1.60 for light to fancy; Wisconsin $1.50@1.63; Minnesota, $1.45@1.60; Dakota, $1.45@1.60; feed and rejected, $1.40@1.50.

BUFFALO.—Barley dealers sold a few cars for export early this week and had little to sell today. Everybody was out of the market. Even feed men seemed to be filled up at the moment. Old malting was quoted at $1.58@1.63; feed, $1.48@1.53; new malting, $1.51@1.55, and feed, $1.43@1.48 on track or in store.

DULUTH.—Business was stagnant in the barley market here during the last week. Receipts amounted to only 2 cars against 266 last year. Prices were marked up 2c in sympathy with the Eastern market, making spot stand at $1.48@1.46. With the completion of shipments before the close of navigation, 508,000 bushels were shipped out and the elevators and stocks were right to 58,000 bushels.

PORTLAND.—The *Commercial Review* says that trading in barley last week was slow. Offerings were light and it was generally speaking, a sellers' market with bidding at times lively, although buyers were reluctant to pay the advance. There was a strong undertone, however, to the market, especially for Eastern qualites, which, however, are not as much in favor as the California descriptions. Values for No. 1 the barley quoted at $68.50, feed $68, No. 2 Eastern $66.50.

SAN FRANCISCO.—No change in the market has been reported. Receipts were light and demand only moderate. There was no quotable change in the prices and the futures were weak. Country offerings slow. Values quotable from $3.30@4.40 per cental, according to quality.

KANSAS CITY.—A strong tone was present in the barley market all through the week, with buying attracted to local feed manufacturers, elevator men, country feeders and Chicago. Prices advanced 2@5c, to $1.40 per bushel for No. 3 and $1.37@1.38 for No. 4. Movement from the country was restricted by the car situation and the weather. Kansas City receipts were 22 cars, against 28 a week previous and 18 a year ago. Stocks increased 13,000 bus. to 123,000 bus., against 180,000 in 1918.

CHICAGO.—The barley market through the week was an exceedingly dull and slow affair. Offerings were rather light, but no one seemed to be anxious to take anything except the very best grades. These were absorbed by both the maltsters and the industries and prices were held firm on that account. There was also a little demand during the week for choice barley by the seedsmen, but there was not very much of it. Elevators were willing to take some of the medium grades but no export inquiry developed throughout the week. On Saturday the week closed quite strong with an advance of 2@3c, paid by the maltsters, who seemed to be quite anxious to get grain. There was also a little feed demand and also some by the mixers during the week, but on the whole only the best qualities were in the sellers' favor. The present week the market opened very strong, with a sharp advance ranging from 4@6c, bringing the price up to the top for the crop so far. Elevators seemed to be particularly urgent buyers overbidding the maltsters, although there was no particular export demand visible and domestic demand rather quiet. Sales of 32 cars were reported at a range of $1.35@1.60, bulk of sales $1.55@1.60. Futures opened rather strong but were weak towards the close; December opening at $1.54, sold down to $1.53, closed $1.54½. May closed at $1.44 after selling up to $1.46¼. Exports from Atlantic ports 320,000 bus. vs. 189,000 bus. a year ago.

MINNEAPOLIS.—A strong shipping demand for barley prevails and the market is gradually working higher. Receipts are inadequate. Further lots in local elvators were taken over during the week past and there is very little left for sale. Exporters have been taking light weight barley here recently. Farmers are feeding barley quite freely and marketing is light.

COAL STRIKE AND CORN.

It is generally expected that the settlement of the coal strike will encourage some pressure in corn futures, but an analysis of the situation reveals the possibility that it may be a boomerang, as it will enable industries to resume operations, and when they enter the market for cash corn they are likely to find shippers keen competitors for the spot offerings. At the same time, motive power will be diverted to hauling coal at the expense of the grain movement.—*Logan & Bryan, Dec. 6.*

Beet sugar farmers of Colorado, Nebraska, Wyoming and Montana held their annual meeting at Denver on Dec. 8 and took up the matter of contracts for growing beets in 1920.

In Evansville, Ind., corn cobs are being used as fuel in some industrial plants and are bringing $1.50 a ton.

Hotel LaSalle Cuts Prices.

Manager Stevens of the Hotel La Salle, patronized by grain and hay men generally when in Chicago, took the city "by storm" last week by announcing a radical reduction in the prices of rooms and dining room service. The hotel ever since it was opened several years ago has been doing a capacity business, and is now booked through the month of December with banquet halls taken until February, and the day the cut was announced its 1,000 rooms sheltered and lodged 1,800 guests, with ball room and parlors in requisition. It was a time when any price would be paid; but Manager Stevens said: "Business was never so good as it is now and will be for the next year. We're cutting our prices because we want to be fair with the public.

"At the hotel men's convention in New York the other day a man said to me when he learned what we were going to do: 'Stevens, you're a d——d fool; we're shoving an extra dollar on our rooms immediately and making a good cleanup.' Maybe that's good business, but I can't see it. A man or a concern is not a good sport that will hold the public up when the public has no other recourse. I don't care how many are doing it. That is no excuse.

"I've a notion that reasonable profits and fair dealing are the best business methods after all in the long run. And the time to cut prices is when business is at its best. You're not accused, then, of trying to steal any one else's trade. We've had several years of good business and we can afford to cut closer to the margin than usual in order to start the pendulum swinging toward normal again.

"The 'vicious circle' can become very benevolent, if it is made to work down instead of up. In the long run that will pay every one. The golden rule is a good business basis."

The $10 rooms have been cut to $7 and the $2.50 rooms to $2 at the LaSalle. The most expensive suite in the house, $27, has been reduced to $19. Other reductions vary between 50 cents to $8 a room or suite. Food prices are cut even deeper.

THE CORN PROBLEM.

We enter the month of December with prices for cash corn materially above futures: with small accumulations at primary markets; with receipts light and the country offering little. While we have advanced far enough into the season to feel the weight of the new crop to a very perceptible extent, such has not been the case. Whatever the cause for the delay in the movement is, it is effective in its strengthening influence on the market at the moment. The distribution of the crop has been delayed. How long will it depend upon the coal and the railroad car situation? Meanwhile the trade is more concerned and interested in immediate conditions that will have a direct bearing on prices. The new crop is sufficiently large enough to insure an ultimately lower level of prices, but this contingency may not arise for some time. At least prevailing conditions do not indicate a near return of normal conditions. This can come only from a free marketing that is indefinitely held up by the coal strike and its attendant difficulties in rail transportation.—*Simons, Day & Co.,*

Small Crop of Beans.

CHELSEA, MICH.—There will not be to exceed 1,000 bushels of beans to be marketed here this season. Quality good. —*Wm. Bacon Holmes Co.*

COAL STRIKE INFLUENCE.

The settlement of the coal strike would naturally be construed as bearish because the resumption of shipments from the country would occur. At the same time, however, industries would resume work, and unless receipts were sufficient to relieve the cash demand, the bearish effect on the market would not be great.—*Hulburd, Warren & Chandler, Chicago.*

Armour & Co. in their weekly revie of trade on Dec. 5 said: "Prospects fc improved hog receipts are encouragin this largely dependent upon weathe and railroad conditions. Prices fc smoked meats hold steady, with good moving freely into consumption. Th fresh pork demand is exceedingly goo prices being steady.

Flour Department

Reaching grain dealers who handle flour as a side line and for millers, flour brokers and distributors who wish to interest grain and feed dealers in the handling of their product.

FLOUR TRADE NOTES.

The Atchison Mills Corporation, Atchison, Kans., plans the erection of a 2,000-bbl. mill.

The Pelican Bay Mill at Klamath Falls, Ore., which was recently destroyed by fire, is being rebuilt.

The Washburn-Crosby Co. of Minneapolis, Minn., has leased from T. J. Skellet Co. a four story building. Extensive improvements will be made on the property and it will be used as a city distributing warehouse.

Construction is being started on the 7-story reinforced concrete mill of the Eagle Flouring Mills Co. at Portland, Ore. The daily capacity will be 2,000 bbls. W. R. Bagot is president. The cost of the mill and 2-story warehouse 100x130 feet will be $200,000.

Minneapolis, Minn., is to get the experimental wheat flour mill for which the special session of the legislature appropriated $35,000. The mill will have a capacity of 100 bbls. per day. A site near the junction of 84th Street and Milwaukee Railroad tracks has virtually been chosen.

The Capital Flour & Feed Co. of Little Rock, Ark., will file articles of incorporation and probably start at once the construction of a warehouse. The building will be 60x196 feet and will be of brick construction. S. M. Durrett of the Durrett Feed & Grain Co. at Fort Smith, will be the manager of the new plant.

Wheat Director Barnes has put out a special circular letter to flour jobbers and brokers, asking them to use their influence to push the sale of the straight flours which the Grain Corporation is endeavoring to sell to consumers. Mr. Barnes protests that the Corporation has no desire to monopolize the trade, as flour distribution should go on through the usual domestic channels, but that in order that the consumer may have the purchasing opportunity contemplated by the Corporation jobbers and brokers are requested to cooperate with the Corporation to that end.

A $100,000 home constructed of concrete and brick will be erected by the Delta Flour & Feed Co. at Memphis, Tenn., to take care of greatly increased business. The company will also increase its capitalization by $75,000. Modern machinery for packing flour in bags and barrels will be installed. M. G. Odeneal is manager.

The *Northwestern Miller* says it is becoming increasingly clear that the removal of the import and export embargoes effective on the 15th will not have any marked effect on the market, at least immediately. The Canadian government has by its various orders and price fixing practically stopped the movement of their flour and wheat in this direction.

The Grain Corporation began Dec. 9 to receive weekly offers of straight flour subject to the flour purchase plan of July 7, 1919, on the following terms: Shipments within 60 days; the Corporation's right to order shipments to any market on adjustment of freight differences; price to be quoted in jute and in bulk; if packed in buyers' sacks the Millers' National Federation's differentials will apply. Purchases will be based on samples on straight flour on file unless otherwise specified.

The U. S. Grain Corporation is offering to sell "straight wheat flour" in 140-lb. jute sacks and hard and soft wheat first clears in 140-lb. jute sacks under certain specified conditions at $10.50 per barrel for straights and $9.50 per barrel for clears, delivery within 30 days Atlantic ports. Gulf ports 35 cents per barrel less, and Pacific Coast ports 50 cents under Atlantic. These prices are subject to change. Provision is made in the way of allowances for torn, mended, stained and slack sacks. Deliveries are to be made f.a.s. buyer's tonnage, or f.o.b. outgoing ocean vessels, at the option of the United States Grain Corporation.

W. P. Tanner, Gross & Co., Inc., of New York, one of the largest export flour concerns of the country, is reported to have determined to establish its principal distribution headquarters in Baltimore. The company, it is said, has bought the large waterfront property of the Armour Fertilizer Works at the foot of Allen street, Locust Point, which is to be improved with warehouses, a pier and other structures.

FLOUR MARKET.

The flour market generally is more or less quiet. Buyers seem to be pretty well supplied, particularly in the East, and are not taking hold. The general trade has been somewhat upset by the entry of the Grain Corporation into the retail flour market with straight flour, but on the whole prices continue firm, although they are not for the immediate present advancing. The uncertainty of the growing winter wheat crop in view of the ravages of fly, which promise to be quite serious next spring, has given a strong undertone to the market, particularly for the soft flours. In addition there have been private cables to New York flour men that on account of drought in Australia that country will be able to make no further shipments of flour into the east coast of Asia.

FLOUR PRODUCTION.

The Grain Corporation's bulletin covering the wheat and wheat flour movement throughout the United States for the week ending Nov. 21, in comparison with the figures for the same period a year ago was as follows:

Wheat receipts, bus.—	1919.	1918.
From farms	13,531,000	13,311,000
Previous week	12,376,000	14,349,000
June 27 to Nov. 21	595,183,000	572,238,000
Flour products—	Bbls.	Bbls.
During week	3,147,000	2,747,000
Previous week	3,130,000	2,532,000
June 27 to Nov. 21	58,718,000	48,455,000
Stocks of wheat—	Bus.	Bus.
All elevators and mills	283,841,000	271,485,000
Previous week	288,432,000	291,089,000
Changes for week	—4,591,000	—19,604,000

EXPORTS WHEAT AND FLOUR.

Exports of wheat and flour, July 1 to Nov. 21, amount to 66,958,000 bus. of wheat and 6,956,000 bbls. of flour, making a total equal to 98,262,000 bus. of wheat compared with 74,780,000 bus. of wheat and 6,887,000 bbls. of flour last year to Nov. 21, the first 21 days in November pro-rated from monthly report, making a total equal to 105,771,000 bus. of wheat.

Stocks of Flour in Leading Cities.

The following table by the *Daily Trade Bulletin* exhibits the stocks of flour at the points named on the dates given (Baltimore and Detroit estimated):

Cities.	Dec.1,'19. Brls.	Nov.1,'19. Brls.	Dec.1,'18. Brls.
Philadelphia	248,000	171,000	247,000
New York	6,000	7,000	16,000
Chicago	68,000	62,000	62,000
St. Louis	94,000	86,000	84,000
Toledo	19,000	14,000	12,000
Baltimore	75,000	75,000	40,000
Detroit	76,000	75,000	30,000
Boston	38,000	32,000	53,000
Milwaukee	46,000	48,000	45,000
Duluth	266,000	200,000	135,000
Total	936,000	770,000	754,000

Embargo Rye-Wheat Blends.

Opening of foreign markets to the direct export of wheat products, effective Dec. 15, may have a most important effect on the value of the wheat-mix used in rye-wheat blends. With the Grain Corporation at no time buying these grades and the direct trade for export embargoed, their price now and for a long period back has been based upon their domestic value as a f stuff. Europe normally uses large qu tities of these grades for breadstuff p poses. The removal of the emba should, then, in due time raise th grades from their present feedstuff b to a breadstuff value, which would m a very heavy advance above curr prices.—*Blodgett-Holmes Co.*

EXPORT SALES OF FLOUR

Wheat Director Barnes on Dec made the announcement that the fi position in the United States is now parently easy enough to warrant Grain Corporation in offering to from its stocks to any foreign buy the "straight" grades of pure wh flour which it has been handling in port. Heretofore, sales of this fl have been confined largely to supply the Allies.

According to Mr. Barnes, this ac is but another step in the "effort assist the reconstruction of trade fa ties outside of Government agencies is hoped that it will facilitate busin by American exporters, in spite of d culties still to be overcome in pri transport and private finance. It is derstood that during the last week C ada advanced its price on export fl to $13 a barrel or even more. The lingness and ability of the United St to furnish large quantities of p wheat flour at $10.50, consequently be quite a relief to those buyers h tofore partially dependent on Canad flour, formerly available at about $1 barrel.

"Flour production in the United St has been on a large scale and, in case of winter wheat 'straights' with material advance in price."

This accumulated position warra an extension of the sales policy of Grain Corporation in the opinion of Wheat Director. The elimination the export embargo on December also makes it possible for exporter operate direct with the mills, but offer of the Grain Corporation to vide cargo lots readily from its l stocks in the various seaports will material aid.

FLOUR ON THE COAST.

The mills on the Pacific Coast re business quite good and most of larger mills have full run of orders the entire time in which they are lowed to book forward deliveries. S domestic outside trade is coming on market and the new business wri for future shipment is large. W some of the mills are up on price, demand, says the Portland *Commer Review*, seems to be better than w the market was draggy.

Seattle reports a much more enc aging condition in the Orient for export trade. Manila is said to be workable from the Pacific Coast Hongkong c.i.f. is only 50c to $1 ou line. The tonnage is also easier. I notable also that Japan is not offer any considerable amount of flour in ental markets, but rather as a bu notwithstanding reports of abunda of wheat in Manchuria. At pres Australian millers are supplying Hongkong and Manila, delivering fl similar to export standards from Puget Sound at $11.25@11.50 g while Puget Sound makers can m delivery of the same grade at $11.75

As stated, tonnage conditions are proving under rates which at the of November were much easier at Trade along the coast of South Ame is quiet, with fair prospects for be trade with Bolivia, but no actual s are reported.

FLOUR MARKETS.

BALTIMORE.

Baltimore, Dec. 6.—The demand has fair this week for both winters springs, with prices generally a sh firmer, and the premium on spe brands of spring patents well maintai The Grain Corporation continues to licly advertise that it is ready to "standard wheat flour" at prices that

v to the consumer a considerable sav- as against current asking prices for ng patents. It is also offering "straight at flour" for export in 140 lb. jute s. Quotations, per 98 lb. cotton or sacks, follow: Winter patent, $10.75@ winter straight, $9.75@10; spring pat- $14@14.50; spring straight, $13.25@ ; rye flour, pure to blended, $7@8.

NASHVILLE.

shville, Tenn., Dec. 8.—Demand for in the Southeast continues heavy for season of the year, with prices higher account of advance of wheat. Mills t record bookings, and some are be- with orders on account of coal short- curtailing production.

der a ruling of the regional coal com- e flour mills with one shift of em- s are supplied coal to run 48 hours ly, and those with two or more shifts llowed an additional 48 hours weekly. e it is necessary to grind grain on mills are exempted from the ruling. shville and Southeastern flour mills, capacity of 211,590 bbls., had output week of 118,238 bbls., or 55.8 per cent pacity, which compared with 70.1 per the preceding week, and 51.9 per cent ame week last year.

ces: Best soft winter wheat patent, 98 otton, f. o. b. Ohio river points, $11.90 10; standard patent, $11.20@11.50; ht patent, $10.60@11.10; first clears, 9.

DETROIT.

roit, Dec. 6.—Flour is firm at an ad- of 25@50c in the leading grades. is a little improvement in buying he market is firm owing to an advance price of wheat. Bran is higher and is a strong feeling in all mill feeds. Fancy spring wheat patent flour, @15; fancy winter wheat patent, @13.50; second patent, $12.50; winter ht, $11.25@11.50 per bbl. Bran, $47@ tandard middlings, $51@51.50; fine ings, $61@61.50; coarse corn meal, 3; cracked corn, $64; chop, $53@55 n in 100-lb. sacks.

DES MOINES.

Moines, Ia., Dec. 6.—Demand very he past week. Short family patents, jutes, 95% patent, $12.50. Closing t for this week 50@75c higher. On t of the fuel situation mils operating hour day. This has reduced the out- onsiderably, only 3,100 bbls. turned

NEW YORK.

York, Dec. 6.—Two announcements Grain Corporation, one stating that now sell its stocks of export flour exporter, and the other that, be- g on Tuesday, Dec. 9th, it will re- making purchases of straight flour, the principal factors in the flour on during the past week.

Government proposes to sell to ex- s on the basis of $10.50 for straights .50 for first clears at Atlantic ports, c less at gulf ports, and 50c less on cific Coast. It is believed that this another move toward bringing the trade back to normal, although us obstacles are foreseen in the shipping conditions and credits.

rwise, the market remained practi- nchanged. All hard wheat flours ery firm on the strength in cash and quotations were above a work- sis. Soft flours were perhaps a little ctive and there was a firmer tone to in anticipation of Government pur- Rye flour was firmer in sympathy e strength in grain, but while there ome export inquiries, little if any s was done. Spring wheat patents quoted at $13.50@14.50; Kansas ts, $12.75@13.50, and soft winter ts, $10.25@10.60.

BOSTON.

on, Dec. 6.—The strength of the situation lies in the recent ad- recorded in cash wheat at Minne- and Kansas City. Yet, compared week ago, the only change in quo- has been an advance of 25c on the range for hard winter patents. Cur- rices, f. o. b. Boston, in carload ill shipment, for 196 lbs., in 98-lb. are $13.50@14.50 for standard spring , $14.50@15 for special short patents, 0 for spring clears, $12.40@14 for inter patents, $11@11.75 for soft patents, $10.35@10.85 for soft win- ights, and $9.75@10.50 for soft win- ars. Receipts for the week ending were 97,368 bus.

DULUTH.

h, Dec. 6.—A strong situation con- in the flour market during the last ut demand fell off somewhat owing mills having completed their East- pments to go forward before the the lake navigation season. Millers mpelled to pay the highest premi- spring wheat on the crop in order n supplies for mixing purposes. A was experienced for durum flour t led to fresh advances in durum premiums. Quotations were ad- 50@70c during the week making n carlots at mill as follows: Fam- ts, jute, $14.35@14.50; bakers' pat- te, $14.10@14.25; clears, $9.75@10; lears, $6.75@7.

CINCINNATI.

nati, Dec. 6.—The firmness of as reflected in flour values here week and prices for patents were higher with demand from jobbers family use considerably better. duction continued up to capacity. ns represent prices in wood unless e stated. Wood basis is 45c over inter patent, per bbl., $11.60@11.80; hard patent, bbl., $13.75@14.50; bakers' Kansas patent, 140 jute, $12.50@12.75; corn flour, 100 sacks inc., $3.35@3.50.

MILWAUKEE.

Milwaukee, Dec. 6.—Activity in the local flour market is greatly revived and regarded as very satisfactory. Prices are strong and have shown decided improvements all around, spring wheat patents being up 65c@$1, straight 40@70c higher, while first clear has widened out somewhat, being 25c lower on inside prices and 25c higher on outside prices. Millers report that all grades are taken eagerly.

Flour prices are now at the highest point of the season and may go higher unless consumers take the winter wheat flours which are plentiful.

The rye flour market is also better than it has been for many months past. Prices have shown appreciable advances, largely in sympathy with wheat. Rye flour, pure, white, is 45@85c higher and rye flour straight 60@65c stronger.

Milwaukee flour mils produced 20,800 bbls. of flour during the past week of which 17,450 bbls. were wheat flour, or approximately 73 per cent of total capacity, and 3,350 bbls. were rye flour.

Current quotations, in carlots, per bbl., in cotton, are: Spring wheat patent, $14.20 @15; straight, $13.25@13.65; first clear, $9@10; rye flour, pure, white, $8.40@9; rye flour, straight, $8@8.20; rye flour, dark, $6.75@7.10. Corn flour is nominally quoted at $3.95; corn meal, white, $3.80, and corn grits, $3.80.

Milwaukee flour stocks: Dec. 1, 1919, 45,811 bbls.; Nov. 1, 1919, 48,125; Dec. 1, 1918, 45,490; Dec. 1, 1917, 12,935; Dec. 1, 1916, 21,120; Dec. 1, 1915, 129,760; Dec. 1, 1914, 139,070; Dec. 1, 1913, 71,617; Dec. 1, 1912, 111,500; Dec. 1, 1911, 85,810; Dec. 1, 1910, 101,905; Dec. 1, 1909, 126,500; Dec. 1, 1908, 133,100.

PHILADELPHIA.

Philadelphia, Dec. 6.—Flour receipts for the week were 225 bbls. and 7,838,089 lbs. in sacks. The general situation is not much different from that reported last week. Offerings are light and the market shows a reflection of tne sharp advances on spring wheat products, but at the same time buyers are operating from hand to mouth and are generally able to purchase enough from second hand stocks to satisfy present requirements at about $1 to $1.50 per bbl. under mill advances.

We quote per 196 lbs., packed in 140-lb. jute sacks: Soft winter straight, Western, $10@10.50; do., nearby, $9.65@10; hard winter straight, $12.50@13; do., short patent, $13@13.50; spring, first clear, $9.75@10.25; do., patent, $13@14; do., short patent, $14.75 @15; fancy spring and city mills patent, family brands, $14.90@15.35; rye flour, $7.95 @8.35 per bbl. in sacks, as to quality.

KANSAS CITY.

Kansas City, Dec. 6.—Flour mills here were not seriously affected in their operations by the coal strike and fuel shortage, as most of them burn oil or use electric power. Some mills in the country were compelled to shut down several days ago. The week's production in Kansas City was 78,400 barrels, as compared with 79,200 a week previous and 68,800 a year ago. Probably half the output was applied on old orders. New sales were restricted by the impending distribution of government stocks of the straight grade in retail channels at a big discount under prices of fancy special brands. Hard wheat millers seemed to be very slightly concerned over the federal competition, but the sale was feared by soft wheat millers because the government flour is made chiefly from their kind of wheat. Resumption of weekly purchases of straight grade flour by the United States Grain Corporation, beginning December 9, was regarded with mixed feelings, as the flour may be used to hammer prices of high grades as well as for export. Millers are making new connections in Europe, preparatory to a restoration of export business under the suspension of restrictions after December 15, but just now there is no plan in sight for financing trade with foreign exchange at a record discount. Hard wheat flour was marked up as much as $1 a barrel on some grades and 10@75 cents on others, reflecting gains in wheat. Red wheat flour went up 25@70 cents.

Following are the Kansas City prices of flour in carlots, sacked in 98-lb. cotton bags, per bbl.:

Hard wheat—	Dec. 6.	Nov. 29.
Short patent	$13.35@13.85	$12.35@13.10
Long patent	13.10@13.60	12.00@12.60
Straight	12.35@12.85	11.50@12.10
1st clear	10.60@11.35	10.25@11.10
2nd clear	9.10@10.10	9.00@10.00
Low grade	6.35@ 7.10	6.00@ 7.50
Soft wheat—		
Fancy patent	11.60@12.00	11.15@11.75
Standard patent	11.10@11.50	10.75@11.25
Straight	10.40@10.70	10.00@10.50
Clear	9.80@10.20	9.50@10.00
Low grade	7.00@ 8.00	6.50@ 7.50

TOLEDO.

Toledo, Dec. 5.—Flour output of Toledo mills this week was 35,130 bbls., or 69½ per cent of capacity, against 23,800 bbls. last week and 38,485 bbls. same week in 1918. Prices for soft red winter wheat show steady advances. Outside millers paid on basis of $2.42 for No. 1 red in elevator on sample tables this week. Stocks of the Grain Corporation, amounting to 800,000 bus. are commencing to move out. It consists of 450,000 bu. No. 2 red; 150,000 bu. No. 3 red and 175,000 bu. of hard winter. Some of the hard variety has been requisitioned by millers, but they are able to purchase all the soft red they want at present at prices below the government figure. Domestic demand for flour fair. Prices are higher, but do not nearly reflect wheat values because of large wheat stocks at lower prices. Prices in carlots, f. o. b. Toledo, basis halves cotton: Standard winter wheat patent, $10.95@11.25; clears, $10.70; low grade, $7.50; standard Kansas hard patent, $11.45.

FOREIGN

Lloyd's agent at Constantza says the corn crop of Roumania was below the average for the years 1911-15, the total yield this year being about 11,000,000 bus.

The bulk of the potato crop in England has been lifted. The potatoes are rather small but sound and unusually free from disease, except in the South-west.

Droughty conditions are reported in the greater part of New South Wales; in some districts fully 80 per cent of the stock, chiefly sheep, have perished for want of water.

The British grain trade associations have been informed that the government of South Africa has suspended permits for the exportation of corn and corn meal from Oct. 17 last.

Barley flour has been added to the list of goods which may not be exported from Great Britain without a license. Barley and barley meal have been under embargo since early in the war.

The average prices per bushel received for British grain during the last week in October of this year was $2.22 for wheat; $2.891 for barley; $1.733 for oats versus 91c for wheat in 1913, 85.6c for barley and 53.9c for oats.

The Sindacal Council of Rome on Oct. 15 announced the following retail prices for chilled beef in equivalents of American currency: Forequarter meat with bone, 22c; hindquarter with bone, 31c; lean meat, without fat or bone, 41c.

The Tunesian government has purchased practically all of the potatoes available in the growing section of Tunis at prices equivalent to $16.40 per 220 lbs. The country still needs about 7,500 tons, and these will have to be obtained in France, Italy or Spain. There is, however, an abundant crop of lentils which are finding sale in foreign as well as domestic markets, the government having permitted exportation.

Among direct imports into Shantung through Chefoo, China, for the year 1918 were 2,323 long tons of corn, 161 tons of rice. The imports of beans and flour were very small, almost next to nothing, and of wheat none at all. Among the exports from the same territory through Chefoo there was some vegetable oils, including soya bean and peanut oil, amounts not large, and 2,087 long tons of soya bean cake which went to other Chinese ports.

Foreign flour is disappearing from Tsingtau markets. Imports which at one time reached 8,607 bbls. were only 265 bbls. in 1918. The local flour mill, which is equipped with American machinery, turns out something over 300 American bbls. per day and there are several flour mills at Tsingtau, 256 miles distant on the Shantung Ry., and these are securing a strong hold on the markets of the Shantung Province. Meanwhile imports of flour from Shanghai reached 108,480 bbls. in 1918.

The export of cereals is forbidden from Tsingtau by the treaty with China, but by special arrangement effected with the Japanese government there were shipped in 1918 816,320 bus. of wheat, valued at $1.98 per bu. Bean, castor and peanut oils were also shipped out in greatly increased quantities, the total of peanut oil reaching over 6,000,000 gals., of which one-half was declared at the Consulate as consigned to the United States. Bean oil exported amounted to 22,108,000 lbs. Declaration as to destination was not made in all cases, but it is believed that more than the oils so declared were ultimately shipped to the United States. There was also some bean cake exported, equal to 5,063 long tons, and considerable quantities of beans, chiefly the yellow varieties, of which 1,494,000 lbs. were shipped. Strange to say, about 16,500 lbs. of cured and preserved meat was sent from Tsingtau to the United States.

The government of Poland has established a special department for the purpose of purchasing commodities of "prime necessity." This department is under the control of the Ministry of Supply and has the sole right within Poland to import or issue permits for the importation from abroad of such articles. Included among these are the food grains; pasture and other seeds; rye, wheat and other flours, meal and mill by-products; oil cake, vegetables, animals; in fact, practically all food products.

According to reports received by the Manchurian government the crop outlook in the whole of South Manchuria last fall was rather poor. Beans, it was expected, would not come out over 70 per cent; wheat, barley and millet 80 per cent; dry rice and corn 70 per cent; wet rice, normal. The appearance of new beans on the market was delayed by the backwardness of the season. Last year's first shipment to Dairen was Sept. 12; this year it was not expected that beans would reach Dairen until some time in October.

Lord Lee, speaking at a Gloucestershire farmers' exhibition, said that home agricultural production in England must be developed to the maximum to which the land is capable, in order to reduce the dependence of the country upon food supplies from overseas. He added that the government "is determined to stop at nothing to attain that end. Farmers should have a guaranty against disastrous losses; the great increase in the cost of production must be considered." His own opinion was that the guaranty "should be permanent, or, at any rate, farmers should have four years' notice before the guaranty is withdrawn."

RATES FROM ARGENTINA.

Recent *Commerce Reports* announce that with the exception of Great Britain a general and substantial increase in freight rates has been made from Argentina and Italy to the United States on account of the temporary shortage of tonnage. Rates on Dec. 4 quoted to the United States on heavy grain, $30; linseed, $32. The United Kingdom, heavy grain, £9; linseed, £9. To Antwerp, heavy grain, £10, 5s; linseed, £10, 10s. To France, heavy grain, £10, 5s; linseed, £10, 10s. To Italy, heavy grain, £11; linseed, £11, 10s.

CEREAL PRODUCTS OF THE CAUCASUS.

The chief occupation of the peoples of the Caucasus is agriculture, and this part of Russia produces 18 per cent of Russia's wheat and barley and 29 per cent of the corn. The acreage to wheat average of 1911 to 1915 for all the Caucasus was 12,770,133, of which two-thirds was winter and one-third spring wheat; of rye, 552,946, mostly winter variety; barley, 5,473,324; of corn, 1,618,-126. The average yield, same periods: Wheat — 240,352,000 poods (1 pood = 36.1128 lbs.); rye, 10,607,000; barley, 119,392,000; corn, 39,379,000, and oats, 25,228,000 poods. The relative home consumption was 52.8 per cent of wheat, 2.33 of rye, 26.23 per cent of barley, 8.65 per cent of corn, and 5.56 per cent of oats. This section is also a large producer of rice.

ARGENTINA FIXED PRICES.

It is proposed to enact a law in Argentina to give the executive power to reach an agreement with Provincial Legislatures with regard to the appointment of special committees empowered to establish maximum prices for the following, among other, articles of prime necessity: Bread, meat products, vegetables, fruits, fish, poultry, milk and milk products, eggs, fats, sugar, yerba, flour, cereals, etc., petroleum and products and pharmaceutical products. The proposed law provides that for the administration of the maximum prices in the capital a committee be appointed to establish the maximum retail prices on the products enumerated and which the executive would be authorized to acquire and have offered for sale in special establishments. The prices would be subject to weekly adjustments or at even shorter intervals in case of need. A part of the project would be to give wide publicity to the maximum prices resolved and to have the latter applied from the day following their announcement.

LIVE STOCK IN ARGENTINA.

Foot and mouth disease has appeared in Argentina, the most important aspect of which, says *The Times of Argentina*, is "the influence which the present death rate is likely to have on future production. Arguing on the basis that current prices are a direct cue to the strength of the present demand and to the prospects for the future state of the market, it must be admitted that if the present cue is not misleading the country will, for many years to come, have urgent need of every female animal befitted for breeding purposes that can possibly be kept alive."

Sales of cattle at the Liniers stockyards in recent years are reported as follows:

Year.	August.	Jan.-Aug.
1919	129,251	1,071,063
1918	196,955	1,043,402
1917	139,631	993,644
1916	43,244	598,550

The figures are held to mean a d pletion of farm reserves of cattle a also of sheep, which were marketed about the same proportion, due pro ably to the high prices realized for t meat and hides. From Jan. 1 to Se 31 of this year the exports of mea were 1,471,952 carcasses of mutton, 19 124 of lamb, and 4,613,160 quarters beef, 4,533,736 of which went o frozen. Argentina is also developi a considerable hog raising industry, t Liniers yards handling something li 5,000 to 6,000 per week.

AGRICULTURE IN BRITISH SOUTH AFRICA.

Declared exports of corn (maiz from British South Africa were valu as follows in 1918: Corn, $6,966,749 England to British East Africa, $34 198; to Portuguese East Africa, $28 916, a total of $7,783,066. Other agric tural exports included butter and su stitutes, $1,264,803; meats, $2,285,00 hides, $11,195,281; wool, $47,244,594, which $23,310,000 came to the U. The wheat production in 1918 was 580,000 bus. vs. 11,100,000 consumptio corn yield about 31,000,000, of whi about 9,099,000 bus. were exported. systematic effort is being made to e large the cotton acreage, the Uni government having employed an Ame can expert as coach to planters.

Foreign Importers, Manufacturers and Dealers

In the resumption of exports from the United States and Canada, it is desirable to be properly represented abroad for the distribution of grain, seeds, flour, millfeeds, provisions, concentrates and feedstuffs of all kinds. We suggest that correspondence be opened with the following specialists:

KENTUCKY.

Paris, Ky.—Perry, McCann & Mitchell will enlarge their plant and install new machinery.

Stephensport, Ky.—H. A. Dutschke has sold the Stephensport Flouring Mill property to R. L. Reed of Mooloyville.

Irvington, Ky.—The Community Milling Co. recently completed the installation of an American Midget Marvel flour mill.

MASSACHUSETTS.

Lowell, Mass.—David Ziskind has purchased the Livingston Grain Co. business and has reorganized, operating it under the name of the Thorndike Grain Co. The company will build additions to the plant.

MICHIGAN.

Jones, Mich.—C. A. King has bought the elevator of Lurie Bros. at this place.

Marengo, Mich.—Wm. A. Coombs, one of the proprietors of the Marshall Milling Co., has purchased the mill and water power at Marengo of Frank Clark.

Grand Rapids, Mich.—Michigan voters next year will vote on the question of establishing a warehouse in which farmers may store their products on a co-operative selling plan.

Amble, Mich.—Officers of the recently organized Farmers Elevator Co. are L. L. Kizer, president; J. M. Rossman, vice-president; Walter J. Rushmore, secretary-treasurer and manager.

Tekonsha, Mich.—The A. H. Randall Milling Co.'s grist mill and warehouse, built in 1837, was destroyed by fire recently with a loss of $100,000. The warehouse was filled with flour and grain.

Hastings, Mich.—As soon as the stock on hand is sold, the Luke Waters elevator at Hastings will be discontinued, owing to ill health of the proprietor. The feed mill will be operated for a limited time.

Coopersville, Mich.—M. Denham has sold his elevator to the Coopersville Co-operative Elevator Co., recently organized here. Possession will be given Jan. 1. Paul Hohn, Mr. Denham's manager, has been engaged to conduct the elevator.

MINNESOTA.

Triumph, Minn.—The Farmers Elevator Co. has completed its tile warehouse.

Menahga, Minn.—Reinhold Lohi will have charge of the Farmers Elevator here.

Melrose, Minn.—The National Elevator is closed. Henry Primus has resigned as manager.

Currie, Minn.—The Farmers Elevator Co. has reorganized and C. D. Smith has been hired as manager.

Monterey, Minn.—The Farmers Elevator at Monterey has surrendered its charter and gone out of business.

Minneapolis, Minn.—The Sheffield Elevator Co. will make a $15,000 addition to their elevator on Garfield avenue and 29th street.

Dunnell, Minn.—J. E. Stockdale of Estherville, Ia., has sold his elevator here to Hubbard & Palmer Co. of Mankato, Minn.

Lyle, Minn.—The Speltz Grain & Coal Co. has installed succotash mills in its elevators here and at Walters, Conger and Clarks Grove. At Walters the company has enlarged its office and is building coal sheds.

MISSOURI.

Nevada, Mo.—The Moss-Mead Milling Co. has started its big flour making machinery.

Jamesport, Mo.—The cornerstone has been laid for the new Jamesport Farmers Mill & Elevator.

Pacific, Mo.—Otto Drewel is building a grist mill at this place and expects to do custom grinding soon.

Palmyra, Mo.—A recent fire at the People's Mills caused a loss of about $1,200.

Springfield, Mo.—The Eisenmayer Milling Co. was forced to shut down its local plant because of a shortage of fuel.

Lamar, Mo.—The new elevator erected by Thomas Egger to replace the one destroyed by fire has been completed.

Moscow Mills, Mo.—The Farmers Elevator & Supply Co. of Moscow Mills has been chartered with a capital stock of $20,000.

Rockport, Mo.—R. I. Gross leased a strip of land from the Burlington Railroad Co. and will erect a modern grain elevator in the near future.

Frederickstown, Mo.—The new flour mill of the U. S. Skaggs Mill Co. has been put in operation. The mill has a capacity of 50 bbls. per day.

Hartsburg, Mo.—A new mill and grain elevator will be built by the newly organized Farmers Milling & Elevator Co., which will incorporate with a capital of $16,000.

St. Joseph, Mo.—The name of the McKee, Lindley & Dunn Grain Co. has been changed to the McKee Grain Co. and the number of directors has been reduced from five to three.

Sikeston, Mo.—The west mill of the Scott County Milling Co. in Sikeston was closed down recently because of a lack of coal and the east mill will be closed for the same reason.

Richmond, Mo.—Messrs. Dorton & Estes, who recently took over the management of the Orrick Mills, have been forced to shut down their plant because of the difficulty in securing flour sacks.

Osage City, Mo.—J. M. Hays, head of Hays Wood Products Co. of Jefferson City, announces that he intends to construct a large wheat elevator in Osage City on the Osage river. He says he will construct a number of barges and use them for transporting wheat to the elevator.

Mountain View, Mo.—A new firm, which will probably be known as the Mountain View Milling & Electric Power Co., has been organized by M. L. Landrum of the Mountain View Electric Light & Power Co. and Geo. O. Miller. The firm will be incorporated for $10,000 and have purchased the Joe Holden mill property in which up-to-date milling machinery will be installed.

Montgomery City, Mo.—A new elevator company has been organized to be known as the Producers Grain Co. The new company expects to incorporate with a capital stock of $40,000 and do a general elevator business. Chas. F. Palmer is president; Dan P. Grennan, Sr., vice-president; F. L. Cuno, secretary; and Harry S. Bishop, treasurer. A new elevator with a capacity of 20,000 bushels will be constructed of concrete and will cost about $20,000.

MONTANA.

Belt, Mont.—The new mill of the Farmers Elevator Co. has been completed.

Harlowton, Mont.—C. H. Dickman has purchased the interest of I. P. Nissen in the firm of Nissen & Jacobs, dealers in coal, feed, hay, grain and seeds.

Missoula, Mont.—A storage annex of 110,000 bushels capacity is to be erected to the Ravalli Flour & Cereal Mill at Missoula, Mont. This will give the company a capacity of 235,000 bushels.

Winnifred, Mont.—The recently incorporated Winnifred Mill & Elevator Co. has succeeded the Farmers Elevator Co. and is operating the elevator, but not the mill which has not as yet been completed.

NEBRASKA.

Bushnell, Nebr.—The Lexington Mills & Elevator Co. has just completed a new elevator at this place.

Tilden, Nebr.—The Farmers Co-operative Merc. Co. of Tilden has been granted a permit. Capital $75,000.

Lawrence, Nebr.—C. B. Seldomridge has purchased the Missouri Pacific Elevator formerly owned by Theo. Schultz.

Gresham, Nebr.—R. L. Thompson is now in possession of the elevator he recently purchased from the Updike Elevator Co.

Friend, Nebr.—The Acme Mill & Elevator Co.'s plant was damaged in a recent storm to the extent of $500, which was partly covered by insurance.

Humphrey, Nebr.—The Farmers Co-operative Grain & Lumber Co. has been incorporated with a capital of $77,600. Incorporators: Jos. M. Veik, Ferdinand Fricks and Richard Oliver.

Superior, Nebr.—The Superior Terminal Elevator Co. is building a modern concrete and steel elevator. The head house, drier and feed mill cover 36x60 ft. and six more tanks will be added in the spring, giving a storage capacity of between 120,000 to 200,000 bushels. Machinery will be driven by direct connected motors through enclosed gear speed reducers. The head house will contain 10 bins. Drier house will be 14x36x115 ft. and will include Elliott 300-bushel-per-hour drier, wheat washing and conditioning plant. The drier room has 6 bins. The feed and corn mill is 30x36, 115 ft. Officers are: F. L. Myers of Elliott & Myers Grain Co., president; P. E. Johnson, vice-president; and L. E. Shaw, secretary, treasurer and general manager.

NEW YORK.

New York, N. Y.—The Chelsea Hay & Grain Co. has been incorporated with a capital of $5,000 by A. F. Fisher, L. Wannemacher, F. Engelhard, Jr., of 2371 1st avenue.

NORTH DAKOTA.

Manvel N. D.—The Manvel elevator owned by the Monarch Elevator Co. burned recently.

Minnewaukon, N. D.—Wm. Plummer's elevator at this place is being overhauled and extensive improvements have been made.

Landa, N. D.—The Farmers Elevator Co. is combining its two elevators and building a new office, engine room and feed warehouse.

Bottineau, N. D.—J. H. Schreiner, who recently purchased an elevator at this place, will operate it under the name of the J. H. Schreiner Elevator.

Ellendale, N. D.—Efforts are being made to again put the Ellendale flour mill into active operation. W. W. Brown of Northwood has been hired to take active charge of the mill, which will undergo a thorough renovation. New machinery will be installed and repairs made.

OHIO.

Marysville, O.—Edw. Cody & Son have purchased the Snodgrass-Fullington Co. elevator at this place.

Middlepoint, O.—The Pollock Grain Co. has installed new machinery in its plant and recently moved everything to this point.

Cleveland, O.—Frank Cain, who is associated with E. I. Bailey, has again been elected mayor of Euclid Heights, a suburb of Cleveland.

Isleta, O.—The Plains Co-operative Co. has installed new machinery in its recently completed storage addition of 12,000 bushels. A new office has been built.

Troy, O.—The Allen & Wheeler Co. is contemplating the erection of several concrete storage tanks having a capacity of 250,000 bushels. This is to be added to their present mill and elevator at Troy, Ohio.

Greenville, O.—The elevator of Helm & Ries has been sold to the United States Chemical Co. Possession has been given H. C. Helm, former manager of the elevator, recently sued for dissolution of the company and an accounting.

Cleveland, O.—The freight steamship Tioga, which went aground in Lake Su-

517-18 Grain Exchange OKLAHOMA CITY, OKLA.

Certain Wheat Stocks Low.

The Grain Corporation, by Howard B. Jackson at Chicago, calls attention to the fact that stocks of hard winter wheat owned by the Grain Corporation at Manitowoc and Milwaukee, Wis., are entirely exhausted, and the supply of this variety at Chicago, Ill., is practically all sold. While the stock of soft red winter wheat is of ample proportion at present, it is being taken very freely by millers all over the country; and it is the corporation's suggestion that if millers need or will need wheat from this market all requisitions should be placed at once.

Field Seeds

The upper lake counties of Wisconsin will hold a grain show at Ashland on Jan. 24, in charge of the county agent at Ashland.

An Ontario seed firm writes C. A. King & Co. that there is some red clover seed in eastern Ontario, but the alsike crop, while good, has all been sold.

It is announced that the *Seed Reporter*, hitherto published by the Bureau of Markets for a year or two, has been discontinued with the October issue and will be absorbed in the publication known as the *Market Reporter* issued from the Bureau beginning about Jan. 1.

Movement of red clover seed, according to the Bureau of Markets, has been normal throughout the country, except that in the East, in scattered sections, where relatively small quantities have been hulled the growers are disposing of their holdings through their neighbors and farmers' clubs, receiving $42@50 for country run seed.

Toledo Seed Movement.

Following is a comparative statement of receipts and shipments in bags of forage grain seeds at Toledo for week ending Dec. 6:

	Red clover.		Alsike.		Timothy.

Kansas City Seed Market.

KANSAS CITY, Dec. 6.—Bad weather conditions and a pessimistic feeling engendered by the coal shortage and strike situation kept seed trade within narrow limits this week. There was practically no inward movement and orders for shipment were moderate. Reports from the country said threshing of cane and millet had been stopped by snow and rain. The season for marketing these seeds is at hand, and liberal receipts are likely as soon as weather and other conditions permit. Prices here were nominally unchanged. A strong tone prevailed in alfalfa and cloverseed, supplies of which are known to be inadequate. Timothy seed was steady and stocks of blue grass seed were held firmly.

The following prices are based on carlots, per 100 lbs., sacked, as from first hands:

Alfalfa—Per cwt., $25@35.

Timothy—Per cwt., $9@10.25.

Blue Grass—Per cwt., cleaned, $20@30.

Clover—Per cwt., $35@45.

Millet—Per cwt., German, $3@3.25. Siberian, $2@2.50; common, $2@2.25.

Sudan—Per cwt., $9@11.

Cane—Per cwt., red top, $2.50; orange, $2@2.25; amber, $1.75@2.

Seed Imports.

The following statement of imports of forage plant seeds permitted entry into the United States. Under the Seed Importation Act has been compiled by the Seed Laboratory of the Bureau of Plant Industry:

Kind of seed.	Month of Nov., 1919. Pounds.	Month of Nov., 1918. Pounds.	5 mos. ending Nov. 30, 1919. Pounds.	5 mos. ending Nov. 30, 1918. Pounds.

Louisville Seed Market.

LOUISVILLE, KY., Dec. 5.—The general seed market shows very little change. Demand for bluegrass, orchard grass and redtop is slightly keener, with prices firm to stronger. Timothy is promising for spring and it is believed that there will be a generally big spring demand, as much grass is promised next season. Onion sets are moving more freely, and heavy shipments are expected toward the end of the month, when January deliveries will start moving.

CHICAGO SEEDS MOVEMENT.

Following is a report of the receipts and shipments of grass seeds at Chica for the months and weeks named in 19 19 and 1918, in pounds (000 omitted).

Weekly Linseed Review.

NEW YORK, Dec. 8.—*United Kingdom:* Arrivals of linseed into the United Kingdom during the past week were rather small. The market for seed h ruled firm with a fair business passi for crushers' account, but at the cl ing of the week trading was quieter a the enquiry appeared to have tem rarily fallen off. Indian qualities a very sparingly offered. Foreign change difficulties are tending to strict business to a great extent. Fir ness has characterized trading in The demand for oil has been fai active and 105/- per cwt. was the p vailing price at the close of the week

India.—Port receipts of linseed w rather light last week, and shipmen amounted to only 64,000 bushels. T crop outlook is generally favorable

Argentina.—Weather has continu fine for the past few days and cutti of the new crop made good progre Improvement in the volume of arriv of early new crop seed is now co dently expected if the weather contin satisfactory. The spot market for s has broken drastically owing to the sence of any active demand, and a result of the expected competition early new crop arrivals.

New crop deliveries were being fered more freely at the end of week, and the market was much low The agricultural situation can be c sidered satisfactory. Predictions of eral offerings of new seed have b freely made, provided weather rema favorable for cutting. Apparently, tonnage situation has become m easier, for freight rates are quoted terially lower, and larger supplies tonnage are anticipated, as more bo are destined to Buenos Aires.

Clover Seed Market.

lover seed developed no new fea- last week. It seems to be more holiday affair than anything else. is moved up sharply in the middle e week, spot prices reaching $31.25 December $30.97½. The break later just as sharp and the market is erratic. Alsike was fairly active, nade a new high record—bid up by shorts on themselves switching to the March.—*J. F. Zahm & Co., o.*

Duluth Linseed Market.

LUTH, Dec. 6.—A fresh entangle- was injected into the flaxseed et situation last week through tion that only a small proportion e Argentine seed imported into country will grade No. 1 and will gible for delivery on future con- . The advisability of making No. orted flaxseed eligible for deliv- n contracts therefore became a opic. After a proposal to that was brought up for discussion at eting of traders on Tuesday, the m was referred to the board of ors to work out a solution and to back at another meeting in the future.

iness in the flax market was con- to small limits, few operators car- take any chances. Quotations ued to advance on urgent bidding e part of dealers who had been t into the market on the assump- hat imports of Argentine seed be counted on to stabilize sup- conditions and prevent balloon as- ns when traders are called on to good in their deliveries on fu- As a result of that question up for a fresh solution, the new December future gained 45 cents during the six days operations, and spot 42@47 cents. The May future was not affected to any extent, it being assumed that the difficulty will be tided over in the near future.

Apart from fair runs on Wednesday and Saturday, receipts of seed were light during the week, aggregating 100,233 bus., as compared with 366,382 bus. during the same period last year. Shipments amounted to 19,214 bus., and stocks in elevators at the end of the week were 110,000 bus.

Closing prices of flaxseed on the Duluth market on Saturday as compared with the previous Saturday and the same period last year were:

	Saturday.	Wk. ago.	Yr. ago.
On track	$5.42-7	$5.00	$3.45½
To arrive	5.37-42	4.95	3.43½

December (new)	5.37	4.82	.....
January	5.22	....	3.44½
May (old)	4.82	4.76	3.45½
May (new)	4.80	4.75	....

Toledo Timothy Market.

Large supplies continue the headliner in the timothy situation. It will need a good spring domestic demand as well as the much advertised foreign demand to put backbone into the market. Deliveries on December contracts have not been so large as expected. Most of it has gone into strong hands. Some longs have been trading over to March at a full carrying charge difference. Receipts last week, 904 bags, of which 900 graded prime, to apply on December contracts.—*Southworth & Co., Toledo.*

Probable Shortage of Seed Potatoes.

Due to the scarcity of seed potatoes, the Department of Botany at the Ohio Experiment Station is urging farmers to give particular attention to the storing of seed tubers this season. The dry rot, late blight and black leg live through the winter as diseases in seed potatoes which are stored in unfavorable conditions. Excessive moisture causes the late blight fungus to bring about a rot in seed potatoes.

It has been shown that potatoes stored in dry, well ventilated cellars with an earthen floor are best for seed. If it is necessary to store potatoes in pits, the long, narrow type is more desirable than the round pit, because the temperature is kept more nearly uniform in the long pit. The pits must have good drainage and sufficient cover to prevent severe freezing.

SEED SITUATION.

MICHIGAN CLOVER SEED.

PONTIAC, MICH.—Interest in the seed trade seems to be centering around clover seed at present. From early reports we were led to expect considerable quantities of Michigan seed this season, but have been disappointed in the quantity offered up to this time, though the quality is the best we have had in two or three years.

There is some diversity of opinion as to whether farmers will buy clover seed at prices that will be necessary for seedsmen to ask in the spring, but the same question was debated a year ago. We know that seed never sold as easy as it did last spring and at prices nearly as high as will prevail this coming season. As a matter of fact, seed is no higher relatively than clover hay.

The crop is now pretty well bought up in this state and we believe it is considerably less than the state will require for its own seeding.—*The C. E. DePuy Co.*

SEED MARKET REVIEW.

Carl Bryant, Correspondent.

TOLEDO, O., Dec. 6.—Clover did the see-saw act this week, starting strong with an advance of 50c on light receipts and a good shipping demand and easing off with liberal run of receipts, to a closing Saturday at prices about equal with last week. Exports of 2,000 bags from New York was a feature reported Saturday with imports 5,280 bags, the latter causing some local selling and slightly lower market. Question is, how much of the 5,280 bags is red clover? Trade is inclined to believe reports of imports of red at New York include timothy and other seed. France is still sellers of clover but offerings from producers are light, in fact, not sufficient for the demand. England is willing buyer of French seed but Sterling is down so low that French seem to prefer the American dollar. Premiums for spot and nearby months reflect lack of country offerings and general lack of supplies. Short interest in December still large though somewhat reduced by switching to March. Crop news is of same tenure and offerings of foreign seed are mainly at prices above reach. Market is generally quiet with approaching holidays and sensitive to small influences. Alsike is putting on a little show of its own, selling over clover prices for first time since season of 1914-15. Good prime seed is scarce, crop is short, receipts light. Market looks strong with light receipts, short crop, and scarcity of good prime seed. Nine hundred bags of prime in receipts this week. Timothy market lost ground again this week. Offerings larger on each advance reflecting lack of confidence over the export demand with continued decline in foreign exchange. Large stocks here make sensitive market and prices decline or advance within 10 to 15c range on slightest provocation. Receipts here this week were 904 bags with nothing shipped, bringing stocks up close to the 100,000 mark. Clover receipts were heavier than for some time, at 976 bags, with half as much shipped out, making stocks here about 9,250 bags.

Minneapolis Flaxseed Market.

MINNEAPOLIS, MINN., Dec. 8.—There is a slower tone to the flaxseed market lately owing to the fact that crushers are worried over the coal situation. They have plenty of linseed oil orders to fill, but are unable to operate freely. Argentine seed has been coming to Minneapolis freely in the past few weeks and the crushers have purchased large amounts for shipment during the winter and early spring. Northwestern offerings moderate to light, though receipts in the past few days have been larger.

St. Louis Seed Market.

ST. LOUIS, MO., Dec. 6.—The seed market is quiet but steady. Clover seed is in good demand, and comprises most of the offerings. Some of the receipts are of such poor quality that their prices do not furnish a reliable idea of the market. Red top is firm and in good demand, with offerings light. Quotations are as follows: Clover, choice high grade seed, free from buckhorn, $47 to $49, fair to good country lots, $38 to $46, buckhorn-mixed, $23 to $33, poor and trashy, $5 to $22; alsike, choice high grade seed, $40 to $47, fair to good, $35 to $40, poor to ordinary, $18 to $30; timothy, choice clean seed, $11

to $11.25, average country lots, $10 to $10.75; low grade, $7 to $9; alfalfa, according to quality, from $20 to $37.50 per 100 lbs.; red top, fancy solid seed, $18 to $18.50, machine cleaned, $12.50 to $15, poor and chaffy, less, according to quality; millet, golden, $2.75 to $3.25; Siberian, $2.50 to $2.75; hog millet, $2.80 to $2.85; common millet, $2.75 to $2.80 per 100 lbs., bulk basis; pop corn, white rice, on the cob, $3 to $4.50, shelled, $4.50 to $6.50 per 100 lbs.; sunflower seed $10 to $10.50 for good dry seed, damp, stained or musty less; stock peas, whippoorwills, choice, $5.65 to $5.75 per 100 lbs.

Soya Bean and Cow Pea Outlook.

A special seed report of the Bureau of Markets, bearing date of Dec. 4, says that as a result of an extensive inquiry made about a month ago it appears that a somewhat smaller production of soya beans and cow peas was made this year as compared with last, very few counties reporting showing equally large or greater crops than in 1918. The quantity of seed of the 1918 crop still in the hands of growers is reported as almost nil, at least it is negligible, and the low prospective production of 1919, in view of this carryover, may result in a shortage of seed peas and beans for 1919. The correspondents of the Bureau indicate that offers of $4.15@5.50 per cwt. have been made for soya beans that have been fanned, but growers seem unwilling to sell at these prices. The larger seed men generally are eager to buy but inquiries indicate that but few beans had moved up to Nov. 27 to the larger distributing points.

Movement of cowpeas, however, from the hands of growers was more nearly normal than of the beans. Prices offered last week of November were 50c@$1.00 higher than prevailed previous two weeks; but offers of $5.50@$6.00 per cwt. in some of the larger sections did not bring out to any considerable quantity of peas, only 5 to 25 per cent of the crop, generally speaking, having moved from growers up to Nov. 27. Seedsmen, however, are not quite so eager to get the cowpeas as the beans.

Rye Situation.

The trade in rye at Chicago has broadened to such proportions that the old oats pit has been given over to it. It is now big enough to furnish a satisfactory market in which to operate. There are ample stocks here to trade on, the Chicago visible on Dec. 8 being 2,718,000 and the total visible is 17,304,000 bushels. The total visible is larger than the oats visible, while Chicago visible is nearly five times the size of the Chicago corn visible. The market position seems healthy, with a carrying charge of about 8c between December and May. The crop this year is officially estimated at 85,000,000 bus., against 90,000,000 in 1918, and our private advices indicate a decrease in the acreage seeded this autumn in the Northwest. With rye serving as a substitute for wheat, and for that purpose in strong export demand, the difference between rye and wheat prices furnishes a broad field for speculative opinion.—*Bartlett Frazier Co., Chicago.*

The Wertz Seed and Bird Co. at Sioux City, Ia., has changed its name to the Wertz Seed Co. and increased the capital stock from $50,000 to $125,000

Douglas Co., Wis., a dairy county, produced considerable clover seed this year, most of which is alsike with some medium red. The seed, however, will be locally distributed probably, there being none that will enter into commercial channels.

A campaign has been inaugurated under the direction of Bert Ball by the Spring Wheat Crop Improvement Ass'n at Minneapolis for the seeding of better spring wheat in the Northwest. The campaign is financed by a number of millers and grain dealers of the states named.

The State College officials of Washington recommend clover as a desirable crop for the Yakima Indian Reservation lands. Several remarkable crops have been reported grown this year. Government experts say the reservation clover has yielded exceptionaly high and quality of the seed is above the average.

The Dominion Seed Branch has testing laboratories at Ottawa, Winnipeg and Calgary, and for the year ending June 30 last made over 35,000 tests of seed grain against 5,800 in 1919. Most of the work is done between September and June. Each laboratory is able to handle about 300 samples per day. Ten samples are tested for each farmer or seed merchant free; tests in excess of 10 are charged for at cost.

The county agents of northern Wisconsin are urging their farmers to buy clover seed now. It is interesting, in this connection, to note that local newspapers are passing round the empiric theory of hulling clover seed, that is to say, an "old farmer" says that the old method of hulling clover seed was the better. It was to drive colts over the clover straw until the seeds were pretty well tramped out, the theory being that "the hoofs of the colts scratched the shells of the hard seeds" and made it posible to obtain in that way a better stand quicker than by using the ordinary seed of commerce. It does not seem to occur to these people that the trade long ago developed machinery for scarifying the hard clover seeds to obtain the same result and do it in a dependable way. Going back to the threshing floor method of the Hebrews before the exile seems going a long way to accomplish a very simple purpose.

For quick returns use our Market Place Department, Page 5, for wants and sale announcements.

Beans and Potatoes

The Maine potato crop is estimated at 2,950,000 bus., a million bus. over the Oct. 1 estimate of the Bureau of Crop Estimates. The quality is reported generally good with the exception of some rot which was prevalent over the entire state. The average yield was 225 bus., compared with 201 in 1918. Rot has also been quite prevalent throughout parts of New England and especially so in Connecticut, Rhode Island and Massachusetts, causing a loss in fact of almost half of the crop of those states.

Michigan navy beans, according to a recent bulletin published by the canned food department of Armour & Co., packers, Chicago, are responsible for the rapid development of all modern elevator cleaning methods. Michigan, leading every country in its production of navy beans, estimated this year at 2,500,000 bags, also leads in the quality of the beans produced and is recognized commercially as the great navy bean state of the Union. New York ranks second, producing about 900,000 bags of these beans. Colorado and New Mexico supply the larger amount of the pinto beans in the market and which have been popularized the past few years, and California leads in production of lima beans.

PORK AND BEAN TRADE UPSET.

Bean packers report that the Government sale of surplus baked beans packed for the army at less than cost of production, coupled with the efforts of Michigan and California bean growers to secure a 4c tariff on beans, has practically put the packers of baked beans out of the market for the present. Chairman McCall of the baked bean section of the Indiana Canners' Ass'n states in substance that the baked bean business has been killed for about a year; that her company reports that its own and other brands of baked beans packed for the army are selling in chain stores and Eastern markets on basis of Government sale, sacrifice prices.

BEAN SITUATION.

NEW YORK BEAN CROP.

CANESEO, N. Y. (2).—The acreage of beans in New York was very light this year. We had a good yield of excellent quality hereabouts. The prices have been satisfactory to farmers and beans have moved out very freely. We do not think there is over 25 per cent of the crop back in farmers' hands, and only a large per cent of this balance will be required for seed purposes.

Beans are a very small factor in the canning industry at the present time, as Michigan and California are the large producers of beans in this country.—*Lynn & Co., Inc.*

BEAN AND POTATO PRICES.

The potato market generally was an interesting one during the past week. Most sections of the country beans easier. Quotations follow for lots good quality and condition beans and potatoes. sacked, per cwt., unless otherwise specified, as of Dec. 6:

Beans—

Boston—Jobbing prices: New York-Mich. pea, $7.75@8.25; common to good, $7.25@7.75; Calif. sma. wh., $8@8.50; yellow eyes, fcy., $8@8.50; fair to good, $7.25@7.50; red kidney, fcy., $13.75@14; fair to good, $11.75@12.75; Canadian peas, $5.75@6.25; native green peas, $7.75@7.25; lima beans, $14.25@14.50.

JAPAN'S BEAN CROP.

Con.-Gen. Skidmore at Yokohama, under date Sept. 20, writes the Department of Commerce on the bean crop of this year in Japan and probable surplus for export:

Practically all of the beans destined for export from Japan are grown in the Hokkaido. The total crop for 1919 it is estimated will amount to 318,000 long tons, of which about 277,000 long tons will be obtainable for export. The following table gives the estimated production of beans in the Hokkaido, by varieties, in bags of 100 kin (132 pounds) each, for the years 1918 and 1919, and the estimated quantities of the 1919 crop which will be available for export:

Variety.	Crop estimates. 1918. Bags.	1919. Bags.	For export.[1] Bags.

[1]Estimated surplus for export from crop of 1919.

TOTAL EXPORTS OF CHIEF VARIETIES.

The statistics of export to the various countries of destination are not available for the year 1918, but the total quantites and values of the principal varieties of beans exported from the Hokkaido during that year were as follows: Soy beans, 1,205,693 kin, valued at 134,166 yen (1 kin = 1.32 lbs.; 1 yen = [mint par] 49.85 cts.); red or white beans, small (*Phaseolus subtrilobata*), 1,421,413 kin, valued at 160,787 yen; peas (*Pisum sativum*), 149,835,538 kin, valued at 22,819,621 yen; kidney beans, 191,367,154 kin, valued at 30,194,036 yen. In 1917 the United States took 1,454,501 kin of soy beans, 3,163,618 of small red or white beans, 9,484,383 of peas and 117,590,646 of kidney beans, all valued at 19,910,936 yen (approximately, $9,955,000).

SPECULATION A STRONG FACTOR IN BEAN TRADE.

The market for beans in Japan, when trading is active, is subject to violent fluctuations due to the manipulations of speculators. The large number of varieties, with varying markets for each, offers a good field for cornering operations. The uncertainty of the crop, which subjects the market to considerable nervousness as weather conditions vary, and the sudden demands on available stocks when ships on bean-carrying routes enter harbor for cargoes, only add to the speculative character of the market. Large dealers who can afford to keep considerable stocks on hand are comparatively secure in their operations. It is the small dealer, who has suddenly to buy in an adverse market in order to fill cargo allotments larger than he had expected to receive, or who has to buy to fill contracts for future deliveries, that is responsible for the feverishness which frequently characterizes the trade. Because of their profits from speculation, large dealers are often able, in order to retain their market abroad, to offer beans at prices considerably below those ruling in the domestic market.

Prices of recent quotation vary from $5.50 to $8.50 gold, per bag of 132 pounds, for both peas and tebo beans.

Feedstuffs

Aug. Brueshoff sold his feed mill at Hamburg, Minn., to Aug. T. Radke recently.

A Citizens Milling Co. is being organized at Zephyr, Texas, and a feed mill will be established.

Max Nowak, president of the Nowak Milling Corporation, Hammond, Ind., and Buffalo, N. Y., is abroad.

N. F. Hodge has purchased the Harrington feed mill at Rock Creek Station, Ohio, and is in charge of the work.

D. A. Miller of Mountain Home, Ark., has built an addition to his mill and will go into the flour and feed business.

The Bonded Warehouse has completed its new mill at San Benito, Texas, and is turning out corn meal, chops and chicken feed.

Pawnee Co., Kans., reports excellent pasturage from volunteer wheat. The regularly sown wheat this fall does not amount to much for grazing, having been put in too late.

The Marinette, Wis., Flour & Feed Co. has purchased a building in that city comprising one solid block two stories high. It will be occupied entirely by the company.

One of the largest deals in silage ever reported in Kansas was 6,000 tons sold at Eldorado at $8 per ton. This silage will be fed locally in connection with molasses and cottonseed cake.

The J. F. Robertson Feed Co. of Steubenville, Ohio, has been incorporated with a capital of $42,000 by John F. Robertson, Geo. S. Salmon, Fred F. Saunders, Ida F. Robertson and Pearl M. Salmon.

The Blue Springs Lumber & Milling Co. of Blue Springs, Mo., had the old Denver Hotel Bldg. torn down and will use some of the lumber in the erection of a large hay and feed barn the company will erect on the lots.

A two story brick building occupied by the Harris Feed Co. has been purchased by Owen & Dowing at Conway, Ark., which will be remodeled and occupied by the firm about Jan. 1 as a feed plant. An annex 25 feet deep will be built on the rear of the structure.

The traffic manager of the Texas & Pacific Ry. of Texas reports cottonseed in the Southwest region moving without restriction. Mills, however, are still under some restrictions as regards their procurement of fuel, which is being supplemented by local shipments of lignite. Memphis, Nov. 25, reports an embargo on cottonseed shipments effective immediately on account of the coal situation except that shipments in transit will be delivered.

The State Game Department of Idaho recently purchased a carload of cottonseed cake to be shipped to Victor and then hauled into the Jackson Hole country for the elk herds which every winter come down into the Hole to be fed. The winter starting unusually severe and early, it was found necessary to buy more cake than usual. Besides the oil cake the state has provided about 500 tons of hay for that vicinity, in addition to 850 tons provided by the Biological Survey. Altogether the state has arrpopriated $6,000 for feed and large individual contributions in addition will be used. An effort will be made this coming year to provide more feeding grounds to relieve the congestion in Jackson Hole.

ENGLISH CANNED MILK PRICES.

Official maximum retail prices for condensed and evaporated milk in the United Kingdom were on Nov. 1 as follows (wholesale prices being 6 sh. per case below the retail price):

Full cream—	Unit.	Price.
Sweetened	14 oz. net	$0.258
Sweetened	7 oz. net	.138
Evaporated	16 oz. net	.207
Unsweetened	12 oz. net	.189
Unsweetened	6 oz. net	.104
Machine skimmed	14 oz. net	.207

Conversion is made at rate of exchange of Nov. 10 (£1 = $4.145.)

Good Tone in Cottonseed Feed.

KANSAS CITY, Dec. 6.—While feeders bought on a small scale, a strong tone was apparent in the market for cottonseed cake and meal in Kansas City this week. Fertilizer manufacturers were moderate buyers, and there was active bidding for off-grade supplies. However, it is alleged that a combine exists among fertilizer interests to buy at a fixed price well below the current market. Mixers in the East were good buyers, they, in turn, sharing a broad demand from the dairy trade. Cake and meal of 45 per cent protein contents was quoted around $80 to $82 a ton, basis Kansas City.

FEED RATES MUDDLED UP.

Representatives of the various grain, milling feed, starch and oil industries will be heard at a meeting in the Transportation Bldg., Chicago, on Wednesday, Dec. 10, at 10 a. m., in the office of C. J. Brister, chairman of the Freight Committee. It has been proposed to advance the rates on by-product feeds, mixed feeds, etc., to the local wheat, or paper rate, basis.

Such a tariff would advance present rates 4c, making the rate on these feeds 5½c over other grain feeds and 6c over the rate on the grain (reshipping) from which they are made. This change in differentials is claimed to be discriminating and unreasonable. It would make the rate on oil meal 30.5c to New York, against 34.5c from Minneapolis, only 4c difference for the longer haul. It would affect all rates that break on Chicago, St. Louis, Cairo or the river. If put into effect, these rates would practically destroy, for example, the poultry feed business, as Eastern consignees could buy the grains 6c cheaper than they could buy a mixture of the same grains.

There is no reason why corn gluten feed made out of transit corn should pay any particularly higher freight than corn feeds, both being wholly made from transit grain. The so-called "local rates" out of Chicago are never used, but are simply a fictitious standard kept in to make the grain growers east of Chicago pay a higher rate to Chicago than Western growers pay to the same point, and should no longer be used as fiction for another purpose.

New Feed Mill at Hammond.

The Pratt Food Co. of Philadelphia and Chicago has property in Hammond, Ind., on which a plant will be built, costing approximately $300,000. This plant will more completely take care of the company's growing Middle-western business. The Company reports a greatly increased demand from all of their lines, particularly Pratt's "Buttermilk Baby Chick Food" and "Pratt's Calf Meal."

The Chicago district in which so many similar plants are located is desirable for this work, affording easy access to sources of supply for such stock feeds and admirable storage and shipping facilities for quick deliveres to feeders, dealers, dairymen, etc. Construction on the new mill will start soon, superintended by Stephens & Grossman, 523 Transportation Bldg, Chicago.

THE FEED MARKETS.

MONTREAL.

Montreal, Dec. 6.—The market is steady for mostly all lines of millfeed. Car lots of bran are reported at $45 to $46 including bags and shorts at $52. Pure barley meal is sold in broken lots at $72 to $73 per ton and mixed grain moullie at $67 to $6 Dairy feed is in good demand at $55 to $ per ton including bags.

BALTIMORE.

Baltimore, Dec. 6.—With more seasonable weather conditions during the last few days, the demand for feedstuffs generally has shown a tendency to broaden out, and the movement is therefore better. Market firm on sacked bran and middlings. Quotations follow: Western spring bran per ton, 100 lb. sacks $44.50@45; western middlings, per ton, 100 lb. sacks, $48; City Mills' winter wheat bran, per ton, 100 lb. sacks, $48; brown middlings, per ton, 100 lb. sacks, $50@52; white middlings, per ton, 100 lb. sacks, $65.

DES MOINES, IA.

Des Moines, Ia., Dec. 6.—Demand for feed in this market rather inactive the past week. Quotations as follows: Bran, $4 standard midds, $48; flour midds, $52; meal, $80; tankage, $100; cotton seed meal $84.50, and alfalfa molasses feed, $47.

MEMPHIS.

Memphis, Dec. 6.—Business in mill feed is picking up, although buying from the interior is still hesitant. Wheat bran so

GRAIN and FEED STUFFS

$42 today, an advance of 50c a ton the day before. Offerings of shorts light and $54 is asked for gray. For bran $61 is offered, but the supply is rently limited. Mixed feed people are he market for some of their supplies in cipation of better business a little later, continuation of mild weather still re- ts buying to some extent. For corn meal delivered in ten days $65 is d. In cottonseed meal there is not h doing, except in off stuff, which chiefly to fertilizer people. The ex- situation is proving disappointing. s are running on their supplies ob- d before the fuel restrictions went into t, but are buying few seed.

PITTSBURGH.

ttsburgh, Dec. 6.—Arrivals of feed have been so large during the past week. es are strong and there is a fairly good and for the standard feeds. Only 2 of bran came into the market last s, with a total of 14 cars bulletined in grades, most of which consisted of e middlings. No regular quotations been established by the local ex- ge.

NEW YORK.

w York, Dec. 6.—A slightly firmer tone loped in the market for millfeed al- gh business was quiet. Offers from the t were in smaller volume, and sellers ed to anticipate a broader demand g to the cold weather over the coun- City bran was quoted at $45; mid- s, $54; and Red Dog, $69; while West- ran was quoted at $47; middlings $49, Red Dog, $65 per ton.

BOSTON.

ston, Dec. 6.—Feeds of all kinds have nced materially during the past week ugh demand continues extremely dull. s being quoted as follows: Bran, g, sacked, $48 per ton; bran, winter, d, $48; middlings, sacked, $50@54; d feed, sacked, $51@53; gluten feed, d, $72.12; red dog, sacked, $65; second , $66; stock feed, sacked, $61; oat , reground, $30; hominy feed, $65.90; nseed meal, sacked, $79.75@81. Re- s for the week ending December 6 no tons.

DULUTH.

luth, Dec. 6.—Bullish conditions were ght about in the feed markets during last week with active demand and er productions of the mills. Advances general through the list. Ground oats nced $6.25; ground feeds, $3.50@4.75; e corn meal, $1.75; cracked corn, $1.75, Boston mixed, $3.
ces per ton follow: Bran, $38.75; d oats, $48.25; No. 1 ground feed,); No. 2 ground feed, $51.50; No. 3 d feed, $50.50; shorts, $42.75; flour dings, per ton, $51; coarse corn meal, red dog, $61.75; Boston mixed, $41.75; ed corn, $55; rye feed, $42.

CINCINNATI.

cinnati, Dec. 6.—The local feed situa- was firm and higher here the past with further advances indicated by educed stocks and steadily improving nd. Inclement weather conditions delayed shipments on orders already d, and shutting down of gluten feed ries are causes of complaint among rs for inability to fill urgent orders. and middlings selling well at the r prices. Quotations per ton in bags: ing wheat bran, $44@45; soft winter t bran, $43@43.50; hard winter wheat $43@43.50; spring wheat middlings, 8; soft winter wheat middlings, $47 hard winter wheat middlings, $50@54; n seed meal (36% protein), $77.50@$78; d meal, $79@82; gluten feed, $68@69; y feed, $62@63; No. 1 alfalfa meal, 4; beet pulp, $62@62.50; barley chops, 5; rye middlings, $46@48.

MILWAUKEE.

waukee, Wis., Dec. 6.—The millfeed et showed a firmer tone during the week and values have improved on al articles. Demand has been fair and s took hold more freely. Inquiry has fair for bran and prices are up $1.50. ard middlings are also $2 higher on and $1.50 higher on outside prices. nt quotations are:
n, per ton, $42@42.50; standard mid- , $44@44 50; flour middlings, $50@51; og, $59@60; hominy feed, $60; rye $42.50@43; old-process oilmeal, $79.50; seed meal, $76@83; brewers' dried s, $66.50, all in 100-lb sacks.

LOUISVILLE, KY.

isville, Dec. 6.—During the past week of wheat flour were advanced an- twenty-five cents a barrel, making a fifty cent increase inside of ten days, due largely to the high cost of sacks, and increased premium on wheat.

There is a good demand for feed, but production of corn and manufactured feeds is being curtailed due to coal shortage, which will give mill feeds a better chance. Mill feeds have been a little dull for the past few weeks, and when flour prices were advanced no advances were posted on feed.

Principal feed quotations are: Bran, $45 a ton; mixed feed, $53; middlings, $58, sacked and packed, carlots, Louisville. Scratch feed is quoted at $68 a ton in 100-lb. jutes; cracked corn, $64.50; corn and oat feed or chop, $62.50; hominy feed meal, $62.

NEW ORLEANS.

New Orleans, Dec. 6.—Bran has taken another spurt and has offered for shipment at $2.20 per hundred delivered New Orleans. Some recent sales have been made at $2.15, but this price seems to be an exception; most mills asking five cents per hundred more. Shorts offered at $2.60 per hundred delivered. No demand for shorts.

NASHVILLE.

Nashville, Tenn., Dec. 8.—The feed situation was without important changes last week. Wheat bran was in light supply and firmer on account of shorter running time of the mills because of fuel shortage. Prices: Soft wheat bran, 100-lb. bags, per ton, $45.70; standard middlings, $58.50; horse and mule feed, $45@61; dairy feed, $56@67; hog feed, $63; poultry feed, $68@75.

PHILADELPHIA.

Philadelphia, Dec. 6.—There is a good demand for bran and middlings, prices for which are higher under light offerings, but other feedstuffs are dull and mostly lower with increased supplies. The quotations are for carlots to arrive, in 100-lb. sacks, at cost, per ton: Winter bran, $47.50@48; spring bran, $46.50@47; standard white middlings, $47@48; flour middlings, $58@59; red dog, $65.50@66; shorts, $48.50@49.50; low grade flour, $66@66.50; rye middlings, $48.50@49; fine yellow hominy, $63@64; fine white hominy, $64@65; reground oats feed, $31@31.50; cottonseed meal, 36% protein, $78@79; cottonseed meal, 41% protein, $84 @85; cottonseed feed, 20% protein, $62@63.

ST. LOUIS.

St. Louis, Mo., Dec. 6, 1919.—The feed market is strong, with corn feeds scarce and almost unobtainable, and bran in active demand and firm. Alfalfa meal also is scarce. Quotations are as follows: Bran, hard, $42.50@43; soft, $43@43.50; middlings, brown, $47@49; gray, $50@52; mixed feed, $45@46; red dog, $62@63; white hominy feed, $59@60; oat feed, $25@26; barley feed, $59@60; whole ground barley, $64@65; alfalfa meal, choice, $43; No. 1, $42; No. 2, $42 per 100 lbs., sacked.

MINNEAPOLIS.

Millfeed.

Minneapolis, Dec. 8.—There is a good demand for millfeed owing to the cold weather and high cost of grain. Mills are not running very heavily and offerings are light, which tends to advance prices. Bran and standard middlings are in the best general demand. Heavier grades were slow for a time, but the demand for them is picking up again. Transit offerings are being cleaned up gradually. Mills are offering very little bran at present. Quotations in car load lots, f. o. b. Minneapolis, in 100 lb. sacks, bran, $41.50@42.50; standard middlings, $42.50@43.50; flour middlings, $51@52; red dog, $59@61; rye middlings, $43.

TOLEDO.

Toledo, Dec. 5.—Bran prices advanced this week. Demand is strong for all mill feeds. Output increased during the week and with cold weather the demand is absorbing supplies. Bran, $41; middlings, $50; in bulk, carlots, f. o. b. Toledo. Bag prices, $5 higher. Corn and oats scarce; latter particularly wanted by feed manufacturers. Receipts of oats at Toledo in November were only 95 cars—hardly sufficient to supply city trade. Market quiet account farmers feeding own stocks. Scratch feed, best grades, $67.50@69.50; corn and oats chop, $60.00; cracked yellow corn, $63.50; dairy feed, $67 per ton, carlots, f. o. b. Toledo.

Beacon Feeds.

The Beacon Feed Co. of New York City have for the past year conducted a thorough test of their Beacon Feeds with several of the most prominent stock, horse, dairy and poultry farms throughout the East. They have placed the Beacon line of dairy, horse, poultry and stock feeds with A. E. Gutteridge & Co. of Chicago, well-known feed jobbers as their Western representatives, for the states of Ohio, Illinois, Michigan and Indiana.

The Beacon Feeds consist of the highest grade of ingredients obtainable and are scientifically blended to make rations of the finest quality. Shipments will be made from Milwaukee.

New York Oats Market.

Arrivals for domestic use were exceedingly moderate and should continue small for some time. Notwithstanding the continued decline of foreign exchange, however, further export business in oats has been accomplished, and it is apparent that all old sales of heavy clipped oats for export have not yet been filled.

The lightness of the primary movement has resulted in a further advance in premiums, both at the West and in this market, where the indications point to an additional increase. Transactions for the week were moderate in character, with a better inquiry from local dealers, who, however, are buying cautiously at the higher levels.—*L. W. Forbell & Co., New York City.*

BROOM CORN.

Snow to the depths of two to four inches has covered practically all of the broom corn area of the Southwest since Thanksgiving, running into the Colorado section. This, followed by cold weather, has practically suspended field operations which must be concentrated now in southwest Kansas and adjacent territory in Oklahoma, New Mexico and Colorado. Prices in the western end of the area, *The Broom Corn Review* reports, range from $75 or $80 up to $100 for the poorer qualities and $120@125 for average stock and up to even as high as $150 for an occasional good crop. Oklahoma areas as a whole are fairly well cleaned up. Prices in the dwarf district are better, ranging from $100@200, according to grade. One car sold as high as $225.

The Wichita market is still unembargoed but receipts from field points are light. The general tone of the market remains unchanged. Prices range from $100@300 and the dwarf stock from $125@200. Some Lindsey stock as high as $300.

The manufacturing interests, particularly Chicago, have been threatened during the past week with a shutdown on account of the coal strike, and closing is likely to take place unless the coal settlement, reported as imminent, becomes a fact.

SUCRENE FEEDS

In Their 20th Year of Popularity

One dealer, who has handled Sucrene Feeds for many years, writes: "We have had increasing sales on Sucrene Feeds each year. When we sell a feeder Sucrene he is generally a regular customer. Have handled a number of other feeds but they are hard to start and generally fall off. In the long run we consider Sucrene our best seller."

QUALITY FIRST AND ALL THE TIME
THE SUCRENE FEED SLOGAN

It gives you a grip on the feed business which competition can not break.

Our new feed mill at Peoria, Ill., the greatest and most modern plant in America, devoted exclusively to the manufacture of mixed feeds, will soon be ready for work. In the meantime our Owensboro, Ky., plant is running double shifts to keep up with the demand for Sucrene Feeds.

We solicit your order for Poultry Scratch Feeds in any quantity. The late fire did not affect this branch of our manufacturing facilities. Address Main Office at Peoria, Ill.

Alfalfa Department

he Great Western Alfalfa Co.'s t at Kearney, Nebr., which was losed of some time ago to W. J. tt, is to be put into operation tly.

he beginnings of alfalfa culture been made in Cooper Co., Mo., this . Some good hay was reported n on the bottom lands of the Mis- i River.

eenwood Co., Kans., reports a good of alfalfa, but as there was not much corn in the county most of alfalfa and other rough feeds will sed locally.

e crop of alfalfa in Montgomery Kans., was somewhat short of last but the quality generally is very , while the prairie hay is the best rted in years.

stock shipper from Eureka, Kans., rts plenty of alfalfa and rough hay at neighborhood. In addition to feeds there is a considerable tity of kafir.

e alfalfa mill of the Burley Feed Co. at Burley, Idaho, has been put operation. The plant has a daily city of 120 tons of meal. It also uces other ground feed products.

new alfalfa mill at Joliet, Carbon Mont., has begun grinding alfalfa. mill is owned by the Carbon Coun- lour Mills, with W. F. Ninneman anager, who reports that the com- has already booked orders to keep mill running for a considerable

. H. Stone of Greenville, Miss., is n among his friends as the "alfalfa " He has a plantation of 600 acres falfa, one of the largest fields in ssippi. He has been getting five igs each year. This year, however, was considerable loss on account ld harvest weather.

Cvley, Butler and Sumner counties, e southern part of Kansas, report crops of alfalfa in certain sections, ery little of the hay has so far prepared for market, owing to cost of labor and hauling. Con- able of the crop was sold in the row and baled by the purchasers.

Alfalfa for Poultry.

e value of alfalfa in poultry feeds ong been interested particularly by rounders of feeds, but it is believed it has not been appreciated as it d be by poultrymen in general. refers particularly to alfalfa in the of meal, which at least is claimed a higher food value than clover.

DRYING ALFALFA.

e process of artificially drying al- hay is by no means new. It is of e familiar to the trade; but one cial effect of the process may per- have escaped attention, which we ned to "dig up" from a past num- f the proceedings of the Kansas Board of Agriculture.

answer to an inquiry, an expert "The activity of the alfalfa in ing stock is, we believe, due to we call digestive ferments con- t therein. These ferments, it will derstood, are substances which in sively minute quantities are able use chemical reactions which are large. Now, it has been discov- that these digestive ferments are isly injured by exposure to sun- and to drying in the open air; e believe if they were artificially in a low temperature the fermen- activity could be retained in the a greater extent."

s believed that these qualities will tained if the alfalfa were put in lo, at least for some time. In an- to the question whether they be lost before the alfalfa would be taken out in the spring, the answer was, "No; there is a progressive consumption but the rate is not serious."

The question is "not whether the drying of alfalfa is preferable, we know that positively—that the ferments are conserved by artificial drying; the question is whether it pays, and we think from the standpoint of expense that it does."

ALFALFA SITUATION.

VERY LITTLE LOCAL ALFALFA.

HOUSTON, TEXAS.—There is no alfalfa hay raised in this section of the country to amount to anything. We can say this, though, that alfalfa hay is very high and we are today (Nov. 29) paying $40 per ton for choice alfalfa hay, delivered Houston, Texas.—*Oliver Cranston.*

Improved Demand for Alfalfa Meal.

KANSAS CITY, Dec. 6.—An improved demand developed in the market for alfalfa meal in Kansas City this week. Sales were made over a wide territory, including the East, North, Central States, South and Southeast. Offerings from Colorado and other Western states were extremely light, the movement being hampered by car shortage and heavy storms. Advices indicated that the larger plants were generally unable to make deliveries on new orders in less than sixty days. Local mills are also well sold up, and in instances were forced to turn down orders.

Prices were up 50c to $1.50 a ton. Choice was quoted at $42@44 a ton, sacked, in carlots, basis Kansas City; No. 1, $38@39; No. 2, $34.50@35; brown, $32@33.50.

Mixers shared a good business, sales being made mostly in nearby territory. Storms and colder weather was an important stimulant to trade, and contributed largely to the increased demand. Dairy feeders were heavy buyers, and liberal sales were made to hog and cattle producers. Moderate shipments were made to the South and Southwest. Prices were unchanged, as follows: No. 1 molasses feed, $40@42; No. 2, $37@39; brown, $35@37; alfalfa grain molasses feed, $42@52.

Bullish in Alfalfa.

W. B. Poindexter of North Bros., Kansas City, manifests a bullish attitude on alfalfa hay for the immediate future, and even for the next few months. "Some members of the trade have predicted that a sharp break in prices would occur around the holiday period of the year, at which time demand normally falls off and the movement begins to increase." said Mr. Poindexter. "But this is improbable this year, despite the recent advancing tendency of the market. The movement of alfalfa to market appears to have reached its peak, and loadings in the country are diminishing. Already there are signs of exhaustion of supplies in some sections of Kansas and Colorado, and while the car shortage still is the uppermost factor in the movement, country holdings are falling off rapidly, and even during the heavy receipts of the past month we have been forced to draw from our storage stocks in the interior to meet the enormous demand. Stormy weather in Colorado and generally unfavorable weather conditions will restrict the movement in the next few weeks, while the car situation is again tightening. Demand remains abnormally large, with sales to the East, North, South, Southeast and Southwest, including Texas, from which states inquiries are increasing. Cold weather will further increase the demand."

Chief Inspector Geo. S. Colby at New Orleans reports wheat exports in November 739,125 bus. compared with 1,142,807 in 1918; 50,400 bus. of corn with none in November 1918; oats 63,610 bus. compared with 198,000 a year ago and 250,273 bus. of barley against none November 1918. For the season so far New Orleans shipments of wheat have decreased 1,683,491 bus. compared with same period 1918; corn increased 99,282 bus.; oats decreased 4,108,590 bus.; barley increased 5,784,175 bus.; and rye decreased 1,082 bus.

Hay Department

The Union Stock Yards at St. Paul has been permitted to raise the price of hay sold to stock shippers to $35 a ton.

The state college agronomist at Brookings, S. D., deprecates the waste of farmers who burn their straw. The amount of fertilizer contained in the straw, he says, is sufficient to warrant its conservation and use for that purpose.

Hay buyers in Oklahoma report that Cherokee, Okmulgee and Muskogee counties have hardly begun to ship their hay. The yield in that section of the state was very heavy and the quality very fine, but the farmers are holding for higher prices and very little of the hay comparatively has been baled for commercial shipment.

Harland Co., Neb., is said to have had this year one of its heaviest crops of hay, both prairie and timothy. Some of this is in the bale and there have already been quite liberal shipments. There is still plenty of hay for market use.

Coffey Co., Kans., has enough hay to carry the county through the winter, although the yield was light and quality generally poor. Some very good prairie is reported in certain parts of the county, but none is said to be on the market.

Redwillow Co., Neb., is reported to have a wonderful hay crop this year with prairie hay of excellent quality. Considerable hay has already been shipped but the bulk of the crop is still in the stack.

THE HAY SITUATION.

FARMERS HOLDING HAY.

EVANSVILLE, IND.—The farmers in this section are holding their hay for sale in the spring and there is now very little movement and very little demand. Stocks in the hands of the farmers are larger than the stock held this time last year as far as timothy hay is concerned. There is a shortage in our section of both the clover mixed varieties as well as straight clover. We look for cheaper prices next spring.—*Independent Hay & Grain Company, J. R. Jennings, President.*

HAY IN CALUMET CO., WIS.

CHILTON, WIS.—There is quite a little good hay in Wisconsin this year, mostly light clover mixed, making good fodder for horses as well as stock. The demand for this hay has been especially good of late, coming from Wisconsin and Chicago territory. There are also ample quantities of good feeding hay consisting of timothy and clover, with a grassy mixture. This hay is of good color, and meets with very good sales. We expect a very good hay business throughout the winter and early spring at good prices.—*Knauf & Tesch Co., per Wm. N. Knauf.*

HAY SHORT IN NORTHEAST TEXAS.

MCKINNEY, TEX.—On account of excessive and continued rains through this section, the last cutting of alfalfa was entirely lost, and it was very fine. Consequently, there is a shortage of this hay right in the heart of the black land district of north Texas, as this last cutting would have been put up for home consumption. The same conditions apply to Johnson grass and Bermuda hay; the finest, heaviest and best crop of the year was lost, farmers not being able to cut and save it. We look for abnormally high prices, especially on alfalfa, before another crop comes on the market. There was a fair crop of upland prairie hay saved during the summer, but not enough more than for home consumption.—*Plummer Harris Grain Co.*

KANSAS CITY HAY NOTES.

Sanders Sosland, Correspondent.

Hay and coal may not be closely related, but the trade in hay in Kansas City was affected to a considerable degree by the strike of bituminous miners. Receipts were seriously restricted at the outset by a walkout of switchmen which was quickly settled. The coal strike resulted in rules by the Kansas City fuel control committee limiting all office hours to 9 to 4 daily. With a large movement of hay to market, together with a heavy shipping demand, considerable difficulty was encountered in observing the fuel saving regulations. There was some nervous buying of hay on account of fears of a railroad strike in sympathy with the walkout of miners. Settlement of the coal strike will tend to make the position of the market healthier.

Snow and sleet in the Southwest have reduced the availability of fields and of wheat for pasturage purposes and forced the feeding of livestock which had subsisted on grass. This means increased hay consumption in the Southwest. In Kansas sleet and snow also interrupted the movement of hay and other products from farms, but this will not tell for some weeks in the receipts.

J. D. Cole, former president of the National Hay Association, represented the Kansas City branch of the Horse Publicity Association at its banquet in Chicago last week. The local branch, which is being liberally supported by hay dealers and others, is making progress in developing into an influential organization. Mr. Cole brought a favorable report as to the enthusiam which prevailed at the Chicago gathering. Kansas City hay dealers are leading in developing the association's branch organization here.

"Prairie hay is in a strong position," declared J. C. Glover of J. C. Glover & Co. "While Kansas City has witnessed a heavy movement of hay, with the November arrivals the largest on record, the proportion of prairie in the offerings was extremely small. In the prairie hay districts of Kansas and Oklahoma, from which states Kansas City draws the bulk of its offerings of the wild hay, the car situation is still acute. The record movement of hay was largely the result of freer car supplies in Colorado and in the alfalfa producing sections of Kansas. Of course, there is a large amount of prairie hay in the country, the crop this year having been heavy, but shippers are unable to obtain equipment. My advices from the interior show that some shippers have not obtained cars in forty days, and in instances even longer. Demand for prairie is active and out of proportion compared with the volume of receipts to this market. Stock yards, feeders and local buyers are taking considerable prairie. Unless a freer movement soon materializes, further advances, at least continued strength on the present level of prices, may be anticipated."

While hay does not figure extensively in international trade, it is essential for dealers in that commodity to give serious consideration to the extraordinary depression reported in foreign exchange rates. Depression in foreign exchange is adverse to the export of cotton, hogs, lumber and other commodities which have a close relationship to hay. Foreign exchange depression, in fact, is adverse to general business, because it acts as a barrier against foreign buying, which has been a vital factor in American prosperity in recent years. When the live stock, dairy, cotton, steel and other interests begin to feel the effect of depression in foreign exchange generally, they will find the prices of what they produce on the downgrade owing to reduced competition. This already has happened in cattle and hog markets. Exchange is so depress that it now requires about nine E lish pounds to pay for a ton of alfa at $36, compared with a little m than seven under the normal basis English exchange. Italian and Fren exchange rates are so depressed t the franc is quoted at hardly half value prior to the war, while the It ian lire are even cheaper. Hay is clo ly related with general prosperity, a low exchange rates will eventually fect this market unless there is a gr change for the better, which is not n in prospect.

Hay Markets

DES MOINES, IA.

ec. 6.—On account of the car situation eipts very light. Market closed higher the week. No. 1 upland, $22. No. 1 thy, $25.

DETROIT.

ec. 6.—The hay market is firm at an ance of $1 over the prices of last week. eipts have been falling below the needs onsumers and there is an active de- d for everything that comes to hand. ada is not helping this market and igan receipts are held up by scarcity ars. Straw is scarce and higher. Quote: 1 timothy, $29.50@30; standard and t mixed, $28.50@29; No. 2 timothy, 0@28; No. 3 timothy, $26.50@27; No. 1 ed, $27.50@28; No. 1 clover, $27.50@28.

BUFFALO.

c. 6.—There was no change in the ket here. Offerings are light and every- holding on to get all there is in it. farmer has plenty of hay but is always ing for a little more money. No. 1 was ed at $28@29; No. 2, $26@27, and No. 3@25. Straw, nominally $13.

OMAHA.

c. 6.—Receipts of prairie hay light, and the demand being good it has caused better grades of hay to go higher. Al- receipts good, and prices steady. Oat wheat straw remains steady.

1 upland prairie hay, $24@25; No. 2 nd prairie hay, $19@22; No. 3 upland ie hay, $14@17; No. 1 midland prairie $23@24; No. 2 midland prairie hay, 22; No. 1 lowland prairie hay, $18@19; 2 lowland prairie hay, $13@15; No. 3 nd prairie hay, $10@11; choice al- , $32@33; No. 1 alfalfa, $30@31; stand- alfalfa, $27@29; No. 2 alfalfa, $24@25; 3 alfalfa, $19@21; oat straw, $11@12; t straw, $10@11.

MEMPHIS.

c. 6.—Firmness prevails in hay and nd is picking up some, although busi- continues light. Receipts, especially falfa, continue very light. Handlers of atter say they are finding it very diffi- to get shipments, and that it is not so the matter of price as it is scarcity. uations for it are almost nominal, al- gh some No. 1 and standard sold today 8, while a car of Colorado standard at $38.50. Alfalfa meal is extremely e and high. Because of car scarcity hortage is expected to get worse. Re- s of timothy and other kinds are also No. 1 sold at $34, while Indiana in transit was offered at $35.

PITTSBURGH.

c. 6.—Receipts of hay were almost as large last week as they were the previous, there being a total of 1,536 bulletined by Supt. O. C. Alexander e local exchange. This amount, how- was about 300 tons under the receipts he same period a year ago. The et is strong, with all arrivals of good timothy being accepted at higher s. Enough other hay is arriving to the demand, which is limited owing e fact that the weather is still open attle are having no trouble in finding re here and there. Good green clover No. 1 clover mixed hay are finding a sale, but plenty of other grades are nd at this time. Quotations follow: timothy, $31@31.50; standard, $29.50 No. 2 timothy, $28@28.50; No. 3 tim- $26@27; No. 1 light clover mixed, $30 0; No. 1 clover mixed, $31.50@32; clover mixed, $27@28; No. 1 clover, 2.50; No. 2 clover, $26@29.

grades of straw are in good demand e receipts are light. Quotations have advanced 50 cents a ton in the last days, prices being as follows: No. 1 $13.50@14; No. 2 oats, $13@13.50; No. at, $12.50@13; No. 2 wheat, $12@12.50; rye, $13@13.50; No 2 rye, $12.50@13.

BOSTON.

. 6.—Receipts of hay during the past were somewhat heavier as compared he previous week, and on account of ck of demand from buyers during the there is a slight increase in the ac- ation which receivers find it difficult ve. It is a generally dull and un- factory market with buyers looking ices to show a further decline. No. thy hay in large bales is quoted un- ed from last week, $34 per ton being ide quotation for the bulk of the of- s. Small bales are unchanged at $31 No. 2 timothy hay is held steady at 1 for large and $29 for small bales. Eastern is lower at $29@31 and No. tern at $27@28. No. 3 hay also lower 6@27. Clover mixed is quoted at for alsike, and $26@28 for red. Fine

hay ranges at $25@27. Receipts for the week ending December 6th were: Local, 141 cars. Export, 2 cars.

A quiet market for rye straw with choice rye quoted at $15@16 per ton. Oat straw, a shade firmer at $14@15. Receipts for the week ending December 6th were: Local, 3 cars.

DULUTH.

Dec. 6.—Operators in the hay market experienced an active period during the last week. Receipts were on a more liberal scale and there was a place to put everything that came in. No difficulty was experienced in obtaining cars for making hay shipments. Prices were advanced $1 all around as follows:

Timothy, No. 1, $25@26: No. 2, $23@24; mixed timothy, No. 1, $23@24; No. 2, $16@20; prairie, No. 1, $23@24: No. 2, $21@22; No. 3, $16@18; midland, No. 1, $17@18; No. 2, $11@13; straw, rye, $9@10; oat, $9@10.

ST. JOSEPH.

Dec. 6.—All grades of hay were in good demand the past week, especially alfalfa, receipts of which were fair, and selling at top prices. No. 1 timothy hay was selling high, but receipts are very light, owing to shortage of cars. With a good run of receipts, the outlook is encouraging for still higher prices, in view of the fact that practically every car is picked up rapidly, and receipts are not enough to satisfy the demand. Nominal quotations follow:

Prairie, choice, $24@24.50; prairie, No. 1, $23@23.50; prairie, No. 2, $21.50@22; prairie, No. 3, $18@20; midland, No. 1, $17.50@20; midland, No. 2, $15@16; alfalfa, choice, $35@35.50; alfalfa, No. 1, $33.50@34.50; alfalfa, standard, $30@33; alfalfa, No. 2, $26.50@29; alfalfa, No. 3, $22@25.50; timothy, No. 1, $26.50@27; timothy, standard, $25@26; timothy, No. 2, $24@25; timothy, No. 3, $20@23; clover light mixed, No. 1, $26.50@27; clover light mixed No. 2, $22@24.50; clover, No. 1, $26@27.50; clover, No. 2, $22@24; straw, $10@11.

CINCINNATI.

Dec. 9.—The local hay situation presents no material change from last week's review, and the strong tone and highest prices of the crop established last week were fully maintained. A disappointing factor, however, was the light movement, and apparent unwillingness on the part of farmers and shippers to take advantage of the prevailing high quotations and trading as a result was of small volume. Choice hay of any description was in urgent demand and when shipped via Panhandle and properly baled commanded a premium. Timothy, especially was wanted, and low grades sold well and within a narrower range from the best. Timothy and mixed advanced 50c, clover $1.50, and local alfalfa $2 per ton.

No. 1 timothy, $31; standard timothy, $30.50@31; No. 2 timothy, $29.50@30.50; No. 3 timothy, $28@29; threshed timothy, $18@21; light clover mixed, $30.50@31; No. 1 clover mixed, $30@30.50; No. 2 clover mixed, $28@30; No. 1 clover, $35@36.50; No. 2 clover, $30@32; sample, grassy, $24@27; No. 1 western alfalfa, $40@41; No. 1 local alfalfa, $37@38; standard alfalfa, $36@37; No. 2 local alfalfa, $33@35; wheat straw, $10@11; rye straw, $11@12; oat straw, $10@11.

MILWAUKEE.

Dec. 6.—The hay market stands steady and unchanged. Receipts continue moderate as does the demand. Neither are very pressing or large. Current quotations are:

Choice timothy, $28.25@28.50; No. 1, $27.50@28; No. 2, $26@26.50; No. 1 clover, $24@25; light clover mixed, $24@26; red top and timothy mixed, $24@26; marsh feeding, $14@15; packing, $10.50@11.50; rye straw, $12@13; oat straw, $11.50@12.50.

KANSAS CITY.

Dec. 6.—Unusual srength continued in the market for hay in Kansas City this week. Advances were almost general. Prairie rose $1.50 to $4, alfalfa advanced 50c to $1, and timothy and clover mixed were up 50c to $1.50 per ton. Receipts show a slight falling off amounting to 832 cars, compared with 1,136 last week and 574 a year ago. Car shortage is tightening in the West, particularly in Colorado, from which state a heavy movement of alfalfa has recently been witnessed. Buying of alfalfa continued of unprecedented volume, moving in practically all directions. Even Texas was a buyer of alfalfa. Tame hay is moving largely to the South and Southeast and in local territory. Offerings of prairie were insufficient to meet requirements of local buyers, feeders and stockyards interests. The sharpest gains occurred on the cheaper grades. Choice prairie brought up to $24.50 a ton. Straw advanced 50c, with sales up to $11.

Prairie—Choice, $24@24.50; No. 1, $23@23.50; No. 2, $21.50@22.50; No. 3, $17.50@21; packing hay, $10@12.

Midland prairie—No. 1, $17@20; No. 2, $14.50@16.50.

Alfalfa—Choice, $35.50@36; No. 1, $33.50@35; standard, $30@33; No. 2, $26@29.50; No. 3, $21@25.

Timothy—No. 1, $26.50@27; standard, $25.50@26; No. 2, $22.50@25; No. 3, $20@23.

Clover mixed—Light, $26.50@27; No. 1, $25.50@26; No. 2, $20@24.50.

Clover—No. 1, $24@26.50; No. 2, $16@23.50.

Straw, $10.50@11.

ST. PAUL-MINNEAPOLIS.

No. 3 alfalfa	23.00	.....

MONTREAL.

Dec. 5.—The local market is firm under comparatively light receipts, sales of carlots of No. 2 being reported at $24@25, but the latter figure is said to be for carlots from the north shore, equal to No. 1 grade. Very little of this class of hay, however, is found in last season's crop, except in certain districts above mentioned. Large supplies of hay from the 1919 crop are still in farmers' hands, the latter being in no great hurry to market it. At this time last year a large percentage of the 1918 crop has been marketed at very little higher prices than those at present ruling.

The receipts of baled hay last week were 3,936 bales, against 7,267 bales for the same week last year.

There is no particular change in the hay market, the receipts keeping light for the season, and the majority of sales of No. 2 are reported at $24, although an occasional car, which the buyer imagines is a little better than the average No. 2 grade, brings $25. No. 3 is quoted at $22@23, and clover $21@22 per ton in carlots. We quote: No. 2 timothy, $24@25; No. 3 timothy, $22@23; clover, $21@22.—Trade Bulletin.

NEW YORK.

Dec. 5.—The New York Hay Exchange reports the hay situation as follows:

	Hay tons	Straw tons
Receipts for week (7 days)	5,494	410
Receipts last week (5 days)	3,670	190
Receipts Sept. 1 to date	59,315	4,640
Receipts same time last year	80,585	4,640

Receipts of hay have increased at all harbor points, trade quiet and market has eased off at least $1 a ton on most grades and market closes barely steady at quotations. The removal of the N. Y. Central embargo enabled shippers to load a fair amount of hay, but with the placing of the embargo again—probably due to coal conservation rather than an accumulation of shipments—and the end of boat traffic on the Hudson river our market may strengthen again, dependent very largely on the railroad situation. Quotations:

	Large bales per ton	Small bales per ton
No. 1 hay	$ @35.00	$33.00@34.00
No. 2 hay	31.00@33.00	31.00@32.00
No. 3 hay	29.00@31.00	28.00@30.00
Shipping hay	27.00@29.00	25.00@28.00
Fancy light clover mixed hay	32.00@33.00	31.00@32.00
No. 1 clover mixed	30.00@31.00	28.00@30.00
No. 2 clover mixed	27.00@29.00	25.00@27.00

Straw—No 1 rye, $14@15; No. 2, $13; No. 1 oat, $15; No. 1 wheat, $12.

Effective Dec. 1, the Lehigh Valley placed an embargo on Pier 66, N. Y. Effective Dec. 3, the N. Y. C. placed an embargo on 33rd St., 36th St., 60th St., 130th St., Melrose Junction, Claremont Park, Port Morris and Inwood stations.

INDIANAPOLIS.

Dec. 6.—Firm. No. 1 timothy, $29.50@30; No. 2 timothy, $28.50@29; No. 1 light mixed, $28.50@29; No. 1 mixed, $28@28.50.

SEATTLE.

Dec. 1.—Eastern Washington timothy mixed, $36@37; double compressed, $40; alfalfa, $32; straw, $16@17; Puget Sound, $31.

SPOKANE.

Dec. 1.—Alfalfa, $30 ton, $28 carload; timothy, $40 a ton; $38 carload.

BALTIMORE.

Dec. 6.—The market is firm on the more desirable grades of timothy, mixed and No. 1 clover hay, of which sorts the daily receipts are runing light, while demand is fairly good for the top grades. Ordinary, low grade and damaged hay is in ample supply and when a buyer for such can be found, he invariably names his own terms.

Straw is selling rather sparingly, the business in this commodity being principally of a jobbing character. Prices unchanged. We quote: No. 1 timothy, nominal, $32.50; standard timothy, $31@31.50; No. 2 timothy, $30.50@31; No. 3 timothy, $27.50@29.50; No. 1 light clover mixed, $29.50@30.50 No. 2 light clover mixed, $27@28; No. 1 clover mixed, $28@28.50; No. 2 clover mixed, $25@27; No. 1 clover, nominal, $31; No. 2 clover, nominal, $29; sample hay, $18@23; No. 1 straight rye, $17@18; No. 1 tangled, $14@14.50; No. 1 wheat, $12@13; No. 1 oat, $14@15.

THE PLUGGING TRACK MARKET IS THE PLACE FOR YOUR HAY
Why, because we pay no attention whatever to grade. All hay being sold on its merits at our straight price for the entire car.
THE FITZGERALD BROS. CO., CINCINNATI, OHIO

LOUISVILLE, KY.

Dec. 6.—Demand for hay is fair to good, with receipts light and stocks light. Dealers are of the opinion that prices are running high, and are not willing to stock much hay on the present market.

Quotations are baled, carlots, No. 1 timothy, $31.50 a ton; No. 2, $30; No. 1 clover, $32; No. 2, $29; No. 1 mixed, $31; No. 2, $29; wheat and oat straw, $12; rye straw, $13.

PHILADELPHIA.

Dec. 6.—The market for hay is firm under light offerings of desirable qualities which are in good request. Straw is also firm with supplies well cleaned up.

Timothy hay—Choice, $34; No. 1, $33; No. 2, $30@31; No. 3, $27@28. Clover mixed hay—Light mixed, $30@31: No. 1 mixed, $27@28. Straw—No. 1 straight rye, $15@15.50; No. 2, $14@14.50; No. 1 tangled rye, $14; No. 2, $12.50@13; No. 1 wheat straw, $14@14.50; No. 2, $12.50@13; No. 1 oat straw, $14.50@15; No. 2, $12.50@13

NEW ORLEANS.

Dec. 6.—No. 1 timothy hay offered at $34@35; No. 2 from $32@33, and No. 3 at $31.

NASHVILLE.

Dec. 8.—Hay was in moderate demand last week. Prices: No. 1 timothy, $34; No. 2 timothy, $32; No. 1 clover, $32; No. 2 clover, $30; alfalfa, $38@40.

ST. LOUIS.

Dec. 6—The receipts of hay have been light for the past week, with offerings barely sufficient to supply the local requirements, while shippers also were in the market. Prices are firm, but generally unchanged, as follows: Timothy, No. 1, $31@33; standard, $29@31; No. 2, $26@28; No. 3, $24@25; threshed, $20@23; clover mixed, light, No. 1, $30@33; No. 2, $27@29; heavy clover mixed, No. 1, $31@33; No. 2, $29@31; clover hay, No. 1, $37@39; No. 2, $35@37; alfalfa, choice, $40@41; No. 1, $38@39; standard, $36@37; No. 2, $33@35; prairie hay, choice, $26@27; No. 1, $24@25; standard, $23@24; No. 2, $21@22; straw, $10 per ton, on track.

CHICAGO.

Dec. 8.—The following is a statement of the receipts and shipments of hay in tons in the Chicago market for the week ending Dec. 6, also the total receipts and shipments of hay from Jan. 1, 1919:

	Dec.6, 1919.	Nov. 29, 1919.	Dec. 7, 1918.
Total receipts	5,622	4,634	4,715
Total shipments ...	315	211	470
Rcpts. since Jan. 1..	223,249	217,627	298,356
Shpts. since Jan. 1..	5,937	41,010	83,316

The hay market continues strong in spite of the larger receipts for the week. The fact is that no matter what volume now comes in it is quickly absorbed and is not sufficient to supply the wants of the trade. Indeed, receipts have been running too light for the city's consumption for the past 30 days, with the result that feed stores and consumers alike are living from "hand to mouth" with no surplus stock accumulating. A condition like this gives an active and reliable market and the trade have no hesitancy in advising shipments of all grades of hay and straw. Advices say that country loading continues normal, so there is no likelihood of any mmediate marked increase in receipts. However, these are almost war values, and any one having hay or straw should ship it now if they can possibly do so. Quote Monday as follows:

Timothy—Standard, $30@31; No. 1, $31@33; No. 2, $29@30; No. 3, $26@28; sample, $24@27; thresh, $18@24.

Clover—No. 1 light clover mixed, $30@32; No. 1 clover mixed, $28@30; clover, $28@32.

Alfalfa—$30@39.

Prairie—Kans., Okla., Neb., Mo., $25@30; No. 1, $27@29; No. 2, $25@27; No. 3, $20@22; Ill., Ind., Wis. and N. W., $16@25; feeding, $18@21; packing, $12@15.

Straw—Rye, $14@15; oat, $13@14; wheat, $12@13.

TOLEDO.

Dec. 5.—Conditions in the hay market are unchanged from last week. Receipts continue light; prices steady. Car situation is tight and dealers see higher markets in the future unless conditions change materially. No. 1 timothy, $28; No. 2, $26.50; No. 1 light, mixed, $28; No. 1 clover, $30 per ton, carlots, f. o. b. Toledo.

SAN FRANCISCO.

Dec. 5.—Receipts of hay have increased recently both by water and on Government account by rail. Practically no cars, however, are being given for other than Government shipments. This causes untold trouble, as country trade is brisk and orders placed for shipment into the interior are impossible.

The continued dry weather, with the heavy cold north winds, have started many to feeding their stock as well as causing holders of hay to refuse to sell their holdings until such time as they are sure of rains. Naturally this causes a decided firmness in the hay market and with few exceptions the quotations on hay are higher. This does not do many holders much good as they cannot make shipments owing to the scarcity of cars.

Fancy wheat and red oat hay and alfalfa are in demand and have sold during the week at top quotations. Alfalfa, especially that from the river districts, is in demand for rabbit feed, now an appreciable consumption. Quote: Fancy wheat hay (light 5-wire bales), $24@26; No. 1 wheat or wheat and oat hay, $21@25; No. 2, $20@22; choice tame oat hay, $23@26; other, $20@23; wild oat hay, $19@22; barley hay, $19@23; alfalfa hay, $21@26; stock hay, $16@19; No. 1 barley straw, 50@80c per bale.

CASH PRICES FOR GRAIN.

Following is a statement of the we ekly range in cash prices for grain as mentioned in the leading markets of th e country for the week ending Dec. 6:

	CHICAGO.	ST. LOUIS.	KAN. CITY.	OMAHA.	MILWAUKEE.	PEORIA.

Sh. clears	3,287,445	4,939,565	437,594
Ex. clears	854,622	1,373,320	4,251,385
Ex. ribs	209,489	178,177	175,162
Fat backs	5,250,134	4,218,714	9,729,185
Shoulders	2,589,096	2,235,159	2,009,707
Bellies	19,849,358	25,143,255	10,655,414
Other cuts	29,859,219	22,530,085	32,230,051
Total lbs.	62,228,399	63,044,099	60,980,919
Pickled—			
Hams	23,064,409	21,664,371	22,845,291
Sk. hams	11,680,703	12,244,945	9,898,497
Picnics	3,811,465	4,956,914	3,892,449
Shoulders	170,547	329,548	172,555
Bellies	4,539,267	6,080,483	4,121,348
Total lbs.	43,266,391	45,275,261	40,930,140
Total cuts	105,494,791	108,319,360	101,911,059

	Dec. 1, 1917.	Dec. 1, 1916.	Dec. 1, 1914.
Mess pork	19,758	2,663	30,496
All lard	20,702,309	30,990,194	6,308,500
Short ribs	2,235,645	12,572,874	2,909,675
D. S. meats	38,527,048	44,986,879	22,796,068
Total cuts	68,524,889	93,518,964	58,851,207

Changes during the month of November:

	1919.	1918.	1917.
Pork	+ 4,300	— 7,253	— 6,779
Lard	—7,624,642	+11,312,651	+ 690,638
Short ribs	—2,096,788	— 4,296,740	+1,160,233
D. S. meats	— 815,700	+ 3,076,324	+6,618,961
Total	—2,824,569	+ 4,677,185	+6,162,297

Changes in contract provisions for last half of November:

	1919.	1918.	1917.
Mess pork	— 277	— 569	— 1,081
P. S. lard	+ 601,186	+ 674,620	+2,596,968
Short ribs	— 552,738	—1,270,782	+1,541,167
Extra clears	— 172,376	— 199,546	+2,008,832

Lard decrease is in the refined, which might indicate in the present light stocks of this kind with decreased refining, lack of immediate shipping requirements; also that lard has been moving especially for export following the longshoremen's strike.

COMBINED STOCKS STATEMENT.

In making this statement, except in the report on mess pork, the final three figures are omitted:

	Dec. 1, 1919.	Nov. 1, 1919.	Dec. 1, 1918.

TRADE MENTION

. E. Lindquist, a gentleman who has considerable newspaper experience, been appointed western editor of erial released by the Soil Improvet Committee.

'mong exhibitors at the Nebraska mers' Convention at Omaha were h Globe Machinery & Supply Co. of Moines; the Cuthbert Co., Minnepis; Trapp Gohr Donovan Co., ha; and Calumet Steel Posts.

he Weller Mfg. Co., Chicago, is sendout to its friends and customers were former recipients of their ndar pad and stand, a new calendar for 1920. This is very useful, and easant reminder of this progressive . It will keep the many friends customers daily reminded of the ty of the Weller Mfg. Co. to serve.

C. Hudson, advertising manager of Denver Alfalfa Milling & Products Lamar, Colo., recently accepted the ion of copy chief for the Conner rtising Agency of Denver, Colo. continues, however, to handle the rtising for the Denver Alfalfa Mill, e items frequently appear in our fa and feed columns; and we may et the same peppy line of news and crop advice from this source.

M. Davis is president of the Mono-Builders, Inc., contractors and enrs, Chicago, Ill. He has had broad rience as well as excellent training is equipped with full knowledge e requirements of elevators and , in which lines of work the firm specialize. They have just come a 40,000-bu. concrete elevator of ins, absolutely up-to-date in every cular for the Farmers' Coöperative f Defiance, Ohio. Associated with Davis are several experienced conors, including C. W. Beyers of Point, Ind.; Capt. Perry Dickles, nville, Ill.; Edison Kipp of the Construction Co., Chicago.

The Gutta Percha Rubber and Mfg. Co., 301 West Randolph Street, Chicago, reports a fine demand for their brands of rubber belting so widely used in our field, "Mohawk" and "Special Elevator." They urge, as manufacturers naturally desirous of serving old friends and making new customers, that belting orders be placed early, for their factories are still somewhat behind on deliveries. They are, however, giving special attention to rush orders on breakdowns, where the elevator must have immediate delivery; but it is only good judgment to go over your belting carefully, examining weak spots and order new belting before the breakdown actually occurs.

The report of the 26th annual convention of the National Hay Ass'n is now off the press, delay having been experienced due to labor conditions, both linotype operators and pressmen having contributed their share towards the labor turmoil. The book comprises 360 pages, and in addition to a most complete report of the convention proceedings the volume contains information that makes its possession of value to all engaged in the hay business. The Constitution and By-laws, Trade and Trade Rules are listed, names of the members are given and illustrations and data regarding the newer types of forage grasses, together with statistical tables, all contributing to make the work of the Association's officers worth while in every sense of the word.

Apco Feeds.

The Alfalfa Products Co., Sioux City, Ia., is the manufacturer of stock feeds that boast of no fillers in their composition. The company moreover produces a long list of feeds suitable to the varying needs of all feeders, there being a horse feed, cattle fattener, dairy feed, swine fattener, poultry feed, etc. All the feeds contain alfalfa as a base, and this is scientifically blended with such ingredients as corn, barley, tankage, gluten feed, molasses, etc. The APCO feeds were developed after several years of experiments, and it now is claimed that just the requisite amount each of protein, carbohydrates, fiber and fat is contained in each feed to promote the rapid and healthy growth of livestock.

Stocks of all kinds eat this feed with a relish; there is no waste as when feeding whole grain—each ounce is eaten; and feeders will be wise to acquaint themselves with these feeds which are perfectly balanced in every way. A general purpose feed, the APCO Nu-Meel, a straight alfalfa feed, is a good choice for feeders who use the grains also and stock make splendid gains when so fed.

Journal of Political Economy.

Among the articles in *The Journal of Political Economy* for November are "Intensive Industrial Training Under Government Auspices in War Time," by A. B. Wolfe; "Accounting as an Administration Aid," by J. O. McKensey; "Will Prices Fall," by H. G. Moulton; and the usual notes and reviews. Published by University of Chicago Press.

THE FLY INFESTATION.

Goodman's December report includes the following on the fly infestation of western wheat, the most detailed report that has as yet appeared and supports THE PRICE CURRENT-GRAIN REPORTER'S previous statement: "For the first time in several years the reports of Hessian fly in the fields over a wide area is reported. The infested section covers lower Michigan, western and northern Ohio, most all of Indiana and Illinois, and a small part of Missouri, and extending south into Kentucky and Tennessee. The area from which the fly is reported has about 9,000,000 acres of wheat under cultivation. In some sections the insects are said to have destroyed a great deal of the acreage. The damage by this enemy of the wheat is always the largest in the spring period when the brood, being greatly multiplied, covers the affected region. There is no method of destroying the larva cases in which the insect hibernates, and the only check upon the ravages of the spring brood is the prevalence of heavy rains about the time of emergence of the flies."

CORN OUTLOOK.

There was last week practically no change in the supply and demand condition of corn; receipts very light, and even though the industries are closed there was not enough to go around, so that cash prices continued at good premiums over the December. The future market scored a good advance. Country advices state that the farmers are delivering corn more freely, especially in Iowa, and elevators are getting full of corn, but the transportation situation is worse than ever, with no prospect of any relief. We can see no hopes of a heavy movement before January.—*W. H. Perrin & Co., Chicago.*

The annual meeting of the Corn Belt Meat Producers' Ass'n will be held at Des Moines, on Dec. 11 and 12. A. Sykes of Ida Grove is president and Henry C. Wallace of Des Moines secretary of the Association. Among the speakers on the program is H. C. Wallace of *Wallace's Farmer*, who will talk about prices of live stock. Mr. Wallace has made a special study of the price question and will give a valuable talk.

Provisions, Etc.

CHICAGO PROVISION REVIEW.

CHICAGO, Dec. 8.—Lard prices declined and closed with losses of 40 to 62½c, the latter on January, while short ribs advanced and finished with net gains of 35 to 70c, the May leading. Pork, although traded in sparingly, gained 80c on January and $1.35 on May, as compared with the finish of the previous week.

Conditions in the provision trade were adverse to wide fluctuations. Supplies of hogs were large and prices irregular. The coal strike has caused many of the small western packers to shut down and reduce active operations in some parts of the big packing institutions. There was fair speculative trading at times and a great deal of pressure on lard from eastern holders and considerable from packers. Eastern speculators have been reselling lard bought at high prices for some time past and have taken losses of 2c or more within a week. The demand from abroad has been disappointing and with the coal strike on and difficulty in holding steamers at the seaboard there has been restricted exports.

A little business has been done in refined lard for export, but lots were mostly small sized. Loose lard was sold to a moderate extent at 60 to 75c under December. There were deliveries of 200,000 lbs. of lard on December trade during the week. Leaf lard which recently was up to 29c, sold Saturday at 23c.

Under existing conditions there is little in the situation to induce large speculative buying and at the same time the selling side while attractive to some of the old-timers is not being advocated to any extent on the part of the trade in general. The make of lard is liberal yet stocks last month decreased 9,138,639 lbs., while last year they decreased 11,741,921 lbs. The total at western packing centers was 28,398,659 lbs., or 27,287,000 lbs. less than last year's.

A fair business was on in short ribs from a speculative standpoint, with the offerings not large, although at one time Cross, Roy and Saunders sold 1,000,000 lbs. January, while the buying was scattered. There was enough support most of the time to absorb the offerings and advance prices. A feature of the trading in both lard and ribs was the increased strength in May deliveries, while the January weakened as compared with it. This was due in a measure to the selling of January buying of May by speculators and others who want to get away from the cash product. With the coal supply shut off to the packing houses, so that they were unable to operate at full capacity the prospects for a large make of short ribs for January delivery are less favorable, which had a strengthening effect on values by reducing the selling pressure.

Shipping demand for dry salted meats in general was fair for the season as also was the fresh meat trade. Stocks of dry salted meats at western packing points the first of December were 117,118,253 lbs., a decrease of 17,917,000 lbs. last month, compared with an increase of 15,329,699 lbs. last year. The total was 117,118,253 lbs., compared with 156,765,949 lbs. last year and 89,725,246 lbs. two years ago. Pickled meats decreased over 8,000,000 lbs. for the month and were 99,046,452 lbs., or 504,000 lbs. less than last year. Total supplies of meats decreased 26,770,123 lbs. for the month, compared with an increase of 14,539,033 lbs. last year and large increases in the two preceding years, in the face of liberal receipts of hogs. Total stocks of all meats were 216,164,705 lbs., compared with 256,316,496 lbs. last year. There was a fair export inquiry for meats, but low rates for foreign exchange prevented business. Prospects are for a good run of hogs, although the decline in prices may check the marketing from time to time.

Kansas City Provision Review.

KANSAS CITY, Dec. 6.—Erratic action of the hog market was a restricting factor in the trade in provisions in Kansas City this week. Prices followed a course somewhat similar to that of hogs, rising early and closing the week with slight losses, amounting to as much as ½c. Provision interests described demand as fair to good. The East was a moderate buyer of fresh pork, and there was a moderate local business. The unsettled industrial situation limited trade in the East to an extent, and some difficulty was reported among local packing plants because of the coal shortage. The strike of switchmen in Kansas City, which threatened to force a tieup of traffic, was quickly settled. Loins were off about ¼c to ½c, with the cheaper grades generally down ½c. Dry salt and heavy smoked meats moved in liberal volume to the South, closing about ¼c off. Fractional losses were recorded in fancy hams and bacon, with demand fair. Lard and substitutes showed little change.

Stocks of provisions in Kansas City at the opening of December amounted to 36,301,700 lbs., compared with 44,494,700 lbs. a month ago and 52,038,300 a year ago.

Weekly Average Prices at Chicago.

Weekly average prices at Chicago for good native beef cattle, fat sheep and aged lambs, as compiled by the *Chicago Drovers' Journal:*

	Cattle.	Hogs.	Sheep.	Lambs.
This week	$15.10	$14.00	$ 9.40	$15.75

Live Stock Markets

CHICAGO LIVE STOCK.

CHICAGO, Dec. 8.—Hog prices were the down grade part of the week, v the top prices on Saturday $13.55, a of $1.05 from Monday and 40c be the previous Saturday. The aver Saturday was $13.30, a loss of 40c the week and $1 from Monday. An vance early in the week in the fac large receipts was about all lost the average for the week was against $13.30 the previous week, $1 last year and $17.40 two years Shippers were good buyers and v mainly responsible for the adva early in the week.

Prices had a comparatively nar range between the high and the each day. The coal strike was an portant factor in regulating the o ations of local and nearby pack while eastern packers were said t better supplied. The largest run o ceipts since March 1, 239,847, wa depressing factor, although they pared with 308,582 last year. H packing grades were 20 to 50c l and showed most of the decline, w selected butchers' hogs lost 35 to and mixed and medium butchers sho the smallest loss of all.

Average weight of hogs for the v was 221 lbs., against 222 lbs. the vious week, and 223 lbs. last y Packers bought 217,300 hogs for week, against 186,200 the previous v and 268,600 last year. Armour 38,200; Swift, 46,100; Wilson, 22 and Morris, 22,000. The twenty kets had 883,800 hogs for the w against 985,600 the previous week 1,166,000 last year. For the yea date they have received 33,126,700 h

As the International Live Stock S was on last week there was unusua terest in cattle and sheep. Cattle ceipts were nearly up to the high ord mark, arrivals here being 108 compared with 195,109 last year. seven markets had 332,000, or 2 more than the previous week and less than last year, while the ru twenty markets was 430,000, comp with 420,900 the previous week and 700 last year. Despite the big yearlings sold at a new high l $20.75. Prices on a majority of c were lowered with the quality on whole somewhat poorer, the best gr maintaining a better level than poorer, medium grades being off 5 75c, while others were $1 to $1.50 lo Average price of beef steers for week was $15.10, or 20c higher than previous week and 50c under last y Butchers' stock lost 50 to 75c with ners and cutters 25c lower, selling l ly at $5.50 to $6 with the average $ or 15c lower than the previous w the entire range being $5 to $ Butchers' stock averaged $8.20, or lower for the week with the range to $16, the latter for choice hei Western range cattle were 25 to lower, with receipts 22,500, or 500 than the previous week and 8,50 excess of last year. The range $7.50 to $15.00.

Stockers and feeders were 50c t lower at the extreme with the t lighter and supplies liberal. Not were bought above $12 and $12.25, the average $9, compared with $9.90 previous week and $12.80, the hig weekly average on record.

An advance of 75c to $1 was n in lambs with a reaction later, and close 25 to 30c lower. The range the week was $15.75, or $1.10 hi than the previous week, compared $14.90 last year. Sheep averaged $ against $8.80 the previous week. $9.30 last year. Top prices on s were $10.35 and range $8.50 to $1 while lambs ranged at $15.25 to $1 The twenty markets had 155,800, aga 93,800 the previous week and 15 last year. Chicago had 112,400, aga 126,300 last year.

Estimated receipts at Chicago this week are: cattle, 100,000; hogs, 230,000; sheep, 105,000. Arrivals last year were: cattle, 108,703; hogs, 229,076; sheep, 258.

Kansas City Livestock Market.

Sanders Sosland, Correspondent.

Kansas City, Dec. 6.—Weakness prevailed this week in the trade in cattle and calves, while lambs advanced. The action of cattle indicated that this stock is in the weakest position, although the pressure of hogs which packers exerted at every opportunity did not seem encouraging to the maintenance of prices on porkers. The cattle and sheep market reached the highest point of the season, with profitable results to feeders.

The slide in hogs was about as erratic as expressed in recent months. Early advances sent the market to a top of $15. This was followed a slump to a top of $13.85 on Monday, the final prices being fully 50c lower than the week. The daily average and top prices here continued above the Chicago market, owing to the shortage in local supplies. This shortage is expected to continue through the winter. The average weight of droves for the week is figured at 240 lbs. Pigs were weak, closing at $11@13. Feeder pigs cannot be shipped as consistently as in the periods of milder weather, hence the lower range of quotations as compared with finished hogs. Receipts decreased, owing in part to unfavorable weather. The arrivals were about half the total of a year ago, when the market was experiencing enormous liquidation due to nervousness following the armistice. The 48-hour strike of local switchmen a week ago also checked the movement of hogs as well as of cattle and sheep.

In the cattle market prices receded 25c to $1.25. Steers lost 75c to $1.25. Very large supplies of fed cattle at Chicago had a weakening influence here. Unfavorable shipping conditions removed much competition from stocker and feeder buyers and naturally had a bearish effect. The bulk of steers was $18, but the bulk of sales ranged between $9 and $14. Cows sold up to $11 and down to $5. Veal calves made a liberal showing, selling up to $16.50. Plain-killed continued to mark the quality of the offerings, and little improvement is expected in the near future as there are still liberal receipts of "clean-up" shipments to come from the Southwest.

Lambs sold up of $16.50, the highest since August, and paid for fed lambs. Ewes sold up to $13.50, but 25@50c higher. At one time the market was $1.50 higher, the strength was lost, however, giving way to a reaction. Feeding prices on lambs were quoted at $15@16 for fed offerings, while feeders sold at between $9.50@13. Goats sold at $4@5.50. The supplies of feed in Kansas City's immediate territory are light.

St. Louis National Stock Yards.

H. L. Wyatt, Correspondent.

National Stock Yards, Dec. 6, 1919.—On account of liberal runs of the plainer offerings our cattle market this week has practically lost all of the advance of the week before. Unfavorable reports from Eastern markets contributed also to the decline in prices. Notwithstanding this condition, however, strictly choice or prime cattle are in demand and wherever they are offered they bring the price. We had some choice yearling steers here this week which sold at $19.25. This was the highest price paid for beef stock this year. Christmas buying will begin to show very shortly and many will then look for a higher range of prices on the best kinds.

There will no doubt be a record week in point of hog house for receipts. If the estimate today is correct, or even approximately so, the receipts for the week will be over 108,000, which is the biggest week in the hog house in the history of the market. The fair quality generally has been the rule. During the middle of the week the market advanced, but at the end the advance was lost and we are closing the week 25@35c lower than the close of last week. The closing quotations are: Mixed butchers, $13.35@13.80; good heavys, $13.80; rough. $11.50@12.50; light, $13.60; pigs, $11.50@12.50; bulk, $13.35@13.80.

The sheep and lamb market has been a very active affair all week. It softened somewhat at the end of the week but closes 50c higher than the close of last week. Our sheep receipts continue to show a healthy increase. In comparing our receipts this week with the corresponding week of last year we find that they have more than doubled and what is more satisfactory this increase has all come from our immediate marby territory.

Oklahoma Live Stock Market.

Arnsheida Haehnke, Correspondent.

Oklahoma City, Dec. 6.—Cattle receipts this week have not been any too heavy and the demand was greater than the offerings. Packers are still drawing supplies from other markets to keep their killing gangs running full time. Steers will average 25c higher for the week and the same is applied to canners and cutters. Several loads of well finished 1000-lb. steers on Monday's order, sold at $15.50 and several loads of short-fed meal and hull cattle sold around $10.25 and $11.50. Practically no steers are going to packers this week at less than $10.50. The latter part of the week the steer sale was a toss-up between feeder buyers and packers, with the former taking most of the light supply, and at that time outside demand was good, some steer sales to finishers were above $9.00.

The market was strong on she-stuff. There was quite a shipment from New Mexico which consisted of well-fleshed cows and it was no trouble to get $8 for them. During the week fair to good cows sold from $8 to $8.50. Good grades as high as $9. Very few canners are selling under $5.50, the majority selling from $5.50 to $6. There has been a strong demand on all grades and they are anywhere from 25 to 50c higher. The calf market has been active with values generally steady on all common to fair grades, but around 50c lower for best vealers, top being $14. The week did not close very good on the stocker market. The quality was not as good as was wanted. Dealers were glad to get right kinds of yearlings at $8@8.50 and feeders $9.50 up. Even small packages were scarce along this line and everything possible for country use brought steady prices.

Hogs are fully $1.00 higher than they were last week at the same time. Quality of pretty good average brought $14.50 which was the top for the week. Receipts in hogs are not up to expectations of the hog buyers and we are looking for more to come along soon. Stockers are too scarce to be entitled to much mention.

Omaha Live Stock Market.

Bruce McCullough, Correspondent.

South Omaha, Dec. 6.—Notwithstanding exceptionally rough weather this week receipts of cattle were of fairly liberal proportions, 51,000 head, substantially the same as the week previous and about 2,500 more than for the first week in December a year ago. Early in the week the market was active and prices sharply higher for both beef steers and butcher stock. During the later half of the week, the transportation facilities cut short and packing operations restricted on account of the shortage of coal the general market broke sharply around 25@50c a day until closing quotations were anywhere from 50c to $1 lower than they were a week or ten days ago.

Not so many good grass beeves are coming in and consequently packers have been taking hold of the corn feds in rather better shape until the coal shortage reduced the demand. It takes choice to prime beeves to bring better than $15 and most of the fair to good corn feds sell around $12@14, the common to fair warmed up and short fed grades going from $9.50@11.50 and on down. Good to choice cows and heifers sell at $9@11, fair to good grades $7@8.50 and common to fair kinds at $4.75@6.25. Veal calves at $9.25@14.25 and bulls, stags, etc., at $5@9 show little change although they are somewhat lower than a week ago.

Business in stockers and feeders weakened off partly in sympathy with the slump in fat cattle and partly on account of the bad weather and heavy snow throughout the corn belt. Good fleshy feeders are selling at $9@11 with fair kinds at $7.50@9 and a lot of common light stuff at $5.50@6.75 or the lowest of the season.

The nervousness in the hog market is reflected in the sharp fluctuations in prices from day to day and closing quotations for the week are around half dollar lower than a week ago. Receipts have been very moderate, about 45,000 for the week, and quality of the offerings very good as a rule. The average weight for November was 271 lbs., or nearly 30 lbs. heavier than a year ago. Eastern shippers are operating on a rather limited scale and local packers continue their bearish attitude owing to the uncertain outlet for the product. With about 4,200 hogs here Saturday the market was anywhere from 15@50c lower and a very erratic affair throughout. Tops brought $13.50 against $14 last Saturday and bulk of the trading was at $12.75@13.25 as against $13.50@13.75 a week ago.

Receipts of sheep and lambs for the week were rather liberal, 76,500 head, but demand was broad early in the week and trade active with prices ranging from 50@75c higher. Rough weather, poor transportation facilities and the shortage in coal combined to demoralize the trade later in the week and at the close practically all of the early week's advance was lost and closing quotations in practically the same notches as a week ago. Fat lambs are quoted at $14.25@15 25, yearlings $11.50@13, wethers $10.50@11.50 and ewes $7.50@9.

Denver Cattle Market.

Denver, Dec. 5.—The receipts due to storms and the holiday are lighter this week than for several weeks. The general market is improved, however. All classes of steers were up 25c as against a week ago; cows, 25c to 50c higher; bulls, 25c higher; fat heifers show some advance and cows, stock heifers about steady. Demand slack. Choice veals $1.00 per cwt. higher. Prospects better.

It is said that not more than 10,000 sheep will be fed this year in the San Luis Valley of Colorado, a very small number by comparison with past seasons. It appears, however, that hog feeding in the valley shows a heavy increase and is becoming one of the leading interests in the valley. The pea crop, the great staple fattening ration, was very heavy and there is no scarcity of feed for fattening hogs.

Movement of Sheep.

Weekly receipts and shipments of sheep at western centers the week of Dec. 6, and totals as compiled by THE PRICE CURRENT-GRAIN REPORTER:

SEBASTIAN ZORN DIES.

LOUISVILLE, KY., Dec. 15.—[Special Telegram.]—Sebastian Zorn, 66 years of age and president of the S. Zorn Co., large grain dealers of Louisville, Ky., died of heart disease at 12:40 o'clock this morning at his home, 247 S. 4th St., following five years of trouble with his heart. The ailment became very acute on 8:30 Sunday evening.

Mr. Zorn was born in Louisville on June 4, 1853, and was educated in the public schools. He entered the milling house of Geo. W. Smith & Son and became a member of the firm when it it was organized as Ferguson, Smith & Co. He organized the firm of S. Zorn & Co. in 1879.

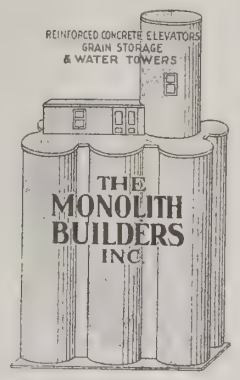
Mr. Zorn served four years as president of the Louisville Water Co., starting 1918. He was responsible for taking over a badly appointed water works and developing it into one of the best in the country. In 1912, as chairman of the Fire Insurance Committee of the Louisville Board of Trade, he was instrumental in the revision and reorganization of the State Fire Insurance Department and regulation of rates.

Mr. Zorn was a public benefactor in many ways, and entered politics only for the purpose of improving municipal conditions.

He is survived by a son, Garnett, and a daughter, Mrs. John J. Moren.

Receipts of hogs at Kansas City during November fell off sharply compared with same month of 1918, the total being 231,470, compared with 355,622 in 1918, a decrease of 124,152. Prices at times were therefore higher than at Chicago.

A new yard record for hog receipts was made at Indianapolis during the week ending Dec. 6 with a total of 105,272 head. Of this number, 45,063 came into the yards in trucks, one day's receipts of truck hogs being 10,237 head.



Grain Storage for
ELEVATORS — MILLS
is being erected better although cheaper with our
All-Steel Building Forms
for circular concrete construction.

Contractors — Engineers

6912 Wayne Avenue - Chicago, Ill.

As specialists in designing and building grain storage, we offer PRACTICAL ADVICE FOR PRACTICAL OWNERS who want work done right.

PRICES AND BUSINESS.

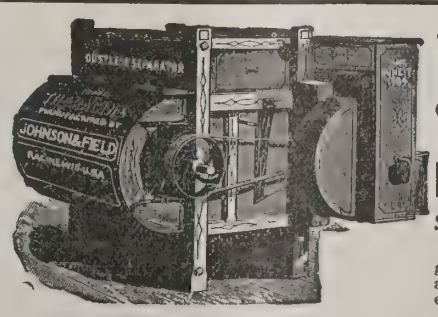
Corn prices were well sustained last week with the undertone strong, and general conditions, despite the higher level, in favor of holders. Short sellers, who are basing their position on the large crop, the price and the anticipation of a voluminous movement to terminal markets, have been unable to depress values permanently.

The present situation is one of much uncertainty; a condition that keeps the market in a nervous state, and which is responsible for the vacillating tendency. Prognostications as to the future course of values are practically valueless in view of the complexity of the present situation. Comparisons with previous years are odious; continually new factors arise that may overthrow a fixed opinion. The coal strike is proving this in a very forceful manner. Until we have overcome the effects of the war; until the world has recovered from the shock of the war and the progress of business is restored to its regular channels, markets will remain subject to the changed order of things. That the outlook for a rapid reconstruction of present conditions is not very propitious, is beyond question. Before material downward reconstruction of values is possible, labor difficulties must be eliminated and the cause for current high prices—lessened production—removed. Grain prices have risen as everything else has, but speculation has prevented an enhancement that might be considered commensurate with the rise of other food commodities.—*Simons, Day & Co., Chicago.*

CORN AT CHICAGO ON MONDAY.

The market fluctuated in a nervous manner all day, lacking definite trend until just before the close when the strength in other grains helped bring about an upturn of 1½c from the low point. Receipts were fairly liberal and cash market started at a decline of 1 to 1½c, but met a good demand and at the close the early loss had been regained. Some selling took place on the Supreme Court decision upholding wartime prohibition, but the effect was purely sentimental. Advices from the country indicate willingness to sell and movement limited only by the number of cars available.—*Logan & Bryan.*

It is claimed for Chas. Fries of Waukee, Ia., that he is the world's champion corn husker, his record being from 140 @160 bus. per short day. On Nov. 5 he was credited with 261 bus. and 10 lbs. in nine hours and 58 minutes, and the corn was gathered on rather thin ground.



Greeting Cards

WILL PROMOTE YOUR BUSINESS AND KEEP ALIVE THE CHRISTMAS SPIRIT IN THIS YEAR OF PEACE

OUR SAMPLES of Christmas Greeting Cards (Personal or Business) showing a large assortment, will be mailed to you direct for your inspection. Place your order now for delivery later. This is the sure plan, to postpone may leave you without cards as it did a great many last season. Prices may also advance as the season advances.

Write us about anything engraved on paper

"See How Simply It's Built"

The elimination of complicated parts makes for ease of operation. Ball bearing construction throughout decreases power consumption. These two factors spell ECONOMY in big letters.

Furthermore, this simple mill is supreme in the ultimate test of efficiency.

It is built with a daily capacity of from 25 to 50 barrels, and we will allow any responsible party a reasonable time to try the mill, and if it is not perfectly satisfactory you may return it and all money paid us will be gladly refunded. Here is your opportunity, knocking at the door.

Why not get into business for yourself? Here's a chance for a struggling head or second miller to own a business of his own. Our terms are liberal to responsible parties. For further information write

A book for the use of country grain buyers in keeping a record of grain received from farmers.

Its column headings are: Month, Day, Name, Kind, Gross and Tare, Net Pounds, Bushels, Pounds, Price, Dollars, Cents and Remarks.

The book, 9x12 inches, 160 pages, 20 lines to each page, giving room for recording 3,200 loads, is printed on Linen Ledger Paper and is well bound in strong board covers with leather back and corners. Order form 80. Price $1.50.

Price Current-Grain Reporter

327 So. La Salle Street Chicago, Illinois

GRAIN SCALE BOOK

Form 223 is an indexed receiving book designed to meet the requirements of the grain dealer who wants something a little better than the ordinary. Separate pages are given to each farmer, and all are indexed so that their accounts may be instantly located. If so desired, it can be used as a grain journal, the two L. F. columns allowing a posting of both debits and credits and entering the numbers of the ledger pages. The book contains 240 numbered pages of high grade heavy linen ledger paper, each page ruled for 41 wagon loads, and a 28 page alphabetical index in front. Size 10¼x15¾. This book is bound in heavy red leather back and corners with black cloth sides and its name, "Grain Scale Book," is stamped in gold leaf on the front cover. Order Form 223. Price $2.75. Book weighs 4½ pounds.

Work! Work! Work!

That's the motto of "Handy Andy." Never gets tired. Never strikes. Never lets up until you say so.

"Handy Andy," the practical, portable, adjustable elevator, is the strong armed workman that lifts and conveys bags, boxes, bales and other packages without a complaint. Loads cars, loads wagons.

Light in weight. Sturdy in construction. Simple to operate. Saves money.

There is another model of "Handy Andy" for handling material in bulk.

Send for particulars.

BUSINESS AND TRADE CONDITIONS

MR. LODGE is said to have "posed in the central aisle" of the Senate Chamber, "grinning with a succession of wrinkles of risibility," while Senator Hitchcock presented memorials the Middle West praying for the ratification of Treaty. Equally amusing perhaps were the arations of the New York Chamber of Comce declaring that "the failure to accept Peace Treaty or to compromise on the Treaty created a crisis in morals and trade," and appeal of the Baltimore Chamber to the Sena- to "put beyond them all political and par- considerations and in humanity's name and in interest of the world's commerce, industry and ce" ratify the Treaty. And what of those mem- of the Republican National Committee that met he 12th inst., who reported that "the feeling pre- d in their respective states that it is a necessity a business and an industrial viewpoint to dis- of the Treaty dispute promptly"? Thus does "ghost of Banquo" reappear from time to time make more certain that in due time any party h makes the ultimate defeat of the Treaty or asonable delay in its ratification possible may Birnam forest come to Dunsinane."

he major problem of the business world is the ustment of international exchange and the sup- of the export trade which has brought such ent prosperity to all Americans. That the dis- of the Treaty dispute by its ratification will do that no one should expect, but no one has n to think that the consummation wished can n until the Treaty is ratified and legal peace Germany proclaimed. By a reasonable compro- in which Mr. Wilson himself must share, and reaty's disposal in that way, the Senate would le to remove in some part the disorganizing nces which are keeping the people in a fluid of unrest and uncertainty as to the future, and throwing out helps to business also give the e itself freedom from the interruptions of po- brawling over the Treaty to attend to those tial matters of legislation on whose dispo- the country is now waiting and with which the e is now dawdling.

Edge bill, so far as international trade is con- d, is immediately essential, at least as a pallia- The Treasury very properly declines to con- further loans to foreign governments to pay xports. There is no economic justification for tuance of the practice which has been going on 1915 of Americans buying from each other at cing prices, in order to send the goods abroad in return only dubious promises to pay. The bill, which passed the Senate Oct. 16, contem- the financing of the export trade by private l only, which would have this effect, which nment loans connot have, that the credits ex- l would be based on substantial values in goods ther properties, while further purchases from ide would in large measure be confined to the of the ability of individuals to pay, a fact would be established by competent sellers of This would, of course, in some measure re- our exports, but the reduction would be whole- at home and abroad. It would tend to lower here and restrain the disposition to unneces- uying abroad. That there is extravagant buy- om the other side may not be so apparent, he appalling necessity of some parts of Europe wn, but the steady fall in exchange in recent weeks is a plain signal that the end of trading on the basis of 1915-19 is rapidly approaching.

Indeed, the difficulties of trade and exchange are becoming so serious, the £ having declined to above a dollar under mint par with dollars and the German mark nearly and the Austrian crown quite to zero, that it is seriously proposed that our exporters shall return to the old system of barter, which has indeed existed for some time past in portions of the Balkans. All foreign trade is in the final analysis barter; but in recent years that trade has been made more complicated, although much easier to the experts, by the entrance into the process of the bankers who revived the use of international bills of exchange for settlements, invented during the Middle Ages by the Jews to transfer their property values from France to Lombardy. In the famous "Clipper Days" of the low tariff era of the 1850s barter was the usual method of all trading by Salem and Boston and New York and Southern ports ship owners. The plan is not impossible of revival—it never wholly disappeared from English trade; and at least one large Boston importing house is getting ready to do a world-wide barter business, beginning with the shores of the Adriatic and Black Seas and later with the remoter parts of Africa and the Far East, in countries unable to do business on a money or marketable credit basis.

Barter would be as wholesome as it seems a necessary venture; and at least it would mean a wealth return in consumable goods for goods exported and so tend to restore something like normal exchanges. It would do much to remove the muddle existing in most men's minds in these days, who try to interpret the "balance of trade" and sense the difference between the economic balances shown by the books of exporters, bankers and importers and the value differences as shown by the Bureau of Statistics of the Department of Commerce in its monthly report of trade movements. Such enlightenment of the voter and the legislator might well be worth while. Barter for a few years would make clearer to all President Wilson's declaration in his last Message that "If we want to sell we must be prepared to buy." Foreign markets want our goods, but as their money is of little value at home and still less abroad and as for that reason their credit is practically nonexistent except on the basis of goods, our merchants can barter for what they desire to purchase without either money or credit and both sides will make a profit and the wants of the people thus be alleviated until exchange has righted itself.

At any rate, the present status cannot safely be allowed to continue indefinitely. The enormous excess volume of exports must eventually have its influence in breaking down our own credit edifice in spite of its strong support by the Federal Reserve System, if settlements be made only in other forms of credit. Trade can prosper, as the individual prospers, only by exchange of real values of consumable goods. Until France is willing to face taxation or cut her national expenses to put her balance sheet in order; until Germany and Austria can do the same or shall have been rehabilitated by peace and the resumption of production in excess of their domestic wants and like the neutrals can again pay for current purchases in real values, further exports on the present basis will result in the United States only in ultimate industrial depression or collapse. The gradual but seemingly permanent settling down of stock exchange prices may be the forerunner of such a halting of industry, until the great "favorable" balance of trade is quickly and very radically reduced.

The coal strike (which was in a fair way to settle itself, just as the steel strike was settled) has ended, for the time being at least—"settled" as the Administration has settled all labor controversies it has touched, by giving the strikers, if not all they asked, at least enough to make it worth while to strike again. No one has any respect for it. As Goldwin Smith once said: "We know that a successful strike is apt to be repeated and that upon the heels of one labor agitator generally treads another." It was said in 1902 that "the coal interest is so vast, affecting all classes and conditions of men, that the capital and labor concerned in it should consider long and carefully before either decides to inaugurate another war like that of 1902-3." But the agitator treading upon the heels of John Mitchell (who was not an agitator) did not hesitate in 1919. The only redeeming feature of the present opportunist "settlement" is the promise that a commission shall be appointed to examine into the merits of the miners' claims. This promise will be justified if the President, for once, will appoint a real commission, as Roosevelt did in 1902, and not as usual a group of his disciples practically pledged in advance to a "New Freedom" program of opportunism. Mr. Roosevelt's anthracite commission was composed of such men as Judge George Gray of Delaware; Thos. Watkins of Scranton, a former coal operator who had retired, "a sociologist" who was not a sentimentalist but a man respected by the miners he had employed; E. C. Clark, a railroad labor leader before he became a member of the Commerce Commission; Brig. Gen. John M. Wilson, retired, an expert coal mining engineer; Edw. W. Parker of the Geological Survey; Rt. Rev. Bishop Spalding of Peoria, voting members, and Carroll D. Wright, Commissioner of Labor, as recorder. It will be interesting to see how near Mr. Wilson can come to giving the country a commission of like character and ability. The Commission sat for weeks and in March, 1903, made its award: 10% increase to all miners, who are paid according to the amount of work done (not for time only); an eight-hour day, the then 12-hour men's pay being continued without change for eight hours' work; payment by weight; recognition of the union for settlement of differences but not for the "closed shop"; sliding scale of wages based on the price of coal at tidewater—1% to be added to the wages for each 5c added to $4.50 per ton for coal, but no reduction of wages if the price of coal should fall below $4.50 per ton. Anthracite coal has steadily advanced in price since March, 1903, but there has been peace at the "hard coal" mines ever since and a supply of coal; while the soft coal miners, "advised" by paid agitators, have been in annual turmoil, which they expect to continue. The same demand for nationalization of the mines, from others than miners, and control of the unions, in as strong terms were made in 1902-3 as are made now, but it all ceased after the Gray Commission award was made, compelling both sides to recognize the two fundamental principles that must be insisted on in all future labor settlements, to-wit: Pay for work done, not for time, and the open shop, with the corollary of the sliding scale wherever practicable. The latter rules in the copper camps; but because the two fundamental principles stated do not have recognition there is never wholly absent the unrest and discontent created by the agitator who never gives the men any rest.

Perhaps the cotton producers and factors of the South may be able to control prices for the staple;

but they may be sure that 38-cent cotton long persisted in will mean more cotton in India and Egypt which may "swamp all prices" and ultimately make it very embarrassing to the American planter. Natural law is the safest guide to stable prices.

AS TO CLAIMS

THE suggestions of Mr. Coon on another page will be interesting to all shippers of grain and valuable in proportion as shippers heed them. But there is a further point, which Mr. Coon may perhaps refer to in later articles, which it is hoped he will favor the reader with, which it is well to know now, to-wit, that the Railroad Administration has made it obligatory on the shipper of grain to cooper the car with such care that it will not leak. The Administration has gone so far in this respect as to have made the ruling that where a loss of grain in transit can be shown to have been due to the careless coopering of the car by the shipper, the claim agents will not be allowed to issue vouchers in payment of the loss. If such claims, then, be collected at all it can be only through the courts.

ON CROP REPORTING SERVICE

THE Secretary of Agriculture has replied by letter to the Grain Dealers' National Ass'n as to the criticism of the crop committee of the National, made at St. Louis, in what seems to us a convincing manner. The report in question was not entirely a happy one. The committee did not seem to quite fully understand how the Bureau of Crop Estimates works, or the limitation of means under which it works; and so criticized as lacking some of the features that particularly characterize its work, along with things that it has wished to do but had no money to do. The only valid criticism of the service was that publication of the results in detail has been slow; but that, as the Secretary says, has been due to the fact that the Congress has not heretofore given the Bureau money enough to make publication more promptly and its distribution more widespread.

As to this THE PRICE CURRENT-GRAIN REPORTER feels it has been of some service to the public by publishing many of the details which the grain trade, at least, desired to have before the *Monthly Crop Report* can appear. These have always been promptly supplied by the Bureau on request from this office, like the statements herein printed this week of the final estimated yields of corn and oats by states. The Bureau has been like the mining camp fiddler with limited repertoire, but only because the Congress would have it so.

If the Congress will supply the money to enable the Bureau to do all it wants to do and what the National committee would like to see done, the most captious will hardly be able to find reasonable fault. We think it is up to the officers and directory of the National Association to now appeal to the Congress in the names of the grain trade and the farmers whom the trade serve for the necessary funds to enable the Bureau to carry out the program outlined in the annual report of Secretary Houston.

IMPOSSIBLE FEED STANDARDS

THE mill-feed standards of quality made by virtue the Alabama law, effective Nov. 1, were published herein on Nov. 12, p. 1165. They are very severe—more so in some respects than the legal standards of any other state, especially the high requirement as to protein and the low proportions of water and ash. Few mill-feeds made in the common practice of milling will meet the Alabama requirements. The probable effect of the law, as the editor of the *American Miller* points out, will be "that millers cannot afford to ship mill-feed to Alabama. Instead of turning a stream of patent into the feed bins, the miller will simply ship his feed elsewhere. The Alabama feed dealers will have no shorts, bran or middlings to sell and will have to furnish something else. If Alabama can stand that sort of thing, the rest of the country, including the millers, need not worry."

It may be, however, that by creating a famine of mill-feeds it was hoped to push the consumption of other protein feeds of which the state has far more in proportion than it has of mill-feeds. State legislators are not usually credited with such a degree of shrewdness, but it is not impossible the Alabama type may have hit upon such a scheme to "boost" a "local industry."

THE USES OF ADVERTISING

THE art of advertising should not be esteemed merely for one only of the values it has: that it promotes business by creating a commercial demand for services or commodities. In that respect indeed it is the hand-maiden of invention and enterprise which create new articles of use and luxury and new kinds of personal service which can find their market only after advertising shall have created a demand for them by making their merits known.

But in these days of confused thinking, when most newspapers having popular circulation are actuated only by a cheap and exaggerated egotism, a sordid commercialism or the reactions of pure demagogy, the need of popular instruction in simple economics can be met, as it seems, only by the advertising of individuals. The banks have been the pioneers in this work, the universities having practically surrendered this duty into the hands of the socialists infesting their faculties. Among the banks which have already taken up this kind of advertising, using newspapers' paid space and their own periodical publications of great educational value, are, the National City Bank, the Guaranty Trust Company, and the National Bank of Commerce in New York; City National and Fort Dearborn National Banks in Chicago; Second National Bank of Macon, Ga.; whose publications come regularly to this desk. There are also some individuals like Otto H. Kahn of Kuhn, Loeb & Co., John D. Rockefeller, Jr., Robert S. Lovett of the Union Pacific, who understand that, as Geo. E. Roberts of the National City Bank of New York has said, "All the economic education of the people must be done over"; and individuals must shoulder the burden.

There is to be noted also in not a few of the weekly market letters of the grain trade well-digested comments on the economic tendencies of the time and their influence on the grain business, which can hardly fail to have substantial results. In this connection it should be mentioned that during the progress of the Grain and Hay Show at Chicago in connection with the International Live Stock Exposition, Secretary Mauf of the Board published in the *Drovers' Journal* an able series of articles explanatory of the part played by the Board in the economy of the marketing of grain and products which must have attracted the thoughtful attention of a class of our people who in the past have been fed to repletion on misinformation as to the functions of this great institution.

We note further that numerous members of the grain exchanges in Chicago and elsewhere have been using, in part for their own advertising and also for the benefit of all grain merchants, the admirable monograph of Rollin E. Smith on "Hedging" and what that art and science means to producers of grain, more than 56,000 copies of which have been distributed through trade channels to persons who, let us hope, will be enlightened by what is perhaps the clearest exposition in a brief space of pit trading that has as yet been published for the popular elucidation of the mysteries of Board of Trade operations.

This is a species of advertising in which all business men should unite—no one else will do it.

THE grain salvage experts will all tell you that water does more damage to grain in a burning elevator than the fire itself, and in most cases of elevator fire it would be a great saving of grain loss if there were no fire departments at all to throw water to "put out the fire." Grain burns very slowly, since is difficult to get a draft through a pile of it, and left alone would burn only on the top of a pile a as soon as the salvage men arrive the top grain c be removed and the good grain saved without t expense of drying. If then the reader should ha the misfortune to have a fire on his premises, let hi stop the fire boys from throwing water just quickly as he can and then wire for the salvage e pert. It will be money in his purse to let the grai pile burn until the salvage man arrives rather tha to have it soaked with water.

WEEKLY STATISTICAL SUMMARY.

The following tabulation is a summary of figures fr various statistical exhibits appearing weekly in detail "The Price Current-Grain Reporter," these figures repr senting the past week, the preceding week and cor sponding time last year, here assembled for ready refe ence:

	Dec. 13.	Dec. 6.	Dec. 14,
Wheat—			
Primary receipts.....	6,063,000	6,050,000	14,321,0
Primary shipments....	3,588,000	5,778,000	10,748,0
Receipts since July 1.	277,474,000	272,411,000	324,222,0

EDITORIALETTES

THE demand for hay, particularly timothy, i the cities, would indicate that the horse still a going concern. The demand, howeve develops the fact that horses, or at any rate thei owners, are getting to be more particular than the used to be and expect better hay for their mone than they used to insist upon. Therefore, only th best grades of timothy or clover mixed have ver much chance for copping off the top prices in any o the metropolitan markets.

ONE may not quite agree with Rep. Wingo in hi opposition to the decimal weight bill, to which th wheat and corn millers who are most interested i it, have made no serious objection, except as t time of its going into effect, but Mr. Wingo certainl "acquires merit" for his rap at the dogma whic obsesses the Administration, that everything fron dog meat to men must be standardized—even book keeping for country elevators, as though all ele vators were like a quart of peas.

ANOTHER rate advance seems to be impending a the roads near the time when they shall be aban doned by the Government which has pretty nearly milked them dry.

GRAIN TRADE REVIEW

conomic conditions are the dominat- influence in the grain markets at present time, although taken as hole the trade are not disposed to it this fact and many pay little at-ion to the factors which are the stay of prices. Two of the funda-tal causes of the high prices for all ns and commodities are domes-inflation and the depreciation in e of foreign paper money which is essed by the decline in foreign ex-ge to the lowest figures known. Or-rily exchange holds within com-tively narrow limits, and trade bal-s can be settled either in securities n gold. At the present time both pe and Canada are unable to ship s freely enough to offset purchases oods and have little gold over and e what is necessary to serve as a for domestic paper money. Con-ently their paper is now declining the decline is reflected in the price change. The trade apparently pay ttention to the fact that an inflation edit, such as was caused by the war, ow perhaps the main influence in ng up prices, but have been look-or grains to decline to a basis that d probably reflect the purchasing r of gold, and seek to buy on a gold with paper money. Both gold and r are selling at far above normal es, the latter metal at the highest known in recent times.

stribution is a contributing factor eping up corn prices. The country xious to sell and elevators in the ior hold large quantities, but there ot sufficient cars to move this grain ptly; and unless conditions change ll be some months before it can be d at all. The coal strike will ne-ate the railroads giving coal the of way for several weeks at least, at under the most favorable condi-it will be early in January before great volume of grain is received. et, some look for the movement to layed for 60 days or longer. There pily no question as to the keeping y of the corn this season, the bulk e receipts grading from No. 3 to , with very little falling into the No. 6 class. When the spring shelled grain is on the market the opinion is that it will test No. 2 and No. 3 for the bulk of the movement.

Export business in corn promises to be of small proportion throughout the crop year. It would be exceedingly small if the British government were to remove the maximum price on Argentine grain. A good deal of the business done of late has been due to the fact that when Argentine corn prices move to above the maximum price it cannot be imported. It is a case of a maximum and no corn. American corn, however, is uncontrolled. It would be a great benefit to the world if the various governments would stop trying to save consumers a few cents and allow competition to determine prices. Sooner or later this policy would be reflected in far larger supplies and lower prices than is possible under government control. This is not the first time that governments have seen fit to try to check the laws of supply and demand, nor will it be the first time that they have failed; but they persist nevertheless in the effort to mop up the ocean with a dish rag.

Hogs have gone below a parity with corn. The decreased purchasing power of Europe hampers all lines of export business, and in the end will be reflected in a decrease in prices. Low prices need not necessarily represent lack of employment nor lack of a satisfactory return on agricultural products, but in the present case decreased wages would be a great benefit so long as labor insists on being paid for "soldier" time and not work done, as their greater output would check the cost of high living. Meats, of all commodities, are selling around the pre-war level, except in the retail shops but consumption has probably been increased. If Europe were granted credits immense amounts of hog products would probably be taken there, but unless the products can go out the hog may be expected to sell comparatively low until the winter movement is out of the way.

Reports from the winter wheat belt are not favorable. Most of Kansas is now covered with snow but there is also some ice under the snow and considerable of the area is practically without snow protection. The ice is quite as bad as no protection at all, or even worse, although general reports so far indicate no damage from the extreme weather. The fact is, however, that the crop had a very poor growth before the crop went into winter quarters, the drought having made the sowing late and the start rather poor.

Grain Market Summary.

Receipts of wheat, corn and oats at primary points for the past week follow:

	Dec. 13, 1919.	Dec. 6, 1919.	Dec. 14, 1918.
Wheat	6,063,000	6,050,000	14,321,000
Corn	4,778,000	5,784,000	5,389,000
Oats	2,810,000	2,713,000	7,221,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1919.	1918.
Past week	13,651,000	26,931,000
Preceding week	12,537,000	23,918,000
Since July 1	437,763,000	566,818,000

Corn prices held within comparatively narrow limits the past week, fluctuating rapidly, and closing well toward the inside figures with net losses of 1⅞@2c on the deferred deliveries, while the December gained ⅝c. The latter showed considerable congestion at times, as the cash is selling at a good premium. Receipts were of fair proportions but the demand improved and was of sufficient volume to prevent any material decline. Industries were in the market and absorbed the surplus in the sample market. Reports of reselling of cash grain by the East, Canada and foreigners did not materially affect values, as so far very little grain has been cancelled.

Oats advanced to a new high figure on the present upturn, and showed a strong undertone throughout the week, closing with net gains of ⅛@¼c on the nearby futures, and ⅜c lower on July. Shorts covered freely, and while the range was narrow there was an absence of pressure from cash grain, while the domestic demand was good and liberal sales were made to go east and south. Little or no grain has been reported as cancelled in the West so far, despite the bad break in foreign exchange.

Cash wheat advanced to new high figures on the crop, dark No. 1 northern selling up to $3.45 at Chicago, while in the Southwest dark hard winter sold close to $3. The Government has resold an immense quantity of its stored grain to mills, but has not affected the price of the fresh arrivals from the country. Flour prices firmer, despite the offer of the Grain Corporation to sell straights at much lower figures than the well known family brands of spring patents. Receipts have fallen off materially, and no great increase is expected for sometime to come, as cars will be needed for moving corn. Prices for the week follow:

			Close

POTATO STARCH IN BRITAIN

A New Industry Starting to Use the Potato—How Farina Is Made and What It Is Used For—Hitherto Made In Germany and Japan.

By JACK BROOKS.

LONDON, Nov. 21.—[Special Correspondence.]—Considerable attention is being given here just now to the manufacture of farina from potatoes, and growers of this vegetable are being urged to increase their acreage and reap the additional profit, since a partially blighted potato is still of value for starch making. Since the mills started up in Britain to furnish farina supplies formerly obtained from Germany, the potato growers have been busier than ever. Backed by the Board of Agriculture, the business bids fair to assume big proportions. The first mills were established six months ago at King's Lynn and comprised three large buildings, seven stories high, with a floor space of 130,000 square feet, a power and lighting station fitted with 575-h. p. engines and an auxiliary steam-raising plant.

The potatoes are handled mechanically from the dockside, if they come in barge or steamer, and belt conveyors take them directly into the warehouse or to the machines. Railroad lines run around each building, so that incoming cars can be dealt with at every point. All raw material is handled automatically, and the finished product is loaded for dispatch with the minimum of labor. Each mill deals with about 1,500 tons of potatoes each week, and it is estimated about 200,000 tons of potatoes will be handled each year at this first plant.

The managing director of the mills informs the Board of Agriculture that there is an increasingly large demand for starch in the textile trades, which are the largest consumers, while large supplies are required for the manufacture of dextrine and various classes of gums. Farina, he says, is the pure starch separated from the potato and is not the dried and pulverized potato flour.

Growers of potatoes who intend to utilize their crops for the manufacture of farina, reap a great advantage by allowing the potato haulm to die down before the crop is lifted. By doing so the sap, which is really a liquid sugar, is withdrawn back into the tubers where by chemical changes it is transformed into grains of pure starch.

The farina industry is going to absorb millions of tons of potatoes in the course of each year and the grower who increases his acreage will have no difficulty in disposing of the crop. A great economy is effected in using partially diseased potatoes, where the crop is destined for the farina mills, since the vegetable need not be dumped so long as there is some part of it suitable for starch-making.

The output of by-products from this industry is also considerable. An auxiliary plant turns the potato residues into a nourishing feed for animals, which can be stored in concentrated form indefinitely and prove a more digestible and healthy food than the raw potato.

Knowledge of the best kind of potato to produce the maximum amount of starch is a source of additional profit to the grower and the potato miller. The starch content varies considerably, and of two crops that appear equally sound and of high quality the one may give a greater starch yield when put through the mill than the other. Density is the great potato criterion. The higher the density the greater the starch content. The higher the yield of starch per acre, the higher the monetary return.

The farina process in the mills is a continuous one, extraction of the starch being accomplished by grinding and washing. The tubers are ground to a very fine pulp after two preliminary washings to remove dirt. The grinding process frees the starch granules from their tissue. The fibrous portions of the potato are then separated from the starch by sifting and washing. All foreign matter, flavor and discoloration is then removed by a very special and prolonged washing process, the final drying and dressing operations leaving a fine, glistening white flour.

Great floor space is needed in the farina mills, especially for the storage rooms, since the settling table floors and rotary sieve floors take up much room. The farina flour is packed in large flour sacks by the latest style packing machines. In some European countries the farina flour is used by manufacturing chemists in the production of artificial sago and grape sugar.

Before the war the industrial use of potatoes was unknown in Britain, although Germany, Holland and Japan had experimented in a practical way with the vegetable for uses other than as food, and now that the world is seeking to re-establish itself physically and commercially and the demand for raw material is so keen, the farina field appears to be one in which there are immense possibilities.

GRAIN GRADING SCHOOLS.

How Grain Buyers, Millers and Grain Growers May Learn to Grade Grain.

"Haphazard" seems destined to come out of the farmer's and grain buyer's dictionary. "Job lotting" of crops is not as popular as it used to be. The trend in handling agricultural products is to find out just what every crop is worth and not guess at it. One feature in this general movement is the proper grading of grain, a process that means much to the grain buyer, the miller, the bread winner, the bread eater and the grain grower. The Federal Government is inducing grain dealers in all parts of the country to adopt Federal standards for wheat, shelled corn and oats, and has undertaken to familiarize country grain dealers, millers, county agents and farmers with the correct methods of grain grading. These organized efforts are nothing more nor less than schools conducted for a few hours or a few days, according to the degree of detail in instruction. A large number of men interested in this work have taken time from their business to sit once more at school desks and play the part of pupils that they may handle their grain more efficiently.

The Government is urging the universal use of its standards because it feels that by such means both producers, middlemen and consumers will profit. In these schools, every operation necessary to determine the grades of grains is conducted exactly as it would be in the offices of any inspection department in terminal markets. The equipment used is comparatively simple and includes special scales for ascertaining the weight of given volumes of grain, trays illustrating the grading factors and the methods of handling the samples, scales for weighing separations of damaged grains, foreign material and mixtures to determine the percentages of each, testers for determining the moisture content of grain, sieves for screening the foreign material and dockage out of samples, and a sampling device for splitting samples to permit of rapid analysis.

GRAIN-GRADING SCHOOL LISTENING TO A LECTURE BY A GRAIN SUPERVISOR.

OUTLAWED GRAIN CLAIM

Some Points as to Rejected Claims Whi Shippers Overlook—What Must Be Don Before Beginning Suit to Collect.

By OWEN L. COON,

A large number of claims for loss grain of the 1917 crop are about to outlawed unless suit is started up them in the very near future. The claims in the main are claims for loss grade due to delays in transit. Th crop of corn not having fully matur it got out of condition more easily th is generally the case in slight delays transit. Such claims were large in s and many of them have been refus payment by the different railroad cla departments. These claims are about be outlawed under that provision of t bill of lading which requires suit any claim to be brought within t years and a day from the time it aro

GRAIN GRADING SCHOOL.
Pupil on Left Weighing Grain to Determine Weight Per Bushel; on Right, Running Grain Through an Oat-Kicker; Men at Desks Separating Kernels to Determine the Percentage of Damaged Grains.

In my experience in handling the of a large number of shippers, found that no other one mistake often made as the failure to ob- the condition of the bill of lading espect to the time for filing claims ne time for bringing suits if the is refused.

In the car has moved from one o another (interstate commerce) n arising from delay in transit ot be filed within the time limit months. Certain other similar ons exist; but it is well to forget hese and make sure that a claim l within four months from the arose. When the car of grain oved beyond the limits of the 's state, it need not be filed ex- ithin six months from the time s. When the car has not moved of the shipper's state, the claim n general be filed within four time. So I have advised, as a rule for all shippers to remem- File your claims as soon as they nd never let over *four* months' apse."

there is another condition in the lading to be taken into considera- d that is the requirement that all claims must be brought within ars and one day. I have often sked whether if suit is brought two years, that act does not take ce of filing the claim within four t. It must be answered, "No." wo provisions are cumulative and ent. It does no good to start thin the two years if the claim t previously been filed within r- or six-month period, whichever the case. One without the other less. The claim is outlawed a failure to observe either con-

railroads will make use of this mit on the starting of suits at pportunity, and many times in ist manner. For example, The Pulaski Grain Co. of Mt. Pulaski, d a claim against the Illinois for some $300 for decline in ue to a delay of about two weeks e natural movement of the car. aim was on file for eighteen when the shipper, not having rom the claim, wrote the claim ent for its decision. Their reply at the original papers had some error become lost, though per had received notification of ipt of his claim and had been as- a claim number. He was re- to file a duplicate claim, which mptly done. The two-year limit August 30, 1919, and on August , the claim department, in re- o another inquiry from the ship- ked his further indulgence for time that, as they said, "the results" could be obtained. The was under the impression that if m was filed within six months, s sufficient, and thought nothing time limit of two years within uit must be brought. He let the rest for a couple of months, taking it up again, the railroad d him that it regretted not being settle the claim because of the on of the two years' limit.

time limit of two years *should* date from the time the railroad s refusal. But such is not the er the Cummins amendment, and bted if it ever can be changed by the act of Congress which he original law.

ing that a number of claims for n transit on the 1917 crop and ent loss of grade are in my nd about to be outlawed, and must soon start suit upon them them alive, I pass on to the he advice to look over his old n the very near future—those ave been declined, and if he es to get payment, have a suit upon them. Otherwise the last will soon be gone.

In mind also that one suit will l of your claims that have been over any period of two years. one suit all of those which are should be paid. If more ship- pers would start suit upon claims which are declined, the railroads would be a little more considerate of the manner in which they use the two-year time limit to prolong their investigation in the hope that the claim may thus become outlawed by claimant's default. The shipper will have to stand the court costs, but it is possible to have the matter placed with attorneys who will handle the matter upon a contingent fee basis.

WHEAT EMBARGO LIFTED.

Doubtful of the Effects of Lifting the Embargo Effective December 15.

The effect of the lifting of the embargo on wheat and products, effective on Dec. 15, has been a problem for both American and Canadian millers. The first have supposed there ought to be a reduction in the American premiums, while the Canadians have feared a rush of grain across the border, leaving them without wheat. Neither supposition seems likely to work out, perhaps for the reason that competition in the joint consuming market abroad should equalize the price, and, moreover, it is probable that the American and Canadian authorities have an understanding on the subject, and that the sales of wheat and flour will be closely supervised.

According to a dispatch from Toronto, the Canadian Millers' Committee in Toronto adopted a resolution calling on the Canadian Wheat Board to protect the interests of the industry in Canada and to see that sufficient reserves of wheat are kept in the country to give Canadian mills a full run for the balance of the crop season. The note said:

"It has been drawn to the attention of the Canadian Millers' Committee that reports are current that some Canadian millers have been offering flour in United States territory in anticipation of the opening of that market on December 15. At the present time it is contrary to the orders of the Canadian Wheat Board to make such offers."

A dispatch from Ottawa states: "No great flow of Canadian wheat to the United States is expected to result from the lifting of the United States embargo against importation of the grain. The Canadian Wheat Board, acting for the Board, is said to have entered into contracts for the sale in Europe of the bulk of the exportable surplus for the present year, and these contracts will have to be protected. The Board has undertaken to market the whole of the exportable surplus this year, and permits exportation only under license. It would, therefore, look as if the United States embargo has been raised too late to permit of any large movement of Canadian grain across the border."

The Canadian Wheat Board has issued a regulation whereby it is announced that the Board will absorb any changes there may be in flour prices in Canada, insofar as these affect flour mills. Should the prices of wheat be reduced, the Board will pay the miller the resulting difference in the price of flour, and on the other hand, if there should be an advance the miller will be obliged to pay the equivalent on his stocks of flour. This regulation is guarded by conditions as to accounting and procedure which will have the effect of protecting the Board from fraud.

Objection to the Canadian millers buying their wheat from the Wheat Board at $2.30, is being made by the United Grain Growers, Ltd., the commercial end of the Canadian Grain Growers' organization. A resolution urging the government to advance the wheat when the exportable price justifies it was adopted at the annual meeting. In their convention the Grain Growers pointed out that the milling industry of Canada is grinding their wheat at $2.30, and may sell in the United States since the embargo has been removed or in other foreign markets in competition with United States flour milled from $3 wheat. This they claim is unwarranted trade advantage for Dominion millers.

The law under which the Canadian Wheat Board was created provides that the wheat for domestic purposes must be charged for on a basis of world export market. Therefore, it is argued, $2.30 is the highest figure the Canadian Board has been receiving for the farmers' wheat, although Chairman James Stewart has anonunced that it will not make the actual trading figure known until the 1919 crop business is wound up, Aug. 31, 1920.

"HEAVILY LOADED CAR" CERTIFICATES.

According to a memorandum just issued by the Bureau of Markets to licensed grain inspectors and Federal grain supervisors, numerous complaints have been received from the grain trade indicating the frequent abuse of the privilege granted to licensed grain inspectors by Regulation 2, Sec. 12, Par. 2, of the Regulations of the Secretary under the Grain Standards Act. This permits, under certain conditions, the issuance of inspection certificates marked "heavily loaded car." The grain trade contends that "heavily loaded car" certificates are often issued without sufficient justification.

Results of a survey of all the principal markets in the country, made by the Bureau, indicate that in many markets inspectors have exercised too freely the privilege of issuing "heavily loaded car" certificates. In order, therefore, to correct this situation and to confine in the future "heavily loaded car" certificates to such cars as may be unquestionably inaccessible for proper sampling, the Bureau of Markets recommends that cars loaded so as to permit twenty-four inches of space between the top of the grain and the roof of the car should be covered by a "clean" certificate, unless the sampler in the course of his work finds concrete evidence that he is unable to secure a representative sample of the carload. The Bureau states that the mere fact that the grain in the car is loaded to within twenty-four inches of the top is not sufficient evidence in itself to justify the issuance of a "heavily loaded car" certificate. Federal grain supervisors have been instructed by the Bureau to bring this notice into effect immediately.

RANGE OF CONTRACT GRAIN PRICES.

Following is the range of quotations for contract grain for the past few weeks at Chicago:

FURTHER AID IN MARKETING

Secretary of Agriculture Further Plans to Extend Activities Which He Says "Have Clearly Demonstrated Their Value."

A private or Governmental agency of national range to supervise or direct the marketing of the Nation's farm products would probably break down of its own weight, is the opinion of Secretary of Agriculture Houston. He calls attention, in his annual report, to the fact that measures to this end have recently been introduced in Congress and that the present time is especially fruitful of proposals of a large and novel nature designed quickly to solve marketing problems. But, says Mr. Secretary:

"In the field of distribution, as well as in the field of production, the farmers of the Nation must assume the main tasks of improvement. The Government should furnish all possible aid in the way of information and suggestion, create favorable conditions under which production and distribution may take place, and especially see that the channels of trade are open and that abuses do not exist.

"There is no question," continues the Secretary, "that everything which can legitimately be done to eliminate waste in marketing and to promote orderly distribution should be done. But the views of the most experienced students of the matter seems to be that we must approach the problem in simpler terms, work along lines which have clearly proven to be feasible, and promote existing tendencies and practices.

A FIELD FOR WORK.

"Certainly we can proceed further by state, Federal, and individual action in standardizing the production, the handling, and the packing of farm products and in promoting the use of standard containers and proper storage on farms in transit and at market centers. We can continue to furnish assistance in the preparation and installation of accounting systems and more extensively and accurately gather and furnish to the farmers of the Nation all pertinent statistical information. I need scarcely emphasize the paramount importance of making available daily to producers facts as to market prices, supplies, and demands. The market news services of the Department of Agriculture have already clearly proved their value. The Department now conducts and operates an inspection service on fruits and vegetables covering 164 markets. It publishes reports on the supply, commercial movement, and prices of most of the important products and, in coöperation with 14 states, is issuing exchange marketing lists which make known to county agents, breeders, and feeders in these states where surpluses of live stock, feeds, and seeds are to be found. It is estimated that last year through such service the farmers in Iowa alone made local exchanges having an estimated value of $1,500,000.

HELP COÖPERATIVE ASSOCIATIONS.

"Particularly must the Federal and state agencies omit nothing to promote farmers' coöperative associations along right lines. Already, within a generation, many such bodies have appeared and rapidly expanded. It is estimated that they now market annually approximately $1,500,000,000 worth of commodities. They are of very diverse forms and sizes. For the most part, where they have been successful they have centered their activities on some one product, or on related products, in a given area. The indications are that with the continued success of these enterprises and with the proper educational effort and direction they will develop even more rapidly in the future. Through bulletins, news articles, and lectures the Department of Agriculture has endeavored to stimulate these efforts. It has furnished suggestions for state legislation governing their organization, and, in coöperation with 23 states, it has employed trained specialists to advise extension workers, including county

agents and others, with reference to coöperative marketing.

"As I have said, the rational program would seem to be to expand these activities which have clearly demonstrated their value, to follow the scent, as it were, and further to develop the machinery through which increased assistance may be furnished. There should be in every state one or more trained market specialists of the Department of Agriculture, working in coöperation with the proper state authority, to stimulate coöperative enterprises and to aid farmers in their marketing work by helpful suggestions as to plans and methods. These experts could very effectively aid the extension workers. County agents generally have the assistance of specialists in many other lines, but at present they have not the requisite aid in distribution. They cannot be expected to be expert in all agricultural matters or to be omniscient. The Department is requesting increased funds to make this extension possible and will take the necessary action promptly if the appropriations are made."

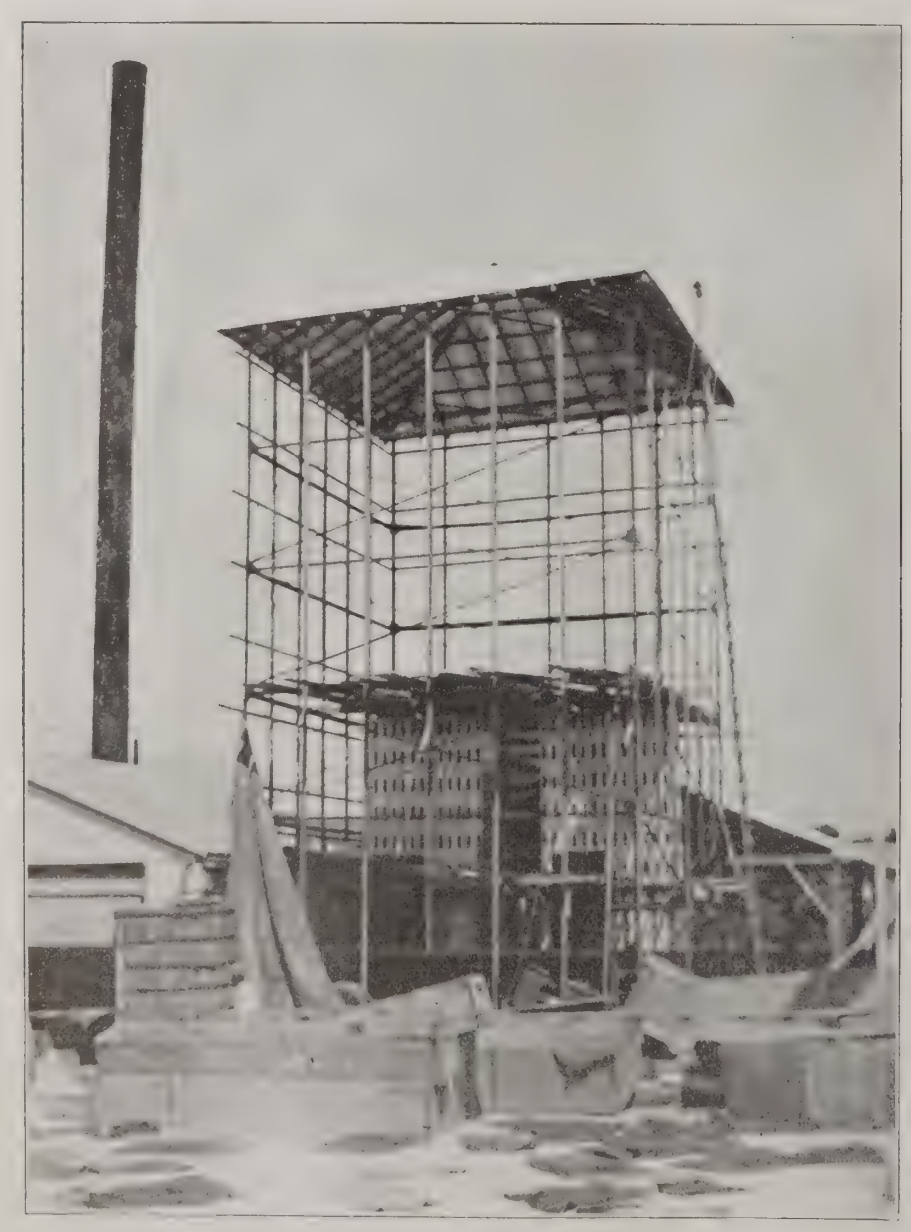
AN UNUSUAL DRIER.

An Ellis Drier Erected in Cuba for the Drying of Palm Seed.

The picture herewith shows a rather unusual drier construction, being made from a snapshot of an Ellis Drier installation for F. Perez & Company at Habana, Cuba, who will use it for drying the palm seed which grows so prolifically on the common varieties of Cuban palm trees.

In the last few years the palm oil industry has grown rapidly, the oil which is pressed from the seed being highly valued in Cuba and our own country for the making of soap and for cooking purposes. During the process of pressing the oil the seeds are first washed, after which they must be dried, hence the use of driers.

The drying of the seed presented certain diffculties which were overcome by building a small drier for the express purpose of experimentation on the palm seed, quantities of which were shipped to Chicago. The final results were quite satisfactory and the large commercial machines were installed by the Ellis Drier Company of Chicago.



CONCERNING CAR LOADINGS.

Chas. Rippin, traffic commissioner at St. Louis, last week put out at that market the following suggestion:

"In order to protect the purchasers of grain at this market in the matter of weight on which the railroad will charge freight, it is necessary that the country shippers show on the bills of lading the facts required to enable the purchaser to see that he is protected. For example, if the car is loaded to capacity, or to the grain line, let the country shipper mark the bill of lading accordingly. If it is loaded to within 24 inches of the roof, let the country shipper so endorse on the bill of lading.

"Receivers should immediately notify their country shippers accordingly and see that they have the necessary information at hand, when they offer grain for sale on the floor of this Exchange, to give to the purchaser. The seller should show on the dray tickets billing cars to connecting lines for out-shipment from this market, whether the car is loaded to capacity, to the grain line or to within 24 inches from the roof, as the case may be. Please give this your prompt and earnest attention to avoid trouble.

Useful rains fell in South Australia and New South Wales during the earlier part of November.

ELLIS DRIER FOR PALM KERNELS IN CUBA.

BUREAU OF STANDARDS' WORK

The Decimal Weight Bill Falls Into the Dump—What the Bureau of Standards Thinks—More Chaff About the Waterways.

WASHINGTON, Dec. 13.—No consideration will be given on the Senate side of Congress to H. R. 9755, the Vestal decimal weights bill, applying to flours, hominy, grits and meals and commercial feedingstuffs, until after the holidays. Following its passage by the House, the bill was referred to the Senate committee on standards, weights and measures. This is one of the committees that is considered of so little importance that the Republican Senate organization selected a Democrat as its chairman, Senator James A. Reed of Missouri, while other members are Senators Warren G. Harding of Ohio, William E. Borah of Idaho and Frank B. Kellogg of Minnesota, Republicans, and John Walter Smith of Maryland, Democrat. The committee seldom meets and has made no arrangements for hearings. But few communications have reached the Senate relative to the bill. It is expected, however, that an opportunity will be given to the various interests to be heard soon after the holidays.

The bill is discussed in the annual report of the Bureau of Standards of the Department of Commerce, which has just been made public. The report says on this subject:

"Congress has not enacted any legislation on the subject of weights and measures during the past year. However, the Bureau has been working on a draft of a bill designed to standardize flour, meals and commercial feeding stuffs throughout the United States, upon the hundredweight basis. This proposition was first brought before Congress last year, and since that time work has been done in perfecting it so that in its present form it has the hearty indorsement of all interests concerned, including the Millers' National Federation, an association comprising the large majority of the flour producers of the country, the American Corn Millers' Federation likewise including a large majority of firms in this industry, and every state association of weights and measures officials where the bill was considered, including New York, Massachusetts, Indiana, Wisconsin, Michigan and Maine," etc.

In the bill as passed by the House the smallest unit is 5 pounds. It provides a fine of not exceeding $500 for selling or offering for sale "in original unbroken package form" of five pounds or more any of the commodities specified.

BUREAU OF STANDARDS ON GRAIN WEIGHTS.

The report of the Bureau of Standards also touches on work done with reference to specifications for scales for weighing grain. It says in this connection:

"The subject of what constitutes proper and adequate facilities for weighing grain has recently assumed large importance, and hearings relating to this matter were held by the Interstate Commerce Commission under Docket No. 9009, dealing with loss and damage claims for grain in bulk shipments. The Bureau of Standards cooperated in trying to solve the difficulties by having a representative on a committee organized for the purpose of drawing up specifications defining what constituted proper facilities for weighing grain. It was neither practical nor possible under the circumstances to make an exhaustive investigation of the matter similar to that which had been carried out by the Bureau for railroad track scales, but tentative specifications were drawn up which represented the best information available on the subject. These specifications were submitted to the Interstate Commerce Commission, which in turn submitted them to a joint committee representing the shippers and carriers, formed for the purpose of agreeing upon just and practical rules to govern the settlement of loss and damage claims. If these specifications are accepted by the shippers' and carriers' committee, the Bureau of Standards will probably give th endorsement and issue them as a lar.

"Railroad track scales for we grain have been studied by the in connection with its track sca ing equipment. Hopper scales a tomatic scales are matters on much work remains to be done any decision can be reached as what equipment and installation quired to receive accurate result the best and most economical r of designing, installing and usin scales."

The Bureau report also states has been coöperating with the tion service of the United States of Markets in improving a devi determining the weight per bus wheat from samples, as a basis o ing it. In connection with this four grain testers have been test the Bureau of Markets and one state of Kansas, and some improv suggested and adopted. A large ber will probably be tested duri coming year.

MERRICK WANTS WATERWAYS

Need of better transportation ties for wheat shipped from the West to the East was pointed out H. Merrick, president of the C Association of Commerce and Mississippi Valley Association, in dress before the National River Harbors Congress this week, advo the development of the propos Lawrence route for ocean vessel the deepening of the St. Lawrence nel through the coöperation United States and Canada, it is pr to make it possible for ocean ves pass from the Atlantic through th to Chicago.

"The country raises, let us say, lion bushels of wheat, two-thirds in the region of which the Great are the natural outlet," said Mr rick. "Something like half a bushels moves down the lakes—b of the low cost of water transport It gets as far as Buffalo and stops Great Lakes way now ends ther Buffalo the wheat is unloaded fr lake boats into trains or barges- tically all of it goes by train—an enormous burden of fifteen millio is dumped on top of the regular which is already overburdenin railways in this area. The ov paralyzes them. Embargo r Wheat blocks the lines, but every of production is affected.

"There is our annual trouble. shall we remedy it? Increase ra facilities? To require the roads t vide facilities for their peak load bling their equipment, doubling trackage, establishing more termi to lie idle most of the year—woul Hurculean feat in finance. This to be thought of if there is any way.

"There is of course another Nature has carved out a great hi from the lakes to the sea and it re for us merely to clear away the spots that nature left in the St. rence waterway. This done, our boats can continue eastward to th This done and the ocean ships can westward to the ports of the Lakes and take on thir cargoes fo erpool and Antwerp."

The St. Lawrence project was ported before the convention by gates from the Middle West, incl Senators Lenroot of Wisconsin Townsend of Michigan, and also sistant Secretary of the Interior sang. There was strong oppos however, from New York state ests on the ground that the pro not feasible and because it would traffic from the port of New York.

G. D. N. ASSOCIATION RESOLUTIO

Resolutions adopted by the Dealers' National Association a Louis in October were read by Se Gay of Louisiana in the Senate posing the McNary bill extending trol over sugar by the Sugar Equ tion Board for another year. resolutions show conclusively ho business people of this country

er war-time control," said Senator
"and they express very accurately
eeling of the sugar producers of the
d States, who constitute as patri-
a body of men as there are any-
e in America, who have discharged
war obligation and who now sim-
sk that their business be returned
e natural channels of trade which
heretofore existed. I think it is
estly unfair to single out this in-
y and to make it the target of such
ation, and that it is only right
proper that the sugar producers
the sugar industry should be
d just as all other classes of busi-
other agricultural products, and
her industries are treated."

FINAL CROP REPORT.

Final Estimates of Crop Yields in 1918 with Revision of Estimates for 1918.

The Bureau of Crop Estimates on
2 published the final estimates of
ges and yields of crops of 1918,
evision of the estimates made as
, 1918. The Report proved a sur-
to the country, it having been
d by the trade generally that the
ield totals would be reduced from
tes as of Nov. 1, whereas they
dvanced, as follows, for the prin-
grains in bushels:

PARED WITH NOVEMBER ESTIMATE.

	Est. Nov. 1.	Final Dec. 1.	Change.
	2,910,250,000	2,917,450,000	+ 7,200,000
g.	715,301,000	731,636,000	+16,335,000
r.	203,170,000	209,351,000	+ 6,181,000
	918,471,000	940,987,000	+22,516,000
	1,219,521,000	1,248,310,000	+28,789,000
	198,298,000	165,719,000	—32,579,000
	84,552,000	88,478,000	+ 3,926,000
t	20,120,000	16,301,000	— 3,819,000
d	9,450,000	8,919,000	— 531,000

IVE PRINCIPAL GRAIN CROPS.

following totals for the five prin-
rain crops, wheat, corn, oats, bar-
l rye, compare:

	Acres.	Yield, bus.	Value.
	232,101,000	5,360,944,000	7,177,819,000
	224,127,000	5,309,493,000	6,761,366,000
	218,622,000	5,569,320,000	6,808,529,000
v.	211,330,000	5,120,483,000	4,055,315,000

The Cotton Report.

The Bureau of Crop Estimates estimates the total production of cotton in the United States for the season 1919-20 will amount to 5,275,096,000 lbs., equivalent to 11,030,000 bales of 500 lbs. Total production in 1918 was 12,040,532 bales (gross); in 1917, 11,302,375; in 1916, 11,449,930; in 1915, 11,191,820; in 1914, 16,134,930; in 1913, 14,156,486; and in 1912, 13,703,421.

The average weight per running bale is estimated at 500.2 pounds gross, compared with 505.6 pounds in 1918 (as reported by the Bureau of the Census), 502.4 pounds in 1917, 503.8 pounds in 1916, and 506.3 pounds, the average of the preceding five years. Reports of the Bureau of Crop Estimates do not include "linters," which are a product obtained at mills from the seed. The Census Bureau reports that 929,516 bales of 500 pounds gross were delinted from the 1918 crop, equal to 7.7 per cent as many as bales of lint cotton produced, which compares with 10.0 per cent, the ratio for the 1917 crop, 11.6 per cent for the 1916 crop, and 5.1 per cent, the average for the preceding five years.

The price per pound of lint cotton to producers December 1, 1919, was 35.7 cents, compared with a December 1 price of 27.6 cents in 1918, 27.7 cents in 1917, 19.6 cents in 1916, 11.3 cents in 1915, 6.8 cents in 1914, 12.2 cents in 1913, and 11.9 cents in 1912.

The estimated production, with comparisons, by states, follows:

State.	Lbs. lint. 1919.	Bales, gr. 1919.	Price lb. Dec. 1, 1919.	Price lb. Dec. 1, 1918.

Condition of Wheat and Rye.

The Bureau of Crop Estimates on Dec. 15 published an estimate of the condition and acreage of winter wheat and rye for the crop of 1920. There was a reduction of 23.2% in the acreage of the 1919 crop of wheat and 23.5% in the acreage of rye. The suggested bushelage is 629 millions of wheat and 90 of rye. Details by state follow:

The Letter Box

Installed Scale and Motor.

Price Current-Grain Reporter: We have just installed a new 10-ton Fairbanks auto-truck scale; also a 7½ h. p. Century motor.—*A. J. Mabie & Son, Gilbert, Ia.*

Seed Trade Good.

Price Current-Grain Reporter: The seed and grain business here is good at this time and I find a ready market for all clover and timothy seed.—*H. I. Davie, Pine River, Minn.*

More Cars Needed.

Price Current-Grain Reporter: We think it is of vital importance that the grain trade should secure cars to move the grain. We have just finished making some repairs; have a new office which has been refitted and we had a big opening Dec. 1.—*Farmers Elevator Co., Grinnell, Ia.*

Corn Crop Short.

Price-Current-Grain Reporter: Eighty per cent of the wheat is out of the farmers' hands and the corn crop was not of the largest; fine quality, but not enough to supply the demand as there are a great many cattle being fed this winter.—*Farmers Elevator Co., Howe, Nebr.*

Taken Over a Business.

Price Current-Grain Reporter: We have recently taken over the elevator of A. H. Thomas at Montezuma, Ia., and will operate in connection with same a branch office. Expect to have the office in operation within the next ten days. —*W. H. Bartz & Co., Inc., Des Moines, Iowa.*

Burned Out.

Price Current-Grain Reporter: We wish you would send us another copy of the last issue as our buildings were destroyed by fire, Saturday, Dec. 6, and this was lost with everything else. We saved nothing.—*C. E. Brush & Son, Moriah, N. Y.*

Will Make Repairs.

Price Current-Grain Reporter: We think one of the most vital things confronting the grain trade at the present time is the car shortage. We expect to make some repairs early in the spring and will have an ear corn chain drag and sheller for sale. We expect to soon purchase a dump.—*Bourse Grain & Lumber Co., Dedham, Ia.*

Crops in Texas.

Price Current-Grain Reporter: Texas made a splendid hay and corn crop this year; best for six or eight years past. The cotton crop was very, very short and badly damaged.

A great deal of rain has fallen in Texas this year. We believe there will be a big acreage in oats; but farmers are needing dry weather for winter plowing.—*The Wm. G. Bell Brokerage Co., Austin, Tex.*

Eastern Oats Movement.

Price Current-Grain Reporter: The moderate arrivals of oats, 288,000 bus. for the week, were due in part to the inability of the railroads to transport freely on account of the coal strike. As purchases for shipment during this period were greatly curtailed, it is unlikely that the receipts during the balance of the month will be very large. There were reports of export business, which lacked confirmation, and it is believed that the condition of the foreign exchange market will not admit of new business. The domestic demand locally has improved by reason of dealers being compelled to replenish supplies from the spot. This has tended to increase premiums moderately through the gradual absorption of offerings, and the attitude of holders, which has been one of firmness. The outlook suggests a continuance of the present cash demand with a fair prospect that spot premiums will still further advance in the near future.—*L. W. Forbell & Co., New York.*

Railroad Service.

Price Current-Grain Reporter: Some close observers believe that Uncle Sam's people come nearer understanding one another and are more willing now to give and take in order to promote the good of all than at any time since the armistice was signed.

The railroads so far on this crop have given excellent service in the movement of new corn to destination after it was loaded. The great trouble has been and probably will be for some time to come that cars suitable for loading grain are not to be had in any considerable numbers.

Many think that the largest movement of corn to market will be in January next, after the railroads have recovered from the coal strike and when the farmers can sell without being liable to an income tax on two crops in one year. The mills that consume corn largely will mostly be in operation within the next ten days and it will then be a race between Larger Receipts and Greater Consumption to see which affects the price most.—*H. I. Baldwin & Co., Decatur, Ill.*

COMING CONVENTIONS.

Jan. 13, 14, 15, 16.—Farmer Grain Dealers' Ass'n of South Dakota, at Aberdeen.

Feb. 10, 11, 12.—Farmers' Grain Dealers' Ass'n of Illinois, at Peoria.

June 22-24.—American Seed Trade Ass'n, Milwaukee, Wis.

July—Michigan Hay & Grain Ass'n, Battle Creek, Mich.

ARGENTINE VOTES EUROPE CREDIT.

On Dec. 11 a bill granting a credit of 200,000,000 pesos to Great Britain, France and Italy to facilitate the purchase of Argentine products was reported to the Chamber of Deputies by the finance committee, the report being approved by a vote of 37 to 36. The credit will be guaranteed by deposit of the 60,000,000 gold pesos in the Bank of the Argentine Nation. The measure now goes to the senate.

Oats in Primary Markets.

Receipts of oats in eleven prin grain markets from Aug. 1, 1919, comparisons with 1918:

	1919-20.	1918-

COUNTRY GRAIN TRADE PROBLEMS

BY GEO. A. WELLS

ELEVATOR SITE LEASES.

the railroad company is charging for elevator and coal shed site s than 6 per cent on a fair valuaof the land thus occupied, as or- by the Iowa Board of Railroad mission, country grain dealers d protest against such increased l charge, and those located in Iowa, Dakota and Nebraska are invited fer the matter to the secretary of Western Grain Dealers' Ass'n, at Moines, who will advise in detail the order of the Iowa Board of oad Commissioners and as to the procedure in undertaking to esh a rental basis as ordered by the Board.

statute authorizing the Iowa of Railroad Commissioners to isuch an order was enacted under a repared and presented to the Iowa al Assembly of 1913 by the Legis- Committee of the Western Grain rs' Ass'n. It provides that whendisagreement arises between the of an elevator grain warehouse oal shed and the railroad company terms and conditions of such on written application to the of Railroad Commissioners the is authorized and it is made their to hear and determine such consy and make such order in refthereto as shall be just and right en the parties, which said order be enforced by the commission. Dec. 3d issue of PRICE CURRENT-REPORTER for full report of the ission.)

IPERS' LOADING WEIGHTS.

country grain dealer who oper- an elevator without adequate ing facilities to determine accuand beyond question the amount of a carload shortage is out of luck in undertaking to collect claims for loss of grain in transit, and every country elevator should include as part of its equipment a first-class shipping scale installed in such a manner that there can be no question whether or not the grain has all been delivered from scale to car. And the scale must be kept in good weighing condition and the weighing done by a competent weigher. If this is done there will be no difficulty whatever in collecting claims for loss of grain in transit if destination weights are likewise accurate. The Interstate Commerce Commission will, no doubt, make a final ruling soon in the Loss and Damage Case, Packet No. 9009, that will make such weighing conditions necessary if claims are to be entertained by the railroad claim departments.

TIME FOR FILING CLAIMS.

It will sooner or later be decided by the Interstate Commerce Commission whether or not railroad claims for loss and damage are to be invalid if not paid by the carrier within the time limit of two years and a day as provided in the bill of lading conditions. In the meantime, grain dealers having unpaid claims should take such steps as may be necessary to keep them valid. This is one of the most arbitrary and unreasonable conditions ever imposed upon shippers by the carriers. Many claims are held up by the claim departments simply through neglect or by parleying until the two-year and a day limit has been passed. The writer has a claim on his desk at this time which the representative of the railroad claim department personally approved, yet it was allowed to pass the time limit without payment and now the claim department of that railroad refuses to pay the claim.

GRAIN LOADING RULE.

The United States Railroad Administration on Oct. 29 authorized the publication, effective upon five days' notice, of the following minimum weights on grain:

On grain, all kinds, minimum weight marked capacity of car, except where marked capacity is less than 40,000 pounds a car.

Note.—When grain is loaded at a point of origin to within 24 inches of roof at side walls of car for the purpose of Federal or state inspection, or for inspection by grain exchanges at points where Federal inspection is maintained (notations to that effect being inserted in the bill of lading by shippers) or when grain is loaded to proper grain line of cars so marked, actual weight will apply.

H. L. Goeman, chairman of the transportation committee of the Grain Dealers' National Ass'n, who was instrumental in having this rule promulgated by the Railroad Administration. had in mind the idea that such a rule would give an opportunity to make a thorough inspection of the country shippers' grain on the arrival of cars at the terminal market inspection tracks, and that it would not be necessary to mark certificates of inspection "Loaded too full for thorough inspection," as has been done so generally by terminal market inspectors.

R. T. Miles of the Bureau of Markets states in a circular to Federal grain inspection supervisors that his office has recently completed a survey of all the principal markets in the country with a view of ascertaining what percentage of grain receipts have in fact been covered by the inspection certificates marked "heavily loaded car," which means that such cars are loaded too full for thorough inspection and are then subject to reinspection if called for when unloaded. The results of the survey, according to Mr. Miles' statement, indicates that in many markets inspectors have exercised too freely the privilege of issuing such "heavily loaded car" certificates. Mr. Goeman urges that country shippers give this matter particular attention and when loading grain insist on having 24 inches clear between top of grain and the roof at side walls of car after the grain in the car has been leveled off and trimmed. Shippers should then be particular to write on the bills of lading "Car loaded to within 24 inches of roof at side walls for purpose of inspection on arrival."

The fact is that country shippers are having the benefit of inspection on a very small percentage of their grain shipments to markets where cars are placed on inspection tracks on arrival for the purpose of inspection, and at the same time are paying the regular fee for such service on all cars. Cars "loaded too full for thorough inspection" are sampled at the door and the grain if consigned is sold accordingly; if the car is sold to arrive, the buyer has the advantage of the privilege to reject or call for reinspection if not up to grade as sampled, and if otherwise the shipper is not represented and is not in a position to ask for reinspection when being unloaded. It is exceedingly important that grain be loaded into cars uniformly as to quality, making certain that the quality of the grain at the car door where the sample is taken be fairly representative of the whole car. Do not plug the car as that deprives the shipper of the benefit of all rules.

LaSalle St., Chicago, Ill.

News of the Terminal Markets

CAIRO, ILL.

John Travis, Correspondent.

Corn receipts are increasing and the condition is improving. Shipments of both corn and oats have been light, due to the shortage of cars.

Receipts of oats the past week have been light. Illinois oats have been sold more freely than for some time past owing to the advance in prices.

Elevators have been running half time, due to the coal shortage. Some relief is promised for the early part of next week. One elevator firm purchased a car direct from the mines at Harrisburg today and it is reported that the mines are running with full crews.

OMAHA.

Leigh Leslie, Correspondent.

The Vanderslice-Lynds Grain Co., whose business here is managed by "Bill" Young, has opened a private wire office in this market.

Nebraska wheat fields went under snow cover early this season. The whole state is covered with snow ranging all the way from several inches to a foot or more deep.

A car of No. 1 dark northern spring wheat was sold on the floor of the Omaha Grain Exchange for $3.30 Friday—the highest price on the crop. The wheat was sold by E. E. Huntley to Cope & Kearney.

There has been a moderate run of wheat to this market in the last week with light arrivals of corn and oats and other grains. The demand for everything on the spot list has been easily sufficient to absorb the offerings at the prevailing high prices.

A despatch from Lincoln says: "While 30,000 bushels of wheat have been lying in piles and open bins at Stratton, Nebr., the Burlington has only furnished eight cars in the last two months to move grain from this station. Stratton has protested to the State Railway Commission against this condition of affairs.

NASHVILLE.

John Leiper, Correspondent.

Receipts of grain at Nashville last week totaled 111 cars. Stocks at the end of the week were as follows: Flour, 36,500 bbls, decrease of 5,600; wheat, 623,000 bus., decrease of 3,000; corn, 31,500 bus., increase of 17,500; oats, 308,300, decrease of 85,700.

Demand for corn meal continues quiet. Southeastern corn mills, with capacity of 114,000 bus., had cutput last week of 13,830 bus., or 12.1 per cent of capacity, which compared with 12.9 per cent the preceding week. Prices: Bolted meal, sacked, per 100 lbs., f. o. b. Ohio River points, $3.40@3.50; unbolted, $3.30@3.40.

Wheat continues very strong, with mills relying on the Grain Corporation to furnish their supplies from Chicago. Corn continues in light supply and fair demand. Oats are firm and in fair demand. Shortage of cars has curtailed movement. Quotations: Wheat—No. 2 red, $2.50. Corn—No. 2 white, $1.65@1.68; No. 3 white, $1.62@1.65. Oats—No. 2 white, 89@90c; No. 3 white, 88½@89c; No. 3 mixed, 87½@88½c.

The main mill building of the Columbia (Tenn.) Mill & Elevator Co. was destroyed by fire last week, with loss of about $85,000, and insurance of $50,000. The flour warehouse and other buildings were saved. The plant has been in operation about 30 years, and had built up splendid business and reputation in this territory. The capacity was 600 bbls. daily. The company is considering plans for rebuilding.

NEW YORK.

J. M. Nugent, Correspondent.

During the past week the following gentlemen visited the floor of the New York Produce Exchange: M. Plard, of Chicago; W. S. Nacholson, of Chicago; J. D. Hardin, of New Orleans; J. Carroll Fahey, of Baltimore; E. Brockdorff, of London, and T. G. Roddick, of Liverpool.

Toward the close of the week the domestic demand for oats was a trifle better. Export inquiry, however, remains quiet and is not expected to show much improvement until some adjustment of the foreign exchange situation has been effected. Quotations follow: No. 1 white, 90c; No. 2 white, 89½c; No. 3 white, 88c, and No. 4 white, 87c.

A leading commission house here is arranging to bring a substantial amount of Argentine flour to America in the near future in order to give consumers an opportunity to test it out as to its adaptability. The flour is said to compare favorably with Kansas hard wheat grades, and is expected to sell at possibly $2 per barrel under American flours.

Trade in cash corn here during the week was not very active, but the demand at the close of the period shows signs of reviving, although the inquiry was not brisk. No. 2 yellow was quoted at $1.69¼; No. 3 yellow, $1.63¼; No. 4 yellow, $1.59¼, and No. 2 mixed, $1.61¼ all for five days shipment; while new No. 3 yellow was quoted at $1.62¾ for ten days shipment and new No. 3 yellow $1.59¼ for all December shipment.

Jefferson D. Hardin, Jr.
Foreign Grain Freights
Grain Forwarding
NEW ORLEANS, LA.

DES MOINES, IA.

A. J. Cheeseman, Correspondent.

Receipts past week: Corn, 77 cars; oats, 13 cars; spring wheat, 3 cars. Corn demand the past week good. No. 4 yellow, $1.37@1.38; No. 5 yellow, $1.36. Oats demand fair. No. 3 white, 77c.

Visitors the past week were: Mr. Murphy, of Murphy & Grier, Peoria; C. L. Gifford, of the Clark Brown Co. at Fernald, Ia.; W. H. Moore, of Bruce Grain Co., St. Joseph, Mo.; F. Manning, Granger, Ia., and J. E. Swedeborg, Boxholm, Ia.

The car situation has not improved. Severe weather, with badly drifted roads preventing farmers from marketing. Country elevator men advise, however, that the roads should become fairly passable within the next few days, to permit a good movement before Christmas.

There was a hearing before the Interstate Commerce Commission at Des Moines on Dec. 8th, 9th and 10th, in which E. G. Wylie, Freight Commissioner of the Greater Des Moines Committee, on behalf of the Des Moines Board of Trade, presented its case, asking that Des Moines be granted a proportional rate on grain, of five cents per 100 lbs. less than the proportional rate of 15 cents now in effect from Omaha and other Missouri River points to Chicago, Peoria and Milwaukee. Also that Des Moines be granted a rate of 6½c proportional rate on grain to the Upper Mississippi River crossings as against the present rate of 13½c. Railroads represented were the C. & N. W. Ry., C., B. & Q., C., M. & St. P., C., R. I. & P. and the Wabash. Representatives from the Boards of Trade at Chicago, Milwaukee, Omaha and Kansas City were also in attendance.

DETROIT.

John Barr, Correspondent.

Trading in barley is slow and the market is quoted steady at $2.80@2.90 per cwt. for cash No. 3.

F. M. Gorman, formerly with K. P. Kimball in the bean business here, has gone in on his own account and now trades in beans, grain and hay.

Wheat is dull and firm at an advance of 2c. Millers are fair buyers, but the advance was on bidding by shippers. Quote: No. 1 red, $2.40; No. 1 mixed, $2.38; No. 1 white, $2.38.

Oats advanced to 86c for No. 2 white owing to small receipts, but later the buying slackened up and there was a drop to 85c, the close being ½c under that of last week. No. 3 white, 84c; No. 4 white, 83c.

Charles A. Cullen, formerly with the Isbell Bean Company, has bought out the Lewellyn Bean Company's Detroit business and will conduct a general brokerage business, handling beans and other commodities.

Beans were active during the early part of the week and a firm market was quoted. At the finish buyers were not so anxious to load up and an easier tone was quoted. Prices did not change at $7 for spot and $7.10 for January per cwt.

Rye was in demand here up to Friday, when the bottom fell out of the deal. There had been an advance of 5c owing to export buying, but 4c of this was lost when activity left the buying side. The situation changed again Saturday. Shippers were in the market and an advance of 3c resulted, making the close $1.62 bid for No. 2.

The corn market is lifeless. A large share of the trade here is in supplying this grain to Canada, largely for feeding purposes. At present the rate of exchange is so much against Canadian money that it constitutes an advance of 20c per bushel to the Canadian buyer. This is enough to shut off that trade, which makes business very dull here. The tone is easy. Quote: No. 3 mixed, $1.50; No. 3 yellow, $1.52; No. 4 yellow, $1.48; No. 5 yellow, $1.44; No. 6 yellow, $1.40.

TOLEDO.

Carl Bryant, Correspondent.

Frank I. King, head of C. A. King & Co., was on 'Change this week, having returned from a visit at Baltimore.

H. W. Doughten, of H. W. Doughten, Inc., seed dealers, New York, was in the Toledo seed pit last week.

Produce Exchange members voted to adjourn at noon, effective Dec. 11, "until coal restrictions are modified and normal fuel conditions are restored."

Emil Hertz and wife, of Copenhagen, Denmark, were visitors on the Toledo Produce Exchange last week, the guests of C. S. Burge, of the S. W. Flower Co. Mr. Hertz is a large seed dealer in the Danish metropolis.

Following were visitors at the office of J. F. Zahm & Co. last week: Earl Keeler, of the Haskins Farmers' Elevator, Haskins, O.; Fred. Smith, of the Fostoria Milling Co., Fostoria, O.; Mr. Humphrey, of Colton Bros. & Co., Bellefontaine, O.

Members of the Toledo trade attended a large meeting of the Farmers' Co-operative Elevator Assn. at Bowling Green, O., Monday evening. Many of the Toledo dealers gave short, impromptu talks on the new minimum weights, car situation, etc. Those present included Harry De Vore, Bill Cummings, George Woodman, Charles Keilholtz, Joe Streicher, John Luscombe, Paul Barnes, Oliver Randolph, Lester Howard, George Eicher and Carl Bryant.

Cash Markets.

There is a scarcity here for all grains. Denmand is particularly brisk for spot wheat, corn and oats. Handsome premiums are being paid for wheat, No. 2 red selling at $2.43; No. 3 red, $2.40, etc. A car of No. 3 dark northern spring sold at $3.10, basis 23c rate to New York. These figures are over the Grain Corporation asking price, $2.39½. Out of 725,000 bus. of Government owned wheat stored here only 70,000 bus. remain, which is soft red wheat. Supplies of hard winter have been exhausted. Although farmers are said to be satisfied with the price, corn arrivals are way below requirements. Lack of cars is holding the grain back and receipts this week are expected to increase. No. 4 yellow sold during the week at $1.42½@1.46; No. 5 yellow, $1.40@1.42½; No. 6 yellow, $1.34@1.37½. Oats receipts continue light. No. 2 white brought 81½c to 83¾c during the week. Rye is higher, No. 2 selling at $1.63. Barley dull, with receipts light and demand nil. The week's receipts: Wheat, 34 cars; corn, 55; oats, 22; rye, 16; barley, 1.

INDIANAPOLIS, IND.

Myron R. Green, Correspondent.

The Gleason Feed Store, of Auburn, Ind., was destroyed by fire, the loss being estimated at $5,000. The flames threatened the business district of the town for a while.

The Farmers' Co-operative Elevator Co. of Salem, Ind., incorporated with a capital stock of $30,000. Directors are Charles H. Guthrie, W. J. Clarke and C. W. Heston.

On December 11th Indianapolis flour mills and grain elevators were paying $2.25 for No. 1 red wheat, $2.22 for No. 2 red, $2.19 for No. 3 red and other grades on their merits.

Reports from each county in the state show that every field of early sown wheat is infected with the Hessian fly. The later sown wheat has made good growth and has stooled well, but to some extent the fly is found in it also.

The Indiana Millers' Assn. will hold its mid-winter meeting at the Board of Trade Building in this city on January 16, beginning at 10 a. m. An excellent program has been provided by the secretary of the organization, Charles B. Riley.

The annual meeting of the Indiana Grain Dealers' Association will be held at the Board of Trade Building here, January 15, beginning at 10 a. m. A banquet and other entertainments will be provided for the evening. The program will be of profit and interest to all grain dealers.

The Anderson Retail Grocers' Association, Anderson, Ind., announced that they are in favor of a 15-cent loaf of bread to take the place of the present 10-cent loaf. Members of the organization say that the bakers have raised the price from 8 to 9 cents and that there is not enough margin in the present loaf.

Among the out-of-town members of the milling and Grain Dealers' Association in this city last week were: P. E. Goodrich, Winchester, Ind.; J. G. Morrow, Wabash, Ind.; Bennett Taylor, Lafayette, Ind.; H. W. Reiman, Shelbyville, Ind.; Elmer Hutchison, Arlington, Ind.; E. K. Sowast, Middletown; George W. Rohm, Rochville, Ind.; G. G. Davis, Tipton, and Leonard Clarke, Rushville, Ind.

MEMPHIS.

George Williamson, Correspondent.

Business continues quiet, but the feeling prevails that it is only a matter of a short while before the country will be compelled to buy more freely. It is notable that the mixed feed manufacturers are all placing orders for future delivery of stuff, presumably against liberal sales of their product.

A. T. Potter, representing the Quaker Oats Co., and W. M. Kallasch, of the Leonard Construction Co., both of Chicago, have been here during the past few days to complete arrangements for starting work at once on the mixed feed and cereal plant of the company on the site purchased some time ago. In a short time not less than 300 men will be engaged on the work and already switches are being built for handling materials. Storage bins for at least 250,000 bushels of grain are to be built first, with tanks for molasses to follow. It is expected to be turning out feeds by spring.

J. B. McGinnis, hay and grain traffic commissioner of the Merchants' Exchange,

UNION TRUST COMPANY
CHICAGO
A BANK OF STRENGTH AND CHARACTER

THE B/L BANK OF CHICAGO

With the prospects of bumper crops, the strain of financing on the banks of the country is greater than ever before.

We solicit inquiries regarding facilities for IMMEDIATE CREDIT and DIRECT COLLECTION at MINIMUM COST of Bill of Lading items on all receiving points in the United States and Canada.

Such an arrangement provides the simplest and most convenient, as well as economical, method of crop financing.

UNION TRUST COMPANY CHICAGO

ures as low as 20 degrees below recorded in parts of Kansas on d 9th of December, when the was visited by the coldest the year. Northwestern Kansas had the severest cold, and the zero mark was reached in all parts of the state, as well as in most counties in Missouri. The low point in Kansas City was 5 below. Fortunately, the wave was preceded by snow, and was followed by a sharp rise in temperature. Another drop in the mercury followed at the end of the week, but it was less than the first. Thus far there have been no complaints as to crop conditions and very little as to live stock.

The Kansas City Board of Trade will go into the new year with, at least, three more members than it ever had before. Within the last month three treasury certificates have been sold at $15,000 each, and the new members will increase the board's total to 203. William B. Young, of the Vanderslice-Lynds Co., for several years manager of the Omaha office of the firm, is the latest applicant. Mr. Young went from here to Omaha, and he intends to return and act as a floor salesman for the company. J. P. Glandon will manage the Omaha office hereafter. Carroll C. Ragan, of the Ragan Grain Co., was the second applicant for a treasury membership, and Joseph Whyte, of Omaha, was the first. Mr. Whyte was elected this week. He will head the Smith-Whyte Grain Co. here.

Cash Grain Markets.

Wheat—Receipts for the week, 1,270 cars, against 1,163 a week ago and 514 a year ago. Trade was featured by a continued active demand for the dark and choice grades of hard and the better qualities of red, with shippers the principal buyers. Demand came not only from the East and the Northwest, but from mills in the interior of Kansas. The latter were buyers of medium qualities for mixture with their own wheat in filling immense flour orders booked some time ago. Local millers reported new flour business rather light, but they operated heavily on old orders. Elevator men here were glad to see a relaxation of fuel restriction following the settlement of the coal strike, but they reported cars still scarce. The United States Grain Corporation made rather slow progress in loading out stocks on allotments to mills, as care had to be divided with other shippers. Since the recent allotment of about 6,500,000 bus., the corporation has loaded out a little more than 600,000 bus. Although the best quality of No. 1 hard sold as high as $2.95 during the week, and red at $2.54, these prices looked cheap in comparison with No. 1 dark northern spring in Minneapolis, which reached $3.35 at one time. The feeling at the close was easier, as it was reported that a discount of 8c to 10c on Canadian exchange would favor imports of wheat from Canada into the United States. Final prices of hard wheat here were 3c to 15c higher, with No. 1 at $2.60@2.95, No. 2 at $2.55@2.95, and No. 3 at $2.50@2.85. Red wheat ended with net gains of 4c to 8c, at $2.52@2.54 for No. 1, $2.49@2.50 for No. 2 and $2.45@2.48 for No. 3. Stocks of wheat decreased 94,000 bus., to 14,152,000 bus., against 14,349,000 a year ago.

Corn—Receipts, 250 cars, against 167 a week ago and 251 a year ago. The market presented a strong front in the early part of the week, during the coldest weather of the year thus far and before the complete settlement of the coal strike. Later the situation as to weather and fuel improved, and corn felt the effect of larger receipts and freer country offerings to arrive. On Saturday it was reported that fair-sized purchases had been made in Iowa for the ten days' shipment. Big receipts were expected before the end of the month if weather and transportation conditions permit. There was fair buying here by local chop mills and outside feeders, but no strictly southern business was reported. The corn meal mills in Kansas City had a light trade, as their product is being undersold in the South by millers in southeastern Missouri. Some dealers in Nebraska are said to have protected their corn sales for later delivery by going long on Kansas City December. Closing prices here were not equal to the best level of the week. Mixed was 1c to 6c higher, at $1.52 @1.54 for No. 2 and $1.50@1.53 for No. 3. White of the No. 2 grade closed at $1.52@ 1.54, or 1@2c higher, while No. 3 was unchanged to 1c lower, at $1.47@1.50. Yellow corn ended unchanged to 1c lower, with No. 2 at $1.52@1.54 and No. 3 at $1.50@1.52. Stocks increased 3,000 bus., to 25,000 bus., against 182,000 last year.

Oats—Receipts, 69 cars, against 76 a week ago and 46 a year ago. An active trade was carried on for both local and shipping accounts, the latter mostly southward. Prices closed generally 2@4c higher, with No. 2 white at 80½@81c, No. 3 at 80@81c, No. 2 mixed at 79@80c, No. 3 at 77@78c, No. 2 red at 80@81c and No. 3 at 80c. Elevator men reported a decrease of 14,000 bus. in stocks, leaving 1,027,000 bus. in store, against 2,221,000 a year ago. All who accepted oats on December delivery have been able to resell at a profit.

Kafir and Milo—Receipts, 12 cars, against 7 a week ago and 35 a year ago. Advices indicated the readiness of producers to ship large quantities, but the adverse weather and the shortage of cars were detrimental to the movement. Some purchases made 30 days ago have not materialized. However, the belief is strong that the market is at the threshold of liberal supplies, and it is doubtful if present high prices can be maintained in such an event. Demand is urgent, but for limited amounts, suggesting caution on the part of buyers. For the week kafir shows prices unchanged

to 8c lower, while milo is unchanged to 5c down. No. 2 white kafir and No. 2 milo finished at $3@3.05 per cwt.; No. 3 at $2.92 @2.95. Stocks here were unchanged, at 2,000 bus., against 18,000 a year ago.

DULUTH.

S. J. Schulte, Correspondent.

Application has been made for the transfer of the Duluth Board of Trade membership of John A. Todd to Harry J. Crofton, of New York. Mr. Todd's membership was dated 1894, but he has not been actively in the market for nearly two years.

Rye was an active feature on this market during the last week. Good bidding for that grain developed and bullish sentiment was held along by the high premiums paid for spring wheat. Some rye was sold for eastern shipment at the opening of the navigation season. Spot No. 2 rye closed 1¾c up at $1.64⅞.

The elevator men and operators on this market were compelled to put up with some restrictions during the last week as a result of rules imposed by the fuel administration. The market session closed each day at noon in place of 1:15 p. m., in line with Minneapolis and Chicago. It is assumed that the bars will be let down next week and that conditions will become more normal. The hours of operating the elevators were also curtailed.

The Board of Trade's traffic commission is keeping a close tab on developments in the freight rates situation and the basis of differentials from the various points with a view to this market being placed in as favorable a position as possible to cater for business from over the territory next season when marketing conditions are due to get back on a more normal basis. The Duluth board's arugments are now in the hands of the Interstate Commerce Commission in the lake and rail case and a decision is hoped in due course.

Grain men and the elevator interests on this market reiterate the statement that the present season has up to date been the dullest that they have experienced in more than 25 years. Arrivals of all grains on track have been running at as low as 30 cars daily since the close of the lake navigation season. Operators have, however, been receiving advices from their country correspondents to the effect that considerable grain is being held in interior elevators and that it will be moved to the terminals as soon as cars are available.

Encouraging reports are being received by cash handlers from the country to the effect that a normal acreage will be seeded to spring wheat over the Northwest next spring, provided weather conditions are favorable. The abundant rains of last fall and the heavy snowfalls so far this winter are regarded as having placed the soil in splendid condition as regards moisture.

Stocks in the elevators here at the end of last week were at the lowest notch for the season in years, amounting to 6,147,000 bus. of all grains. Wheat supplies aggregated 2,575,000 bus., of which 2,225,000 bus. were durum.

LOUISVILLE, KY.

A. W. Williams, Correspondent.

Oats are in very fair demand, with receipts light and the general market strong. No. 2 white are quoted at 85½c, with No. 5 at 85c.

Shortage of cars, heavy rains and bad roads are resulting in country hauling being light, and movements to larger markets are generally light, which is resulting in a stronger market on oats and hay.

S. Thurston Ballard, president of the Ballard & Ballard Co., Louisville, attended the inauguration at Frankfort, Ky., on Tuesday, and took a very active part, as he was installed as Lieutenant Governor of the state.

Farmers have been working day and night in the bottoms of the lower Ohio, Green and other rivers in their efforts to get their corn out. One of the highest December stages of many years is recorded, and traffic over many southern lines has been disrupted.

W. A. Thomson, grain dealer of Louisville, lost a $50,000 breach of contract suit in the Municipal Court, Chicago, last week before Judge Williams, against the Chicago Board of Trade and Thompson & McKinnon, but states that it will be carried before the Illinois Supreme Court.

Demand for corn is rather light as a whole, although the mills are running full and are buying a good deal of white corn. Farmers are shipping yellow corn more freely, as it is dryer than white. Yellow shipments will slow down in thirty days, and white will begin moving more freely.

All fuel regulations have been withdrawn in the Southeast for the time being and everyone can run wide open if they can secure fuel. Announcement to that effect was made on Friday night at Atlanta headquarters. This affords full time operations to a number of feed manufacturers who had been regulated to forty-eight hours.

The wheat market is wild and is carrying the flour market up with it. No. 2 soft winter red wheat is quoted at $2.60 delivered Louisville, on a $2.53 St. Louis market. Farmers are holding, and claim they want $3 a bushel, while some dealers believe the price will go at least twenty-five cents a bushel higher. Flour has advanced $1.25 a barrel inside of six weeks. The Kentucky High Cost Commission has attacked the last fifty cents per barrel advance in flour, on the ground that the Government is selling flour considerably less. However, the commission is not aware of the rise in the wheat market. The high price of wheat is due to an abnormal demand from flour jobbers, and heavy buying of winter wheat in the Northeast to eke out the short spring wheat supply.

BUFFALO.

E. Bangasser, Correspondent.

Navigation is about closed, only a few more boats expected from the head of the lakes with grain.

Potatoes are selling here at $2@2.10 per bushel for fancy stock, and beans which were expected to get down to a reasonable figure are advancing. 'Squire Ryley has a big crop of fine spuds, also beans on his Castle Hill farm, and intends to hold until he gets his price. He usually wins.

Buyers wanted oats and with receipts light the market was kept cleaned up daily. The opening was strong and a steady advance followed, closing at 2¾c higher than last week. Little attention was paid to the option, the mills being only too anxious to get supplied on days when offerings were very light. In the absence of track oats, buyers took some store offerings and paid good prices. Closing: No. 1 white, 88½c; No. 2 white, 88c; No. 3 white, 87c; No. 4 white, 86c on track. through billed.

Track receipts for the week: Wheat—No. 2 red, 1 car; No. 5 red, 2 cars; No. 2 soft white, 2 cars; No. 3 soft white, 4 cars: No. 2 mixed, 10 cars; No. 3 mixed, 6 cars; No. 5 mixed, 2 cars; No. 2 hard, 22 cars; No. 3 hard, 16 cars; No. 4 hard, 25 cars; No. 5 hard, 5 cars; No. 1 Northern, 2 cars; No. 2 Northern, 3 cars; No. 3 Northern, 6 cars; No. 4 Northern, 7 cars; No. 5 Northern, 6 cars; No. 1 dark Northern, 3 cars; No. 2 dark Northern, 2 cars; No. 3 dark Northern, 5 cars; No. 4 dark Northern, 1 car. Corn—No. 1 yellow, 2 cars; No. 2 yellow, 22 cars; No. 3 yellow, 64 cars: No. 4 yellow, 84 cars; No. 5 yellow, 52 cars; No. 6 yellow, 11 cars; sample, 5 cars; No. 2 mixed, 2 cars; No. 3 mixed, 3 cars; No. 4 mixed, 5 cars; No. 5 mixed, 6 cars; No. 2 white, 1 car; No. 3 white, 2 cars; ear corn, 1 car. Oats—No. 1 white, 12 cars; No. 2 white, 30 cars; No. 3 white, 15 cars; No. 4 white, 4 cars; sample, 1 car. Barley—23 cars. Rye—4 cars. Buckwheat—4 cars.

Corn started in steady with a fair demand, but about the middle of the week began to weaken, and by the close there was a decline of 7@8c from the opening prices. The mills here had corn coming bought for shipment, and it was very difficult to get buyers interested, particularly on the lower grades. Mixed corn was especially dull. The general feeling at the close was that this market was a little low, but receivers were not inclined to hold the soft stuff. Few cars of No. 1 or No. 2 yellow offered. Closing: No. 1 yellow, $1.58; No. 2 yellow, $1.55; No. 3 yellow, $1.53; No. 4 yellow, $1.49; No. 5 yellow, $1.44; No. 6 yellow, $1.37 on track; No. 2 mixed sold at $1.55 and No. 3 mixed $1.53.

Rye was wanted and following the other markets advanced to $1.70 for No. 2, but dropped off to $1.65 and nobody wanted it. There were no offerings on track at the close.

Wheat was very scarce and millers wanted any good milling wheat. It was impossible to say wheat could be obtained for track receipts of red or white winter, but dealers would certainly have asked enough.

PHILADELPHIA.

Geo. A. Rudderow, Correspondent.

Exports for the week ending December 12 were 615,390 bushels of wheat and 17,107 bushels of barley.

The United States Grain Corporation, in a notice to A. B. Clemmer, secretary of the Commercial Exchange, to advise the trades that the corporation has purchased this week about 6,000 barrels of straight flour at an average price of $10.29 per barrel.

Receipts of flour and grain for the week ending December 13th were 200 barrels and 5,194,705 pounds of flour in sacks, 138,546 bushels wheat; 15,686 bushels corn, 74,009 bushels oats, 15,470 bushels rye, 65,909 bushels barley, 5,000 bushels malt and 380 tons of feed.

The following is a list of cars unloaded at Port Richmond elevator during the month of November: Wheat, 713 cars; oats, 52; rye, 17; barley, 13; buckwheat, 1. Total, 796 cars. During the same time 117 cars were unloaded at Twentieth street elevator as follows: 102 cars oats, 8 cars corn, 5 cars buckwheat, 1 car peas, 1 car barley.

The association is incorporated with a capital of $100,000. It will operate under the Webb act and will try to take the place here of the Grain Corporation when that body goes out of existence. Fifty dealers have already joined. Its membership will consist of dealers in wheat, flour and other cereal products of Pennsylvania, New York, New Jersey, Delaware and Maryland.

The following out-of-town visitors were registered at the Commercial Exchange during the week: A. L. Goetzman, manager and secretary of the Listman Mills Company, Lacrosse, Wisconsin; Harvey S. Justice, of H. S. Justice & Co., Millers. Pedricktown, N. J.; W. J. Yeager, miller, Norfolk, Va.; A. R. Bell, representing grain, Lewistown, Pa.; J. G. Miller, grain dealer, interests in Boston, and E. A. English, of Pedricktown, N. J., and Charles C. Gorsuch, of N. J. Gorsuch & Sons Co., Westminster, Md.

C. Herbert Bell, president of the Commercial Exchange, appointed the following members to represent the Exchange at the funeral of Charles Robert Bean, on Thursday last: P. R. Markley, William B. Stiles, W. P. Brazer, F. M. Rosekranz and W. O. Fehling. In addition to these there was a large attendance of other members present at the obsequies. Mr. Bean was a member of the firm of H. W. Bean & Co., grain brokers, and died on Monday, December 8, after being struck by an automobile on the Northeast Boulevard.

The first meeting of the newly incorporated body known as the Pennsylvania Millers' Export Association was held in the Bourse Tuesday, December 9th, when the following officers were elected: President, Landis Leoan, Lancaster, Pa.; vice president, W. J. Yeager, Lewistown, Pa.; secretary and treasurer, Thomas J. Sharpless, of this city. The following directors were elected as follows: E. E. Reindollar, Tarrytown, Md.; George V. Dayton, Towonda, Pa.; H. C. Patterson, Saltsburg, Pa.; L. G. Bamford, Midway, Pa.; H. V. White, Bloomsburg, Pa.; Charles Z. Weiss, Avon, Pa.; Robert C. Miner, Wilkesbarre, Pa.; and E. C. Hutchinson, Trenton, N. J. The purpose of the organization is to meet the concentrated buying of flour by European nations.

CLEVELAND.

CINCINNATI.

George Mosbacker, Correspondent.

The local hay situation is very strong encouraging of heavy consignments. All descriptions reached new high record prices of the crop this week.

Will G. Stueve, member of the firm of Harry W. Brown & Co., was the first to receive $2.50 for a car of No. 2 red wheat weighing 58 pounds, the highest price of the season.

More than 31,000 pounds of bacon, seized by the County Prosecutor in a suit against the Butchers' Packing Co., were sold by the Chief Food Inspector at 26 cents per pound.

Rye was decidedly firmer this week, with good export inquiries and more disposition shown by rye flour millers to do a little forward buying. No. 2 was quoted at $1.62@1.63 at the close of the week.

The Chamber of Commerce Board of Directors discussed the contemplated amalgamation of the Grain and Hay Exchange, and the Chamber at a meeting this week, but no definite conclusion was reached.

Henry A. Wess, customs broker, has received orders that all Canadian hay arriving in Cincinnati must be immediately unloaded and the bales examined in an effort to stop the practice of transporting whisky concealed in the bales.

There is an urgent demand here for No. 2 dry ear corn from feeders who are practically out of supplies, or who have permitted their stocks to get abnormally low. No strong prices prevail. Only 12 cars were received during the week.

Condolences of the grain and hay trade are extended to Danny Kallaher, of the Costello Grain & Hay Co., who on Monday, December 6th, suffered the loss of his aged mother at the residence of her daughter, Mrs. William R. McQuillan, Price Hill.

William E. Ingles, Federal Grain Inspector, and daily attendant at the Grain and Hay Exchange, who succeeded W. H. Curtrey in the local Federal Grain Boards office, left Saturday to spend his annual vacation at his home in Baltimore, Md.

Ivy McLaughlin, member of the firm of J. B. Granger & Co., and Frank C. Baer, manager of the hay department of the firm, will leave early in January for an extended trip throughout Ohio, Indiana and Illinois in the interest of their grain and hay business.

Cash Markets.

Wheat.—The abnormal demand for flour reflected in wheat here the past week, prices for No. 2 red advanced 12c per bu over last week's closing quotations. Other grades also showed substantial gains, but the demand was confined more to good milling quality than the damaged grain. Only 7 cars grading No. 2 were received during the week. No. 1 red winter, track, $2.58@2.59; No. 2 red winter, track, $2.56@2.57; No. 3 red winter, track, $2.52@2.55; No. 4 red winter, track, $2.43@2.47; No. 5 red winter, track, $2.38@2.42; sample as to quality, $2@2.38. Smutty wheat discounted from 1 to 3c per bushel as to grade.

Corn.—The action of futures continued to affect local corn values throughout the week, but the market was fairly steady to about 3c lower for low grades. Receipts were small and nearly all of Nos. 5 and 6 grades, with transactions in top grades hardly worthy of mention. There were several fair-sized orders for export, supplied out of elevator, but buying generally was slow and limited to few firms. No. 1 white, $1.55@1.56; No. 2 white, $1.54@1.55; No. 3 white, $1.52@1.54; No. 4 white, $1.48@1.50; No. 5 white, $1.44@1.46; No. 6 white, $1.42@1.44; No. 1 yellow, $1.54@1.55; No. 2 yellow, $1.53@1.54; No. 3 yellow, $1.51@1.53; No. 4 yellow, $1.45@1.47; No. 5 yellow, $1.39@1.41; No. 6 yellow, $1.37@1.39; No. 1 mixed, $1.52@1.53; No. 2 mixed, $1.50@1.52; No. 3 mixed, $1.48@1.50; No. 4 mixed, $1.43@1.45; No. 5 mixed, $1.38@1.40; No. 6 mixed, $1.36@1.38; new yellow ear corn, $1.50@1.52; white ear, $1.51@1.53; mixed ear, $1.48@1.50.

Oats.—The oats market was dull throughout the week, and while firmer early under strength of futures, was easier and about 1c lower at the close compared with a week ago. Only an occasional car was wanted by local feed dealers, and few shipping orders were noted. No. 2 white, 85@85½c; No. 3 white, 84@84½c; No. 4 white, 83½@84c; No. 2 mixed, 83½@84c; No. 3 mixed, 83@83½c; No. 4 mixed, 82@83c.

SIOUX CITY, IA.

Paul Larson, Correspondent.

C. V. Fisher of the C. V. Fisher Grain Co. of Kansas City, was a visitor the first of the week.

Slaughter-Burke Grain Co. has made arrangements to take over the Simons-Day Co. wire the first of the year and handle it in connection with their cash grain business.

Mr. Wigton, Assistant Traffic Commissioner of the Sioux City Chamber of Commerce, has resigned his position and accepted a position with the Taylor-Bournique Co.

C. J. Furst, who has been with the Slaughter-Burke Grain Co. for the last two years has resigned his position to take effect the first of the year and will be connected with the McCaull-Dinsmore Co. here.

Those visiting the trade during the week were Wm. Grettenberg, Pierson, Ia.; Wm. Verzani, New Castle, Nebr.; Mr. Sanborn, Moville, Ia.; L. Day, Chicago, Ill.; H. N. Kjergaard, Bruce, Minn.; S. Burke, Sioux Falls, S. Dak.; Mr. Swensen, Vermillion, S. Dak.

During the past week business has been about at a standstill due to the coal situation. Receipts of grain has been the lightest it has been for a year. Country elevators are full of grain ready to be moved as soon as cars can be had and railroads can move it.

MILWAUKEE.

Erich E. Meyer, Correspondent.

Receipts of grain at Milwaukee for the week ending Dec. 13 were 182 cars barley, 236 cars corn, 249 cars oats, 86 cars wheat, 53 cars rye, 2 cars flax; total, 808 cars, against 543 cars the week before, 1,577 cars a year ago and 693 cars in 1917.

Shipments of grain from Milwaukee for the week ending Dec. 13 were 286,300 bus. oats, 94,880 bus. corn, 104,000 bus. barley, 37,520 bus. wheat, 5,400 bus. rye; total, 528,100 bus., against 830,440 bus. the preceding week and 1,528,720 bus. a year ago.

In Milwaukee cash grain markets generally turned easier during the week, corn showing losses of 2@3c for this period, barley 1@2c, oats easy, while wheat is stronger and 5@10c higher, and rye closed 1c higher after considerable fluctuation. Receipts continue moderate and demand good.

The Milwaukee Chamber of Commerce has gone on record as being in favor of the nine propositions embodied in a referendum submitted by the National Chamber of Commerce to local organizations of business men, on questions of policy concerning government owned merchant ships.

John F. Harrison, for thirty-five years manager of the flour and saw mill departments of the Allis-Chalmers Mfg. Co., Milwaukee, died at his residence, 637 Hackett avenue, on Thursday, Dec. 4, at the age of 78, after a brief illness. Mr. Harrison is widely known and has designed and built flour mills in all parts of the country. He is survived by one son and two daughters.

Visitors registering at the Milwaukee Chamber of Commerce during the past week included the following: E. A. Kunde, Horicon, O. C. Ratzlow, Tiffany, John Michall, Humbird, C. C. Christianson, Bloomer; L. Bandow, Peshtigo, A. W. Breitenstein, Stockton, Wis.; H. A. Murnam, Gregory, S. D.; T. W. Anderson, Chippewa Falls, J. A. Peachey, L. V. Peachey, Burnett, John Marx, Kewaskum, J. B. Creighton, M. Malek, Lomira, M. Mickelson, Madison, O. W. Timme, Plymouth, Wis.; K. L. Burns, Watertown, E. E. Price, Portage, B. W. Davis, Galesville, Wis.; P. A. Grau, Chicago, Ill.; Ed. Krumdick, Winona, Minn.; J. F. West, Merrill, A. T. Timmerman, Rudolph, Wis.; Geo. F. Daily, Will Ash, Chicago, Ill.; C. A. Mahon, Crowley, Colo.; E. F. Schilling, Adell, Wis.; A. J. Pick, West Bend, Wis.

CHICAGO.

The proposed change in the brokerage rules was defeated, the vote ruling 626 to 18.

Logan & Bryan announce the opening, Monday, of a private wire office at Palm Beach, Fla., in the Cobb Building, opposite the Royal Poinciana, in charge of O. C. Cleave.

Effective Monday, Dec. 15, the regular trading hours of the Chicago Board of Trade were resumed, 9:30 a. m. to 1:15 p. m., with Saturday at 12 m., restrictions due to the coal strike having been lifted.

B. A. Eckhart, president of the Eckhart Mlg. Co., has leased to the Daniel Forbes Co., manufacturers of leather soles, the five-story building at 166-8 West Lake street, for twelve years. Rental, $110,000.

A newly elected member of the Board of Trade is Launcelot Saunders, of St. Louis. Memberships of F. C. Martin and D. F. Johnson have been posted for transfer and W. H. Crane and G. N. Brinkerhoff have applied for membership.

W. L. Gregson & Co. have removed their offices to Rooms 308-9-10 Webster Building, Chicago, Ill. Mr. Gregson, as director of the United States Provision Export Corporation, conducts the affairs of the latter in the same offices.

During the International Live Stock Show all records for visitors to the Armour plant were broken and 65 guides answered the various questions of interested spectators. All departments were specially decorated for the occasion and free samples were given out in one of the canning departments.

Among the visitors to the floor last week were C. H. Albers, St. Louis; J. H. Wheeler, Plainwell, Mich.; Samuel Hoar, Colchester, Ill.; W. B. Shank, Rockford, Ill.; Geo. Beeber, St. Ann, Ill.; W. I. Thompson, Minneapolis, Minn.; W. C. Westcott, Winslow, Ill., and C. L. Graves, Spokane, Wash.

President Leslie F. Gates is being asked to accept the presidency for another year and there will be no opposition to his re-election, as the entire trade appreciate the fact that he has been most efficient in office. James F. Fones has been nominated for second vice-president; Joseph Simons, of Simons, Day & Co.; Ed. W. McDougal, of Armour Grain Co., Harry B. Godfrey, of Rumsey & Co.; Leroy L. Winters, of Hulburd, Warren & Chandler, and Ed. Hymers, of Jackson Bros. & Co., have been nominated for directors.

BALTIMORE.

Robert C. Neu, Correspondent.

Charles England, former president of the Baltimore Chamber of Commerce, has been named as a member of the Federal Grand Jury for the December term.

In obedience to the order of the National Fuel Administrator, the Chamber of Commerce Building has been "lightless" every afternoon after 4 o'clock since December 9.

President Hayward, of the Baltimore Chamber of Commerce, has named A. R. Dennis, Walter F. Macneal and Edw. T. Sheil, Jr., as a committee to arrange for the collection of the annual Christmas fund for distribution among the employes of the Chamber.

FUTURE TRADING

All are looking ahead, attempting to gauge future markets, for there probably has never been a time when so much interest attended to seeding, marketing and distribution of grain.

HEDGING and how it is done—its necessity and advantages with the recognition of fixed principles, as told in my 16-page copyrighted pamphlet, will interest your trade.

HEDGING is furnished with mailing envelopes in lots of 500 and up for those desiring a practical, as well as seasonable, gift for your present and prospective customers.

ROLLIN E. SMITH
Room 1132
327 S. La Salle St., CHICAGO, ILL.

The following insurance rates on grain in export elevators at Baltimore have been established: Wheat on a basis of $2.45 per bushel; corn, $1.75; rye, $1.90; barley, $1.75 and oats, $1 per bushel.

Frank S. Dudley, a member of the board of directors of the Baltimore Chamber of Commerce and head of the grain commission firm of Dudley & Carpenter, of this city, is receiving the congratulations of his friends upon the arrival at the Dudley home on December 9 of a fine baby boy.

The Baltimore Chamber of Commerce last week sent a strong memorial in the form of resolutions to the President and every member of the United States Senate, urging that a Peace Treaty be signed, such "as will secure to us the glories of victories won and in keeping with the faith pledged our Allies."

Jos. G. Reynolds, J. Murdoch Dennis, H. S. Belt, W. R. Wilmer and R. H. Diggs were elected as the "nominating committee" at the December meeting of the board of directors of the Baltimore Chamber of Commerce. It was the duty of this committee to select from among the membership of the Chamber the names of five merchants, representing the various branches of the trade, to serve for a three-year term in the board of directors. Its selections constitute the "regular" ticket, to be voted for at the annual election for directors, late in January. Later: This committee com-

PITTSBURGH, PA.

H. B. Laufman, Correspondent.

There has been very little change in the market here since last week. Demand for all kinds of hay and feed remains light, and it is believed that only a turn to colder weather will put the market in better condition.

Ear corn is not being moved very rapidly and demand is easy. Quotations hold barely steady. Eastern corn has the preference with most local buyers. Prices are as follows: Yelow No. 2, $1.43@1.44; yellow No. 3, $1.35@1.40.

During the past week receipts of shelled corn have been much more liberal than the previous period, with the result that supplies are difficult to move. Demand has fallen off considerably and there are no signs of immediate improvement. Prices follow: No. 1 yellow, $1.63@1.64; No. 2 yellow, $1.62@1.63; No. 3 yellow, $1.56@1.58; No. 4 yellow, $1.47@1.52; No. 5 yellow, $1.32@1.42. Total receipts of corn at this market for the period, 61,000 bushels.

Arrivals of oats are light, yet they are ample for the small requirements of local buyers. The recent advance in price has apparently had the effect of still further diminishing inquiry and consumers seem to be waiting for a turn in the other direction. Dealers report much lethargy among the trade at country points east of Pittsburgh. Receipts amounted to only 76,000 bushels, as compared with 106,000 bushels for the corresponding period of a year ago. Prices remain around 87¼@87½c a bushel.

PEORIA, ILL.

L. L. Eckard, Correspondent.

With the miners' strike partially settled in this district and the coal restructions cancelled, the local elevators and industries are expected to resume work during the week.

Grain cars, which have been extremely scarce at some points, appear to be showing up more freely past few days. Some of the larger firms reporting indications for a fair run of corn during the next few days; based on shipping notices.

Hog prices at the local yards were quoted higher than at Chicago Saturday; light receipts and heavy demand was the principal cause. Prices remained steady to strong with a top of $13.50, with most sales ranging from $13.25 to $13.50; arrivals of 800 head were cleared early in the morning. Light, medium and heavy, $13.25@13.50; heavy packing, $12.00@12.50; pigs, $10.00@13.00. Cattle receipts were light; good demand took the few offerings actively at lower prices.

The liberal receipts of corn at Peoria Saturday were rather surprising. There being a total of 73 cars, with only fair demand from local industries. Practically all sales were made destination weights and for other markets. Also a few cars carried over. Market was quoted ½c higher on new No. 3 white corn, to 2c lower on other grades. 3 white, $1.42; 4 white, 1 car, $1.39½ D. W. 4 yellow, 14 cars, $1.41 d. w., 1 car $1.39½ d. w., 3 cars, $1.39 local, 5 yellow, $1.36 d. w., 2 mixed, $1.43½ d. w. Oats, receipts 7 cars; demand limited with market ½@1c lower; No. 2 white, 2 cars at 79½c.

MINNEAPOLIS.

W. A. Riebeth, Correspondent.

F. W. McCoy of Kansas City was a visitor on the trading floor here today.

After two days of closing at noon for the purpose of conserving coal supplies, the Minneapolis Chamber of Commerce Association resumed regular trading hours today.

Hereafter, according to a resolution of the board of directors of the Minneapolis Chamber of Commerce Association, on the death of a member the fact will be announced in the trading room at 11 o'clock the following morning.

The following requests for transfer of membership in the Minneapolis Chamber of Commerce Association have been posted: From Joseph Chapman to Theodore Wold; J. R. Stewart to Hans Sorenson; R. C. Bagley to Charles W. Greene.

E. H. Watts, traveling representative for the William Dalrymple Co., died Dec. 15 at the Northwest Hospital from an operation performed Saturday. He was a member of the Minneapolis Chamber of Commerce Association for the past ten years. A widow and brother survive him.

Cash Wheat—Up to the middle of last week the undertone of the cash wheat market here was very strong and prices advanced to the old record levels, but on Friday of last week prices began to fall back again. There was a good demand from eastern millers and a number of round lots were worked. Local millers were buying more for the purpose of getting cars than because they needed wheat. Shipments from the interior are light and offerings to arrive very small.

The durum wjeat market is very strong in tone and advanced while other kinds were declining. There is a limited amount of durum wheat available in the Northwest and a big demand exists. Orders are coming here from all over the country and daily offerings are very light.

The demand for winter wheat is good and offerings are light. Red winter wheat is in much better demand than it has been and prices for that kind are gaining on the regular type.

Corn.—There is a big shipping demand for corn and in spite of the liberal receipts prices are showing a strong tone. Shippers in South Dakota have a large amount of corn ready to send to market, but cannot get cars. Orders are coming here from Canada and all over the Northwest.

Oats.—There is a strong demand for oats and prices are gaining on the futures. Only a few cars arrive on the market daily and cereal buyers and shippers are on the lookout for anything of desirable quality. There is a good grinding demand for all grades of oats.

Rye.—Offerings are very light daily and prices are strong compared with the futures. Millers are the best buyers at present and are bidding the market up. Farmers are taking storage tickets for their country deliveries.

KANSAS FINAL REPORT.

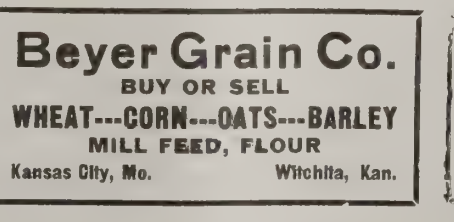
The Kansas State Board of Agriculture on Dec. 11 issued a final report on crops, which we tabulate as follows:

	1919 Bu.	Acres 1919.
Winter wheat	145,795,455	11,640,873
Spring wheat	313,737	30,428
Corn	63,083,297	4,188,045
Oats	41,973,806	1,552,191
Barley	12,881,470	508,821
Rye	3,457,791	269,647

This year's wheat crop is the second largest produced by Kansas, the output in 1914 only surpassing it; it is also the largest wheat crop harvested in any year, this year, its nearest competitor producing only 38 per cent of the Kansas crop.

Wheat in growers' hands is 35.5 per cent of the crop, or more than 50,000,000 bushels. The larger percentages of the crop remaining and are in the northwestern part of the state, where a number of counties report more than 60 per cent unmarketed. In the 15 counties of the three southern tiers from Smith County west, however, two counties report less than half the crop on hand, while Norton and Osborne counties report 68 and 66 per cent respectively. More than 12,000,000 bushels are in the ten of the fifteen counties. This holding of wheat by the farmers is enforced and chiefly because of a lack of storage and shipping facilities. Of the thousand replies received on this question, more than half specify a shortage of cars or inadequate transportation facilities as responsible for the large amount of the wheat crop in farmers' hands. In the northwest especially vast quantities of grain have been damaged and in many cases ruined because of this situation. Considerable damage in this section is also attributed to early fall rains and lack of sufficient help, which delayed threshing and in fact has kept many farmers from completing their threshing even up to this time. The coal shortage within the past month has caused further delay at some points.

IOWA'S CROPS IN 1919.



Beginning with the final crop report for 1919, the Iowa Weather and Crop Service as a state organization and the U. S. Bureau of Crop Estimates as a Federal organization working in Iowa have combined all data to make one harmonized report of acreage and yield. This has necessitated a revision of the county and total acreages of some of the crops published by the Iowa Weather and Crop Service earlier in the season. For this reason comparisons with previous years' acreages of the various crops is impracticable this year. The figures here quoted were compiled by the Iowa Weather and Crop Service, by Chas. D. Reid, director, independently of the Bureau of Crop Estimates, Frank S. Pinney, field agent, whose final report appeared on Dec. 12. The figures are as follows:

TABULATED IOWA CROP SUMMARY, 1919.

Crop.	Acres. 1919.	Average yield.	Average price.	Total yield.	Total value.
Corn, bus.	10,000,000	41.6	$1.17	416,622,000	$487,447,740
Oats	5,670,000	34.6	.64	196,391,500	125,690,560
Spring wheat	750,000	9.5	1.89	7,145,300	13,504,617
Winter wheat	950,000	17.4	1.98	16,508,600	32,687,028
Barley	315,000	25.5	1.11	8,022,800	8,905,308
Rye[1]	70,000	15.9	1.33	1,110,050	1,476,366
Flax seed	16,000	9.5	3.90	152,275	593,872
Timothy seed	200,000	4.5	4.91	900,000	4,419,000
Clover seed	60,000	1.4	24.92	84,000	2,093,280
Potatoes	115,000	43.0	1.94	4,942,110	9,587,693
Hay (tame), tons	2,992,000	1.6	18.37	4,957,370	91,066,887
Hay (wild)	478,000	1.3	16.48	631,693	10,410,301
Alfalfa	148,000	3.2	23.09	477,314	11,021,180
Pastures and grazing[2]	.....	....	.....	.....	100,000,000
Ensilage[2]	.....	....	.....	.....	20,000,000
Sweet corn[3]	40,000	3.0	13.50	120,000	1,620,000
Pop corn, bu.[2]	29,300	24.9	3.79	729,570	2,765,070
Buckwheat, bu.[2]	7,000	14.0	1.95	98,000	191,100
Fruit crop[2]	.....	....	.....	.....	7,000,000
Garden truck[2]	.....	....	.....	.....	8,000,000
Sugar beets for manufacture, tons[2]	8,000	8.0	9.00	64,000	576,000
Miscellaneous[2]	.....	....	.....	.....	11,000,000
Total	21,848,300	....	....	658,956,582	$950,056,002

[1]For grain only; does not include approximately 40,000 acres used for pasture. [2]Estimated. [3]Commercial crop.

ACIFIC COAST SHIPMENTS.

he coal strike does not appear to a materially interfered with the ement of grain and other foodstuffs r North America. This is quite r at least of the Pacific Coast, where a week three sailings were made with rlat to the United Kingdom with 640,- 0 bus. of wheat. Advices to the ship- i lists says that unless there is some ey in the arrival of grain, the ship- ts during the month of December i fair to equal that of any previous th in the history of Portland Co.), as in additoin to the thirteen mers of the regular lines adver- l to leave during the month at least 5 hartered boats will also load car- o of wheat, rye and flour.

Alfalfa Seed Movement.

would appear from the reports that a been received from the alfalfa e -producing areas in South Dakota n Montana that considerable seed had o been hulled prior to the last week f ovember because of the unfavorable e her. Some localities reported that o over 50 per cent had been hulled, u that most of the seed that awaited u ng had been contracted for by buy- r representing nearly all important a kets. Prices of about $30 for clean e in Montana and about $31 in o h Dakota were being offered to r ers, which were advances of $2 to 5 ver the prevailing offers two weeks g

the west central division growers e offered about $30 for country-run n $35 for clean seed, which represented advances of $2 to $5 over prices that were offered a month previous. About 70 per cent of this year's production in Kansas had been disposed of by the growers. Competition among the dealers has been very keen and all of them have been eager to buy. Hulling has been delayed by stormy weather. The quality of the seed hulled early in the season is superior to that hulled later. Conditions similar to those in Kansas have been recorded for Nebraska.—*Department of Agriculture.*

The British food controller notes an increased consumption of foodstuffs, even at rising prices—repeating the nation's experience following the Napoleonic wars.

Ocean freights from Argentina have advanced materially for Jan.-Feb. and Feb.-March shipments owing to labor strikes.

THE OATS SITUATION.

Offerings in the pit during the first hour on Dec. 13 were accumulated by Eastern interests, as well as cash houses, and a strong tone developed with final prices fractionally higher than Friday's finish. Local arrivals showed some increase, but a good demand existed and cash prices held on a firm basis. Export inquiries were received, but failed to result in consummation of business. The crop, although about 300,000,000 bus. under last year, turned out to be larger than generally expected and the deficiency is partly offset by the increase of 18,000,000 tons in the hay crop.—*Logan & Bryan, Chicago.*

There was on Friday a keen cash demand for oats in all directions, scarcity of cars being the only obstacle to heavy out shipments. May oats are strongly held, and some very drastic change in conditions would be necessary to scare out the leading holders.—*Hulburd, Warren & Chandler, Chicago.*

The University of Idaho at Moscow calls attention to the fact that the corn acreage of the state has increased from 9,000 to 22,000 acres in the past five years. This is due to the development of the acclimated seed, one variety of which, Idaho Rustler, a white dent corn this year matured in 110 days.

Flour Department

Reaching grain dealers who handle flour as a side line and for millers, flour brokers and distributors who wish to interest grain and feed dealers in the handling of their product.

The National Flour Products Co. has been incorporated at Oklahoma City, Okla., with a capital of $30,000 by R. C. Buddington, Guy L. Ostrander of Oklahoma City, and Chas. G. Beach of Kansas City, Mo.

The Seaboard Storage Co. of Kansas City, Mo., has been organized with a capital of $10,000 to deal in flour, feed and operate a warehouse. Incorporators are Otto Bresky of Boston, Mass.; J. B. W. Wilcox and H. H. Unkefer.

The Baltimore Flour Club was represented at the meeting in Buffalo on Dec. 10 of the National Federation of Flour Clubs by A. W. Mears, a member of the executive committee of the National Federation; J. N. McCosh and C. E. Clifton.

The Millers' Export Association is planning to concentrate its flour shipments through some Atlantic port where such shipments could be handled to best advantage. Baltimore is under consideration for this export business, and if selected will lead the country in the exporting of flour. Baltimore already ranks third as an export center for flour, being surpassed only by New York and New Orleans.

The Topeka Flour Mills Co. of Topeka, which company is operating the Tonganoxie Mill, have increased their capital stock from $250,000 to $400,000. The Topeka Flour Mills Co. has also purchased the mill plant of the Topeka Cereal Mills which will be made into a 500-bbl. flour mill. S. P. Kramer of Topeka is president; H. D. Yoder, vice-president; J. M. Blair, Tonganoxie, secretary-treasurer.

In most markets, the rye and the wheat loaf sell at equal prices. But east of the Mississippi the pure rye and the wheat mix necessary to the production of the rye loaf costs only about half the price of the flour required for the wheat loaf, while in all other territory the cost difference is wide. This big extra profit is the stimulus that is reviving the baking of rye bread in this country. As quickly as bakers generally appreciate and take advantage of the possibilities of extra profit presented by this situation, just so soon will rye regain its old position as a breadstuff in the United States.—*Blodgett-Holmes Co.*

Corporation's Flour Purchases.

The Grain Corporation announces that it purchased during the week of Dec. 6 50,000 bbls. of first clear flour at prices ranging from $8.20 to $9.25.

Flour Market.

The flour trade generally was rather disappointed over the Government purchases of straight flour, as reported at 6,000 bbls., at an average of $10.29 basis 140-lb. jute sacks, and such limited purchases appears to indicate that millers generally asked more for their flour than the Corporation was ready to pay. In view of the fact that good hard wheats are scarce and very firmly held and that at Minneapolis No. 1 Northern on Dec. 12 reached the record price there of $3.40 a bu., it is not to be expected that price recessions will be obtained. The market is everywhere strong and though it is possible the Corporation may be able to put their straight flour on the market at about $12 per bbl., as hoped, such figure is not likely to continue, as in both the East and West prices are advancing in nearly all markets.

The London *Times* says that the government seems to have definitely come to the conclusion that the bread subsidy must be continued at least during the winter months.

Flour Production, Etc.

The Grain Corporation's weekly bulletin covering the wheat and wheat flour movement throughout the United States for the week ending Nov. 28, in comparison with the figures for the same period a year ago was as follows:

	1919.	1918.
Wheat Receipts—	Bus.	Bus.
From farms, week....	11,141,000	15,516,000

EXPORTS WHEAT AND FLOUR.

Exports of wheat and flour, July 1 to Nov. 30, amounted to 69,692,000 bus. of wheat and 7,584,000 bbls. of flour, making a total equal to 103,920,000 bus. of wheat, compared with 79,606,000 bus. of wheat and 7,389,000 bbls. of flour last year to Nov. 30, making a total equal to 112,859,000 bus. of wheat.

The same figures for Dec. 5 follow: Exports of wheat and flour, July 1 to Dec. 5 amount to 72,262,000 bus. of wheat and 7,764,000 bbls. of flour, making a total equal to 107,200,000 bus. of wheat compared with 83,652,000 bus. of wheat and 7,755,000 bbls. of flour last year to Dec. 5, the five days of December being pro-rated from the monthly total, making a total equal to 118,550,000 bus. of wheat.

FLOUR MARKET.

KANSAS CITY.

Kansas City, Dec. 13.—Enormous flour production was reported here this week, the output being 83,900 bbls. However, it was applied largely on orders previously booked, most of which are to be filled before the end of the calendar year. Millers are using the wheat allotted to them on requisitions made when the United States Grain Corporation decided to dispose of its stocks. In order to raise the quality of this grain, they are taking some high grade hard and red at fancy prices. It is believed that buyers have provided well for the next two or three months. No one would be surprised to see a quiet period in domestic trade during the early part of the new year, unless export conditions after the lifting of the embargo, Dec. 15, should improve. Low levels on foreign exchange are not encouraging to exporters, though it is known that American flour is wanted abroad. Possibly there will be an outlet for the clear grades. The Grain Corporation is pushing its grade of straight flour, made from soft wheat, into the Southwest. Oklahoma and Texas took four cars of it this week at $10.25 a bbl. delivered, in small packages. Owing to further advan in wheat, the hard wheat flour is qu 15c higher than a week ago on the grade, but on other grades prices irregularly lower, due in part to higher feeds, which help to cheapen flour. wheat flour is about 20c higher. Co tions similar to those in Kansas City vail at other milling points in the So west.

Following are the Kansas City price flour in carlots, sacked in 98-lb. co bags, per bbl.:

Hard wheat—	Dec. 13.	Dec.
Short patent	$13.25@14.10	$13.35@1
Long patent	12.60@13.50	13.10@1
Straight	12.10@13.00	12.35@1
1st clear	10.00@11.00	10.60@1
2nd clear	8.00@ 9.00	9.10@1
Low grade	6.50@ 7.50	6.35@
Soft wheat—		
Fancy patent	11.80@12.25	11.60@1
Standard patent..	11.30@11.70	11.10@1
Straight	10.60@11.00	10.10@1
Clear	10.00@10.40	9.80@1
Low grade	7.50@ 8.00	7.00@

CINCINNATI.

Cincinnati, Dec. 13.—The local flour uation was firmer and higher the week with a good business reported both mills and jobbers at the advan prices. Mill operations were not serio affected by the fuel shortage, nor was demand noticeably curtailed by the G Corporation's sales of straight flour to retail trade. The activity was reflecte the strength of wheat which advanced per bushel for No. 2 red. Winter pat wood, $11.75@12; winter straight, in j $11.05@11.55; spring patent, wood, $14 15.45; spring bakers', jute, $13.75@14 Kansas hard patent, wood, $14.05@14 Kansas hard bakers', jute, $13@13.50; c flour, 100 sacks inc., $3.35@3.50.

NEW YORK.

New York, Dec. 13.—The volume of b ness in flour last week was small. M believed that this would continue u after the holidays at least, as underly conditions are too unsettled to encour active new business at prevailing h prices. The Government purchases of 6,000 bbls. of straight flour on last we bids was a distinct disappointment to trade and had a tendency to check the ward trend of values in the soft wi wheat grades.

The weakness in foreign exchange talk of the probability of importations Canadian wheat and flour to stabilize Canadian exchange served to undermi confidence in prices to some extent, though pronounced strength in all the h wheat markets caused millers in Northwest and in the Southwest to alig raise their asking prices.

A little more activity was apparent the soft flours for domestic purposes, it is now believed that the distributio this character of flour is going to be m larger. Spring wheat patents were qu at $13.50@14.50; Kansas straights, $13. 13.75, and soft winter wheat straig $10.50@11.

PHILADELPHIA.

Philadelphia, Dec. 13.—Flour receipts the week were 200 bbls. and 5,194,705 in sacks. The market is firm under strong price situation in the Northwest Southwest and while mills are in some stances disposed to advance quotati still further, flour can yet be bought at prices and buyers are not going to the extreme prices unless necessity c pels them to do so. Trade at the mom appears very unsettled. Quote per 196 packed in 140-lb. jute sacks: Soft wi straight, Western, $10@10.50; do., nea $10@10.25; hard winter straight, $12.50 do., short patent, $13@13.50; spring, fi clear, $9.75@10.25; do., patent, $13.50@ do., short patent, $13.75@14.50; fancy sp and city mills patent, family brands, $1 @15.35; rye flour, $8.95@9.25 per bbl. sacks, as to quality.

BOSTON.

Boston, Dec. 13.—Members of the fl trade here were surprised to receive a cular letter from the Grain Corpora asking for a list of their retail custom and for definite information as to w prices the latter were receiving for th flour. Though couched in most courte language, and asking for co-operat rather than demanding it, its reception the trade was far from favorable. Som those to whom the circular was addres consigned it to the nearest wastebas while others filed it for "future" refere Some were outspoken as to the requ and could see no valid reason either a matter of "social conscience" of busin sense, why they should furnish an ac competitor with a list of their customer

With the exception of spring clear general advance has been noted in fl prices for the week. Spring patents h been especially strong with advances 50c to $1 a bbl., winter wheat flours be 10c to 50c higher. Current quotations o. b. Boston, in carload lots, mill shipm for 196 lbs., in 98-lb. sacks, are $14 15.25 for standard spring patents, $15 for special short patents, $9.25@10 spring clears, $11.25@12.25 for soft wi patents, $12.50@14.25 for hard winter p ents, $10.50@10.75 for soft winter straig and $10@10.75 for soft winter clears. ceipts for the week ending Dec. 13 w 97,368 bbls.

NASHVILLE.

Nashville, Tenn., Dec. 15.—There wa slowing down in the buying of flour at s winter wheat mills in the Southeast l week, and new business booked was c siderably less than for previous wee

ills, however, have had a heavy run of rders and are well sold ahead. Prices ere again stronger last week. Fuel re-trictions have been lifted and mills are ow beginning to resume normal opera-ons, which have been curtailed on ac-ount of the coal shortage.

Nashville and Southeastern mills, with apacity of 209,070 bbls., had output last eek of 139,034 bbls., or 66.5 per cent of apacity, which compared with 118,238 bbls. nd 55.8 per cent of capacity, and 59.8 per ent the same week in 1918.

Prices: High grade soft winter wheat atents, 98 lbs., cotton, f. o. b. Ohio river oints, $12@12.75; standard, $11.35@11.70; raight, $11@11.30.

BALTIMORE.

Baltimore, Dec. 13.—There has been an dvance all around in flour during the ast week, leading city mills having raised heir asking prices, while Western winter heat patents and springs have also moved gher. The demand for flour is improv-g, and with the Grain Corporation having nounced its intention to purchase raights, the outlook is more hopeful. Rye our is also much firmer. Quotations, per -lb. cotton or jute sacks, follow: Spring atents, $14.25@15; straights, $13.50@14.25; inter patents, $11@11.25; straights, $10@ .25; rye flour, pure to blended, $7.75@ 75.

DETROIT.

Detroit, Dec. 13.—Demand is active. Not-ithstanding all that has been said about e offering of flour by the Grain Corpora-on, there is a pressing demand and a neral feeling that flour is bound for a gher level. The market is firm and the ills are all well booked up. Quote: Fancy ring wheat patent, $14.50@15; fancy win-r wheat patent, $12.75@13.50; second inter wheat patent, $12.50; winter raight, $11.25@11.50 per bbl.

DES MOINES.

Des Moines, Ia., Dec. 13.—Demand fair. ncy family patents, 49 lbs., $14.50; kers, 98 lbs., $14.10. On account of the el situation mills only working about e-third capacity.

DULUTH.

Duluth, Dec. 13.—With millers compelled climb for spring wheat, record high ices were set. The market in patent ades of flour was advanced 30c. The lls here reported that they are well filled on contracts but that current trade is iet. Dealers are showing a disposition pursue a hand-to-mouth policy in their ying. Quotations in carlots at mill fol-v: Family patents, jute, $14.60@14.80; kers' patents, jute, $14.35@14.55; clears, 75@10; second clears, $6.75@7.

TOLEDO.

Toledo, Dec. 13.—Flour production of To-o mills this week was less, at 27,300 bbls., 54 per cent of capacity, against 35,130 ls. last week and 40,528 bbls. same week 1918. The wheat situation is the center interest, with keen competition for every that is brought to market and at her prices each day. Only 34 cars were eived here during the week. Bids for plies on the sample tables are above the ain Corporation price. Their large stocks re are dwindling. They originally ounted to 175,000 hard winter and 550,000 t red. Requisitions have been coming at a fast rate and today their stocks re said to be about 70,000 soft red and ne of the hard variety for sale. Prices d here Saturday for wheat, basis 23c e to New York, were: No. 2 red, $2.43; . 3 red, $2.40; No. 3 white, $2.38. A car No. 3 dark Northern spring sold Friday a $3.10. The prices at Toledo on Grain poration wheat, effective Friday, are: . 2 red, $2.39½; No. 3 red, $2.35½; high de blended flour, $12.75@12.80; clears, low grade, $7.50; soft winter patent, .50; standard Kansas hard winter pat-, $11.80, basis halves, cotton, carlots, . b. Toledo

MILWAUKEE.

Milwaukee, Dec. 13.—The local flour rket ruled very strong and higher for week, values increasing in proportion the greatly higher prices on cash stuff. e constantly ascending prices have nulated buying, and millers generally ort business very good for both im-diate and booked orders. Bakers are he market in greatly increased numbers buying freely. The prices on most all des have narrowed up during the week. ing wheat patent has improved 60c on de and 5c on outside prices; straight better on inside prices and first clear igher on inside and 25c higher on out-e prices. First clear, which was running v for the past weeks was in greatly im-ved demand.

he rye flour situation is gradually and y satisfactorily coming to the fore after ong period of dullness. Both demand prices are improved over last week.

he Milwaukee flour mills produced a l of 19,000 bbls. of flour during the past k, of which 15,600 bbls. were wheat r, or approximately 65 per cent of total acity, and 3,400 bbls. were rye flour.

urrent quotations, in carlots, per bbl., cotton, are: Spring wheat patent, $14.80 .05; straight, $13.50@13.65; first clear, 10@10.25; rye flour, pure, white, $8.60@ .; rye flour, straight, $8.30@8.40; rye r, dark, $6.75@7.55. Corn flour is nomi-y quoted at $3.95; cornmeal, white, 0, and corn grits, $3.80.

---

new record for hog receipts was le at National Stock Yards, Ill., dur-the week ending Dec. 6, the total eipts being 111,432 head.

LICENSE REVOKED.

The United States Wheat Director announces that he has revoked until further notice, effective Dec. 8, 1919, the license granted to G. C. Monroe, Grove, Okla., as wholesaler or jobber of wheat. This license was revoked on account of the licensee's failure to appear when summoned to a hearing before D. F. Piazzek at Kansas City, second vice-president of the Grain Corporation.

A GUESS AT WHEAT PRICES.

Receipts of wheat in the St. Louis market are declining rapidly and prices advancing steadily. The action of the Food Administration in disposing of their stock and the sharp advance in prices has led to much speculation as to the probable course of prices in the next 60 days. We can only see one way and that is much higher prices. Where will the miller get his supplies as soon as this Government wheat is gone?—*Elmore-Schultz Grain Co., St. Louis.*

PRICE MAKING FACTOR.

The bears continue to cite a bankrupt world as a reason for lower prices, but lower prices can be brought about only by receipts of sufficient proportions to overwhelm the demand, and there is no immediate indication for such receipts. With adequate rail facilities a good movement might be expected at this time, but rail facilities are notoriously inadequate. Furthermore, this year's crop of corn is one of exceptionally fine quality. The farmers have held no surplus corn back for several seasons, and they will be tempted to hold this one, unless prices are very satisfactory, because of its feeding value, while away from the farms there are innumerable holes to be filled up.—*L. L. Winters, Hulburd, Warren & Chandler, Chicago.*

MICHIGAN IN FOR IT.

As anticipated in this paper a fortnight or more ago, there is prospective trouble with state ownership theorists in the approaching Michigan legislature, and we find confirmation of this paper's surmise in a recent bulletin by the president (A. J. Carpenter) and secretary (J. C. Graham) of the Michigan Hay and Grain Ass'n, who say:

"The Warehouse Measure will undoubtedly come up at our next legislature and we have a strong Legislative Committee to take care of our interests, to-wit, T. J. Hubbard, Chairman, A. S. Dumon and W. B. Campbell.

"You have read in the papers and magazines during the last month about Townleyism and radicalism in North Dakota. The failure of their state-owned bank was some fine example of class legislation.

"The Drake mill, state owned, has not been operated on a business basis, and is reported to have paid farmers as much as 20 cents per bushel more for their wheat than competing elevators during August and September. The Drake mill also sold flour much below cost to the same farmers, with the principal idea in mind of persuading them to purchase bonds so that the State Mill and Elevator Association could go ahead with its construction plans.

"Millers have never feared the competition of the State Mill and Elevator Association, nevertheless the millers of North Dakota are taxpayers and as such will have to shoulder their portion of the losses, and at the same time meet competition that is not based on business principle.

"The above is a part of the state-ownership plan—warehouses as opening wedge for Michigan, then mills, banks, stores, and state-owned warehouses for hay, grain, beans, potatoes and produce.

"The Michigan Hay and Grain Association must hold the line. Support your legislative committee. If Michigan gets state warehouses you may feel like the millers of North Dakota. The state pays its losses by taxing you. Who pays your losses? You do. Fight this pernicious legislation so that you will not be paying taxes to put yourselves out of business. What your legislative committee wants now is that you inform yourself and spread the gospel."

If this paper pleases you, kindly recommend it to your neighbors in the trade.

FOREIGN

Germany reports very severe snow storms in November with frost.

Foreign barley continues strong in price at Hull, where most of it is landed for United Kingdom.

Jugo-Slavia about Nov. 25 sent 150 wagon loads (1 wagon load = 10,000 kilos) of food to Austria.

Bread in Russia has gone to 90 rubles per pound, which at the pre-war value makes the bread about 90c a pound.

Arrivals of beans and bean cake at coast from Manchuria in September were 69,706 tons of beans and 37,443 of cake.

The first forecast of the Indian rice crop 1919-1920 shows an acreage of 73,233,000 vs. 71,172,000 in 1918-19. Rangoon crop season is favorable.

Milling extract rules in Germany: wheat, 80%; rye, 82%. This from Oct. 18; previously, 94% for each; pre-war 75 and 65 respectively was the trade practice.

England also is suffering from severe car shortage and railway delays. The government's indecision as to its railway policy stopped car building by the companies.

Roumania has entered into a barter arrangement with Belgium by which the latter by sending 50,000 tons of coal per month to Roumania, obtains from Roumania wheat at a discount of 25% from the price of other suppliers.

Vice Consul Beer cables from Matanzas, Cuba, that there were shipped direct to the United States during November from Matanzas and Cardenas: in American vessels, 39,833 long tons of sugar, and 9,688 tons of molasses; in foreign vessels, 4,570 tons of sugar.

The Ukranian government has proposed to the Swedish government an exchange of 1,000,000 kilos of grain in return for Swedish manufactured goods. The Swedish government informs me that lack of transportation at this time makes an exchange of such magnitude impossible.

The following changes have been made in the export duties to be collected in Argentina during the month of December: Oats in bags, 0.692 peso; in bulk, 0.312 peso; maize in bags, 0.655 peso; in bulk, free; linseed in bags, 6.52 pesos; in bulk, 5.03 pesos; barley, 0.435 peso; wheat in bags, 2.19 pesos; in bulk, 2.17 pesos; wheat flour, 1.06 pesos. These duties are payable in Argentine gold pesos, equal to $0.965 per ton of 2,204.6 pounds.

PERMITTED BRITISH EXPORTS.

Con.-Gen. Skinner, London, reports that the following commodities which have heretofore been prohibited from exportation to all destinations have been removed from the British embargo list: Beans of all kinds, including haricots; bean flour, chick peas, lentil flour and meal; peas, other than split peas; pigeon peas; locust bean meal; margarine and oleomargarine; upin seed; fresh fruit, chicory; bristles of European origin; jute, raw and carded; poppy and sunflower seeds; shea, ollipe, and badassu nuts. An open general license has been issued permitting the exportation of restorine to all destinations.

JAPANESE SHIPPING RATES.

Con.-Gen'l Scidmore, Yokohama, says the decrease in movements of cargo from the Orient to Europe and the labor troubles in America and England have affected the charter market in Japan adversely since the middle of September. About 50 vessels, totaling 270,000 tons, have been open for new charter contracts since Oct. 1, but up to Oct. 26 only about 10 of them had been rechartered, while ship owners look for a revival, prospective charterers look for a decline in view of the depressing labor situation and the release of a large amount of tonnage. The coal situation also is giving great concern to shipping men and there is uncertainty as to the effect it will have on business. The unfavorable change in the shipping situation caused a marked decline in the charter rates during September. The highest rate reached since the armistice for single voyages to Europe was 27 yen ($13.45), the rate Oct. 20 being only 18.50 yen ($9.22).

BRITISH-GERMAN TRADE.

Com.-Attaché Grady, London, reports that. "In connection with the resumption of British trade with Germany, details furnished by the president of the British Board of Trade show that during the first 10½ months from the signing of the armistice the United Kingdom exported to Germany goods to the value of over $80,000,000, and received from Germany imports valued at $1,087,000. The values have been converted at the rate of $5 to the pound sterling. The German exports indicated potash, manures, leathers and skins; imports largely textiles, oils and fats. Foreign goods exported from England to Germany amounted to 27,044,000, mainly foodstuffs.

UNREST IN AUSTRALIA.

Although there is still much wheat in Australia, there is much political dickering over the wheat situation, says the London *Grain and Seed Reporter's* correspondent at Sydney. In the first place, a royal commission was appointed to enquire into the wheat control for export, it being alleged that wheat had been sold at prices far below those fixed by the Wheat Board, and some ugly disclosures were made by the commission in that connection. The farmer has evidently had good ground for complaint at the manner in which wheat has been handled under official control; they have been deprived of the profits which should have rightly accrued to them during war time and the country is saddled with a debt of about $50,000,000, which will be largely increased by advances for seed.

From Melbourne an increase of £108,000 was recorded during the week ended Oct. 6 in the overdraft of the Australian Wheat Board. The amount outstanding on that date being £9,940,000. In the liability of the Victorian pool there was an increase of £438,000 to £3,315,000, while New South Wales had an adverse balance of £1,332,000, or £553,000 more than the debt against that state a week earlier.

Then it appears that the farmers are agitating for a commission to enquire into the muddled state of the railway traffic and inland freight. Sydney in October was in the throes of a bread strike which gave promise of serious extension—the same old cry of "More pay and shorter hours"; and so far Prime Minister Hughes "has signally failed in his promise to adjust industrial strife and crush Bolshevism. Conditions in New South Wales steadily go from bad to worse."

CANADA'S FLAX CROP.

Consul Johnson, Kingston, Ont., reports this year's flax crop averaged a price of $3.13 per bushel, while that of 1915 was $1.51. Owing to a backward season, the crop was smaller than anticipated, but the yield was second best in history, being 7,368,000 bus., against 8,259,000 bus. for the record year of 1916. In 1918 it was 6,055,200 bus. and in 1917, 5,934,900 bus. In value the flax seed crop of Canada stands fourth among the various grains grown. That in 1918 had a value of $17,951,000, or more than double the sum credited to the crop of 1915.

Most of the seed exported goes to the United States. In the year 1918 Great Britain took 8,579,713 bus; in 1916 but 13,951 bus.; in 1918-19, 166,177 bus. There has been a steady expansion in the shipments of flax fiber.

IRISH LIVE STOCK SHIPMENTS.

Vice-Consul Van Dyne, Dublin, says the shipments of live stock from Dublin during Jan.-Sept. were as follows:

Jan.-Sept.	Cattle. No.	Sheep. No.	Swine. No.	Horses. No.
1919	241,728	206,649	76,675	6,069
1918	193,354	155,369	55,109	3,867
1917	223,032	320,432	64,402	1,432
1916	221,371	264,054	61,212	1,613

Exports from all other ports of embarkation in Ireland (Dublin excluded) to Great Britain, the Isle of Man, and other destinations follow:

Jan.-Sept.	Cattle. No.	Sheep. No.	Swine. No.	Horses. No.
1919	278,558	188,414	58,851	11,695
1918	257,237	147,298	48,123	9,141
1917	534,516	285,709	94,500	5,472
1916	355,965	247,154	98,474	3,535

ROUMANIA AN EXPORTER.

The Roumanian railways are practically all single track, only about 80 miles of double-track between Bucharest and Buzeu. The doubling of the principal lines, the rectification of some of the routes and the construction of fresh lines is an urgent necessity, and it is intended to proceed with this work as speedily as possible. Meantime, the railways are far below the not very high degree of efficiency they possessed (as to goods traffic) before the war. The passenger service was fair before the war, but was indescribably bad during the war and until quite lately. It has now much improved, but is still far below what it was before the war.

The prospects of the country ought to be considered extremely good. It ought to be the first of the belligerent countries to recover entirely from the war, as the only damage the enemy was able to do was to appropriate the current year's crops. There was a good crop this year, which has rather more than covered the needs of the population, and next year should see the resumption of export. What the country is really suffering from at present is its bad rate of exchange, which the resumption of export will necessarily improve. As Roumania was, by the closing of the Dardanelles, completely cut off by sea route from the rest of the world for the whole 4½ years of the war, and could import nothing during the whole time, there is now hardly any limit to the quantity she can absorb of all kinds of goods except grain, meat and dairy produce.—*Corn Trade News.*

Foreign Importers, Manufacturers and Dealers

In the resumption of exports from the United States and Canada, it is desirable to be properly represented abroad for the distribution of grain, seeds, flour, millfeeds, provisions, concentrates and feedstuffs of all kinds. We suggest that correspondence be opened with the following specialists:

Kingsley, Mich.—Geo. W. Parker will build a new elevator and make general repairs on his plant, installing new machinery.

Grand Rapids, Mich.—The Constantine Milling Co., owned by Willie and Maurice Harvey, has been sold to T. J. Edwards and Chas. Rawson of Montana.

Muskegon, Mich.—Marcus A. Frost, president of the People's Milling Co., has assumed active management of the mills here after having taken a two years' leave of absence to recuperate in health. Mr. Paul De Long, who has been taking the place of Mr. Frost, has resigned and assumed management of the De Long Brothers Mill in North Muskegon, of which he is now the sole owner.

MINNESOTA.

Dent, Minn.—The Dent Grain Co. has purchased the elevator of the Atlantic Elevator Co.

Grogan, Minn.—Clyde Seybel will succeed Mr. James as manager of the elevator at Grogan.

Backus, Minn.—The farmers around Backus have purchased the grain elevator at this place.

Elk River, Minn.—The new Elk River Flour Mill has begun operations. Leslie Hill is proprietor of same.

Minneapolis, Minn.—The Fruen Cereal Co. was damaged by fire to the extent of $15,000. A. B. Fruen is president.

Sauk Rapids, Minn.—The Sauk Rapids Elevator Co. will succeed the Neils Elevator Co. Frank Perske is the new proprietor.

Essig, Minn.—The Equity Co-operative Exchange will overhaul its elevator in the spring. It was formerly the Bingham Bros. house.

Stanton, Minn.—F. H. Shepard & Co. have disposed of their property here, which includes their elevator and residence to Mr. Lund of Briceville.

Dundas, Minn.—The Dundas Elevator & Grain Co., Norgard & Scott, proprietors, will build a corn crib and install a corn sheller and feed grinder.

Duluth, Minn.—The Carlton Mill & Elevator Co. is incorporated for $50,000 with a paid-in capital of $35,000. James McFarland is president and manager.

MISSOURI.

Laddonia, Mo.—Frank Wyatt is the new manager of the Farmers Elevator Co.

Tarkio, Mo.—T. P. Gordon has opened a private wire office here with A. E. Temple as manager. Thomson & McKinnon wires are used.

Eminence (bill to West Eminence), Mo.—Chas. McClintock has commenced work on his new flour mill. The building will be of concrete.

Seneca, Mo.—A deal was consummated recently whereby Wm. H. Murphy and W. R. Murphy became owners of the Wyandotte Roller Mills.

New Truxton, Mo.—The Farmers Elevator Co. has been organized with a capital stock of $15,000 and a new concrete elevator will be erected in the spring.

Bellflower, Mo.—Wm. McCullugh & Sons of Bellflower have begun the erection of a mill and elevator which they expect to have in operation before spring.

Carrollton, Mo.—The Farmers Grain & Supply Co. of Carrollton has taken over the Talbot Elevator. The new owners took possession Nov. 29 and will continue the elevator business.

Montgomery City, Mo.—The Farmers have organized a Producers Grain Co. at this place. The stockholders expect to incorporate the enterprise with a capital stock of $40,000 and do a general elevator business.

MONTANA.

Brockway, Mont.—The 26-bbl. flour mill has been destroyed by fire. Fred Heide, proprietor.

NEBRASKA.

Tilden, Nebr.—The Shively Grain Co. is repairing its elevator.

Randolph, Nebr.—H. O. Peterson has purchased an interest in the Flanley Grain Co.

Springfield, Nebr.—A new farmers' elevator will be built at this place in the spring.

Hastings, Nebr.—The E. Stockham Grain Co. of Omaha has discontinued its office at Hastings.

Pawnee City, Nebr.—Members of the Farmers Union of Pawnee County plan to organize an elevator and produce association in Pawnee City.

Wilber, Nebr.—Zwonechek & Aksamit are building a new mill at this place. It will have a capacity of 250 bbls. daily and be operated by electricity.

Gibbon, Nebr.—The Gibbon Roller Mills' elevator has been completed and a full line of Sprout, Waldron & Co. machinery is being installed. The mill will be completed shortly.

Cornlea, Nebr.—Paul Smeal has succeeded Gus Peters as manager for the Farmers Grain & Lumber Co. Gus Peters is now agent for the T. B. Hord Grain Co. at Enola, Nebr.

Laurel, Nebr.—J. R. Durrie has sold his elevator to James Lacey. Mr. Durrie purchased the property last August from Newman & Morton and has now purchased the plant of the Laurel Milling & Grain Co.

Lincoln, Nebr.—The following firms have made application for permission to issue stock: Crete Farmers Union Co-operative Association, common $113,000; Utica Farmers Grain Co., common $24,200; Martell Farmers Elevator & Trading Co., common, $18,000; Riverdale Farmer Co-operative Elevator Co., common $25,000.

NORTH CAROLINA.

Charlotte, N. C.—The Interstate Milling Co. will erect a $20,000 addition to the plant at 10th & Southern Railway. C. P. Moody, Geo. W. Graham and others are interested.

Monroe, N. C.—The Henderson Roller Mill Co. will begin the erection of a new mill within a few months. The new mill will have a capacity of 300 bushels per day, tripling the present capacity.

NORTH DAKOTA.

Palermo, N. D.—R. A. Rasmussen has leased his elevator for the season to G. A. Norman.

Guelph, N. D.—W. L. Dean has been succeeded by H. B. Lee of Baker, Mont., as manager of the Farmers Elevator Co.

East Fairview (Fairview, Mont., P. O.), N. D.—E. G. Carey, formerly manager of the Farmers Elevator Co., was acquitted of the alleged charge of embezzling large sums of money to deal in margins. The case was dismissed.

Portal, N. D.—The Standard Grain Co. of Duluth, which recently suspended business on the Duluth Board of Trade, is defendant in a lawsuit filed by Anna C. Kell, Portal, N. D., who seeks to have a grain elevator business located at Portal restored to her on the grounds that the Duluth firm has broken the terms of her contract. The plaintiff is the widow of Roy S. Kell, who operated the Portal Grain Co. and dealt exclusively with the Duluth grain firm. After his death Mrs. Kell entered into an agreement with the Standard Grain Co., whereby, in consideration of her receiving $50 a month, she was to turn over the elevator and good will of the business to the Duluth concern. She alleges she received regular monthly allowances up to July, when the payments stopped. Since that time, she alleges, the defendant company has failed to make good and has repudiated its contract.

OHIO.

Cable, O.—O. M. Clark has sold his elevator here and will give possession April 1.

Wilmington, O.—R. P. Barrett & Son have purchased a site and expect to erect an elevator and warehouse this spring.

Chattanooga, O.—Lightning struck the Farmers Equity Elevator causing damage to the extent of $2,000. No insurance.

Continental, O.—Morrison & Thompson Co. of Kokomo, Ind., have sold their elevator at Continental to the Continental Equity Exchange.

Yellow Springs, O.—The De Wine Milling Co. has been incorporated with a capital stock of $120,000. Incorporators: John Dennis, Geo. and Robt. De Wine.

Grafton, O.—The Grafton Bennett Milling Co. has increased its capital stock from $200,000 to $350,000. Storage capacity of the plant has also been increased.

Holgate, O.—The Holgate Co-operative Milling Co. has been incorporated with a capital stock of $50,000. Incorporators: E. P. Shelly, D. J. Groll, John Roddy, W. J. Snyder and S. L. Snyder.

Van Wert, O.—Starting from an overheated motor, fire destroyed the Havilan elevator, entailing a loss estimated at between $50,000 and $60,000. Part of 40,000 bushels of grain can be salvaged.

Mendon, O.—The Mendon Equity Exchange has purchased the elevator and implement store of the Gordon-Haus-Foll Co. The old elevator will probably be torn down and a new concrete house built on the site.

OKLAHOMA.

Tuttle, Okla.—W. W. Clark is manager of the Farmers Grain Exchange.

Marshall, Okla.—Farmers in the vicinity of Marshall are making plans for an elevator.

Tulsa, Okla.—The Durrett Grain & Flour Co. of Ft. Smith is opening a branch house at this place.

Sentinel, Okla.—D. J. Rieter has taken over the management of the Sentinel Milling Co., which was recently incorporated with a capital stock of $25,000.

Clinton, Okla.—The Gerlach Milling Co. of Cordell has bought the equipment and machinery of the Clinton Milling Co. and will build a new plant at this place.

PENNSYLVANIA.

Lancaster, Pa.—The Conestoga Milling Co. has been chartered with a capital stock of $50,000. Incorporators are James V. Bitner of Gordonville, Ellis B. Leaman and Chas. P. Frey, both of Lancaster, R. 5.

SOUTH DAKOTA.

Miller, S. D.—The Farmers Elevator is now open for business with Chas. Thomson as manager.

Alcester, S. D.—G. N. Slocum has been engaged as grain buyer for the Farmers Co-operative Association.

WASHINGTON.

btree (Mail to Garfield), Wash.—mers in the vicinity of Crabtree are ing to build an elevator. The elevaroposed will cost $15,000 and will be of lumber.

WISCONSIN.

barrass, Wis.—The stockholders of Farmers Milling Co. have voted to ine its capital stock from $15,000 to 0.

THE CUDAHY REPORT.

e past year has not been entirely ppy one for "the packers." The hy Packing Co.'s report is the first he year. It calls to attention four ipal facts of the situation:

Falling demand since mid-year og products; more decreased shipefficiency and decline in returns foreign exchange, all of which adly affected hog values.

The cessation of army demand nly curtailed the consumption of meats, which reduced the value ttle, a cut which came ahead of eduction on hogs.

both cases the readjustment was more abnormal by the action of Government and various officials, heir extreme methods on various ions in the effort to arbitrarily e prices without regard to normal ess conditions. To our mind it is ful whether the methods used have for the best interests of the pro- and the general public in the long It is our judgment born from our ience of Governmental activity and l, that all Governmental efforts in respect to price fixing and control of distribution, no matter how sincere, are practically of little benefit, and produce disastrous consequences in most instances. After all, the free and unhampered flow of trade provides within itself the greatest item of protection to the public as well as of benefit and guide to the producer, the packer and the consumer. If we had had *less* arbitrary control and such *high prices* of commodities as would have been the case under normal and uncontrolled conditions, increased production, coupled with the enforced lessened consumption, would have followed more surely, and the situation at the present time, in our judgment, would have reached a permanent normal level with less confusion."

(3) The agitation charging the packers with responsibility for high prices for meats has not been justified. The report shows that net profits for the year ended Nov. 2 were slightly more than half as much as in the preceding year, despite the fact that gross sales this year were larger. Gross sales this year were $306,000,000 and net profits were $2,064,994, compared with gross sales of $286,660,971 and net profits of $3,876,808 last year. The profit of the company per pound of meat sold was ¼c.

(4) "Notwithstanding the criticism and the agitation against high prices which have been such a factor in our business during the year, there is a still greater anomaly, but the facts and experience of retailers indicate that so far as the purchasing public is concerned, there has been an abnormal demand this year for articles of the highest price and quality. Everybody has wanted the best and has seemed to have the money to pay any price for it. Cheap meats and cheap everything appears to be a drug on the market and almost unsalable.

"The surest way to get back to the old-fashioned prices is to get back to the old-fashioned market basket and to the occasional use of old-fashioned 'corned beef' and other fine and palatable but cheaper cuts. These are available in every market but seem almost to be forgotten."

INSPECTED SLAUGHTERINGS.

The Bureau of Animal Industry, in *Service and Regulatory Announcements* for October, reports the following number of inspected animal slaughterings for September 1919 and for the nine months ending with 1919 and 1918, as follows:

	September		9 months	
	1919.	1918.	1919.[1]	1918.[1]
Cattle	855,192	1,142,754	7,017	8,185
Calves ...	317,984	316,816	2,939	2,629
Sheep	1,291,979	1,028,645	8,816	7,015
Goats	10,238	19,062	53	89
Hogs	1,997,149	1,980,008	31,066	28,254

[1]000 omitted.

IMPORTS OF FOOD ANIMALS AND MEATS.

The following statements show the imports of food animals and meats and meat food products inspected by the Bureau of Animal Industry during September 1919 with figures for other periods for comparison:

From—	Cattle.	Swine.	Sheep.	Goats.
Mexico	8,083	283	39	1,709
Canada	54,590	1,203	30,605	18
Sept., 1919..	62,673	1,486	30,644	1,727
Sept., 1918..	47,352	1,390	36,069	2,163
9 mos.—				
1918-19 ..	354,945	19,940	91,981	5,985
1917-18 ..	217,849	3,273	77,554	27,365

Following is a statement of imports of beef and other fresh and refrigerated meat and canned and other meat products, in pounds:

	September		9 months	
	1919.	1918.	1919.[1]	1918.[1]
Beef	2,570,673	3,123,767	24,838	9,263
Other ..	616,233	280,917	13,282	2,070
Canned .	174,846	7,657,586	30,681	42,188
Oth'r pro.	178,697	1,232,996	6,056	6,257
Total ...	3,540,449	12,295,266	74,857	59,777

[1]000 omitted.

Condemned in September, 1919: Beef, 145 lbs.; pork, 613 lbs. Refused entry, pork, 36,000 lbs.

Meat Position.

Armour and Company in their weekly review of trade say: "Severe weather conditions and shortage of car supply have retarded hog receipts somewhat during the week and as a result prices have been erratic. Consumptive demand continues very good for this time of year. Prices have been lower on fresh pork cuts, and they are considered cheap as compared with other foods. The cattle market this week has held steady to strong. Beef trade has shown considerable improvement, with a very good demand in evidence. Collections are generally good, being a trifle slow in spots most affected by the coal situation."

Oats Very Firm.

The demand for oats is very firm and receipts will doubtless continue light for some time. Stocks in Chicago are practically all sold for shipment and will be loaded as fast as cars can be secured. We believe oats will show independent strength, though will be affected some by corn.—*W. H. Perrine & Co., Chicago.*

At a large meeting of English farmers held at Wigan, under the auspices of the Agricultural Society, a resolution was unanimously passed that the government should arrange for the import of wheat rather than flour, as the milling of it there would provide necessary offals.

Field Seeds

A. K. Woods has purchase a half-interest in the Bell Seed & Produce Co. at Faribault, Minn., and will be associated with H. P. Bell in the management.

It is said that about 50 tons of clover seed were shipped from Baudett, Minn., and vicinity during the last 10 days of November, chiefly to Minneapolis and Faribault. Farmers realized from $150 @275 net per acre on this crop.

The Thirteenth Annual State Corn Show of Delaware was held this week at Dover. Several hundred dollars in prizes were offered and the names of prize winners may be obtained of A. E. Granthan, secretary, Newark, Del.

The new Kanred wheat has been in use in Kansas as seed for about eight years and has shown an average productive quality of 4.4 bus. greater than either the Turkey or Kharkof, which had made Kansas famous as a hard winter wheat state. Besides its super-yielding qualities the Kanred offers great resisting qualities to black rust, which perhaps may account for the larger yields.

The Red Durum wheat known as "D5," put out originally by the North Dakota Experiment Station but recalled, is still being used to some extent in the Northwest; and the University Farm at St. Paul advises that it be not sown, being a low yielder and low in milling value, worth from 10@15c a bu. less than the common yellow durums.

The quality of alfalfa seed to be sold in Colorado is regulated by a state law which provides that the presence of any appreciable quantity of weed seeds or other impurities predicates low quality seed. It has been found that plump seed of an olive green color almost always germinates well, while the shriveled or brown seeds do not.

Seed Growers of Idaho.

The annual seed show of the Idaho Seed Growers Ass'n will be held in Pocatello Jan. 12 to 16. Unusual premium awards are to be made, $1,200 having been set aside for this purpose.

In connection with the show is to be held the annual conference of Irrigation, Seed, Livestock and Homemakers' Societies. O. E. Scott, Pocatello, is president and B. F. Sheehan, secy-treas. of the association.

CHICAGO SEEDS MOVEMENT.

Following is a report of the receipts and shipments of grass seeds at Chicago for the months and weeks named in 1919 and 1918, in pounds (000 omitted):

Chicago Seed Market.

A quiet market in timothy seed ruled throughout the past week with prices in both the cash and futures practically unchanged from previous week. Weakness developed in clover seed and lower prices were noted, especially at the turn of the week; but some slight recovery was effected before the close on Saturday. Quotations daily for the week follow:

	Dec.	March.	
Timothy—	B.	B.	A.
Dec. 8	$12.00	$12.50	$13.00
Dec. 9	12.10	12.75	12.70
Dec. 10	12.15	12.50	.....
Dec. 11	12.10	12.50	12.85
Dec. 12	.....	12.50	.....
Dec. 13	.....	12.50	.....

Cash seed range for week, $11.

Country lots—Poor to fancy, $8.50@11.50; fair to good, $10@11; choice, $11.25.

Clover, contract prime—

Dec. 8	$51.10	Dec. 11	$50.50
Dec. 9	51.00	Dec. 12	50.50
Dec. 10	50.60	Dec. 13	50.70

Clover, country lots—

	Poor to choice.	Fair to Good.
Dec. 8	$30.00@48.00	$43.00@46.00
Dec. 9	30.00@48.00	43.00@46.00

SEED MARKET REVIEW.

Carl Bryant, Correspondent.

TOLEDO, O., Dec. 13.—No new features were injected into the clover seed market this week, and prices, after declining 15c early on more liberal receipts, were quick to rally on a few buying orders and closed the week with only slight losses, although eliminating the premium of 25c for spot over December. Amount of imports and the situation abroad seems to be the center of interest now. New York reported 1,735 bags imported this week, making the season's total around 28,000 bags. These figures may include other seeds. Consensus of opinion is that about 10,000 bags less than reports show is nearer the correct amount. France is said to have an abnormally short crop and dealers there, tempted by our high prices, are exporting seed that will have to be bought back later to satisfy home demands for sowing.

Receipts here this week were 686 bags, against 1,003 bags shipped; the season's total receipts are 12,805; shipments, 5,034. Toledo stocks, based on receipts and shipments and carry-over are about 9,328 bags, against 13,537 bags year ago, along with lack of demand. A little rush of selling orders broke alsike prices a dollar Friday but buying orders were encountered on the way down. Receipts at Toledo are light and advices indicate a generally short crop. Stocks here are 5,843 bags, compared with 4,077 bags a year ago. Receipts this week of 477 bags were mostly E. G. Timothy receipts were good this week at 1,600 bags, against 1,318 bags shipped out.

The surplus at Toledo is growing and will close to 100,000 bags, against 107,328 bags at this time last year. Decline in foreign exchange tends to delay demand from abroad. Prices here varied only slightly this week.

Government Increases Clover Figures.

The December Crop Report shows quite liberal increase in the estimated 1919 yield of clover seed: 1,099,000 bus. vs. 967,000 estimated on Nov. 1. The yield 1918 was 1,197,000 bus. All of this year's crop will be needed; shortages seem to be the fashion right now in most lines, and clover is right in style. The old crop was cleaned up like Mother Hubbard's cupboard; that puts a premium on the new crop, says Southworth & Co., Toledo.

How far will Europe help out? There are some discrepancies in figures on importations of European seed to date: some make it 40,000 bags; Government figures seem to indicate not over 28,000. Estimated total receipts from Europe for the full season run as high as 60,000 bags.

Weekly Linseed Review.

NEW YORK, Dec. 15.—*United Kingdom:* The linseed situation remains firm with Indian sorts unoffered, except moderate amounts of prompt, owing to the exchange difficulties. Offerings of Plate seed have decreased and business during the past week in the United Kingdom was rather small. Linseed oil ruled very firm during the week and values at the close of Saturday showed an advance of 4/6 to six shillings per cwt. on the week.

India: Recent reports received confirm that the linseed areas in this country have received beneficial rains. A full acreage to the new crop of flax is also mentioned. Shipments continue light owing to the small deliveries at the ports. This week's outward movement amounted to 136,000 bushels.

Argentina: Weather at the close of the week was still fine and warm, and cutting operations were making good headway. Quality of the very early arrivals has been fair to good, but for the general average, much depends upon the weather during the next fortnight. American interests continue to absorb moderate amounts of nearby deliveries, and their purchases of deferred deliveries can be considered of good proportions. Local speculators have been offering quite freely, anticipating that the outturn of the new crop will equal expectations.

Duluth Flaxseed Market.

DULUTH, Dec. 13.—Wide fluctuations developed in the flaxseed market during the last week, and operators in the trade passed through some trying experiences. The course of prices was persistently downward during the first four days of the week, breaks in the new December and May futures extending to 45 and 41 cents respectively. Active trading came in the May future on Friday and Saturday, and its market recovered 31 cents in the two days. The December future participated in the advance to the extent of only 5 cents, however. The feature of the six days' trading was the cutting down in the spread between the December and May futures to 20 cents, as compared with 45 cents a week ago. Operators are gradually lightening up their commitments in the near option, and it is believed that it will be closed out at the end of the month without causing special worry in any quarter.

The May future is likely to become active from now on, in the opinion of specialists. They assume that the State board of grain inspection will make a special grade in No. 2 Argentine flaxseed on the basis of its oil producing qualities, that will assure its quotation being placed at only a small discount under the domestic product. The disappointing Government report placing the domestic yield of flaxseed for the season at 8,919,000 bushels, as compared with the November estimate of 9,450,000 bushels, was a bullish factor at the end of the week.

Receipts of seed on the Duluth market last week were far below par, amounting to only 20,744 bushels, as compared with 188,740 bushels during the same period last year. Shipments from here to Minneapolis crushers were made on two days, and they amounted to just 31,376 bushels. Stocks in the elevators at the end of the week were reported at 89,000 bushels.

Closing prices of flaxseed on the Duluth market on Saturday, as compared with the previous Saturday, and the same period last year were:

	Saturday.	Wk. ago.	Yr. ago.
On track	$5.00-08	$5.42-47	$3.51½
To arrive	5.00-03	5.37-42	5.49½
New December	4.97	5.37	3.48½
Old December	5.00	5.37	.....
January	4.90	5.22	3.50
February	4.77	....	.....
New May	4.77	4.80	3.50½
Old May	4.77	4.82	.....

St. Louis Seed Market.

ST. LOUIS, Mo., Dec. 13.—The seed market is quiet, with only a between-seasons demand, but dealers are hopeful of an increased demand after the holidays. Spot offerings are light, and most of the sales are to arrive. Prices are as follows: clover, high grade seed, free of buckhorn, $47.50 to $49; average country lots, $37 to $43; poor and trashy, $5 to $18; alsike, high grade, $48 to $50; fair to choice, $40 to $46; timothy, choice clean seed, $11 to $11.25, average country lots, $10 to $10.75; low grade, $8 to $9; alfalfa, according to quality, from $20 to $38; red top, choice clean solid seed, $17.50 to $18.50, machine cleaned, $12.50 to $17.50; poor and chaffy, less, according to quality; millet, golden, $2.75 to $3.25; Siberian, $2.50 to $2.75; hog millet, $2.80 to $2.90, common, $2.75 to $2.80 per 100 lbs., bulk basis.

Louisville Seed Market.

LOUISVILLE, KY., Dec. 13.—The seed market is quiet and showing no change, it being a dead season in the general seed business. Movement should become active about Jan. 1, on spring demands, but prices are so high that dealers are playing a waiting game, figuring that prices may break somewhat, as they can't go much higher.

Principal activity is in bluegrass, orchard grass, red top, timothy and clover. Prices are steady, although bluegrass is slightly stronger, and orchard grass is due for a higher market.

Kansas City Seed Market.

KANSAS CITY, MO., Dec. 13.—The impending movement of cane and millet seed is the chief source of interest in the seed trade. Considerable amounts of hog and common millet have been marketed, largely from Colorado. Kansas producers of Golden and Siberian seem to be indifferent about selling and

are hopeful of a higher price basis. The cane seed movement was not expected to be important until the middle of December, and it is now due. There is thought to be a good supply. Seed of high germination test will find a good demand. Outside of Texas the growers of Sudan grass have not sold much seed. Alfalfa made a light seed crop in Kansas and other southwestern states, which is shown by the small movement at high prices. Most of the surplus is said to have been bought up by agents of seed houses here in St. Joseph, Mo., and Lawrence, Kan. It is believed that imported seed, some of which was sown during the fall, will have to be used for next spring's planting. Red clover seed has not been scarcer than now in several years. There was a small crop, except in eastern Missouri and parts of Iowa, not tributary to the Kansas City markets. The high cost of red is turning attention to white or sweet clover, which is more plentiful and less expensive. White clover will make seed the first year, while red seed is obtainable only from two-year-old fields. Timothy seed is in fair supply, with both new and old seed available. The bluegrass seed situation is quiet. Marketing was done some time ago, and dealers were well supplied from the liberal production of Missouri.

Seeds are quoted in Kansas City, in carlots, sacked, as from first hands, as follows:

Alfalfa—Per cwt., $25@35.
Timothy—Per cwt., $9@10.25.
Bluegrass—Per cwt., cleaned, $20@30.
Clover—Per cwt., red, $35@45; sweet, $20@25.
Millet—Per cwt., German, $3@3.25; Siberian, $2@2.50; common, $2@2.25.
Sudan—Per cwt., $9@11.
Cane—Per cwt., red top, $2.50; orange, $2@2.25; amber, $1.75@2.

Minneapolis Flaxseed Market.

MINNEAPOLIS, Dec. 15.—The flax market is considerably slower than it has been, but the best seed is taken care of each day. Buyers wrangle over the poor stuff and some of it is carried over at times. Country offerings are very light. Argentine seed is arriving here in greater volume and until coal is allowed to come forward more freely the crushers will not bid up the market for domestic offerings. Futures are very weak owing to the liberal purchases of Argentine seed for shipment in plenty of time to reach here during the contract month of May.

Clover Seed Crop.

The Government's final Report on the clover seed made the crop a trifle larger than their November estimate and almost as large as last year; 1,099,000 bus., last month 967,000, final year ago, revised, 1,197,000. The crop is small but not quite as small as expected. Leading states produced as follows, as forwarded by C. A. King & Co. from Toledo:

	1919 Final.	1919 Nov.	1918. Final.	1917 Final.
Ohio	100,000	88,000	215,000	231,000
Ind.	75,000	98,000	176,000	202,000
Mich.	101,000	104,000	90,000	128,000
Wis.	248,000	156,000	101,000	336,000
Ill.	210,000	210,000	298,000	200,000
Mo.	34,000	56,000	38,000	70,000
Iowa	84,000	31,000	64,000	25,000
Minn.	48,000	48,000	18,000	55,000
Idaho	75,000	74,000	86,000	99,000
Ore.	18,000	18,000	21,000	50,000
U. S.	1,099,000	967,000	1,197,000	1,488,000

Toledo Seed Market.

Clover seed developed nothing new last week. Prices hovered near the thirty-dollar mark and are likely to until the spring consumptive demand develops. Many dealers have anticipated their spring wants, but the consumers must be reckoned with before we know the extent of this trade and how much is available.

Alsike suffered a big break on Friday. There was very poor support and price crumbled with the selling of only a few bags. Evidently outside influences predominated. More seed must have appeared in the interior and was seeking a hedge here. Local news did not warrant a break.

Timothy was very active during the latter part of the week—climbed out of the rut again, but this time it "fell out of bed and there was a decided tendency to let go on the part of some of the longs." The cold weather and the big coal strike certainly put a damper on business.—*From Letter of J. F. Zahm & Co.*

Timothy Seed Movement.

Reports received from a number of important shipping points in the timothy seed-producing sections of Illinois and Ohio tend to show that with the exception of a few small localities, the timothy surplus up to Nov. 25 had moved from the hands of growers at prices apparently satisfactory to them. About $11 in Illinois and Indiana and $11.75 in Ohio have been offered to growers for clean seed. These prices are practically the same as those prevailing during the previous few weeks. While no pronounced activity on the part of seedsmen to purchase seed has been noted in many sections, there has been a steady movement of seed from grower to dealer.

About 80 per cent of the seed had left the hands of growers in the principal producing sections of Minnesota and South Dakota. In general the movement this season has been normal and growers have been fairly free sellers at prices offered them. During the latter part of November about $10 was being paid to growers for clean seed.

About 95 per cent of this season's crop in Iowa and Missouri had left the hands of growers. Growers were being paid $9.85 to $10 for country-run and $10.50 to $10.75 for clean seed, which prices were about 50 cents to $1 below those offered a month ago.—*Department of Agriculture.*

Seed Season

Will Soon Be Here

Small's brands are fast being recognized as dependable, and this is your strongest argument with Mr. Farmer whose business you expect from year to year.

Sell him Small's seeds and he is your customer forever.

Put up in bushel bags making a hit with the farmer.

ing of beans; and further knowing the relative food value of beans as compared with other food commodities and taking into account the present low prices of beans and the high prices of other food commodities, we look for a good healthy demand after the first of the year. As a rule jobbers do not like large stocks on hand over stock-taking, inventory and tax time at the end of the year, but are more ready and willing to buy early in the new year.

As farmers are unwilling to sell at the present time, claiming that in some cases prices are below the cost of production, a demand of any consequence should undoubtedly force the market up. —*Barnard & Bunker.*

BEAN AND POTATO PRICES.

The potato market generally was an advancing one during the past week. In most sections of the country beans were easier. Quotations follow for lots of good quality and condition beans and potatoes, sacked, per cwt., unless otherwise specified, as of Dec. 13:

Beans—

Boston—Jobbing prices: New York-Mich. ch. pea, $7.75@8.25; common to good, 7.25@7.75; Calif sma. wh., $8@8.50; yellow eyes, fcy., $8@8.50; fair to good, $7.25@7.50; red kidney, fcy., $13.75@14; fair to good, $11.75@12.75; Canadian peas, $5.75@6.25; native green peas, $6.75@7.25; lima beans, $14.25@14.50.

Buffalo—Marrows, $10@11; mediums, $7@8; pea, $7@8; white kidney, $11@12; red kidney, $12@13.

Chicago—Pea beans, hand picked, ch. to fancy, $7.25@7.75; red kidney, $13.50@13.75.

Cincinnati—Navies, $8@8.50; marrowfats, $12.50@13; red kidneys, $13.00@14.00; limas, $13@13.50; pintos, $8.

Detroit—H.-p. pea beans, $7.

Los Angeles—Limas, $14.50; white, $7.50; pinks, $7.50; black eyes, $7.50; Garvanzas, $12.

Minneapolis—Navies, h.-p., fancy, $9.00; soy, $5; Cal. limas, $11; brown, $6.

Montreal—The market is quiet but steady, car lots of Ontario handpicked being quoted at $5.25 to $5.50. Two to three pound pickers are quoted at $4 to $4.25.—Trade Bulletin.

New York—Marrows, ch., $11@11.40; com. to fair, $10.50@10.75; pea, ch., $7.75; com. to fair, $7@7.50; Lady Washington, Cal., ch., $7.75; sm. wh., Cal., $7.75; Kotenashi, $6.50@6.75; red kidney, ch., $13; com. to fair, $10.50.

Denver—Idaho rurals, f. o. b. stations, $3.05@3.20; Ida. russets, $3.15@3.25; Red McClures, $3@3.10; brown beauties, $3.00.

Kansas City—Minn, Red River, Ohio, $3.40@3.50; northern wh., $3.10@3.25; western wh., $3.10@3.25; russet burbank, $3.35@3.50.

Minneapolis—Wh., $2.70@2.80.

Montreal—Receipts last week were 8,092 bags, against 12,241 bags the week previous, and 1,694 bags last year. The market continues very firm, Quebec whites, which are the principal offerings, bringing $2.25 per bag of 90 lbs. in car lots on track, one car being reported at $2.30, and sales in a wholesale jobbing way at $2.45 to $2.50. We have just heard of 2 cars to arrive being placed at $2.20.—Trade Bulletin.

New York—Me., 165-lb. bg., $4.50@5; Jer. rnd., 165-lb. bg., $4@5; L. I., 165-lb. bg., $5.50@6; State, $2.25@2.75, per cwt.

Pittsburgh—York State, 150-lb. sk., $4.85@5; P. rnd. blk., $3; Mich., 150-lb. sk., $4.85@5.

Rochester—N. Y. state, $1.50 per bu., field run; No. 1 N. S. grade, $2.40@2.50, bulk cwt., f. o. b. station.

St. Louis—Colo. russet burbank, $3.65, del.; north'n rurals, $3.35; burbanks, $3.25; Wis., $3.25.—Market Reporter.

San Francisco—Salinas, $3.75@4; rivers, fcy., $3.75@4; rivers, ch., $3.25@3.50; Ore. gems, $3.50.

BROOM CORN.

The extreme cold weather in the Southwest has put an end to all outdoor activity for the time being. The season is about over, as the crop has practically disappeared from first hands. In the Lindsey district but little corn is reported available; some warehouses in field points are still holding some corn, but it is not on the market and is only waiting for cars for movement to destination. Prices in western Oklahoma and southwestern Kansas districts were from $75@125, bulk from $90@125, although a few lots brought as high as $150. In the Sayre-Erick section the minimum was about $100. The Wichita report to the *Broom Corn Review* says that corn is drifting in from outside warehouses; prices are steady. Prices quoted for some top lots were as high as $250@300 and one strictly fancy lot was quoted at $350, the bulk of sales running, however, from $100@250 with little corn under the $100 mark. In Central Illinois there is no material change in the situation, only a limited amount of corn in growers' hands which is being held at $200@300 or better. The coal strike, of course, affected the factories, particularly in Chicago, where during the progress of the strike the six-hour schedule was the rule.

FIBER BAGS IN ANTIOQUIA.

In June last a company was formed in Medellin, Antioquia, Colombia, to make fiber coffee bags. Jute bags were formerly imported from England for handling coffee for export, but during the war this material could not be secured and sacks were manufactured locally, hand-made from "fique" fiber, as the native henequen is called. The company plans to use modern machinery, but up to June suitable machinery for making the bags of this kind of fiber had not been found in the United States. Before the war Colombia imported annually approximately 1,000,000 yards of jute piece goods from the United Kingdom and $225,000 worth of jute bags.

If this paper pleases you, kindly recommend it to your neighbors in the trade.

Barley

BARLEY MARKETS.

MILWAUKEE.—The local barley market ruled very unsteady throughout the week, opening 2@3c higher, but declined 3@5c later. Receipts are light and demand only fair from industries and shippers, the market being narrow and comparatively inactive. Receipts for the week were 182 cars, against 114 cars a week ago and 205 cars in 1918. Current quotations are: Good to choice 48 to 50 lb. test is quotable at $1.61@1.62; bright, $1.62@1.63; fair to good, 45 to 47 lb. test, $1.52@1.60; low, 41 to 44 lb. test, $1.47@1.57; 36 to 40 lbs.. $1.42@1.50; feed, $1.42@1.50. Iowa quoted $1.48@1.60, for light to fancy; Wisconsin, $1.52@1.63; Minnesota, $1.45@1.60; Dakota, $1.45@1.60; feed and rejected, $1.42@1.52.

BUFFALO.—Barley sold to exporters and also to maltsters but as a rule the latter were not interested. It was difficult to get barley, the bulk of the offerings coming from stocks here which were going forward. There were sales from $1.60 to $1.70, the latter for fancy on track. Brewers seem to be getting discouraged, another big one having sold out and will probably not again manufacture beer or substitutes. Malting barley was quoted at $1.62@1.70, and feed, $1.54@1.60.

DULUTH. Dec. 13.—Trading was nominal in the barley market here during the last week, but quotations held at good demand at $1.18@1.46 for the spot article. Not a car of barley was received on track here during the six days, as compared with 45 cars during the same period last year. Stocks of barley in the elevators here amount to only 40,000 but some small lots having been taken out during the week.

KANSAS CITY.—Receipts of barley for the week were the largest for some time, reflecting recent advances in prices. They amounted to 36 cars, against 22 a week ago and 33 last year. There was an active demand from local manufacturers and outside feeders. No. 3 sold 7c higher, at $1.47 a bushel; No. 4, 5c up, at $1.42@1.43. Stocks gained 4,000 bus., rising to 127,000 bus., against 198 a year ago. Ground barley feed was quoted 10c higher, at $3.15 per cwt., sacked.

CHICAGO.—The barley market last week opened very strong with a sharp advance of from 1@6c on Monday. There was sharp competition between the maltsters and the elevator interests for the better grades and on Monday and Tuesday prices continued to advance, the net gain for the two days being from 2@4c, making 6@10c advance during the three days. But by the turn of the week buyers seemed to have filled their requirements and from that on to the close the market was very slow and dull, closing, however, without any material change of prices on Saturday, although there was a recession of from 4@7c on Thursday and Friday. Only the best grades at any time were in sharp demand, although during the early part of the week the thin and poorer qualities were absorbed at a price. This week the trade opened on Monday with a strong undertone and advances of from 2@3c or even more on exceptionally fine cars. The decision of the U. S. Supreme Court upholding the war-time prohibition seemed to have had no effect on the market. Sales of 21 cars were reported at a range of $1.56@1.67; futures stronger and higher, December closing at $1.63; May at $1.53 with the high point at $1.56. Exports from Atlantic ports were 416,000 bus., compared with 124,000 bus. same period last year. Visible supply shows a slight decrease except at Chicago where amount in store remains the same as previous week.

PORTLAND.—The *Commercial Review* reports an excellent demand and higher values during the past week, with scarcity of offerings. While receipts have been light, it is understood that stocks in warehouses are fairly good and ample for any reasonable demand. Values for No. 3 blue quoted at $69.50@70; feed at $69; Eastern barley, $68 per ton.

MINNEAPOLIS. — Very light offerings meet with a good shipping demand and the market is strong in tone. Elevator companies have sold out practically all of the barley they own and buyers have to depend on the light daily receipts for the amounts they want. All grades sell well, even the very dirty stuff.

SAN FRANCISCO.—The barley market is reported slow and draggy; small offerings in the spot market and very little activity. The business being put through is in the country only. Quotations: $3.35@3.45 per cental. The trade notes the fact that stocks are disappearing quite rapidly.

English Barley Seedings.

The effect of pegged prices in England is shown in the low seedings of fall wheat as compared with barley this year. This is particularly true, says the London *Grain and Seed Reporter*, in the best barley growing districts, as farmers much prefer to grow barley at from 100/ to 120/ per qr. than wheat at 76 6/ per qr. At the same time we doubt if much extra barley has been sown on land better suited to the prime cereal. Growers are certainly dissatisfied with the price of wheat as compared to barley, but it must be admitted that growing wheat at current rates is not an unprofitable proposition. It is believed that the Government Land Bill now being drafted will continue guaranteed prices of grain for some years to come, though up to the present no details of the scheme have become known.

A farmer of Madison County, Ill., estimates that 40 per cent of the growing winter wheat will be ruined by the fly this year.

RYE IN THE SPOTLIGHT.

Rye, as remarked herein last we has come into the market limeli The advance has come no doubt on brisk foreign demand and sales for port with, as Jos. Wild in a Wag letter says, "a chance of large wir and spring export sales; extraordin rise of wheat and flour, moderate v ter wheat and rye acreages, recent cline in wheat condition and talk only a moderate new rye condition.

"Prior to 1914 the U. S. raised crops of 35 to 42 millions. The 1 rye crop ran 85 vs. 89, 63, 48, 54, 43 past five years. A rye visible of millions is very large, but the prese of rye at around an average of 90c low the various cash wheat prices le serious support.

"In the 1914-16 period rye sold to $1.20. In March 1918 rye sold $2 For the years ended July 1, 1918-13, U. S. exported 12, 13, 14, 12, 2 an millions of rye. For the ten mon of 1919 to Nov. 1 the U. S. rye expo were much larger, at 29 millions. October outgo was light at 900,000, recent export sales have been liber

RECEIPTS AND PRICES OF RY

Receipts of rye at the principal mary markets of the Central West the week ended December 12, and the corresponding week last year, compiled by the Minneapolis *Mar Record*, were:

	1919. Cars.	1918. C
Minneapolis	69	7
Duluth	137	1
Chicago	53	1
Omaha	21	
Milwaukee	47	1
Total	327	1,1

Feedstuffs

orton County, Kans., reports ample l, the corn being the best raised in eral years.

ones Bros. Feed & Seed Co. have ned a new feed and seed plant in lville, Mo.

arvey & Tremain have purchased feed mill of Geo. R. Harland at ston, Wis.

urphy & Murphy is the name of ew company engaged in the feed ness at Brady, Nebr.

ne Alfa-Maize Mfg. Co. of Platts- th, Nebr., has been chartered with 0,000 capital stock. The company manufacture stock feeds, meal, etc.

stock shipper from Galt, Mo., says although farmers are well supplied corn and roughage, the number of e on feed is not large, farmers be- afraid of the game.

stock shipper from Bryan County, ., says that county has ample rough s and will probably buy less cake usual, certainly less than last year. county is fairly well stocked with te.

is reported from Laverne, Okla., there is plenty of forage in that borhood and in addition a good of milo, cane and kafir have been ested. The grain is usually fed sep- ly, and on account of the scarcity al and labor comparatively little has so far been threshed.

former county agent of Missoula ty, Mont., reports the stock feed- ituation in that state very critical, ially in the eastern and northern , ranchers being unable to import nd feed because of the coal and car age, and heavy losses are expected g the winter. The agent reports the utilization of the Russian this- is been attempted in various parts e state, but because of the drought histle became poisonous after be- it and many cattle were killed. It wn, however, that when the thistle t and properly dried it makes a eed. Conditions in western Mon- are fair as far as hay is con- l.

Improved Cottonseed Feed Trade.

KANSAS CITY, Dec. 13.—Improvement reported in the demand for cotton- cake and meal on the Kansas City t this week. Feeders in Missouri, s, Nebraska, the Dakotas and the west bought on a more liberal than at any time this year, due, ess, to the cold and stormy er over the territory. Cake and of 45 per cent protein were quoted 1 $81 to $83 a ton, Kansas City, the same as a week ago. Arkan- eal, little of which is moving to ansas City Territory, was quoted 1 $69 a ton for 36 per cent protein basis mills.

Stock Still Going South.

DENVER, COLO., Dec. 11.—The move- of live stock from the drought to Southern pastures still con- . In fact, during the past two or weeks the movement of this sort to have been heavier than at any his year. During the three days 9 to Dec. 1, 21 cars of sheep and rs of cattle and calves were l off at the Denver market for nd water. Montana, Wyoming and South Dakota were all represented in these shipments, and much of the stock was in extremely poor and emaciated condition. As a matter of fact, it showed the effects of lack of feed to a greater extent than any stock that has arrived on this market this fall. To further complicate the situation, Government inspectors found some of the stock affected with scabbies which necessitated dipping before it could leave the yards. The animals as a rule were in such a weakened condition that it was necessary to keep them in the yards on feed for two days before they could be dipped safely.

THE FEED SITUATION.

EASTERN DAIRY FEED DEMAND.

BOSTON, MASS.—The demand for dairy feed has not been very brisk with us so far this winter, but we are anticipating a change for the better along the 15th of next month.

The demand for poultry feed was never better and promises to increase. We think that the present prices for eggs and poultry meat will cause probably the largest hatch of chicks in the next four months that the country has ever seen, and there are a lot of laying hens on the job at the present time. We believe that the demand for pig rations will also be very good this coming season.—*Walter E. Smith.*

The Southern Hog Industry.

The *Progressive Farmer*, an interesting, live Southern paper, has done much to encourage the broader production of hogs in that section by emphasizing the advantages of high breeding necessary to permanence in the profitable marketing of hogs. It is calling attention to the success Southern states now enjoy in hog raising, citing that from July 28 to Aug. 1, 1919, five Southern farmers sold 238 head of pure-bred registered Duroc sows and gilts for a total of $122,950, or an average of $512 per head. This is a record to which hog raisers in the long famous states of Iowa, Illinois, Indiana, etc., may well give attention. The stable growth of the hog feed business has done much to make possible the continuance of hog raising and the gradual elimination of stunted, long-legged variety, which can "outrun a nigger," which are great consumers of natural forage but of little value at the slaughter house.

Cottonseed Products.

Exports of cottonseed products, linseed meal and feed concentrates are not favored nor discriminated against in comparison with the enormous list of exportable products in this country of large surplus production. Generally speaking, however, nothing is going over; for, to reduce it to understandable English, German exchange is 1,000 per cent up, 100 marks being worth about 1.98 (formerly worth $24), and Sterling off to $3.67¼, quoting the new low of Thursday, Dec. 12, and foreign exchange experts are careful not to be quoted as to the probable trend of this exceedingly disturbing situation.

Returning, however, to exports of feed materials, it is significant, but not unexpected, to note the offers of 224-lb. export bags of cottonseed products to domestic brokers. Business in such materials in the United States is usually transacted in 100-lb. bags and the heavy export bag is not desired and the contents will have to be sacrificed somewhat. Feed manufacturers, recalling the extremely bullish cottonseed meal situation early this fall, were, however, not very generally induced to contract their requirements beyond Jan. 1, many not even going that far. The considerable tonnage of cottonseed meal formerly exported but now dumped in the domestic markets, with its bearish influence on prices, supported by the bearish cotton report of Thursday, the 11th, is justification for the feed mixers' opinion that lower prices will probably obtain.

FEED MARKETS.

MINNEAPOLIS.

Minneapolis, Dec. 15.—There is a good demand for bran and standard middlings and prices for that kind are strong and higher. While there has been some improvement in the demand for heavier grades, yet there is plenty of that kind to take care of requirements. The output of millfeed fell off during the week. Shipping directions on maturing contracts are mostly prompt. Millers report a fairly active mixed car trade. Car lots, 100-lb. sacks: Standard middlings, $43.50@44.50; flour middlings, $51@52; rye middlings, $42.50@43; red dog, 100-lb. jute, $57@58; bran, $42@43.

ST. LOUIS.

St. Louis, Mo., Dec. 13.—The feed market is quiet but fairly firm. It appears to be an entirely speculative market at present, and in the hands of the jobbers. Mills are selling practically no feeds, and are far behind with their orders. They are holding their feeds and allowing the jobbers, by bidding between themselves, to boost prices to a sufficiently high level where it will pay them well to flood the market with mill feeds. Practically all of the jobbers have bought far ahead, but they were unable to secure this feed in time to supply the normal consumptive demand for this season of the year, and

GRAIN and FEED STUFFS

buyers have been compelled to rely upon sweet feeds, alfalfa products and other kinds of feed. The result will be that when the feed which was purchased so long ago is delivered, the market will be flooded with an accumulated supply and a restricted consumption.

Prices are firm, as follows: Bran, $43.50@44.50, latter for soft, mixed feed, $47.50@48.50; gray middlings, $51@53; red dog, $63@65; oat feed, $26.50; no hominy feed offered; alfalfa meal, No. 1, $41@42; No. 2, $40@41 per 100 lbs. sacked.

CLEVELAND, O.

Cleveland, Dec. 13.—In the feed market there has been an advance in prices. This may be due in some respects to the demand instant to wintery weather. Flour middlings are quoted today at $45.50; standard middlings, $48.75; winter bran, $46; spring bran, $45; mixed feed, $48; hominy, $61.50; oil meal, $81.50; 36% cottonseed meal, $77.50. The above prices are for the best grade of each kind of feed, f. o. b. Cleveland in carlots in sacks.

CINCINNATI.

Cincinnati, Dec. 13.—Colder weather conditions and firmness of grain and hay prices had a stimulating effect on the demand for feeds of all kinds the past week, but complaints were quite general of inability to secure supplies because of car shortage. Feed manufacture was also reported as affected by the fuel scarcity and operations were far below normal. Bran and middlings were quoted higher but cottonseed meal was easier and lower. Quotations per ton, in bags, basis carlots: Spring wheat bran, $46.50@47; soft winter wheat bran, $46.50@47; hard winter wheat bran, $46.50@47; spring wheat middlings, $47.50@48; soft winter wheat middlings, $52.50@53; hard winter wheat middlings, $52.50@53; cottonseed meal, 36% protein, $74@74.50; linseed meal, $80@81; gluten feed, $68@68.50; hominy feed, $62@63; No. 1 alfalfa meal, $42@43; beet pulp, $62@62.50; barley chops, $69@70; rye middlings, $46@47.

MONTREAL.

Montreal, Dec. 12.—The market continues steady for all lines of mill feed. Carlots of bran are reported at $45@46 including bags, and shorts at $52@53. Pure barley meal is sold in broken lots at $72@73 per ton and mixed grain moullie at $67@68. Dairy feed is in good demand at $55@56 per ton including bags.

NEW YORK.

New York, Dec. 13.—There was a fairly active demand for bran in the local market but otherwise the feed position was inactive and only about steady. It was thought that distributors of feed had about filled their season's contracts and this was undoubtedly one of the reasons for the falling off in the demand. City bran was quoted at $47; middlings, $54, and red dog, $68, while Western bran was quoted at $48; middlings, $50, and red dog, $65.

PHILADELPHIA.

Philadelphia, Dec. 13.—The market for feedstuffs rules firm under light offerings and fair demand, prices showing a stronger tendency. Quotations represent carlots, in 100-lb. sacks, to arrive, at cost, per ton: Winter bran, $49.50@50; spring bran, $48.50@49; standard wheat middlings, $49@50; flour middlings, $58@59; red dog, $65.50@66; shorts, $48.50@49.50; low grade flour, $66@66.50; rye middlings, $49@50; fine yellow hominy, $64@65; fine white hominy, $65@66; reground oats feed, $31@31.50; cottonseed meal, 36% protein, $78@79; cottonseed meal, 41% protein, $82@83; cottonsede feed, 20% protein, $62@63.

BOSTON.

Boston, Dec. 13.—The demand for feeds of all kinds continues rather light although the prices quoted this week show a materially higher market. Prices are quoted as follows: Bran, spring, sacked, $49.75@50 per ton; bran, winter, sacked, $50@50.50; middlings, sacked, $51@56; mixed feed, sacked, $52.50@56.50; red dog, sacked $66@68; second clear, sacked, $70; stock feed, sacked, $62; oat hulls, reground, sacked, $30.50; cottonseed meal, sacked, $80@82. Receipts for the week ending Dec. 10 were none.

DETROIT.

Detroit, Dec. 13.—Millers report an active trade in all lines of feed and everything sold ahead. The market is firm. Quote: Bran, 47@48; standard middlings, $51@51.50; fine middlings, $61@61.50; cracked corn, $64; coarse corn meal, $60@63; chop, $53@55 per ton, in 100-lb. sacks.

MEMPHIS.

Memphis, Dec. 13.—Activity in feedstuffs is slowly broadening, although some sections have been taking shipments freely on contracts placed some time ago. There is little appreciable change in prices, except that bran is a shade higher. Cash wheat bran today was $42 bid and $43 asked, while gray shorts were offered at $54. The immediate demand is not large yet, but the readiness with which orders for future shipments are being placed indicates that it is expected prices will be no cheaper. Cottonseed meal is still quiet but slightly steadier after a period of moderate recession. Demand is slow and most activity is in high and the very low grades, the latter going chiefly to fertilizer people. The high grades are expected to become very scarce early, as the weather has done so much damage to the seed.

NASHVILLE.

Nashville, Tenn., Dec. 15.—Cold weather has resulted in broader demand for feeds and prices rule firm. Mill feed is quoted as follows: Wheat bran, 100-lb. bags, per ton, $45.00; standard middlings or shorts, $56.

BALTIMORE.

Baltimore, Dec. 13.—The demand for feedstuffs generally is broadening out as the colder weather enforces increased feeding requirements and with stronger Western advices the tendency of prices here has been steadily upward. Market firm at the following prices: Western spring bran, per ton, in 100-lb. sacks, $48.50@49; Western middlings, per ton, in 100-lb. sacks, $51@52; city mills' winter wheat bran, per ton, in 100-lb. sacks, $50; brown middlings, per ton, in 100-lb. sacks, $52; white middlings, per ton, in 80-lb. sacks, $65.

DES MOINES, IA.

Des Moines, Ia., Dec. 13. — Demand strong. Receipts light owing to weather and fuel conditions. On account of the severe weather heavy feeding is being done. Bran, $44; standard middlings, $45; flour middlings, $55; oil meal, $85; cottonseed oil, $77; tankage, $100; alfalfa molasses feed, $43.

DULUTH.

Duluth, Dec. 13.—Trade in feeds was slow on this market during the last week but the price tendency continued upward. It was noted that consumers are buying sparingly on the assumption that a reaction in the market may come about sooner or later. Bran figure advanced $3.25; shorts, $1.75; red dog declined 25c; Boston mixed advanced $2.75, and flour middlings, $2.

Prices per ton follow: Bran, $42; ground oats, $48.25; No. 1 ground feed, $52.50; No. 2 ground feed, $51.50; No. 3 ground feed, $50.50; shorts, $44.50; flour middlings, $53; coarse corn meal, $55; red dog, $61.50; Boston mixed, $45.50; cracked corn, $55; rye feed, $42.

LOUISVILLE, KY.

Louisville, Ky., Dec. 13.—The feed market is somewhat stronger along with the advance in white and flour prices. The demand is good for mill feed and all manufactured feeds.

Principal quotations are: Bran, $45 a ton; mixed feed, $48; brown middlings, $49.50; gray, $54; hominy feed meal, $64; cracked corn, $62.50; scratch feed, $73, sacked and packed, carlots, Louisville.

TOLEDO.

Toledo, Dec. 5.—Bran is strong with advance of $2 over last week. Middlings steady. Cold weather has brought increased business in bran but the market in middlings is quiet and featureless. Prices are: Bran, $43; middlings, $50, in bulk, per ton, f. o. b. Toledo. Bag prices are $5 higher. Corn and oat feeds were advanced this week. Receipts from the country are light, oats receipts here this week amounting to only 22 cars. Scratch feed, $69@71; corn and oats chop, $61; cracked yellow corn, $66; dairy feed, $69 per ton, carlots, f. o. b. Toledo.

NEW ORLEANS, LA.

New Orleans, La., Dec. 13.—Recent sales of bran have been made at $2.15@2.20. Texas and southeast Missouri have been free sellers at these prices, while Kansas mills have been asking as high as $2.30 per hundred, tagged, delivered New Orleans. Not many were in the market when bran started to move. Stocks are rather large here with the demand very slow. No demand for shorts at all. Those who have stocks are finding it hard to make sales.

MILWAUKEE.

Milwaukee, Wis., Dec. 13.—Greatly increased activity was featured throughout the week in the local mill feed market, and values on feeds of all kinds have improved materially. As anticipated, the cold weather has greatly revived business, and the demand is better than it has been in months. The high cost of grains together with comparatively light receipts has greatly boosted values. Bran is very strong and wanted, being quoted $3 higher, and only at one figure. Standard middlings and flour middlings are also sought and have shown appreciable price increases during the week. Eastern business is reported very large. Current quotations are:

Bran, per ton, $45; standard middlings, $46.50; flour middlings, $51@52; red dog, $59@60; hominy feed, $60; rye feed, $44@44.50; old-process oil meal, $81.25; cottonseed meal, $78@84; brewers' dried grains, $66.50 (nominally); gluten feed (no quotation), all in 100-lb. sacks.

PITTSBURGH, PA.

Pittsburgh, Pa., Dec. 13.—The feed market remains quiet here owing to very light receipts and a moderate demand. Very few cars of feed are being received and there is no effort to establish regular quotations on feeds. The mixed varieties are in larger demand than any others and prices are high. Last week's receipts bulletined by Supt. O. C. Alexander of the local hay, grain and feed exchange, showed a total of 280 tons. Some difficulty is being met with here on account of the car shortage and the failure of railroads to forward shipments promptly.

Alfalfa Department

he Clinton, Okla., alfalfa mill which s recently destroyed by fire, is being uilt.

farmer from Dearborn, Platte Co., ., says that county has been going alfalfa for several years and is w found on almost every farm in the nty.

farmer from Cowley County, Kans., orts a good deal of alfalfa still on d in that county, but when the best gs $25 a ton it is locally put on the hibitive list of feeds.

rof. Cox of the Farm Crops Develop- t of Michigan Agricultural College rts that the acreage of alfalfa in- sed this year more rapidly than before due to the shortage of clo- and to the fact that farmers are e familiar with alfalfa culture and using more lime.

n. A. C. Frost, Algiers, Algeria, N. ca, has forwarded to the Bureau of eign and Domestic Commerce sam- illustrating the various processes he conversion of alfalfa hay into er pulp and paper. The samples e obtained from the Société des uloses d'Afrique Francais du Nord, Boulevard Carnot, Paris.

has been known, or believed, for e years that musty alfalfa hay is injurious to sheep; in fact, sheep some times to prefer it to the bet- grades. At any rate, last winter experiment was made at the Ne- ka station with damaged alfalfa to lambs which ate it freely and ed to thrive upon it. They will, ver, eat first-class alfalfa as read- y

e Kansas City *Drovers Telegram* "Kansas is peeved because she was ded no better than third and fifth s on alfalfa hay at the show in ago." The third prize won by as was entered by D. C. Stephen- Manhattan, and was considered an st perfect alfalfa, the specimen be- rich in color and mellow in leaf old dealers declare it would be to make better hay anywhere.

ALFALFA SITUATION.

GOOD DEMAND FOR ALFALFA.

MAR, COLO.—Alfalfa this year was 75% of normal crop. The de- good, both from mills and for hay. The mills are paying $20 ose hay delivered, baled hay bring- 27@29 f. o. b. cars.—*E. J. Wagner.*

Alfalfa in the Ration.

ation of nine parts corn and one alfalfa has given much better re- than a ration of corn alone. The on of 10 per cent of alfalfa in- d the rate of gain, decreased the number of pounds of food required oduce 100 lbs. of gain, and de- d the cost of the gains. In a ra- f nine parts corn and one part al- the alfalfa was worth more per than the corn, as it not only re- the feed required for a certain but also increased the rate of In a ration of these proportions, meal may give slightly faster than chopped alfalfa, but the ad- al cost of the meal makes it prob- e less desirable. When comparing hay fed in a rack with chopped meal or alfalfa meal fed with the in the proportion of one to nine, we ound that the results were quite as regards the rate of gain and equired to produce a certain in- in weight. But on account of st of chopping or grinding and of chopped or ground alfalfa with ain, we believe that the most ble method is to permit the fat- hog to take alfalfa as he wants it from the rack. We believe, however, that when feeding alfalfa in this way it is very important that the hay be of the best quality and easily accessible to the hogs. Hogs will not exert much energy to find a poor quality of alfalfa when being fed a full ration of corn.

When we summed up the results of feeding other grains, with or without alfalfa, either as the whole of the grain ration or as a part of a ration in which they were compared with corn, and have compared them with a ration of corn and alfalfa, we find that none of the grains gives as satisfactory results as corn under ordinary conditions and prices.—*Kansas State Agr. Reports.*

Alfalfa in Arizona.

MESA, ARIZ.—The alfalfa hay situation in the Salt River Valley of Arizona at the present time is an unusual one. Most of the first and second crops were sold at the time they were cut, none of the first and little of the second crop being stored. After the second, considerable rain fell throughout the hay season, damaging thousands of tons and rendering it useless for the market as well as for home consumption. For these reasons hay is very scarce in Arizona, and the producers are receiving from $24@30 per ton, f.o.b. cars.

The hay acreage in Arizona has been cut down from 40 to 60 per cent, and in some localities a greater percentage than this will predominate, the long-staple Egyptian cotton industry having taken its place. If the enormous prices for cotton continue, and for this there seems to be a favorable outlook for next year, the alfalfa acreage in Arizona will be reduced from 75 to 90 per cent.—*J. N. Jaggers.*

Alfalfa Meal Prices Higher.

KANSAS CITY, Dec. 13.—Advances occurred in the market for alfalfa meal in Kansas City this week, the gains amounting to $1 to $2 a ton. Soaring tendency of the alfalfa hay market, together with stormy weather and lack of offerings from the West, caused the advance in prices. Sales of No. 1 were reported up to $41.50 a ton in extreme instances. Mills generally appear to be well sold ahead and some difficulty was reported in filling orders. A good demand continued from the Southeast, Southwest, Central States and the East. Feeders also were buyers.

Choice alfalfa meal was quoted at $42.50@44 per ton, carlots, sacked, basis Kansas City; No. 1, $39@40; No. 2, $35.50@37; brown, $34@35.

Continued cold weather in surrounding feeding sections caused a further broadening in the demand for alfalfa molasses and alfalfa grain molasses feeds. Little mixed feed is moving to the Far East, but a liberal inquiry is reported from surrounding areas. Prices showed little change.

CORN SITUATION.

"Demoralization now prevailing in foreign exchange market is the dominant influence in corn. Trade has been broader but seemingly in the way of liquidation, rather than new investment. It is reported that United Kingdom is offering to resell the various grains and new bids from the Continent are below a parity with American markets. There were moderate resales of Canadian purchases, solely because of the exchange question. A feeling of uncertainty pervades the entire market," said Thomson & McKinnon on Friday. "On Saturday," they added, "although the crop report was accepted as bearish, there was a comparatively small volume of selling in the corn market. This fact, in itself, prompted acceptance of profits by former sellers. Also brought support to the market from those who believe in higher prices. Southwestern cash markets were inclined to heaviness and country offerings were reported larger, but spot market here had rather firm undertone."

The new crop of Manchurian beans now moving to the ports is said to be of good quality and well dried.

Hay Department

The state of Wyoming is said to have very little surplus hay left. The crop as a whole was short and has been rapidly used up.

Shelby Co., Mo., says the high price of clover hay has in the past couple of years compelled farmers to build silos. Silage they find now is the cheapest of feeds.

It is reported from Chautauqua and Cowley counties of Kansas that there is a big surplus of hay for marketing, which, however, will not move until spring.

The state report of Colorado puts the value of the hay crop this season as $35,000,000, being the leading crop of the state. Wheat ranked second with a valuation of $31,000,000.

Boone County, Mo., reports a good crop of hay this year and fewer cattle on feed; so that some hay will have to be sold to be utilized. The quality, however, was not as good as previous years.

On or about Dec. 4 the state of Colorado had an unprecedented fall of snow, particularly on the Western slope, which in many places was 20 inches deep, the effect of which is to increase locally the price of hay on demands of feeders on the range.

A stock shipper from Stevens Co., Kans., reports the hay crop thereabouts better than previous reports have shown. There is also an abundance of cane and milo maize. Some hay has been marketed, but the greater portion is still in the stack.

The larger part of the crop of hay, which was very large in Ottawa, Craig and Nowata Counties, Okla., is still in stack, farmers refusing to accept field prices at harvest time, but have begun shipping lately and would ship more if cars were available.

Figures compiled by the State Board of Agriculture of Pennsylvania show that hay is the most valuable crop grown in that state, the estimated value being $113,000,000. Corn ranked the second with only $103,497,000. Dairy products were worth $100,000,000.

Hay buyers traveling through Nebraska report more hay at this time than for many years past, a large portion of which is tame hay. In the southwestern part of the state the yield is the largest on record; both prairie and timothy. Farmers in the southern part of the state do not care to go to the expense of baling their hay and in some parts the quality is not up to standard, being heavily adulterated with weeds. Most of the surplus crop is expected to move in the spring.

Toberman, Mackey & Co. report a continued urgent demand for hay in the St. Louis market as receipts on both sides of the river continue to run very light and surplus stocks have been all used up. A strong demand for clover hay at outside prices and good demand for alfalfa exists.

A stock shipper from Pike County, Mo., says his part of the state has produced more feeds than the farmers know what to do with, pastures having been good all season until the ice and snow covered them. The county, however, has marketed very little of its hay yet, but spring shipments are expected to be heavy.

KANSAS CITY HAY NOTES.

Sanders Sosland, Correspondent.

Removal of restrictions on office hours which were enforced to conserve fuel has restored the service rendered by dealers in hay in Kansas City to the former high character for which this market is known. It was difficult to serve the trade as desired with hours cut to 9 to 4 daily. Some offices of hay dealers employed candle light and worked without heat to keep clerical work up to date. Everything is again normal, as all restrictions were removed last Saturday following the announcement of the settlement of the coal strike.

Surprise is manifest in the market over the marked absence of the pre-holiday quiet which usually develops in hay at this season. The past week was one of active buying. Whether trade will slow up after nervousness over the railroad situation passes remains to be seen. It appears that the districts which are buying hay here are carrying such extensive supplies of cattle that they are consuming much forage. The absence of pre-holiday quiet has thus far increased bullishness over the market.

What effect will the boom in farm land have on the trade in hay? This is an interesting question. There was never so much activity and such rising figures on land as in recent months. With land higher, some dealers are wondering whether it will not be found that the tendency to reduce the acreage in meadows will grow. With land costing more, the new owners will naturally seek to raise the maximum of crops in order to effect a corresponding increase in their revenues. Alfalfa hay dealers are not greatly concerned over the effect on the acreage of the legume because they maintain that alfalfa is profitable on the highest priced land where properly sown and where soil conditions are favorable. As for other hay, there is no agreement. There is another side to the boom in farm land. It will stimulate the handling of live stock, thereby enlarging consumption of hay.

More moisture has been reported in the Southwest the last two months than in this season in years. The summer was a dry one, hence the encouragement which the hay trade feels over the recent abundance of moisture. It means that there is a better foundation for alfalfa production next year. Lack of sub-soil moisture this year was one of the influences which made alfalfa production disappointing in the largest producing states. In the case of prairie and other hay, the more liberal supply of moisture is also encouraging. In Texas, moisture has been too abundant. This has damaged some feed which might otherwise have been available in Texas for feeding to live stock. Hulls are among these products. To what extent hay has been damaged in Texas is not known. This, however, may be an influence in current Texas buying on the Kansas City market.

Prices of hay show considerable advances over the quotations of a year ago. Alfalfa prices are from $3 to $8 higher than a year ago, while the top price for choice alfalfa was $37 in Kansas City last week, the best figure a year ago was $33. In the case of prairie, the market is a bit irregular, with No. 3 as much as $1 higher and choice a shade lower. Timothy is unchanged to $1 higher, clover mixed is $1 to $2 higher and clover $1 to $3 higher. Production this year is larger. However, it is undoubtedly true that the inflation in money in the past year is a factor in the higher market. There was never before so much currency in circulation in the United States. Hay feels the effect of this in the cost of labor and loading and also in the freer spending which is evident in rural as well as urban communities. Except for the shock received by cattle and hog producers in the sensational declines of recent months, which were due mainly to the loss of export trade, hay probably would be selling higher today then now quoted, dealers assert in instances.

Farming does not pay very much in Michigan, it is said, but a business man from Scottsville rented a small plot near Manistee which he sowed to wheat. His net return on wheat screenings and straw was $958.90.

CHICAGO HAY NOTES.

The local trade is buying hay an feed heavily, at least in compariso with small receipts.

The strong outside hay demand wit no surplus from Chicago's receipts t meet it makes it necessary for certai firms handling it direct from the cou try loading stations to the buyer takin up such business. It has certain di advantages, not receiving Chicago i spection or weights but until more li eral receipts are shown on the Chicag tracks it is the only thing to do.

Another interesting angle of th probability that hay prices will be mai tained on the Chicago tracks is the r vived demand from coal mines, partic larly in Illinois and Indiana district Ordinarily sufficient forage supplies ar secured from nearby farms, but durin the coal strike such farmers baled su plus forage and shipped it fo marke a practice that they found more profi able than to sell it locally and it wi doubtless be continued. The operato therefore are compelled to buy their ha requirements on the market.

Hay Markets

ST. LOUIS.

St. Louis, Mo., Dec. 13.—The receipts hay for the past week were light, and t market is strong, with an excellent d mand, both local and shipping. Timoth hay is scarce and wanted.

Light clover mixed scarce and in d mand, offerings readily absorbed.

Heavy clover mixed scarce, strong ar higher. When offered is readily shaped u at full prices.

Pure clover scarce, very little clov among the offerings and values fully $1. per ton higher on good clover. There an urgent demand and free shipments a advised.

Prairie hay market steady, offerin moderate and demand limited.

Alfalfa hay scarce and in urgent loc and shipping request. Owing to the scar ity of clover, the trade are liberal buye of alfalfa. All grades of alfalfa are sellin well.

Track sales: Timothy, No. 1, $31.00 33.00; Standard, $29.00@30.00; No. 2, $26. @29.00; headed, $26.00@28.00; threshe $20.00@22.00. Light clover mixed, No. $30.00@31.00; No. 2, $27.00@29.00. Hea clover, mixed, No. 1, $31.00@34.00; No. $29.00@31.00. Clover hay, No. 1, $38.00 39.00; No. 2, $36.00@37.00. Alfalfa ha choice, $40.00@41.00; No. 1, $38.00@40.0 standard, $36.00@37.00; No. 2, $34.00@35.(Prairie hay, choice, $27.00@28.00; No. $25.00@26.00; standard, $24.00@25.00; N 2, $20.00@23.00. Straw, $10.00.

BUFFALO.

Dec. 13.—Owners of hay seem to sticking to it and cannot be budged fro about $29 or $30 for No. 1 and $27@28 f No. 2. There is no hay of consequen floating around which can be picked up a bargain. Millfeeds are higher and oth feeds are not going to be cheap, the farr

believes. Straw would bring $12@13 per on track.

PHILADELPHIA.

Dec. 13.—There is a good inquiry for choice hay, prices for which rule firm under small supplies, but the bulk of the offerings consists of the lower grades, which move slowly at irregular prices. Choice grades of straw are also wanted and values well maintained.

Timothy hay, choice, $34; No. 1, $33; No. 1 $30@31; No. 3, $27@28. Clover mixed hay, light mixed, $30@31; No. 1 mixed, $27@28. Straw, No. 1 straight rye, $15@15.50; No. 2 straight rye, $14@14.50; No. 1 tangled rye, $13; No. 2 tangled rye, $12.50@13; No. 1 wheat straw, $14@14.50; No. 2 wheat straw, $13.50@13; No. 1 oat straw, $14.50@15; No. 2 oat straw, $12.50@13.

BOSTON.

Dec. 13.—The local hay situation shows a slightly firmer tone with some receivers bidding at somewhat higher prices. There has been a little more inquiry from the trade during the week, although there have not been many special sales reported. In some instances where special grades at the terminals are wanted, sales are made above quotations, but as a rule the prices quoted represent the general market. Buyers are generally holding off and looking for lower prices, as invoices of hay to arrive are reported to be increasing and larger arrivals are anticipated. Canadian hay is coming forward more freely. No. 1 timothy hay is quoted at $34.00@35.00 per ton for large bales, with small bales a shade higher at $31.00@32.00. No. 2 timothy ranges at $30.50@31.50 for large bales and $30.00@30.00 for small bales. No. 1 Eastern is held higher at $30.00@32.00 and No. 2 Eastern at $27.00@28.00. No. 3 hay is unchanged at $26.00@28.00. Clover mixed is quoted at $28.00@30.00 for alsike and $28.00@28.00 for red. Fine hay is shade higher at $25.50@27.50. Receipts for the week ending December 13th were: Local, 11 cars; export, 16 cars.

The straw market shows improvement, especially for oat straw, which when guaranteed sound and sweet and of good color, sells at a premium, with very little offered. Choice rye straw is quoted at $15.00@16.00 per ton. Oat straw firmly held at $15.00@16.00. Receipts for the week ending December 13th were: Local, 2 cars.

MEMPHIS.

Dec. 13.—Hay continues very scarce and high, but demand is not large yet. The cold weather, however, is causing larger feeding and dealers think demand will steadily improve. Alfalfa is extremely scarce and prices are nominal. On call today $32 was bid for cash 2 timothy, $34 for light clover mixed and $33 for 1 clover mixed. Standard 1 alfalfa was $39.50 bid and $40 asked, with $39 asked for standard. No. 2 $35 was asked and $34 bid. Corn sticks were offered at $18.50 a ton.

NASHVILLE.

Dec. 15.—Hay prices are strong, with demand. Prices: No. 1 timothy, $35; No. 2 timothy, $33; No. 1 clover, $35; No. 2 clover, $33; very little alfalfa handled. Receipts of hay at Nashville last week, 11 cars.

BALTIMORE.

Dec. 13.—On the better descriptions of timothy, light mixed and No. 1 clover hay the market is firm as quoted, since only a small percentage of the daily receipts consists of this class of hay, while demand for such stock is fair at quotations. Off grade, common, grassy hay is in ample supply, and when a buyer for this class of hay can be found he invariably names his own terms.

Straw is sustained in price more as a result of limited spot stocks than as a result of any special activity in demand. Quotations follow, per ton: Timothy—No. 1, nominal, $32.50; standard, $31@31.50; No. 2, $30.50@31; No. 3, $27.50@29.50. Light clover mixed—No. 1, $29.50@30.50; No. 2, $28@28. Clover mixed—No. 1, $28@28.50; No. 2, $25@27. Clover—No. 1, nominal, $31; No. 2, nominal, $29. Sample hay, $20@25. Straw—No. 1 straight rye, $17@18; No. 1 tangled rye, $14@14.50; No. 1 wheat, $12@13; No. 1 oat, $14@15.

DES MOINES.

Dec. 13.—No change the past week. Demand good but receipts light owing to roads unable to handle. Receipts, 16 loads. Upland, $18@20 timothy, $22@24.

DETROIT.

Dec. 13.—Demand is active and everything coming here meets a prompt purchaser. The tone is firm and there are reports of higher prices in some instances, but there is no general advance. Canada is offering hay, but there is trouble about securing permits and little trade in that line has been done. Some demand comes from the South. The supply here, however, is so small that there is not much choice for a shipping trade. Quote: No. 1 timothy, $29.50@30; standard and light mixed, $28.50@29; No. 2 timothy, $27.50@28; No. 3 timothy, $25@26; No. 1 mixed, $28@28; No. 1 clover, $27.50@28 per ton.

$34@35; No. 2 from $33@34, and No. 3 from $31@32. Not much hay being offered, and the demand, too, is slow.

MILWAUKEE.

Dec. 13.—Prices on the local hay market have stiffened out a trifle as the result of a keen increase in demand, stimulated by the cold weather and snows sweeping the entire Northwest. Receipts continue light, yet on a more liberal scale. Choice timothy is quoted at 75c@$1 higher than last week. No. 1 is 50c better and No. 2 firm. No. 1 clover has also improved $1. Other items stand steady to slightly improved. Current quotations are: Choice timothy, $29@29.50; No. 1, $28@28.50; No. 2, $26@26.50; No. 1 clover, $25@26; light clover mixed, $25@26.50; red top and timothy mixed, $25@26.50; marsh feeding, $15@16; packing, $12@13; rye straw $12.50@13; oat straw, $12@13.

CLEVELAND, O.

Dec. 13.—In the hay market there has been an advance of from 50c to $1 per ton over prices of last week and the movement for the last ten days has been exceedingly light due to the shortage of cars. The demand for good quality hay is good and the following prices will govern the latter part of the week: No. 1 timothy, $29.50@30; standard timothy, $28.50@29; No. 2 timothy, $27.50; No. 1 mixed, $29; No. 1 clover, $31; rye straw, $12.50; oat and wheat straw, $12.

LOUISVILLE, KY.

Dec. 13.—Demand for hay is fair with receipts light and prices ranging about $2 a ton over last week, due to small shipments from country points. The Ohio river is now so high that all river shipments are dead.

Quotations are: No. 1 timothy, $32 a ton, baled, carlots; No. 2, $30.50; No. 1 clover, $34.50; No. 2, $32.50; No. 1 mixed, $31; No. 2 $29; wheat and oat straw, $12; rye straw, $13.

TOLEDO.

Dec. 13.—Hay prices were advanced this week 50c for all grades. Receipts continue extremely light and the car situation is a bothersome factor. No. 1 timothy, $28.50; No. 2, $27; No. 1 light mixed, $28.50; No. 1 clover, $30.50 per ton, carlots, f. o. b. Toledo.

DULUTH.

Dec. 13.—Operators experienced a good demand for hay during the last week. The market was strong, prairies and midlands being advanced $1. Receipts were in fairly liberal volume and dealers did not experience much difficulty in obtaining cars for shipments of supplies to Western points that were hard hit in the drought of last summer. Dairymen in the district were in the market for more hay on account of the cold weather and the heavy snowfalls. Prices per ton follow: Timothy—No. 1 $25@26; No. 2, $23@24. Mixed timothy—No. 1, $23@24; No. 2, $16@20. Prairie—No. 1, $24@25; No. 2, $22@23; No. 3, $16@18. Midland—No. 1, $18@19; No. 2, $11@13. Straw—Rye, $9@10; oat, $9@10.

KANSAS CITY.

Dec. 13.—Sharp advances marked the trade in hay in Kansas City this week. Alfalfa closed with gains of $1 to $3 a ton, prairie advanced $1 to $3.50, timothy and clover mixed were up $1 to $2, and clover scored a rise of $3 to $7. There was a further decrease in the arrivals of hay in Kansas City, the total receipts amounting to 739 cars, compared with 832 last week and 716 a year ago. Demand for alfalfa continued of enormous volume, inquiries coming from practically every section of the country, including the East, North and South. A top of $38 a ton was paid for choice alfalfa, a new record for the crop year. Cheaper grades showed good gains. Prairie sold well to local trade, outside feeders and stock yards. Timothy and clover mixed were in demand from the Southeast and Southwest. Straw advanced $1 a ton, with sales up to $12.

Prairie—Choice, $26@26.50; No. 1, $25@25.50; No. 2, $23.50@24.50; No. 3, $21@23; packing hay, $12@18.

Midland prairie—No. 1, $20@23; No. 2, $17.50@19.50.

Alfalfa—Choice, $36.50@37.50; No. 1, $35@36; standard, $31@34.50; No. 2, $28@31; No. 3, $24@27.50.

Timothy—No. 1, $27.50@28; standard, $26.50@27; No. 2, $24.50@26; No. 3, $21@24.

Clover mixed—Light, $27.50@28; No. 1, $26.50@27; No. 2, $22@26.

Clover—No. 1, $27@30; No. 2, $23@26.50.

Straw, $11.50@12.

MINNEAPOLIS-ST. PAUL.

Dec. 13.—Quote hay prices for the Twin Cities as follows:

	Minneapolis.	St. Paul.

Standard		36.00
No. 2		25.00
No. 3		27.00

NEW YORK.

Dec. 12.—The New York Hay Exchange reports the hay situation as follows:

	Hay tons	Straw tons
Receipts for week (6 days)	4,702	360
Receipts last week (7 days)	5,494	410
Receipts Sept. 1 to date	64,017	5,000
Receipts same time last year	86,109	5,050

The market has steadily weakened and prices are from $1@2 a ton lower than last week. Demand has been very light and receipts have been liberal at all harbor points with stocks showing a decided tendency to accumulate. Most of the hay now offering is No. 3 and shipping with a heavy proportion of small bales which is especially slow sale, this condition being in contradistinction to a week or so ago when there was a surplus of high grade hay. Scarcely any hay is coming forward now from Western points as it cannot be laid down here at a profit. Quotations:

	Large bales per ton	Small bales per ton
No. 1 hay	$34.00@	$33.00@
No. 2 hay	30.00@32.00	30.00@31.00
No. 3 hay	28.00@29.00	27.00@28.00
Shipping hay	26.00@27.00	25.00@26.00
Fancy light clover mixed hay	@32.00	@31.00
No. 1 clover mixed	28.00@30.00	27.00@29.00
No. 2 clover mixed	26.00@27.00	25.00@26.00

Straw—No. 1 rye, $15@16; No. 2 rye, $14; No. 1 oat, $15@16; No. 1 wheat, $13.

MONTREAL.

Dec. 12.—Farmers in this province are known to have much larger stocks than at this time last year, and yet are less inclined to sell, as will be seen by the comparatively small receipts, which for the week ending Dec. 3 were only 3,936 bales as compared with 7,267 bales for the corresponding week last year, a decrease of nearly 50 per cent, and yet the country is full of hay, whilst the local market supplies are barely sufficient to meet consumptive requirements. Growers of hay, however, may be waiting for something that will not turn out as they expect.

The local market remains firm under a good demand and small supplies, sales of carlots being reported on track at $24@26 for good to choice No. 2, $22@23 for No. 3 timothy, and $21@22 for clover and clover mixed. The supplies are coming mostly from the north shore, where the quality is said to be the best in Canada.

The receipts of baled hay last week were 5,981 bales, against 14,694 bales for the same week last year. There has been some inquiry from England, but as stated by us some time since the low rate of exchange and high freights precluded any business.—Trade Bulletin.

PITTSBURGH, PA.

Dec. 13.—Excellent demand for best grades of hay still exists here and supplies are being rapidly absorbed at fair prices. Receipts of No. 1 timothy, No. 1 clover mixed and No. 1 clover hay remain very light and the market is consequently buoyant. The other grades are coming in sufficient quantity to meet the light demand at this time. Quotations are as follows: No. 1 timothy, $31.50@32; standard, $30.50@31; No. 2 timothy, $29@29.50; No. 3 timothy, $27@28; No. 1 clover mixed, $32.50@33; No. 1 light clover mixed, $30.50@31; No. 2 clover mixed, $29@30; No. 1 clover, $33.50@34; No. 2 clover, $27@30. Receipts for the period were 1,668 tons, as compared with 1,536 tons the week previous and 2,650 a year ago. Straw is scarce and high with plenty of demand for best grades.

CHICAGO.

Dec. 15.—The following is a statement of the receipts and shipments of hay in tons in the Chicago market for the week ending Dec. 13, also the total receipts and shipments of hay from Jan. 1, 1919:

	Dec. 13. 1919.	Dec. 6, 1919.	Dec.14, 1918.
Total receipts	6,639	5,622	5,006
Total shipments	355	315	225
Rcpts. since Jan. 1.	229,888	223,249	303,362
Shpts. since Jan. 1.	6,292	5,937	83,541

The extreme cold weather has atenuated feeding and the larger receipts for a week were all absorbed at top prices. Loadings show some slight increase, but shipments for some time at least are liable to bring present prices, at least until there is a marked change from these conditions. Quote:

Timothy—No. 1, $31@33; standard, $30@31; No. 2, $27@30; No. 3, $24@27; checked, $18@24; sample, $24@27.

Clover—No. 1 light mixed, $30@31; No. 1 mixed, $28@30; clover, $28@32.

Alfalfa—$30@39.

Procene—Kan., Okla., Nebr., $24@30; Ill., $16@22; Ia. and N. W., $20@25; feeding, $14@18; packing, $11@15.

Straw—Rye, $14@14.50; oat, $13.50@14.50; wheat, $12@13.50.

CINCINNATI.

Dec. 16.—Stronger conditons and a very snappy demand prevailed in the hay market throughout the week, and the light movement, caused by the reported car and labor shortage at loading stations, found eager buyers at new high prices of the crop. The trade failing to secure what the requirements demanded of choice hay turned to the low grades and all inferior kinds, and consequently there was less of a wider gap between the two extremes in quality. Those wanting choice timothy, clover and alfalfa to fill urgent orders paid whatever price was asked, and warehouse stocks in some instances were drawn upon to supply the deficiency. Colder weather is stimulating the demand from all sources, and unless the car situation is improved add receipts materially increase a stronger market can be expected. Total receipts 166 cars.

No. 1 timothy, $32.00; Standard timothy,

$31.50@32.00; No. 2 timothy, $30.50@31.50; No. 3 timothy, $29.50@30.50; threshed timothy, $21.00@22.00; light clover mixed, $30.50@31.50; No. 1 clover-mixed, $30.00@31.00; No. 2 clover-mixed, $28.00@30.00; No. 1 clover, $35.50@36.50; No. 2 clover, $30.00@33.00; sample, grassy, $24.00@27.00; No. 1 western alfalfa, $40.00@41.00; No. 1 local alfalfa, $37.00@38.00; standard alfalfa, $36.00@37.00; No. 2 local alfalfa, $33.00@35.00; wheat straw, $12.00@13.00; rye straw, $12.00@13.00; oats straw, $12.00@13.00.

Sharp Demand for Hay and Feed.

STUART, NEBR.—The hay situation has materially changed within the past two weeks. At the beginning of the marketing season for the 1919 crop, the indications were for lower prices than we have had during the past two years. However, it was then predicted that it would be a weather market, price depending on the character of the winter—whether mild and open or with lots of snow and low temperature. We are having the latter brand: it is cold and we have lots of snow. The demand from the feeding districts has increased by leaps and bounds, and while a great part of this is emergency demand, we are going into the winter with a lot of snow on the ground, rough feed covered and hay the only recourse.

The price has, therefore, advanced from $4 to $5 per ton. Weather and roads conditions are so bad that the output of the hay for the present has almost ceased. There is very little in storage in the Elkhorn Valley district. Continued cold weather will cause a further advance in face of the fact that there is lots of hay still in stack. Perhaps 33⅓% to 50% has been moved.—*Wm. Krotter Company, by Wm. Krotter. Pres.*

Movement of Corn.

Following is a statement of the receipts and shipments of corn at the primary markets of the West for the weeks named:

Chicago Grain Strikes.

Wheat stocks in all positions in Chicago decreased 290,000 bu. last week, oats 381,000 bu., rye 106,000 bu. Corn increased 65,000 bu. Barley unchanged. Detailed stocks follow, last three ciphers omitted, except in the totals:

	Public.	Private.	Total.	Last yr.
Wheat ..	5,678	10,871	16,549,000	12,855,000
Corn ...	74	557	631,000	522,000
Oats	1,590	3.555	4,145,000	4,820,000
Rye	1,512	1,100	2,612,000	954,000
Barley ..	236	125	361,000	1,517,000

John Burroughs at Chicago the other night said the presence of far northern birds at lower latitudes this winter indicates that the winter is going to be severe throughout; if it continues as cold as it has been thus far in December it will be a "hummer." It is also reported from The Pas, Manitoba, that large packs of wolves are roving throughout the Northwest more or less in a conditoin which indicates to natives that the winter is to be a hard one. It is also noted that for the first time since 1915 ptarmigans were seen at The Pas, another indication of extremely cold winter in store. In 1915 the thermometer at The Pas went to 54° below.

Trade Mention

Faie Hurd has resigned the secretaryship of the Union Iron Works of Decatur, Ill., and of the Beall improvements Co., and is now president of the Twentieth Century Mill Mfg. Co., manufacturers of self-contained mills.

Nat Claybaugh, grain elevator broker at Frankfort, Ind., is sending to friends and customers a very neat memorandum pad to be attached to telephone. This is a very forceful reminder of the most excellent service furnished by Mr. Claybaugh and the gift will be appreciated by all recipients.

The Monroe Calculating Machine Co. has taken offices on the ground floor of the Metropolitan Life Bldg., Minneapolis, which is but two blocks from the grain center of Minneapolis. This machine is considered as part of the standard equipment of Minneapolis grain merchants and 100 Monroes are already in use there.

The Ronstadt Grain Co., Tucson, Ariz., handles a large receiving and shipping business in grain, hay and seeds. Richard Ronstadt is the guiding influence of the concern, a man who is posted on railroad matters as well as on the trade affairs in which he is now making such a success. The firm is located in territory which has developed wonderfully in our field, and in following the business principles laid down for their future work, outside trade should find dependable connections with the Ronstadt Grain Co. for Arizona business.

The Gutta Percha Mfg. and Rubber Co. was granted a judgment for $239.45 against the Lehrack Contracting and Rubber Co. by the Kansas City Court of Appeals, which affirmed the decision of the Circuit Court of Jackson County. It seems that the Lehrack Company had purchased a special 36-inch conveyor belt and installed it in an elevator for the Blair Milling Co. at Atchison, Kans. Of the purchase price $1,000 was paid but the remainder, $239.45, was held up and in court the purchaser claimed that the belt was crooked. The jury, however, decided against him.

The Vale Milling and Elevator Co. of Vale, Ore., is now in operation and the first of its products coming on the market. The mill is one of the finest and largest flour mills in eastern Oregon and will manufacture all kinds of feed, bran, graham flour, breakfast food, corn meal, cracked wheat, etc. The staple brand of flour produced by the mill will be known as "Warm Springs" Flour.

For Promptness and Satisfactory Results
Consign Your
GRAIN and HAY
to
The Early & Daniel Co.
Cincinnati, Ohio

To date 60,000 bus. of wheat have bee purchased by the mill and a great grain area than ever is anticipated the vicinity of Vale for the 1920 cro President of the company is Warre Armington.

W. L. Eastman has become vice-pre ident of the Thielecke Advertising C of Chicago, resigning as advertisi manager of the Moline Plow Co. of M line, Ill. The Thielecke Company wi continue handling the Moline Plow Co. account under the direction of M Eastman.

The firm of A. F. Leonhardt & C Co., grain and hay merchants of Ne Orleans, La., has been dissolved by m tual consent and all claims against t company should be presented to A. Leonhardt & Co., in Liquidation, Que & Crescent Bldg., New Orleans. Paul Kalman will continue the business u der the name of Paul R. Kalman C Inc. Mr. Kalman is well known to t trade, having been with the Leonhar Co. since its inception and managi partner thereof for the past four year The retiring surviving partners of A. Leonhardt & Co. bespeak the form patronage and good will of their cu tomers for the newly organized cor pany.

The ABC (Audit Bureau of Circul tion), recognized everywhere as t only sure basis on which advertisi can be bought, has compiled and issue interesting statistics showing that per cent of the daily papers in t United States and Canada are AB members. They likewise have totale a magazine circulation of this countr aggregating 29,000,000, guaranteed ABC audits. On the same basis of fi uring, they find that the total ABC a ricultural journal circulation exceed 9,000,000. THE PRICE CURRENT-GRA REPORTER is a member of the ABC an is the only trade paper in the fiel covered by our several department furnishing *bona fide* circulation stat ments compiled on the ABC plan to i advertisers and prospective patrons.

A Calendar.

he 1920 "Full-O-Pep" poultry cal-r and account book published by Quaker Oats Company, Chicago, is -page book which contains many able suggestions for poultry breed-besides furnishing the forms for small flock owner to keep the thly egg record and expense ac-t of his flock. The plan for laying a back-yard plant, and the illustra-of houses and fixtures, all have yactical value which is bound to e advantageous to those who follow precepts given. The suggestions to e dealers and for feeding and the ter on "How to Select the Layers" surely lead to greater egg produc-and as eggs are valuable these these teachings are bound to be ciated by any who try to follow and who thereby obtain better ts.

anks, Morse & Co. Increase Facilities.

has been announced by Fairbanks, e & Co., Chicago, manufacturers of , engines, motors, feed grinders, etc., that their plans have been leted and they are now ready to the most modern foundry in the on an 11-acre tract situated in t, Wis. This winter all raw ma-s necessary to construction will t to the building site, and as soon e ground is free from frost build-operations will be started and d through to an early completion. foundry will contain 495,000 e feet of floor space, which in-storage space under roof for , iron, sand, etc., and the capacity e foundry will be 350 to 400 tons y iron daily. Electric cranes will ployed to handle all raw mate-and there will be electric grab ts, electric magnets and convey-hich will efficiently speed up pro-n in the great works. In all it is said that $1,500,000 will be expended to make the plant an ideal one from a production standpoint, at the same time assuring workmen employed the best possible working conditions.

The ventilation system will be of the most modern type, affording clean tempered air continuously, and in addition to individual lockers for all workers there will be a modern cafeteria and a splendid system of hot and cold shower baths, large enough to accommodate all the men. The men will be able to procure a hot meal at a minimum of expense and also enabled to leave the foundry refreshed and clean, stepping into their street clothes as though there had been no grimy toil during the day. It is expected that the new foundry will employ 3,000 additional men and will greatly increase the output of the Fairbanks, Morse Co.

Elevator Work at Sioux City.

There are probably no grain markets, large or small, showing greater strides than Sioux City, Ia., in the construction of their elevators and mills. Much has appeared in THE PRICE CURRENT-GRAIN REPORTER regarding this work, the status of which is now as follows: The Flanley Grain Co.'s elevator is finished; the Mystic Milling Co.'s grain storage is completed, both properties awaiting only power to go ahead; 70 per cent of the terminal elevator for the Terminal Grain Corporation is completed; and 95 per cent of the house for the Western Terminal Elevator is finished, the roofing now being applied. So much as the tangible results of persistent and intelligent work on rate adjusting and of the actual adjustment. Sioux City and its territory has been put in possession of their ethical rights and privileges for marketing and no one has been harmed thereby.

Exportation from Germany has been prohibited as to foodstuffs and animal feeds of all kinds, including seeds; horses, cattle, hogs, sheep, goats, and fowls; animal and vegetable oils and fats; artificial fertilizers, especially phosphorous nitrates and fertilizers containing calcium.

RICHARDSON, BASEBALL MAGNATE.

"Billy" Richardson of the Philadelphia Bourse, and long identified with the best in the grain circles of this great city, is referred to as the "angel" in a deal contemplating the sale of the Washington Club of the American Baseball League to Clark C. Griffith and himself. The Chicago *Tribune* publishes the following regarding it:

"Mr. Richardson thus becomes an equal partner with Griffith in ownership of about four-fifth of the 20,000 shares of stock, in the club, purchased from a dozen local holders. Griffith will vote the stock, however, and control the club's future policy. The price is said to have been approximately $400,000, and Griffith, manager of the club for the last eight years, will succeed Benjamin S. Minor as president, continuing to act as field manager also, temporarily at least.

"In a statement Griffith said he planned to build the club up and put it in pennant winning shape for next year. The deal included all assets of the club and the new president indicated that a vigorous policy that would not let expense stand in the way of development of the team would be pursued."

Every grain man is a baseball fan and it has been suggested that early applicants to Mr. Richardson for an annual pass will receive one if the supply has not been exhausted on the date their letter arrives.

BURLAP MARKET.

There were some recessions recently in burlap prices in New York, which however, were not so well established as to be considered permanent or likely to be, as this week prices were stiffer in New York. There have been some signs of stability to the foreign markets, which, however, are inclined to be strong rather than the reverse.

Dundee, for example, on Dec. 4 cabled New York, the *Journal of Commerce* reports, "A rise in jute. One importer states that his cable from that center notes the quotation of £67 on Calcutta jute, which is a distinct gain over the recent low point, when the quotation was £52. The same cable quotes Dundee jute at £70, which is up from a low of £60. Hessians at Dundee are 10½d for heavies and 7⅞d for lights or 16.50c and 12.60c at the present rate of exchange without adding cost of transportation and insurance."

Dundee reports a large business in jute yarns for export to the European Continent and South America and available yarns are said to be sold up to next June. Europe is in a position to do weaving and is consequently in the market for the necessary yarns. The Calcutta market was reported stronger.

The rise in the price of silver would in normal conditions of trade have a tendency to stiffen prices in India and to reduce exports, the jute and products at Calcutta being paid for in silver rupees, and as a matter of fact late quotations from Calcutta are higher. Coupling this fact with the heavy demand everywhere the theoretical position is certainly strong and has as an offset only the fact that the demand of the Allied governments for bags for trench defenses has come to an end, and the South American demand for the moment is less strong.

Provisions, Etc.

CHICAGO PROVISION REVIEW.

CHICAGO, Dec. 15.—Provision prices were on the down grade the greater part of the week and closed well toward the bottom with lard in the lead. December was under pressure and finished at a loss of $1.37½, while May lost $1.10 and July 57½c. January short ribs closed $1.02½ and May 27½c lower, while May pork was off 20c and January up 37½c, as compared with a week ago.

Lard was actively traded in at times, and unusual pressure was put on December and January, particularly toward the last. On Saturday the deliveries were 500,000 lbs. on top of 150,000 lbs. on Friday. Local packers were active in trying to widen the carrying charges and succeeded to a considerable extent. It is said they want to make the spread from January to May $1 and possibly $1.25, while at the close the difference of 65c. A good business was on in changing from December to May by speculators. On the break on Saturday heavy covering of shorts in both lard and ribs was under way, as there were good profits in recent sales.

The lard situation is rather bearish for the time being. The make is large and there is a good profit in cutting hogs for regular product of about all kinds. Eastern speculators who have been reselling lard for some time past continued along that line. New export business seems out of the question with sterling exchange rates continually on the decline and rates to other countries also selling around the lowest on record. Loose lard was 60c under December. Leaf lard closed at $22.

Shipments continue large and last week were 15,473,000 lbs., compared with 14,301,000 lbs. last year. There is little new speculative buying coming into the market.

January ribs were sold by speculators and packers, the former being aggressive at times. One of the features of the provision trade was the alternate selling and buying of January and May products by Cross, Roy & Saunders, who are said to be acting both for packers and speculators. Packers are making ribs for delivery in January despite recent restrictions on fuel supplies. Some of the smaller packers in the country have been closed down entirely, which has tended to increase supplies of hogs here. Cash business continues limited both on export and import account, although the latter is natural at this season, as consumption of poultry in a measure takes the place of hog products. More call for hams was noticeable late in the week, although business was not large.

A little buying of pork was on late in the week against cash sales. Otherwise business was largely speculative and the bulges were made by shorts covering. Supplies of hogs were liberal and packing here shows a big decrease from last year.

Range of prices in November and previous and for the week follow:

Kansas City Provision Review.

KANSAS CITY, Dec. 13.—Settlement of the strike of coal miners aided the market for provisions in Kansas City this week. While the trade does not yet show signs of improved buying, consuming interests manifest a more friendly attitude toward the market. Demand for fresh pork was of fair to good volume. Shipments to the East were moderate, while a good trade was witnessed in local territory. Prices for loins closed with gains of as much as ½c, and other cuts also showed slight advances. Southern demand for dry salt and heavy smoked meats was spotted, some areas being light buyers because of poor crop outturns, while other sections are buying on a large scale. Prices on heavy smoked meat also were higher. Lard demand was good, and substitutes moved in fairly liberal volume, with prices unchanged to ½c higher. Fancy hams and bacon were in fair demand.

Weekly Movement of Provisions.

Following were the receipts and shipments of provisions at Chicago for week ending Dec. 13, 1919, and since Nov. 1, 1919, as compared with the corresponding time in 1918:

Received—	For week.	Since Oct. 31, 1919.	Same time, 1918.
Beef, pkgs..	.....	33	588
Pork, brls...	.....	800	518
Cut meats, lbs.	2,737,000	16,587,000	17,583,000
Lard, lbs...	3,099,000	16,063,000	14,696,000
Shipped—			
Beef, pkgs..	217	1,500	6,579
Pork, brls...	1,273	9,282	16,108
Cut meats, lbs.	29,600,000	163,339,000	137,787,000
Lard, lbs....	15,473,000	84,066,000	85,395,000

Export of Hog Products.

The past week's export clearance of hog products, compared with previous week (last year's reports suppressed by the Government):

	Dec. 13, 1919.	Dec. 6, 1919.	Dec. 14, 1918.
Pork, bbls.	1,230	630	1,420
Pork, lbs.	233,700	119,700	269,800
Meats, lbs.	24,610,000	31,159,000	29,693,000
Total meat	24,843,700	31,278,700	29,962,800
Lard	13,316,000	18,233,000	9,458,000
Total products.	38,159,700	49,501,700	39,420,800

Chicago Live Stock Movement.

Receipts and shipments of live stock at Chicago the past week follow:

Receipts—	Hogs.	Cattle.	Sheep.
Past week	252,504	90,008	108,366
Preceding week.	239,847	108,133	105,552

For the week.....	857,000	1,132,000
Preceding week.....	847,000	1,097,000

Weights are reported as follows: 180, 202, 219, 193, 248, 240, 224, 207, 216, 226. Reports of quality: Five "good," two "fair" and one "good mixed."

Cash Meats.

Reflected by the lower price of hogs during the past week hog products were quotable lower than the previous week. Trading Monday, the 15th, was of moderate proportions as affecting mess pork, lard and ribs and the market made slight gains due in part to the strength in corn. Export demand is rather slow. Quotations as of Dec. 15 follow:

*Lowest week's average since February, 1917.

Live Stock Markets

CHICAGO LIVE STOCK.

CHICAGO, Dec. 15.—Hogs sold the lowest last week of any time since February, 1917, the $12.50 level which the trade has talked of for some time past became an unexpected certainty. A good rally followed the break and the close was on a fairly strong market with the top $13.45 or 5c lower than the extreme high point Monday and 85c higher than Tuesday, the lowest day of the week. Compared with the previous Saturday, prices were $1.10 lower than the high point of the previous week. Saturday's average was $13.20 and for the week $12.80, a loss of $1.20 for the week, and compared with $17.56 last year. The lowest average of any day during the week showed a loss around $5 from a year ago.

Small packers, shippers and speculators were good buyers throughout the week and were a factor in making prices. Receipts were 228,300, and were under the previous week's and last year's. Quality was good with an average weight of 227 lbs., against 221 lbs. the previous week and 222 lbs. last year. Packers bought 196,900 hogs for the week, against 217,300 the previous week and 258,600 last year.

The run of hogs at the eleven markets for the week was 740,000, against 812,000 the previous week and 1,080,000 last year, when they were the largest on record.

Fancy high grade steers made a new record last week with sales of 16 head of 1,640-lb. Herefords at $21.50, or 75c higher than the previous record made December 1. The lot were unusually fine finished and were said to be better than any exhibited at the International Live Stock Show, although not fed for show purposes, and were bought by Boston butchers. High prices for steers early in the week were offset by sharp declines later, which carried prices down $1 to $1.50 under the high point of the week and made the average for the week $14.65, compared with $15.10 the previous week and $14.50 last year. A falling off in demand late in the week was responsible for the unusual break, while early in the week buyers took hold freely and prices were moved up 50c to $1 over the previous week's finish. Common and medium steers led the advance and decline and there were not as many choice lots in the week's run as of late. There is said to be a lighter call for certain meats owing to reduced general consumption as a result of the coal strike closing many industries.

The week's receipts of 377,100 with 279,000 at the seven markets showed a decrease at both, and at 20 markets there were 377,100, against 430,000 the previous week and 434,000 last year. Butchers' stock after advancing early in the week closed with net losses of 25 to 50c with the average for fat cows and heifers $8.50, or 30c higher than the previous week. At the close best heifers were $15 to $15.50 and cows $13.25. Bulls were higher and met a fair sale with an average of $17.60, a gain of 10c. Canner and cutter stock had a wide range with an average of $5.75, a gain of 10c. Calves lost 50c for the week with the close $17.25 for choice and an average of $17, a gain of 25c.

Stockers and feeders were affected by the general slump in the late trading with a decline of 25c to 50c, making the average $9.25. There were ample supplies and a rather slow trade because of the cold weather and the difficulty in shipping.

Choice fed Western lambs sold up to $17 with Eastern shippers buying at an advance of 75c to $1 was made for the week with the average of lambs $16.05, or 30c higher for the week at 95c up, as compared with a year ago. Feeding lambs were in lighter supply and good lots brought $14 to $14.5

ged sheep finished 50 to 75c higher th the bulk of sales for the week nging at $8.50 to $9.50, and the aver- e was $9 or 40c lower for the week d 50c under last year's. Receipts re were 105,624, against 132,258 last ar. The twenty markets had 380,300, ainst 440,600 last year.

Estimated receipts at Chicago for this ek are: Cattle 87,000, hogs 240,000, eep 100,000. Receipts last year were: ttle 96,028, hogs 251,590, sheep 96,080.

Kansas City Live Stock Market.

Sanders Sosland, Correspondent.

Kansas City, Dec. 13.—While receipts e increased, prices of live stock closed dy to higher this week. The improve- nt was due in part to the fact that ar- ls at other markets of the West were ter on the whole. Cattle and sheep layed the best tone, while hogs were tle and sold at a general average ch showed a decline.

ressure was felt from packers in the market, the average cost of droves de- ing from $14.10 in the preceding week 13.27. The close showed a top of $13.85, tically steady for the week. The es here continued to show premiums Chicago and other markets, with the l figures as much as 50 cents over Chi- o. There was buying by Wichita, s., and Dallas, Tex., packers here, this g due to the scarcity of hogs in the thwest. At the outset prices broke $1, after the declines the first two days a tionary tendency developed. Early petition from shippers was a help to trade. Stock hogs were slow, ruling veen $11 and $12. Cold weather tended restrict this business. There is more idence than in weeks in the desirability uying stock hogs, as it is believed that market will improve after January. In meanwhile, however, recessions from current quotations will not surprise trade.

the cattle market weakness was the early, and then the trade turned up closed steady to 50 cents higher. The ation of the coal strike was a favorable or, as it brought a condition which e stronger competition from stocker feeder buyers. A top of $22 was paid 15 Hereford long yearling steers for the stmas trade, the highest price of the . These steers averaged 1,140 pounds. Angus steer of about the same weight at $23. The first Colorado pulp-fed e of the season arrived a month ear- than usual, and sold at $13.25 to $13.50. calves sold up to $16.50. Best cows quoted at $12 and canners down to . Range cattle predominated in the lies, and liberal runs are expected for w weeks yet.

rival of the first pea-fed lambs of the n was a feature of the trade in sheep. s closed 50c to 75c higher, with the ambs at $16.25. Fat ewes sold up to

St. Louis National Stock Yards.

H. L. Wyatt, Correspondent.

National Stock Yards, Dec. 13.—There more good cattle on the market this than we have had since the early part e year but not nearly as many as we in the corresponding seasons of ous years. The market experienced sharp fluctuations in prices but at lose it is strong and unevenly higher. good weight cattle being the best s. The top for the week was made on d of 930-lb. baby beeves which brought . A load of heavy beeves averaging lbs. brought $20. Of course these are intended for the Christmas trade. gs continue to arrive in very liberal e and the quality is fair to good. icted transportation because of the supply had rather a depressing effect e shipments this week. Notwithstand- his, however, the market has held up well, and while it is 40c under the time of the week it averages not far steady as compared with the close st week. The closing quotations are: and butchers, $13.10@13.60; good s, $13.50@13.60; rough, $11.50@12.50; $13.25@13.50; pigs, $12.50@13.50; bulk, @13.50.

sheep and lamb market continues g and active. There is a demand for ing with weight and a keen demand eighty stuff if it has quality. Lambs this week at $16.60, which is the st point in that department of the t since early last August.

South Omaha Live Stock Market.

Bruce McCullough, Correspondent.

Omaha, Dec. 13.—Although cattle re- the past week have been of very rate proportion, 36,500 head, the trade eratic and uncertain throughout and g quotations not materially different the week previous. Blizzardy weather northwest and industrial restrictions count of the coal shortage were the nding features of business. Early e week prices advanced 50@75c on beef steers and cow stuff but by the f the week the advance had all dis- red and tone to the trade was rather than otherwise.

prime, well finished beeves are com- d such would sell at $16@18 or pos- better. Most of the fair to good 1100 00 pound steers are selling around 5 with the common to fair short fed armed up steers at $10@12.50 and on down. Cows and heifers are selling at a very wide range. Some prime Christmas heifers brought $13.15 and common canners are selling at $4.50@5.50. Bulk of the fair to good butcher and beef stock is going at a spread of $7.50@9.50. Veal calves are steady for the week at $8.25@14.25 and bulls, stags, etc. stronger at $6@11.

There was not much activity in stock- ers and feeders but choice fleshy grades were scarce and firmly held at $11@13 while common light stuff was a drug on the market at the lowest price of the sea- son $5.50@7.

The run of hogs this week was com- paratively small, 35,000 head, but market conditions were demoralized by bad weather and the coal shortage and while fluctuations were rather sharp from day to day the close of the week finds hogs selling in much the same notches as a week ago. There were about 4,300 hogs here today and they sold at prices rang- ing from steady to 10@15c higher. Tops brought $13.65 as against $13.50 last week and bulk of the trading was at $13.35@13.60 as against $12.75@13.25 a week ago.

Activity and strength featured the mar- ket for sheep and lambs practically from start to finish and closing prices were any- where from 50c@$1 higher than a week ago. Best fat lambs are selling at $15.75 @16.25, yearlings $12.50@13.50, wethers $10.50@11.50 and ewes $8.25@9.25. Compe- tition from feeder buyers was vigorous all week and the liberal offerings were well cleaned up every day.

Oklahoma Live Stock Market.

Thusnelda Haehnke, Correspondent.

Oklahoma City, Dec. 13.—Very light runs were seen here the fore part of the week, and with the weather being as inclement as it is, has made it a pretty hard deal all around. Tuesday's prices were steady to strong. Features were many, $15.50 being the top for a two carload lot of choice yearlings averaging 925 lbs., as against the same price and 985 lbs. a week ago. Steers for the week, all grades, are from 25@40c higher, with a strong demand in every- thing. Some sales on short fed good quality steers, 950 lbs. and 1,050 lbs. averaging at from $11.50@13. Meal and hull fed steers, 1,000 lbs. to 1,100 lbs., only fair quality, have sold readily at from $10.50@11.50. Monday along the butcher line five loads of cows, white faced, fattened on kaffir and maize, made $9.50, the highest price on such quantity of cow beef made here in months.

Cold weather has put a crease in the hog market, as receipts were very light. In the North Chicago only had an abundance of hogs and this accounts for the cheap- ness there compared to other markets. The situation is just as uncertain as between markets on a given day as between the prices one day with another. Local scar- city helps local rates and plentitude lowers them, regardless of the situation as a whole. Average quality was fair to good, and top here was $13.25.

A few sheep have been coming our way and those that came are going at steady prices.

Denver Cattle Market.

Denver, Dec. 11.—The market this week was very uneven and spasmodic, good and desirable kinds (while lower) selling read- ily at the decline while plain kinds of every class have been draggy and hard to sell—"sort of a catch as catch can market." sales on this kind being very uneven and 25c to 40c apart on practically the same kind of stuff. The cold weather will, in all probability, stimulate conditions on kill- ing grades, but the trade has no hope for much improvement on feeders or stockers of medium kinds. Prices range substantial- ly as follows: Killers, $7.35@8.75; feeders, $5.75@10.30; stockers, $6.50@7.50@9.15@10; heifers, $6.50@7.50.

Canadian Livestock Market.

Winnipeg, Dec. 13.—The hog market was one of heavy receipts last week having in- creased approximately 1,000 head over the previous week. Select hogs declined 50c at the opening of the week, remaining at $15.50 throughout the six days' trading. Heavies were quotable $13.50, with lights $13.50@14.50, and sows $11.50. Choice steers were quotable $11@12 with fair to good quality $9.25@10.75. Cattle receipts were lighter than previous week, decreasing ap- proximately 4,000 head.

Short Term Feeding.

Short feeds are even more popular this year than they have been in past seasons, according to a feeder near Stanton, Nebr.

"The break in cattle last summer, just when many farmers were ready to market their steers, made a lot of them feed ten and eleven months," he said to the *Journal-Stockman* of Omaha. "That and the general uncertainty of conditions have helped to popularize the short term this fall."

Up to a couple of weeks ago hardly any feeders had been bought in that section, but during the past week a lot of them have been taken out. Un- less there is a radical change in pres- ent plans, it also looks as though there would be a shortage of finished beef next summer. The steers this feeder sold were bought at $13.00 last summer. While they were fed entirely on old corn, which was costly, they made an excellent gain and show a moderate profit.

Movement of Cattle.

Weekly receipts and shipments of cattle and calves at Western centers week of Dec. 13, and totals with com- parisons for corresponding time last year, compiled by THE PRICE CURRENT-GRAIN REPORTER:

FOR SALE — Large amount of rass Hay for sale. Address SIMON ADT, Los Lunas, New Mexico.

TRADE MENTION

Chas. F. Glavin, vice-president of the Pampa Grain Co., Ltd., and of the Buenos Aires Elevator Co., Ltd., also conducting a manufacturing business, the Cereal Machinery Co., Ltd., has been in the United States for a short while. He is known to the local trade, and in fact is representing such standard equipment as Monitor Grain and Seed Cleaning Machinery, the Diamond Rubber Belting and Fabric Belting manufactured by the Imperial Belting Co. of Chicago.

The money-making qualities of grain and seed handling and cleaning machinery is undisputed, but a little incident reported by our Baltimore correspondent, about a firm which found a silver coin in the cleanings from grain, was passed on to the S. Howes Co., Silver Creek, N. Y., who reply in an interesting vein as follows: "There is nothing strange that a 'Eureka' would turn out a dime; in fact, all 'Eurekas' turn out many of them with surprising regularity. For more than 60 years 'Eurekas' have demonstrated themselves to be money-makers and the people at Baltimore are simply one of some 66,000-odd customers who have discovered the pleasing money-making features of 'Eureka' Machines." It is quite obvious that THE PRICE CURRENT-GRAIN REPORTER cannot mention the name of the Baltimore mill, for they would immediately be petitioned by all of their Western shippers claiming incomplete returns on the car unloaded and requesting the addition of the amount of the silver coin that was found.

Loading Machinery.

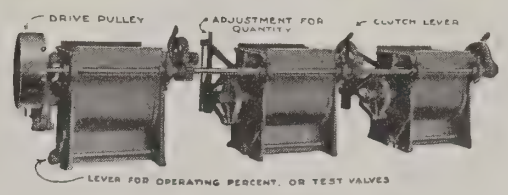
The McKinney-Harrington Company of North Chicago, Ill., manufacturers of machinery for loading and unloading, conveying or piling commodities in boxes, bags, bales, barrels, rolls or bulk, has had a wonderful growth during the last two years. Their machines are essentially time and labor savers, and as such, make a strong appeal to buyers; particularly at this time, when one of the most difficult problems confronting an employer s that of conserving labor.

The uncertainty of an adequate supply, together with the ever advancing wage scale and consequent strikes has brought about conditions very discouraging to the employer. Where such work is accomplished with a machine, these factors which disturb otherwise normal factory production are eliminated.

The demand for such machines has increased, until McKinney-Harrington Company have tripled the size of their plant, and are prepared to answer all inquiries, giving them prompt attention with quick shipments at reasonable prices.

Calendars Received.

This year's calendars are certainly pretty and expensive; and we wish to acknowledge with thanks attractive calendars from the O'Bannon Co., Claremore, Okla., illustrating an appropriate Christmas scene, "The Turkey Roost." That of the Urmston Grain Co. of Indianapolis and Buffalo has a picture of the United States Senate with President Wilson delivering his war message of April 2, 1917. Texas as usual is partial to the ladies, and the calendar from W. T. Wilson Grain Co. of Nacogdoches and the Globe Mills of El Paso are illumined by very attractive reproductions, in each instance of a beautiful girl. The Goshen Milling Co. of Goshen, Ind., expresses its Christmas sentiment by a reproduction of a famous painting, "Evening on Venetian Waters." The Updike Grain Co. of Omaha has spared no expense to make its contribution artistic and pleasing and its calendar will find an attractive resting place in the office of all recipients.



MONDAY'S CORN MARKET.

The sample market here started weak but steadied toward the end of the session and closed unchanged to 1c lower. Shippers as well as industries were in the market for the day's receipts. Peoria prices were 3 to 4½c lower. Minneapolis, 2 to 3c lower; Kansas City, 1c lower; Omaha unchanged to 2c lower.—*Bartlett Frazier Co.*

It is noteworthy that the territory contributing wheat to the Northwest is commanding an abundance of empty box cars, and the movement continues fairly liberal also into Kansas City. Curious how things happen to add to the big load of wheat that burdens the terminals, while producers and country handlers of corn have been handicapped by the lack of box cars to a degree that is demoralizing.—*Pope & Eckhardt Co.*

Industries were buying little at the start, and elevator concerns took the corn at better prices than those bid by industries. Later, when industries started to fill their requirements, they were forced to pay slightly higher prices, and at the close cash corn was quoted about unchanged from Saturday.—*Hillbard, Warren & Chandler.*

Elevators in Kansas are reported to be quite heavily laden with grain and unable to get cars. Sec'y Smiley estimates that there will be a very considerable loss to holders.

When It Comes to Feeders

you'd better come to W. J. Savage Co. for YOURS. Many years' experience qualifies us to build them for you. Do you know that *we design and build Feed Plants* of any capacity? GET OUR ADVICE—WE KNOW HOW. Your inquiries solicited.

"See How Simply It's Built"

The elimination of complicated parts makes for ease of operation. Ball bearing construction throughout decreases power consumption. These two factors spell ECONOMY in big letters.

Furthermore, this simple mill is supreme in the ultimate test of efficiency.

It is built with a daily capacity of from 25 to 50 barrels, and we will allow any responsible party a reasonable time to try the mill, and if it is not perfectly satisfactory you may return it and all money paid us will be gladly refunded. Here is your opportunity, knocking at the door.

Why not get into business for yourself? Here's a chance for a struggling head or second miller to own a business of his own. Our terms are liberal to responsible parties. For further information write

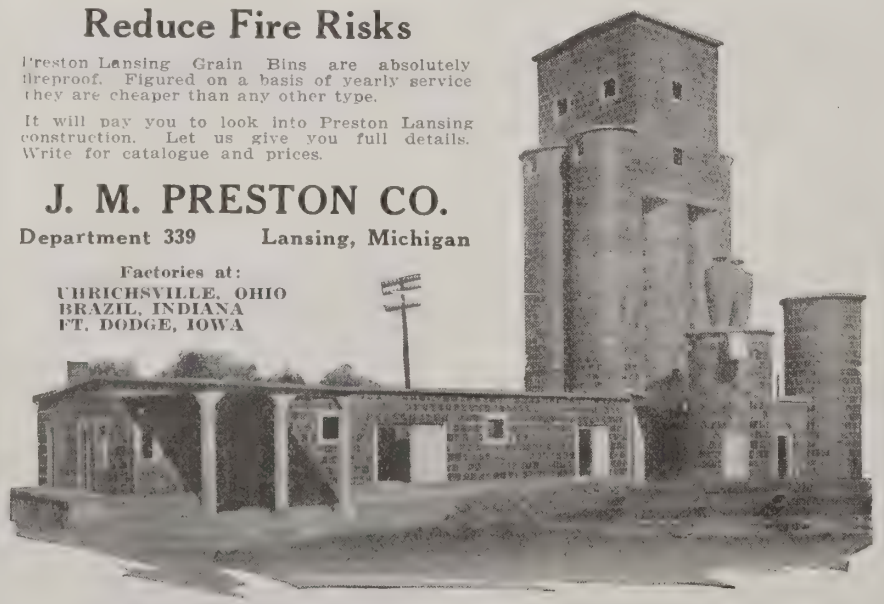
Preston Lansing
Tile Silos and Grain Bins

Permanence

The special Preston Lansing method of construction, bracing block against block in ship-lap formation, makes a grain bin that is indestructible.

Note the illustration above of the Preston Lansing Patented Block. Note the deep grooves at top and bottom. These allow for a thick layer of cement with twisted steel reinforcing. Only a thin layer of cement shows between the blocks, giving a beautiful, smooth finish. The dead air spaces protect the grain against extremes of temperature. Vitrified tile is waterproof—there is no danger of moisture seeping in, causing swelling and fermentation of the grain.



Reduce Fire Risks

Preston Lansing Grain Bins are absolutely fireproof. Figured on a basis of yearly service they are cheaper than any other type.

It will pay you to look into Preston Lansing construction. Let us give you full details. Write for catalogue and prices.

Work! Work! Work!

That's the motto of "Handy Andy." Never gets tired. Never strikes. Never lets up until you say so.

"Handy Andy," the practical, portable, adjustable elevator, is the strong armed workman that lifts and conveys bags, boxes, bales and other packages without a complaint. Loads cars, loads wagons.

Light in weight. Sturdy in construction. Simple to operate. Saves money.

There is another model of "Handy Andy" for handling material in bulk.

Send for particulars.

USINESS AND TRADE CONDITIONS

AMES W. GERARD, former ambassador to Germany, has filed his petition in South Dakota for place on the primary ballot as a candidate for Democratic nomination for the Presidency. lying with the state law, he announced his -word slogan as, "To make and keep America for democracy," a plagiarism which makes one some man would arise as a candidate who ld be brave enough to announce as his slogan, "make and keep democracy safe for America." a Berger, elected by a plurality, can, after g been kicked out of Congress as disloyal, be cted in the same district by a big majority, no need fear for democracy; but the Nation has to fear from it.

The "settlement" of the Government's attack on ackers seems like a characteristic "democratic" dure. The packers have been legally convicted crime, no violation of statutory law. The At-General has simply taken advantage of a pub- pinion created by a Government commission has asserted with definitive positiveness the mission of crime, to force the packers to what haracterize as a technical confession of offenses t the law, which have not been established in t of justice. The entering of the decree, which greed to last week by the packers, requiring Big Five" to separate their meat packing busi- from all allied lines of industry except the ng of dairy products and poultry, will please an in the street" who has come to believe be- he has been officially told so, that this "big ss" has become a monopoly and should be yed, without in the least taking into account er or not the "unscrambling" will make for ny which can be reflected back to the producer nsumer. All men are all more or less of the s notion that small concerns are necessary for eservation of that competition which protects nsumer, but the conclusion is unavoidable that rced abandonment, in part at least, of the zation for economical distribution built up e packers" may mean some loss of efficiency; t as Mr. Morris has said, time alone will tell r the packer activities along the lines now down were in the interest of the public or At the Kenyon bill hearings the independent s denied that the "Big Five" constituted a oly in the meat packing industry, and since tional Packing Company was dissolved it has en judicially determined that competition has isted between the "Big Five." The Federal Commission has said it does not exist; but orts were entirely *ex parte*. They established g except the public opinion to which the de- t packers have bowed, in order to follow the least resistance. Thus the packers by such sion have consented apparently to have set or the moment the regular process of the law, is to establish wrongdoing, by trial or hearing court before judgment is entered and exe- If this be indeed the true reading of the , a precedent highly dangerous to personal will have been established, because one may it the danger which Aristotle pointed out as th form of democracy: that in which not the t the multitude has the supreme power and des the law by its decrees." So one naturally nder the circumstances, how long will it be the same sort of reasoning will again de-mand the breaking up into constituent parts of the great department stores and the mail-order houses, concentrated organizations which have destroyed more small business concerns a hundred times over than ever "the packers" were accused of wiping out in their competition with the weak.

The Senate on Saturday last passed the Cummins railroad bill, which has been sent to a conference committee, the House having previously passed the Esch bill, a quite different measure. There is one fact that is encouraging in the face of this apparent *impasse;* it is that the Congress has at least had the courage to do something—to make an attempt to find a solution for this problem of supremest importance, and has done this in the face of the opposition of the extreme radicals in both houses as well as the demands for delay made by "Labor" and certain agricultural organizations which are coming more and more under the spell of urban agitators. The disturbing fact is that up to this writing the President has made no announcement of a change in his original purpose to return the roads to their owners on January 1, which as matters now stand would amount to "dumping" the properties upon the railroad executives without provision made by which the Government would liquidate its moral obligation to turn them back in as good condition as when they were seized. It is notorious that they now are not.

One criticism of the Cummins bill, despite its many commendable points, and especially its recognition of the responsibilities of the Government toward an industry it undertakes to regulate and control, is that it attempts too much. It assumes the necessity for a degree of control and for regulative machinery which in the opinion of many competent authorities does not exist. It concedes to the popular demands more than is safe for the public interest and less to the roads than would insure the highest quality of service by private operation under reasonable control. The specific limitation of possible net income to 5½% would largely take away the incentive to save and to earn through ability, enterprise, efficiency, economy and otherwise, which would be still further discouraged by the provision that no railroad company shall retain out of the earnings it may save under rates made by the Government itself under the act more than "a reasonable return on its *property* investment," thus confiscating for the benefit of a contingent fund, set aside to assist the incompetently managed roads, all in excess of 6% saved by the competent. To this add the provision that the employes shall not strike, and there would be created a situation, whether so intended or not, which would be but one step removed from ownership and operation by the Government: and it is as certain as anything in the future can be foretold that the joint dissatisfaction of both owners and employes would soon drive the roads into public ownership as the logical way of escape from the servitude of both owners and their employes to the caprices of a democracy which at this moment seems to be moving, practically without any combined effort to check it, toward some phase of radicalism as imperceptibly to the many but as relentlessly as the glacier moves to the sea.

The only necessity of the railway situation now is to turn the roads back to their owners under such conditions that railway credit can be re-established to enable the railroads to save enough income to protect present investors and to tempt further investment for rehabilitation and extension as the needs of the Country demand. The transportation of the Country is its most important industry. All prosperity, existence itself as a community, depends upon the quality of that service. There can be no real growth without it. Two years of Government operation, following many years of regulation which became more drastic as the years went by, have given the business public a profound distrust of Government management, which is justified by our own experience and by the failure of government ownership and operation in every country where it has been tried, to meet the necessities of the public service from any point of view. The railroads can be restored to private ownership if the politicians shall consent, and the public is in no mood now for further experiments in their political management or for the further exploitation of the carriers by radical groups and meddlesome intellectuals anxious to try out "social experiments."

The President on Saturday announced his commission to consider the troubles of miners and operators in the bituminous coal fields: H. M. Robinson of Pasadena, Calif., "on behalf of the public"; John P. White, former president of the United Mine Workers; and Rembrandt Peale, a Pennsylvania operator. It is not necessary to question the ability, the integrity or the good faith of the members of this commission to predict their failure to settle on a permanent basis so great an issue. What is needed is not an "arbitration" by an umpire, but a tribunal which shall examine into the conditions involved and render a decision, as did the Gray Commission, which shall command universal respect for its character and stand the test of time and bring peace to an industry affecting 400,000 miners and their families. No committee of three can reasonably be expected to do that: certainly no trio, two of whom are practically pledged in advance to support at all hazards divergent interests, while the burden thrown on Mr. Robinson is more than should be placed upon any one man. Of the commission as it stands nothing therefore can be said except that it represents again Mr. Wilson's intolerable habit of opportunism and makeshift. "Every one," said Jeremy Collier, "has a fair turn to be as great as he pleases." Once more the President has had a great chance and missed it; and the bituminous coal miners and the public alike will suffer from the unhappy mischance.

The Edge bill has been passed, but will be of little use until the Senate consents to end the war by agreeing to the Treaty of Peace. That must come before Americans will seriously entertain the proposal to loan much money abroad. It is at best but a paliative of the foreign exchange situation which, as mankind in general look first to their own interests, will have to readjust itself in large measure before such a law can function in a practical way. Americans are strong on extemporary solutions—laws like this one, which permits certain acts, does not compel them and guarantees nothing. It leaves the situation as to trade pretty much as it was before—dependent on the activities of individuals for its conduct—or it may enable the banks to put their present loans into the form of debentures carried by the public. We find no fault with this, the debentures may pay out. But it is far safer for all concerned that trade should be conducted on the basis of natural trading customs and not on impulse. Cotton indeed went up on the passage of the bill, but as for grain, barring wheat, a Chicago house said in its Saturday market letter: "There is no possible chance of Europe buying much grain of us, even if we give them credit, as our prices are so decidedly above those of Argentina and other countries, saying nothing of the exchange situation. As

proof of this there were the contracts made this week of cargo lots of Argentine wheat and corn at a price delivered New York that is decidedly under the cost of our own grain, and oats were offered at 20c under the cost of the domestic. Europe will only buy of us to meet an emergency on account of the short haul. We therefore feel that we have a period of liquidation ahead of us that is apt to be a pretty serious affair. It probably won't come until the railroads can supply cars and move them freely." The receivers' association at Chicago has a committee that is endeavoring to impress upon the Attorney General and Railway Administration the absolute necessity of moving this grain from the country as a most important step towards reducing the price for both local consumption and for export, and no country can expect an export trade whose prices are above those of competing markets.

SHORTAGE OF PROTEIN

THERE is nothing that is easier than to prate about profiteering: there are few things that most men who prate know less about than the conditions they complain of and their causes. Take the feed situation, of which a great many find fault as due to "profiteering" and "hoarding." The fundamental fact overlooked is the shortage in the supply of protein, the real basis of all balanced rations, however compounded or fed. This shortage is not as well understood as it should be, and if the price is high it is because the supply is short; and that it is high is not to be entirely lamented, since the price will or should restrict its use to those who can use it to the best account.

To take an account of stocks, it appears (and we quote figures submitted by one of the best informed men in the trade) that the shortage may be tabulated in this way, the comparison being with the 1916-17 crops:

Kind.	Tons.
Linseed meal	200,000
Cottonseed meal[1]	400,000
Brewers' grains	600,000
Distillers' grains	240,000
Gluten feed[2]	60,000
Total deficit	1,500,000

[1]Of which 200,000 is due to shortage in the crop itself and 200,000 to damage to the crop as grown. [2]Due in part to the destruction of the Douglas plant at Cedar Rapids and in larger part perhaps to strikes in corn products works.

Now, there seems to be no answer to the question, Where or how can this deficit be made up? It must be accepted as a fact and feeding operations made to conform to the fact itself. There are some substitutes but not many which are available. The popular chatter about reducing cost by punishing profiteers cannot increase the available quantity of protein; the Administration program of terrorizing those who are disposed to treat their holdings as something to be protected against waste may force some protein prematurely upon the market and thus cause waste which price based on demand and the competition of holders as sellers would prevent and yet make available the protein to those who can get the best results from its use. For until the holder sells he can realize nothing in the way of profit to which he is entitled as a holder for others' consumption when it suits them to take delivery.

THE COMING BUILDING SEASON

THE correspondence coming to this office indicates quite clearly that the approaching building season is going to be a busy one. Not, we think, for several years have we had so many prior to New Year's statements of positive intention to build new houses or to make extensive repairs as now. Owners have been waiting for prices to "settle down"; but they do not go down, and apparently they are not likely to do so unless popular extravagance and the folly of labor which spends much and "soldiers" in production, forces the country into a serious business depression, which is not impossible but improbable, let it be hoped. At any rate, prosperity or depression, the people must be fed and the grain trade must handle the grain that makes food and feed. When profits are at their narrowest, the economies of handling, conditioning and milling grain must be at their greatest. Nothing is so destructive of profit in our trade as poor facilities at any time; some times, like the present, good facilities for doing business will alone make it possible to produce any profit at all. Apparently grain men in the country are coming to realize this fact—the narrower margins allowed by the Grain Corporation, with no opportunity for merchandising wheat, emphasize it; the high cost of labor adds further emphasis and drives home the truth that good machinery in a good house has become imperative if an elevator man expects to make even good wages as a handler only of grain.

MERRY CHRISTMAS

THE holiday season is again upon us, and there is joy in America, at least, where the deprivations of Continental Europe are unsensed, unknown. Everyone seems prosperous, although the newspapers continue to exploit the "good fellow" benevolent. With so much reckless spending in sight one can hardly imagine there can be any "poor" to be taken care of.

But let that pass for the moment, and enter into the gracious spirit of the time, thanking High Heaven that there is still enough in the land to make merry at home and still to send abroad. The people have had a prosperous year, and while money has come easy, still let us hope it will bring a "Merry Christmas to all."

BUREAU OF MARKETS REPORT

THE annual report of the Bureau of Markets has been published. The work of the bureau is taken very seriously at Washington, and presumably others are expected to do the like, but it is difficult. Few men in business take seriously the profundity of a coed seminary class room when it seeps through a Government department. It will be of interest, perhaps, to know that reports have been prepared on the food supply situation, (1) a "study" of 880 shipments of cattle; (2) a "study" of 139 elevators in Illinois and Iowa, "practically ready for publication"; (3) one on the wirehouses of Chicago and their relation to the cash business; (4) on terminal warehouses and mixing; and (5) on weights, dockage, etc., in 265 country elevators in the Northwest. "Some of these reports have been transmitted to the Federal Trade Commission," and nobody can hope to guess off-hand what that group of feather-weights will do with them. We are relieved to know also that Mr. Geo. S. Cole has supervised the "project" of grain investigational work, in the course of which it has appeared to the satisfaction of the Bureau that, susprising as it may seem to those who don't know their kafir and milo, these grains are used as stock feed where produced and also "in practically all mixed poultry feeds in the leading poultry sections of the U. S.," and also for making alcohol and for human food. The Bureau has also discovered that meats and dairy products "may be handled in municipal markets at less expense to the dealer than in outside stores." Ye gods, is it so? It had been suspected and suspicions are confirmed; but even the Bureau finds that, "The problem remains, and is receiving attention, to see that the consumers participate in the savings effected by the dealer"—and also in the filth distributed over those delectable products by the flies which do congregate, it must be admitted, in open stalls in these markets? Barring the cotton and grain supervision service there never was so huge a joke in national Government as this Bureau of Markets kindergarten and it loses none of its infantile mirth as the years go by.

GETTING CARS

THE desire to serve was never more impotent of results than now in response to the many calls from the country for more grain cars. Our selves have heard this cry from Macedonia: "Come over and help us," from shippers whose consignees could give them no help. If the shipper's experienced receiver, who is also interested in earning commissions on cars handled, can do nothing, we can course do even less. The problem at times se hopeless; and we are quite certain that it never be solved until the constructive brains of the cou are permitted to work it out free from the ete heckling of those who can see nothing but their immediate interests, which may change tomor and who are ignorant of the means that alone bring the desired consummation of railway re struction.

One thing is certain: the railway brotherho proposal to see what they can do with a two ye control of the transportation of the country means utter ruin. These men have no capital to reb and equip the roads: they have no interest in t except to squeeze out of them the greatest amoun pay for a minimum of service. Any recogni of such a proposal would close the doors even tig than they are closed today to any source of the f capital that must go into the roads. If the trai managers of the roads are in a quandary now, may be sure there is little chance of train ha developing over night a genius in construction perform a miracle. If there were such an Alad among the train men at this crisis, not the d blackness of Erebus itself could conceal him or the powers of Satan hold him down.

THE Eastern Freight Committee has withdr the recommendation of an advance on by-p ucts to the local wheat basis, as outlined in Feed Department, p. 1394, Dec. 10; and the ma has been referred to Washington. It was ea shown at the hearing, Dec. 11, that the recomme tion incorporated in the tariffs would simply u the whole Western feed trade, and could not h been the result of a careful consideration.

WEEKLY STATISTICAL SUMMARY.

The following tabulation is a summary of figures f various statistical exhibits appearing weekly in deta "The Price Current-Grain Reporter," these figures re senting the past week, the preceding week and c sponding time last year, here assembled for ready r ence:

	Dec. 20.	Dec. 13.	Dec. 21
Wheat—			
Primary receipts	6,175,000	6,063,000	12,59

THREE DOLLARS a year in the United States and Mexico; $4.00 a year for Canada, the United Kingdom, the Continent of Europe, Australia, and other countries in the Universal Postal Union. Less than a year at the same rate. Single copy 10 cents.

LETTERS on subjects of interest to those engaged in the grain trade, news items, reports of crops, grain movement, new grain firms, new grain elevators, contemplated improvements and cars leaking grain in transit are solicited.

THE ADVERTISING value of The Price Current-Grain Reporter as a medium for reaching the buying power of the grain elevator men is unquestioned. The character and number of advertisements in its columns tell of its worth. If you would be classed with the leading firms catering to the grain trade, place your announcements in the trade's only weekly, which is always first to get the live, up-to-date news to its readers.

ADVERTISEMENTS of meritorious grain elevator machinery and supply houses and of responsible grain firms who seek to serve grain dealers are solicited.

CHICAGO, DECEMBER 24, 1919

GRAIN TRADE REVIEW

Lack of cars and motive power continues to restrict the movement of corn to terminal markets. Receipts have increased to some extent but are far below the average for this season of the year. At the same time the visible has commenced to show its seasonal increase and is now only slightly below a year ago. Industries and shippers have taken fair quantities of the grain, although it is generally believed that a greater part of the contracts for shipment East have been taken care of and some grain is likely to be delivered on December futures. This may prove for a soft market for a while, but if the run is heavy in January the demand is likely to improve. Normally the largest receipts of the year are witnessed during that month, but unless the visible supply becomes heavy during the winter it is never burdensome the rest of the season. Railroad conditions will have to change considerably if a large movement is to be witnessed early in 1920, but coal is receiving the preference and must continue to do so for some time to come. Other freight must wait.

The trade is giving little attention to the most strengthening influence in the entire grain situation. The amount of money in circulation in this country is ½ times what it was in 1914, while in the United Kingdom it is 5½ times as large. The world is in a period of inflation, and this is reflected in the prices of the grains, although believers in extremely low prices are not disposed to pay attention to that, but judge the markets on the basis of present prices. The trend of values seems to be upward for a time, although eventually they must come down, like the price of furs in London, the most expensive showing the greatest drop, while the poorer kinds are higher.

Farmers are willing to sell corn at prevailing prices in many instances, but in view of the car situation country dealers are not willing to contract very far ahead. The movement promises to be spread over a larger period of time than usual. Last year the big run came in February and in March, and it would not be surprising if the same condition prevailed this season.

More or less change in corn prices must be expected for some time to come with rapid fluctuations. The news is of such a diversified character that the public is not inclined to enter the market on either side.

Oats seem to be in the strongest position of any grain. The cash article is selling at big premiums over the May and there seems to be little prospect of securing large supplies for some months to come. The visible supply is less than half of what it was a year ago, and if the reported sales for export and domestic shipment are correct Western shippers are heavily short to the East. Much grain in country elevators cannot be shipped on account of the car situation, and buying in of shorts may become a factor in the market. The world has a short crop of oats this season. The Argentine surplus is estimated at 30,000,000 bus., or 18,000,000 bus. less than last year. North America is still shipping rather freely, but Canada is doing very little. Oats in that country are above a parity with American grain.

The Grain Corporation has sold the bulk of its accumulated stock of wheat, and the load has been shifted from the Government to the mills. The latter must now find a demand for their flour. So far the mills are having considerable difficulty in securing cars to move the wheat from terminal markets. Cars coming in loaded with corn and other grains may possibly be reloaded with wheat and sent East. This condition would quickly be reflected in the movement of other grains from the interior. Crop reports on winter wheat on the whole are rather unfavorable. There is no longer the slightest doubt but that the Hessian fly infestion is very serious, and abnormally favorable weather conditions will be needed in the spring if a good crop is secured. Private exporters are selling some wheat to France, and at the same time buying in Argentina. Around 700,000 bus. of the latter grain has been taken so far.

Rye and barley are selling at the highest prices on the crop. A big export business was done in the former grain the past week, and it is still cheap as compared with wheat, although the poorer kinds of the latter grain are sharply lower. Foreign exchange, while somewhat better than of late, is still far below a normal parity, and credits must be granted Europe if it is to take as much grain and hog products as expected. The entire world's food situation depends entirely on transportation and finance. That Europe will curtail its purchases as much as possible goes without saying.

Grain Market Summary.

Receipts of wheat, corn and oats at primary points for the past week follow:

	Dec. 20, 1919.	Dec. 13, 1919.	Dec. 21, 1918.
Wheat	6,175,000	6,063,000	12,597,000
Corn	5,210,000	4,778,000	4,317,000
Oats	3,141,000	2,810,000	7,836,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1919.	1918.
Past week	14,526,000	24,750,000
Preceding week	13,651,000	26,931,000
Since July 1	452,289,000	591,568,000

Corn prices fluctuated rapidly within a range of 6½@9¾c, the latter on December and closed with net gains of 1½@4½c, the finish being well toward the bottom. The bulge weakened the technical position of the market and the reaction was not surprising, especially as prospects were for a larger movement of the cash grain, the scarcity of which has had considerable influence on the market. Shipping demand has not been brisk, but there was sufficient grain sold ahead to take care of a good part of the arrivals when combined with the takings by industries. Present prices are regarded as satisfactory by many producers, and sentiment at the close of the week was generally bearish.

Oats advanced to new high figures on the crop, at the last showing ⅝@4c above the close of the previous week with December leading. The latter showed congestion at times, and worked to a much smaller discount under the December, and the cash is selling at a big premium over the May. There has been a lack of pressure from cash grain for some time past, and no change in this condition is expected.

Lower grades of cash wheat have declined from the recent high level. There is a plentiful supply of them, but of choice no improvement in the amounts available for mills is noted, and in consequence prices continue high. Nothing has been heard regarding importations of Canadian wheat, as the Government controlling body in that country has not permitted shipment, even though it would be to the advantage of farmers to do so. Exporting countries of the world have rather liberal supplies, but if Europe would pay for and transport all the grain it would be needed. Range of prices the past week follows:

			Close		
Corn—	High.	Low.	Dec. 20, 1919.	Dec. 13, 1919.	Dec. 20, 1918.
Dec.	$1.49¾	$1.40	$1.44¾	$1.40¼	$1.48¼
May	1.38⅜	1.31½	1.33¾	1.32	1.35⅛
July	1.36⅞	1.30⅜	1.32¼	1.30¾	.....
Oats—					
Dec.	.83¾	.77⅛	.81⅛	.77⅛	.69⅝
May	.85⅛	.79⅞	.82⅛	.79⅞	.70
July	.78⅝	.75⅜	.76	.75⅜	.....

VISIBLE GRAIN SUPPLY.

The following table shows the stock of grain in bushels in public and private warehouses at the principal ports and in transit by water on the dates named, with comparisons, as compiled by the secretary of the Chicago Board of Trade for the week ending Dec. 20, 1919 (000 omitted):

In store at	Wheat.	Corn.	Oats.	Rye.	Barley.
Baltimore	1,415	42	358	85	24

Oat Stocks and Consumption.

Statement of the movement of oats and consumption in primary markets, compared for three years:

	1918-19.	1917-18.	1916-17.
P. stocks at Aug. 1	13,185,000	4,048,000	539,000
P. receipts to Dec. 20	109,525,000	161,003,000	160,612,000
P. shipments to Dec. 20	72,899,000	117,202,000	116,961,000
P. stocks on Dec. 20	10,695,000	13,306,000	6,691,000
P. consumpt'n to Dec. 20	39,116,000	34,543,000	37,499,000

World's Oats Exports.

Exports of oats last week, compared with previous week and a year ago as reported to the New York Produce Exchange by the George Broomhall service and forwarded to this paper:

	Dec. 20, 1919.	Dec. 13, 1919.	Dec. 21, 1918.
American	502,000	834,000	1,759,000
Argentine	655,000	292,000	294,000
Total	1,157,000	1,126,000	2,053,000

Exports of oats since Aug. 1, 1919, and comparisons for three years:

	1919-20.	1918-19.	1917-18.
American	22,168,000	53,649,000	57,328,000
Argentine	11,601,000	15,058,000	2,356,000
Total	33,769,000	68,707,000	59,684,000
Season	.....	113,282,000	140,826,000

Wheat in Primary Markets.

Receipts of wheat in eleven primary grain markets from Jan. 1, 1919, to Dec. 20, 1919, with comparisons with 1918:

	1919-20.	1918-19.
Chicago	64,952,000	65,619,000
Milwaukee	4,769,000	11,706,000
Minneapolis	72,017,000	77,946,000
Duluth	10,330,000	71,928,000
St. Louis	35,130,000	33,485,000
Toledo	6,666,000	4,615,000
Detroit	1,314,000	1,107,000
Kansas City	60,899,000	46,240,000
Peoria	2,228,000	3,011,000
Omaha	18,931,000	15,086,000
Indianapolis	6,413,000	6,177,000
Total	283,649,000	336,920,000

Receipts of wheat the past week at primary markets, compared with the preceding week and corresponding week last year:

	Dec. 20, 1919.	Dec. 13, 1919.	Dec. 21, 1918.
St. Louis	347,000	430,000	447,000
Kansas City	1,916,000	1,741,000	866,000
Omaha	305,000	393,000	866,000
Toledo	32,000	47,000	29,000
Detroit	23,000	15,000	15,000
Indianapolis	28,000	29,000	20,000
Peoria	17,000	34,000	17,000
Chicago	292,000	409,000	1,445,000
Milwaukee	135,000	106,000	457,000
Minneapolis	2,886,000	2,700,000	4,590,000
Duluth	194,000	159,000	3,845,000
Total	6,175,000	6,063,000	12,597,000
Shipments	3,510,000	3,588,000	6,992,000

World's Wheat Exports.

Exports of wheat last week, compared with previous week and year ago as reported to the New York Produce Exchange by George Broomhall's service and forwarded to this paper:

	Dec. 20, 1919.	Dec. 13, 1919.	Dec. 21, 1918.
American	5,524,000	5,202,000	10,981,000

STILL TALKING LICENSING

Kenyon-Kendrick Still Talking About Licensing Business in Peace Time—Corn Borer—What Farmers' Organizations Want—Anti-Futures Bill

WASHINGTON, Dec. 20.—[Special Correspondence.]—Just what the effect of the agreement between the "Big Five" packers and the Department of Justice will be upon pending legislation is causing speculation in Congress. Senators Kenyon and Kendrick, chief proponents of the bills bearing their names, insist that they have no intention of dropping their fight for legislation to place the big packers under license. Others, however, believe that the slight chance that formerly existed for the passage of a measure of this sort is now gone.

Senator Gronna, chairman of the Senate committee on Agriculture, announced early in the week that the hearings on packers' legislation would be resumed on Jan. 5. It was his plan to devote a week to witnesses opposed to the bills and then within a week close the hearings of those favoring the legislation. Telegrams have been received from the big packers, however, stating that they did not care to introduce additional testimony. The plan now seems to be for the committee to begin consideration of the bill in executive session early in January without further hearings.

In the previous hearings the testimany of independent packers and live stock producers, in whose interest the Federal Trade Commission has professed to be working in framing its recommendations, was overwhelmingly opposed to any legislation. On top of that phase of the situation there are many members of Congress who feel strongly that the less legislation restricting or regulating business passed in the future the better it will be for the country. The war-time measures, while borne with good grace by most interests because of the necessities of the situation, have brought about a reaction which is noticeable whenever anyone asks for any new legislation desired to curb business. The temper of Congress is plainly such that all measures along this line are doomed to defeat, unless there is some reason for their enactment of more than ordinary appeal.

The fact that under the agreement with the Department of Justice the packers voluntarily agree to do exactly the things that the proposed legislation would require them to do leaves little ground for the enactment of a measure which might prove too oppressive. The Kenyon bill, for instance, prohibits the packers from dealing in unrelated commodities and requires them to give up their interest in public stock yards. Both of these things they have agreed to do, although they do not concede the necessity for them. The Kenyon bill creates a commissioner of foodstuffs under the Secretary of Agriculture and provides that all packing companies with an annual business of more than $500,000 shall obtain a license which will subject them to rules and regulations of the Government. The agreement with the Department of Justice, it is pointed out, places the packers to a certain extent under the control of the Federal court. It is argued that in view of this fact there would not appear to be any need for a license system which while possibly justified in war time is considered by many of the leaders in Congress repugnant to the American people in times of peace.

TO FIGHT THE CORN BORER.

Secretary of Agriculture Houston appeared before the House Committee on Appropriations this week to ask an appropriation in addition to one granted last summer to fight the European corn borer. He wants a considerable sum of money immediately. He told the committee that the Department had determined that the corn borer came into this country from Hungary in 1908 by way of Boston and has spread to various parts of the country. The regions where it is now giving most trouble are the entire coastal region of Massachusetts and southern New Hampshire, an area of 1,800 square miles, 800 square miles in the Mohawk Valley in New York, 500 square miles in western New York and a limited area in Erie County, Pennsylvania.

ALLEGES DISCRIMINATION.

Charles A. Lyman, secretary of the National Board of Farm Organizations, has filed a complaint with the Federal Trade Commission, alleging that railroad managers in various parts of the country are discriminating against coöperative farm organizations. He charges that these organizations formed for collective bargaining are often unable to get cars to ship their products to market when others in the same communities experience no trouble. The specific complaint prompting Mr. Lyman's activity came from A. E. Church at Mount Pleasant, Iowa, who says that the Farmers' Union at that place is a stock shipping association which has been unable to get cars for ten days at a time but that local independent livestock buyers are promptly supplied.

Conferences between agriculture and labor have taken place in Washington during the past week, but as has been true in former meetings the only farm organization represented has been the Farmers' National Council, the most radical of the organizations and the only one favoring Government ownership of the railroads. Such organizations as the National Grange and the National Board of Farm Organizations kept clear of any affiliation with labor. George P. Hampton, managing director of the Farmers' National Council, accompanied the labor delegation which called at the White House to request a continuation of Government operation of the railroads. To make it clear how the farmers of the country really feel about Government ownership or operation of the railroads, T. C. Atkeson, Washington representative of the National Grange, has sent a letter to President Wilson. After quoting resolutions adopted by the Grange, Mr. Atkeson says:

"I wish to add to the foregoing official declaration my own personal belief on this subject, which is to the effect that a very large majority of the farmers of the Nation believe that Government operation of all railroads should cease at the earliest possible moment. It is also my belief that persons who have sought recently to give currency to statements that organized farmers favor Government ownership are not farmers themselves and do not represent any considerable proportion of the men or women actually engaged in farming. In this belief I am strengthened by the fact that the agricultural press, with few and inconspicuous exceptions, opposes Government ownership and any continuation of Government operation; and the leaders of the great agricultural organizations other than the Grange are nearly unanimous in opposition to Government ownership."

Among the vessels allocated by the Shipping Board during the past week were five to carry cargoes of grain from Portland, Me., to Gibraltar where they will receive orders as to their destination.

The report of the Railroad Administration on overseas traffic states that on Dec. 10 there were 11,978,706 bus. of grain stored in elevators at North Atlantic ports. There had been received during the week 3,757,888 bus., while 4,661,883 bus. were cleared. The total amount in elevators at these ports represented 60.7 per cent of the total elevator capacity compared with 65.4 per cent for the week previous. At South Atlantic and Gulf ports there were stored 8,416,109 bus., representing 82.6 per cent of the total elevator capacity. A large amount of flour was on hand at Baltimore for account of the Grain Corporation. Two vessels are due at this port to carry 10,000 tons of flour for the Wheat Export Co.

Representative Brand of Georgia, Democrat, has introduced a bill in the House "to punish fraudulent dealers in foodstuffs and fuel." It is old stuff revised but is a far-reaching measure and provides that the following acts shall be deemed criminal:

"First. All sales or purchases of foodstuffs, either for human or animal consumption or use, and of fuel, that are not intended to be actually delivered by the seller or received by the buyer.

"Second. The sending by any person, or association of persons, or agent thereof, of any message by wire, telephone, mail, or otherwise, quoting prices on or proposing to enter into a contract for the purchase or sale for future delivery of any such foodstuffs or fuel without intending that the same shall be actually delivered or received.

"Third. The purchase by any person, or association of persons, or agent thereof, of such foodstuffs and fuel with intent not to sell the same in the usual course of business, but to store and hold the same with intent to increase the price thereof for the purpose of receiving unreasonable or excessive profits in the sale of the same.

"Fourth. The publication by any and all persons whatsoever of false and misleading market quotations, knowing the same to be false, which are assured or insured to be correct as published.

"Fifth. All agreements, contracts, or promises, whether in writing or otherwise, by and between any person or persons whomsoever, to hoard and control fuel and such foodstuffs with the intent to limit the supply or to unreasonably enhance the price thereof.

"Sixth. All agreements and contracts, whether in writing or otherwise, between any person or persons whomsoever, whether stored and hoarded or not, to increase the price of such foodstuffs and fuel with intent to receive for the sale thereof excessive profits."

The bill was referred to the judiciary committee.

GRAIN CLAIMS.

Practice of the Railroad to Reject Claims Under Order 57-A—The Legal Theory

By OWEN L. COON,

Attorney at Law, Chicago.

Under Order 57 of the Railroad Administration all grain claims on clear-record cars and leaks at grain doors are systematically refused. This order is, in my opinion, nothing more than a piece of legislation put through by the railroad interests to attempt to train the shippers to surrender certain rights under the guise of Government ownership. The order as amended by Order 57A leaves the question of grain-door leaks unconsidered, but the same rule has been applied in general, notwithstanding the omission. I believe the railroads will continue to see to apply it even after resumption of pr vate ownership.

It is well for a shipper under suc circumstances to understand the lega theory upon which his rights in such case depend. The railroad is liable fo proven differences between loading an destination weights. If you can absc lutely and without question prove tha you loaded a certain amount of grai into a car and that the railroad deliv ered a less amount, it is liable for th difference. It makes no differenc whether the car moved without defec in seal record and equipment or not The question of seals and car condition reports becomes immaterial if the dif ferences between loading and destina tion weights can be proven. This is th law that always has been applied in th courts. Order 57-A has sought t change it. Whether that can be don validly or not is extremely doubtful but as yet no case involving the questio has been decided in a higher court.

But confronted with a fact instead o a theory, such claims are now refuse and will continue to be refused under Government ownership and probably afterward. But merely because such claims are refused, the shipper should not neglect to file them. A number o suits have been started to try out the issue, and sooner or later one will be decided. If favorable to the shipper, a precedent will be set which may force the payment of many such claims. If the reader's claims of this nature have been filed, he will then get the benefit of it. If they have not been filed, the railroads can take advantage of the provision of the bill of lading which requires claims to be filed within four or six months, and as a result the chance to come in for a settlement will be impossible.

Some shippers have asked me if, with the return of the roads to private ownership, there will not be trouble in obtaining settlement on claims which are still pending and which arose under Governmental control. This need cause no anxiety. Such claims will be settled and charged to the Government account. If suit is necessary, it can be brought against the Director General of Railroads and not against the railroad corporation itself, and proper recourse be obtained. Either one or the other is liable and will pay the bill, if you can get them to admit the liability. The big job is to force them to admit liability on clear-record and leaky grain-door claims.

CASH PRICES FOR GRAIN.

Following is a statement of the weekly range in cash prices for grain as mentioned in the leading markets of th e country for the week ending Dec. 20:

CORN—	CHICAGO.	ST. LOUIS.	KAN. CITY.	OMAHA.	MILWAUKEE.	PEORIA.
No. 3 mixed.	143½@152	144 @147	143 @151	141 @146	148 @151	147 @149

CONSTRUCTION HINTS

A COLUMN for our friends to pass to others the benefits of their experience—Interesting mechanical installations—Power problems —The important things and the little kinks that make for the est operating efficiency of elevators, mills, feed plants, etc. Contribu- ions and criticism invited.

ost of the trade use automatic es, finding them convenient, inex- sive and accurate. Some of them are ject to and stand particularly hard r, but it is only good business to erly install and protect a fine piece machinery. An expert on automat- suggests the following:

THE BEST AUTOMATIC.

he usual purpose of automatic scales o weigh grain, feed and flour into s or directly into the cars, and the t advanced automatic scales are adjusting to all such materials. s means that during an uneven flow rain the scale is automatically ad- ed so that light weight oats are cor- ly recorded just as are heavy oats ing from the same bin. In the t of grain lost in transit, it is quite ortant to properly establish the lity of the grain shipper's claim, the self-adjusting feature of the automatic scales is the only sure antee of any recognition by the iers of such claims.

ONE REASON WHY.

he one trouble that automatic scales accused of is not weighing correct- This lies usually not with the scale with the operator, or the manner in h the scale has been installed. Too y operators do not understand the ting parts of the scales with which undertake to weigh grain, but all matics are built on the same prin- , and if the operator understands type he should be enabled to oper- all.

ery scale boasts of a frame which orts the main lever of the scale, ell as an inlet hopper. From the of this lever is suspended the grain er and weight arm, the lever itself ng its center pivots in bearings at- d to the frame. Before any auto- c action is effected, the operator d see that the lever of the scale is rfect equilibrium. The weight of empty grain hopper should equal weight of the empty weight box, is so adjusted by the addition of hts to the box.

MAKE PRELIMINARY TESTS.

weighting grain, operators should a few test weighings in order to that the scales are adjusted prop- Make a complete weighing but do llow the scale to discharge its load. gate to the inlet hopper will auto- ally open when a draft of grain scharged into it and will also close sufficient grain causes the hopper avel downward and lift the weight at which time, when weighing a of grain (not a testing trial), the arge gate will open and the draft e registered by the counter.

w, it will be observed when 90 or r cent of the grain is in the hopper nlet gate closes partially and the ing operation is then completed gh a smaller opening, the grain suspended in the air on its way hopper. This is commonly known he "dribble," which makes the ing heavy. Until this dribble is ared off the hopper does not travel ward sufficiently to lift the weight nd it is this final operation that etes the weighing.

MEASURING THE DRIBBLE.

s is a most important feature of eighing over automatic scales— easuring of the dribble. A com- ting lever, a part of all scales, care of this dribble, the pressure rts on the hopper being equal to eight of the dribble. It is this e of weighing that all operators l familiarize themselves with. The t should be properly set. If the r is heavy, move the compensat- eight in the direction of the hop- per for the next draft; if not, move weight in direction of weight box.

In loading a car over automatic scales it is essential that the dribble should not vary; and in order to insure this care should be exercised in feeding the grain to the scale; number of drafts in loading a car should be limited, an even pressure over the dribble opening should be maintained by the insertion of baffle plates in the upper hopper and grain should not be allowed to strike the inlet gate or bushes. The bushes of the hopper should be in good condition and all bearings kept clean.

ARGENTINE WHEAT AND FLAX.

The weather continued decidedly favorable during the week of Nov. 10, and the crops continue to ripen very satisfactorily, says the *Times of Argentina.* "Every week of this weather brings us nearer the fringe of the wood. Of course, we cannot begin to shout yet, for wheat will be subject to damage right up to middle December, but we can say that linseed is slowly passing the critical period without any great setback. In the North, cutting has commenced with the fields that are most advanced, and by the close of this month we think that linseed harvesting will be fairly general throughout Santa Fe and Entre Rios. Correspondence received lately from various parts of these provinces is unanimous regarding the magnificent condition of the wheat and linseed.

"It surprises many that local prices have been so well maintained of late in both these lines. It may be said that linseed has ruled firm solely because of the very steady demand from Europe and U. K. regarding spot linseed and owing to U. S. buying of linseed futures. The Yankee buyers are generally the first to buy linseed ahead, and prices elsewhere in the world are so high that the good prospects of the Argentine crop are probably not being given their full effect. It is possible that the full effect of our production will not be felt until the new season has been well begun, and Argentina is really a big seller.

"With regard to wheat, we are not of those who believe that the demand will be much larger than the normal, whereas the supply will undoubtedly be above the average in the cereal year which concludes on July 31, 1920. We must, therefore, be considered market bears, unless something goes radically wrong with the Argentine crop in the last month of its growth. And it must be acknowledged that the Argentine climate is very treacherous during the final weeks of the wheat growth. Often and often have excellent crops been transferred into failures at the eleventh hour. We are hoping for an excellent yield for all the crops, but "there's many a slip 'twixt cup and lip." The market ruled steady to firm during the week, with some spasmodic movements in linseed, and a slackness in the maize demand."

FRENCH AGRICULTURAL RECONSTRUCTION.

Some 4,400,000 acres of land under cultivation and prairie land in France were rendered unfit for cultivation during the war, says the French publicity office at 45 Broadway, New York. Since the invaded areas were liberated, the work of rendering this land fit for cultivation again was at once started and has been continued since with increasing activity. Up to Nov. 1, 1919, 1,002,000 acres were sown and 1,682,000 acres will be in seed by next spring. The remaining acreage will be in condition to sow next autumn with the exception of 439,000 acres which will be unproductive for quite a long time.

Actually 45 per cent of the total land of the ten departments invaded by Germans is in seed. In these same departments, the acreage of land sown in grain as compared with 1913 is 42 per cent, whereas in 1917 it was but 36 per cent. The product from these departments was increased in about the same proportion. In 1917 they produced only 26 per cent of what they did in 1913, and in 1919 they produced about 34 per cent of what they did in 1913. In 1913 the regions which were later invaded represented 15 per cent of the total of land devoted to wheat production. This proportion fell to 8 per cent in 1917, during the occupation by the Germans. In 1919 it was 9 per cent. Production of wheat of these regions was 20 per cent of the whole of France in 1913. In 1917 it was 12 per cent, and in 1919, 13 per cent.

LIVE STOCK IN KANSAS.

A report on the meat-making situation in Kansas was issued on Dec. 18 by the State Board of Agriculture. It says in substance that meat-making has had a severe backset in Kansas this season, and many farmers are curtailing operations. A canvass by the Board in late November shows that stock has been sold off so extensively that there are now fewer cattle and hogs on the farms than was the case on March 1. Beef cattle are less by 12 per cent, and only about 76 per cent of the usual number of cattle will be grain fattened this coming winter. The total number of beef cattle now on the farms is 1,948,997, as compared to 2,220,718, reported March 1. While no attempt was made to gather information as to the cattle shipped into the state since March 1 to be grass-fattened and marketed, it is apparent from this report that a greater number was shipped out, either to the shambles or elsewhere, than was shipped in.

Data gathered concerning pork production indicate that the state's hog business is sadly demoralized. While the Kansas hog raisers did patriotically respond to the country's call for more pork, a combination of poor corn crops, high prices for feed, and unfavorable markets [?] entailed such heavy losses that today the swine industry in Kansas is perhaps at its lowest ebb since the early '80s. At any rate, the 1,303,460 head on hand on March 1 is less than has been reported as of that date for any year since 1882. The present canvass shows that the number on the farms now is 25 per cent less than for March 1.

That the Kansas hog raisers are not very optimistic about the immediate future of the business is also indicated by the fact that the correspondents report a decrease of about 24 per cent in sows bred for the 1920 crop of spring pigs as compared with the number bred last year, based on 100 per cent representing an equal number. It will be remembered that the same correspondents a year ago gave it as their opinion, which later developments verified as correct, that the sows bred for the 1919 crop of spring pigs was about 25 per cent less than for the year preceding, and in this present estimate of a still further decrease is probably reflected the general discouragement felt among hog feeders in taking chances with the radical fluctuations in prices that have been such conspicuous features of the hog market.

Among the 825 correspondents reporting, there is quite unanimous agreement that the present meat-making situation in Kansas is due to market prices for animals on the hoof that have been too low compared with the high price of feedstuffs necessary for making beef and pork. Short corn crops in recent years have been contributing factors.

The result of the Board's canvass would indicate that stockmen are exceedingly cautious in their plans for the future, and that the tendency is quite marked toward curtailment rather than toward expansion of their operations.

CROP VALUES INCREASED.

But That Does Not Mean the Nation's Real Wealth Also Has Advanced

The value of crops produced in the United States this year is nearly three times greater than the average annual value during the five years preceding the outbreak of the European war, according to the report of the Secretary of Agriculture. "On the basis of prices that have recently prevailed," says the Secretary, "the total value of all crops produced in 1919 is $15,873,000,000, compared with $14,222,000,000 for 1918; $13,479,000,000 for 1917; $9,054,000,000 for 1916; $6,112,000,000 for 1914; and $5,829,000,000 for the five-year average, 1910-1914. These values represent gross production and not net returns to the producer. The value of live stock on farms in 1919 was $8,830,000,000, compared with $8,284,000,000 in 1918; $6,736,000,000 in 1917; $6,021,000,000 in 1916; $5,890,000,000 in 1914; and $5,318,000,000 for the five-year average, 1910-1914.

"This increased financial showing, it is again necessary to emphasize, does not mean that the Nation is better off to that extent or that its real wealth has advanced in that proportion. Considering merely the domestic relations, the true state is indicated rather in terms of real commodities, comparative statements of which are given in foregoing tables. The increased values, however, do reveal that the monetary returns to the farmers have increased proportionately with those of other groups of producers in the Nation, and that their purchasing power has kept pace in the rising scale of prices."

MOVED TO CALIFORNIA.

The many friends of Mr. and Mrs. W. E. Shelden will be indeed surprised to learn that they have absolutely sold out business, home and everything and shipped their goods and left for Los Angeles.

Mr. Shelden has been identified with the grain trade of Michigan for many, many years and his name, "W. E. Shelden," has been well known to both the Western and Eastern trade. The Sheldens were always regular attendants at the annual meetings of the Grain Dealers' National Association as well as the Illinois Grain Dealers' Association and it is hoped that the lure of the annual convention of the National will bring them to the convention headquarters next year.

Mr. Shelden sold his grain business to Myers-Marshall Grain Co., two young men who have been associated with the Stockbridge Elevator Co. at Jackson and who have assumed control and will continue the business under the new firm name.

Mr. Shelden hopes to re-engage in the grain business in Los Angeles.

OUTLOOK FOR CORN.

Cash corn was in good demand last week, despite high premiums, with little relief in sight until supplies move forward more freely. The Edge act may have a tendency to increase the demand from abroad. If the British government should relinquish control and remove the maximum price on Argentine corn, such a demand would undoubtedly materialize. The recent sales to Great Britain were made possible by Argentine prices quoting above the fixed maximum. American corn is uncontrolled, but so far our prices have ruled above our southern competitor.—*Simons, Day & Co., Chicago.*

The British Board of Trade has granted an open general license for the exportation, among other things, of oils and fats, including blends of two or

GRAIN IMPORTS.

The following amounts of grain in bushels and flour in barrels were imported by the United States in October 1918 and 1919 and during ten months of the years named ending with October:

	October		10 months	
Grain—	1918.	1919.	1918.	1919.
Corn	138,068	1,208,759	1,982,498	9,260,599
Oats	251	20,424	1,440,495	533,497
Wheat	338,309	569,068	15,884,031	7,193,702
Wh. flour	2,551	882	166,832	11,562

Kansas City	97,000	124,000	67,000
Peoria	281,000	162,000	134,000
Omaha	104,000	100,000	484,000
Indianapolis	147,000	109,000	289,000
Total	3,141,000	2,810,000	7,836,000
Shipments	2,579,000	2,618,000	4,574,000

It is said that a movement will be made to organize a triple alliance in Oregon of the State Federation of Labor, the State Grange and the Farmers' Union at a meeting to be held in January, when a series of measures will be submitted to the people through the initiative tom-foolery of the state which will follow to a large extent the Non-partisan League program of North Dakota. Labor, of course, has its own particular plan up its sleeve which is denominated just at present "The Right to Work." Some of the men forget, however, to exercise the right by going to it.

B. P. McGee of Lodi, Calif., has been selected by the San Joaquin County unit of the Farm Owners and Operators' Ass'n to be licensed inspector of grain at Stockton, provided he passes the State Agricultural Board examination.

MR. HOOVER AGAIN.

Recommendation That the Grain Corporation Sell Europe Wheat and Flour

Mr. Hoover at Washington on Dec. 7 predicted "chaos in Central Europe f the United States does not allow Fin-a, Poland, Austria and other nations o ave breadstuffs on credit." He ad-vi l that the Congress should allow h Grain Corporation to control the d nce of wheat and flour on credit to h countries now in distress. He said: "here can be no question that some 5 0,000 or 20,000,000 of people in the a r cities of Finland, Poland, Aus-ri and other portions of Central Eu-o outside Germany are facing starva-io unless some quick means can be is vered for their assistance. The re l ration in Vienna has already be reduced to three ounces per day n bread is 60 per cent of people's oc

"We have in the United States a re surplus of wheat and flour in the a s of the Grain Corporation over and be our own possibility of consump-ti This surplus of wheat and flour, u e ordinary course, would be sold f reign countries for cash. The par-ti ur peoples mentioned above, owing t eir economic situation, are totally u le to find cash. The question, t fore, arises as to whether we s d not devise some method by h they may purchase on credit a r in amount of this surplus that will h wise go solely to cash purchasers. "he question of the export of bread-u in this particular case does not fl nce the price or supply to the m ican people. It is purely a ques-o as to whether out of the material a we will export in any event we o d give credits in order to prevent a ation on a wholesale scale, or, on e ther hand, should deal only with o who can pay cash. The Govern-er and Congress could arrange some w s by which the Grain Corporation u extend these credits out of the p l it already possesses, and thus e would be no call for special ap-p iations by Congress for this pur-s

"I do not believe that we can, with c l a surplus of breadstuffs in our m , sit down in the United States d ee millions of people starve mere-cause we exact cash instead of c . Unless we take some immediate d in the matter we shall have a e down of stable government in Cen-l urope. If we look at it from the s selfish point of view of our own u e interests we cannot expect to v peace and a recuperation of the r if we allow the creation of an-e cesspool like Russia. No section t s community, however, places sel-i terest before humanity.

"The amount of assistance required is y small compared to the total that e tended last winter. Furthermore, n portation, government, and other m have become as much more near-n rmal in Europe that it does not u e establishing any great system d tribution. The whole operation l be carried out by the chief grain p ation."

ILLINOIS WINTER WHEAT.

The Coöperative crop reporting serv-Illinois says a number of in-es combine to produce a reduction 30,000 acres in our winter wheat a eeded this fall. Among these was a ther disappointing yield of the p or the year, to which must be e the fact that there will be no e ment guaranty on the price for o op grown in 1920. Farmers also o ed the advice of the Secretary of i lture to sow a smaller acreage n ast year.

Shippers at Chicago report that ow-car shortage and the storage of a in some of the ancient elevators of c ntry weevil is becoming a serious p n.

Up to the Table-Lands

It is an eventful Christmas time—greatest in human history. The earth is spinning faster than it ever whirled before—old viewpoints shifting—old ideas giving way. Unrest to be sure, strikes in every country, little revolutions in many lands, bits of anarchy here and there—just safety valves, that's all. Nothing serious—only a world righting itself in the wake of a mighty storm.

And now we need optimist and booster, dreamer and builder—with a vision of what humanity needs, filled with the mightiest message given to men. For upon America destiny waits—peoples everywhere expecting us to lead along the paths of peace, up to the table-lands of a newer and greater democracy.

Men of vision are "sounding forth the trumpet". Let us face the sunrise and march to the music of a morning all aglow with the early light of a new day for mankind upon the earth.

BARLEY MARKETS.

MILWAUKEE.—The local barley market ruled very strong and active throughout the past week and prices have advanced 7@8c. Receipts continue light, with a good demand from industries and shippers for all descriptions, keeping the market well cleaned up. Receipts for the week were 125 cars, against 182 cars a week ago, and 237 cars in 1918. Current quotations are: Good to choice, 48 to 50 lb. test, is quotable at $1.67@1.68; bright, $1.68 @1.69; fair to good, 45 to 47 lb. test, $1.60@1.66; low, 41 to 44 lb. test, $1.55 @1.63; 36 to 40 lbs., $1.50@1.55; feed, $1.50@1.60. Iowa quoted $1.55@1.66; for light to fancy; Wisconsin, $1.55@ 1.69; Minnesota, $1.52@1.65; Dakota, $1.52@1.65; feed and rejected, $1.50@ 1.62.

DULUTH.—Trading in the barley market was on the slowest possible order during the last week. Receipts during six days amounted to only one car all told, against 40 cars during the same period last year. The market was strong in sympathy with the course of prices elsewhere, gains of 7 and 8 cents being set at $1.30@1.57 for spot grain. Only 14,000 bus. of barley remain in the elevators here.

BUFFALO.—Barley dealers followed the advance in other markets but had only a few cars to sell and maltsters here, although bidding higher than last week, were away below asking prices. They did not want much, but you can never tell what the Buffalo buyers have up their sleeve. Quoted: Old malting, $1.70@1.75; new malting, $1.68@1.73; feed, $1.60 to $1.65. Some dealers here still stick to $2.00 barley.

CHICAGO.—The barley market last week was a sluggish affair. Offerings were moderate all week but the usual buyers did not manifest any special interest in the grain. Some of the industries and the maltsters took the top grades but there was little domesic inquiry so that the volume of business was comparatively small. Prices were practically unchanged throughout the week. Monday of this week the market opened stronger with a larger line of arrivals and decidedly more inquiry. Sellers had no difficulty in making clearances but prices did not advance beyond the top of last week. Some domestic or export demand was in evidence and sales of 31 cars at a range of $1.55@1.68 were reported. December future closed at $1.69¾. It was 2¼ above the opening. May sold up to $1.57¾ but closed at $1.54¾, or ½c above the opening. Exports not reported.

Ask for samples
CHICAGO, ILL. MILWAUKEE, WIS.

KANSAS CITY.—Demand for barley absorbed sharply increased offerings this week on a higher price range, and stocks were reduced 1,000 bus. to 126,000. Offerings were 51 cars, against 36 a week ago and 54 a year ago. Buying of the heavier samples was attributed to Milwaukee and Chicago, where the grain of the Southwest probably is wanted for mixing with northern barley in the feed trade. Kansas City manufacturers also were takers and there was a fair shipping business for southwestern feeding account. The strength of rye, with No. 2 at $1.70 a bushel, and higher oats, helped the barley market. No. 3 barley sold at $1.50 and No. 4 closed at $1.47, making the market 3@5c higher than a week ago. Producers in the West are moving their surplus as rapidly as possible and are much gratified over the recent advance in prices.

PORTLAND—The barley market, influenced by upward trend of other coarse grains the past week, was quotably higher. Stocks are not large although ample for present demands. California barley is almost exhausted, and the trade, says the *Commercial Review*, is having to rely upon shipments of Eastern barley, receipts of which have been large although the car shortage has worked some disadvantage to the sellers. No. 3 blue barley is quoted at $74; feed, $73, and Eastern stock, $70 per ton.

PACIFIC GRAIN CO.

PORTLAND - - OREGON
Milling Wheat and Brewing Barley a Specialty
Shipment from Principal Grain Points in Washington, Oregon and Idaho

ST. JOSEPH, MO.—There has not been a car of barley in this market for some time, and while there is a small demand throughout Kansas, consumers will not pay the high prices, in view of the value of corn. No. 3 barley is quoted nominally at $1.50@1.52 and No. 4, $1.47@ 1.49.

SAN FRANCISCO—A quiet market ruled in barley trading last week, holders not seeming disposed to sell their stocks which are said to be generally small both in the country and at call board warehouses. Deliveries are being made on December contracts and prices on the futures, according to reports of the *Commercial Review*, fluctuate daily. Prices for the cash article are rather indefinite but nominally quoted $3.35@3.42½ per cental from country points to San Francisco.

One interesting fact in connection with the barley market is that the knockout of liquor by the Supreme Court seems to have had no effect whatever on the barley market. Indeed, in most of the leading markets the price advanced after the decision was announced. Barley is now the highest priced of all grains except wheat, pound for pound, and both malting and milling demand has been increasing rather than decreasing.

The Nye Schneider Fowler Co. of Fremont, Neb., has filed suit in the district court at Sioux City to recover from the Chicago & North Western Ry. losses for grain going out of condition while delayed in transit to the value of $2,963.71. This includes also loss due to shrinkage in market value during transit.

RECEIPTS AND PRICES OF RY

Receipts of rye at the principal pr mary markets of the Central West f the week ended Dec. 19, and for th corresponding week last year, compile by the Minneapolis *Market Recor* were:

	1919. Cars.	1918. Cars.
Minneapolis	95	701
Duluth	116	94
Chicago	60	200
Omaha	10	62
Milwaukee	72	91
Total	353	1,148

Closing outside prices of rye of stan ard quality and spot cash for each da of the week beginning Dec. 12, were:

	Mpls.	Dul.	Chi.	Oma.	Mil
Dec. 12..	$1.57¾	$1.60⅜	$1.57	$1.50	$1.60
Dec. 13..	1.61⅛	1.63⅛	1.60	1.54	1.63
Dec. 15..	1.62⅝	1 65	1.63¾	1.54	1.65
Dec. 16..	1.66¼	1.68	1.66	1.57	1.66
Dec. 17..	1.70¼	1.72⅝	1 70	....	1.71
Dec. 18..	1.72⅝	1.75½	1.75	1.61	1.76
Dec. 19..	1.72⅝	1.73¾	1.77	1.67	1.80

RYE ACREAGE IN MICHIGAN.

The acreage of rye in Michigan has in creased rapidly in recent years—910,00 acres was the amount grown in 191 which nearly equaled the wheat acreag (922,000) and was the largest on recor for the state. The popularity of the cro has been due to the high-yielding qual ties of the Rosen variety, the relativel high price of rye during the war, an its natural resistance to insect pest and winter-killing. With the decline i price and the excellent wheat yield a compared with that of rye this yea it has lost some of its popularity and decrease of 10 per cent in the acreag planted this fall is the result. The con dition is good, nearly all sections repor ing a good stand, good color and a nor mal top growth except on late-sow fields. Acreage, 819,000.—*Field Agen Church.*

Arrivals of pulp fed cattle at Kansa City, the first of which came in on De 10, are the earliest on record. Las year the initial shipment arrived o Jan. 4.

Exchange and Feed Grains.

Current-Grain Reporter: Just
present the corn situation here
ier upside down, owing to the
te of exchange which figures out
15c a bushel. This is having a
ect among feeders, who are re-
to buy corn that would cost
much money. There is also a
corn used here during the late fall and winter months and we think probably the demand this year has been slightly better. However, unless this exchange adjusts itself we think it will have a bad effect on future orders. —*T. W. Raphael & Co., Montreal, Que., Canada.*

Indiana Annual Meeting.

Price Current-Grain Reporter: The annual meeting of the Indiana Grain Dealers' Association will be held at the Board of Trade, Indianapolis, on Jan. 15, 1920, beginning at 10:00 a. m. and we hope all will find it possible to attend. We shall have a splendid program, including some entertainment at night, of which we will advise later.—*Chas. B. Riley, Sec'y, Indianapolis, Ind.*

Opening Office at Topeka.

Price Current-Grain Reporter: We have recently secured our memberships in Peoria, Ill., and Topeka, Kans., and are opening an office at Topeka with H. D. Harding, vice-president of our company, in charge, and Mr. Ralph Spier, assistant manager. Mr. Spier was formerly with the Wilser Grain Co. of Kansas City.—*W. H. Bartz & Co., Des Moines, Ia.*

Record Car of Seed.

Price Current-Grain Reporter: We today, Dec. 16, received check for $10,932.65 from the Illinois Seed Co., Chicago, in payment for one car of timothy seed which we sold them, which car contains 793 bags, or 93,119 lbs. net. This is the largest amount ever paid for one car of timothy seed in the Chicago market. This being a record, we thought possibly you would like to have the same for a news item.—*John E. Brennan & Co.*

French Seed Movement.

Price Current-Grain Reporter: Since our last report, the situation of the French red clover market has shown no sensible alteration. Several big meetings have taken place during this period and practically all the quantities offered, which have been rather important, have changed hands at prices above those quoted at the beginning of this season. Notwithstanding, on account of the rise of the dollar exchange, which is to the advantage of our American friends, we have been able to lower our prices more and more.

The quality of the red clover seed coming on the market is not so good as at the beginning, the seed being of a less bright color and containing more red and brown grains.

Threshing operations are very advanced in most of the producing centers and farmers say that there are only little quantities left to offer. These last days some transactions have been made with American buyers on type-basis at 41-43 per lb. c.i.f. New York, December-January shipment.

ALFALFA.—Offers are somewhat more abundant than one month ago. Prices remain very firm, from $33@34, according to quality.

CRIMSON.—Some business has been done lately in this commodity also, but farmers are asking such high prices that this will certainly check new transactions.—*H. Fauchet & Cie, Paris, France, Nov. 27.*

Crops and Feed Situation in Idaho.

Price Current-Grain Reporter: We are having an unusually hard winter of late in Idaho, and stockmen and sheepmen are now flocking to the valleys with their herds and the prices of hays are going higher each day. The railroads are suffering considerable delay on account of the storm situation.

We believe we have an average crop of fall grain seeded and are getting above the average amount of moisture, both on farms and here. We anticipate a fair crop next season. We suffered a great drought through this section this year, which affected very materially the dry-farming district. We do not believe we obtained over 20 per cent of a normal crop of grain. Irrigated farmers were affected at least 50 per cent. If this good hard winter keeps up and lots of snow falls, we expect better crops the following year.

We believe 90 per cent of the grain has left the farms and it looks like many of our millers will have to ship grain from the East; we do not believe there is enough wheat here to run our mills the entire season.

We are beginning to consume considerable Nebraska corn and expect the biggest shipment of Nebraska corn into this section during our history the next few months.

The potato situation is not very encouraging from the standpoint of any one. The farmers did not make more than 50 per cent average crops and in many instances fell way below this. Prices are high, but not high enough to make any profits for the farmers who made a part failure. The car situation has been serious and now that we can get cars the weather is so bad we cannot use them. The U. P. has recently placed an embargo against shipment of live stock and perishable products, but we expect this to be lifted shortly, as we understand it is caused by the storms.—*A. Y. Satterfield, Gen. Mgr. Intermountain Farmers' Equity, Inc., Pocatello, Ida.*

A Newsy Idaho Letter.

The Price Current-Grain Reporter: We are having some of the worst weather in all south Idaho's history and zero temperature is prevalent.

This elevator handles the farmers' products, such as hay, corn, oats, wheat, barley, red clover, alfalfa and alsike seeds, and hogs and cattle.

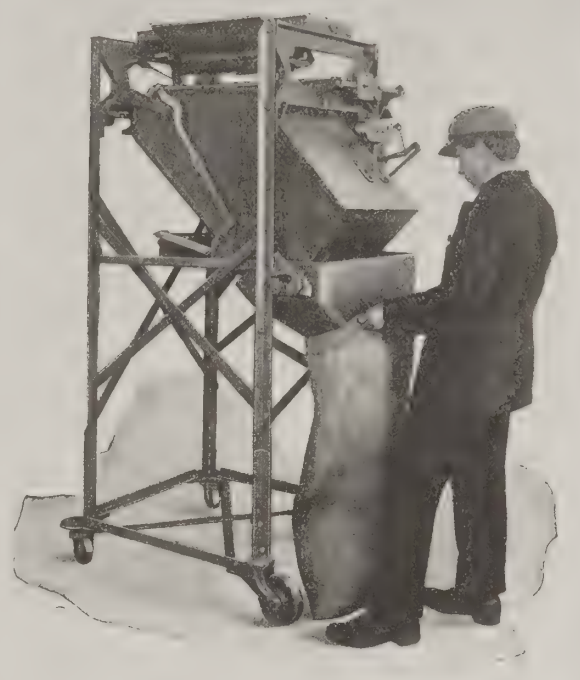
Prices to the farmer here follow: Red clover seeds, the best in the world, 49c lb., No. 1; alfalfa No. 1, 40c lb.; alsike, 45c lb.; corn, $2.40 cwt.; oats, $2.80 cwt.; barley, $2.55 cwt.; hay, $25 ton for No. 1 alfalfa; hogs, 13c; cattle, 4½@7½c. We are handling a lot of pop corn and have the finest lot of this corn we have seen. Prices on the ear, 7c lb.; shelled and sacked in new sacks of about 100 lbs., 8½c lb., selling in any size lots wanted. We can furnish in carloads or 100 lb. lots.

Last week we shipped out from here the finest carload of red clover seed ever sent from southern Idaho, all state, tested No. 1 and extra No. 1 seed, this one car bringing at the elevator $28,410.17. Some of this seed yields as high as 16 bus. per acre. This car of prize seed went into DeKalb County, Ill.

The farmers of Wilder are making a record for themselves on hogs at present and about $5,000 worth are being shipped out each Thursday.

Most of the hay has been sold, going to feeders who have shipped stock into the valley from western Utah and Montana. Many thousands of sheep have been shipped in and are feeding along the Snake River.

A new State bridge is being built across the Snake River at Homedale just four miles south of Wilder, and this will give the people of the valley across the river a good outlet at Wilder. Heretofore, they had to be ferried across.



Snow to about six inches now covers the land and is heavy in the mountains, which assures a large amount of water for irrigation next year and bumper crops are again in sight.

The smile on the farmer's face grows from day to day larger as he is brought face to face with the fact that nowhere in the good old U. S. A. is farming so profitable as around Wilder, Idaho.—*Wilder Equity Association, Ltd., J. A. McCune, Mgr., Wilder, Idaho.*

Cotton oil companies at Oklahoma City report 2,000 head of cattle on feed there, with several hundred additional expected from other parts of the state. Excessive rains, however, in the state are causing great inconvenience to the business. Feed pens are muddy and it is almost impossible to serve feed troughs by wagons and teams and the enclosed cattle find it difficult to move about.

$1200 Saved Annually

If you sack and weigh more than one man can handle—you can save the wages of the second man by installing a

Richardson Automatic Sacking Scale

With wages running around $4.00 per day this makes $1200 per year—several times the price of the scale.

Furthermore—the scale fills the sacks without overweights or spilling and keeps an accurare tally of the sacks filled on an automatic counter.

No MAN can ALWAYS do as much.

PASSAIC, NEW JERSEY

Chicago, Ill. Minneapolis, Minn. Omaha, Neb. Wichita, Kan.

NEW GRAIN MINIMUMS.

Explanation of the Uncertainties Attaching to the New Maximum Rules.

In view of the fact that there is still some uncertainty as to the application of the new grain and products' minimums, which became effective on Nov. 5, a restatement as to the operation of the old and new rules may be desirable.

The first thing to be remembered is that the Railroad Administration, in publishing the new minimums, desired to increase the efficiency of equipment without trying or desiring to overrule or set aside the law as construed by the Interstate Commerce Commission. The freight rate authority and amendments thereto, interpretations, and so forth, in relation thereto, therefore, are to be read in connection with the desire of the Railroad Administration and the limitations of Conference Rulings Nos. 80 and 119. Those rulings established the rule that the rates, minimums and privileges in effect at the time when grain, moving under transit tariffs originated in the country, shall attach and shall govern to destination. In other words, the rate cannot be changed while the commodity is in transit. The Railroad Administration had no desire to vitiate that rule when it put out its freight rate authority authorizing a minimum of 60,000 lbs.

Uncertainty as to the meaning of the language employed in some of the tariffs resulting from Freight Rate Authority No. 16368, the one ordering the 60,000 minimum, caused local agents to rule that in shipping products out from transit points the new products' minimum would have to be observed, regardless of the rule established by Conference Rulings 80 and 119. That was an erroneous interpretation of the tariffs. To remove uncertainty, however, the Railroad Administration directed a revision so as to make clear its intention to preserve the rule that a rate cannot be changed in transit.

The Railroad Administration, however, clarified the matter still farther by making it obvious that it desired shippers of products to have two options in disposing of the products resulting from grain sent to transit points under billing antedating Nov. 5, the effective date of the 60,000 minimum. It desired the shipper of products to have the privilege of forwarding either under the products minimum in effect prior to Nov. 5, or under the products' minimum operative after that date. The carrier, however, had no option. As to products resulting from the milling of grain that originated at the country point prior to Nov. 5, the shipper could avail himself of the products' minimum from the transit point to final destination in effect prior to Nov. 5. He also acquired the right to use the products' minimum established on Nov. 5 if he so desired. The railroad, however, could not force him to use the new minimum.

By giving the shipper the option of using either the old or the new minimum on products from the milling point the Railroad Administration made it to the interest of the miller, it is claimed, to accept the first car that the carrier was able to tender to him, regardless of its capacity, without suffering a penalty represented by the cancellation of billing on wheat originating in the country prior to Nov. 5. The shipper at the transit point, if he so desired, after Nov. 5, could treat the products as if the grain had originated at the milling point. In other words, the shipper does not have to submit to the loss that would be caused by the cancellation of billing unused by reason of the differing minimums used by him, in forwarding his product.

The confusion has not all been eliminated. Some of the tariff publishing agents were not able to make the revision ordered by the Railroad Administration within the time limit set by the Interstate Commerce Commission in the fifteenth section order issued by it, so as to make the tariffs issued by the Railroad Administration operative on non-controlled roads. Inasmuch as the time limit for the filing of tariffs to be effective on or before Dec. 30 is rapidly approaching, it is not impossible that some ragged ends of this change in grain and grain products minimum may hang on until near the time March 31, when the tariffs expire by limitation.—*Traffic World.*

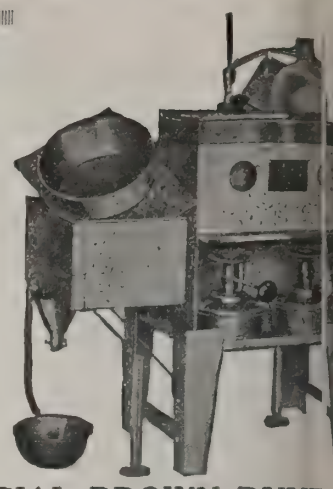
A WORD OF CAUTION.

Speaking of "hedging," W. H. Perrine & Co., Chicago, throw out a word of caution: "There is one most important thing: never speculate with the hedge; that is, when the grain is sold, have the hedge closed or bought in at the same time; don't try to make an additional profit out of the hedge after the grain is sold, as it is very apt to cause the loss of the profit you had and it has been this experience that has caused many to stop hedging. In periods of car shortage, such as we are now experiencing, there are often opportunities of contracting corn or other grain from the farmer for deferred delivery at a much larger profit than normal. For instance, we know of dealers who are now contracting corn at a price based on the May and selling the May as a hedge, the farmer to deliver the corn on or before May 1, whenever cars can be secured. The principal risk in such a trade is, will the farmer live up to the contract? These deferred contracts with farmers are, as a rule, not very satisfactory. There is a good deal of merit in hedging, otherwise there would not be so much of it done and the country dealer can use it to advantage, the same as the terminal merchant."

OCEAN FREIGHT MARKET.

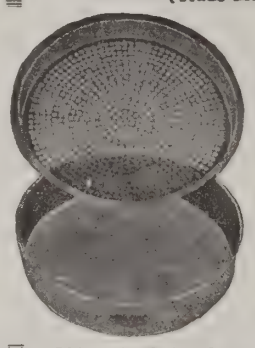
The market for export freights has not yet recovered from the strike interruption and recovery has not been as rapid as many shippers had expected, in which respect it is very disappointing, says the *Journal of Commerce* of New York. It is predicted also that there will not be very much activity until after the exchange rate has become more favorable. The principal demand for bottoms now is for carrying foodstuffs, mainly to European ports, and a fleet of twenty grain steamers was expected to arrive at North Atlantic ports last week for grain touching at both Canadian and New England ports where grain has been arriving in good quantities. It is believed this fleet will be ample to meet all immediate demands for tonnage.

YOU MUST KNOW!



You can't guess on grades nowadays. The Government standards show a difference of only 1½ to 2% of moisture between grades. A complete grading equipment could be bought with the loss incurred by undergrading ONE car of corn.

Be **sure** of your profits.



Be **sure** you do not pay too much.

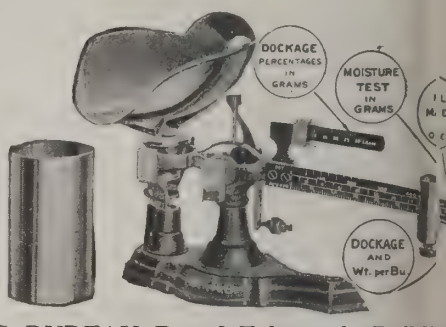
Be **sure** you do not receive too little.

There's only one way to be **sure,** and that is by using the **Government Standard** Grain Grading Equipment.

SEEDBURO (Trade Mark) OFFICIAL BROWN DUVE MOISTURE TESTER

Official Government Corn Sieves

Made of one piece thick gauge aluminum, 13 in. in dia. eter, for accurate percentage determinations of dirt, foreig material and cracked corn, as specified in Grain Grades A.



Light in weight and will not rust. Sieve telescopes in bottom pan, making a compact and convenient outfit.

Effectively used in connection with "Four-in-One" sca

No. 11—One sieve 14/16 in. perforations and bottom pan

No. 12—Sieve only.

No. 14 Special Four-in-One Scale

This scale, designed and manufactured by us, is a small, complete office scale for weighing samples for moisture test and for determining test weights per bushel, dockages, weights for mailing samples, etc.

This "Four-in-One" Agate Bearing Scale is the most complete, compact, accurate and adaptable scale made. Quick breaking and guaranteed accurate. Used by thousands of country shippers, receivers and grain men everywhere. Price with weight per bu. cup, $23.00. Send for Catalogue 621 of Complete Grain Grading Equipment, Grain Triers, Sample Pans, Weight per bu. Testers, Etc.

News of the Terminal Markets

CAIRO, ILL.

John Travis, Correspondent.

Receipts the past week have been fair. Shipments have been good and the dealers all report a good demand.

James E. Bennet & Co. have moved their offices from the Halliday Estate Building to the Gilbert Block.

Ray Williams, Traffic Manager of the Board of Trade, is in Washington seeking an adjustment of switching rates at Cairo.

Captain Nowland, who is in charge, stated that they plan to arrange facilities in connection with one or two of the elevators by which bulk grain will be shipped on the barges.

Officials of the Government Barge Line have given notice that Cairo is to be the terminal for the winter months, owing to the ice in the Mississippi river above Cairo. Arrangements have been made to use the incline of the Big Four Railroad. Three barges are here and more are expected within the next few days. The first trip will be made from Cairo this week. Offices have been opened and it looks like a boom for the river business.

DES MOINES.

A. J. Cheeseman, Correspondent.

Receipts: 55 cars corn, 14 oats and 2 wheat.

Oats: Fair demand only. Prices ranging for No. 2 white, 77¾@78c; No. 3 white, 78½@80½c.

Gene Squires of the Des Moines Elevator & Grain Co., purchased over 250,000 bushels of corn the past week.

Application for membership has been made by M. Strom of Taylor and Bournique, and H. L. Stokely of Woodward, Ia.

Our by-laws and regulations books have been received from the printers, and distribution made today. Five memberships will be placed on the market soon, at $1000 each.

Demand for corn very good the past week, but dropped off today on the decline in market. Car shortage still continues, although not so acute as week ago. Prices ranged as follows: No. 4 yellow, $1.36½@1.40½. No. 5 yellow, $1.34@1.40. No. 4 mixed, $1.38.

Visitors the past week were: W. H. Moore, of Bruce Bros. Grain Co., Kansas City and St. Joe; T. H. Tvedten, of W. H. Perrine & Co., Spencer, Ia.; Fred Peterson, of Moorland, Ia.; H. L. Stokley, of Woodward, Ia.; O. F. Bast, of the American Hominy Co., and H. Wagner, of Ankeney, Ia.

OMAHA.

Leigh Leslie, Correspondent.

There has been a moderately liberal movement of corn to this market in the last week, while receipts of wheat, oats and other grains have continued extremely light. The bulk of the corn arriving has been of the four and five grades and most of the wheat has been hard winter and mixed. Millers have taken the choice wheat at high prices. Very little choice northern spring has been coming in. This kind of wheat has been selling at big premiums and the demand for it has been keen.

Status of Railroad Claims.

In a letter to an Omaha elevator company, Henry T. Clarke, attorney and Traffic manager of the Omaha Grain Exchange, says:

"Regarding the status of all claims pending against railroads under the Federal control, and the effect of restoration of the carriers to private owners:

"The absolutely safe procedure, of course, would be to start your suit and get service on the Director-General as now provided by law.

"It is impossible to predict just what method Congress will pursue, and the exact nature of the legislation which will be finally passed and approved. It is reasonable to presume, however, that Congress will provide some satisfactory method whereby shippers holding legitimate claims arising during the Federal control will be protected in a proper manner.

"The serious danger in the situation lies in the possibility of Congress failing to provide some Governmental agency upon which service might be had, in case litigation was necessary.

"If Congress does provide for it in the proper manner, the rights of the shipper will not be jeopardized. It is quite possible that after Federal control ceases they may adopt a policy of requiring the shipper to establish his claim arising under Federal control in court proceedings and that Congress will find it necessary to appropriate money from time to time to pay the judgments entered against the government. Such judgments will ordinarily be paid in the order of their priority.

"If there is no prospect of a settlement out of court, I believe it a wise policy to secure a judgment in court as early as possible."

NASHVILLE.

John Leiper, Correspondent.

Vernon S. Tupper, general manager of the Nashville Roller Mills, was chairman of a committee that arranged for a great welcome to General John J. Pershing on his visit to Nashville last week.

Receipts of grain at Nashville last week were 122 cars. Stocks at the end of the week were as follows: Flour, 34,100 barrels, decrease of 2,400; wheat, 613,000 bushels, decrease of 10,000; corn, 35,500 bushels, increase of 4,000; oats, 308,000 bushels, decrease of 300.

Some improvement continues in demand for corn meal. Southeastern corn mills, with capacity of 133,800 bushels, had output last week of 33,300 bushels, or 24.8 per cent of capacity, which compared with 12.1 per cent the preceding week. Prices: Bolted meal, sacked, per 100 lbs., f. o. b. Ohio river points, $3.60; unbolted, $3.50.

Grain ruled generally steady last week. Mills are receiving wheat to cover demands from the Grain Corporation at Chicago. Corn continues in light supply. Oats are in fair demand. Some complaints are made of shortage of cars. Prices: Wheat, No. 2 red, $2.45@2.50. Corn, No. 2 white, $1.62@1.65; No. 3 white, $1.58@1.60. Oats, No. 2 white, 90@91c; No. 2 mixed, 89@90c.

DETROIT.

John Barr, Correspondent.

Secretary and Treasurer Ammerman, of the Bellville Milling Co., Belleville, was a visitor on 'change last week.

There is not much doing in barley in this market, but the tone is firm at $3@3.20 for cash No. 3 per cwt., an advance for the week of 20@30c.

Buying of beans increased and the price moved up 25c to $7.25 for immediate and prompt shipment, and $7.35 for January. Receipts were not large. The market held its firmness at the close of business.

Rye was the sensation of the market last week with an advance of 14c. It was wanted by shippers as well as local millers and receipts were not enough to satisfy all. Late in the week the tone was easier. Cash No. 2 was quoted at $1.76.

Wheat is in active demand. Millers were bidding at the top of the market and not getting much. The movement to this market is very small and there is a steady shipping demand. Quote: Cash No. 1 red, $2.48; No. 1 mixed, $2.46; No. 1 white, $2.46.

Demand for oats is well sustained and receipts are not enough to satisfy buyers. There is competition between local consumers and shippers and the market gained 4c. The close was steady at 89c for cash No. 2 white, 88c for No. 3 white and 87c for No. 4 white.

Corn is almost lifeless. The market was firm early in the week, but lost 1c for its advance later and at the close the tone was easy. Receipts amount to next to nothing and there is a slow demand. Quote: Cash No. 3, $1.52; No. 3 yellow, $1.54; No. 4 yellow, $1.49; No. 5 yellow, $1.46; No. 6 yellow, $1.42.

DULUTH.

S. J. Schulte, Correspondent.

E. H. Smith, Northwest manager of the American Linseed Co., is away in New York on a business trip.

H. A. Starkey, president of the Consolidated Elevator Co., has returned from a trip to New York, where he attended the annual meeting of the company.

Grover Cleveland Wilson, buyer for the Duluth-Superior Milling Co., J. W. Higby, representative of H. L. Hankinson & Co., and H. J. Crofton, have been elected members of the Duluth Board of Trade.

B. E. Baker has resumed active trading on this market after nearly two years' absence, during which he was interested in operations in the Southwest oil fields. He looks forward to good grain business developing on the American markets during the coming year on the removal of the ban against operations in wheat futures after the close of the present crop year.

Rye continued its ascent on this market during the last week, its basis now being 9⅛c up at $1.74⅜ for spot. That grain absorbed the attention of operators in the pit to a great extent. The putting through of some business in rye to be shipped at the opening of lake navigation season was reported. Stocks of rye in the elevators here now aggregate over $3,175,000 bushels.

With millers climbing for supplies for mixing purposes, spring wheat prices on this market have been marked up to new high levels with the current spot basis now standing as follows: No. 1 northern, $3.05@3.10; No. 2 northern, $3.00@3.05, and No. 3 northern, $2.95@3. Durum is now quoted at a record high level, with No. 1 amber at from $2.24½@ 2.55 and No. 1 durum at from $2.22½@2.42. It was to be noted that the call for durum has been slow of late as the mills here had no fresh bookings for macaroni flour.

Operators at Duluth were greatly interested in a report emanating from Winnipeg, to the effect that wheat to the value of $50,000,000 might be sold by the Canadian wheat board for shipment to this country, with a view largely to relieving the exchange situation. While it is assumed that the bulk of the grain shipped under that arrangement will go East from the elevators at Fort William and Port Arthur at the opening of the navigation season, it is thought probable that a tonnage of it will be taken by Minneapolis millers. Should imports of wheat from the Canadian West be to the extent indicated, it is taken for granted in trade circles here that a substantial paring down of the present high premiums on spring wheat would come about. Announcement as to the basis upon which that wheat would be marketed in this country is being awaited with interest.

WESTERN CANADA.

A. Caldwell, Correspondent.

Winnipeg market has followed Chicago pretty closely but our oats have been showing some independence. The advance early in the week was too one-sided an affair to last long without a set back. There was no short interest in the market and as soon as the longs started to liquidate the inevitable slump followed. The general conditions bringing about the advance remain, viz., lack of cars for grain movement, short supplies at terminals and a fairly good export inquiry. It looks as though another reaction was now about due.

The extreme cold of the beginning of the week has given place to mild weather and this will greatly improve the motive power on railroads. The main question here as in the United States is the shortage of supplies at the terminals. The interior elevators are in many cases plugged with grain while barely a fifth of the storage space available at the Great Fort William and Port Arthur terminals is being utilized. Receipts have been unusually light, partly due to extreme cold and partly to the shortage of cars assigned to grain movement, a large proportion of the rolling stock being devoted to the moving of coal and feed in the far west.

The removal of the embargo against the free entry of Canadian wheat into the United States is not expected to bring any shipments of Canadian grain to Minneapolis or elsewhere at present. It is understood that the Canadian Wheat Board has to look after its unfilled contracts with Europe before it will consider doing business with the American Grain Corporation. It may be May before Julius Barnes will get any wheat from this side. His whole policy as regards hard wheat is considered here to have been short-sighted as he was offered wheat on the track here early in the season and would not take it. This of course forced the wheat board to seek other markets. The general result has been the excessive premiums paid by American millers for hard spring wheat and the high price paid by the American consumer for flour.

ST. LOUIS.

E. E. Reeves, Correspondent.

C. J. Gundlefinger of Newman & Malkemus is out again after a ten-days' stay in a hospital, where he underwent a minor surgical operation.

Clifford Corneli of the Schisler-Corneli Seed Co. has been asked to run for Director of the Exchange, to represent the seed interests, but has not yet given his consent.

The Merchants Exchange Traffic Bureau announces that the advances in rates to the Southeast, the Mississippi Valley and to the Southwest will become effective Dec. 30.

The board of directors on Tuesday wired to their Senators in Congress, as follows: "Our representatives in the Senate are urged to take proper action toward the adjustment of the treaty which is so essential to the welfare of our Nation."

The milling and grain trade was shocked to learn of the death of John Burns of the Plymouth Milling Co., of Lemars, Iowa, one of the pioneer millers of that State, at the ripe age of 76 years. He was the father of William B. Burns, owner of the Milling and Grain News.

H. Vest Lancaster, who has been asked to run for the Board of Directors of the Merchants' Exchange, has declined, to the regret of his many friends, for the reason that his business is growing so rapidly that it requires his whole time and attention, and he feels that he could not give the board matters as much thought as their importance requires.

The amendment to paragraphs 4 and 6 of Section I of Rule 8, Section I, paragraph 15, and Paragraph I of Section 5, of Rules and By-laws of the Merchants Exchange was adopted by a unanimous vote. The amendment makes minor changes for the delivery of grain on track, on contracts. This is one of the very few cases where a unanimous vote was secured.

President E. C. Andrews of the Merchants' Exchange sent a very cordial letter of thanks to Congressman Dyer for valuable and successful work in securing appropriation of $1,000,000 for the erection of a Government building on the corner Fourth and Chestnut streets, opposite the Merchants Exchange. Congressman Dyer wired that the bill was passed without dissenting vote, and that he was asked the same favorable consideration by the Senate. He assures President Andrews that he will give the matter his personal attention until the building is dedicated.

Range of prices for the week:

	No. 2 red wheat.	No. 2 white
Monday	$2.49@2.52	81½
Tuesday	2.50@2.53½	83
Wednesday	2.53@2.54	84
Thursday	2.53@2.54	86
Friday	2.53@2.56	86
Saturday	2.55@	85

PHILADELPHIA.

Geo. A. Rudderow, Correspondent

Corn huskers in many ports of Pennsylvania have been getting $9 per day.

The U. S. Grain Corporation has advised the trade that the purchase of wheat flour by the Corporation were small and at prices averaging about $1 Baltimore basis.

Receipts for the week ending De were: 7,499,922 lbs. of flour in sacks; 786 bus. wheat; 9,954 bus. corn; 1 bus. oats; 8,921 bus. rye; 29,712 bus. ley; 16,250 bus. malt, and 320 tons fe

CHICAGO.

ast week a membership in the Chicago Exchange sold at $11,000 net to the buyer.

vernight country bids brought fairly ibal business partly for delivery to other rkets.

e directors of the Board have been etioned to remove the 200,000 bu. limitation on corn trading.

ll friends of Geo. Ellison, formerly a prominent member of the Board, will be tried to hear of his death last week.

ere was no way to pay state grain nspectors on Sunday so around 50 cars f rn did not show on Monday's receipts.

E. Gardner and J. S. Grant have applied for membership in the Chicago Board f ade. The membership of J. E. Jenkins has been posted for transfer.

Julius Barnes, en route for Duluth, where he will spend Christmas, stopped off in Chicago Saturday but spent most of the time accomplishing his Christmas shopping.

John A. Bunnell has tendered his resignation as director of the Chicago Board of Trade and a petition nominating Chas. L. Stone for the vacancy was filed today. The term of Mr. Bunnell expires Jan. 1, 1920. A petition has also been circulated asking E. A. Doern to run for director of the Board.

J. A. Waring, of S. C. Bartlett Co., Peoria, Ill., a man with a broad country acquaintance and many friends in Chicago, visited the latter market Tuesday. He reports cars scarce in Peoria territory but better aspect on the railroad situation has recently and a general good business in the market.

The following were visitors to the floor of the Chicago Board of Trade last week: J. Law, Dixon, Ill.; D. W. Jones, Kankakee, Ill.; Frank B. Sisler, Yankton, S. D.; J. Leveille, Winona, Wis.; F. A. Voight, Grand Rapids, Wis.; V. P. Turner, Peoria, Ill.; Alex. Gebhart, Jackson, Mich.; H. R. Wilcox, Fairview, Ill.; M. H. Wilson, Seymour, Iowa; Russell Halliday, Cairo, Ill., and C. C. Wilbur, Rantoul, Ill.

Chas. Addison, president of the Addison Grain Co., grain commission merchants of Kansas City, Mo., made a business trip to Chicago and other points this week. He is bullish to the maintenance of high corn prices for the past several weeks as indicative of equal prices for the next month to come. His firm has a broad business with opportunities to investigate the probable action of prices and supply and demand factors.

A committee of three grain men of the Grain Receivers' Ass'n interviewed Attorney General Mitchell A. Palmer recently asking him to use his influence with the Railroad Administration to secure cars for grain shipments in order to move the grain from terminals in order to build up stocks. The inference is that the H. C. L. would be lessened to some extent if reserve stocks were larger, prices for grains now being at almost top notch prices. It is desired that grain and live stock be put on the preferential list for shipment as soon as the coal strike is over.

The Board's Peace Resolutions.

The Board of Directors of the Chicago Board of Trade on Dec. 16, 1919, unanimously adopted the preamble and resolutions following:

Whereas, The United States and its Allies have, by the heroic sacrifices of their people and at immeasurable cost of human life and treasure, brought to a successful conclusion the great war, waged for the preservation of humanity and for the high ideals of freedom and justice; and,

Whereas, More than a year has passed since the conquered enemy sued for peace and signed the armistice and no peace treaty has yet been signed by the United States; and,

Whereas, The long delay on the part of the United States in concluding a treaty of peace is jeopardizing the fruits of the war and retarding return to normal conditions; and,

Whereas, In this crisis the Board of Directors of the Board of Trade of the City of Chicago feels justified in departing from its usual custom of taking no part in any public business of a political character; and,

Whereas, The Board of Directors is convinced that the people of these United States desire that such a treaty shall be signed as will preserve the fruits of victory and keep the faith that is pledged to our Allies in a great cause; therefore, be it

Resolved, That the Board of Directors of the Board of Trade of the City of Chicago, speaking for the important interests it represents, urges upon the President of these United States and upon the United States Senate the great necessity of speedy action upon the peace treaty and earnestly appeals to them to make an earnest and vigorous effort to harmonize the differences now preventing action and so reach a compromise that can command a two-thirds vote of the Senate for ratification; and be it further

Resolved, That the Secretary of this Exchange be and hereby is instructed to transmit to the President of the United States and to every member of the United States Senate a copy of this resolution.

ST. JOSEPH, MO.

W. H. Moore, Correspondent.

A. J. Brunswick, president of the St. Joseph Grain Exchange, was called to Chicago recently by the death of his mother.

Application has been received for transfer of the membership of M. H. Gillette to D. L. Williss, of the Kellogg-Huff Grain Company.

Applications have been made to the St. Joseph Grain Exchange to place the memberships of Geo. E. Newman and M. H. Gillette in escrow until someone is elected as transferee thereof.

W. F. Shepard, formerly with the Merriam-Millard Commission Co. at Sioux City, has accepted a position with the Sloan-Simmons Grain Co. Mr. Shepard is well known to the Iowa, Nebraska and South Dakota trade, and will be a great asset to the Sloan-Simmons combination.

The St. Joseph Public Elevator Co. has let the contract for an elevator to be built by it just south of the Larabee Mills to the Lehr Construction Company. As soon as piling to be used in the foundation work arrives, construction will be started. The main elevator building will be of reinforced concrete. The building will be so arranged that its capacity may be tripled if need be. The original elevator will have a capacity of 1,000,000 bus. The cost will be $200,000.

Nominations for officers of the St. Joseph Grain Exchange were posted Friday. The election will be held January 6th. The nominees are: For president, C. L. Schall and C. A. Geiger; vice-president, J. M. Flynn, S. A. Penney; directors for two years, five to be named, C. A. Addington, M. C. Bruce, A. J. Brunswig, Jr., J. W. Craver, J. W. Bailey, Fred Fredericks, G. W. Helm, W. M. Huff, B. V. Sloan and J. M. Thomas; for one year, T. P. Gordon and H. L. Dannen.

The following visitors registered during the week on the grain exchange: J. S. Corken, Burlington Jct., Mo.; W. C. Fuller, Kansas City; O. H. Maxwell, Kansas City; E. E. Huntley, Omaha; W. F. Shepard, Sioux City; William Luehring, Hollenberg, Kansas; Jesse White and J. L. Card, Gower, Mo.; W. B. Woods, Rosendale, Mo.; Treat Payne, Amity, Mo.; W. T. Lingle, Bethany, Mo.; C. H. Appel, St. Louis; Roger Scribner, Lincoln; W. E. Evans, Tecumseh, Neb.; C. R. Story, Barneston, Neb.

Cash Markets.

Wheat—Weakness in values and a slow demand from all classes of buyers featured the hard wheat market early in the week. Last Saturday prices were around the high levels on the crop and in the forepart of this week purchasing was only to fill immediate requirements. From Wednesday on there was a noticeable change in sentiment, prices picking up and the demand taking a turn for the better. Offerings have been light and with the exception of maintenance of top prices during the past few days, little has occurred in the wheat market worthy of note. Red wheat prices have been fluctuant, quotations today (Saturday) being well over last week. Inquiry is good, but arrivals small. Cash follows: Dark hard, No. 1, $2.69@2.96 No. 2, $2.66@2.94; No. 3, $2.59@2.91; No. 4, $2.53@2.87; No. 5, $2.46@2.87; hard, No. 1, $2.63@2.90; No. 2, $2.60@2.88; No. 3, $2.53@2.85; No. 4, $2.47@2.81; No. 5, $2.40@2.75; yellow, hard, No. 1, $2.59@2.63; No. 2, $2.54@2.58; No. 3, $2.50@2.53; No. 4, $2.43@2.48; No. 5, $2.34@2.40; Red, No. 1, $2.57@2.58; No. 2, $2.54@2.56; No. 3, $2.50@2.52; No. 4, $2.46@2.49; No. 5, $2.35@2.43.

Cash Corn—With the failure of country shipments to assume a materially increased volume, cash prices have held comparatively firm during the past week. The spot market has taken on a weaker tone the last part of the week. Ear corn is 1 to 2c under a week ago. Demand has been good for all varieties of corn, shelled corn selling about the same as a week ago. Slight preference has been shown the white offerings. Cash corn follows: Yellow, No. 2, $1.53@1.55; No. 3, $1.51@1.53;

No. 4, $1.46@1.48; No. 5, $1.42@1.43; white, No. 2, $1.54@1.56; No. 3, $1.50@1.52; No. 4, $1.44@1.45; No. 5, $1.42@1.43; mixed, No. 2, $1.52@1.54; No. 3, $1.50@1.52; No. 4, $1.45@1.46; No. 5, $1.42@1.43.

Cash Oats—Light receipts and strong demand have forced cash prices about 3c over last week. Announcement of a good export demand is a factor of considerable strength. Cash oats follow: White, No. 2, 84@84½c; No. 3, 83@84c; mixed, No. 2, 82@83c; No. 3, 81@82c.

PITTSBURGH, PA.

H. B. Laufman, Correspondent.

There is a strong market here for straw, with all grades showing advances in price and very light receipts. Quotations follow: No. 1 oats, $14.50@15; No. 2 oats, $14@14.50; No. 1 wheat, $14@14.50; No. 2 wheat, $13.50@14; No. 1 rye, $14.50@15; No. 2 rye, $14@14.50. Receipts 156 tons.

So far as corn is concerned there is very little interest shown by consumers. Receipts are more than sufficient at this time and buyers are holding off until there is a more favorable turn in the market. There is a lamentable lack of demand and for some reason unaccountable to dealers here there is very little buying of either corn or oats. Quotations are as follows: No. 1 yellow, shelled, $1.65@1.66; No. 2 yellow, $1.62@1.64; No. 3 yellow, $1.58@1.60; No. 4 yellow, $1.49@1.54; No. 5 yellow, $1.40@1.45. Total receipts for the period amounted to 28,600 bushels.

The oats market here is strong but buyers are refusing to participate to any degree in supplying themselves for the future at prevailing rates. An advance of 4 cents a bushel has been made in the price of oats, in sympathy with strength shown in western markets, but demand has dwindled almost to nothing. Receipts are more than ample at this time and are being moved with some difficulty. Quotations follow: No. 1 white, 91@92c; No. 2 white, 91¼@91½c; No. 3 white, 89½@90½c; No. 4 white, 85½@88½c. Total receipts for the period amounted to 86,000 bushels.

BUFFALO.

E. Bangasser, Correspondent.

Severe cold weather has hit this state, making big hauls on the farmers feed bins.

Receipts of oats were very light and everything offered was easily cleaned up. Prices advanced about 4c and then eased off slightly.

Track receipts of wheat were light and the bulk went direct to millers. The few cars offered brought a big premium over the Government price. Some No. 4 red sold as high as $2.45, track, Buffalo. Chicken feed mixers were after wheat and will pay a big price.

Rye has been up and down here this week, principally up. The offerings seem to be cleaned up fairly well and at the close No. 2 was quoted at $1.78. Several cars sold in store earlier in the week at $1.75. There was some inquiry from millers, but they claimed the price was too high.

Corn prices started upwards after the opening this week, advancing about 7c and then declined 3c or 4c with buyers a little leary of the rumors concerning the movement. They appeared to be well supplied for the time being. No. 4 yellow, of which there was a plentiful supply, was the easiest grade on the market and receivers were anxious to sell. The top grades were a little scarce, but no particular demand. There was another break at the close. Closing: No. 1 yellow, $1.56; No. 2 yellow, $1.55; No. 3 yellow, $1.53; No. 4 yellow, $1.50; No. 5 yellow, $1.46; No. 6 yellow, $1.39 on track through billed.

The feeling is strong as receipts are expected to continue light here and there will be no trouble in getting the mills interested at a premium for good weight oats. Offerings were mostly No. 2 white. Closing: No. 1 white, 92c; No. 2 white, 91½c; No. 3 white, 90½c; No. 4 white, 89½c on track, through billed.

Inspection track receipts for the week: Wheat—No. 2 red, 3 cars; No. 3 red, 3 cars; No. 4 red, 1 car; No. 1 mixed, 2 cars; No. 2 mixed, 7 cars; No. 3 mixed, 3 cars; No. 2 soft white, 6 cars; No. 3 soft white, 1 car; No. 2 hard winter, 8 cars; No. 3 hard winter, 26 cars; No. 4 hard winter, 1 car; No. 5 hard winter, 3 cars; No. 2 dark winter, 2 cars; No. 1 northern spring, 1 car; No. 2 northern spring, 3 cars; No. 3 northern spring, 10 cars; No. 4 northern spring, 2 cars; No. 5 northern spring, 11 cars; No. 1 dark northern, 5 cars; No. 2 dark northern, 2 cars. Corn—No. 2 yellow, 9 cars; No. 3 yellow, 37 cars; No. 4 yellow, 122 cars; No. 5 yellow, 29 cars; No. 6 yellow, 4 cars; sample, 7 cars; No. 3 mixed, 3 cars; No. 4 mixed, 10 cars; No. 5 mixed, 13 cars; No. 6 mixed, 2 cars; ear corn, 1 car. Oats—No. 1 white, 11 cars; No. 2 white, 33 cars; No. 3 white, 11 cars; No. 4 white, 3 cars; sample, 4 cars. Barley, 33 cars; rye, 1 car.

CINCINNATI.

George Mosbacker, Correspondent.

Pliny M. Gale, member of the Indianapolis grain trade, was a visitor here as a guest of his brother, A. C. Gale.

The annual dinner of the grain and hay trade to celebrate with merriment and good cheer the passing of the old year was held at the Hotel Gibson, Dec. 31.

H. Lee Early, of Early & Daniel, was appointed a member of the nominating committee of the Chamber of Commerce to select candidates for the annual election of a Board of Directors to be voted for in January.

Hugo Gruner, of Gruner & Beckwith, manufacturing agents and dealers in grain and flour, died suddenly of heart failure early Saturday at his home on Walnut Hills. Mr. Gruner was 63 years old, a former director of the Chamber of Commerce and well known among grain and hay trade interests.

The membership of the Chamber of Commerce on Friday voted down the proposition to amend the by-laws of the Chamber so as to admit women to membership. The total vote was 132 in favor and 177 against. More than 50 business women had applied for membership during the recent drive. The number of new members secured in the recent campaign was 2,939, bringing the total to 5,585 members.

Representatives of traffic departments of railroads, auditors and freight agents entering Cincinnati met at the Hotel Gibson this week to discuss General Order No. 64 of the United States Railroad Administration, which provides a change in the method of billing and settlement of claims. The new order also arranges a method for payment of charges for transportation of less than carload shipments between depots.

Ohio's winter wheat acreage is 12 per cent less than it was last year owing to wet weather and invasion by the Hessian fly, according to the December crop report issued by J. L. Cochrun, chief of the Ohio Bureau of Agricultural Statistics. The acreage seeded to wheat is estimated at 2,476,000 acres, as compared with 2,814,000 acres last year. The winter wheat was two points under the 10-year average of 92 on Dec. 1.

Cash Markets.

Wheat. The market was depressed early in the week on relatively lower prices at other centers, and reported buying by local and nearby mills of government wheat. None of the grain corporation wheat arrived, though confirmation of requisitions were received. Most of the usual buyers were out of the market. Smutty wheat discounted from 1 to 3c per bushel as to grade. No. 1 red winter, track, $2.57@2.58; No. 2 red winter, track, $2.55@2.57; No. 3 red winter, track, $2.51@2.53; No. 4 red winter, track, $2.45@2.48; No. 5 red winter, track, $2.36@2.40; sample as to quality, $2@2.36.

Corn. A liberal increase in receipts early in the week weakened the market to a 2c decline, but as a result of decidedly stronger futures later, recovered the loss with further gains of 3@5c. Low grades comprised the bulk of the movement, and were mainly absorbed by elevators with drying facilities. A fair demand for export was also noted for the better quality. Ear corn continued in urgent demand, and advanced 3@5c over quotations of a week ago. No. 1 white, $1.57@1.58; No. 2 white, $1.55@1.57; No. 3 white, $1.53@1.55; No. 4 white, $1.50@1.51; No. 5 white, $1.47@1.49; No. 6 white, $1.44@1.46. No. 1 yellow, $1.57@1.58; No. 2 yellow, $1.55@1.57; No. 3 yellow, $1.53@1.55; No. 4 yellow, $1.49@1.50; No. 5 yellow, $1.44@1.46; No. 6 yellow, $1.41@1.43. No. 1 mixed, $1.56@1.57; No. 2 mixed, $1.55@1.56; No. 3 mixed, $1.52@1.54; No. 4 mixed, $1.48@1.50; No. 5 mixed, $1.43@1.45; No. 6 mixed, $1.39@1.41. New yellow ear corn, $1.56@1.58; white ear, $1.54@1.56; mixed ear, $1.54@1.56.

Oats. The highest prices of the season were realized for oats the past week, due to strength of corn, and extremely light movement. The demand, however, was only moderately active, but in excess of the offerings. Heavy weight of good quality command a premium. Prices showed gains of 2@3c as compared with the close of a week ago. No. 2 white, 87½@88½c; No. 3 white, 87@87½c; No. 4 white, 86@86½c; No. 2 mixed, 86@87c; No. 3 mixed, 85@86c; No. 4 mixed, 84@85c.

TOLEDO.

Carl Bryant, Correspondent.

Bellevue Farmers' Grain Co., Bellevue, O., declared a dividend of six percent at their annual meeting last week.

The new elevator of the Farmers Exchange at Genoa, O., will be ready for business Jan. 1. Manager Adrian McDougal announces. Equipment includes a Randolph grain drier.

Usual trading hours were re-established on 'Change Monday with the settlement of the coal strike. The members had voted to adjourn at noon instead of 1:15 p. m. on account of the shortage of fuel.

Sam Rice of the Metamora Elevator Co., Metamora, O., and Rice Grain Co., Toledo, has returned from Baltimore where he presided at a meeting of arbitration committee No. 3 of the Grain Dealers National Ass'n., of which he is chairman.

Resolutions were adopted by the board of directors of Toledo Produce Exchange, Dec. 16 deploring the lack of unity and co-operation on the peace treaty negotiations, and holding that the delay is unusually disturbing and detrimental to the country's good including all commerce and industries both wholesale and retail. The resolutions, which were forwarded to President Wilson and to each member of the Senate, requested a compromise looking to a speedy agreement on the proposition.

Cash Markets.

The few cars of wheat reaching this market have brought handsome prices the past week, selling on basis of $2.52 for No. 1 red delivered Toledo. Entire stocks of Grain Corporation wheat here, amounting to 750,000 bus., have been sold and are moving out of store at a fast clip. Spring wheat is in urgent request, only an occasional car being received. No. 1 dark northern sold at $3.30½ and No. 3 dark northern at $3.24½, basis 23c rate to New York. Although it is believed wheat prices have about reached the top and are due for a setback, the fact remains that receipts are very light and the wheat is wanted with the price apparently cutting little figure.

Corn arrivals were better this week, though prices took a considerable advance. Sales Saturday were equal to $1.44 for No. 5 yellow and $1.36½ for No. 6 yellow, basis Toledo rate of 23c to N York.

Oats sold at equal to 90c for N white, Toledo, on Saturday, and the cars arriving find a bevy of buyers, reluctant to pay the price but compe to bid up for supplies. Rye and ba were higher. The few cars reaching are mostly going into store, with a l quantity shipped out this week to seaboard and more to follow when cars are available. Barley dull with grades hard to purchase. Receipts the week: Wheat, 22 cars; corn, 77; o 18; rye, 18; barley, none.

KANSAS CITY.

T. J. Tanner, Correspondent.

D. F. Piazzek, Kansas City zone ag spent the week in New York, where he tended a meeting of vice-presidents of United States Grain Corporation.

The sampling department of the Bo of Trade has been authorized to charg cents a car for obtaining samples of g and making separations. A sample w out separation will cost 50 cents a car.

Oats deliveries on December contract Kansas City up to December 19 were 3 000 bushels. Those who accepted deliv have made good profits on the recent vance, but have found it difficult to sec cars in which to ship.

B. M. Hayward, assistant chief g sampler for the Kansas City Board Trade, will go to Denver Jan. 1 to beco assistant to E. J. Joerger, the new c of the Colorado Grain Inspection Dep ment. Mr. Joerger has succeeded L. Hine, who resigned.

James E. Bennett & Co. of Chicago, have a private wire office in the Board Trade building, will establish anot branch Jan. 1 at 1104 Baltimore aven Kansas City. Freeman Field will be charge of the new office, while Tracy Cockle will remain at the old place.

"The corn movement has not star right this year," said B. C. Moore of Moore-Seaver Grain Co. "It has been observation that a bad start is hard overcome. Railroad presidents are free w promises of cars, but I don't believe roads really have a sufficient number cars in repair to meet freight demands."

Beginning Jan. 1, the Bartlett Fra Co. of Chicago will be represented in K sas City by Walter F. Izzard of the C cago office. Mr. Izzard will take the pl now held by R. B. Long. Mr. Long made no announcement of his future pla but is said to be interested in the business. Mr. Izzard's name has b posted for membership in the Board Trade on a transfer from Mr. Long.

harles T. Neal, zone manager for the ted States Grain Corporation in Oma- but formerly an elevator man in Kan- City, will deliver an address to the ng matrons of the Kansas City Athe- um Dec. 22. Mr. Neal's subject will be account of his experience as a director ood supply distribution in the devas- d portions of Belgium and northern nce under Herbert C. Hoover.

wo more treasury memberships in the sas City Board of Trade were sold this k at the fixed price of $15,000 each. total of membership sales on this basis e, all within the last four weeks. Thus exchange has secured a special revenue 75,000, which may be applied to the hase of the Board of Trade building in 1920. As the total membership be increased to 205, some members k it is time to call a halt by raising treasury price to $25,000. Within the two years memberships in the ex- ge have risen from $8,500 to their nt high level. The two late appli- s for certificates are James E. Ben- head of James E. Bennett & Co., ago, and William R. Cunningham of and, Kan. Mr. Cunningham is a grain produce dealer at Morland and has a wheat buyer for the Kansas Flour Co. at that point. He intends to open ain receiving house in Kansas City.

New Officers Nominated.

e next president of the Kansas City d of Trade will be F. C. Vincent or . Brogg. These men were nominated sday by a committee of which W. C. was chairman. Mr. Vincent is urer of the Simonds-Shields-Lons- Grain Co., a large elevator concern. Brogg is a broker, representing the te wire house of King, Farnum & Co., go.

N. Russell and H. J. Smith are the dates for second vice-president. B. largis will advance from second to vice-president under the constitution. directors will be elected from the ving list of nominees: F. B. Clay, John elly, H. C. Gamage, D. M. Huffine, W. arshall, L. J. Morgan, H. T. Mulhall, Roahen, J. A. Theis and Paul Uhl- .

m the following nominees an arbitra- oard of five members will be chosen: Bedell, H. A. Birmingham, W. O. ett, E. F. Emmons, W. G. Hoover, Hines, F. W. Lake and E. R. Stripp. election will be held Jan. 6.

Cash Grain Markets.

Wheat—Receipts for the week, 1,225 cars, ast 1,270 a week previous and 661 a ago. Medium qualities of hard wheat dull kinds of red advanced, while the dark hard fell 1c to 3c, owing to its ne cost. There was a good shipping nd and local millers bought freely, t where holders seemed too insistent her prices. Texas millers were rep- ed here. Kansas City elevator men some wheat at the Gulf for export the suspension of the embargo, but ind of business is not expected to be until the foreign exchange situation further improvement. Some sig- ce was attached to the abolition of ermit system on shipments of grain w Orleans. Passing of the coal strike proved the car situation, but cars ill scarce. Prices of hard wheat 3c lower to 10c higher and red ended 4@6c up, as follows: No. 1, $2.67@2.94; No. 2, $2.65@3.92; No. 3, 2.90; No. 1 red, $2.56@2.59; No. 2 2.56; No. 3, $2.51@2.53. Stocks of decreased 208,000 bus. to 13,944,000 against 13,520,000 in 1918.

—Receipts, 280 cars, against 250 a ago and 435 a year ago. Shipping cal consumptive requests were good, reference for high quality and dry- s Elevator men took corn of high re test and the lower grades. There accumulation of 11,000 bushels, the rs showing holdings of 37,000 bush- against 117,000 last year. Prices had changes during the week, but unchanged to 2c lower on mixed, ged to 4c higher on white and un- d to 2c up on yellow. The final ons were: No. 2 mixed, $1.52@1.54; $1.50@1.51; No. 2 white, $1.53; No. 3, 1.53; No. 2 yellow, $1.54; No. 3, $1.52 . Advices received were to the ef- at corn in Iowa and other states move freely if cars were more plen- . Dealers were not too confident over port that western railroads would position to render adequate service in ten days. Such stories have been heard before, yet it is hoped that this one may prove true.

Oats—Receipts, 46 cars, against 69 a week ago and 50 a year ago. Demand exceeded arrivals and stocks decreased 48,000 bus. to 979,000 bus. A year ago the elevators held 2,104,000 bus. Shippers were the best buyers, and there was a good demand, with prices climbing rapidly. White oats gained 4@5c, ending with No. 2 at 85@86c and No. 3 at 85c. There was an advance of the same extent in mixed, which ended at 83@84c for No. 2 and 82@83c for No. 3. Red oats, which closed at 85c for No. 2 and 83@84c for No. 3, showed a rise of 3@5c. The movement of Iowa oats to Kansas City this year has been restricted by St. Louis purchases for shipment to the southeast. It is said in Kansas City that St. Louis houses make easy terms for southeastern buyers and are able to get higher prices than Kansas City could make.

Kafir and Milo—Receipts, 46 cars, against 12 a week ago and 54 a year ago. The shadow of an imminent large movement from the country was plainly visible in the market and prices lost 5@10c per cwt. No. 2 white kafir closed at $2.90@2.92; No. 3, $2.84@2.86; No. 2 milo finished at $2.90@2.92; No. 3 at $2.84@2.86. Demand slackened, as buyers held off in anticipation of a further decline from the dizzy height recently attained. It was said near the week's end that several hundred cars of kafir and milo were en route to Kansas City. The crop is large, and it is expected to move liberally by Jan. 1. Local stocks increased 1,000 bushels, to a total of 3,000, against 20,000 a year ago.

SIOUX CITY, IOWA.

Paul Larson, Correspondent.

Mr. Conover, of the Armour Grain Co. was a visitor the first of the week.

Mr. McCreary is now manager of the Merriam Commission Co.'s office here.

V. E. Smith of The Slaughter-Burke Grain Co., was a Chicago visitor last week.

Will Merriott, who has been connected with the Flanley Grain Co.'s office here has been promoted to assistant manager of their Omaha office and will take up his duties there the first of the year.

The Milwaukee Railroad put an embargo on all grain shipments for terminal market on the 17th until December 26. This was done for the purpose of cleaning up their line of freight that has accumulated during the coal strike.

J. P. Haynes, Traffic Commissioner, and D. Webster, of the McCaull-Webster Elevator Co., were in Chicago the first of the week and held a conference with W. R. Edwards, chief inspector of the car service commission of the railroad administration. Mr. Edwards is convinced of the emergency of cars for this territory for the movement of corn owing to the high moisture test and that this corn will have to be moved before warmer weather. Mr. Haynes and Mr. Webster were assured that cars will be furnished as soon as possible and were promised by the Milwaukee Railroad 100 cars a day after January 1st; the Burlington also promised 100 cars a day beginning at once.

MILWAUKEE.

Erich E. Meyer, Correspondent.

The Parry Products Co., of Milwaukee, has been incorporated with a capital stock of $150,000 to manufacture grains, feeds, etc. The incorporators are Fred E. Brown, T. W. Parry and Emil B. Rix.

Receipts of grain at Milwaukee for the week ending Dec. 20 were 125 cars barley, 180 cars corn, 182 cars oats, 93 cars wheat, 66 cars rye, 1 car flax; total, 647 cars, against 808 cars the week before, 1,635 cars a year ago and 988 cars in 1917.

Private and public elevators in Milwaukee have been seriously affected by the drastic freight embargo placed on grain shipments by the Milwaukee road. It is expected that the embargo will be lifted early this week, according to George A. Schroeder, traffic manager of the Milwaukee Chamber of Commerce, who returned Saturday from a conference at Chicago with B. B. Greer, federal manager of the road.

In the Milwaukee cash grain market much higher prices ruled during the past week under heavy export buying, particularly rye, together with an improved financial situation, due to the passage of the Edge bill. Barley shows improvement of 7-8c for this period, rye 15-17c, corn 3-5c, oats 3@4c, while wheat is unchanged. The movement is moderate and the demand brisk generally. Closing markets were all weaker.

Charles F. Glavin, formerly a member of the Milwaukee Chamber of Commerce, who went through bankruptcy about three years ago, after failing through a disastrous deal in corn, with liabilities of $171,915.12, has returned to Milwaukee to pay his creditors 50 per cent dividend on their claims, through his attorneys, Bottum, Bottum, Hudnall & Lecher, Pabst Bldg. Mr. Glavin was an operator on the local grain board, and after his failure went to Buenos Aires, Argentina. He returned from Argentina last week.

Shipments of grain from Milwaukee for the week ending Dec. 20 were 199,800 bu. oats, 100,060 bu. corn., 92,590 bu. barley, 65.660 bu. wheat, 40,350 bu. rye; total, 499 270 bu., against 528,100 bu. the preceding week and 1,011,438 bu. a year ago.

Visitors registering at the Milwaukee Chamber of Commerce during the past week included the following: J. Robson, Leamington, Can.; E. H. Thompson, Eagle Grove, Ia.; E. J. Dunn, New Lisbon, J. G. Martin, Sturgeon Bay, Wis; C. H. Hitch, Cleveland, O.; C. W. Cheney, Eau Claire, Wis.; D. R. Mishills, M. B. Helmer, Fond du Lac, Wis.; M. Walters, West Bend, Wis.; J. Hansen, McFarland, Wis.; Thomas S. Wood, Duluth, Minn.; Wm. Drueke, Grand Rapids, Mich.; A. H. Whitney, Columbus; H. G. Stege, Kenosha, Wis.; Frank Borchert, Sturgeon Bay, Wis.

NEW YORK.

J. M. Nugent, Correspondent.

During the past week the following gentlemen visited the floor of the New York Produce Exchange: Peter Dewer of London; C. W. Harkel of Boston; J. R. Short of Chicago; J. C. Andrews of Minneapolis; and Chas. F. Glavin of Buenos Aires, Argentina.

Charles T. Mallette, formerly connected with the Keusch & Schwartz Co. and afterwards with B. F. Schwartz & Co., will hereafter act as representative on the New York Produce Exchange of J. S. Bache & Co., members of all the leading exchanges of the country. Mr. Mallette will have charge of the business passing over the private wire soon to be installed connecting the Produce Exchange with the Chicago Board of Trade.

Trade in cash corn was on a fair to moderate scale during the early part of the week, but toward the end of the period the demand dragged. Old No. 2 yellow, $1.72¼; new No. 2 yellow, $1.70¼; new No. 3 yellow, $1.67¼; new No. 4 yellow, $1.64¼; new No. 2 mixed, $1.69¼; new No. 3 mixed, $1.66¼ five days' shipment; new No. 3 yellow, $1.66¾ ten days' shipment; new No. 3 yellow, $1.64¾ all December shipment, and new No. 2 yellow, $1.59¾ all January shipment.

There was quite a brisk demand for oats during the early part of the week with both exporters and domestic consumers buying good quantities. At the close of the week, however, the enquiry had fallen off appreciably; in fact, foreign buyers appeared to be temporarily out of the market, and domestic consumers were only purchasing sparingly. Quotations follow: No. 1 white, 98c; No. 2 white, 97c; No. 3 white, 96c, and No. 4 white, 95c; ordinary white clipped 95c to 96c, and fancy white clipped, 97c to 98c per bu.

Offers of both wheat and corn from the Argentine became an important factor in the local market during the past week. It was estimated that about 700,000 bushels of wheat had been sold for future shipment to the United States in sailers, mostly wooden boats, at slightly under $2.50 c. i. f. New York. This wheat is of the Barletto Russo variety, and many claim it is just a trifle inferior to our hard wheat, but much better than the soft grades. This business is now more or less an experiment made possible by the very high premiums ruling for hard wheats owing to the active demand from millers. There were also about 500,000 bushels of corn sold at about $1.36 to $1.37 per bushel c. i. f. New York for January-February shipment, and also for February-March shipment in wooden sailers.

BALTIMORE.

Robert C. Neu, Correspondent.

Total receipts of grain in the Baltimore market for the year 1919 are about 6 million bushels in excess of the receipts for 1918.

The name of Robert C. Herd, steamship owner, and an official of the Green Star Steamship Line, is posted as an applicant for membership in the Baltimore Chamber of Commerce.

DONAHUE — STRATTON CO. MILWAUKEE WISCONSIN

C. J. France, executive secretary of the Port of Seattle, Seattle, Wash., was a recent caller at the secretary's office of the Baltimore Chamber of Commerce.

Considerable export business in No. 2 rye Western was done in this market last week and prices on this grain have advanced more than 15 cents per bushel from the recent low point.

The 65th annual report of the president and board of directors of the Baltimore Chamber of Commerce will be submitted to the membership of this organization next month.

A. W. Mears, a member of the board of directors of the Baltimore Chamber of Commerce, is planning to spend the latter part of January and early February at Palm Beach, Fla.

John W. Snyder, president of Hammond, Snyder & Co., grain receivers and exporters of this market, celebrated "another" birthday on December 18th, and received the congratulations of a host of friends on 'change upon the event.

The lack of government buying of hay this year had a material effect upon the receipts and shipments of this commodity in the Baltimore market, the total receipts of hay for 1919 being only a little more than half of what they were in 1918.

The condition of F. A. Stude, of Otto Stude & Co., grain receivers and shippers of this market, who underwent an operation about ten days ago, at the Union Protestantt Infirmary, this city, for stomash trouble, shows a steady improvement.

George A. Hax, senior member of the grain, hay and feed commission firm of G. A. Hax & Co., of this market, who has been traveling in the far west with Mrs. Hax, returned to his home in Baltimore last week, enthusiastic over the beauties of his own country.

One of the noteworthy features of the grain export business of Baltimore during the year 1919 has been the big increase in rye and barley shipments from this port, more than four times as much rye as last year having been exported, and over 4 million bushels more of barley, than in 1918.

The committee in charge of the Christmas fund for distribution among the employes of the Baltimore Chamber of Commerce, A. R. Dennis, Walter F. Macneal, and Edw. T. Sheil, Jr., raised the largest amount ever gotten together for a similar purpose, and, naturally, everybody was made happy.

Carl R. Gray, late president of the Western Maryland, was elected president of the Union Pacific System Companies, at a meeting of the board of directors in New York City, on December 11. Mr. Gray will take charge of his new post on January 1, with headquarters at Omaha, Neb., and will be succeeded as president of the Western Maryland by M. C. Byers.

PEORIA.

L. L. Eckard, Correspondent.

Oats—Receipts were 7 cars, with market 1c lower. No. 2 white selling at 83½c. Demand limited.

Another new grain firm will make its appearance among the Peoria Board of Trade organizations Jan. 1 when offices will be opened in the Easton building by the White Grain Co. J. M. Murphy, for several years buyer for the American Milling Co., has been named president of the company, while J. L. White, formerly of the G. C. McFadden Co., is secretary.

It has been stated by good authority that within a week 70,000 bushels of corn will be the daily rate of grinding in Peoria. The Corn Products Co. are now grinding 35,000 bushels and within a few days, when the coal shortage has been overcome, the United States Food Products Co. will be grinding equally as much, and there are several smaller industries using smaller amounts, and 70,000 is considered a conservative figure.

Saturday's market at Peoria weak and quoted 1@2c lower with good demand at decline. All offerings were cleaned up. Receipts, 52 cars. Offerings of corn to arrive have been rather light, as outside dealers appear afraid to sell owing to their inability to get cars to fill their contracts. Sales as follows: No. 4 white, 2 cars, $1.46; No. 3 yellow, 4 cars, $1.49, 1 car, $1.48½; No. 4 yellow, 7 cars, $1.46, 3 cars, $1.46½; No. 5 yellow, 3 cars, $1.44½; No. 3 mixed, 1 car, $1.47; No. 4 mixed, 3 cars, $1.45; Northern Iowa billing, 1 car No. 4 mixed, $1.46, aid 1 car at $1.45½.

MEMPHIS.

George Williamson, Correspondent.

Joe Wade made a flying trip to Chicago this week.

H. I. Baldwin, of Decatur, Ill., who has many friends here, was a visitor Saturday and a guest of the trade at their annual meeting and dinner Saturday night.

L. P. Cook & Co., who have been in part of the old Union Elevator on Promenade street, will be located after Jan. 1 in the old Riverside Elevator warehouse at the corner of Nettleton and the Illinois Central.

Williams & Monroe—"The House of Good Service"
MEMBERS—Chicago Board of Trade
129 So. Fifth Street, LOUISVILLE
City 2670 Private Wires Main 2670

Officers of the Memphis Hay and Grain Association for the ensuing year were elected Saturday night as follows: President, Embrey E. Anderson; vice-president, W. R. Smith-Vaniz; secretary-treasurer, Walter J. Fransioli; directors, W. M. Browne, C. G. Robinson, W. A. Hall, J. T. Morgan.

Carl Moore, of Lexington, Va., but since getting out of the army residing in Chicago, has associated himself with the Edgar-Morgan Co. as general superintendent of their mixed feed plant. The firm has taken over the entire property of the old Union Elevator and will operate it in keeping pace with their expanding business.

Dan. P. Hughes, who for many years has been the Southern representative of the Eismeyer Milling Co., of Springfield, Mo., is a member of a new wholesale grocery firm which will open for business here Jan. 1 under the style of Clayton-Hughes Co. The concern is organized chiefly by men who for years have been associated with the firm of W. C. Early & Co., which did a large business in grain and hay as well as flour and feed. The grain and feed department of the new company will be in charge of B. A. Dearth, who for a number of years was in charge of that line for the Early house.

Business in grain during the past week has been light, but there continues fairly good demand for ear corn. Buyers in the Delta sections prefer this to shelled corn and are paying a premium for it. However, they are not buying freely yet. On call cash No. 3 white was offered at $1.59 and

o. 4 white at $1.58, with No. 3 yellow at .59½ and No. 4 at $1.55. For No. 5 yelw in the car $1.62 was asked. Oats have en quiet and steady. Cash No. 3 white transit sold at 87½c and No. 4 at 86½c r cash on Saturday, but on Monday No. white was offered at 89c, with 87c bid. r cash No. 3 red 85c was bid.

At the annual meeting and election of e Memphis Hay and Grain Association at e Merchants' Exchange Saturday night movement was started for providing this y with a large and modern terminal ain elevator, which has been badly needfor several years. The idea was sugsted some time ago and was mentioned most of the talks made at the gathering, eiving hearty approval. It was said to the most urgent need of the trade here l necessary if this market is to grow expected. A committee to take up the tter and put a concrete plan before the de at an early date will be named in a v days by E. E. Anderson, elected presiit of the association. It is expected that plant of 1,000,000 bushels capacity will projected. The site most favored is ere both river and rail facilities may be vided, thus assuring satisfactory rates l service. Another movement started at meeting was for every manufacturer place on his product the slogan of "Made Memphis," it being claimed that this is now the largest center in the count for the manufacture of mixed feeds.

WESTERN RATES READJUSTED.

ffective Dec. 31, 1919, the through at on grain and grain products from he specific groups in Illinois and Inia, and points in Iowa and Misou on the west bank of the Miss pi River to points in Eastern k Line Territory (east of and in ng Buffalo, Pittsburgh, etc.) have ee readjusted, restoring the relationhi that existed prior to the 25 per er increase on June 25, 1918.

Under this readjustment the east of hicago proportions of the through at will again become the same as he reshipping rates from Chicago on nents originating in Trans-Miss pi River and Northwestern terri, now on the basis on grain of to New York, domestic, and 23c pt.

The specifics, or "proportionals," points in the groups 8½c and r have been increased to the ex- of ½c, and there has been made minor readjustment in the smaller groups.

Due to misunderstanding, the through were not readjusted from stations diana or the Ill. Cent. R. R. on nes to Evansville and Switz City. ng readjustment of the through from these stations, the present basis of divisions will apply, namely, 8½c to Chicago and 24c from Chicago to New York, domestic.

This readjustment has the effect, also, of restoring the former relationship between the specifics and the rates to Chicago on grain reshipped via the Lakes.

As to the roads whose through rates do not apply *via* Chicago, such as the T. P. & W. R. R., C. P. & St. L. R. R., etc., the June 25, 1918, adjustment had the effect of increasing the differences between such through rates and the combination *via* Chicago to the extent of 1c, and under the Dec. 31, 1919, readjustment this difference will be removed and the former relationship restored.—*J. S. Brown, Manager Transportation Department, Chicago Board of Trade.*

FARM LABOR IN WISCONSIN.

Wages paid to male farm laborers during 1919 showed substantial increases over 1918. Average rates per month when hired by the year were $47.50 with board and $67 without board, compared to $43.50 and $60.20 respectively for 1918. Day labor for harvest averaged $3.30 with board and $3.95 without board, as compared with $3 and $3.64 in 1918. Other day labor averaged $3 with board and $3.65 without board, as compared to $2.48 and $3.12 in 1918. When hired for the crop season only (usually April to November, inclusive), month hands received this year an average of $54.50 with board and $73.75 without board.—*Field Agent Becker, Madison.*

GRAIN ELEVATOR ACCOUNTS.

The Bureau of Markets has revised its previous system of bookkeeping for grain elevators to provide for the income tax problem. "The adoption of a uniform system of accounting should be of benefit both to the companies and to the men employed by them as managers," sagely says the Bureau of Markets, "but the simple keeping of the records is not sufficient. It is necessary that the manager and directors of the elevators should make use of all the information which a good accounting system furnishes. The grain and merchandise reports and methods of arriving at cost of operation through the cost analysis are valuable features of any accounting system. If the information obtained from such a system of accounting is made available to the stockholders and others interested, and they are thus assured that the business of the elevator is being handled in a competent manner and that detailed information regarding it can be furnished at any time, it will tend to strengthen the financial position of the company with those who extend credit to elevators during the season of crop movement."

Persons interested in the Bureau's output may obtain copies of Bulletin 811, "Bookkeeping for Grain Elevators," which has just been issued by the Bureau of Markets, Department of Agriculture, Washington, D. C., with the assurance that any elevator installing this system of accounts may refer to the Bureau of Markets any questions regarding its installation or operation.

Canadian Visible.

Canadian visible supply of wheat increased 288,000 bu. last week and oats 327,000 bu. Last year wheat increased 17,426,000 bu. and oats 188,000 bu. Details follow:

	Dec. 20, 1919.	Dec. 13, 1919.	Dec. 21, 1918.
Wheat	16,447,000	16,159,000	41,497,000
Oats	4,847,000	4,520,000	3,988,000
Barley	1,276,000	1,134,000	3,857,000

Chicago Grain Stocks.

Wheat stocks in all positions in Chicago decreased 541,000 bu. last week and oats 313,000 bu. Corn increased 92,000 bu., rye 31,000 bu. and barley 64,000 bu. Details follow, last three ciphers omitted, except in the totals:

	Public.	Private.	Total.	Last yr.
Wheat ..	5,500	10,508	16,008,000	13,129,000
Corn	45	678	723,000	620,000
Oats	1,357	2,475	3,832,000	6,265,000
Rye	1,539	1,103	2,642,000	1,072,000
Barley ..	321	104	425,000	1,554,000

Colorado feeders are said to be standing in fear of a corn famine, particularly ominous owing to the fact that there is only a small supply of hay on hand while the feed lots have lots of half fattened sheep and cattle. It is estimated approximately that there are 600,000 head of sheep and 100,000 head of cattle in the Ft. Collins district.

INDIANA WHEAT FOR 1920.

In no county of Indiana was there as much wheat planted this fall as last, and for the state as a whole, the decrease amounts to 32 per cent. One of the principal reasons for this shortage was the droughty condition in all parts of the state during August and September, when the soil was so dry and hard it was almost impossible to prepare it for seeding. In some of the southern counties, where it was possible to prepare the soil, rains set in before seeding was commenced and stopped that work until too late. Quite a number of the fields that had been prepared for wheat were seeded to rye because of the lateness of the season. The question of price fixing also had a bearing on the matter. On the other hand, many of the larger farmers who have not grown any wheat for several years have substantial acreages at this time.

The condition of the crop is very spotted. The early sown wheat in all parts of the state is badly infested with Hessian fly and fields that looked very promising early in the season are practically gone now; some of the very late planted is not yet up and because of the lateness of the season cannot make much of a crop, while that portion of the crop planted after the fly-free dates and before Nov. 1 is in splendid condition with a good color and strong, healthy looking plants.—*Field Agent Bryant.*

GRAIN YIELDS PER ACRE.

Government final report makes winter wheat yield per acre 1.5 bushels below an average, spring wheat yield four bushels than normal. Corn yield is three bushels below more than usual, oats 1 bushel below normal. Yields in bushels compare as follows:

	1919.	1918.	1917.	1916.	Avg. '13-17.
Winter wheat.....	14.7	15.2	15.1	13.8	16.2
Spring wheat.....	9 0	16.2	12.5	8.8	13.0
All wheat.....	12.8	15.6	14.1	12.2	15.1
Corn	28.6	24.0	26.3	24.4	25.6
Oats	29.4	34.7	36.6	30.1	32.8
Barley	12.7	14.2	14.6	15.2	15.9
Hay	22.3	26.3	23.7	23.5	25.6

FLORIDA QUARANTINE.

The authorities of the state of Florida are considerably exercised over the entrance of the European corn borer from New York and New England and before, effective Oct. 20, issued a quarantine order prohibiting the shipment or transportation into that state of Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut and New York especially, and from other states or countries in which the borer may be found, the following articles among others: Broom corn, corn in the ear, corn stalks and corn husks as well as corn fodder and stover; hays, straw, stalks of grasses as well as all plants commonly known as hay, whether used as feed, bedding packing material; all manure and refuse of all kinds except guano and commercial fertilizers; many flowers such as asters, chrysanthemums, etc.; practically all of the vegetables except in cans.

PALMER AND THE H. C. L.

Attorney-General Palmer arrived in Chicago on Dec. 16 to inaugurate a new movement looking toward lower food prices. If this movement develops some plan for carrying food supplies to points where prices are high in sufficient quantities to overwhelm the demand, it will prove successful, but in no other way can prices be forced down; and under present conditions the distribution of sufficient quantities of food to break prices seems to be a physical impossibility. Unless the Government can evolve some plan for producing more food and for distributing it to the points where most needed, its efforts to reduce prices will prove about as effective as King Canute's verbal order to the ocean tide to come thus far and no farther. In some quarters of the globe there are ample food supplies, while in others there is actual starvation. In these circumstances, a demand for food and feed can be counted upon as fast as the stuff can be brought forward, and this condition promises to result in the maintenance of high prices.—*L. L. Winters, with Hulburd, Warren & Chandler.*

DOMESTIC PRICES.

The American people will commend the main idea expressed by Herbert Hoover, *i. e.*, to save starving people in Europe, but are not likely to accept it gracefully that such a worthy cause should be made the basis for the shipment of surplus stocks accumulated by the Grain Corporation, with resulting higher costs in this Country. The American people will do much for charity. It is also clear that at this stage they will resent arbitrary action that will add to the already extravagant costs of foodstuffs at home.—*Pope & Eckhardt Co., Chicago.*

CEREAL WEIGHTS LOW.

Figures recently obtained by the Bureau of Crop Estimates indicate that plant diseases, adverse weather conditions and the like reduce crop yields to a greater degree than is shown in bushels or other units of measure. Wheat of the 1919 crop has an average weight per measured bushel of 55.5, which is 4.5 pounds below the standard weight. This is the lowest weight since 1904. The average weight per bushel of oats of the 1919 crop is 31.1 pounds, nearly 1 pound below the standard of 32 pounds, the lowest since 1908. Barley averaged 45.2 pounds instead of 48, the standard. The only other time during the past ten years when the average weight of a measured bushel of barley was so low was 1916. The bulk of these three crops was harvested at about the same time and all of them were affected by diseases and, in many sections, by excess moisture and other adverse conditions.

EFFECT OF LIGHT RECEIPTS.

Last week was an active one in the futures market. Speculation had everything its own way. Receipts were so light there was no opportunity to supply the demand and while the country seems real anxious to sell corn and oats, they do not dare to do so on account of the car situation. Shorts covered freely, but the speculative trade increased materially as a result of the advance, and the market began to act as if it were overbought. The situation was a most interesting one. Here we are, with a decided surplus of all kinds of grain, no likelihood of being able to sell much of it for export, as the exchange and shipping situation, together with the competition of other surplus countries, is absolutely against it, yet owing to the unrest of the labor classes and rundown condition of the railroads, the producer is prevented from marketing his crops and the speculator is taking advantage of the situation is a material factor in continuing the advance in the H. C. L.—*W. H. Perrine & Co., Chicago.*

Europe Must Increase Her Exports.

J. S. Alexander, president of the National Bank of Commerce in New York, says: "Foreign exchange cannot come back to normal until the restoration of the gold standard in Europe corrects the depreciation of European currencies and until the restoration of approximate equilibrium between our exports and imports in respect to Europe again makes the demand for foreign exchange approximate the supply."

BOOKS RECEIVED.

"California Rediscovered in 1919" is the title of a peppy and interesting description of a trip to California by Jos. Wild, statistician for E. W. Wagner & Co., Chicago. In Mr. Wild's words, the book is, "A new 'Innocents in California,' a rapid-fire account of Colorado Springs, Salt Lake City, San Francisco, Chinatown, Los Angeles, San Diego, La Jolla, the Grand Canyon, etc., during the 1919 high cost wave. A Romance of Chinese influences. An ode to the nectaric Far West climate. Humors of the West."

The United Grain Growers, Ltd., of Canada, at an annual meeting adopted a resolution recently urging the government to advance the price of wheat locally to the millers when the export price should justify it. They complain that Canadian millers are grinding wheat at $2.30 which is bringing $3 in the States.

British Foodstuffs Decontrolled.

George H. Roberts, the Food Controller, announced in the House of Commons on Dec. 16 that all home agricultural products except wheat would be freed from control during the first semester of the coming year but he added that some degree of supervision over the food supply would have to be exercised for the next three years at least.

Flour Department

Reaching grain dealers who handle flour as a side line and for millers, flour brokers and distributors who wish to interest grain and feed dealers in the handling of their product.

L. E. Monfort is the new manager of the Mattoon, Ill., branch office of the Geo. Legg Flour & Feed Co.

The Centennial Mill Co. plans to erect a plant at Spokane, Wash., to cost eventually $1,000,000. G. I. Toeys is manager.

The Chas. F. Bartlett Co., flour, feed, etc., has been incorporated at Grand Rapids, Mich., with a capital of $50,000 by Chas. F. Bartlett, Claude H. Loomis and Lillian H. Bartlett.

The New Jersey Flour Mills Co. of Clifton, N. J., has been incorporated with a capital stock of $1,000,000. Incorporators: L. F. Orbe, I. A. Cadmus and F. W. Tunis, all of Passaic.

The mill of the Columbia Mill & Elevator Co. at Columbia, Tenn., burned with a loss of $83,000; insurance, $45,000. A warehouse containing $200,000 worth of grain was saved. The mill will be rebuilt.

At the regular monthly meeting of the Baltimore Flour Club, held at the Chamber of Commerce, December 17, Mr. Samuel H. Rodgers was elected a member of the Club and the sum of $25 was ordered sent to the National Federation of Flour Clubs as the share of the local organization in defraying the expenses of a special committee of three appointed from the Federation of Flour Clubs to confer with a similar committee of the Millers' National Federation on the subject of a sales contract. Mr. A. W. Mears, vice-president of the Baltimore Flour Club, is a member of this special committee.

FLOUR MARKET.

The flour market generally is in a very mixed condition, and generally East and West it is reported very dull, retail dealers being well filled up. Whether this is due to the fact that we are entering the holiday season and the close of the year, or whether it is due to the operations of the retail marketing of the Grain Corporation, is a matter of question. The sales by the Corporation have had a tendency to check the advance of soft wheat flours and generally to have badly unsettled the market, not so much by the quantity of straight flour the Corporation has handled, because these amounts have been comparatively small, as by the uncertainty as to what the effect will be on the market of this trading. The high prices also have been the cause of turning some Argentine flour to this market, of which a considerable quantity, it is said, has already been bought to arrive during the first half of January. These purchases of course are more or less experimental, but they have had their influence upon the market.

The expectation that the removal of the embargo would bring considerable Canadian flour into the United States has not been realized. The fact seems to be that the authorities in control of the Canadian movement are playing a rather shrewd game, preventing by strong arm orders the movement of either grain or flour to this side with the exception of some courtesy exchanges, so called, of wagon wheat hauled across the line into towns in northern Minnesota, and depending upon high prices in this country to work off their product in the export trade on the basis of American prices.

Prices generally continue to show small gains, particularly for the better qualities, especially the spring clears, which formerly were inclined to lag behind. Hard winters advanced even more than the springs but the soft winters, which apparently are feeling the effect of the Grain Corporation's competition, are a little lower.

FLOUR MARKET.

DES MOINES.

Des Moines, Dec. 20.—Demand good. Mills unable to fill all orders. Market little higher. Family patents, 49 lbs., $14.50; bakers', $14.10; bran, $48; middlings, $51.

DETROIT.

Detroit, Dec. 20.—Millers have not advanced flour in keeping with the higher price of wheat, but the market is quoted firm and there is an excellent demand for every barrel produced. The mills are well sold ahead and there is a good current demand. Quote: Fancy spring patent, $14.75@15.50; fancy winter patent, $13@14; second winter patent, $12.50@13; winter straight, $11.25@11.50 per bbl.

NEW YORK.

New York, Dec. 20.—Sales of flour in the local market during the past week were largely to big consumers and distributors who always have to have a considerable supply on their books to take care of their regular trade. This business was of fair volume but on the whole the demand was limited and the market began to assume a holiday character. Prices were very firm for all the hard wheat flours, but mill quotations were generally above a working basis.

Government purchases of straight flour were very small and prices averaged $10.25 basis Baltimore. Opinions here differed widely on the future of the situation and no one was inclined to take risks by loading up beyond actual needs. The car situation and congestion on account of the recent coal strike have delayed arrivals and caused no little inconvenience.

Spring patents were quoted at $14@15; Kansas straights. $13.25@13.75; and winter straights, $10.50@11.

BALTIMORE.

Baltimore, Dec. 20.—The general flour market is firm and in good shape at quotations with a fair inquiry for winter and spring wheat straights and patents, with the greatest strength perhaps noticeable in springs. Rye flour also has advanced considerably from its recent low point, in sympathy with the advance in the grain. Quotations, per 98-lb. cotton or jute sacks, follow: Spring patent, $14.50@15; straight, $13.50@14.25; winter patent, $11@11.25; straight, $10@10.25; rye flour, pure to blended, $8@9.25.

DULUTH.

Duluth, Dec. 20.—The flour market here continues firm in all grades with the mills paying heavy premiums for spring wheat. New business was reported slow, being affected by apprehensions that a considerable tonnage of Canadian wheat might be imported into this country, thus cutting down the prevailing high premiums for domestic grain. The mills are reported to be well filled up on orders. There were no price changes. Quotations in carlots at mill follow: Family patents, jute, $14.60@14.80; bakers' patents, jute, $14.35@14.55; clears, $9.75@10; second clears, $6.75@7.

TOLEDO.

Toledo, Dec. 20.—Flour production of Toledo mills this week was 28,800 bbls., or 57 per cent of capacity, against 27,300 bbls. last week and 30,760 bbls. this week last year. Domestic demand only fair and although the output is less than last year at this time millers declare business for the six-months period, July to December, will show a considerable gain over the same period last year. The reason is that the Grain Corporation is purchasing very little flour now, heavy purchases being made earlier this year, while at this time last year they were purchasing large quantities of flour. Wheat prices continue to climb, selling equal to $2.52 for No. 1 red delivered Toledo. No. 1 dark Northern spring sold at $3.30½, and No. 3 dark Northern spring, $3.24½ here this week. Stocks of Grain Corporation wheat in store here are exhausted and not a bushel of this wheat is for sale. High grade blend flour, $12.80; clears, $10; low grade, $7.50; soft winter wheat patents, $12.1 Kansas hard winter patent not quotable as none is for sale.

MILWAUKEE.

Milwaukee, Dec. 20.—The local flour market was very active during the past week and showed a continued improvement in demand. Prices for cash stuff and flour are again higher and at the top price for the year. The car situation is a very serious handicap which is shortening the supply of spring wheat and making it difficult for millers to move flour stocks. Spring wheat patent is quoted 10c higher on outside prices and straight 10@35c higher than a week ago. A greatly enlivened export demand for rye flour is reported, while the domestic demand is also better than it has been for many weeks. Prices again have shown improvement with rye flour, pure, white, quoted at 50c higher on inside prices and 20c higher on outside prices. The Milwaukee mills produced a total of 19,900 bbls. of flour during the week, of which 16,500 bbls. were wheat flour, or approximately 69 per cent of total capacity, and 3,400 bbls. were rye flour. Current quotations, in carlots per bbl., in cotton, are: Spring wheat patent, $14.80@15.15; straight, $13.60@14; first clear, $10@10.20; rye flour, pure, white, $9.10@2.95; rye flour, straight, $8.40@8.6 rye flour, dark, $7.60@8.15. Corn flour is nominally quoted at $3.80; cornmeal, white $3.75; and corn grits, $3.70, all in 100-lb sacks.

NASHVILLE.

Nashville, Tenn., Dec. 22.—There was no abatement last week in the unusual demand for flour for this season in the Southeast. Mills continued to book heavy business and prices were strong. Shipping instructions are active, and many mills are behind with shipments.

Nashville and Southeastern flour mills with capacity of 226,290 bbls., had output last week of 164,769 bbls., or 72.7 per cent of capacity, which compared with 139,03 bbls. and 66.5 per cent the preceding week and 64.7 per cent the same week last year.

Prices: Best soft winter wheat patent, 98 lbs., cotton, f. o. b. Ohio river points $12.50@12.90; standard, $11.35@11.7 straight, $11@11.25; first clears, $8.50@9.

CINCINNATI.

Cincinnati, Dec. 20.—Millers generally reported the flour business as good but jobbers complained of irregular prices and rather disappointing sales. The market was firmer and quotably higher, but dealers found it difficult to compete with some mills which sold straight flour considerably below current prices. Chain stores and bakers were reported as buying straight in bulk as low as $10.25. The local wheat situation was easier, due to purchases by local and nearby mills of Government wheat. Wood basis 45c over jute. Winter patent, wood, $12.25@12.7 winter straight, in jute, $11.25@11.7 spring patent, wood, $14.95@15.45; spring bakers', jute, $13.75@14.25; Kansas hard patent, wood, $14.65@14.90; Kansas hard bakers', jute, $13.45@13.65; corn flour, 1 sacks inc., $3.25@3.35.

PHILADELPHIA.

Philadelphia, Dec. 20.—Flour receipts for the week were 7,499,922 lbs. in sacks. The market is firm, especially on Kansas straights and patents which are scarce and generally held at 25c per bbl. higher in sympathy with the West. The demand just at present is slow as dealers are mostly taking account of stock and settling their books for the new year, and the little business doing is mostly in second hand stocks which are available below millers' limits.

We quote per 196 lbs. packed in 140-lb jute sacks: Soft winter straight, Western, $10@10.50; do., nearby, $10@10.2 hard winter straight, $12.50@13; do., short patent, $13@13.50; spring first, clear, $9.7 @10.25; do., patent, $13.50@14; do., short patent, $14.25@15; fancy spring and city mills patent, family brands, $15@15.35; rye flour, $8.95@9.25 per bbl. in sacks, as to quality.

Peoria Board of Trade membership according to a rule in effect January 1, will cost $3,000 instead of $1,000 as at present.

Coldwater, Mich.

KANSAS CITY, MO.

Kansas City, Dec. 20—While some of the mills applied their energies entirely to the filling of sales for December shipment, others reported new business practically equal to their output. The better grades of flour, sold under fancy brands, were more active than other kinds. This refers particularly to hard wheat patent grades. Soft wheat millers said their trade was dull on the whole. The holiday season and high prices had a limiting effect on trade. Since the abrogation of the export embargo there has been an exchange of cables between Kansas City millers and buyers in the United Kingdom and Mediterranean countries, but no workings were possible. The total production of flour for the week was 87,500 bbls., against 83,900 a week ago and 71,800 a year ago. Hard wheat flour, reflecting higher wheat and lower millfeeds, showed a weekly advance of 30@ 35c a bbl. Red wheat flour was marked unchanged to 35c higher.

Following are the Kansas City prices of flour in carlots, sacked in 98-lb. cotton bags, per bbl.:

	Dec. 20.	Dec. 13.
Hard wheat—		
Short patent	$13.60@14.45	$13.25@14.10
Long patent	13.20@14.15	12.60@13.50
Straight	12.60@13.45	12.10@13.00
1st clear	10 60@11.10	10.00@11.00
2d clear	8.50@ 9.50	8.00@ 9.00
Low grade	6.50@ 8.00	6.50@ 7.50
Soft wheat—		
Fancy patent	12.10@12.60	11.80@12.25
Standard patent	11.60@12.10	11.30@11.70
Straight	10.60@11.10	10.60@11.00
Clear	10.00@10.40	10.00@10.40
Low grade	7.00@ 8.00	7.50@ 8.00

Railway Relief.

Regional Director of Railroads is quoted as saying that car shortage right now is acute, but, he believes, relief will be had in a week or ten days. Box cars are now being used to haul coal west. These cars will be available for the return movement of grain.

BURLAP AND BAG MARKET.

The burlap market was quiet last week in New York and there was not very much news other than a definite cable from Calcutta that the November shipments from India amounted to 49,000,000 yards to both coasts of the United States and 5,000,000 yards to Canada. One ship, the *Yoseric*, carrying 32,000 bales of jute, was reported in serious condition on Socotra Island, about 600 miles east of Aden on her passage to this country.

The bag situation seems to be clearing up somewhat, now that the dock strike in New York has been settled. The volume of goods in the hands of manufacturers has run comparatively low on account of the strike, and most big houses continue to be oversold on goods actually at hand and most of the yardage now in the harbor and immediately due to arrive will be practically all consumed in filling orders now on manufacturers' books. Prices continue firm and no recessions are immediately anticipated.

BUCKWHEAT AS FEED.

Genuine buckwheat middlings containing at least 25 per cent crude protein, 40 per cent carbohydrates and not over 5 per cent fiber, should be fully equal to wheat middlings, and in some respects superior. Fed by themselves, buckwheat middlings are said to be distasteful to cattle, but fed in connection with other grains they give good results. We do not know anything about buckwheat middlings for poultry, but *Wallaces' Farmer*, but judging from the composition, would expect them to give fully as good results as wheat middlings. In buying the buckwheat middlings, our correspondent should be sure that he is getting the middlings and not buckwheat "bran." Buckwheat "when ground may be fed to all classes of stock, but as its feeding value is about the same per pound as oats it is of doubtful wisdom to feed this stock when one pound of it can be exchanged for two pounds of oats or of corn," says the *Ohio Farmer*. "Corn and bran in equal weights make a far better feed than buckwheat."

Buckwheat Demand Improved.

BUTLER, PA.—We find the demand for buckwheat grain and buckwheat flour greatly improved.

Scratch feed mixers who held off buying buckwheat, expecting to obtain lower prices, are now scouring the country in an effort to obtain a season's supply. A large part of the crop will be fed on the farms, as much of the grain is too damp for shipping with any degree of safety. Farmers are also inclined to chop and feed their buckwheat due to the fact that they must pay much higher prices for dairy feed than they can obtain for their buckwheat per pound.

In some buckwheat producing sections the supply of good quality shipping buckwheat is exhausted for this season. —*H. J. Klinger & Company, Paul E. Eisler, Mngr.*

BROOM CORN.

Cold weather in the broom corn district of the Southeast still retards field activity, although some revival of interest appears in southwestern Oklahoma and Western Kansas, and buyers are again reported in the field. The car situation, however, has been very unfavorable for movement. In southwestern Oklahoma the *Broom Corn Review* reports some buying at prices from $100@150 for bulk of sales. In western Kansas the range is from $80@125 for the bulk. The Wichita market expects a better situation, now that the coal strike is temporarily settled, although there has been no recent movement of corn. Receipts from field points are very light on account of the car situation. There is a good demand for good corn and recent sales of good dwarf are reported at $200@250; standard $250@300; other grades $100@200. In central Illinois it is estimated there are still 75 cars of corn in growers' hands but there has been but little buying. Some sales as high as $300 are reported. On the whole the market is quiet.

OHIO WHEAT SITUATION.

Reduced acreage, Hessian fly infestation, and some extremely late seeding are the outstanding features of the December crop report on winter wheat just released by the Coöperative Crop Reporting Service at Columbus, O. According to the report, the winter wheat acreage seeded this fall by Ohio farmers is estimated at 2,476,000 acres, a reduction of 12 per cent from the 2,814,000 acres seeded during the fall of 1918. The actual reduction was somewhat greater than the intended reduction, as wet weather came on just about the "fly free" dates and in the southern part of the state, especially, it was impossible to get out the full intended acreage even though seeding in some sections continued to as late a date as Nov. 20. Seventy-five of the 88 counties report fly in the early sown wheat with apparent damage ranging from slight to material. Considerable anxiety is felt as to the outcome of the infestation and it is the general belief that should there not be heavy rains at the time of emergence of the flies in the spring, the damage by this enemy of the wheat may be enormous. Fortunately the greater part of the Ohio crop apparently escaped the fall fly infestation, yet was seeded prior to the adverse weather and the result is a state condition figure of 90 for the crop as a whole, which is 2 points under the ten-year average.

The acreage seeded to rye this fall is estimated at 100,000 acres, compared with 116,000 acres seeded during the fall of 1918. The Dec. 1 condition figure for this crop is 95, as against the ten-year average of 93.—*Field Agent J. L. Cochrun.*

BRITISH GRAIN PRICES.

Compiled from returns made to the British Board of Agriculture and Fisheries:

Year—	Wheat.	Barley.	Oats.
1919*	$2.22	$2.891	$1.733
1918	2.201	1.832	1.532
1917	2.15	1.827	1.307
1916	1.91	1.657	.993
1915	1.528	1.40	.88
1914	1.15	.859	.717
1913	.91	.856	.539
1912	1.01	.967	.81

*At the rate of exchange prevailing on Oct. 25, 1919, the average prices for the week were per bushel: Wheat, $1.91; barley, $2.50; oats, $1.46.

James Rennell of Harlin, Mont., a large grower of alfalfa seed, this year marketed 900 bus. of choice seed, of which 700 bus. was Grimm. His best seed was grown without irrigation.

1914 ALLIES 1919

The Armies of "the Free Peoples of the World" and the Chicago Board of Trade

EVERY intelligent person knows that an army must eat—to fight.

During the four years of the great European war, the Chicago Board of Trade was the world's open market place for the buying, selling and shipping of grain and food supplies.

The Chicago Board of Trade is the most economical agency for the distribution of food in the world.—Herbert Hoover.

As a part of the great business machinery of the United States, it did not break down under the great endurance test—but continued with increased efficiency and speed to serve the armies and civilian population of our allies, helping to feed over 230 million men, women and children.

At more than one military council the question was anxiously asked—Will the Chicago Board of Trade hold out?

History will record the fact—IT DID.

THE BOARD OF TRADE
OF THE CITY OF CHICAGO

L. F. GATES, President

JOHN R. MAUFF, Secretary

News of the Country Grain Trade

ARKANSAS.

Fort Smith, Ark.—The Western Grain o. has purchased the Anheuser-Busch ldings on lots 5 and 6, block 544, for nich the consideration was $6,000.

CANADA.

Portage la Prairie, Man.—The Portage g. & Elevator Co. has been incorporated th a capital stock of $300,000.

Belleville, Ont.—The Graham, Ltd., has en consolidated with the Judge Grain . R. J. Graham is president; Edgar dge, vice-president, and Geo. Jones, neral manager. A new elevator and ll will be built.

COLORADO.

Laird, Colo.—The Farmers Union Co-erative Co. will enlarge its house in the ring. G. H. Burnett is manager.

ILLINOIS.

Sadorus, Ill.—Harley Lewis has resigned manager of the West elevator.

Roanoke, Ill.—Bert Sharpe is now the nager of the Farmers Elevator Co.

Alexis, Ill.—C. E. Stambaugh has closed grain elevator here for the present.

Dongola, Ill.—The Wright Roller Mills l enlarge its elevator in the spring.

Denver, Ill.—W. E. Scott has sold his vator to the recently incorporated rmers Elevator Co.

Hillsboro, Ill.—The Farmers Elevator is building a new warehouse in con-tion with the elevator here.

Morrison, Ill.—A $50,000 transfer of the kes Bros. elevator in Morrison to the mers Elevator Co. was recorded.

Leonore, Ill.—The Farmers Elevator Co. just moved into its new office which f frame and brick veneer construction.

Bluffs, Ill.—The Fitzsimmons Brothers preparing to open a flour mill at the es Warehouse building in the near ure.

Kincaid, Ill.—Clyde McClintock is the manager of the Kincaid Farmers in Elevator Co. Improvements are g made to the plant.

Fairmount, Ill.—O. C. Benson has been ceeded by the Farmers Co-operative n Association of Fairmount, Ill.—W. Porterfield, Sec'y-Treas.

Meridan, Ill.—V. L. Anderson has just hed building a new office and install-a new Fairbanks, Morse 10 ton scale. er improvements will be made later.

Meadows, Ill.—The Meadows Grain & Co. is remodeling its oats elevator a corn elevator and the South Eleva-will be used for oats. A new office also be built.

Clarksdale, Ill.—The contract for a mod-elevator with a capacity of 45,000 els has been let by the Farmers Grain of Clarksdale. The contract price for new building is $20,000.

Hillsdale, Ill.—The Farmers Co-opera-Elevator Co. of Hillsdale has been in-porated. The commissioners are John lburn, Homer Palmer, Levi Ropp, Wilson and Homer Daley.

Edgeport, Ill.—The new elevator of Cooper Elevator Co. has been com-d and will be put in operation in a days. The Cooper Elevator Co. has in the feed business for over 10 s.

Beardstown, Ill.—A barge of wheat con-ng 3,500 bushels of hard wheat, the erty of Schultz-Baujan of Beards-, purchased from McFadden & Co. in transit to Beardstown, was par-tially sunk at West Mantazas near the elevator at that point when an empty barge ran into the wheat barge, bumping same into a submerged log and knocking a hole in the loaded barge.

Springfield, Ill.—Through permission granted by the secretary of state the name of the Murphy Grain Co., Inc., has been changed to the Fernandes Grain Co. Sim Fernandes is president; W. W. Jill, vice-president, and N. A. Midden, secretary-treasurer. The company is incorporated with a capital of $60,000 fully paid. The main office is located in Springfield. The company also has an office in Bloomington and Lincoln, Ill., with brokerage connections in Decatur, Paxton, Kankakee, Pontiac and Streator, Ill.; also Burlington, Des Moines, Cedar Rapids and Sioux City, Ia. The corporation holds memberships on the Chicago Board of Trade, St. Louis Merchants Exchange, Peoria Board of Trade, and have direct private wire connections with Lamson Bros. & Co. of Chicago.

INDIANA.

Treaty, Ind.—Articles of incorporation have been filed by the Farmers Co-operative Elevator Co. of Treaty.

Marshfield, Ind. — Thieves recently secured $30 by prying open the cash drawer at the elevator of Steegar & Betts.

North Manchester, Ind.—The Farmers Elevator Co. recently held a meeting to discuss the erection of an elevator.

Evansville, Ind.—Julius Artes, superintendent of the Union Elevator Co., has resigned after 37 years with the company.

Howe, Ind.—The Lima Elevator Co. has built a new office and installed a 15-ton truck scale; also have rebuilt their stock yards.

Mt. Comfort, Ind.—G. A. Pritchard of Washburn, Ill., has bought a half interest in the McComas & Pritchard elevator and is managing same.

Frankfort, Ind.—The Clinton Grain Co. has been purchased by N. W. Mattix and son, Hugh. The new firm will handle grain, seeds, coal and flour.

Union City, Ind.—The Union City Elevator Co. has been incorporated with a capital of $25,000 to maintain and operate grain elevators. Directors: Clyde N. Chattin, Clyde Schultz, Oliver J. Rowe.

Frankfort, Ind.—The Fairgrounds Elevator, formerly owned by Stevenson & Bergen of this city, was sold to Roy G. Wilkinson, an experienced elevator man of Wolcott, Ind. The consideration is said to have been $10,000.

Kokomo, Ind.—C. A. Warne and brother has purchased the Cloverleaf Mills here and installed a new corn sheller, cleaner, dump and other machinery. Mr. Warne formerly owned an elevator at Sulphur Springs, which he sold last year.

Winchester, Ind.—The Union City Elevator Co., which recently purchased the Farmers Grain & Milling Co., has opened for business. The building has been completely remodeled, a large addition is being completed and new machinery has been installed throughout.

IOWA.

Boone, Ia.—C. Williams will install a Trapp Auto truck dump in his elevator.

Toledo, Ia.—A new flour mill has been opened here with a capacity of 50 bbls. a day.

Shannon City, Ia.—F. E. Hoops has sold his grain and coal business at this place to the farmers.

Dayton, Ia.—S. T. Carlson has succeeded Elmer Shostrom as manager of the Farmers Elevator Co.

Stockton, Ia.—The Farmers Elevator Co. has voted to change the company to a co-operative organization.

Flugstad, Ia. — The elevator of the Flugstad Grain Co. has been thoroughly overhauled and is in splendid running order.

Sioux City, Ia.—Preliminary plans are in progress for the construction of a building for the Farmers Terminal Elevator Co.

Sioux City, Ia.—The Grain Belt Cereal Co. will erect a fireproof building six stories high and basement, 50x120, also six tanks, to cost $200,000.

Tilden, Ia.—W. W. Little has disposed of his grain business here to W. T. Mahaffy, who will run it on a percentage basis and have entire control and management of it. The business will be run under the firm name of W. W. Little & Co. Mr. Little expects to go to the south for the winter.

Wiota, Ia.—Frank O. Lenoir, associated with the Rothschild Grain Co., has purchased the company's elevator at Wiota and will take possession Jan. 1. Gene Kellogg, now in charge of the elevator for the Rothschild Grain Co., will be associated with Mr. Lenoir. The latter will remain with the grain company in its office at Atlantic.

KANSAS.

Tonganoxie, Kans.—The Kramer Fair Milling Co. has filed a voluntary petition in bankruptcy.

McPherson, Kans.—The Associated Mill & Elevator Co. of Kansas City plan to build a mill here.

Spearville, Kans.—The construction of a flour mill with a capacity of not less than 250 bbls. is contemplated.

Junction City, Kans.—J. A. Commons, of Wichita, has accepted the position of sales manager with the Hogan Milling Co.

Larned, Kans.—Jack Price, formerly with the C. V. Fisher Grain Co., is manager of the Associated Mill & Elevator Co. here.

Chase, Kans.—G. E. Smith, formerly manager for the Farmers Grain & Supply Co. at Ensign, is now manager for the Co-operative Union at Chase.

Coldwater, Kans.—The Larabee Flour Mills Corp. of Kansas City, Mo., has built a 24x26 ft. office and scale platform, all enclosed. They have installed a 7½ h. p. G. E. motor and will install an automatic truck dump later. L. E. Ginder is manager.

KENTUCKY.

Nancy (bill to Sommerset), Ky.—A flour mill is going up in Nancy, owned by J. H. Stephens.

Harrodsburg, Ky.—Sandusky Bros. have purchased an $18,000 flour mill in Har-

MAINE.

Houlton, Me.—Nearly 5,000 barrels of potatoes, valued at $20,000, were destroyed when the potato house of B. S. Green Bros. Co. burned.

MICHIGAN.

Charlevoix, Mich.—A. A. Swinton, secretary-treasurer of the Argo Milling Co., with mills at Charlevoix, East Jordan and Central Lake, has purchased the entire property of the Rock Products Co. at Charlevoix. Purchase price was $110,000.

Holly, Mich.—McLaughlin Bros. elevator at Holly was damaged to the extent of $2,500 this morning when an engine of the Pere Marquette railroad left the track and crashed into it. Bins containing wheat and beans were demolished and their contents spilled.

MINNESOTA.

Detroit, Minn.—The Detroit Elevator Co. has purchased the elevator of the Atlantic Elevator Co. at this place.

Cisco (Erskine p. o.), Minn.—The Atlantic Elevator Co. has sold its elevator at this place to the Cisco Elevator Co.

Glenwood, Minn.—The Farmers Elevator Co. has made improvements to its plant, having completed a new coal shed and installing a 10-ton Howe scale.

Maynard, Minn.—A new flour and feed warehouse has just been completed by the Farmers Elevator Co. It is equipped with a 5-ton scale, a 10-ton scale and auto dump and also a large cleaner.

MISSOURI.

Rayville, Mo.—A 10,000-bushel grain elevator and brick business building will be erected here.

Harrisonville, Mo.—Hogan Bros. have dismantled their elevator and are out of business at this place.

Bell City, Mo.—An elevator is being erected at Hagey, two miles north of Bell City, by Wellman Bros. of Benton.

Columbia, Mo.—The Broadway Milling Co. has begun making flour under the direction of J. E. Burton of Mayfield, Ky.

Jonesboro, Mo.—The Farmers Elevator Co. has been organized with a capital stock of $15,000. A new concrete elevator will be built in the spring.

Eldon, Mo.—The name of the Farmers Mill & Elevator Co. has been changed and is now known as Co-operative Association No. 16. W. H. Austin is manager. The association has been incorporated at $10,300.

North Kansas City, Mo.—The Midland Flour Milling Co. will erect a grain warehouse, 42x150 ft., with a capacity of 300,000 bushels, also 14 storage tanks, two stories and basement, reinforced concrete and structural steel, composition roof.

Kansas City, Mo.—Announcement is made from the general offices of the Burlington in Chicago that the railway is undertaking the reconstruction of the Murray elevators recently destroyed by fire. The work will cost in the neighborhood of $500,000.

St. Joseph, Mo.—The Vanderslice Lynds Co., with head offices in Kansas City, has established offices in the Corby Forsee building in St. Joseph with C. D. Lightner as manager. The company has applied for membership and will handle all kinds of grain on a commission basis.

Kansas City, Mo.—The Atlas Cereal Co. is to be reorganized and will operate as the Atlas Milling Co. with a capitalization as follows: First preferred stock, $600,000; second preferred stock, $400,000; common stock, $1,000,000. The present Atlas Cereal Co. has outstanding, preferred stock, $277,000; common stock, $400,000.

St. Joseph, Mo.—Contract for the building of a $200,000 elevator with a capacity of 1,000,000 bushels for the St. Joseph Public Elevator Co., just south of the Larabee mill, has been let. Excavation has been finished. The main elevator building will be of reinforced concrete and arranged so the capacity can be tripled if necessary.

MONTANA.

Belt, Mont.—The new mill of the Farmers Elevator Co. has been completed.

Medicine Lake, Mont.—The Farmers Elevator Co. has taken over the Midget Flour Mill and is now operating under one management. A. L. Tennis is manager.

NEBRASKA.

Omaha, Nebr.—The Black Hawk Grain Co. has been chartered with a capital of $100,000.

Riverdale, Nebr.—John Botin is now manager of the Farmers Co-operative Elevator Co.

Ansley, Nebr.—The Ansley Milling & Grain Co. has been chartered with a capital stock of $100,000 to do a grain and feed business.

Clarkson, Nebr.—F. V. Uridel, former manager of the Farmers Co-operative Merc. Co. at Leigh, is now with the Crowell Lumber & Grain Co.

Trumbull, Nebr.—The Central Granaries Co. is erecting a 30 000 bushel elevator to be operated by electricity to take the place of the one burned in July.

NEW YORK.

Hamilton, N. Y.—Ryan & Leland are installing a grinding mill in their plant and are getting ready to grind feed and flour.

NEW HAMPSHIRE.

Concord, N. H.—Carlos B. Mosely, a grain dealer here since 1870, died recently at the age of 76. He is survived by a daughter and son.

OHIO.

Bowersville, O.—The New Era Grain Co has increased its capital stock from $15,000 to $30,000.

Loudonville, O.—The Loudonville Mill & Grain Co. has increased its capital from $100,000 to $150,000.

Rising Sun, Ohio.—The Farmers Commercial Grain & Seed Co. has increased its capital stock from $15,000 to $50,000.

Prairie Depot, O.—The Prairie Farmer Elevator Co. has equipped its plant with G. E. motors. L. J. Ducat is manager.

Hatton, O.—The Prairie Farmers Co-operative Co. of Prairie Depot has purchased the elevator of Ash & Shaw, taking possession Dec. 10.

Conover, O.—The Wilgus & Shaffer Grain Co. has been succeeded by the Wilgus Grain Co. A. W. Burton is the manager, succeeding G. W. Shaffer.

Elida, O.—The Farmers Equity Exchange Co. expects to erect a 30,000 to 40,000 bushel elevator in the spring and install new machinery. R. C. Kephart is the manager.

Riverside (Cincinnati P. O.), Ohio.—The American Diamalt Co. will erect a 3-story 55x53 ft. concrete grain drying plant. Plans have been drawn and contract will be let shortly.

Sycamore, O.—The newly organized Sycamore Grain & Supply Co. has purchased the flour mill and business of the Eureka Milling Co. and will take possession Jan. 1. An elevator will be built and necessary repairs made as soon as weather permits.

OKLAHOMA.

Woodward, Okla.—The L. O. Street Grain Co. will move one of the elevators here to Buffalo, Okla.

Carnegie, Okla.—The White Star Co. of Wichita, Kans., has the contract for an elevator to be built for the Farmers Co-operative Mill & Elevator Co. at this place. The house will be iron clad and equipped with a Fairbanks oil engine, Philip Smith sheller and cleaner and a Richardson automatic scale.

OREGON.

Portland, Ore.—Construction of a series of grain bins will be begun shortly on the east side by H. L. Copeland & Co. of Walla Walla, Wash., grain dealers and builders. The bins will be of reinforced concrete, connected to form one unit elevator, 73 ft. high. The cost of the building will be $12,365.

SOUTH DAKOTA.

Bowdle, S. D.—The Bowdle Grain Co. is installing G. E. motors in its elevator.

Jefferson, S. D.—Tom Collins is the manager of the Western Terminal Elevator Co. at this place.

Pierpont, S. D.—Ed Roberts has accepted a position as manager of the Farmers Elevator at this place.

Sioux Falls, S. D.—J. E. Arnold, manager of the Land elevator, has purchased the Merchants Elevator of Sioux Falls and will take charge of it next April.

Henkin, S. D.—The grain elevator at this place has been purchased by Steel Bros. of Madison. Henkin is a new town, the elevator having been one of the first business institutions erected here.

TENNESSEE.

Memphis, Tenn.—After Jan. 1 the Union Elevator will be operated by Edgar Morgan.

Nashville, Tenn.—The Hall Hay & Grain Co. of Shelby county surrendered its charter to the state.

TEXAS.

Dallas, Tex.—The Gracey Grain Co. has been incorporated with a capital stock of $50,000 by A. L. Gracey and C. M. Shannon.

Plainview, Tex.—The Harvest Queen Mills has prepared plans and will erect a huge elevator in Plainview with a capacity of 300,000 bushels, built of reinforced concrete. The height will be 80 ft. with head house of 134 ft.

UTAH.

Ogden, Utah.—The Holley Milling Co. is considering enlarging the Phoenix Mill plant here.

WASHINGTON.

Lincoln, Wash.—The new plant of the Lincoln Milling Co. is completed and in operation. The cost of the construction was $20,000. Eight storage bins of 20,000 bushels capacity each will be completed shortly.

Molson, Wash.—The J. F. Walker grain warehouse in Molson has been purchased by W. L. Walker, a brother of J. F. Walker. The building has been leased to A. J. Cedarblom and Glen Dodson who will conduct a grain and feed business. Mr. Walker is in the grain warehouse business at Waukon, Wash.

WISCONSIN.

Milwaukee, Wis.—The Hadden Grain Co. has been incorporated with a capital of $5,000 by F. G. Hadden, H. M. Hadden and A. W. Keup.

Shullsburg, Wis.—Fred Hillary has erected a 16x24 ft. addition to his mill and installed a new grinder and other

CANADA OUT OF SCREENINGS.

It appeared at a conference at the Winnipeg Grain Exchange last week that there will be no more screenings available for either eastern or western Canada until the end of January at the earliest and even then the amount will be small. At a similar conference of elevator men, growers and feeders in October an agreement was made whereby 3,500 tons of standard screenings were to be sold by the terminals to the United Farmers of Ontario and the Farmers Coöperative Societies of Quebec at a fixed price of $30 per ton, this being a straight commercial transaction between these societies and the terminal elevators. As the farmers' organizations in the west were not prepared to undertake similar work, the Dominion Livestock Branch reserved 500 tons for western Canada and undertook its distribution. The contract on the part of the terminal elevators applied only to screenings which they had bought up to that time and which is their own property.

It has developed, says the Winnipeg *Grain Trade News*, that the demand both east and west is much greater than anticipated. The eastern societies have placed all of the 3,500 tons allotted to them and would like to have secured an additional 6,000 and the west would take 4,000 tons. It turns out, however, that even if 10,000,000 bushels of wheat should pass through the terminals before the end of January or the middle of February, it would not yield more than 1,200 tons of standard screenings, or stock food; so that it is evident that stockmen will have to turn to other sources to supply immediate needs.

The present crop has yielded a smaller percentage of screenings than usual. In addition to this of the 67,000,000 bus. of wheat inspected to Dec. 1 only about 20,000,000 bus. have reached the lake terminals, the balance being milled in transit or at western points.

Some Fat Show Figures.

The yearly top prices paid in the auction ring at Chicago for the International Exposition show cattle in carlots of various weights, as compiled by the *Drovers' Journal*, are as follows for 1919: 900@1,050 lbs., $45; 1,050@1,200 lbs., $35; 1,200@1,350 lbs., $27; 1,350@1,500 lbs., $30; 1,500@1,900 lbs., $24.50. The prices on the 900 pounders were $10 over 1918; the 1,050's $15 under last year; on the 1,200's $4.00 less; on the 1,350's $2.50 less; on the 1,500's $0.25 less.

The average for 1919 for the International Show steers, short-feds not included, was $25.45, there being 46 loads. Last year there were 30 loads averaging $17.47.

The Agricultural Department of Ontario is making a special effort to induce potato growers to produce a better quality of seed potatoes and has adopted the California practice of packing seed potatoes in boxes with the quality certified by tags.

CO-OPERATIVES IN THE NORTHWEST.

The Northwest National Bank's Review, at Minneapolis, has collated a statement from agricultural experiment station sources of the growth of farmers' coöperative companies in the Northwest during the five-year period 1913-17. The figures for the number of associations in each year is as follows:

ported by the United States in October,

	1917. No.	1913. No.
Creameries	643	613
Elevators	360	270
Livestock shipping ass'ns	400	115
Cheese factories	52	34
Stores	102	115
Potato warehouses	15	20
Fire insurance companies	159	154
Telephone companies	950	600
Miscellaneous	275	86
Total	2,956	2,007
Increase		949

The volume of business handled by these associations has increased enormously, as the followig table shows:

	Annual volume of business. 1917.	1913.
Creameries	$ 31,012,000	$21,676,252
Elevators	45,000,000	24,000,000
L. s. ship. ass'ns	33,000,000	6,000,000
Cheese factories	986,000	637,224
Stores	6,500,000	4,250,000
Potato warehouses	300,000	100,000
Fire insurance cos.	712,606	696,732
Telephone companies.	1,200,000	900,000
Total	$118,710,606	$56,260,208
Increase		62,450,398

It will be noted that the number of coöperative stores and potato warehouses decreased, although the amount of business done was somewhat larger. The reason, we apprehend, is not very hard to discover.

The notable thing in the table is the conspicuous growth of the livestock shipping associations; and in this connection a report by the Farmers' Livestock Shipping Ass'n of Litchfield is referred to especially. This association had been in existence for about eleven years, during which time its shipments increased from 14 cars worth $11,599 in 1913 to 208 cars in 1918, worth $533,000, of which $535,496 was returned to farmers and $17,174 spent for the expense of operation. It cost the members 42.3c per cwt. to market hogs, 31.2c to market cattle and 61c to market calves. All in all, the livestock associations have succeeded better than any of the others. These associations do not need a large business organization, with buildings and overhead, as do the coöperative elevator companies and other industries. Livestock shipping calls for no fixed capital; it has no interest to pay on loans; no losses of any kind. Buyers simply take the stock, forward it to South St. Paul usually, and distribute the proceeds.

Small Visible Corn.

There were on Dec. 16 only 72,000 bus. of contract corn in public elevators at Chicago. These grades are selling around the basis of $1.50 for the December. The prospects for deliveries on December contracts are not flattering. Therefore, the contracts will have to be evened up in the pit, which will probably keep the entire market strong during the balance of the month. Under this cash position those who believe in lower prices are not aggressive in action. On the other hand, there is no broad investment demand.—*Thomson & McKinnon, Chicago.*

SPECULATION AND TENANTS.

The speculation in lands induced by the war profits of farmers has so raised their price that tenants are no longer able in many places to pay the rest necessary to yield a return to the owner. In Mahaska County, Ia., for example, a well-posted man has said a majority of the tenant farms are or soon will be without tenants. This is due not alone to the high rentals asked, but to the fact that owners now in many cases do not and did not expect to hold the farms, but to sell them quickly at a profit, and the last purchaser, still hoping to make a sale before March 1, has not as yet arranged for its occupation by a tenant, and the prospective renter himself, finding many objections to taking charge of a farm under purely speculative ownership, is looking for something more stable. The consequence of it all is that a congestion of farm renting transactions such as has not yet been experienced in this country is certain to occur next spring.

Another unusual feature of the situation is the fact that about half the number of farmers who retired last spring are threatening to go back because they are not satisfied with town life. There is still another class that is not satisfied, viz.: the young tenant farmer who sold off his stuff at what he considered a fancy figure, moved to town and now would like to get into the farming game again, but finds this impracticable because of the still higher prices that are being paid for most things that go to make up farming equipment.

Notwithstanding all this and the dissatisfaction arising from the recent fall in the price of live stock and other farm products, many real estate dealers insist that when the land selling season opens farms will be found changing hands at another advance over the prices of last year.

Field Seeds

Representative seed growers of South Dakota estimate alfalfa at 1¾ bus. per acre, with good quality where grown. The total crop, however, was greatly reduced by grasshopper pest.

The Government report gives to Wisconsin an estimated yield of 248,000 bus. of clover seed this year, making that state the largest producer. This total is larger than the estimate on Nov. 1 by 92,000 bus. and is nearly twice the yield of 1918 although materially less than 1917.

A Denver paper reports as a botanical curiosity a hybrid of wheat-rye obtained by crossing turkey hard winter with Swedish rye in the summer. It does not appear that there is enough of this hybrid to test out its quality for any purpose. It is probably a sport rather than a true hybrid.

A seed firm at Valparaiso, Chile, writes C. A. King & Co. that the last crop of red clover grown in that country has practically all been exported. The new crop will not be ready until next April. The acreage now growing is quite large. Chile usually has a considerable surplus of clover seed to export. In the past this seed has found a market mainly at Liverpool.

The North Dakota Improved Seed Growers' Convention will be held at Fargo in January. H. L. Bolley of Fargo is secretary. Special prizes are offered for Marquis and Durum, particularly the amber. The prizes for Marquis total in value $200, the Durums $100, while the offerings for Fife and Bluestem are only $50. Prizes offered for corn total $225 and for potatoes $125.

The millers, elevator operators and bankers who are taking an interest in the agricultural proposition in the Northwest continue to be seriously disturbed about the shortage of spring wheat for seed. Chas. C. Massie of Northrup, King & Co., Minneapolis, has said the inability of the seedsmen to bring Canadian wheat across the line is proving a serious handicap in getting seed wheat for the Northwest next spring.

Chicago Seed Market.

Timothy seed opening the week's trading rather quietly developed strength each day of the week. Cash sales were reported at $10.75@11.25. Cash sales of clover seed were reported at $40 and gains were recorded on the week's trading activities. Range of prices for the six days of the week follow on timothy and clover seed:

	Dec.	March.	
Timothy—	B.	B.	A.
Dec. 15	$12.00	$12.65	$12.80
Dec. 16	12.00	12.70	12.80
Dec. 17	12.00	12.60	12.90
Dec. 18	....	12.70	12.85
Dec. 19	12.25	12.75	.....
Dec. 20	12.25	12.75	13.00

Cash seed range for week, $10.75@11.25.

Country lots—Poor to fancy, $8.50@11.50; fair to good, $10@11; choice, $11.25.

Clover, contract prime—

Dec. 15	$50.60	Dec. 18	$51.00

Weekly Linseed Review.

New York, Dec. 22.—*United Kingdom:* The situation in the United Kingdom has turned heavy with freer offering of Plate seed in evidence for February shipment, and the market at the close of the period could be considered weak. Indian sorts are practically unoffered, with the exception of afloat quantities, and some moderate lots being reshipped by the Continent. Full prices for Indians continue to be asked. The market for linseed oil closed easy with a quieter demand prevailing, and offerings in plentiful supply.

India: Latest reports confirm that the linseed regions in this country have received scattered rains which have greatly improved the crop outlook. A full acreage to the new crop of linseed is being predicted. Arrivals of old seed at the ports have been insignificant and shipments this week amount to only 32,000 bushels.

Argentina: The new crop can be considered excellent. Cutting has been unde generally favorable conditions and goo progress has been made. Liberal earl offerings of new crop seed can be looke for. The markets have displayed a ver heavy tone, being in fact weak, an there has been considerable liquidatio in evidence. The export demand a peared to be rather limited.

No change has taken place in th tonnage situation, rates still bein quoted at $32 for steamers down rive although a slightly lower bid, it is b lieved, would secure freight. Mor boats are expected after the turn of th year.

SEED MARKET REVIEW.

Carl Bryant, Correspondent.

Toledo, Dec. 20.—Usual Yuletid quietness prevails in the seed marke Red clover closed the week with a 30 gain in all positions with a little be ter inquiry and continued light offe ings. The week's receipts were 45 bags, against 686 bags last week, brin ing the season's total to 13,255 bag against 19,121 bags at this time las year. Week's shipments were 219 bag and stocks here are figured at 9,55 bags, against 9,328 bags at this tim last year. New York reports import there this week at none, leaving th season's total around 28,000 bags. Fee ing prevails that clover stocks ar wholly inadequate to the usual sprin requirements, though a good run of im ports to European seed would chang the situation materially. Timothy i back to highest prices of the mont scoring advances this week of 15@17½ probably on talk of improvement in ex change. Stocks here decreased 785 bag this week, shipments being 1,589 bag against 804 received, and are now 97 552 bags, against 107,576 bags last yea at this time.

May	5.87½	5.70	5.87	5.70

SEED SITUATION.

LOOK FOR NORMAL SEED DEMAND.

BLOOMINGTON, ILL. (5).—We anticipate anormal demand from our trade for ery kind of farm seed next spring. e believe if clover holds around its esent level there will be a much ger acreage planted in this territory n there was the past season.—*Funk os. Seed Co.*

SEED TRADE QUIET.

McGREGOR, IA. (7).—There has been y little doing in the seed line for t past two months, and our purchases a country stations have been extremely ht. We do not look for any move- nt of seed unless there should be te an advance from the present level, a l then there would not be much, as t farmers have very little seed left. W think also the dealers are pretty w ll shipped out, and not a great deal seed held in the country.

The clover crop is always light in this tion, but we had more clover than al this year.

The corn crop was very large, and of ellent quality, and there would be a lot of it moving at the present time if the railroads were not so badly tied up.

SEED BUSINESS OUTLOOK GOOD.

ST. JOSEPH, MO.—As to field seeds generally speaking the crops all seem to be short with the exception of cane seed. And due to the generally cold weather we have had the past three weeks bordering on the holidays, trade has been rather quiet. But the outlook generally is good for spring business.—*Farber Seed Co.*

Toledo Seed Movement.

Following is a comparative statement of receipts and shipments in bags of forage grain seeds at Toledo for week ending Dec. 20:

	Red clover.		Alsike.		Timothy.	
	Rcts.	Shpts.	Rcts.	Shpts.	Rcts.	Shpts.

Winter Wheat and Clover Seed.

President Heath of the Continental Seed Co. calls attention to the following interesting figures from the Government December wheat report:

	Acres.
Winter wheat area shows a decrease for 1919 of	11,719,000
Of this decrease there are located in the red clover growing and seeding states	5,460,000

This decrease in the red clover growing states is distributed as follows:

Eastern—	% of 1918.	Decrease.	Decrease.
New York	98	19,000	
New Jersey	95	6,000	
Pennsylvania	97	49,000	
Delaware	97	4,000	
Maryland	94	48,000	
		126,000	126,000
Middle—			
Ohio	88	338,000	
Indiana	68	922,000	
Illinois	70	1,030,000	
Michigan	96	32,000	
Wisconsin[1]	102	.....	
Minnesota	93	5,000	
Iowa	48	496,000	
		2,823,000	[2]2,818,000
Southern—			
Kentucky	68	338,000	
Tennessee	60	329,000	
Virginia	88	129,000	
Missouri	60	1,720,000	
		2,516,000	2,516,000
Total decrease			5,460,000
Total government decrease			11,719,000
In other states			6,259,000

[1]Gain of 5,000 acres. [2]Net decrease.

All winter wheat acreage in red clover states is not necessarily sown to red clover. What red clover is seeded in the months of February and March is usually on the winter wheat. The winter rye acreage and the clover seeding on rye is small in comparison.

Does the reduced winter wheat acreage in the red clover growing and seeding states have any significance as to the demand for red clover seed the coming early spring?

Duluth Linseed Market.

DULUTH, Dec. 20.—A fresh scaling down in the distant flaxseed future came about during the last week. Net losses of 25 and 27 cents were recorded in the old and new May futures, but December was firm, the old winding up 4 cents higher, and the new being unchanged. Spot seed gained 4 and 6 cents, with active bidding by traders for everything offered on the tables in order to enable them to cover their end of the month delivery contracts. Reports are that December deliveries have been fairly well arranged for, one of the heaviest operators asserting in that connection that his house had reduced its outstanding trades to the lowest limits in several years.

Some of the authorities in the trade are inclined to be bearish regarding the future course of prices. It was asserted that a substantial quantity of Argentine seed had been bought for March and April delivery at Minneapolis, at a basis much under the present market here. In view of the prospective more liberal imports of Argentine seed and expectations that marketings of seed from over the Northwest will increase as soon as railroad transportation facilities improve, it is predicted in some quarters that the May future quotation will recede to $4.

Receipts of flaxseed on this market were limited during the last week, amounting to only 17,248 bushels, as compared with 100,890 bushels during the same period last year. Only 5,096 bushels were shipped out from the elevators during the week and stocks in store on Saturday were reported at 76,000 bushels.

Closing prices of flaxseed on the Duluth market, as compared with the previous Saturday and the same period last year were:

	Saturday.	Week ago.	Year ago.
On track	$5.04-14	$5.00-08	$3.55
To arrive	5.00-09	5.00-03	3.53
December (new)	5.00	4.97	3.52
December (old)	5.04	5.00	....
January	4.94	4.90	3.53
February	4.84	4.77	....
May (new)	4 50	4.77	3.58
May (old)	4.52	4.77	....

Seeds Per Lb. of Grasses and Clovers.

It is interesting to know the number of seeds per pound in the case of the common grasses and clovers, in order that we may know about how many seeds we are distributing on each square foot. For instance, there are 230,000 seeds of red clover in a pound. There are also 43,560 square feet in an acre, or, a pound of red clover seed evenly distributed should give five seeds on every square foot. If only one of the five seeds grew, there would be a fair stand of clover. As a matter of fact, it is customary to sow about six pounds of red clover seed per acre, or about 30 seeds to every square foot.

The number of seeds per pound of the various grasses and clovers is just about as follows: Alfalfa, 220,000; alsike, 700,000; white clover, 740,000; timothy, 1,170,000; orchard grass, 600,000; redtop, 6,000,000, and bluegrass, 2,400,000. —*Wallaces' Farmer.*

Toledo Timothy Seed.

Timothy led the seeds last week at Toledo, scoring considerable advance. On any declines there was a good demand, especially for the deferred futures. Deliveries on December contracts were light. There was a good deal of trading over from December to the deferred futures. Supplies are large, but stocks are in strong hands and there seems little chance of timothy getting on the bargain counter.—*Southworth & Co.*

Toledo Clover Seed.

Clover seed held its own last week at Toledo. In spite of the approaching holidays and the usual falling off of business, prices hardened, buying orders predominating. But nothing sensational happened and no new features appeared. The absence of receipts in Toledo is the big factor and is attracting attention the world over. It is hard to conceive why Toledo escapes her share of the receipts. The competition must be pretty keen, and other markets and interior dealers are setting a pace that Toledo can't quite catch. This market is influenced by the speculative element and hedging sales, and this accounts for our lagging behind to some extent. Bulk of the trade now is in

March, and the trend of this future will be the barometer as to the future swings.

Alsike advanced during the week. There have been so few trades one almost forgets there is an alsike market. The passing of the holidays may develop a more active market and more interest as to its future trend. Still holds its premium over red clover, but the latter been crawling nearer this week.—*J. F. Zahm & Co.*

Kansas City Seed Market.

KANSAS CITY, Dec. 22.—Conditions in the seed trade underwent few changes this week. Interest centered in the movement of cane and millet, which is expected to increase from now on. Very little cane seed has arrived thus far, as threshing was delayed as in the case of kafir and milo. Belief that a good crop exists is general, and a good demand is expected from Jan. 1 forward, as people's ideas will turn to the planting season in the new year. The offerings of millet seed thus far have been chiefly of the commoner kinds, which were promptly sold to poultry feed manufacturers. Golden and Siberian will go for seeding purposes. Alfalfa seed is scarce and strong and the same is true of clover. There is plenty of timothy seed, but it shows a good tone. Blue grass seed cleaned from the last big crop is in fair request, but producers have parted from all of their holdings.

The seed market in Kansas City is quoted as follows, as from first hands:

Alfalfa—Per cwt., $25@35.
Timothy—Per cwt., $9@10.25.
Blue grass—Per cwt., cleaned, $20@30.
Clover—Per cwt., red, $35@45; sweet, $20@25.
Millet—Per cwt., Golden, $3@3.25; Siberian, $2@2.50; common, $2@2.25.
Sudan—Per cwt., $9@11.
Cane—Per cwt., red top, $2.50; orange, $2@2.25; amber, $1.75@2.

A SEEDSMEN'S SERVICE.

In a recent talk to an American association of grass seeds dealers, Geo. C. Edler of the Agricultural Department, among other things, said:

"Seedsmen frequently tide over current shortages of certain kinds of seed by carrying over stocks of them from the preceding year or years. This carry-over, though usually small as compared with the total planting requirements, occasionally serves as the balance wheel in preventing or decreasing violent price fluctuations. It often is of equal importance or of greater importance than the size of the current season's crop. The large carry-over of timothy seed from the crops of 1914-17, together with the disappointing export demand, in the fall of 1918 and the spring of 1919, apparently had more effect upon the timothy seed market than the production of the 1918 crop. Likewise the small carry-over of red clover seed in 1918 seemed to be of as much concern as the decreased production of that seed in 1918. The carry-over of some seeds commonly planted in large quantities in the fall is frequently the principal source from which the earliest plantings are made.

"Seedsmen have been and probably will continue to be the main connecting link between widely separated areas of seed production and seed consumption. The interim between seed harvest time and planting time is very short, hence seeds must be handled as expeditiously as possible.

"Only a small percentage of the farmers are producers of grass and clover or other forage crop seeds for market, but the percentage of consumers of these seeds to the total number of farmers is large. Of the small percentage of farmers who produce these seeds in a given year not many make a practice of producing them each and every year. For most farmers as well as for most country merchants seeds are a side-line and for that reason, as well as for other reasons, not so much attention is paid to the marketing of this commodity. The seedsman's main stock in trade is seeds. hence it is he who is best fitted to bridge the gap between the seed grower and the seed consumer. The unscrupulous methods used by some seedsmen should not affect and probably never have affected seriously the general reputation of the seed trade as a whole."

Milwaukee Seed Movement.

Movement of seeds at Milwaukee during week ending Dec. 20, 1919, reported to THE PRICE CURRENT-GRAIN REPORTER by H. A. Plumb, secretary Chamber of Commerce:

	Receipts.		Shipments.	
	1919.	1918.	1919	1918.
Timothy, lbs.	.....	.....	66,000	.....
Clover, lbs.	63,312	28,092	252,619	150,079

Sugar-Beet Seed, 1919.

Revised estimates of sugar-beet seed production in the United States in 1919 are shown in the table below from the *Monthly Crop Reporter*, the average yield being 600 lbs. per acre. Earlier estimates, based on reports of growers, as published in the September, 1919, issue of the *Seed Reporter*, indicated a total production of 7,500,000 lbs. It developed, however, that the average yield per acre in Idaho and Michigan was much smaller than was anticipated by the growers. Considerable acreage in Idaho was reported to be a total failure. The 1919 production still is 800,000 lbs. greater than the total production in 1918, 1,620,000 lbs. greater than in 1917, and 1,160,000 lbs. greater than in 1916. Details follow:

	Acr'ge. Acres.	Prod'tion. Pounds.
Calif., Ida. and Utah.....	6,470	2,750,600
Colo., Mont., Wyo., Neb. and New Mex.....	3,730	3,520,000
Mich., Wis., Ill., Minn. and Iowa	900	430,000
United States.....	11,100	6,700,000

A new site has been selected for the famous Mitchell, S. D., Corn Palace. The old building has been used for 27 years. The new building will cost something like $200,000.

Beans and Potatoes

Wisconsin Potato Crop.

Field Agent Becker of Wisconsin estimates that only 34.5 per cent, or 7,200 loads, of the last commercial crop potatoes in Wisconsin were still in growers' hands on Dec. 1, against 13,- cars a year ago. The rapid movent this year is attributed to three ses: (1) attractive prices; (2) dan- of soft rot due to frosting of the ck, and (3) fear of dry rot to preva- ce of blight in some sections of the te. The largest holdings are in the ron-Eau Claire and the Waupaca- tage districts, the former having 0 cars and the latter 3,280 cars. The eau-Columbia district has 715 cars in the northeastern section there about 600 cars, and in the Clark- athon district 625 cars. These dis- ts hold the great bulk of the crop.

Maine Potato Crop.

a his crop report of Dec. 15, Field nt Sanders, Wakefield, Mass., esti- es Maine potatoes at 24,480,000 bus., pared with 22,950,000 Nov. 1; 22,- 000 last year, and 26,526,000, the rage 1914-1918. Up to Dec. 2 Maine shipped 9,085 cars, compared with 5 last year—a 44 per cent gain. This r New England has 35,080,000 bus., inst 36,527,000 last year. The five es other than Maine have 10,600,000, inst 14,237,000 last year, a decrease 3 per cent. New Hampshire, 2,400,- vs. 2,940,000 last year; Vermont, 5,000 vs. 3,380,000; Massachusetts. 0,000 vs. 4,788,000; Rhode Island, 000 vs. 650,000; Connecticut, 1,680,- vs. 2,470,000. Yields throughout England exceeded earlier estimates ewhat and the loss from rot is now id to be less than at first thought; e the above increases over last th.

he United States crop is 357,901,000 against 352,025,000 Nov. 1; 400,106,- last year and 379,762,000 the aver- 1914-1918. Minnesota, 26,100,000 nst 32,760,000 last year, with 26 cent still in growers' hands. Carlot ement, 25,105 cars against 26,000 in . Small loss from disease and zing. Wisconsin, 28,200,000 against 0,000 last year. Michigan, 28,688,- against 28,560,000, with 44 per cent in growers' hands and loss from zing and rot unusually light, while ity is the best in many years. sylvania, 25,400,000 against 24,400,- last year. New York, 39,567,000 ast 34,960,000 last year. Exclusive ong Island, 60 per cent more had shipped up to Dec. 1 than to this last year, yet 42 per cent of the nercial crop remained in the grow- hands and about 3 per cent in deal- hands. Carlot movement for 1919 nated at 11,500 cars against 10,650 year. Loss from freezing and rot, t 4½ per cent.

BEAN SITUATION.

SMALL ACREAGE OF BEANS.

MADA, MICH. (9).—Not over 20 per of the normal acreage of beans was ed last spring. The yield was , however, and the quality very

owers are not selling at the pres- rice of $6 per cwt., but if the farm- uld get $8 he might be satisfied and d plant a good acreage next year. *n. C. Bottomley.*

EAN AND POTATO PRICES.

e potato market generally was an acing one during the past week. condition was also true of the market. Quotations follow for lots od quality and condition beans and oes, sacked, per cwt., unless other- specified, as of Dec. 20:

Beans—

Boston—Lima beans, $14@14.50.

Buffalo—Marrows, $10@11; mediums, $7@8; pea, $7@8; white kidney, $11@12; red kidney, $12@13.

Chicago—Pea beans, hand picked, ch. to fancy, $7.50@8; red kidney, $13.50@13.75.

Cincinnati—Navies, $7.50.

Denver—Pinto beans, $6@6.50; navies, $8@8.50; limas, $13@14.

Detroit—H.-p. pea beans, $7.25.

Los Angeles—Limas, $15@17; pinks, $7.50; white, $7.50; black eyes, $7.50; Garvanzas, $12.

Minneapolis—Navies, h.-p., fancy, $9.00; soy, $5; Cal. limas, $11; brown, $6.

New York—Marrows, ch., $11@12; com. to fair, $10.50@10.75; pea, ch., $7.75; com. to fair, $7@7.50; Lady Washington, Cal., ch., $7.75; sm. wh., Cal., $7.75; Kotenashi, $6.50@6.75; red kidney, ch., $13@14; com. to fair, $10.50@12.75.

Pittsburgh—Limas, $15.50; Cal. navy, $7.50@8; Mich., f. o. b., $7.50.

San Francisco—Bayo, cwt., $8.75; black eye, $6.25; cranberry, $7.50; Garbanzo, $8.50; lima, f. o. b., $13; Henderson, $11.60; pink, $6.20; red kidney, $12; red Mexican, $7; teparies, $3.20; white, lg., $6.25; white, sm., $6.40.

St. Louis—Quote white beans in car lots—Choice, hand-picked Michigan at $7.75 per 100 lbs.; prime machine-picked, $7.50; orders and small lots, higher; pinto beans, $7; California black eye, $8; choice lima beans at $16; California pink beans at $8, and white, $8.50.—Market Reporter.

Potatoes—

Buffalo—Round No. 1, per bu., $1.95@2; fair to good, $1.75@1.85; small or over large, $1.50@1.60.

Chicago—Wis.-Mich., rnd., wh., $3@3.15; Idaho rnd., wh., $3.75@3.85.

Detroit—Mich., 150 lb., $5@5.25.

THE ORIENTAL BEAN CROP.

Con.-Gen. Baker, Mukden, China, under date Oct. 3 has filed a report on the "Eastern Bean Crop," some data from which was printed herein on Dec. 10 on the "Japanese Bean Crop." The Manchurian crop is quite as important, but different, being mainly of the soya variety, marketed at stations on the South Manchuria Ry. In 1918 shipments amounted to 1,209,649 tons of beans and 19,802 of bean oil.

MARKETING METHODS.

The Japanese have obvious advantages as purchasers of this crop, through their intimate marketing methods.

The Japanese buyers possess many advantages through their knowledge of local conditions and their special banking and railway facilities. They obtain beans direct from the growers by advancing money against crops, and make forward contracts with interior dealers against a cash advance. They also deal with the produce exchanges, which at present exist only in Kaiyuan and Changchun. Exchanges, however, are soon to be established at Tiehling and Kungchuling. American buyers, however, can purchase through a Chinese compradore (a sort of middleman employed in the interest of the buyers), or through the exchanges, which guarantee that all contracts entered into through them will be punctually fulfilled; but buying through the compradore is much quicker, safer and more convenient, as all compradores are obliged to furnish tangible guaranties. Although a compradore's commission (2 to 3%) is a trifle higher than is charged by the produce exchanges, the purchaser will save through the time gained on delivery. The exchanges charge about 0.25%.

Perhaps the most difficult problem that Americans have to face in Manchuria is the method of making payments. This is due to the complicated state of Manchurian exchanges. Payments are usually made in the various districts as follows: Changchun and Kirin, tiao notes, small coin, dollar notes, and rubles; other points mentioned above, small coin, dollar notes, rubles and Japanese gold and silver yen. These currencies fluctuate continually; it is necessary, therefore, for a prospective buyer carefully to acquaint himself with the money market before entering into contracts. The usual way of safeguarding a contract is to specify the buying rate and paying rate of exchanges at the time the contract is signed.

CHINESE WEIGHTS IN THE BEAN TRADE.

Another important point to be taken into consideration is the weights employed. All beans are sold in tou or tan. In some places one tan equals 228 standard catties (304 pounds avoirdupois), and one tou equals 28 standard catties (37⅓ pounds), but in other places one tan equals 300 or 320 standard catties (400 or 426⅔ pounds) and one tou equals 30 or 32 standard catties (40 or 42⅔ pounds). It will be necessary for American merchants to familiarize themselves with the weights used in Manchuria if they intend to purchase in the interior or from the producers.

EFFECT OF EDGE BILL.

There is a confident feeling among export interests that the passage of the Edge bill is to be followed by the arrangement through the Federal Reserve Bank of credits which will enable foreign countries to buy fairly liberal amounts of our grain. This has created a very friendly feeling towards all grain markets during the last few days.—*Logan & Bryan.*

A heavy demand for stocker hogs and pigs was reported from Oklahoma City.

Feedstuffs

Feeders in Sullivan County, Mo., are paying $20 a ton for hay.

Hay buyers in Cowley, Kans., are paying $20 per ton for alfalfa in the stack.

The Southern Cattle Men's Ass'n will hold their annual meeting at Montgomery, Ala., on Jan. 27-29.

Denniss Bros., wholesale feed and flour dealers at Dubuque, Ia., have increased their capital stock from $60,000 to $100,000.

One feeder estimates he can put a cow through the winter on $5 on cake while at present hay prices it woud cost $25@30 a head.

The Russellville Feed Co. is now open for business at Russellville, Ky. The new firm is composed of B. B., B. C. and Creed Edwards.

Cattle in the northern feeding country of Nebraska are being fed on oil cake, which reduces the amount of hay called for in the ration.

Fire recently destroyed the feed mill of F. M. Kibbler at W. Terre Haute, Ind., entailing a loss of $7,000, partially covered by insurance.

Utica, Mo., is feeding some cattle, local crop of good corn selling at $1.25 to feeders. Very little being shipped out. Quantity of hay and other rough feeds ample.

The usual number of cattle are on feed in Muscatine County, Ia., with corn bringing $1.30 per ton which, however, is cheaper than a year ago and there is a large amount of hay on hand.

The Smith Flour & Feed Co. is a new firm engaged in the flour and feed business at Springfield, Mo. Norman Smith, formerly in the feed business at Mount Vernon, will manage the business.

Lewis & Co. of Clarksburg, W. Va., has been incorporated with a capital of $30,000 to do a feed and flour business. A. M. Donahue, Henry Q. Lewis and Henry L. Barham are among the incorporators.

In the neighborhood of Marquette, Kans., alfalfa is bringing from $15@18 per ton in the stack. Very little of this hay, however, goes out of the county, that which changes hands moves simply from farm to farm.

Grady, McClain, Caddo, and Stephens counties, Kans., report a strong demand for good mellow alfalfa of good color, local supply of which is very light. Indications now point to a very much larger sowing to alfalfa for next year.

The feed lots of the oil mills in southern Oklahoma are being filled with cattle for winter feeding. It is estimated that the amount of meal and cake going direct to ranchers this year will be fully 50 per cent under that used a year ago.

Damage to the extent of $300,000 was done to the plant of the Union Seed & Fertilizer Co. at Henderson, N. C., which started in the storage warehouse containing 2,500 tons of cottonseed and spread to the fertilizer plant. The loss was covered by insurance.

The State Dairy Commissioner of North Dakota says that industry is now about equal to the wheat crop in value, there having been a 100 per cent increase in dairy returns in the past year. The income from dairy products is estimated this year at $50,000,000.

It is reported that comparatively few sheep are on feed in the Arkansas Valley in Colorado and it is generally believed that sheep feeding in that section is about a thing of the past. The reasons given are that the range has disappeared; feeders must look farther for stock and at the same time alfalfa has soared out of sight and other expenses are too heavy to make a great investment profitable. Moreover, the Valley is changing the character of its annual crops.

The winter has been very severe in Wyoming and Montana this year and the loss of cattle and horses by exposure has been very large. The value of horses, particularly in Montana, is said to have fallen so much that it hardly pays to feed them and they are allowed to shift for themselves and many have been frozen. A stock shipper from Gillette, Wyo., recently in Omaha, reported that he had never seen so much dead stock in that country since the winter of 1911-12. Most of these dead animals had been frozen in transit. The railway service, of course, is poor in any event, but owing to heavy snows the delays were tremendous, one Montana shipper reporting his stock on the road 11 days and still far from destination.

AGAIN JUSTIFIED.

During the fall when the determination of the cotton crop was up and a heavy decrease in the cottonseed crush was broadcasted in the market letters of the Southern trade, THE PRICE CURRENT-GRAIN REPORTER said: "The apparent lack of interest of feed mixers and other buyers, with declining cottonseed meal markets of last week, tends to bear out our suggestion that an over bullish attitude should be avoided. Feed mixers rather prefer chancing payment of several dollars per ton more in midwinter purchases than contracting today for early 1920 requirements at prevailing high prices. However, these things are frequently overdone and sentiment in many quarters indicates that such possibility exists. The great Memphis cottonseed market, the clearing house for much of the mill news, is most bullish."

The Government estimate for the year's cotton crop in the United States at 11,030,000 bales proved to be considerably higher than was expected in most quarters, and the futures market suffered a sharp decline in consequence. December showed the greatest decline. The estimate is gratifying to consumers, and is more than 1,000,000 bales greater than unofficial, earlier estimates. The undertone of the market is, however, decidedly uncertain. Many conflicting influences are present. The strongest feature by far is the premium on the near months. It would seem as if the trade were endeavoring to ascertain the real value of cotton. So much for this year, during which a longer rainy season than normally is mentioned as indicative of a bumper crop next year, for the soils of the Southern cotton states retained the moisture in large quantities. But the excessive rain gives us this year an increased percentage of poor grades of cottonseed meal, the value of which will certainly not be enhanced and will probably decline. The reduced percentage of high-grade cottonseed meal may advance, because it is scarce. The Government report for the period Aug. 1 to Nov. 30 credits cottonseed meal receipts with 2,450,258 tons crushed, 1,716,148 tons of which is held at the mills.

NEW YORK OATS MARKET.

The continued smallness of arrivals bears out the opinion previously expressed, that no large receipts could be looked for during the current month; meanwhile, all dealers have been compelled to replenish rapidly depleting stocks, until practically the entire surplus offerings have been absorbed. It would seem, therefore, that shipments that can be promptly made in the near future should arrive when most needed and meet with ready sale at prices that should prove remunerative to the shipper. Export business is occasionally reported but believed to be the result of buying in to fill old contracts—*L. W. Forbell & Co.*

THE FEED SITUATION.

FEEDS QUIET.

MOBILE, ALA.—The feedstuff situation here has been just a little quiet for the past month but the prospects are extremely bright for a very heavy and increased business beginning with the new year. I beg to say that our merchants anticipate a heavy increase of business and are laying in good round stocks of all sorts of feedstuffs and some few have booked corn and alfalfa meal in good round lots to make into sweet feed and some of these bookings run as far as June of next year; but there are still others that are buying considerable stocks of alfalfa meal, oats, corn, etc.—*J. L. Suttle.*

FEED MARKETS.

MONTREAL.

Montreal, Dec. 19.—The market continues steady for all lines of mill feed. Carlots of bran are reported at $45@46, including bags, and shorts at $52@53 less 25c per ton for spot cash. Pure barley meal is sold in broken lots at $72@73 per ton and mixed grain moullie at $67@68. Dairy feed is in good demand at $55@56 per ton including bags.—Trade Bulletin.

ST. LOUIS.

St. Louis, Mo., Dec. 20.—The feed market is strong on account of the scarcity of offerings of bran, but middlings and mixed feed are moving slowly at weak prices. Alfalfa feeds, particularly the meal, are scarce and firm. Prices are as follows: Bran, $43@44; mixed feed, $46@

middlings, brown, $43; gray, $53; red dog, $68@72; alfalfa meal, No. 1, $42@43; No. 2, $39.50@42; choice, $44 per ton, in 1-lb. sacks.

BUFFALO.

Buffalo, Dec. 20.—The feed mills are doing a good business and it is said the consumer is getting his money's worth. Higher prices are predicted for cattle feeds next week.

PHILADELPHIA.

Philadelphia, Dec. 20.—The market for feedstuffs is firm under light offerings and good demand, especially for bran and middlings. Winter bran, $50@50.50; spring bran, $49@49.50; standard wheat middlings, $50@51; flour middlings, $58@59; red dog, $65.50@66; rye middlings, $50@51; fine yellow hominy, $66@67; fine white hominy, $67@68; reground oats feed, $31@31.50; cottonseed meal, 36% protein, $78@79; cottonseed meal, 41% protein, $83@84; cottonseed feed, 20% protein, $62@63.

DES MOINES.

Des Moines, Dec. 20.—Demand good the past week and receipts ample to care for the market. Prices slightly higher. Bran, $50; shorts, $50.50; flour middlings, $50; red dog, $66.50; cottonseed meal, $850; oil meal, $85; tankage, $100; alfalfa, masses feed, $43.50.

DULUTH.

Duluth, Dec. 20.—An active demand for all kinds of feeds was reported by dealers here during the last week, increased quantities being needed by the dairying interests owing to the necessity of keeping their cattle under shelter and the deep snows. The market was strong, bran advancing $1.50 and rye feed $1. Prices per ton follow: Bran, $43.50; ground oats, $45; No. 1 ground feed, $52.50; No. 2 grind feed, $51.50; No. 3 ground feed, $50; shorts, $44.50; flour middlings, $53; rose corn meal, $55; red dog, $61.50; Boston mixed, $45.50; cracked corn, $55; rye feed, $42@43.

MILWAUKEE.

Milwaukee, Wis., Dec. 20.—The local mill feed market ruled very strong throughout the week and prices on some items have shown substantial increases. All items under in great demand, buying being restricted from all sections, undoubtedly being stimulated by the continued spell of severe wintry weather. Mill production is at comparatively low point and the supplies are being quickly absorbed. Current quotations are:

Bran, per ton, $45; standard middlings, $46@46.50; flour middlings, $51@52; red dog, $60@61; hominy feed, $62; rye feed, $45 old process oil meal, $84; cottonseed meal, $78@85; brewers' dried grains, nominal), all in 100-lb. cotton sacks.

NEW YORK.

New York, Dec. 20.—The feed market was firm but inactive during the week. Offers were of limited proportions, but buyers were indifferent, and it was the prevailing opinion that consumers were carrying large stocks and that distributors had covered their year-end contracts. The cold weather had a sustaining influence on values but failed to stimulate demand as much as had been expected. Spot bran was quoted at $47; middlings, $49 and red dog, $68, in 100-lb. sacks, per ton, while Western spring bran was quoted at $49; standard middlings, $50@51, and red dog, $65, all in 100-lb. sacks, per ton, prompt shipment.

DETROIT.

Detroit, Dec. 20.—There is a pressing demand for everything the mills can produce and a firm market is quoted, with further advances over the prices of a week ago. Quote: Bran, $48@49; standard middlings, $51@51.50; fine middlings, $61@62; cracked corn, $65; coarse cornmeal, $63; chop, $53@56 per ton, in 100-lb. sacks.

NASHVILLE.

Nashville, Tenn., Dec. 22.—The feed situation was without new features of importance last week, with fair demand. Prices: Soft winter wheat bran, 100-lb. sacks, per ton, $46.70; standard middlings, $48; horse and mule feed, $48@63; dairy feed, $57@69; hog feed, $64; poultry feed, $65.

BALTIMORE.

Baltimore, Dec. 20.—There is a firmer undertone to the local feed situation in sympathy with late stronger Western advances and an improvement in the consumptive demand nearby since the change to more wintry weather. Quotations follow: Western spring bran, per ton, in 100-lb. sacks, $48.50@49; Western middlings, per ton, in 100-lb. sacks, $50@51; city mills' winter wheat bran, per ton, in 100-lb. sacks, $50; brown middlings, per ton, in 100-lb. sacks, $50@52; white middlings, per ton, in 100-lb. sacks, $65.

CINCINNATI.

Cincinnati, Dec. 20.—The market was firm and higher for the entire list. Coal scarcity and severely cold weather has further reduced supplies and several varieties of special feeds were practically out of the market. Coal shortage still interferes with manufacture, but mills are being supplied and nearly all are reported as operating in a limited way. Normal offerings of feeds are, however, not expected until well in the new year. Cottonseed meal from Eastern mills mainly supplying the market. Quotations per ton, in bags, basis carlots: Spring wheat bran, $46.50@47; soft winter wheat bran, $46.50@47; hard winter wheat bran, $47@47.50; spring wheat middlings, $49@49.50; soft winter wheat middlings, $52.50@53; hard winter wheat middlings, $54.50@55; cottonseed meal, 36% protein, $75; linseed meal, $81@82; gluten feed, $68.50@69; hominy feed, $62.50@63; No. 1 alfalfa meal, $42@43; beet pulp, $62@62.50; barley chops, $69@70; rye middlings, $47@48.

NEW ORLEANS, LA.

New Orleans, La., Dec. 20.—Mills are holding bran rather high and offerings are about $2.30@2.35 per hundred, tagged, delivered. Some few cars of grey shorts at $2.65 per hundred, untagged, for January shipment. The demand for shorts is very limited, and, at the same time, there is no buying of bran. The trade here have filled their wants from $2.15@2.20 about a week ago and are now willing to let matters jog along and take in their profits. Bran has been jobbing in New Orleans, in a small way, at $2.30 per hundred.

TOLEDO.

Toledo, Dec. 20.—Good demand for bran past week with prices unchanged. Middlings quiet. Supplies were easier this week with increased flour output. Bran, $40; middlings, $50, bulk, per ton, carlots, f. o. b. Toledo. Corn and oats feeds were higher with advance in grain prices and shortage of supplies. Scratch feed, $70@72; corn and oats chop, $62; cracked yellow corn, $67; dairy feed, $70 per ton, carlots, f. o. b. Toledo.

PITTSBURGH, PA.

Pittsburgh, Dec. 20—There has been practically no change in the feed market here. Receipts are very light, only 11 cars having been bulletined at the local exchange, most of which consisted of No. 1 and No. 2 white middlings. There were a few cars of bran and 5 of mill feeds. Prices remain high but there is no effort to establish quotations.

MEMPHIS.

Memphis, Dec. 22.—The holiday feeling pervades the feed market, but there is confident feeling that after the turn of the year business is going to pick up. Manufacturers are booking orders and buying raw material for such as they can. Nobody seems to think there will be any recession in prices. Mill feeds are scarcer than they have been and higher as a result. Wheat bran is being offered at $43.50 and is none too plentiful at that. Cottonseed meal is steady and unchanged at $69.50 for spot 7 per cent quality.

Northwest Buys Cottonseed Feed.

KANSAS CITY, Dec. 20.—Purchases of cottonseed cake by rangemen of Montana, Wyoming and surrounding states in the Northwest were a factor in the strengthened tone of the market in Kansas City this week. The Dakotas also were buyers, and liberal shipments were made to Nebraska. Buying in Kansas and the Southwest, however, continues light, owing to favorable weather and abundance of rough feed. Cottonseed cake and meal of 43 per cent protein is quoted around $81.50 to $82 a ton, basis Kansas City. Many mills are behind on old orders.

Hales & Edwards of Chicago have sold the manufacturing and sales rights of the Red Comb products to the Western Feed Manufacturers, Inc., at 345 North Elizabeth street. This concern, incorporated at $400,000, is a very large distributer of feedstuffs and has as president Wm. Eichenbaum.

Misc.	2,193	10,253	1,530	41,186

CARS STILL SCARCE.

Corn belt continues to report grain cars scarce or very scarce. At one point out of 177 cars 11 were good enough for grain. Corn belt mainly is anxious to sell corn at present prices. The situation to some extent reminds of last December and January. January 1, 1919, Chicago corn stores were down to 300,000. The Chicago December, 1918, corn receipts were lightest in many years at 5,489,000.—*E. W. Wagner & Co., Chicago.*

THE RUN OF HOGS.

Up to Dec. 3, in the same markets, there were received this year 28,027,000 hogs as against 28,096,000 for the same period in 1918, 23,713,000 in 1917, 27,835,000 in 1916 and 24,277,000 in 1915. Hogs have been held back this year on account of favorable feeding weather, and we expect the receipts from now on to be very liberal.—*W. G. Press & Co., Chicago.*

Kansas farmers do not seem to be so keen for the horse as some other people, as it is reported that about 20,000 motor trucks have gone to farmers in that state this season.

SUCRENE FEEDS

In Their 20th Year of Popularity

One dealer, who has handled Sucrene Feeds for many years, writes: "We have had increasing sales on Sucrene Feeds each year. When we sell a feeder Sucrene he is generally a regular customer. Have handled a number of other feeds but they are hard to start and generally fall off. In the long run we consider Sucrene our best seller."

QUALITY FIRST AND ALL THE TIME
THE SUCRENE FEED SLOGAN

It gives you a grip on the feed business which competition can not break.

Our new feed mill at Peoria, Ill., the greatest and most modern plant in America, devoted exclusively to the manufacture of mixed feeds, will soon be ready for work. In the meantime our Owensboro, Ky., plant is running double shifts to keep up with the demand for Sucrene Feeds.

We solicit your order for Poultry Scratch Feeds in any quantity. The late fire did not affect this branch of our manufacturing facilities. Address Main Office at Peoria, Ill.

AMERICAN MILLING COMPANY

Alfalfa Department

It is reported from Falls City, Neb., at there is a good deal of alfalfa in at neighborhood as well as other feed d not a great deal of feeding.

Alfalfa hay is selling at Greeley, Colo., is year at $18, against $14 a year ago. that part of Colorado the alfalfa is ed in connection with beet pulp for d.

At Dawson, Neb., alfalfa is selling at) a ton and upwards. Feeders are ing it in connection with other rough- e in order to reduce the cost of the tion.

Alfalfa in the Dairy.

The per cent of digestibility of the otein in timothy hay has been found be 48; clover 55, and alfalfa 73. Such ures strongly indicate the reasons y alfalfa is so especially adapted to es of the dairyman, and why the Ten- ssee Station found that with alfalfa $10 a ton and wheat bran at $20 the ving effected by substituting alfalfa bran was $2.80 for every hundred unds of butter and nearly twenty its for each hundred pounds of milk. e Department of Agriculture at Wash- gton stated in Bulletin No. 339 that ien good, well-cured alfalfa hay is rth $14 per ton the value of other ds is about as follows: Clover hay r ton, $10; timothy hay $7 and wheat an $16.

The constant profit-problem of the iryman is to find the feed that will sen the cost of his production. aser, dairy husbandman at the Uni- rsity of Illinois, says that corn silage d alfalfa make in themselves practi- ly a complete balanced ration for iry cows. Hayden, of the same insti- ion, finds that a ration containing ten unds of alfalfa hay produces seven- n per cent more milk than the same ion with timothy. Otis of the Wis- sin Station, says that the dairy mer can increase his profit 50 to 75 cent by a judicious use of alfalfa own on his own farm. Alfalfa hay to animals has much the same laxa- e effect on them as June pasture.— *burn.*

Alfalfa Meal Buyers Hesitant.

KANSAS CITY, Dec. 20.—Buyers of al- fa meal appeared hesitant this week, l while the volume of sales was lib- l on the whole, the unwillingness of larger consuming interests to fol- the advance in prices reduced trade an extent in Kansas City. Offerings m mills were light, owing to unfa- able weather for operation in some ts of the West, and the fact that ny are well booked up on orders, h many contracts yet unfilled. A ad inquiry prevailed, and sales were de to the East, Southeast, South l Central States section.

Choice alfalfa meal closed at $42.50@ per ton, sacked, car lots, basis Kan- City; No. 1, $41.50@42, about $2 her; No. 2, $37.50@38, compared h $35.50@36 last week; brown, @35.

A moderate demand for alfalfa mo- ses feed and alfalfa grain molasses d was reported by mixers here. An portant development in the trade is report of business with rangemen the Northwest, which section suf- ed seriously from drouth during the mer and fall period. The molasses d closed about $1 a ton higher, and ne grain mixed feed was about $2, ing as follows: No. 1 molasses feed, @42; No. 2, $38@40; brown, $36@38; lfa grain molasses feed, $42@55.

ORN HUSKING IN MISSOURI.

orn husking has progressed slowly l only 65 per cent of the crop was bed by Dec. 1. The yield in the th is better than expected. Work been still further delayed in the northern section of the state by heavy sleet and by rainy weather in the south. Farmers attempted to gather as much of their corn as they possibly could without hired labor. Day wages have been high and up to 10 cents per bushel has been paid. The quality of the corn is good in most of the state except in the south third, where there has been some rotting in the field and where shock corn was badly damaged by rain earlier in the season.—*State Field Agent.*

Rough Feed Plenty.

Generally through the cattle-feeding country of the West and Southwest, as well as in Illinois, feeders report ample supplies of farm-ground feeds, hay, corn and the soghum gains. The country was well moistened through the year and all forage crops were unusually good. The shortage of labor and of cars has put a restraint on any disposition to market hay rapidly, under the temptation of current high prices; and the bulk of the forage that will be sold, if any considerable surplus remains after what has thus far been a severe winter, will go out in the spring rather than soon.

There are, however, many places in Wyoming, Colorado, etc., and northward where feed is quite scarce, and the early coming of very cold weather is causing anxiety, because it fixes larger inroads on local stocks and because in the present state of the roads and railroads the movement of hay and other feed to the danger spots is difficult.

Flour Production, Etc.

The Grain Corporation's weekly bulletin covering the wheat and wheat flour movement throughout the United States for the week ending Dec. 12, in comparison with the figures for the same period a year ago, was as follows:

	1919.	1918.
Wheat receipts—	Bus.	Bus.
From farms, week..	8,042,000	15,124,000
Previous week.....	11,112,000	18,932,000
June 27 to Dec. 12..	625,494,000	621,810,000
Flour produced—	Bbls.	Bbls.
Week	2,877,000	3,275,000
Previous week.....	2,956,000	3,126,000
June 27 to Dec. 12..	67,730,000	57,595,000
Total stocks wheat—	Bus.	Bus.
All elvtrs. and mills.	261,892,000	256,619,000
Previous week.....	268,521,000	257,234,000
Change for week....	—6,629,000	—615,000

EXPORTS OF WHEAT AND FLOUR.

Exports of wheat and flour, July 1 to Dec. 12, amounted to 72,764,000 bus. of wheat and 7,857,000 bbls. of flour, making a total equal to 108,119,000 bus. of wheat compared with 89,316,000 bus. of wheat and 8,313,000 bbls. of flour last year to Dec. 12, the twelve days of December being prorated from the monthly total, making a total equal to 126,726,000 bus. of wheat.

NEW YEAR RESOLUTIONS.

First: That we eliminate waste in advertising during 1920. (Most people consider that THE PRICE CURRENT-GRAIN REPORTER is a necessity rather than an expense.) *Second:* That we use selected circulations of known value rather than waste distribution. (THE PRICE CURRENT-GRAIN REPORTER is distinctly a trade paper, serving those handling and manufacturing grain, hay, feed and allied products.) *Third:* That we employ trade publications for business development, establishment of good will and the very minimum of dead circulation.

In every trade, profession or business there are periodicals attractive to a particular following of readers, a process of natural selection. Birds of a feather flock together; and if you want to sell a certain field, advertise to reach the folks getting their daily bread in such field. The number of manufacturers appreciative of the sound distribution and business producing qualities of trade papers is growing. The number of publishers in trade fields encouraging this direct line from the manufacturer to the consumer speaks for the good judgment displayed in advertising in trade papers.

STOCKETT RESIGNS.

Owing to the fact that Montana has this year practically no grain crop, and in order to save grain dealers the expense of maintaining an expensive Association executive office, H. N. Stockett, for some years secretary of the Northwestern Grain Dealers' Ass'n at Great Falls, has resigned, effective Jan. 1 next. Mr. Stockett has built up a fine organization and we are quite sure that President Greely's commendation of his work and his fine personal character is entirely sincere, as it is well merited.

New Argentine Crop.

Argentina new wheat surplus ready in January can be estimated at 100 to 115 millions basis of current news. Their oats are poor. Their corn start is good. One English grain man estimates the applicable 1918-19 world wheat surplus at 720 millions, whereas Europe is unable to buy more than 480,000,000.—*E. W. Wagner, Chicago.*

Corporation Flour Purchases.

The Grain Corporation announces that its purchases of wheat flour for week of Dec. 18 were very small and at prices averaging about $10.25, Baltimore basis.

The Associated Press wired from Sofia, Bulgaria, that large elevators are being constructed at Varna on the Black Sea coast of Bulgaria to handle the country's wheat crop, which is expected to be the largest in the history of Bulgaria. The work is being carried forward with energy by the premier in the hopes of securing through wheat exports outside help to regulate exchange prices.

The Standard Way to Make Hogs Pay

After years of study, it has been found that when the proper feed is used hogs will feed themselves.

Many grain men who are in touch with live stock feeders have added to their profits by selling

Standard Digester Tankage

is the most perfect balance for his corn. Guaranteed sixty per cent protein, combined with phosphate, lime, ash and fibre. Put it in a trough and he feeds himself just the right amount.

Hay Department

In Sherman County, Kans., the hay crop was short this season and farmers are now buying.

Pontotoc County, Okla., had a large crop of hay this year and much of it is still on hand, owing to shortage of cars.

Chase County, Kans., is reported to have a good crop of hay but most of it is in the stack and not much is expected to go into commercial uses.

Roads in South Dakota are generally in such bad condition that it has been impossible to haul hay to the station and feeders westward in Montana have been suffering considerably for want of hay.

Nemaha County, Neb., reports an abundance of rough feed this year with prairie and timothy making up the bulk of the hay crop. The quality is not quite up to the standard but there is a large amount of it, especially prairie.

Reports from Oklahoma are to the effect that about 90 per cent of the available crop of hay has been shipped to market, or directly to dairies and feeders. The surplus in stack and under shelter will be probably no more than is needed for the winter feeding.

A stock shipper reports that Ray County, Mo., has a large stock of hay and other rough feeds, but that little or no hay has as yet been shipped to market, few of the farmers taking the trouble to bale their hay for sale and will probably not do so until spring at any rate.

Shippers in Saunders County, Neb., report hay in that part of the country as above the average and that farmers are heavily supplied with all kinds of roughage. Considerable timothy and prairie has already found its way to market and farmers generally are holding for higher prices.

The old established hay and grain business of J. W. Gasteiger & Son with its big grain elevator in New York City has been taken over by its creditors and will be conducted by them through a trustee. The cash resources of the business are virtually exhausted and the liabilities amount to about $160,000.

Straw has its uses as a feed but as a contributor to the *Ohio Farmer* says, "To feed a ration of straw alone is to fill the animal's pouch, but that is not the primary purpose of feeding, the point is to feed that which supplies quantity and nourishment." Straw provides the quantity but not very much nutriment.

A stock shipper from New Mexico says the amount of hay in that state this year was never larger and the quality was the best raised in several years. Considerable shipments have been made northward into Wyoming and Montana and other dry sections as the cattle feeding in New Mexico is not as heavy this year as usual.

The yield of timothy hay in Ohio was particularly large in Stark, Wayne and Holmes counties. Only a small percentage of the crop has been marketed as yet in any part of the state, farmers holding for higher prices, while dealers with stocks on hand have been prevented from shipping by the car shortage. It is believed that these conditions, together with the fine pasturage in the fall, will leave a considerable surplus in Ohio for shipment in the spring.

Spontaneous Combustion of Hay.

A gentleman connected with the United States Department of Agriculture who has been giving especial attention to the matter of spontaneous combustion of hay, writes *Wallaces' Farmer:*

"Curiously enough, I have never found a statement giving the length of time after putting hay in the barn at which spontaneous combustion may be expected to occur, if at all. In all the observations made, no one seems to have put down any data from which one might answer the question: At what time can the farmer expect hay to be safe from spontaneous combustion if it has not occurred up to that time?"

In the interets of securing reliable information on this subject, we hope any of our readers who have made such observations will write us.

Legume Hays for Brood Sows.

That clover and alfalfa hay are beneficial in rations for wintering brood sows is the conclusion of W. L. Robison, swine specialist at the Ohio Experiment Station. Both clover and alfalfa have given satisfactory results when fed with corn to brood sows. The hay takes the place of a part of the more expensive grain ration, the common method being to give the animals a rather light ration of corn and plenty of hay and a little tankage. If no hay is fed, a somewhat larger amount of grain will be needed.

Brood sows on corn alone usually produce pigs of lighter weight and smaller bones, while those receiving hay and some tankage, as a supplement to the corn, produce strong, vigorous pigs with plenty of vitality. One satisfactory ration tried consisted of corn, 14 parts, tankage, one part, and what clover hay the animals cared for.

The Horse vs. Motor Truck.

Several feeders in northern Colorado are hauling pulp with motor trucks and are pleased with the way the thing works. A Weld County man says the motor truck is especially desirable for long hauls. He lives ten miles from a sugar factory and hauling costs about $1 a ton, which would be ordinary team cost on a four-mile haul. He recommends the continuance of the teams on the short hauls, however. His truck hauls the equivalent of a four-horse load from the pulp pit to his farm four times a day. To do his loading quickly he employs two men on the truck; with teams he would have used sixteen horses and four men. His truck will haul out a full load from the silo on a cold, slippery day when a four-horse team will stall on account of ice.—*Farm and Field.*

KANSAS CITY HAY NOTES.

SANDERS SOSLAND, CORRESPONDENT.

At a recent meeting of directors of the Kansas City Hay Dealers' Ass'n, transfer of the membership of the late Jerome E. Dyer to Dan B. Tilson of Dyer & Co. was approved. Mr. Tilson, who was associated with Mr. Dyer before the latter's death more than a year ago following an attack of influenza, succeeded to the position of president and general manager of the company. There has been no change in the general conduct of the business, nor is any contemplated, according to Mr. Tilson. The concern still is giving particular study to tariffs and other problems concerning transportation. R. B. Shofstall is secretary of Dyer & Co.

An amendment to one of the by-laws of the Kansas City Hay Dealers' Association, known as the "Guarantee Fund," failed to obtain the required majority of votes and was defeated. The amendment was largely designed to curb holding of membership in the association merely as a speculative investment.

"Advancing prices for hay in the Kansas City market in recent weeks have been largely the result of artificial factors," said C. M. Funk of Funk Bros. "Even the more bullishly inclined members of the trade do not deny the fact that large quantities of alfalfa, prairie and tame hay still are available in the sections from which Kansas City normally draws its supplies. Of course there are isolated districts where supplies already have been exhausted, but our advices from mo sections indicate much hay still ava able for buyers. Car shortage, ho ever, has restricted the movement se ously. An enormous demand has pr vailed and still prevails for alfalfa a other varieties of hay, and it is n particularly the hay available in t country that affects market values, b the forage 'on wheels,' or in a positi where rolling equipment can readily supplied. Prices on alfalfa doubtle will continue high until the car situ tion becomes very free again, fr enough to allow an unrestricted mo ment to market. When such a chan in the car situation will be witness is uncertain of course, but we normal witness improvement shortly after t opening of the new calendar year. T recent strike of coal miners may del the freer car movement somewhat th year."

"More cars are being supplied in t prairie hay producing sections of Ka sas and surrounding states, which h brought about the easier tone in t market for the wild forage," said He bert A. Dyer of the National Hay A "Prairie producing areas, particular those from which Kansas City dra the bulk of its wild hay, cover a co paratively wide territory, and it is n unusual that this variety should fi move freely to market because of mo liberal car supplies. Large quantiti of prairie are held in the country, a until recently only an insignificant nu ber of cars have been supplied by ra roads to shippers."

"While the alfalfa market displa unusual strength at the present time, is probable that a slight reaction prices may be witnessed within t next few weeks," said Harry J. Nor of the Midwest Hay Co. "Dullness us ally marks the trade around the holid period, and it is not unusual to witne sharp recessions in prices. A break th year, however, is improbable, and a reaction in prices will not continue f any lengthy period, hardly later tha the middle of January in the new c endar year. Demand for alfalfa is too broad a volume to permit of a sharp downturn in prices."

"Alfalfa meal production in the Unit States is not sufficient to meet the co sumptive requirements of the mix feed industry and of feeders of li stock," declared W. H. North of Nor Bros., who operate an alfalfa mill connection with their extensive alfal trade in Kansas City. "The mixed fe industry of the country is growing a tremendous rate, despite the fact th the manufacture of mixed feeds is y in an early stage. Mixed feed plan are beginning to dot the country, ne mills being erected over a wide ter

NEW YORK.

Dec. 19.—The New York Hay Exchange reports the hay situation as follows:

	Hay tons	Straw tons
Receipts for week.....	3,151	300
Receipts last week.....	4,702	360
Receipts Sept. 1 to date.....	67,168	5,300
Receipts same time last year..	91,915	5,490

Receipts have been fairly liberal at all harbor points, trade unsatisfactory and market has been in buyers' favor throughout with values averaging $1 a ton lower on most grades of large baled hay, about $1 a ton on top qualities of small bales and $2 lower on low grade small baled hay. Quotations:

	Large bales per ton	Small bales per ton
No. 1 hay.....	$33.00@34.00	$32.00@33.00
No. 2 hay.....	29.00@31.00	29.00@30.00
No. 3 hay.....	26.00@28.00	25.00@26.00
Shipping hay	24,00@25.00	23.00@24.00
Fancy light clover mixed hay	@31.00	@30.00
No. 1 clover mixed	27.00@29.00	25.00@27.00
No. 2 clover mixed	25.00@26.00	23.00@24.00

Straw—No. 1 rye, $17; No. 2 rye, $15@16; No. 1 oat, $16; No. 1 wheat, $13.

MONTREAL.

Dec. 19.—The local market rules very firm, owing to the small receipts. A small shipment of 464 bales was made to Liverpool last week from Portland, presumably as a trial shipment. It would not be surprising if both the Continent and Europe imported considerable Canadian hay before the winter has passed, especially if sterling exchange advanced.

The local market remains firm, with sales of carlots of No. 2 timothy hay at $24@25 on track, No. 3 at $22@23, and clover and clover mixed at $21@22. The sale was reported of a car at $26, but the quality was said to be equal to No. 1.

The receipts of baled hay last week were 6,248 bales, against 29,522 bales for the same week last year.—Trade Bulletin.

BUFFALO.

Dec. 20.—Everybody continues to hold tight on the best hay and there is no telling when the farmer will begin to loosen up. The market has been getting stronger. No. 1 is quoted at $30@31; No. 2, $28@29, and No. 3 $25@26 on track. There is little straw offered and a good inquiry. Quoted $12@13.

ST. LOUIS.

Dec. 20.—Receipts of hay during the past week have been moderate, consisting principally of timothy and clover mixed with a moderate amount of alfalfa.

Timothy hay market continues to rule steady with an excellent local demand, also a good shipping demand on all grades of sound timothy hay, finding ready sale at full prices. The trade looks for the market to continue to rule firm throughout the winter season.

Light clover mixed hay firm, receipts are moderate and demand excellent, readily taking the arrivals as offered at full prices. The demand for clover mixed is much better than for timothy.

Heavy clover mixed hay scarce and in urgent request. All offerings are readily absorbed. Now is an excellent time to market your heavy clover mixed while the demand is so keen.

Pure clover hay in scant offerings and good local demand. The demand for clover continues good and anything offered finds ready sale.

Alfalfa hay continues to rule firm, offerings moderate and demand exceedingly good for all sound grades. Good No. 1 to choice leafy alfalfa is in excellent local request by the dairy trade with the milling and shipping demand taking the medium grades.

Prairie hay market steady, offerings moderate and demand fairly good.

Straw scarce and wanted.

Track sales: Timothy—No. 1, $31@33; standard, $29@30; No. 2, $27@29; No. 3, $25@26; threshed, $20@23. Light clover mixed—No. 1, $30@31; No. 2, $27@29. Heavy clover mixed—No. 1, $32@33; No. 2, $30@31. Clover hay—No. 1, $37@38; No. 2, $35@36. Alfalfa hay—Choice, $40@41; No. 1, $38@39; standard, $37@38; No. 2, $36@37. Prairie hay—Choice, $27; No. 1, $26@27; standard, $24@25; No. 2, $22@23. Straw, $10.

PHILADELPHIA.

Dec. 20.—The demand for hay is moderate but supplies, which are composed mostly of the lower grades, are increasing and prices are weak and barely steady. Choice stock is scarce. Straw is in small supply and steady under a fair demand.

Timothy hay—Choice, $34; No. 1, $33; No. 2, $30@31; No. 3, $27@28. Clover mixed hay—Light mixed, $30@31; No. 1 mixed, $27@28. Straw—No. 1 straight rye, $15.50@16; No. 2, $14@14.50; No. 1 tangled rye, $14; No. 2, $12.50@13; No. 1 wheat, $14@14.50; No. 2, $12.50@13; No. 1 oat, $14.50@15; No. 2, $12.50@13.

MEMPHIS.

Memphis, Dec. 22.—Dullness continues the feature of the hay market, although the tone of the market is very firm. Lightness of receipts continues. Scarcity of alfalfa and timothy is causing a little better demand for some of the other varieties. Some No. 1 and 2 alfalfa sold a day or so ago at $34 a ton, while $35 was asked for No. 1 today. Ten cars of No. 2 alfalfa for January delivery sold a day or so ago at $35, while cash No. 3 grade sold at $31. Sample red top and timothy sold at $24.50. For No. 1 clover mixed $35.50 was asked and for No. 1 alfalfa in transit $41.50 was asked.

MILWAUKEE.

Dec. 20.—Brisk buying prevailed throughout the week at the local hay market, business being stimulated greatly by the continued cold spell and heavy snows. Prices remain firm. Receipts are very light, being limited by the serious shortage of cars. Current quotations are: Choice timothy, $29@29.50; No. 1, $28@28.50; No. 2, $26@26.50; No. 1 clover, $25@26; light clover mixed, $25@26.50; red top and timothy mixed, $25@26.50; marsh feeding, $15@16; packing, $12@13; rye straw, $12.50@13; oat straw, $12@13.

DETROIT.

Dec. 20.—Receipts of hay and straw continue small and there is active buying of everything that comes to market. Demand for local consumption is well sustained and there is some shipping to points in the state, but nothing going to outside markets. Canada is making limited contributions to this market. They have a pretty good market of their own. Quote: No. 1 timothy, $29.50@30; standard and light mixed, $28.50@29; No. 2 timothy, $27.50@28; No. 3 timothy, $25@26; No. 1 mixed, $27.50@28; No. 1 clover, $27.50@28 per ton.

NASHVILLE.

Dec. 22.—Hay prices show no material change with moderate demand. Quotations: No. 1 timothy, $35; No. 2 timothy, $34; No. 1 clover, $36; No. 2 clover, $34; alfalfa, $40.

DES MOINES.

Dec. 20.—Demand the past week good and receipts very light. Upland prairie, $22@24; timothy, $22@26.

NEW ORLEANS, LA.

Dec. 20.—No. 1 hay offered from $35@36; No. 2 from $34@35, and No. 3 at $33. Some sales have been made recently at these figures for quick delivery.

TOLEDO.

Dec. 20.—Hay situation was unchanged this week. Prices steady, with receipts not sufficient for the demand. No. 1 timothy, $28.50; No. 2, $27; No. 1 light mixed, $28.50; No. 1 clover, $30.50 per ton, carlots, f. o. b. Toledo.

OMAHA.

Dec. 19.—Receipts of both prairie hay and alfalfa good, while the demand is quiet causing the market to be easier and prices unchanged. Oat and wheat straw steady. Upland prairie—No. 1, $25@26; No. 2, $22@24; No. 3, $16@20. Midland prairie—No. 1, $24@25; No. 2, $21@23. Lowland prairie—No. 1, $18@20; No. 2, $14@16; No. 3, $10@13. Alfalfa—Choice, $35@36; No. 1, $32@34; standard, $30@32; No. 2, $25@29; No. 3, $20@25. Straw—Oat, $12@14; wheat, $12@13.

BALTIMORE.

Dec. 20.—On good hay of all descriptions the market is firm as quoted, with only a limited proportion of No. 1 timothy, No. 1 clover mixed, and No. 1 clover in the daily receipts, and inquiry more or less constant for this class of hay. Common, low grade stuff is in ample supply and prices on all poor hay are irregular and rather uncertain.

Trading in straw is principally of a jobbing character and under these conditions it does not take a great deal of straw to go 'round. Quotations follow, per ton: Timothy—No. 1, $32.50; standard, $31@31.50; No. 2, $30.50@31; No. 3, $27.50@29.50. Light clover mixed—No. 1, $29.50@30.50; No. 2, $27@28. Clover mixed—No. 1, $28@28.50; No. 2, $25@27. Clover—No. 1, $31; No. 2, $29; sample hay, $20@25. Straw—No. 1 straight rye, $17@18; No. 1 tangled rye, $14@14.50; No. 1 wheat, $12@13; No. 1 oat, $14@15.

ST. JOSEPH.

Dec. 22—There is a good demand for all grades of hay, and dealers are shipping considerable direct from shipping points to points in the Southeast and receipts are light in the terminal market. Nominal quotations are as follows: Prairie, choice, $25@26; No. 1, $24@25; No. 2, $22.50@23.50; No. 3, $19@22; Midland, No. 1, $20@23; No. 2, $18@19; alfalfa, choice, $37@37.50; No. 1, $35.50@36; standard, $32.50@35; No. 2, $28.50@32; No. 3, $25@28; timothy, No. 1, $28@28.50; standard, $27@27.50; No. 2, $25@26; No. 3, $22@24; clover light mxd., No. 1, $28@28.50; No. 2, $24@26; clover, No. 1, $28@30; No. 2, $23@26; straw, $11@12.

PITTSBURGH, PA.

Dec. 20—Receipts of hay have been moderate with a fair demand for all arrivals. Buyers, however, are not taking more than their immediate requirements call for. There is a belief here that in view of the immense crops reported it will be only a matter of time until it is sent to market and sold. Clover and clover mixed hay are in sharp demand, with some dairymen having to turn to substitutes in order to keep going. Prices here are conservative and the market gives good promise of being very steady. Quotations are as follows: Timothy, No. 1, $32@32.50; standard, $31@31.50; No. 2, $29.50@30; No. 3, $27.50@28; light clover mixed, No. 1, $31@31.50; clover mixed, No. 1, $33@33.50; No. 2, $29.50@30.50. Total receipts for the period amounted to 1,188 tons as compared with 1,668 in the previous period.

KANSAS CITY.

Dec. 20.—Further gains in alfalfa and tame hay and a reaction in prairie marked the trade on the Kansas City hay market this week. Alfalfa rose 50c to $1.50 a ton, timothy and clover mixed gained 50c to $1, while prairie closed unchanged to $3 lower. Demand for alfalfa and tame hay continued of a broad character, sales being made to the East, South, Southwest and surrounding territory. Receipts amounted to 1,016 cars, compared with 739 last week and 624 a year ago. The principal increase in the movement was in the prairie division. High prices naturally attracted heavy shipments by the country, and there was little surprise over the downturn in prices, values in recent weeks having advanced too rapidly. Holiday dullness was not evident in alfalfa and tame hay, a rather unusual feature of the market. Straw again advanced 50c, with sales around $12.50.

Prairie—Choice, $25@26.50; No. 1, $24@25.50; No. 2, $22@22.50; No. 3, $18@21.50; packing hay, $12@18.

CINCINNATI.

Dec. 30.—Price advances to new high levels of the crop were of daily occurrence here the past week, but failed to attract receipts of sufficient volume to satisfy buyers, and stronger conditions are indicated. Scarcity of cars and severely cold weather restricted the movement, while an unusually good demand for the season of the year was developing from all sources. Timothy gained $1.50 per ton, mixed, $1.75, clover $1.50, and straw of all kinds 50c. Alfalfa was unchanged but firm. The preference shown coal shipments will probably continue to reduce the supply of cars at loading stations, but the call for empties is receiving more attention from railroads, and improved conditions are expected.

Timothy—No. 1, $33@33.50; standard, $32.50@33; No. 2, $32@32.50; No. 3, $30@32; threshed, $25@26. Light clover mixed, $32.75@33.25. Clover mixed—No. 1, $32@32.50; No. 2, $30@32. Clover—No. 1, $37@38; No. 2, $33@35; sample, grassy, $26@29. Alfalfa—No. 1 Western, $40@41; No. 1 local, $37@38; standard, $36@37; No. 2 local, $33@35. Straw—Wheat, $12@13; rye, $12.50@13.50; oat, $12@13.

CHICAGO.

Dec. 22—The following is a statement of the receipts and shipments of hay in tons in the Chicago market for the week ending Dec. 20, also the total receipts and shipments of hay from Jan. 1, 1919:

	Dec. 20, 1919.	Dec. 13, 1919.	Dec. 21, 1918.
Total receipts	5,592	6,639	5,025
Total shipments....	382	555	427
Rcpts. since Jan. 1..	235,480	229,888	308,387
Shpts. since Jan. 1..	6,675	6,292	83,968

Smaller receipts, crisp weather, and strong demand have sent prices up a point or two in practically all grades of hay here. Western prairie particularly is scarce; state grade is in better supply. Straw also is very scarce. Shippers who have the hay should put in their orders for cars and crowd the hay forward. Quote Monday as follows

Timothy—No. 1, $30@34; choice, $32@34; standard, $31@32; No. 2, $27@31; No. 3, $24@28; sample, $25@28; threshed, $18@24.

Clover—No. 1, light, $21@32; No. mixed, $30@31; clover, $28@32.

Prairie—Kan., Okla., Nebr., ch., $29@3 No. 1, $25@30; Ia. and Northwestern, $20 25; state, $16@22; packing, $12@15.

Alfalfa—$30@39.

Straw—Rye, $16@17; oat, $14.50@1 wheat, $13.50@15.

Midland prairie—No. 1, $20@23; No. 2, $17.50@19.50.

Alfalfa—Choice, $37@38; No. 1, $35.50@36.50; standard, $32.50@35; No. 2, $28.50@32; No. 3, $25@28.

Timothy—No. 1, $28@28.50; standard, $27@27.50; No. 2, $25@26.50; No. 3, $22.50@24.50.

Clover mixed—Light, $28@28.50; No. 1, $27@27.50; No. 2, $23.50@26.50.

Clover—No. 1, $27@30; No. 2, $23@26.50.

Straw, $12@12.50.

The railways of the United States are more than one-third, nearly one-half, of all the railways of the world. They carry a yearly traffic so much greater than that of any other country that there is really no basis for comparison. Indeed, the traffic of any two nations may be combined and still it does not approach the commerce of America borne upon American railways.

United States Senator Cummins.

ASK any doughboy who was "over there" and he will tell you that American railroads are the best in the world.

He saw the foreign roads — in England and France, the best in Europe — and in other Continental countries — and he knows.

The part railroads have played in the development of the United States is beyond measure.

American railroads have achieved high standards of public service by far-sighted and courageous investment of capital, and by the constant striving of managers and men for rewards for work well done.

We have the best railroads in the world — we must continue to have the best.

But they must grow.

To the $20,000,000,000 now invested in our railroads, there will have to be added in the next few years, to keep pace with the nation's business, billions more for additional tracks, stations and terminals, cars and engines, electric power houses and trains, automatic signals, safety devices, the elimination of grade crossings — and for reconstruction and engineering economies that will reduce the cost of transportation.

To attract to the railroads in the future the investment funds of many thrifty citizens, the directing genius of the most capable builders and managers, and the skill and loyalty of the best workmen — in competition with other industries bidding for capital, managers and men — the railroad industry must hold out fair rewards to capital, to managers and to the men.

American railroads will continue to set world standards and adequately serve the Nation's needs if they continue to be built and operated on the American principle of rewards for work well done.

This advertisement is published by the Association of Railway Executives

Those desiring information concerning the railroad situation may obtain literature by writing to The Association of Railway Executives, 61 Broadway, New York.

Provisions, Etc.

CHICAGO PROVISION REVIEW.

CHICAGO, Dec. 22.—Provision prices moved within a good range last week, although the volume of business was not heavy. Lard was the most actively traded in, and while finishing at intermediate prices after a range of $1.45 for January, closed with a gain of 85c. December, despite the selling by packers and the delivery of about 1,000,000 lbs., closed 72½c better than a week ago, while May lard gained $1.22½ and closed 22½ below the top point of the week. The finish on short ribs showed gains of 67½c on January and 65c on May. Pork was bid up by shorts who found offerings limited and closed with January up $1.47½ and May $2.20, as compared with a week ago.

The passage of the Edge bill providing for international financing and the extension of credits by banking corporations to assist the foreign countries who are in a bad way financially had a stimulating effect on trading for the time. It brought in more active speculative buying and covering by shorts, but so far as actual new export business was concerned, there was little of it.

Foreign exchange rates were materially higher, but even this did not bring any new business of consequence. The advance in corn and hogs helped to strengthen values at times by making shorts nervous and reducing selling pressure, which assisted in lifting values.

Packers were fair sellers of January and December lard and commission houses who were sellers in the previous week were buyers of January and May lard and ribs. Shipments of lard and ribs for the week were larger and of lard exceeded last year's, but of meats showed a decrease of over 3,000,000 lbs., and stocks showed a small decrease. Weakness in corn toward the last, combined with the light domestic trade in fresh meats and a break of 1½c to 2c a pound in pork loins had a depressing influence. The provision trade on the whole is largely a packers' affair. There is said to be little profit now in cutting hogs for regular product. Make of lard is large, as hogs are running heavier in weight and a few more short ribs are being made. Green hams are 1c a pound higher and leaf lard is doing a little better, with prices at the close $21.75

Production of all fats and oils for the three months ended Sept. 30, as compiled by the census bureau, was 305,277,967 lbs., fish oils 2,814,468 lbs.; animal fats, 272,640,585 lbs., and greases, 60,999,418 lbs., a total of 641,732,438 lbs. Cottonseed oil, 90,383,834 lbs.; tallow, 71,556,232 lbs., and cocoanut oil, 58,402,600 lbs. Consumption of all fats has been heavy, yet stocks are ample particularly of vegetable oils and greases.

Range of prices in November and previous and for the week follow:

Kansas City Provision Review.

KANSAS CITY, Dec. 20.—A firm tone was evident in the market for provision products in Kansas City this week. Gains in prices for both fresh and smoked meats ranged from ¼c to 1c. Demand for fresh pork was moderate, with the East displaying more interest in the market. Colder weather in the northern and eastern section of the country was a factor in the demand. Local demand was good. Dullness usually evident during the holiday period failed to develop during the week. Smoked meats moved in liberal volume to the South, with prices generally around ¾c higher than a week ago. Approach of the holiday apparently is stimulating interest in fancy hams and bacon, provision interests here reporting a broad inquiry and a liberal volume of shipments. Both hams and bacon rose about 1c. and in some instances values were quoted up 1½c. Lard was in fair demand and substitutes also were taken.

Passage of the Edge bill by the senate was favorably commented upon in provision market circles, and hope was expressed for a large foreign business within the next few months.

Summary of Live Stock Markets.

Hog prices were relatively higher than Chicago in all the outside markets a good part of the week, although there was an evening up latterly. Highest prices for the week, as compiled by the *Daily Drovers Journal*, follow:

	Mon.	Tues.	Wed.	Thur.	Fri.	Sat.
Chi.	$14.00	$14.15	$14.45	$14.15	$14.15	$14.20
K. City	14.25	14.00	13.85	14.00	14.00	14.00
Omaha	13.65	13.45	13.65	13.65	13.80	13.70
St.Louis	13.95	14.30	14.35	14.35	14.15	14.25
St. Joe.	14.00	13.35	13.85	14.00	14.10	14.10
Sx. City	13.75	13.75	13.85	13.65	13.70	13.75

Live Stock Markets

CHICAGO LIVE STOCK.

CHICAGO, Dec. 22.—Hog supplies, although lighter than expected, were ample for all requirements, and the spread in prices was narrow, the bulk of sales on Saturday being between $13.90 and $14.10. The range on packing and select shipping grade for the week was $12.60 to $14.15, with mixed packing and medium butchers, 195 to 255 lb. hogs at $12.60 to $14.45. The latter was the highest for the week, while the range of the same week last year was $17 to $17.65. Top prices on Saturday were $14.20, with the average that day $14.01, the top standing 75c higher than a week ago. The week's average was $13.90, or $1.10 above the previous week's low price and the lowest since February, 1917, and $3.60 lower than a year ago.

The average weight of 227 lbs., compared with 224 lbs. the previous week, and 224 lbs. last year and was the heaviest in six weeks, showing that the farmers are feeding more extensively, despite the fact that hogs are lower than corn, which is the reverse of a year ago when prices were held up by Government agreement. Cold weather has also necessitated extensive feeding.

Receipts for the week of 234,685 hogs, as compared with 228,928 the previous week, and 251,591 last year. The eleven markets had 796,000, against 766,000 the previous week, and 1,075,000 last year, while the twenty markets had 890,800, against 848,600 the previous week, and 1,239,000 last year. Shippers and small packers were liberal buyers most of the week, the big packers being out of the market part of the time and not disposed to take advantage of the low prices at times to load up heavily. Pork loins were off 50c to $1 and the export situation, despite the passage of the Edge bill, is not conducive to great activity on the part of the big packers.

Cattle men had the worst week of the year, with prices off $1.50 to $2 per 100 lbs., with a good part of the steers offered selling around $11.50 to $14.50, $12 to $14.50 taking the bulk of the 1,000 to 1,300 lb. animals. The top price of the week was $19.50, paid on Tuesday, and the range on steers was $8.75 to $19.50, compared with $7.75 to $21.50 the previous week, and $9.25 to $19.50 the same week last year.

The average price of beef steers was $13.50, compared with $14.65 the previous week, and $14.70 last year. The extreme loss from the high time of the previous week was $3, an excess of trade requirements, packers being well stocked with Christmas beef and other grades combined with the competition in poultry, which is always present at this time of the year and a drop in hide values equivalent to $1.50 per 100 lbs., the decline in hides being around 15c were the depressing factors in cattle values. High prices for hides have been a sustaining factor in the cattle market for some time, but the sudden decline has materially changed the situation and the outlook is not particularly encouraging.

There were not many finished steers on the market and the crop has evidently been closely marketed. The Kansas state report indicates that there are 25 per cent fewer cattle on feed in that state than last year and supplies of hogs are smallest since 1882, the live stock industry of the state being in the dumps, owing to high cost of feed and short crops, as money has been lost. With cattle and hog prices declining and corn prices advancing, the cattle feeders are up against it. Hence they are not particularly anxious buyers of stockers and feeders, which were off 50c to $1 for the week, with good steers selling up to $11 and an average of $9.15 for the week, or 10c lower than the previous week.

Western range steers were in lighter supply, the run being 9,700, against 11,-

0 the previous week, and 8,000 last ar. Prices were off $1, with the nge $7 to $14.25.

Butchers' stock dropped $2 in ten ys and canners and cutters' 75c for e week. The break in cows and ifers was 75c to $1 for the general n, with the extreme loss of $2 from e high point of the previous week. e bulk of the break was in the first ee days of the week, with the close .25 to $12 for choice to prime cows d $11.25 to $11.50 for heifers. Bulls re an exception to the cattle market nerally, prices holding comparatively ady, with the average $7.90, or 30c ter than the previous week. Calves pped $1.50, with $15.50 to $16 the at the close, an average of $16.20 the week. Despite the demoraliza- n in cattle values, receipts for the ek were only 89,959, against 89,325 previous week, and 96,628 last year. e seven markets had 235,000, against ,000 last year.

Heavy receipts forced lower prices sheep and lambs early, with the price on lambs $17.25, but the mar- firmed up later, and the average s $16.40, against $16.05 the previous ek and $14.15 last year. The range lambs was $16 to $17.25 and on ep $9 to $11, with the average $9.25, inst $9 the previous week and $9.40 t year. The seven markets had 272,- , against 203,000 last year.

Estimated receipts at Chicago this ek: Cattle, 60,000; hogs, 165,000; ep, 70,000. Receipts last year were: tle, 37,425; hogs, 116,071; sheep, 49.

South Omaha Live Stock Market.

Bruce McCullough, Correspondent.

outh Omaha, Dec. 20.—The run of cattle week was fair for the time of the r, about 35,000 head, the arrivals being ded about half and half natives and tern rangers. In the main conditions rounding the trade were bearish owing ough weather, uncertain railroad trans- tation and the precarious fuel supply. ly in the week declines were sharp and re and the market for beef steers ng off anywhere from 50c to $1.50. Dur- the latter part of the week part of this ine was recovered but closing quota- s were all of 50@75c lower than for week previous.

est beeves here this week brought $15 good to choice 1,100 to 1,300-pound rs sold at $12@14, fair to good kinds ging $10@12 and warmed up stuff sell- as low as $8.50. The market for cows heifers followed the course of the fat le and prices were very erratic from t to finish. The range right now is tically from $5@12 for poor to prime stock, the fair to good butchers and grades going very largely at $7.50@ Veal calves at $8.25@14.25, and bulls, s, etc., at $6@11 held practically steady ughout.

siness in stockers and feeders was onably light with no great change in es one way or the other. Choice ne weighty feeders are quoted at $11@ while common light stuff is a drug on market and the lowest of the season at)@7.50.

othing new or startling developed dur- the week in the hog market, and while uations continued wide from day to the close is somewhat higher than as a week ago. Shipping outlet is still er limited and big bulk of the offer- sell to the packers who have been er bearish in their views the greater of the time. Saturday's receipts were y, 13,000 head, and the market steady shade lower. Tops brought $13.70, as nst $13.65 a week ago and bulk of the ing was $13.40@13.60, as against $13.25 .60 at the close of last week.

ne run of sheep and lambs was fairly al for the end of the year, about 62,000 d, and there was a good general de- d from both packers and country buy- at prices not so very much different n the week previous, anywhere from steady to about 25c lower. Fat s are quoted at $15@16, yearlings at 0@14, and ewes at $8@9.

Oklahoma Live Stock Market.

Thusnelda Haehnke, Correspondent.

Oklahoma City, Dec. 20. — Cattle are ed very badly at this market. The pts we have been having cannot be- to compare with those of last year. day we had some Angus long yearlings h were without competition, furnish- the day's beef top at $15.50. Tuesday e were some erratic deals, anywhere steady to 25c lower. Steers seemed ffer more of a loss than other kinds, here was hardly enough beef to pack- o thoroughly test even this line. Some -feds sold Tuesday at $12 and the et for the first two days was called ower. The market Friday really was eciated by everybody, even the pack- ers. Receipts were light, but more activity was shown than usual. A few loads of fair killers, some warmed on grain, at $9.50@9.75, constituted the beef buy, while the butcher crop was mostly plain or common grades.

The market on she stuff has been draggy and the market the first two days of the week was 50 cents lower. A few packages of fleshy cows of shipper type around $8 with the bulk of fair to medium killers went at from $6.25@7.25 the latter part of the week. Calves unchanged and market has been steady for the week. Bulls are also steady. Stockers are from 25c to 50c lower for the week, $5.50@6.25 taking most of the smooth butcher kind.

Generous hog runs in the North find fairly strong demand, but there are too few here to test the trade. Locally the deal was steady and $13.75 was the highest basis. Compared with last Friday, hogs are easily 25c higher.

St. Louis National Stock Yards.

H. L. Wyatt, Correspondent.

National Stock Yards, Dec. 20.—A moderate supply of cattle this week proved too much for the market. There was a fair supply of good beef cattle and these sold fairly actively during the early part of the week. The common light stuff found slow sale and little demand during the entire period. The market for the week is $1 to $1.50 lower than the close of the previous week. In spots on the very common kinds the decline is in the neighborhood of $2. The feature of the week's trade was the Christmas cattle which sold at the highest prices in the history of the market. In the yearling class a load of 1,050 pound steers brought $20.75 and a load of mixed yearling steers and heifers averaging 650 brought $20. A number of single head sales ranged from 20c to 35c a pound, the latter figure also establishing a new record on our market.

The hog run was very generous this week and the quality the best we have seen in many months. Prices were somewhat uneven but the general trend was to a higher basis and we close the week in the neighborhood of 70c higher than the close of last week. The quotations are: Mixed and butchers, $13.85@14.25; good heavys, $14.10@14.25; rough, $11.50@12.75; light, $13.85@14.10; pigs, $13@13.75; bulk, $13.85@14.20.

The sheep and lamb market continues strong and active. Choice lambs have reached $16.75, which is the highest top in this department that we have had for months. The demand in the sheep house is for the good kinds and on these the trade has been extremely active. The medium and common grades find much slower sale.

Denver Cattle Market.

Denver, Colo., Dec. 19.—Choice killing grades, both steers and cows, advanced this week, 25c to 75c in extreme cases for stuff desirable enough to fill Xmas orders and nearly all grades show a good healthy advance, but the better kinds are as they have been all season, in best demand on account of high priced hay. Common and medium kinds had to move with decent outlet from packers. We should have a good market for desirable kinds all season. Range of prices this week about as follows: Killers, $7.25@9; stockers, $6.75@9; feeders, $9@10.

Canadian Livestock Market.

Winnipeg, Dec. 20.—Receipts of both cattle and hogs showed a decided decrease compared with previous week and a loss of $1@1.25 on the week's trading in cattle was recorded. However, hog prices advanced 50c during the week, closing on Saturday with selects quotable at $16. There was a good demand for hogs but as very little choice stuff was noticeable in the cattle pens and the demand for this class negligible, trading was not brisk. At the close of the week fair to good quality steers were quotable $8.50@9.50; mediums, $7@8; and common, $5@6.50; choice butcher heifers, $9@10.

Kansas City Live Stock Market.

Sanders Sosland, Correspondent.

Kansas City, Dec. 20.—Hogs made a more favorable showing than expected in the trade in live stock in Kansas City this week, while cattle displayed extreme weakness and sheep advanced. Receipts showed small changes, with hogs continuing to run sharply behind the total of a year ago.

An interesting development of the week was the report issued by Secretary Mohler of the Kansas state board of agriculture showing only 76 per cent of the usual number of cattle on feed in the Sunflower state. The same report showed a decrease of 25 per cent in the supply of hogs in Kansas as compared with last March. This means reduced supplies here from the principal source of local receipts, but the decrease is expected to be offset in part by arrivals from other areas with more liberal supplies.

Packers again displayed a bearish attitude toward hogs, but speculative and shipping demand helped trade. Local prices lost their premium as compared with Chicago, sales finally showing a margin below that market of as much as 50 cents. The market today was about 25 cents higher than a week ago, with the top price $14. Stock hogs sold largely between $12 and $13, with trading inactive.

The decline in cattle, which amounted to 50 cents to $1 on the offerings of steers, was described as usual immediately before Christmas. The top sale, $19.50, was the highest of the year for a full load. Many range cattle were again received, and there was a sprinkling of cake-feds from Oklahoma. Short-feds suffered the sharpest loss, and sold largely at $11 to $13. Butcher cattle were about 25 cents lower. Veal calves were strong, selling up to $17 and closing with a top of $16.50. Stockers and feeders did not follow the weakness in fed cattle early but finally receded about 50 cents. Stock cows and heifers, which have been low, held about steady.

In the sheep market a new high price for the season and the top since last September was paid on Kansas-fed lambs, $16.80. The market did not hold its full rise, closing 25 to 50 cents higher with a top of $16.25. Sheep sold up to $10.25 for fat ewes. Wethers were quoted up to $12. The trade displayed a good tone, and many forecasts of an even higher market were heard. Strength in wool was a strengthening influence.

WINTER HOG PRICES.

We are approaching the period in the winter hog packing season when the East will be a dominating factor in the making of prices. We have called attention several times recently to the fact that after Jan. 1 Ohio and Indiana would be practically marketed up on their winter crop of hogs. This would bring Eastern buyers to the Western markets, and if the consumption of hog products continues normal, it will be hard to break the hog market. A great many are anticipating a very heavy run of hogs in January. This is logical, for the country has not, up to the present time, really loosened up. Railroads are not furnishing cars up to the demand of the shippers and hogs are gaining weight very rapidly and should there be any shortage in the number of hogs this year competent stockmen say the deficiency in numbers would be made up by extra weight. Should it turn out that January hog receipts are as heavy as is anticipated, the month of January might be the low period for hog prices in this winter's packing season. We have felt all the time that hogs would sell lower during this winter's packing season than they have sold so far, but our prediction is threatened with absorption into the realm of uncertainty. —*W. G. Press & Co., Chicago.*

HOG OUTLOOK GOOD.

Summing up the features of the hog situation, Clay, Robinson & Co. say: "Prospects are favorable for a good acting hog market in the near future. Of course, we are going to have very heavy runs the latter part of January and through February, but until these big runs materialize we think the trade will give a good account of itself. There are bound to be breaks in the trade on days of relatively large receipts, but for the near future we look for these declines to be offset by advances registered on days of curtailed receipts."

Spot Meat Situation.

Armour & Co. in their weekly review of trade say: "Severe weather conditions, together with railroad congestion, curtailed hog receipts last week, and prices were sharply higher. The market for cured products remained unchanged. Trade was very good for this time of the year. Fresh pork cut prices were steady, with a very fair demand considering holiday conditions. The beef trade was good and the indications were for a broad demand during the holidays. The tendency of this week's cattle market was lower."

Some Grain Cars Are Plugged.

"Heavy loading of grain, due to shortage of cars, offers a temptation to the unscrupulous shipper to plug his load by placing inferior grain on the bottom of the load to escape detection," says the representatives of the Bureau of Markets. "While this practice is by no means common, inspectors have been warned to be careful to get representative samples and to be especially particular when sampling heavily loaded cars."

Movement of Hogs.

Weekly receipts and shipments of hogs at western centers the week of Dec. 20, and totals with comparisons for corresponding time last year compiled by THE PRICE CURRENT-GRAIN REPORTER:

ANTED and FOR SALE
AIN DEALERS' MARKET PLACE
For Buyers and Sellers of Elevators, Equipment, Grain, Seeds, Hay, Feed, Flour, Millfeed, Beans, Produce, etc
25c Per Printed Line

SITUATION WANTED.

HERE IS AVAILABLE a man with s of grain experience now managing elevator, but desiring broader opportunities and increased salary. Wishes ection as salesman of feeds or solicfor grain firm. Address: GBH, Box Price Current-Grain Reporter, Chi, Ills.

EN FEB. 1st, a man with experience ain business in Oklahoma and Texas, desires broader opportunity. Underd several branches of such work and s an early connection with some readf this advertisement. Address **FV,** 27, care Price Current-Grain Reer, Chicago, Ill.

OUNG MAN, 21 years of age, good ation, would like position at country on. **E. B. COUGHLIN,** 2058 Walnut Chicago, Ill.

ENGINES FOR SALE.

OR SALE—Oil Engines. Slightly used.
H. P. Fairbanks Morse.
H. P. Fairbanks Morse.
H. P. Fairbanks Morse.
H. P. Otto.
H. P. Fairbanks Morse.
H. P. Fairbanks Morse.
all small sizes.
ese engines are in first-class condition operate on a low grade oil. Write prices today. **A. H. McDONALD,** 543 Monroe St., Chicago, Ill.

MILLS WANTED.

YOU are interested in building a 500 el flour mill in one of the best cities he south, write **MODERN CITY,** Box Price Current-Grain Reporter, 327 S. Salle St., Chicago, Ill.

MACHINES FOR SALE.

OR SALE—One Pneumatic Dust Color, 4x5; Barnard & Leas Mfg. Co. e; used for barely one year. Practicalew and in exceptionally good condition. ress **CALDWELL MILLING CO.,** Caldw, Kans.

OR SALE CHEAP—One No. 15 Perfec- Dust Collector, without tubes. Ma- e new, has never been out of crate. **YFLOWER MILLS,** Fort Wayne, Ind.

EAR CORN WANTED.

NAPPED EAR CORN—Wanted to buy. t be sound and dry. **LYLE & LYLE,** tsville, Ala.

ELEVATOR BROKER.

LEVATOR BUYERS save time and ey by writing me what you want. I it or will get it. **N. P. CLAYBAUGH,** ator broker, Frankfort, Ind.

OFFICE SUPPLIES.

OR SALE—9 column Burroughs adding hine, $100.00, good condition; Underid typewriters, $50.00, with back-spacer, ulator, two-color ribbon; perfect workn order. Will accept Liberty Bonds. Will either machine on trial. **MEIER D CO.,** Russell, Kans.

GRAIN WANTED.

RAIN AND SCREENINGS WANTED—grade wheat, barley, corn or oats. at screenings, corn screenings, corn n, oat screenings, oat clippings, barley enings, barley chaff or elevator screenn of any kind wanted. Please send ples. **BEREND J. BURNS,** 324 Cham- of Commerce, Buffalo, N. Y

HAY FOR SALE.

OTICE to stockmen and feeders—I have baled, ready for shipment. South Da- hard land hay, best for feeding. **J. L. MAHON HAY CO.,** Crookston. Neb.

PECANS FOR SALE.

CE AVERAGE RUN OKLAHOMA PEANS. Very best being marketed now. filled and best flavor. Price 20c per d f. o. b. Ardmore, Okla. Shipped by ess or LCL freight. No orders under s. Satisfaction or return our expense ways. Money with order. Reference, mercantile agency or any bank in Ardre. Get your winter supply. No other quite so good. 18c in 100-lb. lots. Ads **ARDMORE FLOUR & FEED CO.,** more, Okla.

HAY FOR SALE.

AY FOR SALE — Large amount of Grass Hay for sale. Address **SIMON STADT, Los Lunas, New Mexico.**

DIRECT HEAT OR STEAM — CONTINUOUS FLOW — MADE IN ALL SIZES

CONSTRUCTION HINTS

A COLUMN for our friends to pass to others the benefits of their experience—Interesting mechanical installations—Power problems—The important things and the little kinks that make for the best operating efficiency of elevators, mills, feed plants, etc. Contributions and criticism invited.

ON SCALE INSTALLATION.

Some Special Reflections on the Installation and Use of Automatic Scales

It should not be necessary at this late date to emphasize the imperative necessity of weighing all grain passing from the elevator to the railroad car for shipment. The high price of grain and the poor condition of a large percentage of the cars tendered for loading, factors known to everyone in the grain trade, would seem to be sufficient to convince anyone in the grain shipping business that the very first essential is to have an accurate and reliable weight of the grain shipped. Without this record the difficulty of obtaining payment for claims is greatly increased if the probability of getting claims paid is not wiped out entirely. In spite of this many elevators continue to do business without taking the necessary steps to install a scale that will provide an accurate record of grain shipped.

There are only two types of scales available for this purpose at the present time which are practical for installation and use in the average country elevator, viz., hopper scales or automatic scales. The purpose of this article is to deal briefly with the automatic.

SEVERAL MAKES OF AUTOMATIC SCALES.

There are several different makes of automatic scales for grain shipping being offered for sale at this time, each of which has its own particular advantages and disadvantages. In considering the various makes, the difference in price between the cheapest and most expensive is so little that the matter of price should be about the last thing considered.

The first thing to consider is reliability; that is, the purchase of a scale that will continue to function with satisfactory accuracy under all the varying conditions likely to occur in the elevator, and that will satisfactorily handle the various kinds of grain from light oats to high grade wheat. One of the important points to look to in this respect is the absence of complicated and delicate parts. Simplicity and strength usually go hand in hand with reliability.

The matter of accuracy should have second consideration, and this should be viewed in relation to the commodity weighed; that is, grain. The scale purchased should be well within the tolerance allowed by the established rules and regulations of the grain trade. Super-accuracy is neither essential nor desirable, as the extreme sensitiveness required to give super-accuracy means delicate parts and fine adjustment that cannot easily be maintained in proper condition in a country elevator. These two features having been considered and decided upon, consideration should be given to ease and facility of operation, that is, a scale that will perform its work satisfactorily with the least need for skilled attention on the part of the operator.

Care should also be taken to purchase from a firm that you can rely upon to provide promptly at need, efficient expert service to remedy defects or difficulties that may arise.

Standardization of parts is another important feature; that is, to select a scale whose parts are made standard and itnerchangeable by the use of jigs and templets. This feature enables you to order spare parts or repairs with the minimum of trouble and insures their accurately fitting when received.

After considering all the above features, and having selected the scale that seems most desirable, prices can be compared; but the buyer should not lose sight of the fact that a few dollars saved in the matter of price may soon be lost by the purchase of an inferior machine. In other words, and we would emphasize this, buy on quality and not on price.

The automatic has many advantages over the hopper scale. In the first place, a reliable automatic scale can be installed just as well in the cupola as on the work floor. Some automatic scales do not need to have an independent foundation as they will work accurately without being maintained strictly level. They can be installed in much less space than hopper scales, and consequently save construction cost. They do not require anything like the same amount of care and attention that the hopper scale does, and by using scales with ticket printing device, the risk of human error is reduced to the minimum.

At least one scale now being offered is claimed by its makers to be self-adjusting; that is, that the troublesome compensator does not have to be set on every carload or oftener by the operator.

The writer has in mind two plans for country elevators. One is typical Kansas elevator of studded construction with the automatic scale installed in the cupola. The advantages of the cupola installation are that the grain can be discharged directly from the scale to the car, so that there is a minimum chance for grain to go astray between the scale and the car, a very important feature to be noted in the verifying of claims.

In elevators provided with a man-lift, this is undoubtedly the best location for the automatic scale, as the operator can give the scale the proper amount of attention and inspection required without undue trouble or loss of time. Where there is no man-lift, it is usually desirable to install the scale on the working floor, as in a certain Northwestern elevator, where the scale is so placed that grain can be drawn from several bins. After passing through the scale it is discharged to the boot of the elevator and elevated to the loading spout. In an installation of this kind, the scale is always under observation and is readily accessible, so that it can easily be kept clean and in proper working order. There is a somewhat greater possibility, however, of grain going astray between the scale and the car, so that extra care should be taken to see that all spouting is in good order, and that turn head is accurately set when loading cars.

Another point to be watched in making installation is to see that the scale is as free from vibration as possible. Cleaners and other machinery located near the scale, if the scale is not placed on a solid foundation, very seriously disturb the accuracy of its work.

If the above suggestions are followed out, and care taken in the selection of the scale, so that only a first-class machine is bought, satisfactory service can be depended upon providing the operator in charge of the scale keeps it reasonably clean and exercises ordinary care in its use and maintenance.

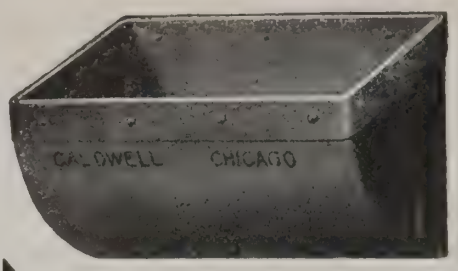
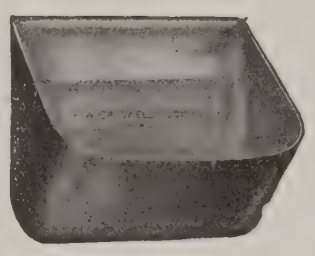
"See How Simply It's Built"



The elimination of complicated parts makes for ease of operation. Ball bearing construction throughout decreases power consumption. These two factors spell ECONOMY in big letters.

Furthermore, this simple mill is supreme in the ultimate test of efficiency.

It is built with a daily capacity of from 25 to 50 barrels, and we will allow any responsible party a reasonable time to try the mill, and if it is not perfectly satisfactory you may return it and all money paid us will be gladly refunded. Here is your opportunity, knocking at the door.



Why not get into business for yourself? Here's a chance for a struggling head or second miller to own a business of his own. Our terms are liberal to responsible parties. For further information write

Wagon Loads Received

A book for the use of country grain buyers in keeping a record of grain received from farmers.

Its column headings are: Month, Day, Name, Kind, Gross and Tare, Net Pounds, Bushels, Pounds, Price, Dollars, Cents and Remarks.

The book, 9x12 inches, 160 pages, 20 lines to each page, giving room for recording 3,200 loads, is printed on Linen Ledger Paper and is well bound in strong board covers with leather back and corners. Order form 80. Price $1.50.

Price Current-Grain Reporter

327 So. La Salle Street **Chicago, Illinois**

GRAIN SCALE BOOK

Form 223 is an indexed receiving book designed to meet the requirements of the grain dealer who wants something a little better than the ordinary. Separate pages are given to each farmer, and all are indexed so that their accounts may be instantly located. If so desired, it can be used as a grain journal, the two L. F. columns allowing a posting of both debits and credits and entering the numbers of the ledger pages. The book contains 240 numbered pages of high grade heavy linen ledger paper, each page ruled for 41 wagon loads, and a 28 page alphabetical index in front. Size 10¼x15¾. This book is bound in heavy red leather back and corners with black cloth sides and its name, "Grain Scale Book," is stamped in gold leaf on the front cover. Order Form 223. Price $2.75. Book weighs 4½ pounds.

BUSINESS AND TRADE CONDITIONS

THE year which closes today has been one of many surprises, great expectations and great disappointments. Events have been disconcert-ıg. The unexpected has overshadowed all anticipa-ons actually realized. After the initial hesitancy, ıtural enough after the cataclysmal destruction of ıe war, industry and distribution in this country en-·red upon a period of apparent prosperity probably ever before equaled, which has not yet run its ›urse. The conception, that unparalleled prices for ›mmodities with correspondingly high wages have ›elled equivalent increase of national wealth, has ›t yet been visualized by most people as fiction ıther than fact, while the "balance of trade," in ›lume never before even approximated by the inter-ıational trade of the United States,—which at this .oment represents very little that can be called con-ımable, much less productive,—wealth, since our llied debtors are not paying even the interest on our ‹port investments with them,—has created the pop-lar impression at home of a permanent creation of ealth that will hardly be tangible to the generation ow living, but who nevertheless are recklessly ›ending the paper proceeds. The situation is simi-ır to that of an individual who loans to another ho is in serious financial difficulty, with the odds ‹voring his bankruptcy, and taking a debenture as ridence of indebtedness, which may or may not be quidated at par at maturity, but which cannot be ealized upon in any event until maturity.

It is no secret that the financial outlook in Europe erges on the desperate, colored only by infrequent ays of hopefulness. The relations of politics and ıdustrial activity are very intimate. However dis-ırbed the political situation may be, the subsistence ıdustries always go on; but those which make for ıe accumulation of fixed capital-savings, the produc-ve capital which alone represents creature comforts nd the prompt payment of taxes and debts, go on ctively only when political conditions are stable nd government is as automatic as breathing and ithout friction.

But nowhere is this the case. Everywhere political ›nditions are disturbed. Even in our own country, ue to irritating meddling with the people's private ctivities by a paternal Administration and the dis-›ntent created alike by highbrow and lowbrow agi-ıtors, they are more disturbing than at any time nce the presidential contest of 1876-77; while in the reater part of Europe as the year closes humani-y's attention is distracted by the almost hopeless olitical situation and at the same time absorbed in ıe immediate problem of subsistence. The great scal and social problems which concern civilized overnments are there crowded to the background ırough the impotency of fiscal ministers to function, situation which has been greatly aggravated by the esults of party politics in the American Senate post-oning indefinitely the ratification of peace, and by ıe break-up of the Near East into more than fifty ew nations, all clamoring for food and rest, rai-ıent and shelter and productive capital. All of these eoples have been and still are looking to America ›r help; and the "balance of trade" shown by the alancing by the Department of Commerce of export nd import values represents in dollars what has een America's loaned contributions to European re-ef and reconstruction—$3,713,913,489 in the first leven months of 1919, or approximately 4,300 mil-ions since December 1, 1918, of which 866 millions represent breadstuffs in 1919 and 957 millions the cotton shipments.

How long is this taking of the wealth of the American Peter to feed and sustain the European Paul likely to continue? Who shall say? The Edge bill, now law, is an enabling act to provide the machinery for enlarging private financing of exports; and there has been revived the project which Secretary Glass and most bankers disapprove to extend more Treasury credits to continue the enormous volume of exports. Debtors must, however, be solvent if loans are to be considered in another light than as gifts. There is the asset of Europe, if it can be utilized, of peoples naturally thrifty; and with political quiet and industry under scientific direction, with the assistance of modern science and labor-saving machinery, working at capacity under rational regulations as to hours and factory and housing conditions, the recovery which cost Europe two to three generations after Napoleon might in this century be realized perhaps in one; but labor, upon whom falls the first duty of contributing to production in association with capital, skilled management and machinery, is openly hostile to all but its own notions. Moreover, politicians the world over are ignorant to a degree of economic laws and economic forces or insensible to them, and therefore are the most immovable of all the obstructions to a renewal of that greater production and to the free exchanges of the world's products by trade, which alone can contribute to the popular success of any American financing of Europe on a strictly business basis involving immediate returns on the investment.

Any different view must be predicated on a speedy return to reasonableness of expectancy on the part of labor and political leaders. Of this there is as yet little sign outside of Belgium and England to a less degree. Socialism and popular discontent are not new. They have their origin in the hard fact that the natural lot of man on this earth is poverty and misery, and to these each one is doomed except in so far as man himself by himself evades his doom. Nature holds everything man needs, but she gives nothing except in response to labor and work. Both are hard; and the politician of today has to an alarming degree convinced the militant section of labor that notwithstanding probably more than 90% of man's production of everything good is immediately consumed by the producers and not saved, continuous labor and saving is mere "slavery to capitalism." Americans are disposed to think this state of mind now characterizes Russia alone and potentially threatens Central Europe only. Who thinks so dwells in a fool's paradise. This country is now experiencing in the concrete some measure of the agitation which has been familiar in the universities for twenty-five years and in East Side and West Side Sunday afternoon beer hall discussions for forty. It takes a long time, as Lowell has reminded us, for mere talk to take concrete form: Garrisonian abolitionism as the Civil War and the Emancipation Proclamation: Washingtonian Society temperance as a prohibition amendment to the Federal Constitution. Talk itself is mere sound, but eventually the concrete emerges. The latter's character depends on the leadership when the concrete takes form. In Russia anarchy had been taught for half a century and Bolshevism emerged. The spectre in America is not the sublimated democracy of the intellectuals, but the democracy of instigation, an evil thing in any aspect, conceived in Russia and born and nurtured in Germany. It is not the democracy Lowell had in mind when he said at Birmingham in 1884, "The trade unions are now debating instead of conspiring, and we all read their discussions with comfort and hope, sure that they are learning the business of citizenship and the difficulties of practical legislation." Do the succeeding years of discussion justify this "comfort and hope"? The innocuous discussions of 1884 are no longer heard, thanks alike to radicals in the unions and in the universities, with their variants of German university and beer hall political and economic philosophies which have to a degree at least brought this country to a status where a Chicago radical professor can with no restraint say to Ray Stannard Baker, "We are past the stage in which capital and labor can sit down and discuss their grievances. . . . Both sides are now struggling for the control of industry; and there can be no compromise on that issue."

That is indeed the issue which the old year passes on as its legacy to the new. It is more than an urban industrial problem. It is in part agrarian also. The West has become somewhat acquainted with the Nonpartisan League and its experiments in North Dakota with an industrialized social democracy by constitutional amendment, a single tax which absorbs the rental value of land which is reverting to public ownership, and a public school and newspaper system and circulating libraries stocked with radical literature teaching a philosophy of social revolution; but the public is not quite familiar with the fact that in 1920 this movement will transfer its energies to Minnesota and Michigan, the farmers taking the initiative.

In short, the New Year—a "campaign year"—will fall heir to the conflict between radicalism and conservatism for the preservation of western civilization —between true progress and retrogression. There is no good in denying it. "The only argument available with an east wind is to put on your overcoat."

NATIONALIZING THE FARMS

THE Illinois Committee on Public Utility Information recently made a poll of editors of the state on the question of the "Nationalization of Farms," as proposed by the radical element who are opposed to all private "ownership of money-making industry." The Committee found that of 616 editors polled only 546 would record a vote; 537 voted "no"; six voted "yes," and three straddled. Yet on Nov. 4 the state as a whole, including the rural counties, voted "yes"' on all the socialist propositions put forward by that absentee boss and perennial political nuisance, Hearst, including "public ownership" of numerous "money making industries" scarcely less important to the welfare of the people than the farms themselves.

It is unfortunate that a very large majority of the interior editors of the state no longer have opinions on political or social or economic topics which they are willing to hazard in print if likely to excite local controversy or antagonism. Most of the farm journals in this state and out of it will oppose with intense activity and indignation the proposal to nationalize the farms; but nearly all of them support vigorously the proposition that the farmers shall, like the laborers, be set in a class apart, to enjoy special privileges, like the specious "collective bargaining scheme" to organize restraints of trade, and special immunities, such as freedom to conspire as to prices, conditions of marketing, etc., denied by law to other sellers of their own products. And they have not hesitated to support

proposals to strip the packers of their right to do business except under "license."

Where is the difference in principle between ownership of a utility or the control of a great food factory and that of a farm, since both are indispensable to the continued existence of mankind? Suppose, for the sake of illustration, that a "Government Inspector of Farms" from Washington should drive up to the farm some morning and issue these instructions to the owner: "You've got a mighty good farm here, but you've got to run it from now on along different lines. A vote has been taken, and it was decided that on and after New Year's you shall only raise corn. We will issue you a license and you must agree in advance to obey all the 'rules and regulations' the Chief Farm Inspector and his clerks in Washington shall decide to put on the books without consulting you or the law-makers. If you violate those regulations you'll lose your farm."

But, you say, such regulations of the farming business is impossible because it is so far fetched and impractical. May be. But there are bills in Congress at this moment to do just that thing with other lines of business which convert the raw and inedible products of the farm into consumable food products. Why should the farmer be exempted? Is that decent law making?

WHAT EXPORTS SUGGEST

THE decline in the value and quantity of meats exported in November in part accounts for the decline in the demand for live stock, hogs in particular, and should be recognized by the farmer who studies the causes for price recessions. The same might be said of corn also, the exportation of which this year closing has been very small, only about 10,000,000 bus. for eleven months, an absolutely negligible portion of the crop. On the other hand exports of barley are up 100 per cent in volume, and rye nearly 500 per cent, compared with 1918, and their prices are about as high as the record shows. Wheat exports are over 50 per cent greater than in 1918, and flour shows an increase of about 54 million barrels, which explains wheat premiums. Beef shows a heavy falling off from 1918 for obvious reasons, but pork products for the eleven months show heavy increases. Milk also increased 272 million pounds, and milk prices are high. There is reason in all things: but district attorneys throughout the country do not seem to think that reasoning on the effect of food movements on prices is any part of their game when trying the prosecutions of food profiteers in the newspapers.

AS TO THE COUNTY AGENT

THE Secretary of Agriculture, by J. B. Riggs, acting secretary, writes the Grain Dealers' National Association that criticism of the purported "activities of the Bureau of Markets in coöperation with the county agents" is all gratuitous, due to misapprehension. Perhaps so, literally speaking to the rules. But the writer has had at least one county agent—inadvertently perhaps, on his part—tell him quite a different story; that as a matter of fact he and the Bureau men had systematically worked together for the purpose of avoiding "tribute to the middleman." The Secretary's own report hitherto published herein does not quite support Mr. Riggs's view.

Nevertheless it must be admitted that the coöperation complained of at St. Louis does not amount to so much. It is as the agent of the Farm Bureau that the "county agent" in most places in the Middle West now engages in the business of organizing farmers' companies and creating the competition with private business, which hurts; and, of course, in such case fault can be found by private individuals only in so far as they as taxpayers are forced to contribute to the local or national funds which are used to pay county agents' salaries and expenses. The farmers, who get all the benefits of the agents' activities, should pay their own expenses, and anything taken from the funds of the Agricultural Department for that source is as unfair as it is unnecessary now, the farmers having ample funds of their own to finance their own agents; and all self-respecting farmers, who love their own independence as they love the independent life which is the privilege and compensation of the farmer, should desire that all tax contributions for their benefit cease. Indeed, it is only the Department of Agriculture, the Congress itself, and the few quasi farmers lodged in the National Board headquarters at Washington who still insist on making the farmer a mendicant asking alms of the Nation's treasury and special privileges under the law, like coal mine agitators. Mr. Houston's own views on marketing appear on another page.

NOVEMBER EXPORTS

THE Department of Commerce on Dec. 23 reported the values of merchandise exports and imports in November and for the eleven months of 1919, totals as follows (final three figures omitted):

	November.		Eleven months.	
	1919.	1918.	1919.	1918
Imports	$429,211	$251,008	$3,528,132	$2,820,326
Exports	740,921	522,236	7,242,046	5,583,201
Excess exports.	$311,710	$271,229	$3,713,913	$2,762,875

Of breadstuffs, meats, cotton and cottonseed products the totals were $317,279,520 vs. $200,584,680 in October 1919 and $198,545,982 in November 1918, compared with November 1918 breadstuffs in November 1919 increased $5,467,270, meats and dairy products (mainly meats) declined $9,493,545, cotton and cottonseed increased $131,759,803.

This record of the movement of merchandise is enough to show that trade influences alone would make the exchange situation most difficult without any reference to the depreciation of foreign currencies. Later on, when a more detailed analysis of the returns shall show the sources of the imports, there may be seen where, if anywhere, the industrial situation has so far improved that our exports can be reasonably expected ultimately to be paid for in larger part than at present by imports.

As for England, the New York *Evening Post* points out that while our exports to her in the last month for which there are the classified returns increased $16,000,000, our imports from her increased $30,000,000; and when England's trade with all the outside world is kept in view, her exports, during the eleven months ending with November, exceeded by $1,775,000,000 those of the same months in 1918, her total imports having increased only $1,300,000,000, and that increase was mainly raw material for manufacture and export. England therefore is regaining her commercial power and ability to pay in goods at least for her imports. Continental Europe, especially the Central States, are in far less hopeful condition.

HAPPY NEW YEAR

THE year closing today has been one that has brought to THE PRICE CURRENT-GRAIN REPORTER many new friends as subscribers and advertising patrons. The publishers have endeavored to show their appreciation by putting out a readable paper, "chuck full" of trade information, and many voluntary commendations from readers are reassuring on that point.

The editorial department wishes especially to thank the many volunteer contributors to the news columns in all its departments. The editor-in-chief takes a reasonable but not insufferable pride in his own work, but is compelled to concede his belief that the contributors, paid and volunteer, send him more good stuff than he could produce himself and that the scores of weekly letters received are the real pep of the paper, although happily few of them give him the chance to exploit his own self-esteem and play the barking "showman to his own emotions."

For the coming year promises are in order; but the best test of a man or a paper is what it does, not what it professes. The effort will be made to improve on the performance of the past; it is hoped that the anticipation will be realized—the paper owes that to its friends and patrons. The best boosters of any paper are those who write to it and for it, and even sometimes "knock" it—by mail only, of course. Boosts and knocks that have a basis of reason and not pique will alike be welcome.

To all who know us, we wish a Happy New Year and all prosperity in 1920 and after.

WEEKLY STATISTICAL SUMMARY.

The following tabulation is a summary of figures from various statistical exhibits appearing weekly in detail in "The Price Current-Grain Reporter," these figures representing the past week, the preceding week and corresponding time last year, here assembled for ready reference:

	Dec. 27.	Dec. 20.	Dec. 28, '18.
Wheat—			
Primary receipts	6,898,000	6,175,000	10,636,000
Primary shipments	2,968,000	3,510,000	4,111,000
Receipts since July 1	290,537,000	283,649,000	317,[illegible]
Visible	78,499,000	82,698,000	117,[illegible]
Available, Dec. 20	90,150,000	92,465,000	119,[illegible]
Canadian vis., Dec. 20	37,999,000	41,012,000	53,[illegible]
Exports, U. S.	4,228,000	5,524,000	4,[illegible]
Exports, world's	7,757,000	11,495,000	7,[illegible]
On passage, incl. flour	71,024,000	66,280,000	60,[illegible]
Corn—			
Primary receipts	5,077,000	5,210,000	2,[illegible]
Primary shipments	2,357,000	2,740,000	2,[illegible]
Receipts since Nov. 1	34,597,000	29,520,000	31,[illegible]
Visible	2,713,000	2,174,000	2,[illegible]
Exports, U. S.	.....	8,000	127,[illegible]
Exports, world's	985,000	1,006,000	1,369,000
On passage	13,370,000	14,472,000	14,848,000
Oats—			
Primary receipts	2,865,000	3,141,000	6,250,000
Primary shipments	2,328,000	2,579,000	3,659,000
Receipts since Aug. 1	95,658,000	92,793,000	167,203,000
Visible	13,478,000	14,304,000	34,109,000
Exports, U. S.	125,000	502,000	1,086,000
Exports, world's	284,000	1,157,000	1,632,000
On passage	5,560,000	6,580,000	9,890,000

EDITORIALETTES

THE interpretation of the time limitation section in the Commerce Act for bringing suit to collect claims in the courts, which comes from the Commerce Commission and is published elsewhere in these columns this week, meets a situation which was discussed in this paper recently by Mr. Coon. The relaxation of conditions by the Commission should not, however, tempt claimants to postpone the filing of suits when necessary—the longer the delay the more unsatisfactory the prosecution's testimony is unless documentary. The ruling does not affect the requirement to file claims against the railroad within four months.

MR. HOOVER and Mr. Barnes are agreed that the continent of Europe should be fed with American foodstuffs. The thought is in tune with the altruistic spirit of the age. But when the attempt is made by one arm of the Government, and foodstuffs go out by the ship load, even an altruist ought to recognize that it looks, say queer, for another arm of the Government to get up a clatter about profiteering when the vacuum of foods thus erected is by a law of nature immediately occupied by price advances at home.

THE usual bill to prevent purchases and sales of grain, food and fuel for future delivery has appeared. Bland of Georgia is the father of "me child." Our Washington correspondent gives the outline of the bill.

THREE DOLLARS a year in the United ates and Mexico; $4.00 a year for Canada, 00 United Kingdom, the Continent of rope, Australia, and other countries in the iversal Postal Union. Less than a year at same rate. Single copy 10 cents.

LETTERS on subjects of interest to those aged in the grain trade, news items, reports crops, grain movement, new grain firms, w grain elevators, contemplated improve- nts and cars leaking grain in transit are icited.

THE ADVERTISING value of The Price rrent-Grain Reporter as a medium for ching the buying power of the grain eleva- men is unquestioned. The character and nber of advertisements in its columns tell its worth. If you would be classed with leading firms catering to the grain trade, ce your announcements in the trade's only kly, which is always first to get the live, to-date news to its readers.

ADVERTISEMENTS of meritorious grain vator machinery and supply houses and of ponsible grain firms who seek to serve in dealers are solicited.

CHICAGO, DECEMBER 31, 1919

GRAIN TRADE REVIEW

Prospects of a big movement of cash n from the interior have been the minating influence in the market dur- g the week, and at the moment it ms as though the trade were about see their desire gratified. Prices mped drastically on the announce- nt that the railroads would make ry effort to repair cars suitable for ain and that great attention would given to furnishing cars to shippers. hile this order was misconstrued to ne extent, the fact that prices started wnward was sufficient evidence that technical position was not strong. has been several years since a good pply of corn was accumulated at ter- nal markets, and one is needed now order to stabilize prices and prevent wide swings which have been such feature of late.

There seems to be a general impres- n that corn is to work lower during period of the movement, the extent the latter being determined by the ility of the railroads to furnish cars. the same time it is very noticeable at the country stops selling on the aks, which will have a tendency to ld prices within much narrower lim- than generally looked for. There many bullish influences in the situa- n that are being ignored for the e being, and it may be a month or re before they become effective as rket influences.

The Edge bill, designed to help erican exporters do business with rope, has become a law, and while will be some time before the trade ll be advantaged by it, sooner or er they will be. The big crops in s country keep many from the bull e, although there is a grave and wing shortage of supplies of all ins in Europe. Under the most fa- able circumstances it seems improb- e that Europe will take any great ount of American corn, but the lat- will probably go out in the form of k products. The shortage in live- ck is more serious than in grain and will take some years for supplies of latter to become as large as the -war total. It is the export demand for hog products that will determine the price of corn to a great extent. Judging from the reports received of late the takings by Europe have been very heavy since December began, while hogs have advanced sharply and are now above a parity with corn again, after having been at a good discount.

Oats have shown more strength than corn, and the discount of oats under corn has narrowed considerably of late. The foreign demand has been very keen, and with foreign exchange stabilized to some extent large amounts have been sold abroad at big premiums over the May. There is no burdensome supply at terminal markets and while clearances have been small, there has been a gradual reduction in stocks so that at the present time they are about 17,000,000 bus. less than last year, and in view of the car situation no great movement from the interior seems probable. Not only is the crop in the United States much shorter than last year, but it is also below the five-year average. Argentina has 30,000,000 bus. for export, or 18,000,000 bus. less than last year, while the Canadian crop was also cut short. These three countries furnish the bulk of the oats that enter export channels. The entire world has a short oat crop, and Europe seems to be buying in order to make up the deficiency. France has been the chief purchaser of late, and it would seem to be only a matter of a short while before the United Kingdom would be in the market.

Wheat prices have steadied after having broken sharply of late. The Canadian Wheat Board advanced the price to mills in that country 50c per bu. over night to a basis of $2.80 for No. 1 Northern at the head of the lakes, and has also removed the embargo on flour imports from the United States. The trade has not feared imports of wheat from Canada, as that country has a short crop of as poor quality as this side of the international line. Over 50 per cent of its exportable surplus has already been disposed of abroad, and orders for more have been turned down on account of inability to move grain to the seaboard. The fact that starvation is reported in Austria and parts of Europe would seem to justify high prices for wheat. In fact, a belief that $4 per bu. will be seen before another crop is harvested prevails in some well informed quarters, even though the Grain Corporation is trying to hold down the price of flour by offering some of its soft straights secured from mills at low prices.

Freezing and thawing weather has not tended to improve the condition of the new crop. Hessian fly is dormant at this season, but from the various official reports received it seems certain that a crop scare of no mean proportions will be felt this spring. If speculative trading is resumed before the new crop is harvested the scare may have considerable influence on the price. Spring wheat farmers must be relied upon to put in a sufficient acreage to offset any losses sustained in the winter variety.

Rye sold at a new high figure for the year the past week, the foreign demand for this grain continuing unabated. The price is low when compared with wheat; and while the visible is much larger than a year ago, it would take only a few weeks' liberal clearances to cause a substantial reduction. Some of the recent sellers of the cash article in the West announce that they have sold about all they care to for the time being.

Grain Market Summary.

Receipts of wheat, corn and oats at primary points for the past week follow:

	Dec. 27. 1919.	Dec. 20. 1919.	Dec. 28. 1918.
Wheat	6,898,000	6,175,000	10,636,000
Corn	5,077,000	5,210,000	2,731,000
Oats	2,865,000	3,141,000	6,250,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1919.	1918.
Past week	14,825,000	19,617,000
Preceding week	14,526,000	24,750,000
Since July 1	467,109,000	611,185,000

Corn prices fluctuated within a rather wide range the past week. Liquidation by longs was on and prices dropped rapidly, closing well toward the bottom with net losses of 5⅝@10c, the latter on December. Prospects of a marked increase in arrivals was the dominating influence, and while it was not expected that receipts would become heavy until early in January many longs in December sold out, and with a lack of support a decline of 7¼@11¼c from the top was easily effected. Producers were reported as anxious to sell in many sections, and cars were in much larger supply. Weather conditions favorable for efficient railroad operation. Part of the congestion caused by the coal strike has been relieved.

Oats showed independent strength throughout the week, and closed ⅞@1½c lower, December being the strongest. For the week prices had a range of 3@3⅞c. Sentiment was generally bullish due to the continued active demand for the cash grain from foreigners. Seaboard exporters took large quantities in the West. Movement small, and no material increase is expected for some time to come.

Cash wheat prices have declined as the result of a falling off in the demand. The market has shown an overbought condition, and with the Grain Corporation offering straight flour at a big discount under fancy patents there was less desire on the part of mills to take wheat at the big premiums prevailing of late. Receipts were not large, and stocks are decreasing. A little export business has been put through, but this was offset to a great extent by purchases of Argentine grain to come to this country. No imports of Canadian wheat are expected for some time to come. That country has raised the price of its wheat to mills 50c per bu. Range of prices the past week follows:

			Close		
			Dec.27, 1919.	Dec.20, 1919.	Dec.28, 1918.
Corn—	High.	Low.			
Dec.	$1.45¾	$1.34½	$1.34¾	$1.44¾	$1.61
May	1.35⅛	1.27⅝	1.28	1.33¾	1.36⅜
July	1.33½	1.26¼	1.26⅝	1.32¼	.....
Oats—					
Dec.	.83⅜	.80	.80¼	.81⅛	.69⅜
May	.83⅞	.80	.80⅞	.82⅛	.70⅛
July	.77	.74	.74½	.76	.....

World's Oats Exports.

Exports of oats last week, compared with previous week and a year ago, as reported to the New York Produce Exchange by the George Broomhall service and forwarded to this paper:

	Dec. 27. 1919.	Dec. 20. 1919.	Dec. 28. 1918.
American	125,000	502,000	1,086,000
Argentine	159,000	655,000	546,000
Total	284,000	1,157,000	1,632,000

Exports of oats since Aug. 1, 1919, and comparisons for three years:

	1919-20.	1918-19.	1917-18.
American	22,293,000	54,735,000	61,533,000
Argentine	11,760,000	15,604,000	2,718,000
Total	34,053,000	70,339,000	64,251,000
Season	.....	113,282,000	140,826,000

Corn Stocks and Consumption.

Statement of the movement of corn and consumption in primary markets, compared for three years:

	1919.	1918-19.	1917-18.
P. stocks at Nov. 1	1,212,000	4,117,000	174,000
P. receipts to Dec. 27	34,597,000	34,332,000	175,170,000
P. shipments to Dec. 27	18,469,000	22,275,000	97,690,000
P. stocks on Dec. 27	2,472,000	1,887,000	1,652,000
P. consumpt'n to Dec. 27	14,868,000	14,287,000	76,677,000

Wheat Export Co. Buys Flour.

Announcement is made that the Allied Purchasing Agency, the Wheat Export Company, Inc., has purchased from the United States Grain Corporation $1,000,000 worth of flour which will be shipped immediately from New York for the relief of Vienna.

Wheat in Primary Markets.

Receipts of wheat in eleven primary grain markets from Jan. 1, 1919, to Dec. 27, 1919, with comparisons with 1918:

	1919-20.	1918-19.
Chicago	65,307,000	67,312,000
Milwaukee	4,913,000	12,028,000
Minneapolis	75,770,000	81,745,000
Duluth	10,436,000	75,322,000
St. Louis	35,524,000	33,799,000
Toledo	6,698,000	4,649,000
Detroit	1,350,000	1,120,000
Kansas City	62,685,000	46,928,000
Peoria	2,240,000	3,017,000
Omaha	19,186,000	15,443,000
Indianapolis	6,428,000	6,193,000
Total	290,537,000	347,556,000

Receipts of wheat the past week at primary markets, compared with the preceding week and corresponding week last year:

	Dec. 27. 1919.	Dec. 20. 1919.	Dec. 28. 1918.
St. Louis	394,000	347,000	314,000
Kansas City	1,786,000	1,916,000	688,000
Omaha	255,000	305,000	357,000
Toledo	32,000	32,000	34,000
Detroit	36,000	23,000	13,000
Indianapolis	15,000	28,000	16,000
Peoria	12,000	17,000	6,000
Chicago	355,000	292,000	1,693,000
Milwaukee	144,000	135,000	322,000
Minneapolis	3,753,000	2,886,000	3,799,000
Duluth	106,000	194,000	3,394,000
Total	6,898,000	6,175,000	10,636,000
Shipments	2,968,000	3,510,000	4,111,000

World's Wheat Exports.

Exports of wheat last week, compared with previous week and year ago as reported to the New York Produce Exchange by George Broomhall's service and forwarded to this paper:

	Dec. 27, 1919.	Dec. 20, 1919.	Dec. 28, 1918.
American	4,228,000	5,524,000	6,347,000
Indian	.....	.....	.....
Argentine	2,777,000	4,411,000	499,000
Australian	752,000	1,560,000	840,000
Others	.....	.....	102,000
Total	7,757,000	11,495,000	7,788,000

Exports of wheat since Aug. 1, 1919, commencement of European crop year, compared for three seasons:

	1919-20.	1918-19.	1917-18.
American	156,419,000	128,341,000	122,306,000

CHANGES IN THE GRAIN TRADE

A Review of the High Spots in the Grain Trade in 1919 As They Affected the Producer and the Trade—The Future.

By C. S. MICHAELS.

The first full year of peace in the last five has passed, and the time when trade conditions will become normal again is at hand. It cannot be said that 1919 was a year of unparalleled prosperity, as far as the grain trade is concerned. In fact, it was a rather lean one; but there are many things to be thankful for, the chief of which is that the paternal Government system of compounding messes out of orderly trade conditions more than adequate to take care of any and all developments will soon be but an unpleasant memory—a nightmare dispelled by the dawn of "normal conditions."

Looking back over the period of the war, the grain trade has a few things to be ashamed of; many to be proud. Of all of the various service facilities in the world it alone was able to weather the storm of war without the slightest assistance. This in itself should prove to the most skeptical that the method of handling cash grain in connection with speculative trading is founded on the rock of common sense and not on the sands of theory.

It is easy to see, now that a year of peace has passed, wherein prices should have been much higher than were actually paid. Wheat sold up to $3.45 during the war. The price advanced fairly steadily for several years. There was the invisible reserve to draw on. When the latter was exhausted, and it became a question of securing wheat regardless of price, there was only one thing left to do—check speculative trading. It was here that the grain exchanges proved their worth and their benefit to the producer. No effort was made to affect the price of cash grain. The great economic law demands that the producer receive as much for his grain as anyone cares to pay for it. An economic crime was committed by the Government when it put into effect its guaranteed price. Left unchecked, the price would have advanced to a point where farmers would have seeded every acre possible, and production would have been stimulated to a point far in excess of that caused by the guaranteed minimum. The after-the-war readjustment would have been more rapid in consequence. Uncontrolled theory is uncontrolled anarchy.

History shows that for a period of several years after a big war grain prices remain much above the pre-war level. Wheat around $3 per bu. should occasion no surprise in view of this, although Government theorists seem to think so. They are finding out that it is easier to start a fire than to put it out. Hysterical utterances designed to lower prices have but one result, a temporary decline and then an advance to above the previous high point. Mr. Hoover's statement of several years ago, to the effect that the world was face to face with a food shortage, simply stated on the first pages of the newspapers what was shown to statisticians months before. The end of the food shortage is not yet in sight. A man would have been called a fool who predicted before the war that Austria would be almost entirely dependent on the world's charity for its daily bread today, and that many thousands would perish there from starvation. Yet, at this moment such a condition prevails.

The invisible reserve must be built up again before there can be any permanent lowering of prices, and this is not a matter of a few months but of several years. Importing Europe must rely upon North America, Argentina and Australia for larger than pre-war supplies for some time to come. The reduction in the winter wheat acreage for 1920 in the United States of 11,800,000 acres to a total of 38,770,000 acres probably is in excess of any increase in Europe. The falling off in agriculture endeavor seems to equal that in manufacturing. The call is not for normal production, but super-production. Failure to recognize this condition postpones the return of normal prices and normal demand. Four years of destruction cannot be made good by one year of peace.

The theory that governments can indefinitely control prices was tried out nearly 600 years ago in England, and resulted in misery and revolt. The latter comes only in times of prosperity, not in adversity. Those who care to compare conditions prevailing in England in the fourteenth century with those prevailing at the present time, if they can secure the proper book, will be astonished at the similarity. Agriculture in the United Kingdom has never recovered from the blow given it by a short-sighted policy.

Based on every known fact as to supply and theoretical demand, there is a world shortage in grain and live stock. Part of this is due to transportation. There is sufficient grain for this year's requirements, if it can be distributed. The latter has been a shibboleth for several years. Australia still has many millions of bushels of wheat from previous crops that could have been used to excellent advantage a year or so ago. Financial conditions tend to prevent an immense flow of grain to Europe. That Continent would, if funds were available, probably take every bushel of grain we have to spare. Inability to secure credits and consequent curtailing of purchasing power is forcing great economies in consumption of grain. Money is international, not a domestic affair. It was the recognition of this condition that made the United Kingdom the dominating power of the world. The time is at hand when farmers in the United States should commence to familiarize themselves with world's conditions. It is up to the grain trade to explain many things that go into the making of advances and declines in prices that the average man cannot understand. This necessitates a campaign of education.

Scientific marketing will add many hundreds of dollars to the aggregate value of the farmer's product. He has already learned that if he holds the grain long enough it will sooner or later have a direct bearing on the price prevailing at terminal markets. The sooner he learns that he can sell his grain for delivery months ahead through the medium of future trading markets the sooner the producer will arrive at the Utopian idea of "stabilized values." It seems rather strange that he should not have worked out this for himself before this, but the curse of the farmer in his attitude toward the grain trade has always been one of ignorance. Under normal conditions he could secure 10c per bu. more for his corn, and probably lower the price to the consumer if he would only practice hedging his grain.

The wheat, corn and rye crops in 1919 were well above the average, and close to the largest on record. Oats and barley are below the average of recent years; and in the case of the latter grains there is no country in the world that has any great surplus. In fact, the United States is the only exporter of consequence, although Argentina has a surplus of around 30,000,000 bus. of oats. Under normal conditions Europe would have secured both grains from Russia, but the latter promises to be a very uncertain and unsatisfactory exporter for some years to come. The wheat crop this year was 941,000,000 bus., or 20,000,000 bus. in excess of 1918 and a good part of it has sold at above the guaranteed figure. Corn crop was 2,917,000,000 bus., or 168,000,000 bus. above the average, and compared with 2,502,000,000 bus. last year. The oats yield aggregated 1,248,000,000 bus., against 1,538,000,000 bus. the previous year and a five-year average of 1,331,000,000 bus.

The distribution of the 1919 crops so far has been most unsatisfactory, and at the moment no material improvement can be expected. The Government took over the railroads during the war; and while there were excellent reasons why cars should be short during the war, there has been apparently ample time to repair many of the cars that then got out of order. However, this was not done; so the grain shipper need not look for any material increase in the car supply for some months to come. Ordinary common sense would dictate that raw materials should be moved in such volume that prices would be affected downward, with the consequent effect on finished product. It would seem, however, that more attention has been given of late to moving finished products than raw material; hence prices for the latter have advanced. Until this practice is reversed no material lowering of prices need be expected. There are plenty of signs that the long-suffering public is getting disgusted with the short-sighted policy which has prevailed in many lines of business for some years past, and that unless there is a change, the public will want to change things to suit itself.

Farmers generally made considerable money from their crops the past year, and naturally want to see prices remain high. Agriculture is one of the bases of natural wealth and as long as grain prices remain high and the West is prosperous, no great industrial depression is probable. The consuming demand of the grain belt is immense. Land values have advanced violently, and those who buy now are likely to regret it within the next five years, although land is one of the few things in the world that cannot be destroyed, and hence is the most conservative investment known.

Looking ahead for 1920, it would seem that the winter wheat crop is to be small—one of the greatest crop scares in the history of the country. Fully 25 per cent of the winter wheat acreage is affected with Hessian fly, which will undoubtedly result in a relatively small yield per acre. The condition of the crop, generally speaking, is low, and abnormal weather has not tended to improve it. The area that will be reported abandoned depends entirely on the weather during the early spring. It will be up to spring wheat farmers, if this country shall have an average wheat crop in 1920. Looking at the world's wheat situation, it is strikingly apparent that there is a probability of the highest prices on record prevailing the coming year. It is far easier to loan money than it is to raise a big wheat crop. The latter seems destined to sell at remunerative prices. Speculative trading will probably be resumed early in the year, with September generally believed to be the first delivery month.

It has been several years since the terminal markets had a liberal supply of corn, and it may be several years more before one is witnessed. No export business of consequence is looked for, even though Argentina should have a crop failure. The past shows that unless that country ships corn freely, Europe generally manages to get along without it to a great extent. The exports of corn from the United States are in the shape of pork products. Here again the financial question comes to the fore. The world is suffering from a shortage in fats. Argentina and Australia and other exporters have less meat to spare than the theoretical European demands. Roughly speaking, about 50 per rent of the total output of lard in the United States is exported. Yet the trade completely overlooked the fact that Germany recently bought between 200,000,000 and 300,000,000 lbs. of lard in this country, whereas the total exports for an entire year to the world average around 500,000,000 lbs.

Price changes during the year were most erratic. Wheat had a range of nearly $1.25 per bu. for No. 1 northern and 60c on winters, while cash corn, after selling at $2.10, dropped nearly 75c per bu., the decline continuing for over two months, the most extended period known. For the year the range was 88c. Oats sold from 54c to 89c and closed well toward the highest point the year, while rye sold from $1.24 March up to $1.82 in December. B ley had a range of over 90c per bu., highest figure being made in Decemb

TWO-YEARS-AND-A-DAY RUI

Commerce Commission Makes a New R ing on the Rules of Carriers Govern ing the Settlement of Claims

On Dec. 23 the Commerce Commissi made a new order upon certain ru practiced by carriers for the handli of claims for loss and damages, ho ing said rules to be "unreasonable," p ticularly the rule which rejects au matically all meritorious claims r "seasonably filed with the carrier af the two-year-and-one-day period p scribed in the bill of lading as the m imum period for instituting suit."

Setting aside this rule as arbitra on the part of the railroads, and not keeping with the bills of lading law, t Commission held that freight clai may be filed for suit within six mont after their rejection by the carrier. F thermore, the Commission notified t railroads that they must change th bills of lading tariffs in conformity wi this ruling for the immediate benefit shippers. In its decision, the Comm sion says:

"For some time after the two-ye and-one-day clause became operative t carriers generally, while enforcing t condition in the bill of lading as to t period within which claims should filed with them, paid such claims found to be mertorious, without rega to how long a period had elapsed aft the filing, payment being made aft their investigation was completed, ev though more than two years and o day had elapsed from the date of d livery of the shipment and no suit h been instituted within that period. the latter part of 1918 some of the c riers took the position that the tw year-and-one-day limitation for instit ing suits was a valid defense and th they could not lawfully waive that d fense and pay claims as to which suit had been brought within that p riod, even though the claims were m itorious and even though the delay disposing of the claims was due to t fault of the carrier. Other carrie however, continued to pay such clai as before.

"The provisions of the Cummi amendment do not evidence any inte on the part of Congress to erect a st ute of limitations barring the payme of reasonably filed claims after a given period. These provisions mere prescribe a minimum period to be p vided by the carriers for filing clai and a minimum period for institut suit. Nor do the bill of lading pro sions based on that amendment eviden any such intent.

"We find that the bill of lading p visions in question were and are unre sonable, unjustly discriminatory a unduly prejudicial and that reasonab and non-discriminatory and non-prej dicial provisions to be applied for t future in lieu of that portion of t provisions italicized above would substantially as follows:

"Suits for loss, damage, or delay sh be instituted only within two years a one day after delivery of the propert or in case of failure to make deliver then within two years and one day aft reasonable time for delivery h elapsed; provided, however, that whe claims for loss, damage or delay ha been duly filed with the carrier, a such claims have not been definitely d clined in writing by the carrier befo the beginning of the last six months the two-year-and-one-day period, th suit thereon may be filed within s months from the date the claims a definitely declined in writing by t carrier, but not after. Where clain for loss, damage, or delay are not fil or suits are not insituted thereon, accordance with the foregoing pro sions, the carrier will not be liable a such claims will not be paid."

ROVISION TRADE IN 1919

ew of a Most Remarkable Year's Rec-d—Effect of Government Control of Supply at Home and Abroad—Record Prices.

By C. D. MICHAELS.

ne past twelve months recorded very e fluctuations in values of hogs and c products, due to the fact that dur- n that time the industry has gone h ugh the period of readjustment nec- s ry to the shift from Government o rol to uncontrolled marketing. In r war days the student of provision a es had only to deal with two gov- r ng factors—supply and demand; r reas, during the past year there v e introduced two factors much more c erful, namely, the world's chaotic o ical situation and the factor of dis- u ed international finance. Dealing o ly with the element of supply and e and, it is universally conceded that E ope has wanted and still wants all f ur surplus meats and fats. Such u lus as we will have is at best so m ll that if distributed among the e le of Europe it would only amount o small quantity per capita.

estern slaughtering for the year n d Nov. 1, 1918, aggregated approxi- m ely 31,000,000 hogs. In response to h urgent appeal of the Government, h ugh the Food Administration, for n ncreased production of pork prod- c, the twelve months ended Nov. 1, 9, made the record-breaking figure f 5,500,000 hogs slaughtered at these o ts, which go to make up the figures f he Western packing. A review of h e figures will show the following i resting comparisons; they show that h gains were practically all in the o winter months:

	Hogs.
d, 1917, to Feb., 1918, inc.	12,672,000
c, 1918, to Feb., 1919, inc.	16,614,000
ease in winter packing	3,942,000
ch, 1918, to October, 1918, inc.	18,643,000
ch, 1919, to October, 1919, inc.	18,971,000
ease in summer packing	328,000

HEAVY MARKETING OF HOGS.

he heavy marketing of hogs during h winter was due, no doubt, to the n ety of the producer to sell his hogs e stabilized price of $17.50 per 100 s Chicago basis. However, with all f he surplus hogs marketed and ex- o ed in the shape of meat and lard h expected drop in price upon the re- c al of control did not materialize; n the contrary, the values of hogs s nded into new levels. From the t ilized weekly range of $17.50 at C ago, which existed up to March 1, h week ended March 8 showed an av- r e of $18.20, the following week, 1 5, and week by week a steady ad- a e was noted until the week ending u 26, when the average of hogs at C ago was $22.20, a record breaker.

STABILIZATION REMOVED.

the time stabilization was removed n he United States, control was also e oved in Great Britain. The British n hant and consumer purchased r ily week after week and values li bed steadily in response to the de- m d. There was also heavy buying by E oard exporters and speculators in n cipation of an enormous demand o lard and meats from Germany and t r enemy countries, which helped o dvance prices. Although there was g business done and the packers e their agents abroad to handle busi- e in Germany and other countries, h volume of business did not reach r portions expected, neither did it a the effect on values anticipated n many suffered serious losses.

values neared the highest level, h influence of exchange values of Eng- is sterling and German marks began o perate. With huge bills for meats n other commodities and with es ned British exports the rate of ex- h ge started to move against Great B ain at a rapid rate. The exporter v reckoned the value of pound ster- in at around $4.60 to $4.70 eventually a a decline to below $3.70. It was p ible to absorb the first stage of the decline by advancing prices to the English buyer, but eventually this process advanced prices to a level which would not permit of further purchases by the British consumer. The shrinkage of the value of the English selling price, when translated into dollars, was reflected in a corresponding shrinkage in domestic values of hog products and eventually in the value of hogs.

In the first part of August the agitation in England against high prices became so serious that British authorities saw fit to reimpose government control of meats and meat food products. It then developed that the British merchant and the British government itself had purchased hog products far in excess of actual requirements and that supplies on hand and in transit would be more than sufficient to satisfy the demand for the balance of the year. The effect of this situation was to bring about the most radical decline in provision values ever known in the markets of the United States in so short a period. The decline in 60 days on various cuts ran from 5 to 12c a pound.

VALUES READJUSTED.

The whole meat producing industry has had its readjustment from a war to a peace basis. It now faces a problem of supplying the needs of its own and its million population of Europe during the next year. Until another crop of hogs can be raised, these needs will be heavy and the dominating factor in values will be the question of Europe's ability to finance her needs. How this may be done is still a matter of doubt and uncertainty, but the feeling seems to be that a way will be found whereby hungry Europe will be able to purchase our surplus food, which of course packers are anxious that she should receive.

Record prices were made for all hog products—hogs, cattle, and lambs. Mess pork advanced to $56, or $5.50 higher than in 1918, while the lowest made late in the year was $25, or $21 under the top. Lard touched $33.85, a gain of $8.55 over last year's high mark, only to decline nearly $3 later. Short ribs, with a top of $30, was $2.50 above the previous high level. Hogs were up to $23.60, a gain of $2.60 over the top of 1918; cattle, $21.50, gaining $1; lambs at $25 were nearly $3 higher than ever before; and sheep at $17.25 were 25c under the high of 1918. The highest prices for hogs and products were made in July. Cattle reached the top in December, and sheep and lambs in March and April.

ELEVATOR LEASES.

Sec'y Smiley of the Kansas Association, in his Bulletin No. 71, notes the fact that the Railroad Administration, on complaint of his office, handled directly and also indirectly through Senator Curtis, has reduced a proposed advance of railroad site rental on an elevator from $83 to $30, the $30 amount being double what the lessee had been paying for a number of years. The explanation coming from the Railroad Administration was that a mistake had been made, the land in question having been over-valued. Apparently the Administration approves the rule to make a rental which shall be equivalent to 6 per cent upon the estimated value of the land occupied by the elevator.

Mr. Smiley suggests that it would be in order to secure in Kansas the enactment of a law similar to that now in force in the state of Iowa, giving the Public Utilities Commission of the state power to supervise and regulate real estate owned or controlled by the railroads, and electric and interurban lines for elevator purposes.

A correspondent of the Associated Press, writing from Helsingfors, Finland, says the only bread available to the majority of people living at Petrograd is made of linseed meal and is called "duranda." Reports by those who have used it say the bread is highly irritating and causes stomach trouble.

THE EXPORTS STATEMENT

Summary of the Movement in International Trade as Represented by Dollars—Still Harping on the Packers

WASHINGTON, Dec. 27.—[Special Correspondence.]—After a slump in exports during the summer and early fall, attributed to unsatisfactory exchange conditions, the totals have forged ahead again until in November the second highest mark in the history of the country was reached. The value of exports for that month, according to the figures of the Bureau of Foreign and Domestic Commerce was $740,921,163. The record figure was attained in June when the total was $928,379,203. The shipment of most of the food supplies purchased by the American Relief Administration for the people of Europe was completed during June, which accounted in part for the huge total of that month and for the drop immediately thereafter. The smallest total since that time was in July, when value of exports was $568,687,515. Between that time and October the increase was not rapid, the total in August being $646,054,425; in September, $596,534,841; and in October, $631,910,046. The November figures represent a sudden jump of more than $100,000,000 over October.

Imports for the month of November also were the second largest in the history of the Nation. The total for the month was $429.211,077 as against the record figure of $435,501,118 in September. Imports in June, when the exports reached their high mark, amounted in value to $292,915,543. In July the total jumped to $343,746,070; in August it slumped to $307,289,086; in September it went up to the record figure; then in October it decreased somewhat to $401,873,666.

Exports for the eleven months ending in November amounted to $7,242,045,798, as against $2,583,201,433 for the same months in 1918 and $3,195,364,485 for the same months in 1915. Imports for the eleven months ending in November amounted to $3,528,132,309, as against $2,820,326,193 for the same months in 1918 and $1,606,764,190 for the same months in 1915. The excess of exports over imports in November was $311,710,086, while the excess of exports over imports for the eleven months' period was $3,713,913,489.

The figures for recent months of course do not furnish an accurate comparison with previous years because of the greatly increased values. Assuming that the December figures will average about the same as recent months, the total exports during the calendar year 1919 will be about $8,000,000,000 in value, while imports will approach $4,000,000,000.

Exports of breadstuffs for November 1919 totaled $71,738,928. Included in the total were 1,484,228 bushels of barley valued at $2,393,418; 961,555 bushels of corn, valued at $1,456,950; 2,820,069 bushels of oats, valued at $2,326,948; 1,653,792 bushels of rye, valued at $2,739,055; 15,116,167 bushels of wheat, valued at $35,828,444; and 1,839,880 barrels of flour, valued at $20,162,825.

THE EDGE BILL SIGNED.

The past week has been marked by the completion of the enactment of legislation designed to facilitate the financing of export trade. This was the Edge bill which President Wilson has signed. The measure had been pending for many months in Congress and its sponsors are relieved that it will now be possible to establish the proposed foreign banking corporations to operate under its powers with the supervision of the Federal Reserve Board. While some of the financial interests appear not so enthusiastic about it as originally, because of the delay in its passage and some of the restrictions imposed upon the corporations, yet there is a belief that it will prove a helpful influence toward financing foreign purchases and stabilizing exchange conditions. National banks have not been allowed to rediscount long-term notes under the provisions of the Federal Reserve law. The Edge bill allows the corporations organized under it to take the long-term paper and use it as collateral. The Federal Reserve Board is preparing to issue regulations for the operations of the proposed corporations. It is expected that a number of corporations will soon be formed and that some of those now existing under state laws will take advantage of the opportunity to come under federal charter.

WEEKLY EXPORTS.

The weekly report of the Railroad Administration on overseas traffic shows that on Dec. 17 there were 11,907,146 bushels of grain stored in elevator at north Atlantic ports. There were received during the week 3,043,241 bushels, while 2,919,946 bushels were cleared. The total amount of grain in elevators as of Dec. 17 represents 60.5 per cent of the total elevator capacity of these ports. At south Atlantic and Gulf ports on Dec. 17 there were 8,043,758 bushels of grain stored in elevators, representing 82 per cent of the total capacity.

THE PACKERS.

The agreement between the Department of Justice and the "Big Five" packers, resulting in the separation of the branches handling unrelated products from the packing business, apparently has not entirely settled the controversy over the packers. The Federal Trade Commission intends to go ahead with the cases pending before it, involving the business methods of the packers and the agitation for the Kenyon bill is continuing. One of the latest effusions in support of the Kenyon bill comes from Mrs. Florence Kelley, general secretary of the National Consumers' League, who says that "the packers' contention that they have done nothing illegal confirms our judgment that further legislation is needed to correct evils which have grown up." Mrs. Kelley is displeased at the settlement of the Department of Justice and says that the campaign for legislation to bring the packers under license of the Government should be continued.

An end-of-the-year review of business and crop conditions has been issued by the committee on statistics of the Chamber of Commerce of the United States. The report says:

"On the whole, the farming communities are prosperous because of the high prices of their products, and their liberal spending is the backbone and sustaining power of the present volume of business in much the greater part or the country. The farmer is buying liberally and intelligently. He is buying more automobiles, more tractors, more poultry, more blooded cattle, more farm implements and machinery, more gasoline engines and electric lighting plants for his dwelling house and buildings He is paying cash mostly and also paying off what comparatively few mortgages remain."

Of the general crop situation the committee says that rain did much damage in the South and in the southern portion of some of the Central States to unharvested crops, reducing the yield and impairing the quality. Rains in the wheat belt cut the area planted in the fall to 25 per cent less than the record acreage planted last year. The ground lost to winter wheat will go to other crops, including corn and oats. A. W. Douglas of St. Louis is chairman of the committee signing the report.

CONTROL BULLS PRICES.

The London *Times* of Dec. 2 published an exceedingly bearish statement relating to meat supplies in England, asserting that storage houses were full, that the markets were glutted, and that there were enormous shipments still to come forward from New Zealand. It was complained by the *Times* that the high prices in England were being maintained through government control.

Crop Reports

Compiled by GEO. A. WELLS

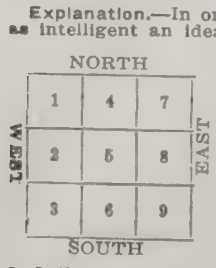
Farmers' Disposition to Sell Corn.

The farmers have been disposed to sell corn in Illinois, Iowa, Nebraska and South Dakota, and country elevators have been accumulating stocks of corn in these states; but in Ohio and Indiana they do not seem so much inclined to sell, while Missouri and Kansas will have practically no surplus corn above local requirements.

Condition of Winter Wheat.

The condition of the winter wheat crop is reported "favorable" except that in Ohio, Indiana, Illinois and Missouri the Hessian fly is in evidence as it usually is every year on paper. Snow and ice to a greater or less extent covers the ground in all the winter wheat territory and damage may result to the winter wheat plant by suffocation, freezing and thawing before the spring season opens.

Effect of Car Shortage.



The car shortage is serious everywhere and the country dealers, particularly in Illinois, Iowa, Nebraska and South Dakota, have accumulated stocks of corn which they are unable to ship because cars have not been provided; and as a consequence the country dealers will be obliged to default on sale contracts for December shipment at more or less loss. The ground throughout the corn territory of Iowa, Nebraska and South Dakota is covered with a considerable depth of snow and ice, which, if it should thaw, would result in roads becoming impassable and farmers will be unable to make deliveries to the country elevators. This situation may inspire the country dealers to hold their stocks of corn hoping for a reaction and higher prices that will at least save them from loss.

Bureau of Markets Vagaries.

We would call the attention of the so-called "economists" of the Bureau of Markets, who are studying the problem of eliminating the middleman in the grain business or exercising influences to make him perform a service without profitable compensation, to the trade and market conditions involved in the handling of this new corn by the country grain dealer. We would ask the "economists" of the Bureau of Markets to suggest how the country grain dealer may assume the risk of ownership of new corn as under the conditions which have existed thus far on this crop and eliminate the hazard of market fluctuations, and the possibility of being unable to make shipment resulting in the necessity of defaulting on the contracts. How would the "economists" of the Bureau of Markets suggest that the country grain dealer recoup his loss on the old corn that declined about 50c per bushel while in his hands last October? A solution of this problem will undoubtedly be of great interest to many co-operative elevator companies as well as independent dealers and line elevator companies. We hope to hear from them on this subject.

LOCATION KEY.

Explanation.—In order to give the reader an intelligent an idea of the districts from which all crop and local trade condition reports are received, they are numbered to correspond with divisions shown in the accompanying diagram, the numbers 1, 2 and 3 representing the western one-third of the state from north to south; 4, 5 and 6 in central third, and 7, 8, 9 the eastern third. Figures indicating these locations will appear in all crop reports, in letters referring to trade situations in beans, feed, hay, etc. Each state will be treated as a square body.

Crop Conditions.

CORN.—The percentages of the corn crop that has now been husked in the different states are reported as follows: Ohio, 85; Indiana, 91; Illinois, 91; Missouri, 81; Iowa, 87; Minnesota, 88; North Dakota, 93; South Dakota, 86; Nebraska, 80; Kansas, 79 and Oklahoma, 85.

Basing the average yearly quality of corn at 100, the percentage comparison of same with same as to quality this year is reported as follows: Ohio, 93; Indiana, 100; Illinois, 95; Missouri, 80; Iowa, 98; Minnesota, 90; North Dakota, 111; South Dakota, 96; Nebraska, 100; Kansas, 83; and Oklahoma, 95.

OAT STOCKS.—The stocks of oats held in country elevators are reported as medium in Ohio, Illinois and Iowa, light in Indiana, Minnesota, North Dakota, Nebraska and Kansas.

FARM SURPLUS OF CORN.—The percentage of the marketable farm surplus of the new corn crop that has now been sold by the farmers is reported as follows: Ohio, 26; Indiana, 37; Illinois, 31; Missouri, 46; Iowa, 28; Nebraska, 15; Kansas, 59 and Oklahoma, 54.

OF OATS.—Ohio, 70; Indiana, 75; Illinois, 60; Iowa, 58; Minnesota, 63; South Dakota, 55, and Nebraska, 61.

OF WHEAT.—Ohio, 91; Indiana, 92; Illinois, 91; Missouri, 91; Iowa, 89; Minnesota, 71; North Dakota, 78; South Dakota, 87; Nebraska, 83; Kansas, 72, and Oklahoma, 81.

General Reports.

The following reports advising in a general way (1) as to the disposition of the farmers to sell corn at present prices, (2) the percentage of the cars needed for shipment of grain that is being provided, (3) as to the unfavorable condition of winter wheat, if unfavorable, are self-explanatory.

OHIO.

Rockford (1): Farmers are selling corn freely in this locality.

Greenville (2): Not free sellers of corn. About 50 per cent of cars furnished. Considerable complaint of fly in wheat.

Sidney (2): Farmers not now rushing their corn to market, but are selling all and more than we are able to get cars to ship. Winter wheat is O.K.

Camden (2): Corn only selling between farmers. None to ship out as all will go to local feeders. All cars are available as needed for grain.

Agosta (5): Farmers not selling corn. Cars scarce and slow. Takes two weeks to two months to get one. Wheat has light snow covering.

Upper Sandusky: No corn is ever shipped from this place. The farmers did not sell oats freely; are selling some now.

Circleville: Farmers are holding corn for higher prices, now paying $1.35 per bushel. There are about 90% of the cars being provided.

Ansonia: Weather is fine, just a little snow covering ground.

Springfield: Farmers feeding corn. Not disposed sell present prices. 90% cars being furnished. Fly reported very general in all late sown wheat.

Xenia: Soil frozen with no snow protection, this being unfavorable for wintering of wheat. Farmers not selling corn. Will hold for $1.50. Nearly enough cars are being furnished as movement is very light.

INDIANA.

Winchester: Farmers not selling corn. Feeders paying above a shipping basis. Very little car trouble. No corn to ship. Some fly in wheat.

South Whitley: Farmers will take all corn here to feed. Plenty of cars so far. Too dry for wheat, what there is left.

Portland: Farmers are not free sellers of corn. Winter wheat conditions favorable. Cars furnished very slowly.

Monticello (1): Farmers willing to sell at present price all that is needed. Growing wheat fair condition. Some Hessian fly damage.

Tipton (5): Best corn in years, both quality and yield. Very little shipped. Nearly all fed.

Waveland (2): There will be no corn shipped out of here; feeders will use what we have here. Some car shortage. Wheat shows damage by fly.

Rushville (8): Growing wheat is in very bad condition both from lack of covering during cold weather and great amount of fly and eggs in the plant.

Decatur (7): Corn short crop; most of it will be fed; 75 per cent of cars furnished.

Rensselaer. (1): Wheat seeded late and with temperatures 10 below zero early in December and ground practically bare and frozen several inches deep we fear general winter killing may result. Farmers selling corn slowly. Feeders bidding above shipping basis and farmers now generally holding for $1.50 per bushel. Movement light and but few empties required here.

Lawrenceburg (9): Not anxious to sell good corn. Fly in some winter wheat.

ILLINOIS.

Ashton (4): Farmers sold corn freely on the late advance. About 50 per cent of cars needed being furnished.

Mt. Carroll (4): No corn moving. Wheat condition good.

Riggston (5): Farmers not selling much. 100 per cent cars furnished. Ground is frozen hard and no snow.

Princeton (4): Farmers are willing to sell at present prices. Cars about 50 per cent short. Winter wheat favorable.

Earlville (4): Farmers will sell corn if it can get cars. Only half enough cars are available at present.

Wenona (4): Winter wheat does not appear to be doing well. Farmers are selling corn moderately.

Vermont (2): Corn not offered freely. Holding until later in season. Enough cars to handle what grain is moving. Considerable talk of damage to wheat by fly.

Eureka (1): Slight disposition to sell corn. Cars scarce yet no famine. Slight snow protection and dry weather.

Sidell (8): Farmers not disposed to sell corn at present prices. Only about 50 per cent cars provided where ordered. Some complaint of hessian fly in wheat sown early in fall.

Mattoon (8): Farmers are holding corn with a stiff upper lip and a barrel of nerve. There is considerable talk of fly in wheat but the damage cannot be estimated now.

Nashville (3): Corn failure in this county, and oats very nearly so. Farmers are buyers instead of sellers of corn and oats.

Rockport (2): Farmers not disposed to sell. We get the cars needed but very slowly.

Decatur (5): Farmers holding corn for $1.50 We are bidding $1.40; no sales. Cars very scarce and needed. Fly reported in wheat; otherwise good.

Freeport (4): Farmers ar not very strongly inclined to sell corn at present prices. Have had no serious car trouble. Winter wheat acreage small. Condition good.

Ashland (5): Wheat badly infested with fly. Some fields completely gone. Farmers not selling corn at present prices. Car situation bad.

Belleville (3): Farmers are selling some corn; satisfied with $1.40 a bushel. Nearly all used here at home. Wheat is in good condition. Very few speaking of fly; too early yet.

Lexington (5): A great many are willing to sell and they could deliver. There isn't 50 per cent of cars furnished that are needed. Conditions of winter wheat favorable.

Sparta (6): Corn crop a failure in this section. Winter wheat looks fine. Some talk of fly in early sown wheat.

Paris (8): Farmers not selling. Frozen ground; no covering of snow.

Pocahontas (3): Corn failure in this section. Early wheat infested with fly. Wet weather hurt later sown.

IOWA.

Hull: We have only been able to take in corn three days this month. Oats four days.

Marcus (1): Farmers renters, borrowed funds for six months and paid rents. Well-to-do farmers feeding corn to live stock. Many will not sell 1919 crop this year as 1918 crop was seed 1919 and heavy income tax rates, they don't care to sell two crops in 1919.

Lowden (8): Farmers are quite willingly selling corn. Cars very, very scarce.

New Hampton (7): There will be but little, if any, corn to be shipped out. We may ship in corn. We can get cars easier than grain to fill them.

Whitten (4): Farmers are anxious to sell corn and oats, but are unable to get cars. Only had two cars in two weeks.

Corydon (6): Farmers are not willing to sell corn. No shipments of grain of any kind at this time.

Allison (4): Farmers want more money for corn and are firm believers in higher prices. Getting about 10 per cent of cars that are needed for shipment of grain.

Belmont (4): 50 per cent of farmers disposed to sell, remainder not. Have all the cars we need.

Gilbert (5): Farmers selling corn as fast as elevator can take it. About one-half cars required are being furnished.

Arthur (2): Farmers willing to sell if cars could be had. About 1 car in 10 that is needed.

Onawa (2): Farmers selling as fast as dealers can get cars to move. 20 per cent of cars furnished that are needed.

Kirkman (2): Farmers are ready to sell corn at present prices, but we have no cars. We do not get half what we need. The railroad seems to haul empty cars back and forth to limber them up, but they do not switch any out.

Patterson (5): Farmers holding corn. No surplus of oats. Cars very short. Winter wheat covered with snow, which is favorable.

Osceola (6): County Farm Bureaus advise holding corn for higher prices and will wait the signal to sell from National Crop Reporting Bureau, Washington, D. C.

Hamlin (2): Farmers are willing to sell corn at present prices, but cars are hard to get. Sometimes we have to close the elevator on that account. This snow is good for the wheat.

Oakville (9): Very little corn moving at present prices. Plenty of cars. At present writing condition of winter wheat and rye is good.

Clarinda (3): Farmers holding corn for $1.50.

Washington (8): Farmers think that the price of corn will advance. Cars are now being provided for shipping grain rather promptly.

Indianola (6): Shipping in corn and oats.

Wall Lake (2): Farmers are not selling corn very fast. We are getting enough cars so we can keep business going.

New Sharon (5): Ready to sell at present prices if cars were available. Only 40 per cent of cars furnished that are needed. Winter wheat covered with snow.

Coburg (3): About 40 per cent of the cars furnished that are needed. Condition of winter wheat above average, being covered with snow and very green.

Guthrie Center (2): Farmers seem willing to sell corn at the market price. Cars are being furnished fairly well.

MISSOURI.

Harrisonville: Wheat crop looks bad. No snow. Our acreage of wheat will be low compared with last year.

Richmond: Farmers not inclined to sell.

Chillicothe (1): Farmers holding corn for higher prices. Wheat in good condition.

Paris (5): Farmers slow sellers. No in held back on account of lack of s. Very little more grain to go out.
Bethany (1): Wheat covered with
Clinton (1): Wheat looks very bad ll went into winter looking bad. Has n very cold and there has been no w to protect wheat.
Columbia (5): Old corn out and what w corn there is will be used at ne. Some fly in early wheat.
Salisbury (4): Growing wheat is fering for snow covering. Hard eze all this month is hard on it. rn moving slowly.
Marionville (3): No corn for sale; 95 cent of corn consumed will be pped in.
Higginsville (2): Farmers are hold- their corn for higher prices.
Corning (1): Disposition to sell corn the farmer is good. Cars are about -half short.

MINNESOTA.

Prior Lake (6): Farmers in this lo- ity have no corn for sale. They are y anxious to sell their wheat, but our elevator is full and no cars avail- e, we are unable to buy any. The situation is very bad.
Eden Prairie (6): About all the corn feed and oats the same. There is no rse grain sold.
Donnelly (6): No corn shipped from e. Cars come slow. About two- rds of the cars needed are furnished.
Wells (6): On account of light crop small grain thru this locality, farm- are not disposed to sell at present ces. Hard to get cars to ship out.
Henderson (6): Farmers are holding n for $1.40 per bushel. We have no uble getting cars. Winter wheat has d covering of snow and will be in danger until spring.
Minneota (3): Very little corn to be pped from this station this year. out 50 per cent of our corn was wned out this spring. Balance will kept for feed.
Franklin (6): Farmers holding corn k.
London (6): Farmers are selling corn rly at the present corn price. At the sent we can get no cars to ship out in. We are loaded to the roof.
Farmington (9): After New Year's hink the balance of the surplus corn ll be marketed freely. The shipping blem is about as bad as it has been. n only get about 25 per cent of e cars we need and when they are ded out they let them stand, some- es for weeks before they even move m from the siding.

NORTH DAKOTA.

Drayton: No corn except for local nsumption. Not a large amount of heat to be marketed, possibly 15%.
Lakota (7): Cars very scarce.
Great Bend (9): Winter grains here e in satisfactory condition up to the esent date. Received what cars we k for and no complaint to make.
St. Thomas (7): No corn husked re. All used for silos and feed on alk. Cars have been very scarce for e last three weeks. Not much grain ship out.
Langdon (7): We have no corn for le in this part of the state. About rs enough to take care of all grain ing shipped. No winter wheat.

SOUTH DAKOTA.

Armour: No corn to market. All be- g fed. Plenty of cars for all require- ents and have been plenty all the ason.
Bridgewater (8): Farmers would sell rn freely if cars could be had to ove it; 10 per cent cars furnished. early all elevators closed on account car shortage.
Canton (9): Farmers are free sell- s of all grain at present prices.
Flandreau (8): Farmers are willing llers of corn; 25 per cent of cars re- ired are furnished.
Beresford (9): Would sell freely if rs were obtainable. About 1 per cent cars furnished. Winter wheat con- ions favorable so far.
Clark (7): About 90 per cent of cars furnished.
Brentford (7): Farmers intend to hold.
Dell Rapids (8): Farmers selling corn freely.

NEBRASKA.

Schuyler (7): Farmers willing to sell corn at present prices. About 25 per cent of cars being furnished. Wheat condition very favorable.
Beatrice (9): But little corn to market; 100 per cent of cars furnished. Wheat conditions O.K.
Winnetoon (7): Farmers as usual expect higher prices and are holding.
Fairmont (9): We have to ship corn in to feed. Cars are now plentiful. Ground covered with snow and looks favorable.
Ashland (9): Think farmers would sell if roads were good.
Superior (9): No corn sold by farmers here. We ship in corn for feeders. Demand is good.
Orleans (6): Farmers inclined to haul corn freely, wheat sparingly.
Humboldt (9): Farmers would sell if could deliver; 70 per cent of cars furnished. Lots of snow early. Later warm weather melted one-half of it which couldn't run off. Some farmers say coat of ice over it will do harm, others say O.K.
Central City (9): Farmers want to sell their corn if buyers will accept the dampest first. Cars scarce.
Pierce (7): Corn offered freely at present market. Empty grain cars—not 50 per cent of requirement.
Swanton (9): Farmers holding; 90 per cent of cars ordered furnished. Winter wheat at present in good condition.
Harvard (9): Very little corn offered by the farmers. Have plenty of cars.
Roseland (9): Farmers are willing to sell corn which is damp. That which is in cribs are holding for higher price.
Belden (7): Farmers willing to sell at present prices. Are held back by condition of weather and roads. Also of inability of elevator to care for shipments of corn. Elevators loaded to capacity. No cars in sight.
Neligh (7): Farmers will sell corn at present prices, but roads bad. All cars necessary.

KANSAS.

Mahaska (4): No corn moving, but a little wheat. Cars are plentiful enough.
Logan (4): 40 per cent of the wheat is still in the stack. Fields now covered with snow. Thawing for two days and roads almost impassable.
Schroyer (7): Farmers are holding corn for more money. We are getting about enough cars. Wheat conditions good.
Plainville (4): No surplus corn or oats in this part of the state.
Hillsboro (5): No corn sold here. We are shipping in. Empty cars are very scarce. Do not receive one-half enough cars. Snow is disappearing from the wheat and we would call this unfavorable weather for the growing crop.
Alta Vista (8): Shipping in corn and oats. Ice on the wheat, but do not think that it will hurt.
Wichita (6): About 10 per cent of cars.
Neodesha (9): Very small crop of corn. None to sell. Wheat seeded too late. Weather unfavorable. Did not get a good start.
Seneca (7): We have sold our elevator to Henry Nolte.
Waldo (5): Wheat crop appears to be coming out of the bitter cold in fine shape. Considerable scattered threshing to do yet.
Uniontown (9): Some farmers who have corn are free sellers at $1.45 per bushel. Others are holding for more. Will have to ship in corn; 10 per cent of cars provided.
Oswego (9): Our wheat was sown very late and looks very bad. Considerable part of it has not come up yet.
Junction City (7): Practically no corn will be marketed. No grain shipped from here, but cars for mill products are fairly available.
Concordia (4): Light crop of corn in this section of state. Most will be fed on the farms. Condition of wheat at this time is good. Fields are covered with snow.
Wellington (6): Wheat is late and small. May come out O.K. in the spring, however.
Pittsburgh (9): Corn and oats almost a failure here this year. Both corn and oats will have to be shipped in after the first of January until a new corn is grown.
Athol (4): The condition of winter wheat is almost perfect.
Belleville (4): As there was hardly any corn at all raised, farmers are selling almost entirely direct to each other for feeding purposes; 100 per cent cars being furnished for shipment of grain.
Lyons (5): No surplus corn in this locality. Car situation generally improved. While condition of winter wheat is below normal, generally considered satisfactory.
Pleasanton (8): Wheat had a poor start. Planted late. Has had no snow and much hard freezing and thawing weather.
Ashland (3): Wheat crop is in poor condition on account of late seeding. Only about 40 per cent so far has germinated. Moisture came too late.
Greensburg (6): There will not be any corn or oats shipped from this station. There is not enough for local demand.
El Reno (5): Farmers willing to sell; 25 per cent of cars furnished. Late seeding of much of the crop makes the condition uncertain as some of this is not up and farmers are inclined to believe it has rotted in the ground.
Enid (4): Farmers selling as freely as elevators can handle. About 25 per cent. Wheat condition fair.
Geary (2): Farmers willing to sell at present prices. About 50 per cent cars furnished.
Enid (4): Farmers selling freely; 25 per cent of cars furnished needed. Winter wheat good.
Miami (7): Not much to sell here. We are paying $1.40 and seems to be satisfactory. About 100 per cent of cars. Wheat not looking good. Lots of fly.
Marshall (5): No corn offered for sale here. We have had no cars for grain shipping for nine weeks and elevators are nearly all full up.
Altus (3): Only about 10 per cent corn planted compared with last year. Ground has been too wet for past three months to prepare ground or seed it.

OKLAHOMA.

Cordell: Farmers inclined to hold corn rather than take $1.30 bu. for it. Only 10% cars furnished.

RANGE OF CONTRACT GRAIN PRICES.

Work more—
Produce more—
Save more—

But we can't continue increasing our production unless we continue increasing our railroad facilities.

The farms, mines and factories cannot increase their output beyond the capacity of the railroads to haul their products.

Railroads are now near the peak of their carrying capacity.

Without railroad expansion — more engines, more cars, more tracks, more terminals—there can be little increase in production.

But this country of ours is going to keep right on growing — and the railroads must grow with it.

To command in the investment markets the flow of new capital to expand railroad facilities — and so increase production — there must be public confidence in the future earning power of railroads.

The nation's business can grow only as fast as the railroads grow.

A vast amount of work now remains to be done which the intervention of war has necessarily delayed and accumulated, and the result is that * * * * * * very large capital expenditures ought to be made to make up for the interruptions inevitably due to the war and to prepare the railroads to serv adequately the increased traffic throughout the country.

—WALKER D. HINES,
Director General of Railroads.

This advertisement is published by the Association of Railway Executives

Those desiring information concerning the railroad situation may obtain literature by writing to The Association of Railway Executives, 61 Broadway, New York.

The Letter Box

Will Make Repairs.

rice Current-Grain Reporter: We ex-t to make repairs at our plant about y 1920.—*Morris Grain Co., R. F. D. 3, Arlington, S. D.*

Will Build Elevator.

rice Current-Grain Reporter: We l begin the erection of a new plant first of the year. We have already tracted for all of our machinery.—*mers Milling & Elevator Co., A. H. ntermeyer. Gen. Mgr., Hartsburg,*

Removed to Memphis.

rice Current-Grain Reporter: This to advise you that we have moved business from Covington, Tenn., to mphis and in the future please send Reporter to us at Memphis, Box .—*Marks & Anderson. Memphis, in.*

Added Grain to Seeds.

rice Current-Grain Reporter: We ve added the shipping of grain for d to our seed business and move-nt is general and active, both as to ivery from farmers and train serv-when grain is sacked.—*Claycomb d Store, Guymon, Okla.*

In Eastern Indiana.

rice Current-Grain Reporter: We n't believe there is one-half of 1 per t of the wheat left in the farmers' nds in eastern Indiana. Oats are o well cleaned out; the elevators es-ially have few oats. Corn is moving small volume and farmers are the t buyers. We have a good crop of n of good quality, but in this part of state there is an immense hog crop and farmers are not disposed to sell corn at anything less than $1.50 per bushel and we don't believe they will sell much of it at this price.

There appears to be no clover seed in the country districts whatsoever. and dealers are not buying from the terminal markets, as it is so high and they prefer to wait until the farmers' demand begins.—*Goodrich Bros. H. & G. Co., Winchester, Ind.*

Returned from Europe.

Price Current-Grain Reporter: The I. L. Radwaner Seed Co. of New York reports the arrival from abroad of their Mr. Frederick S. Radway, who has spent ten weeks traveling in continental Europe, including Germany. He was also in England. He is indeed glad to get back after an eventful voyage.—*I. L. Radwaner Seed Co., New York, N. Y.*

Bought Elevator.

Price Curent-Grain Reporter: I have bought the elevator of the Atlantic Elevator Co. here and took possession on Aug. 10th last. I have installed a 7½ h. p. electric motor and a Cleland Fanning Mill.

I came here from Nekoma, N. D., having bought grain in Dakota for five years.—*E. P. Tschabold, Henning, Minn.*

What the Farmers Want for Corn.

Price Current-Grain Reporter: We believe that the price that the average Illinois farmer has in mind for his corn is $1.50. Some no doubt will sell for $1.25 in January and February. The largest surplus of corn is in Iowa, and many think the disposition of the corn growers there regarding prices will have much to do with our winter prices here.—*H. I. Baldwin & Co., Decatur, Ill.*

Building Elevator.

Price Current-Grain Reporter: We have just started a new elevator; expect to have it finished about June 1. It will be built of vitrified tile and concrete, fireproof. Equipment will include a Giant Oil Engine, Richardson Automatic Scale, steel legs, Western Sheller and Monitor Cleaner.—*Ambia Grain Co., J. M. Heinen, Mgr., Ambia, Ind.*

Railroad to Private Owners.

Price Current-Grain Reporter: The railroad question is of vital importance just now. I personally want to see the railroads go back to private ownership. The present situation is almost unbearable.

I have about completed a new plant at Poneto, Ind. I expect to start business the first of January.—*W. M. Engler. Montpelier, Ind.*

Source of Information.

Price Current-Grain Reporter: Enclosed please find check for $3 in payment of The Price Current-Grain Reporter. I read nearly all the grain papers, but you give us more valuable information than all of the others. We also consider the livestock section of your paper as an important part of it. Recently you published the highest yearly prices of hogs. It would be interesting to us to have a similar chart with cattle prices.—*Anderson Mercantile Co., Commerce, Mo.*

Sold Out.

Price Current-Grain Reporter: We have sold our real estate, stock of goods, all our business to E. Hurlbut & Sons, who are going on with the business now. The Van Dusen Elevator Co. has sold out their elevator to Rood & Sparger, and they are going on with the business. The old flour mill here, which has been idle for a long time, is to be fitted up with new machinery and will start operating this coming spring. A large number of shares are already sold in it.—*R. A. Leggett Co., Pierre, S. Dak.*

Willis E. Shelden's Retirement.

Price Current-Grain Reporter: We wish to announce that Willis E. Shelden on account of ill health, necessitating his moving to a more agreeable climate, has disposed of his wholesale grain business to the Myers-Marshall Grain Co. and has left for California, where he expects to locate. R. F. Myers and L. E. Marshall, the active members of the company, have been connected with the grain department of the Stockbridge Elevator Co. for the past eight and five years, respectively.—*Myers-Marshall Grain Co., Jackson, Mich.*

KANSAS TRADE RULES.

At the last annual meeting of the Kansas Association a committee was appointed to revise the trade rules of that Association. This work has been done by F. A. Derby, James Robinson and H. L. Strong; and with the bulletin dated Dec. 18th Mr. Smiley sends out a copy of the rules so made. These are subject to criticism and after a reasonable length of time during which criticism will be received the directors will take up the question and approve or disapprove of the rules in accordance with the resolution adopted at Hutchinson in May last.

Julius H. Barnes, wheat director, spent the holiday season at his home in Duluth.

LaSalle St., Chicago, Ill.

News of the Terminal Markets

OMAHA.

Leigh Leslie, Correspondent.

V. H. Bewsher and his son Francis of the Bewsher Grain Co. spent Christmas at Des Moines with relatives.

Charles W. Adams, who has been with the Planley Grain Co. here for years, has organized and become head of the Blackhawk Grain Co., which will do a general grain business in this market.

W. B. Young, who has for several years been manager of the Vanderslice-Lynds Co.'s branch office in Omaha, will go to Kansas City the first of the year to become floor man for this company.

The movement of corn to the Omaha market has been only moderate in the last week, while that of all other grains has continued extremely light. A much larger movement of corn is looked for next week.

NASHVILLE.

John Leifer, Correspondent.

Receipts of grain at Nashville last week were 147 cars. Stocks, as reported through the Grain Exchange, were as follows: Flour, 33,400 bbls., decrease of 700; wheat, 757,000 bus., increase of 144,000; corn, 41,200 bus., increase of 5,600; oats, 365,000 bus., increase of 57,000.

Demand for corn meal is reported some better. Southeastern corn mills, with capacity of 114,000 bus., had output last week of 30,436 bus., or 26.7 per cent of capacity, compared with 24.8 per cent the preceding week. Prices: Bolted meal, sacked, per 100 lbs., f. o. b. Ohio river points, $3.50@3.65; plain meal, $3.35@3.45.

Holiday affairs overshadowed grain trade to some extent last week. Wheat continlues strong, with supplies at mills liberal. Corn is in fair demand, and unchanged. Oats are strong, with moderate demand. Quotations: Wheat—No. 2 red, $2.55@2.60. Corn—No. 2 white, $1.58@1.62; No. 3 white, $1.55@1.58; No. 3 mixed, $1.55. Oats—No. 2 white, 91½@92½c; No. 2 mixed, 90@91c.

DES MOINES.

A. J. Cheeseman, Correspondent.

Visitors for the past week were: Thos. V. Tigue, of Rothschild Grain Co., Omaha, and Joseph Tigue, of J. C. Heubinger, Keokuk, Ia.

Car situation eased a little during past three days, but a depressed market and thawing weather will have a tendency to lighten receipts.

New applications for membership—M. Strom, of Taylor & Bournique, Milwaukee; H. L. Stakely, of Woodward, Ia., and H. C. Lounsberry, of Colorado, Ia.

Receipts for past week: Corn, 144 cars; oats, 58; wheat, 8; flax, 1. Range: No. 3 yellow, $1.38@1.44; No. 4, $1.30@1.40½; No. 5, $1.26@1.37; No. 2 white oats, 80@82½c; No. 3, 79@81c; No. 4, 78½@80½c.

A new company has been formed and organization completed, which will be known as the Iowa Corn Products Co. They will manufacture glucose, corn oil, corn oil cake, gluten feed and other products of corn. It has good backing and incorporated for $1,000,000, which will be later increased to possibly $2,000,000. Officers are O. J. Meredith, President; A. N. Higgin, Vice President; R. B. McConologue, Secretary; F. T. Fogarty, Treasurer, and Senator T. C. Cessna, Chairman Board of Directors. Work on the buildings will commence in the early spring. It is expected the initial capacity will be around 10,000 bu daily.

SIOUX CITY, IOWA.

Paul Larson, Correspondent.

Corn received the last few days contains considerably more moisture than it did a week or two ago owing to the warm weather we have been having of late.

The Western Terminal Elevator Co. will have their elevator completed about the first of the year. The drier is being put in shape so that they will be able to handle and dry 20,000 bushels per day.

The Sioux City Hay Exchange, organized last summer, will take over the inspection and weighing of hay the first of January. Heretofore it has been under the supervision of the Board of Trade.

Country roads are reported to be in bad condition after this thaw we have been having. There is lots of snow on the ground and with this warm weather coming on it has made the roads impassable.

Orders issued a few days ago by the railroad director for the assembling of cars in the northwest are beginning to have their effect. Reports coming from country elevators indicate that additional equipment is being given to shippers in this territory.

E. E. Stalker, who has been manager of the Simons-Day Co. since they opened their office here, will be connected with the Western Terminal Elevator Co. after the first of the year.

Visitors during the week were: Mr. Greene, manager of the Farmers' Elevator Co., Paulina, Iowa; Sam Lassen, manager of the Farmers Elevator Co., Pierson, Iowa; Mr. Christensen, manager of the Farmers Elevator Co., Thurston, Nebr.

Jefferson D. Hardin, Jr.
Foreign Grain Freights
Grain Forwarding
NEW ORLEANS, LA.

INDIANAPOLIS, IND.

Myron R. Green, Correspondent.

John L. Igelheart, vice-president of the Egelheart Milling Co., Evansville, Ind., has left with his family for Pasadena, Calif., where they will remain for the balance of the winter.

The Union City Elevator Co. of Union City, Ind., incorporated with a capital stock of $25,000. The company will maintain and operate grain elevators. Directors for the first year are Clyde Schultz, Clyde N. Chattin and Oliver J. Rowe.

C. B. Jenkins of the Noblesville Milling Co., Noblesville, Ind., was in Indianapolis this week. On January 1 he will start from this city for New York, where he will take passage for Panama, Cuba and Florida. The various cruises will keep him in the southland for the balance of the winter.

Higher charges for flour, sugar and labor are given by Muncie bakers as the reason for advancing the price of bread throughout the city. The former 10-cent loaf is now sold at retail for 11 cents and the former 15-cent loaf is now being sold for 16 cents. The former loaf weighs a pound, while the latter weighs a pound and a half. The baker charges the retailer 9 cents for the pound loaf and 13½ cents for the pound and a half loaf.

Not much progress was made in farm work during the past week on account of the snow and cold weather. But little corn was husked during the week and practically none was hauled to market, except where farmers had access to hard surfaced roads. Wheat and rye fields continue to be pastured quite freely with the hope of saving some of them from the ravages of the Hessian fly. There is plenty of farm labor at this time for those who may care to pay the prevailing high wages.

DETROIT.

John Barr, Correspondent.

Barley is inactive and firm at $3@3.20 per cwt. for cash No. 3.

E. Frensdorf, grain dealer and politician from Hudson, was a caller on the Detroit board of trade.

Beans are in fair demand and show an advance of 10c. The market is quoted steady at $7.35 for immediate and prompt shipment, and $7.45 for January per cwt.

Among the callers on 'change last week were Fred Welch, grain dealer of Owosso. Mr. Welch was on his return from a hunting trip in northern Canada and New Brunswick.

Oats were strong early in the week but failed to hold it and closed with an easy tone at a loss of ½c. No. 2 white is quoted at 88½, No. 3 white at 87½c and No. 4 white at 86½c.

The rye market was firm early and made an advance of 4c owing to buying for eastern shipment. Local millers were not active in taking rye. Later the demand decreased and the close was at a drop of 2c from the highest. No. 2 is quoted quiet and easy at $1.78.

Wheat was bid up and ruled strong on shipping demand. Local millers were not buying, having provided for their needs by purchases from the Government. At the close the market was easy, having lost all but 1c of the early gain. Quote: No. 1 red, $2.49; No. 1 mixed, $2.47; No. 1 white, $2.47.

Corn has had a quiet week and shows a loss of 6c. Local demand has been slack and Canada has not been buying owing to the discount on Canadian money. Receipts are fair and expected to increase. Quote: Cash No. 3, $1.46; No. 3 yellow, $1.48; No. 4 yellow, $1.44; No. 5 yellow, $1.40; No. 6 yellow, $1.36.

PITTSBURGH, PA.

H. B. Laufman, Correspondent.

The market for good, sound ear corn continues strong and there is excellent demand for quality supplies. No change in prices since last quotations with No. 2 yellow around $1.63@1.65.

The receipts of shelled corn have been more liberal and the market is easier. Demand is light and the quotations show a material decline as follows: No. 1 yellow, $1.62@1.63; No. 2 yellow, $1.60@1.61; No. 3 yellow, $1.55@1.57; No. 4 yellow, $1.45@1.50. Receipts of corn for the period amounted to 35,100 bushels.

Receipts of all grades of straw continue light and there is a good demand for long, clean straw. There has been no change in conditions or prices since last week. Receipts for the period 84 tons.

Shipping conditions are responsible for high prices in the local market for oats. Scarcity of cars has been a prominent factor in the market for some time, and some uneasiness is felt over conditions. There is a feeling here that the oats market should decline some in case rail facilities improve in the near future. Spot oats are in good demand and readily sell at prices quoted as follows: No. 1 white, 92¼@92⅛; No 2 white, 91¾@92; No 3 white, 90@91; No. 2 white, 86@87. Total receipts for the period were 88,000 bushels.

TOLEDO.

Carl Bryant, Correspondent.

Peter Hipp, of the Napoleon Grain & Stock Co., of Napoleon, O., was a visitor on 'Change Saturday.

Henry Hirsch, seed dealer of Toledo, has made application for membership in Toledo Produce Exchange.

Kent, Keilholtz, of Southworth & Co., and Henry Raddatz, of H. D. Raddatz & Co., were in New York last week.

Nomination of officers of Toledo Produce Exchange will take place Saturday, Jan. 3, with election the following Monday.

Philip Maner, of the Ottawa Grain & Milling Co., Ottawa, O., was a business visitor at the offices of J. F. Zahm & Co., last week.

Earle Slawson and George Forrester, of the E. B. Slawson Co., grain and bean dealers, played Santa Claus to a coterie of friends at Dyer's cafe, Wednesday afternoon. A fine dinner was served with plenty of Xmas "cheer" in evidence. The firm of E. B. Slawson Co. is an addition to the Toledo market within the year. Both Mr. Slawson and Mr. Forrester have been identified with the trade in this territory for many years, and possess a wide experience in their lines and a great many friends. They have enjoyed a particularly prosperous year.

FRED MAYER.
Toledo.

It was a gala week on the Toledo Produce Exchange, and although markets were particularly active with grain futures at Chicago registering a decided break, and the seed market here putting on airs in the way of new high prices, the Yuletide spirit reigned supreme. There were many visitors who came with business as an excuse, but mainly to "mingle with the boys" and all made merry. Little jollifications were indulged in freely, and the old "welcome" sign was more apparent than ever before. Edgar Thierwechter, the Oak Harbor (Ohio) miller, came to town with a load of savory, home-made sausage and greatly added to his list of friends on the floor. A "prohibition drink" concocted by Kent. Keilholtz created much mirth and many victims were escorted to a secluded corner to partake of a little Xmas cheer only to discover a colored glass that had all the resemblance of the real thing. Hurried exits to the various offices and the "victims" were seen to return with a countenance beaming satisfaction. Yes, Christmas comes but once a year.

Cash Markets.

Corn—Arrivals were better last week, but the movement is still hampered by lack of cars. Several instances were reported where country elevators are filled with corn and unable to purchase more for want of cars. There is a good demand for all grains and at good prices, the main difficulty being the shortage of supplies. Oats receipts were no better, amounting to only 26 cars during the week. Good receipts of corn at other markets and a better car situation, together with a temporary satisfying of the cash demand tended to lower the market, and heavier receipts are expected from now on. Prices Saturday were: No. 5 yellow corn, $130¼; No. 6 yellow, $1.25⅜; No. 5 mixed, $1.30¼; No. 2 white oats, 83½c; No. 3 white, 83c; No. 2 red wheat, $2.48½; No. 3 red, $2.45¼; No. 2 white wheat, $2.46½. Cash No. 2 rye closed the week at $1.76 in store, and No. 2 barley at $1.60. Receipts for the week: Wheat, 24 cars; corn, 56; oats, 2 rye, 24; barley, 1.

Grain; Seed; 1919: Fred Mayer.

The grain and seed receipts at Toledo during the year 1919 were not the largest in the history of the market; neither has Fred Mayer, the present president of the Toledo Produce Exchange, the best president the Exchange has ever had. But, all things considered, the year 1919 will be a source of pleasant memory to the many dealers; the year's receipts are most gratifying in view of the many eruptions absorbed by business in general, and Mr. Mayer has been an excellent president. Whether he is the "best" is not for us to say—one thing is certain and agreed by everyone, that the market took a big step forward this year and accomplished many things. Wheat receipts will show a very substantial increase and this market received 1,000,000 bushels of rye more than last year. Corn and oats simply did not move, as everyone knows. The Toledo seed market gained a world of prestige during the year, and receipts were satisfactory in view of the small crops. Naturally possessed with all the facilities a good market should have, the Toledo service was greatly enhanced by the recent addition of a seed laboratory. Toledo, with future trading the year 'round; plenty of storage room; unexcelled transportation; a large list of dealers who are financially sound and believe in the square deal, and an up-to-date seed laboratory, is rightfully called the world's leading seed market.

Many new members were enrolled during the year as a result of the earnest efforts of the officers, and the membership is the largest in the history of the Association. Little details that mean so much in a year's time were not overlooked, and many of these are added to the list of achievements to the credit of President Mayer and the 1919 directors. An automobile was purchased for the grain inspection department and samples are delivered to the dealers in record time. A pension fund was created for the support of the widow of one of the grain inspectors, assuring a substantial income for the balance of her life.

Yes, Toledo is proud of her record for 1919, and Mr. Fred Mayer has been a good president.

BOSTON.

R. S. Wallace, Correspondent.

The following were visitors on 'Change during the past week: J. Brewer and D. J. O'Keefe, New York City, and A. B. Porter, Philadelphia, Pa.

Exports of grain and flour for the week ending December 29th were as follows: Wheat, 24,824 bushels; oats, 20,000 bushels; flour, 32,800 sacks.

Stocks of grain in regular elevators on December 22 were: Wheat, 979,786 bushels; corn, 993 bushels; oats, 374,116 bushels; rye, 44,808 bushels; barley, 5,372 bushels.

Offerings for nearby corn during the past week were light, with little demand reported. Following were prices quoted at closing; No. 2 yellow corn, $1.64@1.66 per bushel; No. 3 yellow corn, $1.60@1.62 per bushel; No. 4 yellow corn, $1.57@1.59 per bushel. Receipts for the week ending December 29 were none.

The demand for nearby oats were very dull and offerings light during the past week. Prices generally quoted as follows: New fancy 38-40 lbs clipped white oats, 97½@98c per bushel; new regular 38-40 lbs. clipped white oats, 97@97½c per bushel; new regular 36-38 lbs. clipped white oats, 95½@96c per bushel. Receipts for the week ending December 29th were 22,720 bushels.

NEW ORLEANS.

Thos. C. Robinson, Correspondent.

Oats have held remarkably firm, considering the very severe decline in corn and while offerings are free, prices have not undergone any considerable change. Quote market from 90@91c, bulk, and sacked at 97c. The demand for oats is only limited and offerings are as free as wanted.

The West has been active in offering corn the past week, and with the Government giving prior movement to grain over any other commodity, not even coal excepted, the great amount of offerings have affected prices considerably, and, in consequence, driven buyers to cover. Quote No. 3 yellow corn at $1.50@1.51, delivered New Orleans, 2 cents off if four. New Orleans weights and grades to govern.

The W. L. RICHESON CO., Inc.
FREIGHT
BROKERS AND FORWARDERS

NEW ORLEANS

NEW YORK.

J. M. Nugent, Correspondent.

The following gentlemen were visitors on the floor of the New York Produce Exchange during the past week: E. N. Gibbs of Boston, W. A. Campbell of Boston and H. B. Moore also of Boston; W. R. Snyder and Barney Farral both of Chicago, and Geo. E. Cathcart of Winnipeg.

Cash corn ruled lower during the week on an absence of any active demand. There appeared to be a small foreign inquiry in the market, but the domestic demand was of a very limited nature. Old No. 2 yellow $1.61¼; new No. 2 yellow, $1.60¾; No. 3 yellow, $1.57¾; No. 4 yellow, $1.54¾; No. 2 mixed, $1.56¾ and No. 3 mixed, $1.55¾, all ten days' shipment. New No. 3 yellow, $1.54½ for first half of January shipment; $1.52½ all January shipment and $1.50 for February shipment.

There was a fairly active demand for oats during the week, practically all for export account. Domestic consumers appeared indifferent and the inquiry from that source proved disappointing. It is estimated a substantial export business was transacted, a large part of which is for prompt nce. No. 1 whites were quoted at 98½c; No. 2 white, 98c; No. 3 white, 96½@97c; No. 4 white, 95½@96c; ordinary white clipped, 95½@96½c; and fancy white clipped, 97½@98½c per bushel.

CLEVELAND.

F. R. Sowers, Correspondent.

H. Hitch, one of the new members of the Grain and Hay Exchange, is now associated with the Cleveland Grains Drying Co., having taken the place of Mr. Murphy. Mr. Hitch was well known to the trade in northern Ohio and has resigned his position with the Cleveland Grains Drying Co. to enter the world of finance.

The National Hay Assn. arbitration committee held a very important meeting in Cleveland last week. H. W. Robinson, president of the Grain and Hay Exchange, acting chairman of that committee, arranged the meeting and conducted the conferences. A number of important cases concerning the hay trade in various parts of the country were satisfactorily disposed of.

The past ten days have witnessed an unusually light movement of grain and this has been attributed to the car shortage consequent to the coal strike. The price on corn this week so far has increased over last week. Quotations on an average have been about 2c higher per bushel. Corn, however, on December 23d was quoted in the market at 4c lower than a week ago. The movement in both corn and oats has improved in the last two days.

On Saturday of last week a joint meeting of the Agricultural Development Committee of the Cleveland Chamber of Commerce and the County Farm Bureau was held at the Chamber of Commerce, where the Grain and Hay Exchange was represented. This meeting was arranged to promote better acquaintance between the farmers and the merchants of this city with whom the farmers trade. There were over one hundred farmers who took advantage of this opportunity and attended the dinner served at noon in the library of the Chamber of Commerce. This was presided over by Mr. John F. Cunningham, editor of the Ohio Farmer.

At a meeting of the board of directors of the Cleveland Chamber of Commerce, of which the Grain and Hay Exchange is a part, the members wired an appeal to President Wilson and also the senators from Ohio as well as certain well-known other senators interested in the peace pact, urging that every effort be made to bring about an agreement not only upon the league terms, but upon the League of Nations. The Chamber of Commerce also asked Governor Cox of Ohio and communicated its action to all the Chambers of Commerce in other cities of 50,000 population or more. "The American Industry and Commerce is left in the dark over future arrangements and a stricken world is without security until peace is concluded, the telegram said.

KANSAS CITY.

T. J. Tanner, Correspondent.

The newly-organized Smith-Whyte Grain Co. has secured office space in Room 4 Board of Trade Annex.

Carroll C. Ragan, of the Ragan Grain Co., was admitted to membership in the Kansas City Board of Trade Tuesday.

Total receipts of grain in Kansas City in 1919 promise to be about 105,000,000 bu., the second largest in the history of the market.

Thomas F. Knight, for several years associated officially with the Bruce Bros. Grain Co., has become identified with the Hipple Grain Co.

Frank P. Logan, of King, Farnum & Co., Chicago, spent the holidays in Kansas City and vicinity. John R. Tomlin, of Medford, Ore., a former member of the Board of Trade, was another holiday visitor.

Dilts & Morgan, of Kansas City, have opened an office in Enid, Okla., with Paul Phillips in charge. The company has the private wire service of Thomson & McKinnon, Chicago, which is also used in the Wichita office. Later a branch is to be established in Salina, Kan.

As the result of a vote taken Thursday, the Board of Trade abolished the maximum on commission charges for handling cash grain. The commission for selling or buying will continue to be 1 per cent of value for nonmembers and ¾ of 1 per cent for members. A minimum of 1c a bushel will persist.

According to investigations made by field agents of the Bureau of Crop Estimates, the average wages paid harvest hands in Kansas and Nebraska this year were $5.42 and $5.26 a day, respectively. In Kansas the wage was 131 per cent more than in 1918 and 253 more than in 1913. The Nebraska wage compares with $4.14 in 1918.

Frank G. Crowell, of the Hall-Baker Grain Co., who served as first vice president of the Food Administration Grain Corporation until July 1, was the recipient of a silver table service from the vice presidents, and Julius H. Barnes, of the United States Grain Corporation, on Christmas day. The gift was in honor of Mr. Crowell's marriage, which took place a few weeks ago. It cost $1,200.

G. S. Carkener, of Goffe & Carkener, has returned from a trip to France and England. Economic recovery in France, Mr. Carkener said, is proceeding, but transportation is difficult. There is no food shortage, but prices are high. In Belgium, he was told, industry is 75 per cent of normal. Mr. Carkener noted improvement in conditions prevailing in England, especially as to the cotton goods trade.

E. J. Smiley, secretary of the Kansas Grain Dealers' Assn., visited the Board of Trade Friday, after a long absence from Kansas City. Mr. Smiley announced that the 1920 convention of the association would be held in Wichita, May 26, 27 and 28. He estimated the farm and country elevator stocks of wheat in Kansas at 35 per cent. Regarding the growing crop he was fairly optimistic, but said there was a problem in the 2,168,000 acres of volunteer wheat in Western Kansas. "The volunteer plants," continued Mr. Smiley, "are the result of grasshopper ravages last July, when the ripe heads were cut off by insects. About five bus to the acre went on the ground and sprouted. Now the growth is a perfect mat. It must be thinned by double discing. Even this expedient may not suffice, and the fields may be good for nothing but pasturage. On the other hand, farming science may save the crop."

Stipulated by the possibility that original memberships in the Kansas City Board of Trade will be raised to a treasury basis of $20,000, two new applications were made for certificates this week. The applicants were Elliott L. Love, secretary of the Fuller Grain Co., and R. W. Sampson, secretary-treasurer of the F. B. Clay Grain Co. Admission of these men and others pending would increase the board's membership to 207. All applicants above 200 have paid $15,000 each for memberships. Two have been admitted and the others are likely to go in. The vote on the proposition to increase the treasury price of certificates will be held January 3. There are many opponents to the advance. Memberships in the Exchange have risen from $85 in 1895, the date of the reorganization. Before the reorganization the admission

BLACK HAWK GRAIN COMPANY
WHOLESALE GRAIN
OMAHA - - - - NEBRASKA

fee was $25. Alex McKenzie and a few other members still hold certificates bought at the initial price.

Vincent's Election Assured.

Unless a new opponent be nominated before the annual election, January 6, Fred C. Vincent will be the next president of the Kansas City Board of Trade. A clear field was given Mr. Vincent this week by the withdrawal of E. O. Bragg from the presidential race. Mr. Vincent is the present first vice president of the Exchange. He is, also, the treasurer of the Simonds-Shields-Lonsdale Grain Co. He spent several months in Red Cross work in France during and after the war.

Coincident with the Board of Trade election, the Board of Trade Clearing Co. will elect three directors for 1920. Nominations made Saturday were: C. W. Lawless, B. L. Hargis, R. J. Thresher, W. C. Goffe, F. G. Crowell, H. J. Diffenbaugh, O. A. Severance, G. W. Hinsen and H. F. Spencer.

The clearing company will also vote on a proposition to revise the tenth section of its constitution so as to include participation of new members of the Board of Trade above 200 in an insurance fund of $30,000 coming from profits of the clearing company.

Cash Grain Markets.

Wheat—Receipts for the week were 1,349 cars, against 1,225 a week ago and 405 in 1918. Bearish sentiment resulting from promises of enlarged transportation service, slower flour trade, reports that 35 per cent of the crop remains in Kansas and renewed talk about reducing the cost of living carried hard wheat prices down 10@15c. Red wheat lost 8@10c. Quotations on the final day were: No. 1 hard, $2.53@2.82; No. 2, $2.50@2.82; No. 3, $2.45@2.77; No. 1 red, $2.48@2.50; No. 2, $2.47; No. 3, $2.41@2.45. Toward the end of the week there was very slow buying, but wheat was picked up on the final recession. Weather conditions favored the growing crop, though the melting of snow left plants exposed to freezing and thawing, which process is not considered to be favorable. Stocks were reduced 186,000 bus. by shipments of private handlers and the United States Grain Corporation. The amount remaining was 13,758,000 bus., against 13,676,000 a year ago. Cars for the out-movement were hard to secure.

Corn—Receipts, 294 cars, against 280 a week ago and 278 a year ago. The market had one of the worst slumps of the season, attributed to the likelihood of an increasing movement, with no immediate prospect of a southern demand. The closing quotations were 11@16c lower, with No. 2 mixed at $1.41. No. 3 mixed at $1.39, No. 2 white at $1.38@1.39, No. 3 at $1.35@1.37, No. 2 yellow at $1.42@1.43 and No. 3 at $1.40. It is believed there will be a good feeding demand as soon as corn reaches a proper relation to hog values. Elevator men want to see the market on a hedging basis before storing heavily. Stocks here increased 11,900 bus., to 48,000, against 211,000 a year ago.

Oats—Receipts, 45 cars, against 46 a week ago and 38 last year. The market held firm, owing to inadequacy of offerings to meet a good local and shipping demand. Prices reached the highest level of the year, showing weekly a gain of 1@2c on white. Red oats were unchanged to 1c up and mixed were unchanged. Prices were: No. 2 white, 87c; No. 3, 86c; No. 2 red, 85@86c; No. 3, 83@84c; No. 2 mixed, 83@84c; No. 3, 82@83c. Stocks decreased 34,000 bus., to 945,000, against 1,974,000 in 1918.

Kafir and Milo—Receipts, 75 cars, against 16 a week ago and 30 a year ago. All indications pointed to a steadily increasing movement henceforward unless retarded by weather or car shortage. Buying was mainly on urgent limited orders from poultry feed manufacturers or to fill short December sales. Eastern people seem to think the market should recede to the corn basis and are holding off as much as possible. The country wants to ship and will do so to the extent of the car supply, unless prices break too much. However, Texas reports indicate that a great deal of the crop will be fed unthreshed. Thus far milo has predominated heavily in the arrivals here, but the proportion of kafir is increasing. Local stocks increased 3,000 bus. for the week, to 5,000 bus., against 33,000 a year ago.

CINCINNATI.

George Mosbacker, Correspondent.

D. W. Hopkins, of the Mutual Commission Co., is spending the holiday season at his former home, Beverly, New Jersey.

The lease is conceded by Cincinnati real estate circles to be the largest with one exception closed here during the past year.

C. S. Foulds, macaroni manufacturer, will withdraw from the Briggs Cereal Products Jan. 1st to become associated with his father, Frank W. Foulds as general sales manager of the Foulds Macaroni Co. at Libertyville, Ill.

The office of J. H. Fedders & Sons, prominent feed and grain dealers of Covington, Ky., was visited by burglars recently, but beyond ruining a valuable safe, from which the door was blown by nitroglycerine, no losses were discovered.

Christmas, this year, was the occasion for much jubilation among all the employes of the Grain and Hay Exchange, who were each presented with a substantial check as proof of the regard for their faithfulness and loyalty to this large and thriving institution.

Wm. R. McQuillan, who is recovering slowly from a severe attack of rheumatism, and W. A. Van Horn and M. McCullough, who have been confined to their homes by illness for several weeks, were each remembered by their associates of the Exchange with a beautiful bunch of flowers.

Fred Winkler, formerly associated with the hay department of H. W. Brown & Co., has accepted a similar position with the Mutual Commission Co., beginning Jan. 1st. Mr. Winkler's experience, together with his large acquaintance and natural ability, will make him a valuable acquisition to the Mutual's force.

L. G. McMillen, vice-president of The Gale-McMillen Hay Co., will establish headquarters at Lima, Ohio, beginning the first of the year to devote his time exclusively to the widely extensive country hay shipments of the firm. The responsibility for the selling success on the plugging tracks and prompt execution of shipping orders will devolve upon A. L. Hess, secretary and treasurer.

E. B. Terrill, president of the Grain and Hay Exchange, has announced the appointment of the following members to serve as a nominating committee for the election of directors on January 15: C. S. Custer, F. B. Edmunds, Max Blumenthal, Joseph F. Costello and George F. Dieterle. The terms of five directors, John E. Collins, Jr., Alfred Gowling, Elmer H. Heile, H. Edward Richter and E. B. Terrill, will expire. Directors will be elected to serve for a period of three years.

The Simmons Milling Co., who have made telling strides within a very few years in the manufacture and sale of poultry and stock feeds, have, under the terms of a 10-year lease closed this week, taken possession of the former plant of the Farmers' and Shippers' Tobacco warehouse at Water and Vine Sts. The buildings taken over by the company are those belonging to the L. & N. railroad, and include one ten-story brick structure and one seven-story brick structure and also a number of sales-sheds in the rear. The holdings have a frontage of 200 feet on Vine street and the same number on Water street, and contain approximately 340,000 feet of space. To take care of the immense amount of shipping done by the company the L. & N. railroad will extend a switch to the buildings from its sidings south of Water street. The company will use the warehouse as a mill for its grain products. The rental, including the cost for extensive remodeling of the buildings, will be approximately $100,000.

CASH MARKETS.

Wheat—The wheat market was dull and lower the past week with only a limited demand from local and nearby mills for No. 2 red, and only fair trade from elevators for the poorer quality. Southern mills of large grinding capacity were reported as operating on Government bought wheat, and few inquiries were received from this source. Receipts were light, and only 6 cars grading No. 2 red were among the arrivals of 45 cars.

Smutty wheat discounted from 1 to 3c per bushel as to grade.

No. 1 red winter, track, $2.55@2.56; No. 2 red winter, track, $2.53@2.55; No. 3 red winter, track, $2.50@2.52; No. 4 red winter, track, $2.44@2.46; No. 5 red winter, track, $2.40@2.43; sample as to qua $2.00@2.40.

Corn—The demand for shelled corn slow and prices irregularly lower throu out the week. Buying for local consu tion was especially quiet, and only shipments reported for export and in trial plants. There were few arrivals g ing No. 2 and No. 3 and elevators ma absorbed the bulk of the offerings b these grades. Ear corn continued in demand, but also weakened with shelle reports of an anticipated larger moven

Saturday the market suffered ano bad break as a result of lower options practically no demand.

No. 1 white, $1.44@1.45; No. 2 w $1.43@1.44; No. 3 white, $1.41@1.43; N white, $1.37@1.39; No. 5 white, $1.35@ No. 6 white, $1.33@1.35. No. 1 yel $1.44@1.45; No. 2 yellow, $1.43@1.44; 3 yellow, $1.41@1.43; No. 4 yellow, $1 1.38; No. 5 yellow, $1.34@1.36; No. 6 low, $1.32@1.34; No. 1 mixed, $1.43@ No. 2 mixed, $1.41@1.43; No. 3 mixed, @1.39; No. 4 mixed, $1.34@1.36; N mixed, $1.32@1.34; No. 6 mixed, $1.30@ New yellow ear corn, $1.53@1.55; w ear, $1.51@1.53; mixed ear, $1.51@1.53.

Oats—The action of futures was flected in the oats market during the w but as a whole was steady and p about in line with closing quotations week ago. The demand was only fair receipts moderate.

No. 2 white, 87@87½c; No. 3 white, 86½; No. 4 white, 85@86; No. 2 mi 85½@86; No. 3 mixed, 84@85; No. 4 mi 83@84.

BUFFALO.

E. Bangasser, Correspondent.

Trade in all lines except holiday goods s at a standstill and will remain so until fter New Year's.

Rye sold at $1.85 for No. 2 on track and nore was wanted. The offerings were ery light on track or in store. Closing 1.82.

The Oswego Milling Co. is rushing ma- hinery to its buildings at Oswego, N. Y., nd early in January will have doubled its resent capacity.

Wheat was scarce and there was a good nquiry for track receipts. There was nore sample and low grade here than good nilling wheat. No. 3 red sold at $2.43 on rack, through billed.

No trouble in selling oats and the few ars brought ½c advance. Receipts were ght and from all indications dealers ooked for a firmer market, especially for hoice weight, but the market broke today. losing: No. 1, 91c; No. 2, 90½c; No. 3, 9c, and No. 4, 88c, on track.

There was a fairly steady market up to Vednesday when buyers held off although ellers were willing to shade prices. Fri- ay's market was even worse than on Vednesday as far as trade was concerned, ith sellers willing to shade 3c and late n the day some was taken at 4c decline. here was another break today and no de- and. The general opinion was that corn s going lower and whether it does or not, ittle business is expected here during the est of the year. Closing: No. 1 yellow, 1.48; No. 2 yellow, $1.47; No. 3 yellow, 1.46; No. 4 yellow, $1.42; No. 5 yellow, 1.38; No 6 yellow, $1.31@1.33 on track, hrough billed. A car of yellow ear corn old at $1.45.

Inspection track receipts for the week: Wheat—No. 2 red, 7 cars; No. 3 red, 8 ars; No. 4 red, 4 cars; No. 2 soft white, car; No. 3 soft white, 1 car; No. 2 mixed, car; No. 3 mixed, 2 cars; sample, 2 cars; o. 2 hard winter, 21 cars; No. 3 hard inter, 24 cars; No. 4 hard winter, 8 cars; o. 5 hard winter, 1 car; sample, 1 car; o. 3 dark hard, 1 car; No. 4 dark hard, 2 ars; sample, 1 car; No. 2 northern, 5 ars; No. 3 northern, 18 cars; No. 4 north- n, 3 cars; No. 5 northern, 6 cars; sam- le, 1 car; No. 3 dark northern, 1 car; No. dark northern, 2 cars. Corn—No. 2 yel- w, 11 cars; No. 3 yellow, 38 cars; No. 4 ellow, 118 cars; No. 5 yellow, 44 cars; No. yellow, 17 cars; sample, 2 cars; No. 2 ixed, 3 cars; No. 3 mixed, 5 cars; No. 4 ixed, 6 cars; No. 5 mixed, 8 cars; No. 6 ixed, 2 cars; sample, 1 car; ear corn, car. Oats—No. 1 white, 20 cars; No. 2 hite, 70 cars; No. 3 white, 7 cars; No. 4 hite, 2 cars; sample, 8 cars. Rye—No. 2, car; No. 3, 1 car; sample, 2 cars; bar- y, 35 cars.

MEMPHIS.

George Williamson, Correspondent.

Alex. C. Harsh, the jovial president of he Elmore-Schultz Grain Co. of St. Louis, as a visitor here during the holidays and change. He has two brothers here.

The J. H. Bray Co. has succeeded the entury Grain & Feed Co. and has applied or membership in the Merchants' Ex- hange. S. M. Bray, who formerly oper- ed the Century Company, has gone to hicago.

Nominations for officers of the Mer- hants' Exchange for the ensuing year are eing made by the primary method and olls will close December 31. Announce- ent of the two tickets will be made hortly afterward and the election will e about the second Thursday in January. is the turn of the grain crowd to have e presidency, and one of the most popu- r members is tipped to win.

Because of the success attending the peration of the Memphis stockyards dur- g the first few months of its existence eps have been taken to enlarge the pacity. The name has been changed to e Dixie Stockyards Co. and capital stock ubled. About $50,000 will be expended improvements right away. Some of the rgest concerns in the country are now presented in this market and the rapid owth of the industry in this territory stimulating improving facilities for marketing it near home. Grain people are co-operating with steps to encourage hog raising.

Business continues quiet, but there is an undertone of steadiness and good demand for snap corn. The time is at hand for beginning farm work in the territory south of here, and there is where snap corn is most wanted, premium being paid for it. Offerings are fair, but holders are very independent as to prices. They are not making any concessions yet. But little business has been done on call this week, as bids have been few. On Saturday cash 4 yellow was offered at $1.49 and 5 yellow at $1.48. Feed barley was offered on the spot at $1.48. Several cars of 3 white oats changed hands at 87½c, while $1 was asked for Texas red oats of 37 pounds weight.

Dealers in seed oats are hoping for a spell of good weather so they may unload some of the stocks they are carrying, which are unusually heavy because of the unusually wet fall season, which prevented any sowing to be done. They figure that if an open winter is not had some losses will have to be accepted. The high moisture tests in corn is causing them to have shipments of seed corn delayed, but they are hoping for good demand when the season opens, although the heavy demand for cotton seed suggests that the South is going to plant a very large acreage to that crop. The almost complete failure of corn last season and the big return from cotton will be a powerful incentive to planting heavily to the latter crop, especially as it is claimed by government experts that a most effective poison for the boll weevil has been found.

ST. LOUIS.

E. E. Reeves, Correspondent.

G. A. Veninga, of the Veninga-Smith Grain Co., is spending the Christmas holidays in New Orleans.

Henry Greve, president of the John Wahl Commission Co., is spending the holidays in New York City. He is making a combined business and pleasure trip.

D. J. Kent, of Taylor & Patton, Des Moines, Ia., has purchased the membership certificate of Max M. Patton, and is an applicant for membership in the Merchants' Exchange.

Charles F. Beardsley, president of the Picker & Beardsley Commission Co., who has been confined to his home by illness for some time, is able to come down to the office for a short while several times a week.

William A. Martin, formerly of St. Louis, but who now is with the S. S. Carlisle Grain Co., of Omaha, Neb., and his brother, John Martin, who now is with the M. C. Peters Mill Co., of Omaha, are spending the Christmas holidays with their folks.

In order to prevent the usual "rough house" time on the last day of the year, the board of directors of the Merchants' Exchange has posted a notice that "Kicking of footballs or the shooting of fireworks on the closing day of the year is prohibited."

Herman Von Rump, of the Turner Grain Co., who was importuned by his many friends to run for director of the Merchants' Exchange, has positively declined to allow his name to be used. W. J. Klosterman, who also was requested to make the race for director, declined.

J. L. Fredericks, who has made himself so popular with the members of the Merchants' Exchange during his short stay in this market that they are insisting that he become a candidate for the Board of Directors of the Exchange, took advantage of the holidays to run up to St. Joseph, to look over his business at that point.

The annual caucus for the nomination of candidates for officers of the Merchants' Exchange was held in the Exchange Hall Tuesday, December 30, and the election will be held on Wednesday, January 7. It is probable that the candidates nominated at the caucus will have no opposition, and that the nomination will be equivalent to an election.

J. B. Taylor, Jr., son of J. B. Taylor, of the J. B. Taylor Grain Co., who is attending the Kemper Military Academy, is spending his Christmas vacation with his parents, and was a visitor on the floor of the Merchants' Exchange last week. He is proud of the fact that in the last war more officers were appointed from his school than from any other military school in the country. He states that it was first in infantry work, and second of the ten "Honor schools" of the country.

The "Christmas spirit" was much in evidence on the floor of the Merchants' Exchange last week and there were many beneficiaries of the liberality of the members. The force in Secretary Eugene Smith's office each received an advance of 20 per cent in salary, which was retroactive from July 1, 1919, from the Board of Directors, and each received from President E. C. Andrews a 50 pound sack of flour. A similar advance in salary was granted to the employes of the Tariff Bureau and the Supervisor of Weights John Dower.

Bert H. Lang, second vice-president of the United States Grain Corporation, has issued a bulletin to licensees of Zone No. 11, offering flour for sale from its stocks, under the brand of "United States Grain Corporation Standard Pure Wheat Flour," under the following terms, specifications and conditions: The circular states that "A similar flour at a similar price is not obtainable through regular channels." It also states that "Original purchasers may bill back all unbroken packages, at the purchase price," but the Grain Corporation will give notice when such privilege shall terminate. The offer is available to bakers, jobbers, retailers, societies, granges and municipalities, but is not availalble to millers, blenders, or cracker bakers.

The political pot on the Merchants' Exchange is beginning to boil violently, but so many of the potential candidates have refused to make the race that it is probable that only one ticket will be nominated. After a petition asking him to become the candidate for president was signed by nearly 300 of the leading members, First Vice-president Charles L. Niemeier consented to become the candidate, and will have no opposition. Louis A. Valier, who made such an efficient member of the Board of Directors that he was urged to become a candidate for second vice-president, has not given his consent, and F. B. Chamberlain, the present second vice-president, who was urged to become the candidate for first vice-president, has declined, on the ground that he could not spare the time from his business. Harry H. Langenberg is being urged by his many friends to become the candidate for first vice-president, but has not yet given his consent. Geo. F. Powell, of Powell & O'Rourke, is being urged to become the candidate for second vice-president, and probably will give his consent. For the Board of Directors, retiring President E. C. Andrews will be unanimously elected as a director. Samuel Plant, vice-president of the George P. Plant Milling Co., is a candidate for director. From present indications J. L. Fredericks will make the strongest race for director. James A. Connor is being urged to run, and Clifford Corneli may consent to run.

MILWAUKEE.

Erich E. Meyer, Correspondent.

Receipts of grain at Milwaukee for the week ending Dec. 27 were 142 cars barley, 265 cars corn, 144 cars oats, 112 cars wheat, 91 cars rye, 2 cars flax; total, 756 cars, against 647 cars the week before, 981 cars a year ago and 821 cars in 1917.

Shipments of grain from Milwaukee for the week ending Dec. 27 were 205,400 bus. oats, 100,970 bus. corn, 63,710 bus. barley, 88,020 bus. wheat, 28,650 bus. rye; total, 486,750 bus., against 499,270 bus. the preceding week and 1,244,037 bus. a year ago.

The Milwaukee cash grain market generally ruled easier, better traffic conditions tending toward a larger movement, and barley for the week shows 8@12c decline, corn 10@12c, wheat 15@30c, while oats ruled fairly steady, and rye was 4@5c higher on continued export buying, but fell back at the close under the general demoralization.

The Milwaukee Chamber of Commerce distributed Christmas dinner baskets to 110 needy families of Milwaukee on Wednesday afternoon, Dec. 24. The baskets contained chicken, candies and all the other necessary ingredients to make up a really truly Christmas dinner. The names of the families were obtained from the tubercular division of the city health department. Children in these families numbered from one to ten.

Morillo A. Boardman, age 81, former member of the Milwaukee Chamber of Commerce, died Tuesday morning, Dec. 23, at the home of his son at 680 Hackett Ave., after a short illness. Mr. Boardman was for many years engaged in the wool business and retired from active business life 20 years ago. He was marshal of the Old Settlers' Club of Milwaukee since 1883, and was prominent in other social and charitable activities. He is survived by three sons and a sister.

Visitors registering at the Milwaukee Chamber of Commerce during the week included the following: J. L. Moore, Allentown, Pa.; Cort Addison, St. Louis, Mo.; J. D. Davidson, Canton, Ohio; A. H. Roeder, Fred Ennis, San Francisco, Calif.; C. H. Hooker, Wausau, Wis.; Otto Munson, Cokato, Minn.; D. V. Sturtevant, Britton, Mich.; F. C. Stauff, Philadelphia, Pa.; Guy Winston, Detroit, Mich.; Ph. Yongren, Lieut. A. C. Noyes, Evanston, Ill.; W. C. Broughton, Corliss, Wis.; E. A. Southworth, LaCrosse.; F. W. Miller, Westfield, Wis.

BALTIMORE.

Robert C. Neu, Correspondent.

Hay prices in the Baltimore market have advanced about a dollar per ton under a scarcity of desirable grades.

E. H. Beer, of Charles England & Co., grain and hay merchants of this market, was last week re-elected president of the Eleventh Ward Club for the eighth consecutive term.

The receipts of new water-borne corn in the Baltimore market so far this season amount to 16,000 bushels, compared with 72,000 bushels arrived up to the corresponding time last year.

FUTURE TRADING

All are looking ahead, attempting to gauge future markets, for there probably has never been a time when so much interest attended to seeding, marketing and distribution of grain.

HEDGING and how it is done—its necessity and advantages with the recognition of fixed principles, as told in my 16-page copyrighted pamphlet, will interest your trade.

HEDGING is furnished with mailing envelopes in lots of 500 and up for those desiring a practical, as well as seasonable, gift for your present and prospective customers.

Knowing the demands of distributing and feed manufacturing trade, we furnish exactly the type required on contracts or spot shipments.

DONAHUE — STRATTON CO. MILWAUKEE WISCONSIN

Quite a large export business in rye and oats was done in this market last week by Baltimore exporters, and some inquiry was also reported from the U. K. for corn, but prices on this grain are not in line. The oats and rye sales were to France.

One effect of the return of the railroads of the country to private control on March 1 is expected to be the expenditure of large sums of money to improve their terminals and other equipment, and it is believed that Baltimore will be among the first cities to receive its share of these betterments

The annual election for five new directors of the Baltimore Chamber of Commerce to serve for a term of three years will take place on the last Monday in January. Two days later the ten holdover members of the old Board, together with the five new directors, will meet for organization. The re-election of President Hayward for a third term is regarded as a certainty.

Some of the friends in the grain trade of Carl R. Gray, who has tendered his resignation as president of the Western Maryland Ry. Co., effective December 31, to assume the office of president of the Union Pacific Railroad, with headquarters at Omaha, gave him a farewell dinner at the Merchants' Club, this city, on the evening of December 27. Full mention of the dinner is made elsewhere in this issue.

The usual messages of Christmas good cheer were exchanged last week between the Baltimore Chamber of Commerce and the following similar organizations: Merchants' Exchange, St. Louis, Mo.; Corn Exchange, of Buffalo, N. Y.; Board of Trade, Peoria, Ill.; New York Produce Exchange, Kansas City Board of Trade, Omaha Grain Exchange, Board of Trade of Chicago, and the Cincinnati Grain & Hay Exchange.

H. C. Jones & Co. and John T. Fahey & Co., grain exporters of this market, have the credit of having shipped the first cargo of wheat that has been sent abroad by individual firms since the export restrictions were removed. During the past two years almost all the wheat has been forwarded by the Grain Corporation and the Wheat Export Co. The first cargo sent by the two firms above mentioned went to the French government, last week.

ST. JOSEPH, MO.

W. H. Moore, Correspondent.

The Sloan-Simmons Grain Company contemplates opening a branch office at Des Moines, Iowa, in the very near future.

Interest in the coming election of officers and directors of the St. Joseph Grain Exchange is at its height and an additional name has been placed on the ballot of candidates for president. The name of J. M. Flynn has been added to the list of candidates, making three for that office. The name of H. L. Dannen has been withdrawn as a candidate for director and the name of A. C. Muench substituted therefor as candidate to serve one year to fill the unexpired term of the directory caused by the resignation of F. M. Spees.

A special meeting of the members of the St. Joseph Grain Exchange has been called to be held in the trading hall, January 6, 1920, from 10 a. m. to 2 p. m., for the purpose of voting upon amendments, alterations and additions to the Constitution and By-Laws and Regulations of the Grain Exchange. Sections relating to commission on consignments, rights of parties on contracts, incomplete shipments and incomplete delivery, grain shipped from terminal or interior markets, routing of grain sold for shipment or delivery and recovery of purchase price.

Shipments from Nebraska on the C., B. & Q. Ry. have been very slow in reaching St. Joseph. Several cars, showing shipping date December 3rd from Western Nebraska, were never received into this market until December 27th. Shipments from off the Rock Island road in Iowa show the same state of conditions. Cars shipped December 5th from Iowa have not as yet reached the market and are congested north of Trenton. In several cases the railroad can give no information in regard to the location of cars. This is the worst state of affairs we have had for some time.

CASH MARKETS.

Wheat—After opening up Monday with a good demand at strong prices, trading became dull and remained so the balance of the week. Hard wheat ranges 7@8c under a week ago, yellow hard 5@10c and red wheat 2@9c lower. Good milling wheat has been in small supply. Ordinary quality offerings make up the bulk of receipts and are in slow demand. No. 1 dark hard, $2.62@2.83; No. 2 dark hard, $2.60@2.80; No. 3 dark hard, $2.55@2.76; No. 4 dark hard, $2.47@2.72; No. 5 dark hard, $2.43@2.67; No. 1 hard, $2.55@2.76; No. 2 hard, $2.50@2.73; No. 3 hard, $2.45@2.70; No. 4 hard, $2.38@2.67; No. 5 hard, $2.30@2.58; No. 1 yellow hard, $2.53@2.56; No. 2 yellow hard, $2.47@2.51; No. 3 yellow hard, $2.40@2.45; No. 4 yellow hard, $2.36@2.41; No. 5 yellow hard, $2.30@2.35; No. 1 red, $2.48@2.51; No. 2 red, $2.46@2.48; No. 3 red, $2.42@2.44; No. 4 red, $2.36@2.39; No. 5 red, $2.31@2.35.

Corn—Prices have been on the decline throughout the entire week. Heavier receipts and a slack demand have given the cash market a continually weak tone and additional recessions were established almost daily. Regional directors of railroads of the northwest and central west announced Thursday that the movement of grain would be given preference over other commodities. Considering the huge stock of corn in the country, size of the movement will probably be the chief interest of the grain trade for the present. Duration of the run will depend upon the supply of cars, ability of the railroads to furnish motive power and disposition of the country to sell at prevailing prices. Table offerings have been moderate, but capable of taking care of the demand, in view of the present tendency of the market. Cash prices Saturday are 12@15c under a week ago, this practically applying to all grades and varieties. No. 2 yellow, $1.40@1.43; No. 3 yellow, $1.38@1.40; No. 4 yellow, $1.30@1.34; No. 5 yellow, $1.26@1.30; No. 2 white, $1.40@1.43; No. 3 white, $1.36@1.39; No. 4 white, $1.31@1.33; No. 5 white, $1.26@1.28; No. 2 mixed, $1.40@1.43; No. 3 mixed, $1.36@1.40; No. 4 mixed, $1.31@1.33; No. 5 mixed, $1.26@1.28.

Oats—Little change in the situation. Light receipts continue to overshadow other factors, and nominal quotations are mostly a cent over last week. Cash follows: No. 2 white, 85@86c; No. 3 white, 84@85c; No. 2 mixed, 83@84c; No. 3 mixed, 81@83c; No. 2 red, 84@85c; No. 3 red, 83@84c.

DULUTH.

S. J. Schulte, Correspondent.

Fees for weighing grain at the Duluth erminals to become effective have been nnounced by F. M. Schutte, official eighmaster, as follows: $1 per carlot or or 1,000 bushels for cargoes or elevator eighup.

The oats market here turned weak at ie end of last week, but trade in it was ominal in the absence of receipts and ferings. The close on No. 3 white oats Saturday was 80⅞@82⅜c as compared ith 82@84c on the previous Saturday.

The annual caucus of the Duluth Board Trade Clearing House Association for ie nomination of a board of seven di-ctors, will be held on Tuesday, Dec. 30. he following are the members of the esent board whose terms of office ex-re; G. Z. Barnum, G. H. Spencer, H. S. ewell, Thomas Gibson, S. H. Jones, J. McCarthy and W. J. McCabe.

F. E. H. Smith, for 18 years representa-ve of the American Linseed Co. on the uluth market, has removed to New ork, having received promotion in the ppointment of vice-president and gen-al manager of the Mencoa Butter Co. id of the American Cocoanut Butter Co., ibsidiaries of the American Linseed Co. ercy Fuller, who has for many years en associated with the American Lin-ed Co. here, is now in charge of its uluth business.

Trading in rye was a feature on this arket during the last week. After ad-ncing 2c. prices eased off 3⅛c at the d of the week, and spot grain showed a ss of 1¼c in the five days' operations at .74⅛. Stocks of rye in the elevators re now aggregate 3,500,000 bushels. les have been made here recently of e for export shipment at the opening e lake navigation season. Receipts of e have continued liberal, running all the ay up to 60 cars daily during the last eek.

R. J. Henderson, a Fort William grain erator, was a recent visitor on the uluth market. In the course of conver-tion he said that he did not place much liance upon a statement emanating from tawa to the effect that $50,000,000 worth spring wheat would be shipped to this untry from Canada as a result of the strictions upon imports being removed, d in the effort to correct the present sparity in exchange between the coun-ies. "I cannot see," he asserted, "that e Canadian wheat board will have any neat to ship here. All the wheat in the nadian Northwest that was thought to available was sold some time ago for ipment to England, and on account of w deliveries the board has been un-le to pick up sufficient to cover its con-acts. Receipts of around 70,000,000 or ,000,000 bu. of wheat had been counted on at the lake terminals before the se of the navigation season, while only out 50,000,000 bushels came to hand." r. Henderson said that according to es-nates, 20 per cent of the last wheat crop the Canadian Northwest is still un-reshed, as farmers were caught by the rly snow.

LOUISVILLE, KY.

A. W. Williams, Correspondent.

Announcement has been made to the ef-ct that a large unit of the Elk Run Dis-lery, controlled by the Kentucky Dis-leries & Warehouse Co., known as "The ust," will start manufacturing 35,000 llons of alcohol daily from sugar house use shipped in tank carlots from Cuba. erations will start about Jan. 1.

The Bransford Flour Mills, Owensboro, Ky., frame mills of 100 barrel capacity, and said to be the oldest in western Kentucky, were burned on Dec. 26, along with an elevator containing $25,000 worth of wheat. The blaze spread to the plant of the Owensboro Products Co., which manufactures feeds in a part of the Rockbridge distillery buildings. This plant suffered a loss estimated at $40,000.

General demand for grain is slightly better than it was. Offerings and receipts are slightly off due to the holiday season, but movement as a whole is fair. Local elevators and jobbers report more active business as a whole. Prices are firm on oats, and in good shape on corn. Wheat is gradually advancing in value, and is in strong demand. Local jobbers are quoting following prices, cash, carlots, on corn and oats: No. 2 white, $1.45; mixed, $1.44; yellow, $1.45. Oats, No. 2 white, 88c; No. 3 white, 87c; No. 2 mixed, 86½c.

In the will of the late Sebastian Zorn, head of the S. Zorn Co., property valued at $400,000 was willed to relatives and institutions. In the will Mr. Zorn ordered the business of S. Zorn & Co. to be wound up and disposed of within four months. However, a new company has already filed articles, and will take over the business of the old firm. This company will be known as S. Zorn & Co., and is capitalized at $200,000 by Thomas G. Williams, a brother-in-law of the late S. Zorn; Garnett Zorn, a son of the deceased; and Harry S. Volz, who has been with the firm for several years. All of these men have been active in the business, and will go ahead with it as formerly.

MINNEAPOLIS.

W. A. Riebeth, Correspondent.

J. H. McLean of Winnipeg is visiting in Minneapolis this week.

A. H. McIntyre of the Banner Grain Co., spent the holidays at his old home, Streeter, Ill.

Dana McMillan, wheat buyer for the Washburn, Crosby Co., returned last week from a trip to Buffalo, N. Y.

The Washburn-Crosby Co. entertained mill and office employes at the Armory with moving pictures, vaudeville and dancing.

A flour mill at Odessa, Minn., was destroyed by fire last week. Loss estimated at $30,000. The owners are planning on rebuilding.

Frank Haven of the Farmers' Club Elevator Co., Winnipeg, is visiting in Minneapolis. He was formerly in the grain business here.

Leonard Brisley, formerly with the Minneapolis office of Randall, Gee & Mitchell and now of Duluth, was visiting in Minneapolis today.

Table telephones have been installed on the trading floor, but have not been connected up as yet. These telephones will give direct connection to the offices of the commission companies.

By a vote of 172 to 12 the Minneapolis Chamber of Commerce Association decided in favor of trading in flax futures in this market. No. 1 seed, no matter where grown, will be applicable on contracts, and trading will start July 1, 1920.

Cash Wheat—The demand for cash wheat was sluggish most of the week as the millers were unable to get cars to ship flour with and did not care to add to their surplus stocks. Some of them bought wheat merely to get the cars it was loaded in for flour shipping. Receipts of spring wheat were light every day. While the local mills were indifferent there was a better demand from outside mills and this helped to keep the market from declining further. Seed wheat was in good demand and sold at firmer prices at the end of the week. There was a better demand for wheat to arrive on Friday and Saturday.

The demand for durum wheat is slow on account of the lack of cars in which to make shipments to outside points. There is a good foreign demand, but the matter of exchange prevents trade. Some large sized lots have been asked for. Durum traders will hold a meeting today and try to arrange matters so that export

usiness can be accomplished. Local ills bought most of the durum that was oved during the week.

The demand for winter wheat has been ow because the millers are getting large pplies on requisitions they made on uthwestern government stores a short ne ago and also on contracts they made ith private parties. The bulk of the neat arriving here is of the winter va- ety and most of it is taken on sales. ot winter wheat is in slow demand and day the buyers reduced their bids 5c on d winter. Regular hard winter wheat in slow to dull demand.

Corn.—Heavy receipts came in daily and e demand was somewhat small in com- rison to the offerings, so the market clined rather sharply. There was a ir shipping demand, though warmer ather throughout the Northwest tended check this trading. Offerings to ar- e decreased when the market weak- ed.

Oats.—The local market was out of line shipping trade with other markets d the demand from the Northwest and est was slower. Offerings increased ghtly. The feeding and grinding de- and was smaller and prices declined mpared with the futures. Some oats re sold to go to the seaboard.

Rye.—The demand for cash rye was ong during the greater part of the ek with the millers taking the bulk the daily receipts, but today there s a much slower tone and prices de- ned compared with May, No. 2 selling 1@1½c under where a day or so ago sold at May price to 1c over. Receipts derate. Some export business was ac- mplished and there are offers on hand for more than a million bushels. Terms of sale are not quite satisfactory, but were nearer so today than at any time on the crop.

CHICAGO.

Geo. C. Martin, Jr., of St. Louis when on the floor Tuesday said the car situation was not noticeably improved, but primary receipts were good, but stocks small.

B. E. Wrigley, from the Peoria market, while on the Chicago floor said the corn supply was good but cars limited. Cattle feeds were strong, corn buyers overbidding country elevators. The oats supply is limited, particularly for grades which are suitable for seeding.

Advices to the Adolph Kempner Co. on kafirs are bearish, significant in connection with a decline of around 40c in the Chicago kafir market. It is only a few weeks back that the recent high mark for kafirs was up this amount at which time supplies were small, whereas now liberal offers are apparent. The Eastern demand is light.

The Board of Trade directors have disapproved the petition of the members to remove the limitation restricting corn trades to 200,000 bus., saying that the restrictions were imposed by the chief of the cereal division of the United States Food Administration and therefore the order withdrawing the limitation would have to come from that source as the board of directors has not the power to make the withdrawal.

The following were visitors to the Chicago floor last week: Elmer Cope, of Omaha; H. Teweles, of Milwaukee; H. K. Allen, Broadlands, Ill.; B. E. Wrigler, Peoria, Ill.; E. C. Saddoris, Mayview, Ill.; S. C. Watkins, Detroit, Mich.; W. G. Beal, Goodland, Ind.; Fay Current, Tuscola, Ill.; James Walsh, Piper City, Ill.; Stephen O'Leary, Buffalo, N. Y.; Ralph Denio, Sheridan, Wyo.; and J. M. Kantz, Mt. Pulaski, Ill.

The Fleischmann Yeast Co., with offices in the Webster building, Chicago, played Santa Claus to their employes who left Cincinnati to continue in the business of the company now that the main offices are located here, in a most beneficent manner. The day before Christmas they chartered a special car and about 50 of the employes were taken to Cincinnati and did not return to Chicago until Monday morning when they came in the same special car.

As the first of March approaches and the return of railroads to private hands, with its important effect on business, is considered, the trade is discussing the probable manner in which box cars suitable for grain and feedstuffs will be secured without the present universal system of allotment. Some point out that competition among the carriers will offset certain advantages of the present system in providing cars, at least approaching in number the amount required at any given point.

Old House Changes.

The old established firm McKenna & Rodgers, whose growing business in both the receiving and shipping of grain and feed materials has justified separate and special attention to these widely differing lines of business, announce the following changes: Edward P. McKenna and Luther S. Dickey, Jr., have formed a partnership as McKenna & Dickey and will occupy the present office of McKenna & Rodgers, 60 Board of Trade, Chicago. Christopher Strasser, associated with the old concern for a long time, will continue in charge of the receiving department.

It is never necessary to re-introduce men as well known as all of these, both in receiving and shipping trade circles. The transfer elevator at Matteson, Ill., well located in the Chicago district, with direct rails to Southern and Eastern markets, continues to be operated by McKenna & Dickey.

John A. Rodgers has organized a new company to be located at 59 Board of Trade, Chicago, as J. A. Rodgers & Co.

PHILADELPHIA.

Geo. A. Rudderow, Correspondent.

Exports of grain for the week ending Dec. 26 were 321,490 bus. of wheat.

H. D. Irwin, second vice-president of the U. S. Grain Corporation, gave a luncheon and musical entertainment to his employes on Wednesday afternoon last, which was a very enjoyable affair.

Receipts for the week ending Dec. 27 were 7,406,706 pounds of flour in sacks, 187,659 bus. wheat, 10,444 bus. corn, 127,259 bus. oats, 7,544 bus. rye, 1,743 bus barley, 27,500 bus. malt and 400 tons of feed.

The Grain Corporation also announces to the trade that the following change in their price of flour offers for export, that until further notice the price will be f. o. b. outgoing steamer, Atlantic ports, $10.75 per barrel for straight flour and $9.75 per barrel for clears.

The Trade is advised by the U. S. Grain Corporation that they make no purchases of flour this week. It is difficult to furnish shipping orders to mills owing to the congested condition of storage facilities for package goods at seaboard points. About 200,000 bbls. were offered.

W. M. RICHARDSON,
Grain Man and Baseball Magnate.

The new bar examination bureau recently organized by the Commercial Exchange to act in conjunction with the grain inspection department, will go into operation on Jan. 2 next. John Matthaei, the traffic manager of the Exchange, has been appointed supervisor of the bureau.

The U. S. Grain Corporation gives notice of a reduction of one cent per bushel in their prices of wheat f. o. b. steamer Atlantic ports, from the prices stated in their last letter of Dec. 19. This means to and including the 30th inst. their figure would be 11c over their buying basis, with 1c advance each ten days thereafter, the final prices actually being determined according to this schedule upon the date of loading.

The following out-of-town visitors were registered at the Commercial Exchange during the week: W. C. Ervin, head of the firm of W. C. Ervin & Co., grain shippers, Chicago; Harvey Knighton, representing flour and grain interests in Boston; H. A. Houston, Millsboro, Del.; Harvey C. Perry, Westerly, R. I.; Jas. K. Savage and S. E. Leedle, Hamburg, Pa.; H. W. Hilyard, Kenton, Del.; H. S. Kleingeman, Warren, Ohio; H. D. Billings, grain shipper, Tunkahannock, Pa.; W. A. Fennimore, Mt. Holly, N. J. At a special meeting of the Merchants' Warehousing Co. Geo. M. Richardson, grain broker, was elected treasurer and S. Townsend, Zook grain receiver, secretary and member of the board of directors. The newly elected secretary and treasurer will fill the offices of Jacob Michel, whose death recently occurred.

NEW FIRM ORGANIZED.

A. H. Simmons of Middletown, N. Y., J. W. Halliday of Unionville, N. Y., and H. J. Barndt of Binghamton, N. Y., announce that they have formed a corporation under the name of A. H. Simmons Co. to deal in feed, grain and flour as wholesalers and jobbers, with offices in the Gray Bldg., Middletown, N. Y., beginning January 1 and will be prepared to serve the trade in the above lines.

Visible Supply of Corn.

Official statement of the visible supply of corn in the U. S. weekly, compared with same weekly dates of previous three years:

LICENSE CANCELED.

Julius H. Barnes, Chief of the Cereal Division of the Food Administration, announces that he has revoked the wheat and wheat flour license granted to the Lawton Grain Co., whose main office is at Lawton, Okla., with fifteen branches in Oklahoma. This revocation took effect at noon, Dec. 27, and remains in effect until further notice, as regards the wheat and wheat flour transactions of the above company. Mr. Barnes says the revocation of this company's license is due to violations of the terms of Food Administration and Wheat Director licenses, particularly including their failure to properly reflect the guarantee price of wheat to producers, failure to furnish information requested by Mr. Piazzek at Kansas City, failure to make refunds to producers as ordered by Mr. Piazzek, and failure to keep proper records of wheat transactions.

Sioux City reports too much moisture in corn moving into that market recently. The average per cent in the corn marketed from Northwestern territory has been 17½ per cent and some samples testing up to 22 per cent. The market, however, is well provided with driers; the Western Elevator Co. alone has a capacity for 200,000 bus. daily. This drier went into operation about the holiday season and is expected to increase the volume of corn passing through the Sioux City market.

The grain grading exhibit by the Bureau of Markets at Concord, N. H., attracted considerable attention among local farmers.

An extension of transit privileges on grain and grain products from Kansas City and St. Joseph, which were in effect Feb. 21 to May 30, 1919, have been restored to include the period from Nov. 24 to Mar. 31, 1920, applicable to milling points in Texas.

Rains in France have been general throughout the central, northern and western part of the republic with an excess in some districts. The cold weather following the rains has been of some benefit to cereal crops where the rains were not excessive.

Flour Department

Reaching grain dealers who handle flour as a side line and for millers, flour brokers and distributors who wish to interest grain and feed dealers in the handling of their product.

The King Milling Co. has purchased the C. C. Proctor Mill at Front Royal, Va., and will take possession Jan. 1. Later on the capacity will be enlarged 1,000 bbls.

Ground has been broken for the new mill of the Whole Wheat Milling Co. at Sioux Falls. S. D. The mill will have a daily capacity of 1,000 bbls. and will be the first of its kind in Sioux Falls.

The W. P. Tanner-Gross Co. of New York will erect a large mixing mill at Baltimore, Md. The total sum to be invested will approximate $1,000,000 and the structure will be used for export, bulk and mill.

Mr. N. M. Zentz, owner and operator of a flour mill at Frederick, Md., and who has been in the milling business at that place for 40 years, last week tried the experiment of pulverizing sugar with his milling machinery. After passing through the grinders, the coarse sugar came out as smooth and as fine as flour, and little readjustment in the machinery was necessary to make the experiment a success. A ton of sugar was thus pulverized.

No Corporation Flour Offerings.

The United States Grain Corporation made no purchases of flour during the week of Dec. 24. It is difficult to furnish shipping orders to mills owing to the congested condition of storage facilities for package goods at seaboard points. About 200,000 barrels were offered. Standard pure wheat straight flour in carlots (310 bbls. minimum) in 140-lb. jute at $10.25, in 12-lb. and 24½ lb. paper at $10.43 and in 24½-lb. cotton at $10.80 per bbl. del. on track; and in less than carlots at $11.00, $11.15 and $11.55, respectively; prices same at all points in the country. The specifications under which this flour was bought read: Unbleached, well-dressed and properly milled of clean sound wheat. The variety will probably be soft winter wheat, but it may be from the Pacific Coast or it may be blended, but whatever the variety it will be good, honest, wholesome, pure wheat flour. It contains no substitutes.

Flour Production, Etc.

The Grain Corporation's weekly bulletin covering the wheat and wheat flour movement throughout the United States for the week ending Dec. 19 in comparison with the figures for the same period a year ago, was as follows:

	1919.	1918.
Wheat receipts—	Bus.	Bus.
From farms.....	10,140,000	10,227,000
Previous week.....	8,042,000	15,124,000
June 27 to Dec. 19..	635,624,000	632,037,000
Flour produced—	Bbls.	Bbls.
Week	2,715,000	2,437,000
Previous week.....	2,877,000	3,275,000
June 27 to Dec. 19..	70,445,000	60,032,000
Total stocks wheat—	Bus	Bus.
Elevators and mills.	257,817,000	256,274,000
Previous week.....	261,892,000	256,619,000
Change for week....	—4,075,000	—345,000

EXPORTS WHEAT AND FLOUR.

Exports of wheat and flour, July 1 to Dec. 19, amounted to 76,202,000 bus. of wheat and 8,127,000 bbls. of flour, making a total equal to 112,774,000 bus. of wheat, compared with 94,980,000 bus. and 8,852,000 bbls. last year to Dec. 19, the nineteen days of December being prorated from the monthly total, making a total equal to 134,815,000 bus. of wheat.

FLOUR MARKET.

The flour market continues inactive and no doubt was affected by the holiday season. In the Eastern markets trade is decidedly dull and movement is only on a moderate scale. Influences of the Grain Corporation's operations are beginning to be felt in the general uncertainty prevailing in the market. It is currently reported in the East that one well known company operating chain stores bought over 30,000 bbls. of the Corporation's straight on easy terms, 30 days' credit with the privilege of returning unsold flour. Other large jobbers having similar distributing facilities have also taken the Corporation's offerings. On other grades than the straight quality the price movement continues to be strong with an upward tendency. Flour men are predicting that ultimately there will be a great scarcity of springs which may force millers to blend their spring and hard wheats with the soft winter in order to make the crop reach.

Some Argentine flour has been imported and it is reported that 10,000 bales were recently offered at Baltimore at $12 per bbl. in 140-lb. jute sacks and it is expected that further offerings from Argentina are likely to be made to this country. The movement of flour and wheat from Canada has amounted to nothing so far, and the advance over night of 50c a bu. on wheat and corresponding on flour made by the Canadian Wheat Board will probably not facilitate the movement to this side, although the condition of exchange is such that any export movement from Canada to America would be very desirable from the Canadian point of view. Prices for both spring and hard winters were practically unchanged during the week but the soft varieties have advanced.

Corn products remain unchanged but catmeal shows a slight advance during the week.

FLOUR MARKETS.

CINCINNATI.

Cincinnati, Dec. 27.—The demand for flour continued fairly active during the week, but sellers were obliged to shade prices to conform with the straight winters sold by the Grain Corporation, and only favorite brands brought full values. Winter patent, wood, $12.25@12.50; winter straight, in jute, $11.25@11.75; spring patent, wood, $14.95@15.45; spring bakers, jute, $13.75@14.25; Kansas hard patent, wood, $14.30@14.55; Kansas hard bakers, jute, $13.10@13.30; corn flour, 100 sacks inc., $3.25@3.35.

TOLEDO.

Toledo, Dec. 27.—Flour production as reported by Toledo mills this week was 23,400 bbls. or 46 per cent of capacity against 28,800 bbls. previous week and 28,800 bbls. year ago. Despite steadily advancing markets in both wheat and flour a particularly active demand obtains in flour with no apparent sign of curtailment. Some millers are of the opinion that the high point for wheat prices has been reach and that there has been a tendency overstock. This was evident during t sale of Grain Corporation wheat when most a million bushels stored at Tole were exhausted in little more than week's time after it was released. Fre receipts here continue light, only 24 ca being received this week and only 8 these of contract quality. No. 2 red wi ter sold Saturday at $2.48½, track 2 rate point, with No. 3 red 3c less; No. white wheat, $2.46½. Flour prices ar Soft winter patent, $12; hard wint patent, $13.70; spring and winter blend patent, $13.35@13.40; clears, $10.30; lo grade, $7.50, carlots, halves cotton.

CLEVELAND.

Cleveland, Dec. 27.—At the present tir flour jobbing in less than carlots, halv in cotton, the following prices are bei quoted by the Cleveland millers and jo bers today: Spring wheat, $14.25@16; wi ter straights, $11.50@12; blended, $16.50 17.50. No United States Grain Corpor tion flour is as yet in this market, a though it is being advertised extensive as being for sale after the first of t year on the basis of $12 per barrel.

NEW YORK.

New York, Dec. 27.—The usual holid dullness prevailed in the flour market he last week, and little attempt was made do business beyond routine operation. Th undertone, however, was easier and some cases prices were reduced as mu as fifty cents per barrel. This was t direct result of the decline of cash whe in leading centers, and also of the ve marked falling off in the demand for fan ily flour which was followed by a corr sponding reduction in the demand f high grade wheats.

Mills were more anxious to do busine and were urging their representatives he to make sales. The low grade flours we in little better demand than the fan grades, and this was an illustration what was expected to occur on accou of the wide differences in values.

The Grain Corporation made no pu chases of flour on last week's bids owi to congestion at the seaboard, but a nounced that 200,000 barrels had be offered for sale. It also announced Saturday that it had sold to the Whe Export Co., which is the purchasing age for the Allied Governments, one millio dollars worth of flour which will shipped immediately from New York f the relief of Vienna. Spring wheat paten were quoted at $13.75 to $14.75; Kansa straights, $13@14, and soft wint straights, $10.50@11.

DULUTH.

Duluth, Dec. 27.—Bookings of new flo were reported by the mills to have be at a minimum during the last wee Millers are however filled up on old o ders and fair trade through the distri was reported. The mills are being han pered by the slow movement of wheat the terminals here and the difficulty in ob taining good spring wheat for mixin Quotations in car lots at mill are u changed as follows: Family patents, jut $14.60@14.80; bakers' patents, jute, $14.35 14.55; clears, $9.75@10; second clear $6.75@7.

MEMPHIS.

Memphis, Dec. 27.—Demand for flo continues good and mills are selling a their output readily. The market is fir and recent advances have apparent aroused the trade to the idea that pric are likely to have an upward tendency f some time. Millers are not disposed t sell very far ahead. There is good de mand for all by-products also.

Corn meal, however, is slow sale an mills are turning out far less than capac ity. The unsettled state of the corn ma ket seems to discourage buying. Cho and corn bran, however, are in good de mand, mixed feed makers taking all th are offered against bookings of busine for immediate shipment.

BALTIMORE.

Baltimore, Dec. 27.—There is a firm ton to the flour market, especially on har

winters and soft winters, but the advance n springs has been checked. Of course, is is always the case "between the years," he car lot demand at the moment is quiet, but after inventory time is out of he way, a better business in flour is ooked for. Quotations, per 98 lb. cotton or jute sacks, follow: Winter patent, $11.25@11.50; winter straight, $10@10.25; spring patent, $14.25@15; spring straight, $13.50@14.25; rye flour, pure to blended, $9@10.25.

PHILADELPHIA.

Philadelphia, Dec. 27.—Flour receipts or the week were 7,406,706 pounds in sacks. The market as usual at the last of the year is dull and nominal, buyers not disposed to stock up in excess of actual necessities, pending the settling of heir book accounts and taking stock inventories.

We quote per 196 lbs. packed in 140-lb. ute sacks: Soft winter straight, Western, $10@10.50; do., nearby, $10@10.25; hard winter straight, $12.50@13; do., short patent, $13@13.50; spring first clear, $9.75@10.25; do., patent, $13.50@14; do., short patent, $14.25@15; fancy spring and city mills patent, family brands, $15@15.35; rye flour, $8.95@9.25 per bbl in sacks, as to quality.

DETROIT.

Detroit, Dec. 27.—Mills report a slow demand for flour. The trade is all loaded up and mills are busy filling old orders. Little change is noted in prices. Quote: Fancy spring patent, $15@16; fancy winter patent, $13@14; second winter patent, $12.50@13; winter straight, $11.25@11.50.

MILWAUKEE.

Milwaukee, Dec. 27.—The local flour market was fairly active throughout the week and prices generally are slightly higher. Business has been of excellent proportions with a good demand from both domestic and export buyers. Millers report bookings good and expect to run free. The car situation is still a very restricting factor inasmuch as grains cannot be moved in and flour stock moved out in quantities. Spring patent wheat is 5@45c higher than last week, while straight has also improved 40c on inside prices and 25c on outside prices. The domestic call for rye flour has slowed up slightly while export demand is satisfactory. Prices on rye are higher, largely in sympathy with increase throughout the listings. Operations in the local mills were suspended on Christmas, making a comparatively short week and an appreciable loss in production. The local mills produced 15.400 barrels of flour during the past week, of which 12,900 barrels were wheat flour, or approximately 53.7 per cent of total capacity, and 2,500 barrels were rye flour. Current quotations, in car lots, per barrel, in cotton, are: Spring wheat patent, $14.85@15.50; straight, $14@14.25; first clear, $10@10.50; rye flour, pure, white, $9.75@10.40; rye flour straight, $9@9.25; rye flour, dark, $7@8.40. Corn flour is nominally quoted at $3.95; cornmeal, white, $3.85, and corn grits, $3.80, all in 100-lb. sacks.

NASHVILLE.

Nashville, Tenn., Dec. 29.—Business continues good at soft winter flour mills in the Southeast, there being little cessation in demand for the holidays. Sales have been large and the new year will be started with mills having large volume of business booked. Prices are strong at recent advances.

Nashville and Southeastern flour mills, with capacity of 218,040 bbls., had output last week of 170,415 bbls., or 78.1 per cent of capacity, which compared with 164,769 bbls. and 72.7 per cent the preceding week, and 54.9 per cent the same week in 1918.

Prices: High grade soft winter wheat patents, 98 lbs., cotton, f. o. b. Ohio river points, $12.50@13; standard, $11.35@11.70; straight, $11.10@11.25; first clears, $8.50@9.

BOSTON.

Boston, Dec. 27.—Prices of spring wheat and hard winter wheat flours are practically unchanged from last week, but soft winter wheat flours have sharply advanced in some cases as much as $1 a bbl. Current quotations, f. o. b. Boston, in carload lots, mill shipment, for 196 lbs., in 98-lb. sacks, are $14.50@15.50 for spring patents, $15.50@16 for special short patents, $9.50@10.50 for spring clears, $12.55@15 for hard winter patents, $11@11.50 for soft winter straights, $11.50@13 for soft winter patents, and $10.50@11.50 for soft winter clears. Receipts for the week ending Dec. 29 were 19,840 bbls.

KANSAS CITY.

Kansas City, Dec. 27.—Declining prices of wheat and holiday dullness have shut off the demand for flour. Mills are catching up with old orders. Stocks in domestic channels are supposed to be large. There is hope of a good export demand in event of early peace ratification and establishment of foreign credits in this country. Production of flour in Kansas City for the week was 74,200 bbls., showing a reduction of 13,300 bbls. A year ago the output was 33,800 bbls.

Following are the Kansas City prices of flour in carlots, sacked in 98-lb. cotton bags, per bbl.:

Hard wheat—	Dec. 27.	Dec. 20.
Short patent	$13.00@13.50	$13.60@14.45
Long patent	12.50@13.00	13.20@14.15
Straight	11.00@12.00	12.60@13.45
1st clear	10.00@10.50	10.60@11.10
2nd clear	7.50@ 8.50	8.50@ 9.50
Low grade	6.00@ 7.00	6.50@ 8.00
Soft wheat—		
Fancy patent	11.60@12.00	12.10@12.60
Standard patent	10.50@11.00	11.60@12.10
Straight	10.00@10.50	10.60@11.10
Clear	9.50@10.00	10.00@10.40
Low grade	7.50@ 8.50	7.00@ 8.00

PRICE OF CANADIAN WHEAT.

Effective on Monday last, Dec. 28, the Canadian Wheat Board raised the price of Manitoba wheat to mills in Canada 50c a bu., or from $2.30@2.80 for wheat in store at terminal elevators at Ft. William and Port Arthur. At the same time the maximum wholesale price of government spring wheat flour was lifted from $10.90 per bbl. to $13.15 f. o. b. cars Montreal. It was further ordered that in order to give the Canadian consumer the benefit of American prices on flour, permits will be issued for import of the American product.

MONDAY'S CORN MARKET.

The market gave evidence of liquidation having been pretty thorough and considerable over-selling, and it was in part the covering by the latter class of traders which caused the strong close. Receipts were fairly heavy but cash prices held well in most instances, our own market being called 1c higher to 1c lower. Peoria 1 to 3c lower, St. Louis unchanged to 4c higher, Omaha steady to 1c higher, Indianapolis 2 to 3c higher, Kansas City unchanged to 1c higher.—*Bartlett Frazier Co.*

In the central-western region largely tributary to Sioux City there were handled in October 50,699 cars of grain, as against 44,082 in same period of 1918. The number of livestock handled was 73,325 cars, against 60,131 in 1918, an increase of 9.2 per cent.

VISIBLE GRAIN SUPPLY.

The following table shows the stock of grain in bushels in public and private warehouses at the principal ports and in transit by water on the dates named, with comparisons, as compiled by the secretary of the Chicago Board of Trade for the week ending Dec. 27, 1919 (000 omitted):

In store at	Wheat.	Corn.	Oats.	Rye.	Barley.
Baltimore	1.133	53	339	115	14

WORLD'S WHEAT PRODUCTION.

On Dec. 23 the International Institute of Agriculture at Rome announced a final compilation of the world's wheat production for 1919 as 2,074,761,000 bus., or 92.7 per cent of the 1918 production and 96.5 per cent of the five-year average. This estimate is based on figures from fifteen countries furnished the Institute, which publishes the information through the American Bureau of Crop Estimates. The countries included were Spain, France, England, Wales, Scotland, Italy, Netherlands, Roumania, Switzerland, Canada, United States, British India, Japan, Tunis, Denmark and Algeria.

STOCK HOGS IN SOUTHWEST.

During the past fortnight St. Joseph, Mo., for the first time in the history of the local yards sold stock hogs, immunized, to go to feed lots in the vicinity of Ft. Worth. Recently a load of stock pigs was purchased at the same market for Custer Co., Okla., which was the first shipment of this kind made from St. Joseph to that state. Large numbers of stock hogs have been received from Texas and Oklahoma, but recent consignments from St. Joseph to the two states mentioned is a novel reversal of the usual traffic. According to those in touch with the situation, it indicates that the South has an abundance of feed.

FOREIGN

The Brazilian government has authorized the exportation of 65,000 bags of beans to Holland and Germany.

Estimates of the 1919 corn crops in Spain are: Corn, 624,000 metric tons; rice, 242,000; potatoes, 2,787,000.

Bonded stocks of wheat at French ports Sept. 30, 1919, were approximately 209,000 bus., compared with 564,000 a year ago.

Exportation of all corn and corn products from Ireland has been forbidden, except under license granted by the Department of Agriculture for Ireland.

The Imperial Legislative Council of India has announced that the present restrictions of exportation of wheat from India will not be withdrawn before the next harvest has been reaped, unless in the meantime there is a very considerable drop in local domestic prices.

The Rome correspondent of the London *Times* says the Food Controller has emphasized the importance of the fact that Allied coöperation in foodstuffs must continue in one form or another, owing to the uncertainty of proceedings at Washington, which make it impossible to look far ahead.

Supplies of both English and foreign linseed cakes in London at Dec. 1 were very limited and insufficient to meet the demand. Of cotton cake supplies were comparatively light and values firmer, practically $91 per ton for the best quality of English make and $90 for Bombay; gluten feeds about $95 a ton.

For the first nine months of 1919 France imported 54,493 tons of linseed against 14,271 tons same period a year ago. The quantity of foreign wheat and flour amounted as wheat delivered for consumption in France during the first nine months of 1919 were about 57,000,000 bus., compared with 52,000,000 same period a year ago.

Railway service on the lines leading to Odessa are still very disorganized and Black Sea steamship sailings very irregular. In the matter of the exportation of wheat, therefore, the authorities have decided that in spite of an abundant harvest they will adopt a waiting attitude to see what may be the demands of the liberated populations in Gen. Denikin's area.

The Belgian crop report for the month of October states that the weather was generally favorable for seed already in the ground and for autumn sowings which sprouted late. The acreage under winter barley has increased. Field mice, however, are reported doing great damage in the devastated areas and attempts at extermination of this particular animal by use of virus have not been successful.

It is reported from Paris that the French and British governments have come to an agreement in regard to transport facilities to insure to France the supply of wheat needed until next year's harvest. It appears that from the end of December until June France will require 154,000,000 bus. The North African colonies will furnish about 18,000,000 bus. and there are about 4,000,000 in store. The rest has to come from abroad.

There is a great shortage of wheat and wheat screenings suitable for poultry feed in England, and in order to increase the supply as much as possible millers are instructed by the Food Control Committee that they should so arrange the classification of their screenings as to insure that the maximum quantity suitable for chicken feed is made available and be sold in a suitable form for that use instead of being ground for offals.

There is an increasing demand for seeds in the Sao Paulo district of Brazil. The greater portion of the business is coming to the United States, although Italy, Portugal and Uruguay are usually the chief suppliers. In 1918 1,048,000 lbs. of seeds, bulbs, flowers and roots were imported through the port of Santos. The Brazilian tariff provides that vegetable, flower and field seeds for agriculture in general shall be admitted duty free. American seeds have been considered of excellent quality, germinating well in that country.

A desperate crisis in the food situation has arisen in Poland. Theoretically the government has a monopoly of grain for the purpose of supplying town populations and controlling prices, but it has been found impossible to control the sales of small farmers and there is therefore a very considerable trade which might be called contraband, under the circumstances. This fact is seen in the exorbitant prices for wheat bread and cakes. Government stocks of all breadstuffs have fallen to a very low ebb, being barely sufficient to feed the army.

The production of wheat in New Zealand for the last five years has annually decreased and the Threshing Machine Owners' Association insists that the falling off in production was due to the government interference with the wheat markets, which made farmers less inclined to grow wheat. It is also stated by Vice-Consul Winslow at Auckland that this year's crop will be very small and that the yield will probably not equal last year's returns. The area last year was 209,404 acres and the production 6,659,000 bus. Wheat was imported from Australia to the amount of 109,000 bus. to make up the deficiency of home production.

ARGENTINE EXPORTS.

Con.-Gen. Robertson, Buenos Aires, reports among other commodities the following exports from Argentina during the first nine months of 1919 in tons:

Destination.	Wheat.	Maize.	Linseed.	Oats.
U. S. ...	.....	241,683	255,542	.....
U. K. ...	185,124	396,654	102,435	15,190
France ..	100,275	38,899	27,109	23,564
Belgium .	108,756	110,515	36,062	12,856
Italy	105,919	28,963	.....	6,611
Holland .	212,523	77,578	69,930	6,701
Swe..Nor.	122,486	142,038	23,900	20,570
Denmark.	24,507	108,232	21,407	.....
Spain ...	165,754	52,175	800	1
Brazil ...	210,805	1,292	456	102
Orders ..	806,898	394,447	96,828	74,769
Other ...	67,949	62,999	4,999	.....
Total ..	2,110,996	1,655,475	639,468	160,364
1918	2,696,964	332,024	318,076	393,799
1917	792,506	743,572	94,799	247,991
1916	1,765,340	1,922,726	556,260	671,885
1915	2,403,445	3,211,882	797,636	512,649
1914	936,864	2,161,800	768,360	350,114

Flour exports were mainly to Sweden and Norway, 27,528 tons, orders 34,814 tons; Brazil, 130,951 tons; and others up to a total for nine months 1919 of 209,816 tons; 1918, 85,159; 1917, 69,627; 1916, 108,553; 1915, 91,730; 1914, 52,792.

MEAT EXPORTS.

During the same period the meat exports were as follows:

		Frozen		
Destination.	Tallow. Casks.	Beef. Qurts.	Mutton. Crcses.	Lamb. Crcses.

HONGKONG FLOUR TRADE.

Con.-Gen. Anderson, Hongkong, says that the statistics covering the import of flour of various kinds into Hongkong for the current year indicate the effect of high prices and especially short supplies and incidentally show the use of Asiatic substitutes for wheat flour. The flour situation in this part of Asia so far this year has been one of considerable anxiety not only by reason of general high prices but also in the matter of supplies at any price. From the beginning of the year stocks on hand have been small. Supplies came from Japan and North China earlier in the year, but the Japanese supplies ceased before the summer season commenced and the demand for Chinese flour from all over the Far East led to a gradual falling off in supplies in Hongkong from North China until by midsummer this part of Asia was compelled to depend upon Australia for its supplies. Since that time most of the imports of wheat flour have been from Australia. In the meanwhile local importers have increased their imports of rice meal and flour and similar substitutes for wheat flour and the statistics of imports of all kinds of flour for the first nine months of the current year show a great reduction in the imports of wheat flour compared with normal years—especially years of high-priced rice—and a great increase in the imports of other flours.

SOURCE OF FLOUR SUPPLIES.

The returns of the import and export office of the Hongkong government for the nine months ending Sept. 30 follow in bags:

	Rice flour and meal.	Wheat-flour. bran, etc.
Australia	.....	466,831
China	379	994,282
Indo-China	2,199,295	.....
All others	1,436,892	40,787
Total	3,636,566	1,501,900

The total of 1,501,900 bags of wheat flour compares very favorably with the small total of only 706,509 for the whole of last year, but of course is only a small portion of the normal imports, averaging something like 5,000,000 bags per annum in years previous to the war. Some of the decrease of imports into Hongkong, or rather a failure to return to normal imports, is due to the fact that the ports in South China have been importing most of their supplies of Chinese flour from North China direct to save duty, whereas in normal years with flour coming from the United States and Australia most of the flour going to such ports comes through Hongkong. For all that the trade is still far below normal and it will continue so until prices fall. The Chinese consumers cannot use flour at present rates.

FROST IN ARGENTINA.

Argentina had a hard frost on Nov. 19, but it created no stir in the grain trade, perhaps because the effects if any were not immediately known on 'change. But, says *The Times of Argentina*, "the frost hit areas carrying 41.2% of the wheat, 20.5% of the flaxseed and 80% of the oats. It cannot be thought for a moment that all the grain in this vast region has been destroyed, but, quite candidly, we shall be very pleased to see a half crop therefrom. Frost at this time of the year is the most perilous setback our crops could have, and we have had sufficient experience thereof not to permit our natural optimism to run away with us.

"The bright lining to the cloud is the fact that the frost does not seem to have extended to the North, and consequently we are still quite hopeful regarding the linseed yield and most of the northern wheat, which presents a magnificent appearance at present. Even assuming that one million tons of wheat, 200,000 tons of linseed and 400,000 tons of oats have been wiped out by the frost, we still have enough left to ship more than the average annual quantities," estimated at 800,000 tons, so that the country will not in any event be eliminated as a fairly large exporter. "Argentina," says *The Times*, "has large stocks of this year's wheat and maize still unsold, and even although the whole exportable surplus of crops were destroyed, which is practically an impossibility, we should still be able to maintain the present rate of shipment until the close of March 1920."

Foreign Importers, Manufacturers and Dealers

In the resumption of exports from the United States and Canada, it is desirable to be properly represented abroad for the distribution of grain, seeds, flour, millfeeds, provisions, concentrates and feedstuffs of all kinds. We suggest that correspondence be opened with the following specialists:

A. RAVAUD
Grain and Flour Agent
Offices: 1, Rue des ITALIENS
PARIS
Cable Address: "ARAVU;" Paris

T. F. HARCOURT
GRAIN & COMMISSION MERCHANT
Dealer in all kinds of Western Canada and Ontario grains and millfeeds; also specializing in American corn and milling wheat.
Royal Bank Building

LEAKING-DOOR CLAIMS

In the Matter of Claims for Loss at Leaking Grain Doors—The Railway Practice—How to Reduce Such Losses

By OWEN L. COON,
Attorney at Law, Chicago.

During the months of July, August, September and October there arrived in Chicago 2,572 cars leaking at the grain door or over the grain door. This amounts to nearly one-fifth of the total number of leaks discovered on cars during the same period. When it is realized that all claims for loss from this source are automatically refused by railroad claim departments under Order No. 57-A, one realizes the importance of the refusal of the railroads to take cognizance of this class of claims.

Order No. 57 of the Railroad Administration specifically ordered all railroad claim agents to refuse payment of such claims. The order was, however, amended by Order No. 57-A, which omitted the provision with reference to grain door leaks entirely. Not a word was said with reference to them. Claim agents were ordered to settle claims on the difference between loading and unloading weights when properly proven, with a deduction of one-eighth of 1 per cent wherever the car showed a "defect in equipment or seal record." The railroads, however, having educated the shipper to accept a refusal of a claim on grain door leaks, did not change their attitude, but continued to refuse all such claims, contending that a grain door leak was not a "defect in car equipment." Even since the order was changed, I have had shippers send me claim papers, with letters from the railroads attached, pointing out the provision of the original order with reference to a refusal of payment of grain door leaks, but making no mention of the fact that in the order under which they were then supposed to operate no such provision existed.

Since it appears probable that the railroads will go back into private hands in the very near future, this controversy is of value only because the railroads, having educated shippers to the fact that such claims will not be entertained, will undoubtedly persist in the application of the same rule and refuse all leaky grain door claims, though without any order such as they have had of the Railroad Administration to support them. The same rule will undoubtedly be applied; and it will be well for shippers to realize that the controversy will be present for probably some time to come unless shippers and carriers can by coöperation reduce the number of such claims.

It must be admitted that some of the fault for such leaks lies with the shipper who fails to properly cooper the car. But in many cases, as, for example, a case which Mr. B. F. Vorhees of Lisomb, Ia., has against the M. & St. L. R. Co. the fault lies in the failure of the railroad to furnish proper grain door material. What the shipper and the railroad alike should be interested in is the reduction of claims in every possible manner; and a little coöperation on the part of each might result in reducing the number of such leaks, about which inevitable hard feelings result.

The Rock Island Lines have apparently made an attempt in the right direction. All of their grain doors, I am informed, are of double thickness. This is vital; and if any railroad furnishes grain doors of single thickness, the shipper should promptly proceed to double them. If the carrier objects to the use of so many grain doors, either through the station agent or some superintendent, that will relieve you from any responsibility for loss resulting from the use of such number as the carrier prescribes. For example, E. E. Stribling of Dillsburg, Ill., on the Illinois Central, had been in the habit of doubling his grain doors. The station agent objected to the use of so many doors and instructed him to not double them. As a result he shipped about ten cars with single-thickness doors and every car showed a leak at the door. The carrier refused to pay the claims in the beginning, but when it was pointed out that the leaks occurred after following instructions given by the station agent, they were paid in full; and for the reason that any orders of this character given by the agent are the orders of the railroad. The railroad cannot dictate to you how to cooper your cars and then refuse to pay your claims if you follow their orders and suffer a loss. So I advise all shippers to double their grain doors, if doors of double thickness are not furnished. If the railroad objects to the use of so many doors, and you follow their instructions, they will have to admit their liability and pay the claims if loss results.

But merely doubling grain doors will often not prevent a bulged door and a consequent leak. The Rock Island Lines now instruct all their shippers to use three standard grain doors for each side door opening and then to apply a fourth grain door to reinforce the joints of the two bottom doors, the third raised about eight inches from the car floor. This is better than the use of a mere plank stationed upright and nailed to the doors for preventing a bulged grain door. The Rock Island Lines will pay any leaky grain door claim if it can be shown to them that their coopering instructions as set forth in part above have been complied with. Their contention is that if the above method of coopering cars is complied with one bulged grain door will not occur in a thousand cases.

But in many cases a leak occurs over the grain door. Grain inspectors are often to blame for this. They tear open a place sufficiently large to take out their sample of the grain and then do not close up the opening. When the car is moved to unloading point or to another market after the inspection is made, inevitable loss of grain over the grain door from the usual jolting back and forth occurs.

If the railroads would furnish a little better material in most cases, and then if the shipper would take a little more care in coopering by sufficiently nailing the doors in place and supporting the two bottom doors by a third door raised about eight inches from the floor, and the grain inspectors would close up the openings they make when removing their samples, we might bring about a condition of affairs in which we would not have 600 cars arriving on an average every month at the Chicago market alone with leaks at grain doors.

Oats in Primary Markets.

Receipts of oats in eleven primary grain markets from Aug. 1, 1919, with comparisons with 1918:

	1919-20.	1918-19.
Chicago	39,556,000	68,851,000
Milwaukee	14,020,000	23,775,000
Minneapolis	9,695,000	21,339,000
Duluth	443,000	2,670,000
St. Louis	12,180,000	11,366,000
Toledo	1,588,000	5,589,000
Detroit	1,084,000	2,036,000

BOOK RECEIVED.

We have received from Secretary Mayes of the State Board of Agriculture of Missouri the 55th annual report of that body, entitled "The Missouri Year Book of Agriculture," containing the usual crop statistics for the state of Missouri, also the transactions of the Board for the year, making all told a very interesting volume.

Burlap Market.

The *S.S. City of Benares* brought into New York last week a cargo of burlap and jute consisting of 4,107 bales burlap, 281 bales burlap bags, 8,288 bales jute, 1,460 bales jute cuttings and 250 bales jute butts. The market has been rather quiet as the year draws to its close, and no special features merit mention at this time.

Field Seeds

Out of a total of 600,000 of tons of linseed exported by Argentina in 1919 up to Dec. 15, 350,000 tons were consigned to the United States. This compares with 4,500 tons for the 12 months of 1913.

Farmers in Cass County, N. D., are importing Kubanka durum seed. The first of three cars was unloaded at Casselton just before the holidays. Another car is to go to Wheatland and the third to Fargo for distribution.

A South Dakota Experiment Association has become affiliated with the International Crop Improvement Ass'n recently organized at Chicago. The object of the association is to afford an easy means for the interchange of information for the dissemination of pedigreed seed.

Alfalfa seed grown in the lower Yellowstone Valley is selling at a premium over other varieties at Fairview, Mont., where about $50,000 of the Grimm variety has been sold this season up to the middle of December. Hardy Brothers, A. F. Nohle and A. D. Morrill of Fairview are among the largest local producers.

The storage warehouse of the Rudy-Patrick Seed Co. was recently destroyed by fire with a loss of $150,000. Insurance totaling $125,000 was carried on the grain and $25,000 on the building and it is deemed very probable that the plant will be rebuilt for remodeling plans had been considered for some time past. Origin of the blaze has not been determined.

An eastern Illinois seed dealer writes C. A. King & Co., Toledo, that the demand for clover seed will probably continue slow until the middle of January. Then it should be heavier than usual as the crop in his neighborhood was a failure and very little seed had been bought up to the holidays. The farmers are buying everything else that is high and of course will buy the seed.

Louisville Seed Market.

LOUISVILLE, KY., Dec. 27.—Demand for seeds has picked up somewhat and leading jobbers report that they are very busy in making early shipments, and have good orders on hand for delivery in January. Prices are firm. Bluegrass is in fair demand, with timothy fair, redtop active and red clover and alsike in good demand.

Quotations are: Bluegrass, 21-lb. seed, $27.50 a hundred; 19-lb. seed, $26.50; orchard grass, $21@24 a hundred, according to quality, averaging $3.15@3.50 a bushel; timothy, $12@12.50 per hundred; redtop, $22.50 a hundred; red clover, $52.50 a hundred; alsike, $53.50 per hundred. Soy beans are quoted at $4 a bushel, and cowpeas $4.50 @5.50.

Toledo Seed Movement.

Following is a comparative statement of receipts and shipments in bags of forage grain seeds at Toledo for week ending Dec. 27:

	Red clover.		Alsike.		Timothy.

Chicago Seed Market.

The timothy market was an advancing one the past week, both the cash article and the futures recording gains during the trading sessions. Clover was also strong in tone and continued the upward tendency of previous week. Some sales of alsike were made at $36. Daily range follows on the two grass seeds, timothy and clover:

	Dec.	March.	
Timothy—	B.	B.	A.
Dec. 22.....	$12.30	$12.85	$.....
Dec. 23.....	12.35	12.75	.....
Dec. 24.....	12 35	12.80	13.00
Dec. 26.....	12.50	12.85	.....
Dec. 27.....	12.50	13.00	13.25

Cash seed range for week, $11.40.

Country lots—Poor to fancy, $8.50@11.50; fair to good, $10@11; choice, $11.25.

Clover, contract prime—

Dec. 22.....$51.20 | Dec. 26.....$.....
Dec. 23..... 51 30 | Dec. 27..... 51.30
Dec. 24..... 51.30

Cash sales seed, $38@46.

Clover, country lots—

	Poor to choice.	Fair to good.
Dec. 22.....	$30.00@48.00	$43.00@46.00
Dec. 23.....	30.00@48.00	43.00@46.00
Dec. 24.....	30 00@48.00	43.00@46.00
Dec. 26.....	30.00@48.00	43.00@46.00
Dec. 27.....	30.00@48.00	43.00@46.00

Other seeds — Buckwheat, $2.90@3.25; Hungarian millet, $3.75@4.25; hog millet, $2.75@3; Siberian, $2.75@3.

ST. LOUIS SEED MARKET.

ST. LOUIS, Mo., Dec. 27, 1919.—The seed market is affected with the usual holiday dullness, but prices are well sustained, and a good business is looked for after the first of the year. Offerings of spot seeds continue light, and consist mainly of poor quality millet and sunflower seed.

Quotations are as follows: Clover, per 100 lbs., high-grade seed, free of buckhorn, $48@49; average country lots, $36@43; buckhorn-mixed, $23@30; poor, $5@20, according to quality; alsike, high grade, $48@50; fair to choice, $40@45; poor and chaffy less, according to quality; timothy, choice, clean seed, $11@11.50; average country lots, $10@10.75; low grade, $8@10; redtop, fancy, solid seed, $18@19; machine cleaned, $12.50@17.50; poor and chaffy less; millet, golden, $2.75@3.50; Siberian, $2.75@2.85; hog millet, $2.80@$2.90; common millet, $2.75@2.85, bulk basis.

Sunflower seed, choice, dry, sound seed, $9.50@10.50 per 100 lbs.; damp, stained or musty, less, according to quality. Most of the offerings are of off-grade seed.

Toledo Seed Prices.

The following table shows the range of prices for seed on the Toledo market for cash and the futures of clover, alsike and timothy seed for the week ending Dec. 27:

	Rng. for wk. High.	Low.	Close Dec.27.	Close Dec.20.
Clover—				
Cash and Dec.	$30.80	$30.75	$30.80	$30.70
January	30.85	30.70	30.80	30.65
February	30.95	30.75	30.90	30.70
March	30.85	30.55	30.80	30.50
Alsike—				
Cash and Dec.	32.35	31.10	32.35	31.10
March	32.35	31.00	32.35	31.00
Timothy—				
Cash, old.....	5.75	5.52½	5.75	5.52
New and Dec.	5.75½	5.70	5.87½	5.70
March	6.00	5.85	6.00	5.85
April	6.00	5.85	6.00	5.85
May	6.02½	5.87½	6.00	5.87

Buffalo Seed Market.

Grass seed prices as of Dec. 26 at Buffalo were as follows: Timothy, ch., $5.40@6.80; clover, red, ch., $29@30; alfalfa, $17@18 per bu.; alsike, $25@26; white clover, $52@53 per cwt.

Milwaukee Seed Movement.

Movement of seeds at Milwaukee during week ending Dec. 27, 1919, reported to PRICE CURRENT-GRAIN REPORTER by H. A. Plumb, secretary of the Chamber of Commerce:

	Receipts. 1919.	1918.	Shipments. 1919.	1918.
Timothy, lbs.....	.....	.....	30,000	64,125
Clover, lbs.....	43,624	17,603	203,422	.....

KANSAS CITY SEED MARKET.

KANSAS CITY, Dec. 27.—New year business in seeds is viewed optimistically by Kansas City dealers, especially those who had the nerve to lay in stocks regardless of high prices. Supplies of timothy and bluegrass seed are plentiful. Alfalfa and red clover seed are in light supply. There is plenty of white clover seed at a discount of $15 to $20 per cwt under red. Movement of cane, millet and Sudan grass seed is due and may be large if car service permits. The Sudan grass seed crop of Kansas should be liberal, as the crop showed three times the usual acreage. There have been liberal marketings of hog millet from Colorado and some Siberian and common from Kansas. The cane seed crop of the Southwest is supposed to be of liberal proportions, similar to those of kafir, milo and feterita.

Seed quotations in Kansas City are as follows, as from first hands:

Alfalfa—Per cwt., $26@35.

Timothy—Per cwt., $9@10.50.

Bluegrass—Per cwt., cleaned, $20@30.

Clover—Per cwt., red, $35@45; sweet, $20@25.

Millet—Per cwt., German, $3@3.25. Siberian, $2@2.25; common, $1.75@2.

Sudan—Per cwt., $9@11.

Cane—Per cwt., redtop, $2.50; orange, $2@2.25; amber, $1.75@2.

DULUTH FLAXSEED MARKET.

DULUTH, Dec. 27.—A feature in the flaxseed market during the last week was the narrowing in the spread between the December and May futures to 17 cents, as compared with 52 cents on the previous Saturday. The old December future declined 42 cents during the five trading days, while May only broke 7 cents. The slump in the December future set in on Tuesday, when it ran off 13 cents, and the weakness was further extended on Wednesday when the break reached 20 cents. The market was off 2 cents on Friday and a firming up of 2 cents came on Satday. The slump was initiated through attempts of holders of December contracts to unload, and deliveries having been on a larger scale than had been counted upon.

Weakness in the Buenos Aires market and the expression of members of Duducing qualities.

Receipts of flaxseed on the Duluth luth Board of Trade in favor of making No. 3 flaxseed, wherever grown, deliverable on contracts at a penalty of not more than 2 per cent, was another weakening influence. Cognizance was also taken of the fact that a meeting of the State Grain inspection board will be held at St. Paul on Jan. 6 for the purpose of setting flaxseed grades for the season. It is thought quite likely that Argentine flaxseed will be accorded a special grade based on its oil promarket last week aggregated '49,038 bus., as compared with only 17,248 bus. during the preceding week. Stocks in the elevators on Saturday were reported at 99,000 bushels.

Closing prices of flaxseed on the Duluth market on Saturday, as compared with the previous Saturday and the corresponding period last year were:

	Saturday.	Wk. ago.	Yr. ago.
On track.....	$4.62-5	$5.04-14	$3.55
To arrive.....	4.62	5.00-09	3.52
Old December..	4.52	5.04	3.50
New December	4.62	5.00	....
January	4 62	4.94	3.51
February	4.52	4.84	....
New May.....	4.44	4.50	3.58½
Old May.....	4.45	4.52	....

1.35. It is now just 40c under the highest point made by red clover when the latter touched $32.75 for the October option on July 29, 1919. Despite the pending holidays when quietness usually prevails the seed market in all divisions was a surprise to many this week. Alsike is becoming more popular as the trade realizes its real value as a substitute. There has been much talk of alsike scarcity, especially the better grades. Receipts here this week were 322 bags, of which 321 were n. e. g., and 1 bag tailings; the season's total receipts are 7,607 bags, compared with 5,260 bags last season; 6,213 bags two years ago and 6,333 bags three years ago. Stocks here are 6,665 bags, as against 3,909 bags at this time last season.

Red clover was steady and stronger this week, with most of the advance in deferred futures. Nothing particular in way of demand is expected until after the new year when the Southern demand begins, with the big demand from the East in February and March. How much of the eastern demand will be satisfied by imports of foreign seed is an interesting factor. Our high prices and glitter of the good old American dollar are attracting much seed from Europe. French are anxious sellers. Imports at New York must be reckoned with. They were 2,142 bags this week. Toledo reserves are light. Stocks decreased this week, only 356 bags received and 644 bags shipped. They are 9,271 bags, as compared with 15,274 bags at this time last season. Season's total receipts are 13,611 bags, against 20,823 in 1918; 11,868 in 1917, and 40,853 in 1916. Timothy made further advances this week, deferred futures reached $6. No particular factor was apparent except for a good demand and active trade all week. Optimism was generally injected into the situation as regards export business with the passage of the Edge bill this week. Receipts here were good at 1,700 bags, all of which graded prime. Stocks increased and are now 98,849 bags, against 108,929 bags at this time last season.

OHIO SEED TESTING COURSE.

Free seed testing demonstrations for farmers and seed dealers will be a feature of the Farmers' Week program at Columbus from January 26 to 30. Two hours (from 8 to 10 o'clock) each day will be devoted to the work. The period on Monday will be used for registration; on Tuesday to germination tests of grass and clover seed and identification of grass seeds; on Wednesday and Thursday to the identification of legume and weed seeds, respectively; and on Friday to practice in testing. Persons interested are requested to register in advance.

Grain grading demonstrations will be given each afternoon.

In addition to the demonstrations, lectures on cereal crop improvement will be given by faculty members to the College of Agriculture. On the last day, membership in the Hundred Bushel Corn Club of Ohio will be conferred on ten farmers.

The Ohio State Corn and Grain Show will be held the same week. The Ohio Grain Dealers' Association is offering a new trophy for the best exhibit by members of the state Men's 10 Acre Corn Contest.

Programs for the week may be had of the Agricultural College Extension Service, Columbus, Ohio.

Seed Trading at Toledo.

Toledo leads the world on seed futures. There are many large dealers elsewhere but nearly all hedge or trade at Toledo. Many do not appreciate the opportunities of having an open market where you can always deal when you are so disposed. It helps producers and consumers because it enables them to get together and take advantage of the numerous fluctuations which occur every season. It provides a demand when farmers are generally anxious to sell, which frequently occurs soon after harvest. It provides a supply when consumers want it without causing extreme fluctuations. It acts as a stabilizer.

All trades in futures are based on 2½ bus. to the bag. You can load more in the bags but the surplus over or under that amount is settled for on the price the day of delivery. Years ago the amount in the bags was all delivered at the contract price. In other words, if you bought October at $30 and prices declined to $25 before delivery, you would probably get a big surplus above the 2½ bus. If the price advanced to $35 before delivery, you would be liable to get less than 2½ bus. to the bag. In other words, trades are made in a fixed amount so that the fluctuations in the market are of no importance. It is the same when you sell after buying. Then you are paid for the surplus above the 2½ bus. at the price on the day of delivery. It is always fair to both buyers and sellers. No market could endure unless it was always fair and honorable. Good reputation is the greatest asset any market or firm could have.—*C. A. King & Co.*

Argentine Linseed.

The market has ruled fairly nervous during the week of Nov. 17, especially in linseed, which is the prime gambling counter of the country at th present moment, and is affected h every passing breeze. There are r ports circulating to the effect that th U. S. Government has decreed a max mum price for linseed, in order to pu a stop to the speculation which is g ing on up there. For the time bei we should not like to say what th market will do in the immediate f ture, but we can at least say that th crop outlook is decidedly good, an there are prospects of Argentine rea ing 1,000,000 tons for export. And w cannot think that when this hea supply comes on the market prese values will be maintained. It may

Seed Season

Will Soon Be Here

Small's brands are fast being recognized as dependable, and this is your strongest argument with Mr. Farmer whose business you expect from year to year.

Sell him Small's seeds and he is your customer forever.

Put up in bushel bags making a hit with the farmer.

Small's seeds are properly bought, cleaned, graded and bagged in convenient lots.

aid that the recent rise in spot lin-ed has been due more to forced buy-ng than to any other cause, and when hippers are out of their difficulties they ill leave the linseed to be held up by he speculative element.—*Times of Ar-entine.*

CLOVER SEED AT TOLEDO.

Clover seed was steady and higher st week, which was rather remarkable the face of the holidays and the sual dullness expected. It is dawning many that this country is short of ld seeds except timothy and gradual rdening of prices resulted, but high ices don't seem to induce fortunate olders to sell.

Europe must be reckoned with, not a buyer but seller. The exchange fa-rs its coming this way. There is talk more or less seed still over there at will reach these shores in time to tch our spring business. If true it is t likely to have immediate effect, but ill later compete with domestic stuff. oledo, the barometer of prices, has e smallest stocks for this time in any a season. So little is here it's rdly reckoned as a factor. Other arkets or interior dealers have out-d us, or the stuff is not there. Most ports say bulk of it has left the farms nd what is left will be traded amongst e farmers.—*J. F. Zahm & Co.*

Toledo Seed Market.

Alsike led the seed procession last eek; advanced over a dollar to around .50 over clover. There was, say outhworth & Co., a good general de-and and strong market, with light ferings. Export demand also good. he reason for increasing popularity alsike in these high cost days is the ct that it goes nearly twice as far as ver in sowing. It's also a stronger, rdier plant that takes better root an clover and makes a better stand. creasing realization of these facts is here are still some shortages in De-mber alsike contracts, and a good deal using more alsike sowing than before. seed likely to be delivered between w and the end of the month. Some ll be traded over. Receipts 322 bags, ipments 71 bags.

Clover was higher, with most of the ength in the deferred futures. Timo-y continued to advance with good de-and and active trade and good export mand, and more of it anticipated on count of passage of the Edge bill.

MINNEAPOLIS FLAXSEED MARKET.

MINNEAPOLIS, Dec. 29.—There was nsiderable improvement in the de-and for spot flaxseed in the past few ys and offerings are well taken. More ed is arriving on the market at pres-t, but considerable is being taken on l to arrive trades. Fresh offerings to rive are very light. Crushers are op-rating partly on Argentine seed, at ast one company crushing that kind most entirely. Oil contracts are com-g due quite freely and with a few re cars available the crushers find eater use for the domestic seed that rives on the market. Futures are lding in a narrow range.

Exports of Corn.

The exports of corn from principal ited States ports, as reported by the ief of Bureau of Statistics of the partment of Commerce, for each nth, for four years:

Beans and Potatoes

New Asiatic Beans.

Postal advices from Dalny state that the new crop of Manchurian beans is appearing on that market, but the crop generally is very poor and in some districts only 30 per cent of the normal was harvested. Excessive rain caused the skin to discolor with a consequent deterioration in quality.

BEAN SITUATION.

BEANS A PROBLEM.

ST. JOHNS, MICH.—The bean situation is a conundrum. The market is very strong at the present time, but it is mostly in the state. While there has been some outside demand, there are practically no sales. In other words, it has been a purely speculative market. However, conservative estimates show that two-thirds of the Michigan crop has gone out of the market and the beans held back are in strong hands. Farmers are inclined to look for higher prices, considering the present prices low; and we agree with them.

We understand that none of the new crop Kotenashi have been put on the market and that they are asking fully $1 per 100 more than for the old crop. Recent exportations seem to have cleaned up most of the colored beans and a lot of the Kotenashi and old crop Californias out of the Eastern warehouses. This should have some effect upon the market, but as yet there has been no demand from that section. Personally I do not think we will have any real advance until the New England states get to buying Michigan beans. They have been handling Kotenashi beans for nearly a year and seem to prefer them at the same price. —*Geo. F. Dimond & Co.*

BEAN AND POTATO PRICES.

The potato market generally was an advancing one during the past week. This condition was also true of the bean market. Quotations follow for lots of good quality and condition beans and potatoes, sacked, per cwt., unless otherwise specified, as of Dec. 27:

Beans—

Boston—Lima beans, $14@14.50.

Buffalo—Marrows, $10@11; mediums, $7@8; pea, $7@8; white kidney, $11@12; red kidney, $12@13.

Chicago—Pea beans, hand picked, ch. to fancy, $7.50@8; red kidney, $13.50@13.75.

Cincinnati—Navies, $8.

Denver—Pinto beans, $6@6.50; navies, $8@8.50; limas, $13@14.

Detroit—H.-p. pea beans, $7.35.

Los Angeles—Limas, $15@17; pinks, $7.50; white, $7.50; black eyes, $7.50; Garvanzas, $12.

Minneapolis—Navies, h.-p., fancy, $9.00; soy, $5; Cal. limas, $11; brown, $6.

Montreal — The market is quiet but steady, car lots of Ontario handpicked being quoted at $5.25 to $5.50. Two to three-pound pickers are quoted at $4 to $4.25.—Trade Bulletin.

New York—Marrows, ch., $11@12; com. to fair, $10.50@10.75; pea, ch., $7.75; com. to fair, $7@7.50; Lady Washington, Cal., ch., $7.75; sm. wh., Cal., $7.75; Kotenashi, $6.75; red kidney, ch., $13@14; com. to fair, $10.50@12.75.

Pittsburgh—Limas, $15.50; Cal. navy, $7.50@8; Mich., f. o. b., $7.50.

San Francisco—Bayo, cwt., $9.00; black eye, $6.50; cranberry, $7.25; Garbanzo, $8.50; lima, f. o. b., $13; Henderson, $11.60; pink, $6.35; red kidney, $12; red Mexican, $7.75; teparies, $3.25; white, lg., $6.25; white, sm., $6.40.

St. Louis—Quote white beans in car lots—Choice, hand-picked Michigan at $7.75 per 100 lbs.; prime machine-picked, $7.50; orders and small lots, higher; pinto beans, $7; California black eye, $8; choice lima beans at $16; California pink beans at $8, and white, $8.50.—Market Reporter.

Potatoes—

Buffalo—Round No. 1, per bu., $2@2.10; fair to good, $1.80@1.90; small or over large, $1.60@1.70.

Chicago—Wis.-Mich., rnd., wh., blk., $3.40@3.50; skd., $3.30@3.40; Idaho rnd., wh., $4@4.15.

Denver—F. o. b. loading stations, Idaho Russets, $3.25@3.50; Idaho rurals, $3.30 3.40; Red McClures, $3.40@3.50; wh. stk., $3.25@3.40; brown beauties, $3.40@3.50.

Detroit—Mich., 150 lb., $5@5.25.

Karsas City—Minn. Red River, Ohio, $3.50@3.60; northern wh., $3.20@3.30; western wh., $3.35@3.45; russet burbank, $3.50@3.65.

Minneapolis—Wh., $2@3.20, f. o. b.; burbanks, $3.20@3.25; Red Rivers, $3.15.

Montreal—Receipts last week were 1,381 bags, against 8,092 bags the week previous, and 605 bags last year. The market is firm and advancing under a very good enquiry, and sales of car lots have been made during the past week at $2.30 to $2.40 per bag of 90 lbs. for good to choice cars of white Quebecs.—Trade Bulletin.

New York—Me., 165-lb. bg., $5@5.65; Jer. rnd., 165-lb. bg., $4@5; L. I., 165-lb. bag, $5.25@6; N. Y. State, $2.50@3.25, cwt.

Pittsburgh—York State, 150-lb. sk., $5.15; Pa. rnd., wh., blk., $3.35; Mich., blk., $5@5.15; McCormicks, $4.60; Canadian, 150-lb. sk., $5.

Rochester—N. Y. State, $1.65 per bu., field run, Jan. contracts, $1.85, to grower; No. 1 U. S. grade, $3.18, cwt., f. o. b. station.

St. Louis—Wis. rurals, $3.50; Minn. burbanks, $3.50.

RECEIPTS AND PRICES OF RYE.

Receipts of rye at the principal primary markets of the Central West for the week ended Dec. 26, and for the corresponding week last year, as compiled by the Minneapolis *Market Record*, were:

	1919. cars.	1918. cars.
Minneapolis	120	433
Duluth	167	111
Chicago	63	133
Omaha	24	62
Milwaukee	76	67
Total	450	806

Closing outside prices of rye of standard quality and spot cash for each day of the week beginning Dec. 19, were:

	Mpls.	Dul.	Chi.	Oma.	Mil.
Dec. 19..	$1.72⅝	$1.73¾	$1.77	$1.67	$1.80
Dec. 20..	1.73⅜	1.74⅛	1.76½	1.68	1.77
Dec. 22..	1.72⅞	1.74⅜	1.76½	1.66	1.78
Dec. 23..	1.76⅝	1.77¼	1.79	1.70	1.81
Dec. 24..	1.76½	1.78⅞	1.81½	1.71	1.82
Dec. 25..	Holiday.				
Dec. 26..	1.75	1.76¼	1.82	1.73	1.81¼

Armour & Company in their weekly review of trade on Dec. 26 say that "Hog prices showed some irregularity during the week but with little change from the week before. Domestic trade for the cured product was affected by the holiday season, but continued good trade is to be anticipated. The comparatively low price of fresh pork cuts created an unusual demand, and we report the trade very good in consequence, with prices steady."

Barley

Chicago Barley Prices.

Following is the daily range of barley, spot malting quality and future quotations at Chicago:

Dec. 22....	$1 55@1.68	Dec. 26....	$1.56@1.62
Dec. 23....	1.55@1.68	Dec. 27....	1.40@1.56
Dec. 24....	1.50@1.66		

	December.	May.
Dec. 22.....	$1.66 @1.69¾	$1.54@1.57⅜
Dec. 23.....	1.69 @1.70	1.55@1.56½
Dec. 24.....	1.65½@1.69	1.55@1.57
Dec. 26.....	1.60 @1.63	1.54@1.56½
Dec. 27.....	1.54	1.46@1.52

Exports of Barley.

The exports of barley (bus.) from principal United States ports, as reported by the Chief of the Bureau of Statistics of the Department of Commerce for each month, for years named, were as follows (figures for current month being subject to correction):

Mos.	1919.	1918.	1917.	1916.
Jan.	933,124	1,424,072	1,662,118	3,213,277

BARLEY MARKETS.

MILWAUKEE.—The local barley market was comparatively dull and weak and prices declined 8@12c for the week. Although receipts were light, the market continued well supplied, as industries and shippers are doing little. Receipts for the week were 112 cars, against 125 cars a week ago and 131 cars in 1918. Current quotations are: Good to choice, 48 to 50-lb. test, is quotable at $1.58@1.60; bright, $1.61@1.62; fair to good, 45 to 47-lb. test, $1.48@1.57; low, 41 to 44-lb. test, $1.45@1.53; 36 to 48-lb., $1.40@1.48; feed, $1.40@1.50.

DULUTH.—The barley market was lifeless here during the last week. Receipts amounted to just two cars against 28 during the same period last year, and operators had no advices of any of that grain having been shipped in from the country. Stocks in the elevators were down to 15,000 bushels. Quotations were unchanged at $1.30@1.57 for spot.

BUFFALO.—Maltsters were in the market, but the prices asked for the few lots here were considered too high. Chicken feed mixers here cut it out of their feeds, as it is too expensive and as a rule they want a good grade or more. Quoted: Malting, $1.65@1.72, and feed $1.50@1.60 on track.

CHICAGO.—The barley market during the week was a buyers' affair strictly. Previous to the Christmas holiday offerings were comparatively light but the demand was even less urgent and in consequence prices declined from 1@3c, maltsters taking only a very few cars, although there was some improvement in the domestic and export demand. After the Christmas holiday, however, the market practically collapsed. Offerings were very much larger but there was very little demand from local buyers and there was very little domestic and no export demand at all. The net shrinkage in prices for the week, therefore, range from 6@13c, according to quality. The present week opened with a soft undertone. Malting demand, however, was better, especially earlier in the day, and some choice grades were taken at Saturday's prices but the poorer grades were again weak and down from 2@3c. Receipts were heavier and domestic demand only fair. Twenty cars were reported sold at a range of $1.38@1.56. Futures were lower, December closing at $1.51, against an opening of $1.55, and May at $1.46½, after selling up to $1.49. Exports from Atlantic ports were 436,000 bus., compared with 534,000 a year ago.

KANSAS CITY.—Offerings of barley increased to 77 cars for the week, the largest volume on the new crop. Though the demand was good, with shipments mainly to Milwaukee and Chicago, for use in feed manufacture for eastern trade or for making export mixtures, prices reflected the weakness of corn and broke about 5c a bushel. No. 3 closed at $1.45, No. 4 at $1.42 and sample grade as low as $1.24. Much of the barley sold was of the lower grades. There was a limited demand from southwestern feeders and local mills took some for meal manufacture. Stocks here decreased 9,000 bus., to 117,000, against 235,000 a year ago. Ground barley feed was quoted at about $3@3.10 per cwt., in sacks.

MINNEAPOLIS.—The recent turn in prohibition news caused a sharp decrease in the demand for barley and prices declined sharply. For the past few days the demand has been sluggish to dull and bids declined sharply. Offerings are a little heavier than they were owing to the better car situation.

English home grown barley has been in request all fall at steadily appreciating prices. The *London Grain & Seed Reporter* says that maltsters are apparently willing to pay any figure for best malting qualities and are paying abnormally high prices for qualities which a year or two ago they would not have touched at any price. Sales so far this season are more than double those of the same period last year and both growers and dealers have found this cereal a very profitable commodity.

SENTIMENT IN THE MARKET.

Sentiment in the grain markets on Monday was exactly the reverse of that which prevailed on Saturday. The factor which was more instrumental than anything else in changing sentiment from the bear side to the bull side, was the announcement that the Canadian government had ordered the price of wheat advanced 50c, from $2.30 per bu. to $2.80 per bu. Canadian spring wheat flour also was advanced in price from $10.90 to $13.15. On the surface this was a bullish factor, in the general grain market, but those in touch with the situation believe that the United States will now be permitted to import some Canadian spring wheat, and that in return we will sell to Canada some of our Government flour. This will give the United States some much needed spring wheat, and will give Canada cheaper flour, a reciprocal arrangement which will work for the mutual benefit of both countries, but which should have no important effect on the grain markets in general. Another bull factor was found in the statement by a British member of Parliament, that the world would be compelled to look to the United States for meat during the coming year; while still another appeared in reports from all sections of the country that farmers refused to sell corn after the recent break.—*L. L. Winters with Hulbard, Warren & Chandler.*

Corn in Primary Markets.

Receipts of corn in eleven primary grain markets from Nov. 1, 1919, to Dec. 27, with comparisons with 1918:

	1919-20.	1918-19.
Chicago	11,934,000	12,825,000
Milwaukee	1,891,000	967,000
Minneapolis	2,551,000	1,111,000
Duluth	.....	5,000
St. Louis	3,793,000	3,769,000
Toledo	450,000	236,000
Detroit	393,000	483,000
Kansas City	1,848,000	2,710,000
Peoria	4,561,000	5,672,000
Omaha	3,448,000	3,576,000
Indianapolis	3,728,000	2,878,000
Total	34,597,000	34,232,000

Receipts of corn the past week at primary markets, compared with the preceding week and corresponding week last year:

	Dec. 27, 1919.	Dec. 20, 1919.	Dec. 28, 1918.
Chicago	1,634,000	1,597,000	593,000
Milwaukee	316,000	319,000	100,000
Minneapolis	677,000	397,000	256,000
Duluth	.....	.....	.....
St. Louis	514,000	566,000	235,000
Toledo	71,000	90,000	42,000
Detroit	39,000	50,000	36,000
Kansas City	252,000	382,000	395,000
Peoria	542,000	422,000	271,000
Omaha	577,000	717,000	521,000
Indianapolis	455,000	670,000	272,000
Total	5,077,000	5,210,000	2,731,000
Shipments	2,357,000	2,740,000	2,356,000

Feedstuffs

The Jonesboro Feed & Coal Co. has been organized at Jonesboro, Ark. J. A. Freeze is president.

J. O. Shepherd has purchased M. P. Brown's interest in the feed and produce business at Grain Valley, Mo., and is now sole owner of the business.

The Treadway Feed & Seed Co. of Nashville, Tenn., has been chartered; capital stock, $35,000. Incorporators: Geo. E. Treadway, J. W. Franklin, F. M. Quinn, Paul M. Davene and W. B. Milan.

The Grain Belt Mills of St. Joseph, Mo., will entertain their salesmen at a convention in that city to be held December 29 and 30. As this company, manufacturers of alfalfa and mixed feeds, has just witnessed during the last 60 days the best trade in its history the outlook for the New Year is extremely promising.

The Cereal By-Products Co. of St. Louis announce that effective Dec. 1 J. O. Greene has retired from the company, having disposed of his interests to E. W. Sommer, Wm. F. Becker, Jr., and Elsor Heater, these gentlemen being in charge of the Memphis and Chicago branch houses and the St. Louis offices respectively. The established policies of the company will be continued by the present management and absolutely impartial service will be accorded buyers and sellers in the bookings of feed materials.

THE FEED SITUATION.

STRONG DEMAND FOR FEEDS.

GRAND RAPIDS, MICH.—We believe that feedstuffs are going to hold their own, and as we go into the winter undoubtedly will be higher. We know our demand is greater than we can supply.—*Voigt Milling Company, F. A. Voigt, Pres. & Mgr.*

SHORT ON GRAIN FEED.

ANDERSON, IND.—There are very few lots for sale in our part of the country, and the big end of the corn crop will be fed by local feeders. There is very little wheat left in this locality. We will probably have to ship in oats, corn and wheat before the season is over.—*The Union Grain & Feed Co.*

WHEAT FEEDS STRONG.

MINNEAPOLIS.—In our opinion the situation on wheat feeds is very strong, and we believe that prices will be higher before they are lower. This is the season when the smaller mills throughout the country sell their feeds locally. The chances are that we are coming to a period of curtailed output, due to shortage of wheat, especially at interior points. We anticipate splendid demand.—*Washburn-Crosby Co., William G. Crocker, Mgr. Feed Dept.*

New York Oats Market.

There has been no increase in the movement of oats to this market last week nor is any expected until the Railroad Administration relieves the present car situation in a substantial manner. This promise has been made and we await its fulfilment. The situation locally has shown but little change during the week. Spot offerings are unusually light, while the demand from dealers has steadily diminished. This is partly due to the desire to go over the first of the year with small stocks for inventory purposes, and partly on account of the lessened consumptive requirements. In this market prices should continue to move within a narrow range, with premiums well maintained, though no particular activity should be looked for during the holiday season.—*L. W. Forbell & Co.*

Improved Cottonseed Feed Trade.

KANSAS CITY, Dec. 27.—Demand for cottonseed cake and meal improved in Kansas City this week, with a liberal volume of business with the range states of the Northwest and West. A slightly improved tone in the trade with Kansas, Misouri and Southwestern feeders also was noted, but this section still is buying less than normal. It is estimated that Oklahoma and Texas requirements will be less than 30 per cent of a year ago. For 43 per cent cottonseed cake and meal the market closed around $80.50, and around $62.50 for cold pressed cake.

Rice Bran Market Healthy.

The market on rice bran is now showing a very healthy condition. All mills apparently are well provided with orders; in fact, the demand appears to be exceeding the supply. Prices range from $33 to $37 per ton, sacks included, f.o.b. mill, according to location. Goods for deferred delivery command a premium.

Corn vs. Other Feedstuffs.

THE PRICE CURRENT-GRAIN REPORTER'S estimate of hog slaughterings, as released December 24, showed for the period Nov. 1 to Dec. 20 compared with the same period 1918 approximately 30 per cent decline. There are many factors unsolved, but at least an interesting comparison of the reduced slaughterings this year with the small corn receipts at terminal markets is found. The 1919 corn movement shows 1,320,000 bushels less than were delivered to market at this date in 1918, whereas the present crop is 16 per cent larger than last year's. It is quite safe to assume that the pig crop is correspondingly large, and although many reasons are given for the delayed corn marketings, it seems sure that much corn which normally is shipped to market is new fed to hogs. There are, it is estimated, something over 2,000,000 more hogs in the country than there were last year at Christmas time, and in spite of the very healthy sales reported by hog feed manufacturers the natural corn doubtless still comprises a large part of the hog's daily diet.

The doubtful grain situation, with prices decidedly above those of Argentina and other countries, makes corn imports more probable. Pork also is needed in Europe at least, but credit arrangements must be made if it is to continue going abroad. The tonnage of corn which will be marketed after Jan. 1 is uncertain and it is likewise a factor for the feed trade to consider just how much bearing country corn levels will have on country feed purchases.

THE FEED MARKETS.

MONTREAL.

Montreal, Dec. 26.—The market continues steady for all lines of mill feed. Carlots of bran are reported at $45@46 including bags, and shorts at $52@53, less 25c per ton for spot cash. Pure barley meal is sold in broken lots at $72@73 per ton, and mixed grain moullie at $67@68. Dairy feed is in good demand at $55@56 per ton including bags.—Trade Bulletin.

CLEVELAND.

Cleveland, Dec. 27.—Mill feed, carlots, f. o. b. Cleveland, in sacks, shows little change in price. During the past ten days there has been no sharp advance in the price. On the whole all mill feeds are higher than two weeks ago and a representative from E. I. Bailey's office advised that there is a scarcity in nearly all brands. This has caused some delay in filling orders and coupled with the industrial disturbances of the past three weeks, with real winter weather, has made a sharp demand for mill feeds that is hard to meet. Cleveland prices for Dec. 23 were as follows: Flour middlings, $55; standard middlings, $49.50; winter bran, $48@48.50; spring bran, $48; mixed feed, $49.50; hominy, $65.50; oil meal, $83; 36% cottonseed meal, $67.50; gluten, $68; hog meal, $73.68. On gluten and hog meal there has hardly been enough in the market to make a price. These quotations are approximately correct if there was any for sale.

LOUISVILLE, KY.

Louisville, Ky., Dec. 27.—Feed is in excellent demand at present prices, which are relatively low due to the high price of short patent flour. Bran is quoted at $45 a ton; mixed feed, $47.50; middlings, brown, $49; gray, $52.50; hominy feed, $63. Manufactured feeds are also in good demand.

PITTSBURGH.

Pittsburgh, Dec. 27.—Only 220 tons of all kinds of feed were bulletined in the local exchange during the last period, this being a considerable decline from the week preceding. The feed market is still unsettled owing to the fact that shipments are light and that much pasturage is apparently available to stock and dairymen in the district. Prices for feed remain high. While it was expected that cold weather would improve the market somewhat no appreciable change has been noted with the recent cold wave.

TOLEDO.

Toledo, Dec. 27.—Mill feed prices are steady. Demand is good for both bran and middlings. Prices: Bran, $44; middlings, $50 per ton, carlots, f. o. b. Toledo. Bag prices, $5 higher. Corn and oats feeds were easier with the better movement of these grains to market the past week. Scratch feed, best grades, $58@70; corn and oat chop, $60; cracked yellow corn, $65; dairy feed, $69 per ton, carlots, f. o. b. Toledo.

NEW YORK.

New York, Dec. 27.—There was a very dull trade in mill feed all week and prices remained practically unchanged. The undertone of the market was a trifle easier, however, with holders inclined to offer more freely. Consumers in this territory are quite well supplied for the time being at least and they were consequently not disposed to make new purchases during the holiday season.

City bran was quoted at $47; middlings, $51; and red dog, $68, while Western bran ruled at $49; middlings, $50@51, and red dog $67.

NEW ORLEANS.

New Orleans, Dec. 27.—Mills are holding tagged bran from $2.30@2.32, and grey shorts from $2.65@2.70 tagged. No demand for mill feeds. Dealers are having difficulty working off their present holdings.

ST. LOUIS.

St. Louis, Mo., Dec. 27.—The feed market is about steady with offerings light but with the holiday character of the demand they are ample for the requirements. Wheat feeds are moving best, but there is a fair demand for alfalfa feeds. Barley feed is so scarce that prices are prohibitive. Prices are as follows: Bran, $43@44; middlings, brown, $48@49; gray, $50@53; mixed feed, $45@46; hominy feed, $58@60; oat feed, $25@26; alfalfa meal, choice, $44@14.50; No. 1, $42@43; No. 2, $39@40. All prices per ton, in 100-lb. sacks.

DETROIT.

Detroit, Dec. 27.—Demand for all mill feeds is active and the mills have no trouble disposing of their output. At the same time there is a continued complaint from consumers about the high level of prices. Quote: Bran, $48@50; standard middlings, $50@51; fine middlings, $61@61.50; cracked corn, $65; coarse corn meal, $60@63; chop, $53@56 per ton, in 100-lb sacks.

DULUTH.

Duluth, Dec. 27.—The market in feeds has been slow during the last few days. Dealers appear to have covered their needs for the immediate future and a disposition was noted to buy sparingly in view of possible market adjustments coming about. Quotations are unchanged as follows: Bran, $43.50; ground oats, $48.25; No. 1 ground feed, $52.50; No. 2 ground feed, $51.50; No. 3 ground feed, $50.50; shorts, $51.50; flour middlings, $53; coarse corn meal, $55; red dog, $61.50; Boston mixed, $45.50; cracked corn, $55; rye feed, $42@43.

MEMPHIS.

Memphis, Dec. 27.—No special feature in the feed market developed over the holidays but there continues to be good demand. Buyers are trying to contract for shipments far ahead but the dealers are not disposed to grant such, confining most of their bookings to 30 to 60 days. Prices are steady and everything points to excellent business for an indefinite period. The South has so little feedstuffs on hand that it will be necessary to buy freely for many months, and prosperity has been such that the high cost seems to offer little bar. It is felt by the trade that the returns from the cotton crop have been such that efforts to enlarge acreage to feedstuffs next spring will meet with difficulty, especially as the past season was such a bad one for all grain crops.

In cottonseed meal there has been no change but tone of the market is steady and offerings are limited at the moment.

MILWAUKEE.

Milwaukee, Wis., Dec. 27.—Comparatively small production and a fair demand from all sources has kept the mill feed market fairly strong. Bran is the only item that has eased off slightly and widened out in price, while hominy feed has improved $1. Other listings remain firm and unchanged. Current quotations are: Bran, per ton, $44.50@45; standard middlings, $46@47; flour middlings, $51@52; red dog, $60@61; hominy feed, $63; rye feed, $45; old process oil meal, $84; cottonseed meal, $78@85; brewers' dried grains, $71; gluten feeds, $68, all in 100-lb. sacks.

DES MOINES.

Des Moines, Dec. 27.—Market steady to $1 higher. Demand good and receipts heavy. Bran, $45.50; shorts, $49.50; flour middlings, $57.50; red dog, $65; alfalfa molasses feed, $45.50; oil meal, $84; cottonseed meal, $81; tankage, $100.

NASHVILLE.

Nashville, Tenn., Dec. 29.—Demand for wheat bran was fairly active last week. Middlings were dull and easier. Prices: Soft winter wheat bran, 100-lb. bags, per ton, $46.70; standard middlings, $53.50; horse and mule feed, $48@63; dairy feed, $57@69; hog feed, $64; poultry feed, $69@75.

BOSTON.

Boston, Dec. 27.—Middlings, mixed feed, gluten and oat hulls are quoted higher with other feeds practically unchanged from last week. The demand and offerings of feeds have been extremely light during the past week. Prices were quoted as follows: Bran, spring, sacked, $49.25 per ton; bran, winter, sacked, $49.25@49.50; middlings, sacked, $50.50@60; mixed feed, sacked, $53@57; gluten feed, sacked, $75.12; red dog, sacked, $65; second clear, sacked, $67; stock feed, sacked, $62.50; oat hulls, reground, sacked, $32; hominy feed, sacked, $67.40; cottonseed meal, sacked, $78.50@80.50. Receipts for the week ending Dec. 29 were none.

CINCINNATI.

Cincinnati, Dec. 27.—Holiday conditions interfered to some extent with trade in feeds the past week, but prices were not greatly affected and a fairly steady tone prevailed. Supplies of all kinds, however, are light and under only a normal demand stronger prices are indicated with the advent of the new year. Tankage especially was firm and is tending higher. The car situation is still regarded as unsatisfactory. Prices, per ton, in bags, basis carlots: Spring wheat bran, $46.50; soft winter wheat bran, $46.50; hard winter wheat bran, $46.50; spring wheat middlings, $49.50; soft winter wheat middlings, $53.50; hard winter wheat middlings, $55; cottonseed meal, 36% protein, $75.50; linseed meal, $82; gluten feed, $70; hominy feed, $63; No. 1 alfalfa meal, $43.50; beet pulp, $62.50; barley chops, $69; rye middlings, $49; tankage, $99.

BALTIMORE.

Baltimore, Dec. 27.—The demand for sacked bran and middlings is fairly good in a jobbing way, and with Western advices on feed firm and the offerings on spot here only moderate from first hands, the late strong position of the Baltimore market is well maintained. Quotations follow: Western spring bran, per ton, 100-lb. sacks, $49@49.50; Western middlings, per ton, 100-lb. sacks, $50@51; city mills' wheat bran, per ton, 100-lb. sacks, $52; brown middlings, per ton, 100-lb. sacks, $52@53; white middlings, per ton, 100-lb. sacks, $62.

PHILADELPHIA.

Philadelphia, Dec. 27.—There is a fair demand for cottonseed products on arrival and a fair inquiry for bran and middlings but stuff in transit is dull and weak. Offerings on spot are light and the market rules firm. Quotations represent carlots, to arrive, in 100-lb. sacks at cost per ton: Winter bran, $50@50.50; spring bran, $49@49.50; standard wheat middlings, $50.50@51; flour middlings, $58@59; red dog, $65.50@66; shorts, $50.50@51; low grade flour, $66@66.50; rye middlings, $49.50@51; fine yellow hominy, $66@67; fine white hominy, $67@68; reground oats feed, $31@31.50; cottonseed meal, 36% protein, $79@79.50; cottonseed meal, 41% protein, $83@84; cottonseed feed, 20% protein, $62@63.

MINNEAPOLIS.

Minneapolis, Minn., Dec. 29—The demand for the lighter grades of millfeed, such as bran and standard middlings, seems to be fairly active, but heavier grades are moving slowly. Eastern buyers still have some stock on hand that accumulated while the last deliveries were being made over the lakes, and are not in a hurry to make fresh contracts. Offerings here lately have been light because the mills have not been running freely. Some of the interior mills have been buying bran and middlings in the local market to take care of their customers in nearby territory and also to cover some short sales made to eastern buyers. There is a fair mixed car demand reported. Local stocks are decreasing moderately and most of the feed on hand is held firmly. Shipping directions fair and cars to make shipments are hard to get.

Quotations in car lots, f. o. b. sacked in 160-lb. sacks: Bran, $32.00@43.00; middlings, $43.00@45.00; flour middlings, $53.00@54.00; red dog, $59.00@61.00; rye middlings, $43.00@44.00; ground barley, $67.00@68.000.

Sir Norman Hill, chairman of the British Port and Transit Executive Committee, at a recent meeting of an economic club in England, said that "State control is still paralyzing commercial effort and enterprise and keeping ships idle for days and weeks. Moreover, our ports are blocked although they are not bringing in more than 75 per cent of the imports with which the country dealt under pre-war conditions." This control, he said, is responsible for short supplies of commodities and high freights. He urged that the country might be allowed again to try the policy of trusting to the energy and enterprise of merchants and ship owners rather than to officious meddling of the government, that is to say, some office clerk.

Alfalfa Department

A train of 10 cars of sheep were recently unloaded at Pierre, S. D., to be moved to irrigated alfalfa feeding grounds.

Alfalfa in Wisconsin shows a large increase since 1909, the acreage this year being 60,000, as compared with 8,000 in 1909, while the production in 1919 was 160,000 tons.

Mrs. J. B. Bacon, near Gothenburg, Neb., has a very large acreage to alfalfa and is locally known as the alfalfa queen. This year she sold the crop from 500 acres for about $20,000.

The New Jersey Alfalfa Growers' Ass'n will hold its annual meeting at Trenton on Jan. 16. Through the efforts of this association the acreage of alfalfa in this state is constantly increasing.

This year has been one of the most prosperous yet experienced by alfalfa growers of California and the number of acres planted last fall is considerably larger than usual, especially in the San Joaquin and the Imperial valleys, and there was a noticeable decrease in acreage of alfalfa plowed up for other crops last fall. A census of several counties in the state made during the fall showed that in California there are about 1,058,000 acres of alfalfa. Imperial County leads all other counties in the acreage, having 125,000, followed by Merced with 105,000, Tulare with 103,000, Kern, 95,000, etc. In Los Angeles County there are only 4,000 acres.

Moderate Alfalfa Meal Trade.

KANSAS CITY, Dec. 27.—While the volume of sales of alfalfa meal in Kansas City was slightly less than a week ago, the market displayed a firm tone. The lessened activity was attributed to the Christmas holiday. Some surprise was manifest over the lack of the usual holiday dullness. Mill offerings from Colorado and other Western states were very light, and business was restricted to the available offerings. Many Western mills are sold up for sixty days. There was good buying by the East, North and South. Prices showed little change.

Choice alfalfa meal closed at $42.50@44 per ton, sacked, basis Kansas City, for carlots; No. 1, $41@42; No. 2, $37.50@38.

Moderation in weather conditions, with the annual holidays at hand, tended to reduce activity in the alfalfa mixed feed market. Approach of a heavy corn movement and declines in prices for the coarse grain also caused buyers to hold off. Sales were made in surrounding territory, and in the range areas of the West and Southwest. The grain mixed feed was off about $1 a ton, with the straight molasses mixture unchanged, as follows: No. 1 molasses feed, $41@42; No. 2, $38@40; brown, $36@38; alfalfa grain molasses feed, $52@55.

Alfalfa a Source of Protein.

For animals that are growing or giving milk the one element most desired is protein, that makes bone and muscle and milk and blood rather than fat. So far back as any of us can remember timothy and clover were regarded as the staple, the incomparable hays, without rivals. The Wisconsin Experiment Station has demonstrated that an acre of alfalfa will yield three times as much protein as an acre of clover and nine times as much as an acre of timothy and twelve times as much as an acre of broom grass.

The Iowa station, at Ames, after twenty years, says each acre of alfalfa has averaged a production of 2⅜ times as much protein as red clover; 2¾ times as much as corn and 4 times as much as oats. Also, that 16 seedlings in course of nine years have given an average yield of 4.38 tons of field-cured hay per acre, and that alfalfa hay can be cured as easily as red clover. With corn, it makes a practically perfect balanced ration. This is undisputed. In protein content good alfalfa hay does not differ widely from wheat bran.

Government reports say, that based on as many as from 21 to 68 analyses, the per cent of protein in timothy hay is 5.9; in clover 12.3; wheat bran 12.2 and in alfalfa 14.3. Based on their digestible nutrients, if a ton of timothy hay was worth $9.80 a ton of clover would be valued at $14.12 and of alfalfa $20.16, or somewhat more than double the value of timothy.

KANSAS CITY ALFALFA NOTES.

Sanders Sosland, Correspondent.

A new record total for a single day's receipts of alfalfa hay was established on the Kansas City market on Monday, Dec. 22, when 180 cars arrived on the team tracks. The previous record total was in February of this year, when 163 cars were received. The week's receipts of alfalfa, while not the heaviest on record, were probably the largest for a five-day week, amounting to 573 cars. The total arrivals of hay in Kansas City last week amounted to 1,161 cars, including 423 cars of prairie, and 144 cars of timothy and clover mixed. No strictly clover hay has been received in Kansas City for some weeks, and temporarily, at least, the Kansas City Hay Dealers' Association quotation committee has ceased to quote nominal values of the forage.

"There is too broad a demand for alfalfa to depress prices for the hay to any great extent." So declared E. R. Cash, head of the shipping department of the L. C. Worth Commission Co., in discussing the trade outlook. "Practically every section of the country has been and still is calling for alfalfa in Kansas City. Besides the East, North, South and Southeast, which sections have been heavy buyers in the past few months, liberal inquiries are being received from range cattle handlers in Texas and other Southwestern states. Some sales already have been made to Texas points, and it is probable that shipments of alfalfa to that state will increase sharply as the season advances. Many in the trade were concerned early in the crop year over the fact that Texas was offering hay to the North. But the state has since turned from a source to a rather profitable outlet. Cattle holdings in the state are heavier than in recent years."

"Producers of alfalfa hay in the territory surrounding Manhattan, in the Eastern section of Kansas, have already marketed about three-fourths of their total production this year," reported D. C. Stephenson, representative of the Carlisle Commission Co., at Manhattan, who was a visitor in Kansas City last week. "The crop in this territory, which was an average for the Sunflower state as a whole, was moderately large in size, though much of the early cuttings were damaged by rains. The farmers who still are holding their hay will market if values turn up further. It is probable, however, that because marketings of alfalfa in the section have been so liberal thus far on the crop, many cattlemen will be required to bring in considerable quantities of the hay to carry them over until spring. In fact, some of the larger handlers of cattle already have contracted for alfalfa hay for winter feeding, and in the event of storms and severe cold, requirements of producers will increase sharply. Car shortage has not restricted to any extent the shipments of alfalfa from the Manhattan territory."

The most valuable car of grain ever sold in Winnipeg was a carload of flax, 1,934 bus., sold on account of the British government for $4.26 per bu.

JANUARY HOG RUN.

There is a great variety of opinions as to what effect the heavy receipts of hogs in January will have in lowering the hog market. Many think the Eastern hogs are marketed earlier this year than usual and that Eastern demand will stimulate prices in the West. With a continued steady flow of hogs the demand from the East would not hold the market up, for the reason that the supply would be sufficient for all. We have every reason to believe that after Jan. 1 hogs will come to market in such large numbers that the market will be forced down, how low it is hard to say. Of course, we have no doubt that every pound of hog product that is put away this winter will be eagerly sought by the trade later on; but for a period, the supply will be so much greater than the demand, that the future will be lost sight of temporarily. It is a risky proposition to put away high priced hog products during the harvest season for hogs. A large proportion of the hogs slaughtered now have to be carried for several months, and it has been our observation that packers buy their hogs as cheaply as possible when they are plentiful, and we think that is what they will do this winter.—*W. G. Press & Co., Chicago.*

ALLIED PACKERS GAINING.

For October actual net profits of the Allied Packers, Inc., it is said, were about $350,000, and for November actual net profits are estimated to exceed $400,000. The conditions of October and November are prevailing in December. Since organization, on July 1 of this year, the company, at an expenditure of less than $500,000, has increased its hog-killing capacity about 33⅓ per cent, and this increased capacity is actually in operation.—*Journal of Commerce.*

The Standard Way to Make Hogs Pay

After years of study, it has been found that when the proper feed is used hogs will feed themselves.

Many grain men who are in touch with live stock feeders have added to their profits by selling

Standard Digester Tankage

is the most perfect balance for his corn. Guaranteed sixty per cent protein, combined with phosphate, lime, ash and fibre. Put it in a trough and he feeds himself just the right amount.

Hay Department

Hay prices at Aberdeen, S. D., are quoted at $15@20 per ton loose, and $20@24 per ton baled.

Wisconsin's clover and timothy in point of acreage was the most valuable crop in 1909. It was then grown on 2,499,000 acres. In 1919 there were 2,576,000 acres producing 4,502,000 tons of hay.

Faulk County, S. D., has an excess of fine quality prairie hay, baled and ready for shipment as soon as cars can be obtained. This region is considered one of the best hay producers of South Dakota and shipments are made from Faulkton and especially from Millard, one of the largest shipping points in the state.

Toberman, Mackey & Co., St. Louis, think that after New Year's there will be a good demand and stronger values for hay in that market. Clover is steady with fair demand at present prices and alfalfa strong, for the high grades especially, although medium grades are in fair request. Very little market for prairie.

THE HAY SITUATION.

SOME HAY ON HAND.

CANANDAIGUA, N. Y.—We have about 25% of our hay still on hand. It was the largest crop that we have ever had. Farmers are strong holders, and do not sell freely at ruling price. I believe that all of the hay remaining in farmers' hands will be needed before the new crop comes out.—*J. A. McCauley, Mgr., Canandaigua Elevator.*

KANSAS CITY HAY NOTES.

Sanders Sosland, Correspondent.

"Cars still are seriously short," emphasized J. C. Kerr of the J. C. Kerr Hay Co. "While Kansas City receipts of alfalfa, prairie and tame hay have recently totaled around 1,000 cars weekly, comparatively large, arrivals would be far greater were the railroads able to supply more cars to Kansas and Missouri points. Many shippers have not received a single car in two months."

"Annual inventory figured in the recent sharp fluctuations in prairie hay prices," declared J. C. Glover of J. C. Glover & Co. "The larger buyers, including the stock yards and the larger local buying interests, accumulated considerable prairie hay late in November and early December, sufficient to carry them over the late December market and into the New Year. It is usual on the prairie market for the large buyers to drop out before the close of the year in order to make an inventory of their stocks and general business. In accumulating their hay to meet their requirements for probably a month, the market was forced up, reaching a top of $26.50 a ton in Kansas City. But a natural recession occurred with the cessation of buying by the larger consuming interests. What the action of the market will be after the opening of the new calendar year is doubtful, of course. It must be remembered that Kansas and other prairie states have produced enormous crops of the wild hay, and that much of the forage still is held in the country. Farmers probably will continue to ship freely because of their large holdings, and this may tend to offset any marked improvement in the demand. The car situation also is a factor."

CHICAGO HAY NOTES.

M. H. Cohn, until recently operating in Eastern hay markets, is now handling shipping and contracts for the hay department of Bridge & Leonard, Chicago.

A Chicago receiver says: "The hay trade the last few days has been very quiet. The market is in its usual holiday rut. The larger consumers have been out of the market lately, as they are taking their annual inventory and wish their stocks at a minimum during this period but we look for this trade to be active again after the first of the year and in consequent better market. The receipts the last few days rather large. Straw is in light supply and market strong."

Overheard in the team track scale offices of the Chicago & North Western Railroad was an impromptu debate by John Walters of Walter Bros. and "Bob" Brinkley of the H. J. Karstens Co., the subject being "Congress as a body has power to unseat one of its members or prevent the seating of a newly elected member." Walters took the affirmative and Brinkley the negative. Sam Lev of Lev Bros. acted as sergeant-at-arms (self-appointed) and insisted, when the debate was at red heat, that less noise be made as the slumber of a representative of another firm seated next to Brinkley was being disturbed. W. H. Keelin of T. W. Keelin Co. was the self-appointed judge, and decided in favor of the negative, basing his decision on "points"; but Walters took exception to the ruling from the fact that at one time the Judge had "lost out" on the settlement of a balance due him, and he therefore accused the Judge of being prejudiced against him. Geo. Hubbard of H. H. Freeman Co., referee, volunteered the information that "points" did not count and that John Walters was entitled to the decision.

There were some slight changes in hay values on Monday, say Bridge & Leonard, in view of the rather unusual state of the market, and $31 was the top on the best hay, with No. 2 quotable at $27@28; otherwise values were unchanged. The receipts were quite heavy, 107 cars timothy, 24 state prairie, 6 rye straw, 4 wheat. There was quite a demand for timothy hay, though there were some cars held over unsold. It looked as though they would be taken without any further immediate change in the market. Western prairie is wanted—very little here, but state is in ample supply, and the trade is quoting it lower; packing unchanged. Straw has reached the top, but the demand is still good for it. There were not so many sales on Monday at the top of the market but all within the range of quotations. The loading at country points shows some increase, and if the weather is favorable it means larger receipts here, with possible recession in values later on, though the big buyers are in the market for large quantities of hay or straw. There is no object in holding back hay or straw—let it come forward.

OMAHA HAY NOTES.

J. C. PEDERSON, CORRESPONDENT.

Weather today is cloudy and rainy and snow is going fast.

M. J. Hyland of the Omaha Hay Co. left for Lincoln, Nebr., spending Christmas with his folks.

The inspector of the Omaha Hay Exchange wishes to thank the commission men for the splendid Christmas token he received from them.

Receipts for the past week have been heavy on both prairie and alfalfa hay and the demand is not as good, although prices remain same with market easier.

The final reports by the Institute of Agriculture at Rome makes the flaxseed yield of Italy this year 394,000 bus.; of Argentina, 27,754,000; of British India, 9,160,000. Except in Argentina these yields are away under 1918. In British India the shrinkage is more than 11,000,000 bus., the crop being less than half that of 1918.

Hay Markets

MONTREAL.

Dec. 26.—The comparatively light receipts of hay continue to insure a firm local market, and we hear of an occasional car of choice No. 2 bringing 50c@$1 per ton over regular quotations, which range from $24@25 for No. 2, $22@23 for No. 3, and $21@23 for clover and clover mixed. As regards the export trade, shipments of Canadian hay have been reported from Portland and Boston, which are quoted at 300s. to 310s. per ton in Liverpool, Manchester, and London, and the freight to these ports is $20 per ton from Boston. Allowing for this and commission for selling, besides the reduction in sterling exchange, there should be a profit to shippers of Canadian hay and to American exporters as well.

The receipts of baled hay last week were 6,026 bales, against 16,567 bales for the same week last year. American buyers have paid $22@23 at St. Hyacinthe for good No. 2 for shipment to Boston.—Trade Bulletin.

ST. PAUL-MINNEAPOLIS.

Dec. 27.—Quote hay prices for the Twin Cities as follows:

No. 3 alfalfa	25.00	.....

NEW YORK.

Nov. 26.—The New York Hay Exchange reports the hay situation as follows:

	Hay tons	Straw tons
Receipts for week	2.156	160
Receipts last week	3,151	300
Receipts Sept. 1 to date	69.324	5,460
Receipts same time last year	96,153	5,740

The market is irregular at the close though the tone as a whole is certainly healthier than for some time past and there is decided firmness apparent at most Manhattan points. New invoices are naturally very light with all Manhattan stations of N. Y. Central embargoed, but offerings have been free at Lehigh pier and stocks on 33rd St. shed were ample. On Tuesday, however, trade was more active and prices hardened, the advance being fully sustained on Wednesday. Values at the close are varying according to location, the highest prices being realized in

ST. JOSEPH.

Dec. 27.—Receipts have been moderate, with an excellent demand for alfalfa of all grades. Prairie hay is about 50c@$1 under a week ago, but alfalfa hay holds strong. The outlook is for still higher prices in alfalfa hay. The demand is brisk throughout the South for good grades of alfalfa, but prairie and timothy hay are not being taken at present prices. Nominal quotations follow: Prairie—Choice, $22.50@23.50; No. 1, $21@22; No. 2, $19@20; No. 3, $15@18. Midland—No. 1, $17.50@18.50; No. 2, $15@16. Alfalfa—Choice, $37@37.50; No. 1, $35@36; standard, $32.50@34.50; No. 2, $28.50@32; No. 3, $25@28. Timothy—No. 1, $28@29; standard, $27@28; No. 2, $25@27; No. 3, $23@24.50. Clover light mixed—No. 1 $28@29; No. 2, $24@26. Clover—No. 1, $28@30; No. 2, $24@26. Straw, $12@12.50.

PHILADELPHIA.

Dec. 27.—The demand for hay is light but there is so little choice quality here that no trouble is experienced in placing all offerings of this description at steady prices. The bulk of the supply consists of low grades which are pressed for sale at irregular prices. Straw is firm under small receipts which are in fair request.

Timothy hay—Choice, $34; No. 1, $33; No. 2, $31@32; No. 3, $27@28. Clover mixed hay—Light mixed, $31@32; No. 1 mixed, $28@29; sample, $22@24. Straw—No. 1 straight rye, $15.50@16; No. 2, $14@14.50; No. 1 tangled rye, $14; No. 2, $12.50@13; No. 1 wheat straw, $14@14.50; No. 2, $12.50@13; No. 1 oat, $14.50@15; No. 2, $12.50@13.

BALTIMORE.

Dec. 27.—Although the usual holiday lull is noted in the local hay market, the tone is firm so far as values on the better qualities of timothy, mixed and No. 1 clover are concerned, the stocks of such hay being limited on spot. Common, low grade, and bad order hay have no definite market value.

Straw of all descriptions is selling sparingly and the general market is quiet at former range of prices. Quotations follow, per ton: Timothy—No. 1, nominal, $33; standard, $31.50@32; No. 2, $30.50@31; No. 3, $27@29. Light clover mixed—No. 1, $30@30.50; No. 2, $27.50@29. Clover mixed—No. 1, $28.50@29; No. 2, $26@28. Clover—No. 1, nominal, $31; No. 2, nominal, $29. Sample hay, $20@25. Straw—No. 1 straight rye, $17.50@18; No. 1 tangled, $14@14.50; No. 1 wheat, $12@13; No. 2, $11@11.50; No. 1 oat, $14@15.

DULUTH.

Dec. 27.—With a heavy demand the market in hay was kept well cleaned up during the last week. Supplies of good feeding hay were inadequate to fill the call and quotations were advanced $1@2 a ton all the way through the list. Prices per ton in carlots follow: Timothy—No. 1, $27@28; No. 2, $25@27. Timothy mixed—No. 1, $25@27; No. 2, $21@23. Prairie—No. 1, $25@26; No. 2, $22@23; No. 3, $18@20. Midland—No. 1, $20@21; No. 2, $11@12. Straw—Rye, $9@10; oat, $9@10; flax, $14@15.

LOUISVILLE.

Dec. 27.—Demand for hay is good, with receipts light and offerings poor, as farmers won't ship during the holiday period and things are quiet in the country. Prices are firm to stronger. Quotations are: No. 1 baled timothy, $33.50 a ton; No. 2, $32; No. 1 mixed, $32; No. 2, $30; No. 1 clover, $35; No. 2, $32; wheat, oat or rye straw, $12.50.

DES MOINES, IA.

Dec. 29.—Market stronger. Receipts rather light. Upland, $25@26; timothy, $29@30.

CLEVELAND.

Dec. 27.—Hay, carlots, f. o. b. Cleveland on Dec. 23 was quoted as follows: No. 1 timothy, $31.50@32; standard timothy, $30.50@31; No. 2 timothy, $28.50@29; No. 1 mixed, $30.50@31; clover, $32; No. 1 rye straw, $13@13.50; No. 1 oat and wheat straw, $13@13.50. The present stock of hay in Cleveland is light and there is a good demand and an excellent opportunity for a good movement of good quality hay in this market.

TOLEDO.

Dec. 27.—Market is strong and higher due to light receipts. Demand very urgent for the mixed and clover hay. No. 1 timothy, $28; No. 2, $26.50; No. 1 light mixed, $28; No. 1 clover, $29 per ton, carlots, basis Toledo rate point.

DETROIT.

Dec. 27.—Receipts in this market continue small and the tone is firm at an advance of $1 per ton over the prices of a week ago. Canada is falling down in shipments to this market and there is a steady demand that takes everything in sight. It is the same with straw. Quote: No. 1 timothy, $30.50@31; standard and light mixed, $29.50@30; No. 2 timothy, $28.50@29; No. 3 timothy, $25@27; No. 1 mixed, $28.50@29; No. 1 clover, $28.50@29.

NEW ORLEANS.

Dec. 27.—Quote No. 1 timothy at $37, No. 2 from $35@36 and No. 3 from $33@34. Offerings are limited and the demand is also poor.

BUFFALO.

Dec. 27.—Hay continues strong and there is a good demand for all grades, particularly No. 1. The farmer is still holding on and says he will get his price or "bust." There is plenty of hay and dealers say they are getting enough to supply their wants. They should worry. No. 1 quoted $30@31; No. 2, $28@29 per ton. Straw, $12@13 per ton.

MEMPHIS.

Dec. 27.—Receipts of hay for the week were slightly larger but by no means sufficient to allow stocks to be built up. Demand has continued moderate, but practically everything coming has been taken care of. Alfalfa continues extremely scarce and high, which enables the other varieties to find prompt outlet at steady prices. Prices have shown no change during the holiday week. On call today $33.50 was asked for cash No. 1 timothy, while $32 was asked for No. 2. Standard and No. 2 alfalfa was offered at $38.50, with $37 bid, while January shipment standard was offered at $38. Cash clover mixed was $32 bid and $34.50 asked. Straight No. 1 clover sold at $32.50, while No. 2 was offered at $32.

NASHVILLE.

Dec. 29.—Hay is in moderate demand. Prices: No. 1 timothy, $35; No. 2 timothy, $34; No. 1 clover, $36; No. 2 clover, $34; alfalfa, $38@40. Receipts of hay at Nashville last week, 10 cars.

ST. LOUIS.

Dec. 27.—The receipts of hay are moderate but the demand is limited and prices are practically unchanged. Offerings are mainly timothy and clover mixed. Pure clover hay is scarce and wanted. Straw also is scarce and wanted. Prices are as follows: Timothy—No. 1, $31@33; standard, $29@31; No. 2, $27@29; No. 3, $25@26; headed, $24@25; threshed, $20@22. Light clover mixed—No. 1, $30@31; No. 2, $27@28. Heavy clover mixed—No. 1, $31@33; No. 2, $29@30. Clover hay—No. 1, $37@38; No. 2, $35@36. Alfalfa hay—Choice, $40@41; No. 1, $38@39; standard, $37@38; No. 2, $34@36. Prairie hay—Choice, $27; No. 1, $25@26; standard, $24@25; No. 2, $23@24. Straw, $10.

MILWAUKEE.

Dec. 27.—A fair demand has kept the local hay market fairly well cleaned up, as offerings of all kinds were readily accepted. However, business is smaller than preceding week although prices held firm and unchanged. Current quotations are: No. 1, $28@28.50; No. 2, $26@26.50; No. 1 clover, $25@26; light clover mixed, $25@26.50; red top and timothy mixed, $25@26.50; marsh feeding, $15@16; packing, $12@13; rye straw, $12.50@13; oat straw, $12@13.

PITTSBURGH.

Dec. 27.—The receipts of hay, while still rather light, are yet sufficient for the holiday demand. Invoices are increasing and if there were more cars the amount of hay available would quickly increase. Prices are governed largely, if not entirely, by the shipping conditions and these are not normal. Buyers at country points are advised that when cars are more plentiful the market will be well supplied with hay of all grades. For the present prices are equal to wartime values, which is also true of all feeding commodities, and most of this inflation will be removed as soon as transportation is more settled than it is at present. There is a good demand for all kinds of graded hay and shippers can make no mistake at this time by turning all their hay into this market as fast as loaded. Quotations are as follows: No. 1 timothy, $32.50@33; standard, $31.50@32; No. 2 timothy, $30@30.50; No. 3 timothy, $28@29; No. 1 light clover mixed, $31.50@32; No. 1 clover mixed, $33.50@34; No. 2 clover mixed, $30@31; No. 1 clover, $35@35.50; No. 2 clover, $28.50@31.50.

Total receipts 996 tons as compared with 1,188 tons the previous week.

BOSTON.

Dec. 27.—Receipts of hay during the past week were moderate and the local market is well supplied as trade rules. The demand from buyers has been slow and confined almost to immediate needs of the trade. Buyers do not seem to be particularly interested in the situation at the present time and receivers of hay in many instances are forced to accept concessions from asking prices in order to move cars and save storage charges. Prices are still higher in the country than in the local market and some of the railroad terminals at the present time have more hay on hand than is desirable. No. 1 timothy hay in large bales is in limited supply, but the demand is slow and $34 per ton is an outside quotation. Small bales are quoted at $31@32. No. 2 timothy in large bales ranges at $30@31, with small bales at $28@29. No. 1 Eastern is quotable at $30@32, with No. 2 Eastern at $26@28. No. 3 hay offered at $25@27. Clover mixed is held at $28@30 for alsike and $26@28 for red. Receipts for the week ending Dec. 29 were: Local, 135 cars; export, 10 cars.

The demand for rye straw is quiet with the market barely steady at $15@16 per ton for choice. A firm market on oat straw with fair demand and light offerings at $15@16. Receipts for the week ending Dec. 29 were: Local, 4 cars.

KANSAS CITY.

Dec. 27.—Irregular price changes were noted in the market for hay in Kansas City this week. Alfalfa displayed a steady tone, with the market about unchanged, prairie receded $1.50@4.50 a ton, while timothy and clover mixed sold at an advance of 50c@$1 a ton. Receipts were heavy for a holiday week, amounting to 1,161 cars, compared with 1,016 cars last week and 244 a year ago. Stockyards buyers were out of the market for prairie, having accumulated sufficient of the wild forage to meet their requirements over the holiday season. Local demand and inquiry from feeders was fair, but buyers held off until the market appeared more stable. Alfalfa maintained its recent firmness, and while offerings carried over from the holiday caused buyers to hold off, no declines occurred. Tame hay continued in good demand. Straw advanced further, closing around $13.

Prairie—Choice, $22.50@23.50; No. 1, $20.50@22; No. 2, $18.50@20; No. 3, $15@18; packing hay, $11@14.

Midland prairie—No. 1, $17@18.50; No. 2, $14@16.50.

Alfalfa—Choice, $37@38; No. 1, $35.50@36.50; standard, $32.50@35; No. 2 $28.50@32; No. 3, $25@28.

Timothy—No. 1 $28.50@29; standard, $27.50@28; No. 2, $26.50@27; No. 3, $23@25.

Clover mixed—Light, $28.50@29; No. 1, $27.50@28; No. 2, $23.50@27.

Clover—No. 1 $27@30; No. 2, $23@26.50.

Straw, $12.50@13.

OMAHA.

Dec. 27.—Receipts of both prairie hay and alfalfa good, while the demand is quiet, causing the market to be easier and prices unchanged. Oat and wheat straw steady. No. 1 upland prairie hay, $25@26; No. 2 upland prairie hay, $22@24; No. 3 upland prairie hay, $16@20; No. 1 midland prairie hay, $24@25; No. 2 midland prairie hay, $21@23; No. 1 lowland prairie hay, $18@20; No. 2 lowland prairie hay, $11@16; No. 3 lowland prairie hay, $10@13; choice alfalfa, $35@36; No. 1 alfalfa, $32@34; standard alfalfa, $30@32; No. 2 alfalfa, $25@29; No. 3 alfalfa, $20@25; oat straw, $12@14; wheat straw, $12@13.

CHICAGO.

Dec. 29.—The following is a statement of the receipts and shipments of hay in tons in the Chicago market for the week ending Dec. 27; also the total receipts and shipments of hay from Jan. 1, 1919

	Dec. 27, 1919.	Dec. 20, 1919.	Dec. 28, 1918.
Total receipts	5,004	5,592	4,280
Total shipments	460	383	317
Rcpts. since Jan. 1	240,484	235,480	312,387
Shpts. since Jan. 1	7,135	6,675	84,285

The receipts of timothy hay Monday and Tuesday are large, and market shows the effects of same in a lowering of values, although buying continues very fair and offerings are being absorbed. Prices are $1.00@2.00 a ton below those ruling the middle of the month, yet they are still good, considering the volume of hay awaiting a market. The trade anticipate a shortage of empties and the weather during the next 60 days is likely to keep the movement of hay within moderate bounds.

The movement in prairie is confined largely to state hay, which sells to advantage at good prices. Little western hay arriving, which is also true of alfalfa.

Straw firm, a continued light movement of all kinds with prices far above the usual levels. Quote as follows:

Timothy—No. 1, $30@31; standard, $28@30; No. 2, $27@29; No. 3, $24@27; threshed, $16@20.

Clover—No. 1 light mixed, $29@30; No. 1 mixed, $27@28.

Prairie—Kan., Okla., Mo. and Nebr., ch., $29@31; No. 1, $27@29; No. 2, $20@22; state, Mo. and Wis., $14@21; packing, $12@14.

Straw—Rye, $15.50@17.00; oat, $14.50@16.00; wheat, $13.50@15.00.

CINCINNATI.

Dec. 30.—The usual dullness in the hay trade and declining prices characterized each year during the holiday season was again noticeable the past week, and losses of $2 per ton for timothy, $2 for mixed and $2 for clover were recorded. A comparatively liberal movement, however, was also a factor of weakness, but at the reduced prices the resultant volume of business was good. Though the trade expects little activity until the passing of the old year, and advises shippers to buy on a wider margin for several days in order to meet possible further declines, the market apparently is in good shape, and with only fair stocks at consuming points and active local demand prices are very likely to strengthen. Country advices to the trade are only fair. The car situation is improved but regarded as still unsatisfactory. Receipts for the week were 223 cars. In the terminals 20 cars.

Timothy—No. 1, $31@31.75; standard, $30.50@31; No. 2, $30@30.50; No. 3, $28@30; threshed, $23.50@24.50. Light clover mixed, $31@31.75. Clover mixed—No. 1, $30.50@31; No. 2, $28.50@30.50. Clover—No. 1, $35@36; No. 2, $31.50@33.50; sample, grassy, $26@28. Alfalfa—No. 1 Western, $40@41; No. 1 local, $38@39; standard, $37@38; No. 2 local, $34@35. Straw—Wheat, $12.50@13.50; rye, $12.50@13.50; oats, $12.50@13.50.

The corn crop of the state of Chihuahua, Mexico, for 1919 is estimated at 1,986,000 bus. The present price of corn in the mountains, where most of it is grown, is approximatetly 90c per bushel. Lower prices are expected both in the mountains and in the city of Chihuahua.

TRADE MENTION

We wish to acknowledge from the McConnell Grain Corporation of Buffalo, N. Y., a very attractive calendar; also as a large wall calendar from Toberman, Mackey & Co., of St. Louis. The feature of the latter calendar is that it contains a weather forecast for each month of the year.

The Day Co. of Minneapolis has been sending out to its friends and customers a very attractive calendar entitled, "A Daughter of France." This is a reproduction from the original painting of Hortense Beucher. The calendar will surely find a place on the wall of all recipients.

Many of the pretty calendars this year run to war paintings, and we are favored with a very pretty calendar from the Victoria Milling Co. of Jasper, Ind., on which is embossed a reproduction of the painting entitled, "LaFayette, We Are Here," showing General Pershing at the tomb of LaFayette, July 4, 1917.

Hugo L. Siegel, formerly general sales manager for the Ford Roofing Products Co., is now with Walter A. Zelnicker Supply Co. of St. Louis, Mo., as assistant to president. The Zelnicker Supply Co. handles railway, power plant, contractors', saw mill and industrial equipment and machinery of all kinds.

The December number of the *Journal of Political Economy*, Chicago, contains: "The Management of Labor," by Sumner H. Slechter; "The Marine Workers' Affiliation of the Port of New York," by Benj. M. Squires; "An Assessment Roll for the Income Tax," by Carl C. Plehn, and notes on "Curtailment of Credit", "Foreign Financing," etc.

The Christmas issue of *Scientific Grist*, published by The Bauer Bros. Co., Springfield, O., is most attractively gotten up, printed in two colors which lend considerable to the Christmas spirit of the booklet, showing "Santa" and his pack in red and green, as well as the poinsetta. The manufacturers of the well-known "Scientific" Attrition Mills greet their friends through this monthly medium in the most hearty of Christmas greetings, and offer some little cheer to the reader in the clever little stories related therein.

The Northern Grain & Warehouse Co., with offices in something over 40 cities, has a business, so much of which is located in the great Northwest, that it is not fully recognized in the Central markets. It is true that in Chicago, New York and Minneapolis the firm operates extensively as grain merchants and as cash handlers. We were told the other day that they own five flour mills, maintain warehouses at Portland, Spokane, Seattle, San Francisco, Los Angeles, Missoula, and Helena, Mont., with a terminal elevator at Minneapolis. The company is in no sense a line house operator but rather transacts a merchandising business in grain and feedstuffs of all kinds.

The twenty-seventh annual directory of the Illinois Grain Dealers, as issued by Secretary W. E. Culbertson, with offices at Delavan, Ill., is now off the press. The 1920 volume, as usual with its predecessors, is most attractively compiled and every grain dealer should possess a copy for reference in the daily conduct of his business. Shipping and post office addresses are listed of the entire membership, and indices appear for railroads, country shipper members, receiver members, advertisers and towns, independently of the general directory. The constitution and by-laws of the Illinois Grain Dealers' Ass'n, as well as that of the National Ass'n, appear with arbitration rules and claims rules, making the book one of great value to all. Price of book is $2.00 a copy.

J. E. Bennett & Co. at Kansas City.

Among the items sent in by our excellent correspondent at Kansas City was one referring to the establishment of a new wire office by Jas. E. Bennett & Co., of Chicago, at Kansas City. The main fact reported was correct, but the details are a little different than those reported by our correspondent. It appears that Tracy E. Cockle is Bennett & Co.'s general representative at Kansas City and will have entire charge of their interests on the Kansas City Board of Trade, having a small office in the Board of Trade building, while the general headquarters of Bennett & Co. in that city will be 1104 Baltimore avenue, which is a part of the whole, including the small office in the Board of Trade building. Freeman Field also will be associated with Bennett & Co., but the assistant manager of the office will be John S. Torrington who has been associated with Bennett & Co. for a number of years but who had recently returned from service in France. The line-up of the Bennett & Co. office at Kansas City therefore will be: Tracy L. Cockle, Kansas City representative in charge; John S. Torrington, assistant manager; Freeman Field in charge of the customers' room at 1104 Baltimore avenue, where there is being arranged a very handsome office with a fine blackboard and conveniences for customers.

Black Hawk Grain Co.

Out in the Western grain country, where terminal markets have seemingly grown up over night, is the great handling and distributing terminal market of Omaha, Neb. Much has appeared in this paper about it and the individuals to whom credit is due for its growth, for the careful organization of the Omaha Grain Exchange and for its trade rules and their execution. One of these men is C. W. Adams, who now announces the Black Hawk Grain Co., of which he is president, the other officials being M. F. Adams, vice-president, and Mel Uhl, Jr., secretary and treasurer. Mr. Adams' many years' experience as vice-president and manager of the Omaha office of the Flanley Grain Co. will be recalled; and if the success of the Flanley Grain Co. augurs to any degree what may be expected of the newly organized Black Hawk company we know the coming New Year will bring prosperity and success to this Omaha venture. Mel Uhl, Jr., also from the Flanley Grain Co., and formerly advertising manager for the Omaha *Daily News*, will handle the advertising of the company. He is well known in advertising circles, as his father owned for a number of years a circuit of papers known as the Clover Leaf Circuit.

Grain consignments from Iowa, Minnesota and South Dakota, with business from even further points of almost equal volume, are smoothly handled when full knowledge of transportation details is supported by information on grain values. Mr. Adams is fortunate in personally understanding the ins and outs of traffic matters and has a capable office force and floor men to profitably sell consignments for their customers' accounts and to buy grain on orders of millers, feed manufacturers and distributers.

Offices of the company will be maintained at 308 South Nineteenth street, Omaha, where a general merchandising and commission business in grain will be conducted.

NOVEMBER EXPORTS.

The following statement of exports of domestic breadstuffs, cottonseed oil, meat and dairy products, cotton and mineral oils from the United States was completed on Dec. 24 by the Bureau of Foreign and Domestic Commerce, Department of Commerce (000 omitted):

CHANGES FROM 1918.

Compared with a year ago the report shows the month and eleven months:

	Nov., 1919.	11 mos.. 1919.
Breadstuffs ....+	$ 5,467,270	+$157,425,821
Meat, etc.....—	9,493,545	+ 243,928,862
Cotton .....+	121,881,578	+ 383,893,258
Cottonseed oil..+	875,225	+ 17,725,599
Mineral oils....+	1,711,229	— 4,953,169
Total .....+	$120,444,875	+$797,820,391

SERIES OF YEARS.

November exports of breadstuffs, cotton, and total agricultural products for a series of years have been as follows:

	Breadstuffs.	Cotton.	Total exports.
1919...	$71,738,928	$181,309,272	$349,953,504
1918...	66,271,658	59,424,694	229,508,629
1917...	50,023,221	60,206,943	177,741,114
1916...	45,838,549	72,012,616	159,632,510
1915...	30,492,529	31,934,015	94,677,866
1914...	40,232,862	31,923,314	97,190,040
1913...	10,107,167	103,324,633	138,400,338

For the eleven months of the calendar year to Nov. 30, the totals of principal agricultural shipments compare as follows:

	Breadstuffs.	Cotton.	Total exports.
1919..	$865,552,948	$956,722,974	$3,269,099,299
1918..	708,127,127	572,829,716	2,471,278,908

1914..	244,449,341	294,547,364	797,185,961
1913..	180,327,686	492,134,061	950,529,634

CORN DEMAND DULL.

The apathy on the part of buyers of corn, referred to recently, was again prominent in Saturday's market and was one of the essential reasons for the decline. This poor demand is particularly noticeable in the cash market. Premiums to a considerable extent have disappeared, No. 3 mixed selling at the December price and No. 4 mixed at 4 cents under. It is true that the Administration is facilitating the movement of grain to as great an extent as possible, but the report that preference will be given grain in the movement was not literally true. There is a little evidence coming into the market that farmers are averse to selling on the decline. So far, this evidence is confined to points in Illinois.—*Thomson & McKinnon, Chicago.*

The acreage seeded to rye in Wisconsin this year is 525,000 acres, compared with 458,000 in 1918, and 339,000 in 1909. The crop this year was valued at $11,032,000.

Our rye specialists say they are bidding the highest premiums yet made for rye; 11¾ over our May, New York; think entire visible has been taken.—*Logan & Bryan, Chicago.*

Rye has grown to considerable importance as a food product. Russia and Germany have been the world's largest producers; last available figures, those of 1916, were 903,000,000 bus. and 416,000,000 bus., respectively, of a total of world's production of 1,661,238,000 bus. in that year. This season's production, without the two above mentioned countries, is estimated at 4,629,660 tons, 181,945,000 bus. While these figures represent a decrease of 220,000 tons, 8,646,000 bus., since last year, they are 34,656,000 bus. above the 1913 to 1917 average.—*Simons, Day & Co., Chicago.*

Exports of Oats.

The exports of oats from principal United States ports, as reported by the Chief of the Bureau of Statistics of the Department of Commerce for each month for four years were as follows:

Mos.	1919.	1918.	1917.	1916.
Jan.	10,144,545	8,278,653	7,792,632	5,921,805
Feb.	5,817,630	7,565,371	5,391,996	8,061,867
Mar.	2,908,133	5,388,440	4,946,751	10,500,496
Apr.	2,970,712	9,085,131	8,435,814	8,374,611

BROOM CORN.

Weather conditions in the Southwest were a little more favorable to field operations, and buyers did rather more driving than for some time past and were able to pick up some corn in sections that had been thought practically cleaned out. Prices to growers were usually from $100@200 in southern and central Oklahoma; $75@125 in western Oklahoma, Kansas, Colorado and New Mexico, with $150 paid for very choice stuff. In the best Kansas territory field prices ranged from $150@225 and sales were reported by *The Broom Corn Review* from warehouses at $235@250 with $260@270 for several extra fine lots. The Wichita market was a little higher, one firm reporting sales of 10 cars of Lindsay at $240@275; lower grades, however, range from $100@125. In Chicago manufacturing interests were somewhat improved by the settlement of the coal strike and prices of corn showed a disposition to advance during the week.

A VIEW OF CORN.

Considering the willingness of the producer to sell, and assuming that railroads will find means to coöperate with the general desire of the grain trade for a relief of the present unhealthy situation, it appears reasonable to expect, at least, a normal run of corn. Whether prices will be influenced adversely remains to be seen. The granting of extensive credits to Europe will undoubtedly mean large sales of the grains most needed. It will be the means of sustaining values and, though corn may not be wanted extensively, maintenance of prices for other commodities is bound to work against very material declines in corn. Considering all phases of the situation, we believe that prices are due for a moderate setback, as the return to normal conditions will make slow progress, at best. —*Simons, Day & Co., Chicago.*

NEW MEMBERS IN KANSAS.

Sec'y Smiley reports in Bulletin 71 that he has already more than made good his promise made at Hutchinson on May 28 to secure with the Association's fiscal year 150 new members. Up to December 18 he had already secured the application of 156 new firms, which he says gives the "largest membership of any state organization in existence."

WHAT THE ORDER MEANS.

It is now understood that the railroad order as published on Dec. 26 did not mean that grain is to be given preference over all other freight, but simply that grain cars, in need of repair, are to be given preference in the repair shops, and cars in the grain territory which are suitable for carrying grain are not to be used for other freight.—*Logan & Bryan.*

Exports of Rye.

The exports of rye from all United States ports, as reported by the Chief of the Bureau of Statistics of the Department of Commerce for each month, for four years, were as follows, not including rye flour:

Mos.	1919.	1918.	1917.	1916.

CHICAGO PROVISION REVIEW.

CHICAGO, Dec. 29.—Provision prices had a good advance last week with a reaction toward the last, but the close was at gains of 42½ to 52½c on lard, 5 to 27½c on short ribs, the latter on May, and 15c higher for January and 25c lower for May pork.

Lard was the active trading specialty, the interest in it overshadowing that in all other articles. Several of the leading packers were active on different sides of the market at times, the January being under pressure on several days, while the brokers supposed to represent the same interests were buyers at various times. Shorts were good buyers early in the week and were mainly responsible for the advance in prices.

There was buying attributed to New York interests and to grain men early in the week, while latterly they were the most conspicuous sellers, due to the decline in corn, and to a feeling of uncertainty that prices were in for a down turn. Little interest taken in December and a few deliveries made early in the week. In cash lard the trade was light and loose lard sold at the close at 70c under January.

In the present condition of the provision trade there is nothing to induce large speculative operations. Prices are materially under last year's, although they are still high as compared with prewar years. There is a limited cash trade apparent in the open market, but packers say there is some export business doing all the time. Lard is being made on a liberal scale, but stocks are not accumulating to any extent. The foreigners want lard and it is only a question of credit, as the foreign exchange continues abnormally low.

Interest in short ribs and pork was light, although price fluctuations were sharp and covered a wide range, it taking very little buying or selling at times to cause sharp changes. Whenever the buying ceased, values declined and vice versa. Some ribs are being made by the packers here and in the West, but the manufacture is not as large as in other years.

Green hams are in active request and prices ¼ to ½c higher for the week. Pickled hams are having a moderate sale.

Considerable comment developed during the week on a cable from London saying that the British Food Controller had announced in the House of Commons in reply to criticism on the high price of bacon, that the British Commission in the United States had arranged for a regular supply of bacon of good quality with packers on the basis of the actual cost of hogs.

E. A. Cudahy, of the Cudahy Packing Co., discussing the cable, said: "The arrangements were for the cost of bacon to be on the basis of the cost of hogs, plus a fair margin of profit. Purchases at Chicago and outside packing points have been around 70,000,000 to 100,000,000 lbs. every three months, shipments being made steadily." Asked as to business with Germany, he said "there has been 300,000,000 lbs. of lard and meats sold in the last few months. Germany is given credit, the transactions being 25 per cent down at the time the contract is made and 25 per cent in three, six and nine months."

Supplies of hogs here and at Western packing points were liberal and prices moved irregularly within a good range.

Estimated receipts at Chicago for this week: Cattle, 65,000; hogs, 240,000; sheep, 85,000. Arrivals last year were: Cattle, 76,728; hogs, 228,886; sheep, 88,455.

Range of prices in November and previous and for the week follow:

Kansas City Provision Review.

KANSAS CITY, Dec. 27.—A moderate trade was witnessed in the provision market in Kansas City this week. Fancy offerings of hams and bacon met with a good demand for holiday consumption, with the better grades of fresh pork also in request. Prices fluctuated within a narrow range, some of the cheaper meats closing about ¼c lower, while advances ranged up to ¾c. A fair to good demand for fresh pork prevailed from the East, and local and surrounding territory supplied a good outlet for loins and other choice fresh cuts. Provision interests described demand for dry salt and heavy smoked meats as moderate, with the bulk of business to the South. Prices on these meats were about unchanged. Lard was in good demand, and a fairly liberal inquiry was reported for substitutes. The trade here is looking forward with more optimism to export sales of pork products, because of the outlook for early peace and signing of the Edge bill by the president.

Receipts at Twenty Markets.

Combined receipts of cattle, hogs and sheep at the seven leading western markets and thirteen other points for periods mentioned:

	Cattle.	Hogs.	Sheep.	All kinds.
This wk.	176,300	710,000	268,400	1,154,700
Wk. ago	356,600	937,800	398,300	1,692,700
Yr. ago	163,700	638,500	122,700	924,900
*1919.	17,568,400	35,655,100	18,618,000	70,929,600

*Totals for 1919 to date.

Live Stock Markets

CHICAGO LIVE STOCK.

CHICAGO, Dec. 29.—Shippers were good buyers of hogs last week, taking one-third of the 10,000 hogs received on Saturday and were responsible for an advance of 20 to 30c from that day by creating competition among local buyers. Top prices at the close were $14, while the highest for the week was also at that level with the average on Saturday $13.83, or 2c higher than Monday, and $13.52 for the week, compared with $13.90 the previous week and $7.60 last year. The nine-year average, $10.

A spread of 17c existed between the top and average price at the last, with the extreme range between the highest and lowest of packers' hogs and top butchers', 75c, while last August at one time the spread was $5.10, which was abnormal. At present hogs are selling within the narrowest range in eight months.

Packers on the whole were bearish and had it not been for the liberal purchases made by shippers, they would have probably forced prices down. Their purchases for the week were 176,900, compared with 204,300 the previous week and 149,300 last year. Average weight for the week was 224 lbs., against 226 lbs. the previous week and 225 lbs. last year, while the nine year average is 212 lbs. Supplies were liberal, 199,900 for the week, or 36,100 under the previous week, but 83,800 above last year's. Shipments were 30,200, against only 2,554 last year. The twenty markets had 710,000, against 937,800 the previous week and 688,500 last year.

Cattle prices had a good rally, regaining considerable of the heavy loss of the previous week, due to a large decrease in supplies and a better demand, although the latter was by no means heavy. Advances were $1.50 to $2.50 above the extreme low of the previous week, while the heaviest loss in the latter period extended to $3.

Most of the cattle were of common quality, the percentage of choice, finished steers being smaller than usual, and there was also a lighter run of low grade steers. The range at the last on killing steers was $9.25 to $17.75, while the week's range was $8.75 to $9.65, the latter figure being paid on Tuesday for 18 head of Hereford steers averaging 1.455 lbs. Average on beef steers for the week was $13.90, compared with $13.50 the previous week and $15.40 last year, while the nine-year average is $9.65. Receipts for the week were 43,455, compared with 80,694 the previous week, and 37,425 last year. At the seven markets the run was 133,000, or 124,000 short of the previous week and 6,000 more than last year. At the twenty markets there were 176,300, against 356,600 the previous week and 163,700 last year.

Western range steers were in lighter supply with a good advance in prices, the range being $7.50 to $14.50. Cows and heifers were up $1 from the low point of the previous week with choice corn-fed stocks at $13. The average of fat cows and heifers, however, was only $8.90, an advance of 80c for the week, compared with $11.70, the highest average on record made last April. The bull trade was irregular with the poorer sorts slow sale. Average for all classes was $8.50, or 60c higher than the previous week. Canners and cutters sold to better advantage with the close at $6.25 for a good class, and an advance of 50c. Calves sold well, with the best at $16 to $16.25 at the close, with a few fancy at $17 and an average of $16.

Stockers and feeders were slow sale owing to difficult transportation. There were a good many buyers, however, on the market from northern Indiana, Illinois and Ohio. The top price was $13, with few above $12.50, while numerous

loads went around $9.50 to $11.50, with the average $9.25 for the week.

Sheep trade was active with aged sheep 50c to $1 higher, the top on ewes being $11 and on fancy yearlings $16.25. Average on lambs was $13.52, against $13.90 the previous week, and $17.60 last year. Sheep averaged $14, or 45c lower than the previous week, compared with $17.90 last year. The seven markets had 164,000, of which 71,000 were in Chicago, compared with 286,000 the previous week and 68,000 last year.

Kansas City Livestock Market.

Sanders Sosland, Correspondent.

Kansas City, Dec. 27.—Excepting on calves and sheep, the Kansas City livestock market closes 1919 with a decrease in receipts as compared with 1918. The receipts of calves, which will aggregate about 385,000 head, show a new record total, compared with the preceding record of 325,735 in 1918. The sheep receipts will aggregate 2,950,000 head, compared with 1,667,463 in 1918 and the record of 2,175,493 in 1911. The hog arrivals will total 3,150,000 head, against 3,327,722 in 1918, and the record of 3,716,401 in 1901. The cattle receipts will amount to 2,700,000 head, against the record of 2,993,776 in 1918. It is probable that 1920 will see a further decrease in hog receipts and also a smaller supply of cattle. Arrivals of sheep are expected to be as large or larger than in the year now closing.

In the market this week the trade was of such a holiday character that it presented few signs of the basic conditions surrounding cattle, hogs and sheep. There were general decreases in receipts, and the total supplies were the lightest in weeks. Advances in prices were the rule.

In the hog market erratic action was again noted on prices, and the close was 15@25c lower for the week. The receipts were mostly of the heavier weights, which is rather surprising for this territory, with corn so short. It seems, however, that hogs have passed out of weak hands. The big market was stronger, closing about 25c higher on an improved demand from feeders. Average cost of droves to packers for the week was figured at $13.57, compared with $13.59 the preceding week, while the top was $14.15 against $14.25. Top today was $13.90.

Advances of 25c to $1.50 were quoted on cattle, with steers 75c to $1.50 higher. The top was only $15, as arrivals were of only medium to good quality. The bulk of 1,050 to 1,250-lb. shortfed steers brought $12@13.50. Butcher cattle were 50@75c higher, with cows up to $12, while stockers and feeders were 25@50c higher.

Prices of sheep and lambs rose to the highest level of the season, gaining 50c@1.50. Lambs sold up to $17.30, the best price since last June. Ewes closed at $9@10.25, wethers at $11.50@13, and native fed lambs at $15@16.75.

Oklahoma Live Stock Market.

Thusnelda Haehnke, Correspondent.

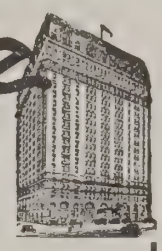
Oklahoma City, Dec. 27.—A paltry few thousand against needs that call for at least 10,000 explains the bad pocket packers are occupying. An advance of at least 50c a cwt. up and down the line, from fat steers to old shell canners, and at times 50@75c, was the Christmas week development. Packers made no attempt to conceal the urgency of their needs for anything worth driving to the killing beds. Real beef was never so rare an article, and the few parcels of fairly well finished steers sold good, $12.75 being top for around 1,040 lbs.

It was a good and snappy cow market the past week, as good as the deal was bad the previous session. Good short-fed cows, around 900 lbs., were back at $9 a car top, while some fancy odd lots made $10. Canners with a little fat are selling around $6. Bulls show a stronger tone, $5.50@6.50 being the popular scale. Calves are 50@75c higher for the week, $15 being the top on choice lightweights.

At least half of last week's decline on stockers has been put back this week. Good feeders are again on the $10 up basis. Medium to good twos $9@9.75 and heavy stockers $8.25@9. Good strong demand for young quality stuff at $6 and up.

The Christmas holiday apparently must have given the hog buying gang of the west a lot of pep, for there was a crowd and a jam for the pretty good sized. Although receipts are lighter, yet a good strong demand exists which puts the market back in the $14 neighborhood. The hog market shows a higher tendency of 25c for the week, with choice kinds and bulk going for $13.50@13.60. Year ago best sold for $17.40.

St. Louis National Stock Yards.



H. L. Wyatt, Correspondent.

National Stock Yards, Ill., Dec. 27.—On account of Christmas coming in the middle of the week, the receipts were light; but the demand in prices was good and the market is closing from $1 to $1.50 higher on steers and butcher stuff and about 75c to $1 higher on other grades. There was nothing fancy in the way of cattle offered this week, the range in price being from $10@14.25.

The hog runs for this week were fairly generous and the market is closing about steady with Monday's prices. The quality of the hogs offered has been good, the demand being for hogs weighing around 185 to 200 pounds. The closing quotations are: Mixed and butchers, $13.85@14.30; good heavys, $13.90@14.15; rough, $11.50@12.75; light, $14@14.30; pigs, $12.75@14; bulk, $13.85@14.20.

The sheep and lamb market continues strong and active. Choice lambs were sold on this market Friday for $18, this being the highest price for some time. The demand in the sheep house for the past week has been strong and included all grades of animals offered and the market is closing steady.

Hotel La Salle

Chicago's Finest Hotel

HOTEL LA SALLE possessess a peculiar and distinctive charm which is apparent the moment you enter its doors. This is due not alone to the unusual excellence in its cuisine, equipment and service, but to a combination of all the attributes of a great hotel together with an atmosphere of hospitality and comfort.

The convenient location gives you access to all that Chicago offers.

La Salle at Madison Street

Chicago

ERNEST J. STEVENS, Vice-Pres. and Mgr.

Omaha Live Stock Market.

Bruce McCullough, Correspondent.

South Omaha, Dec. 27.—The Christmas holiday on Thursday cut down the week's cattle receipts to 22,000 head. This was 13,000 short of the week previous but fully 7,000 more than for the corresponding week last year, and December receipts will fall very little short of a year ago, the same being true as to the total receipts for the year.

The smaller receipts and better weather conditions were responsible for a broader demand and higher prices, the advance for the week on both beef steers and cow stuff ranging from 50c@$1. The quality of the corn fed cattle has not been very good and nothing choice or fancy was offered, the best steers here averaging 1,355 pounds and bringing $14.60. Fair to good 1,000 to 1,250 pound steers are selling at $11@13, the common to fair warmed up grades going at $9@10.50 and on down. Cows and heifers are going at a pretty wide range, $5@12, the bulk of the fair to good butcher and beef stock around $7.50@9.50. Veal calves continue strong at $9.50@14.50 and bulls, stags, etc., fully steady at $5.50@11.50.

Business in stockers and feeders was light and of the usual year-end character, but for the most part prices range from strong to half dollar higher for the week, fair to good grades going largely around $9@11, choice weighty steers up to $12.50 and common light yearlings down to $6.

Hog receipts were liberal, about 60,000 head, and while the market shows more or less fluctuations from day to day the average of prices was much the same as for the week previous. Demand is broad with light and butcher weight loads at the top and rough heavy packers and underweight stuff at the bottom of the list. With about 7,500 hogs here today the market was 5@10c higher, tops bringing $13.80 against $13.70 last Saturday and bulk of the sales showing up at $13.30@13.65 as compared with $13.25@13.65 a week ago.

There was a very marked decrease in arrivals of sheep and lambs the past week which accounts for the fact that demand has improved and lambs are selling $1@1.50 higher than a week ago. Best fat lambs are bringing $17.25@17.65 and feeder buyers are paying $14@15 for thin and warmed up lambs. Aged stock has also advanced 50c, $1.00 for the week, choice light yearlings being quoted up to $16, wethers up to $12 and ewes up to $10.25.

LIVE STOCK IN CANADA.

The Dominion Bureau of Statistics has made a compilation of the number of farm live stock based on returns made in June and July last, as follows:

	1919.	1918.
Horses	3,667,369	3,609,257
Mules	15,102	10,261
Milch cows	3,547,437	3,538,600
Other cattle	6,536,574	6,507,267
Total cattle	10,084,011	10,045,867
Sheep	3,421,958	3,052,748
Swine	4,040,070	4,289,682
Total poultry	34,645,238	34,159,691

It will be seen that only the number of swine has decreased and by only 249,612.

Provision Exports.

The following table shows the exports of meats (bacon, hams, etc.) and lard in millions of pounds monthly for current and two preceding years:

	Meats			Lard

Unload and Convey by Air

ON THIS JOB THE

"AIRVEYOR"

(Patents Issued and Pending)

Cut the Labor Cost from 40 Man-Hours to 5 Man-Hours

Soda ash was the material, delivered in box cars. Two men, with shovels, wheelbarrows and gas masks, took 20 hours to unload a car. The "Airveyor" was installed—and now one man unloads the car in five hours, and there is no dust. Saving —35 hours of one man's work.

If you have to handle grain, food products, coal, coke, lime, cement, or any other pulverized or granular materials—ask us to show you how you can do it at lowest cost and with highest safety.

G-E Polyphase Induction Motors are extremely simple and built to withstand hard usage in exposed locations

CHICAGO, ILL.

Durable Motors in Widespread Use

ALL over the world you will find G-E polyphase induction motors—more of them than of any other kind.

You will find them in acid fumes on five-year long non-stop runs.

You can find where they have been fished out of fire-swept ruins or flooded mines and quickly put back into operation —where they have operated under water and pumps to unwater mines.

Motors in correct sizes and with proper control equipments are available for every industrial requirement. They are stocked in all large cities near the offices of specialists in their application who are at your service.

THE RECORDS of the Flour Mill and Grain Elevator Mutual Insurance Companies
show that 80 per cent of all fires in Mills or Elevators start in elevators. The installation of an automatic feeding device which will positively prevent an elevator choking from overfeeding and an automatic relief which will prevent an elevator choking from bin getting full or spout choking, will annually save millions of dollars in fire loss and add at least 50 per cent to efficiency of any stand of grain elevators. These devices are perfected and are available for mill and elevator owners, are very inexpensive and absolutely practical. Full particulars will be furnished, free of charge by this office, on request.

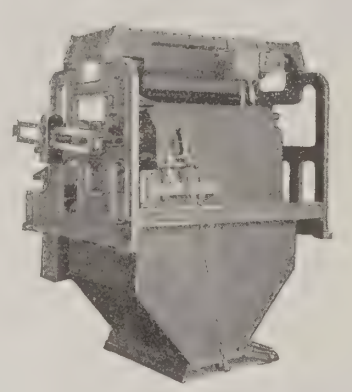
St. Louis, Mo.

The state organizer of farm bureaus in Montana says the increased price of seed wheat now in the neighborhood of $3.50 a bu. is especially hard on the dryland farmer and may cause many of these to stop sowing wheat on dry lands.

Grain crops in Czecho-Slovakia are estimated to show an increase of 740,000 tons this year. The wheat crop is estimated at 1,288,000 qrs.; rice, 2,622,000; of barley, 1,430.000; of oats, 3,045,000.



Movement of Oats.

Following is a statement of the receipts and shipments of oats at the primary markets of the West for the weeks named:

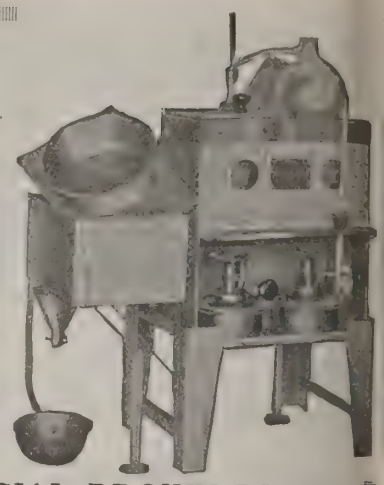
Accurate — Dependable
FAIRBANKS
Automatic Scales
equipped with
Type Registering Counter

To give you accurate every day knowledge of the exact amount of each kind of grain that passes through your elevator. Weighs same weight per discharge on all grains—Does away with changing weights in weigh-box. Backed by nearly ninety years of scientific scale construction.

Fairbanks, Morse & Co.
MANUFACTURERS CHICAGO
Engines - Motors - Scales - Light Plants - Feed Grinders, etc.

YOU MUST KNOW!



You can't guess on grades nowadays. The Government standards show a difference of only 1½ to 2% of moisture between grades. A complete grading equipment could be bought with the loss incurred by undergrading ONE car of corn.

Be **sure** of your profits.

Be **sure** you do not pay too much.

Be **sure** you do not receive too little.

There's only one way to be **sure,** and that is by using the **Government Standard** Grain Grading Equipment.

SEEDBURO (Trade Mark) OFFICIAL BROWN DUVEL MOISTURE TESTER

Official Government Corn Sieves

Made of one piece thick gauge aluminum, 13 in. in diameter, for accurate percentage determinations of dirt, foreign material and cracked corn, as specified in Grain Grades Act.

Light in weight and will not rust. Sieve telescopes into bottom pan, making a compact and convenient outfit.

Effectively used in connection with "Four-in-One" scale.

No. 11—One sieve 14/16 in. perforations and bottom pan.

No. 12—Sieve only.

No. 14 Special Four-in-One Scale

This scale, designed and manufactured by us, is a small, complete office scale for weighing samples for moisture test and for determining test weights per bushel, dockages, weights for mailing samples, etc.

This "Four-in-One" Agate Bearing Scale is the most complete, compact, accurate and adaptable scale made. Quick breaking and guaranteed accurate. Used by thousands of country shippers, receivers and grain men everywhere. Price with weight per bu. cup, $23.00. Send for Catalogue 611 of Complete Grain Grading Equipment, Grain Triers, Sample Pans, Weight per bu. Testers, Etc.

SEED TRADE REPORTING BUREAU Postal Telegraph Building CHICAGO, ILLINOIS

GRAIN COMMISSION ACCOUNTANTS

I have perfected a standardized but simple and complete bookkeeping system for the Grain Commission Business. I can give you one Cash Journal which will reduce your journalizing and posting from 50 to 75 per cent or I can give you separate records of uniform size, which can be kept by different accountants, and can provide a separate record for from one to twenty bank accounts.

I can give you a ledger that will reduce your work and the time of posting fully 60 per cent and give you the correct balance of each account after every posting.

I have solved your account-keeping problems just as I have done for many other lines of business during the last 30 years.

I want to show this simple, complete and satisfactory system to you and have one of our trained auditors install it for you just as soon as you are ready.

Edward A. Pratt *President*

RECORD OF RECEIPTS

THE biggest and best book yet designed for country grain buyers for keeping record of wagon loads bought or received from the farmers. Contains 160 large pages—9½x15"—to the book, with spaces for recording 6,080 loads. Its column headings are: date, driver, gross, tare, net, bushels, price, kind, seller and amount. It is printed and ruled on heavy Atlas linen ledger paper and substantially bound in canvas covers, order form No. 83. Price $1.75.

Send or he
PRICE CURRENT-GRAIN REPORTER, 912 Webster Bl. (

WAGON LOADS RECEIVED

A book for the use of country grain buyers in keeping a record of grain received from farmers.

Its column headings are: Month, Day, Name, Kind, Gross and Tare, Net Pounds, Bushels, Pounds, Price, Dollars, Cents and Remarks.

The book, 9½ x 12 inches, 160 pages, 20 lines to each page, giving room for recording 3,200 loads, is printed on Linen Ledger Paper and is well bound in strong board covers with leather back and corners. Order form 80. Price $1.75.

Price Current-Grain Reporter, 327 So. LaSalle St., Chicago, Ill.

Tell your troubles to our Advertisers, they pay us for your inquiries.

NEW CORN PERISHABLE RUSH

Perishable commodities, especially foodstuffs, will receive first consideration by railroads and you will have the co-operation of the Government in trying to push your shipments through promptly. This year's corn crop has been slow moving, making corn badly needed in all markets. Therefore, Mr. Country Shipper, it is up to you to get it through to terminal market and destination as quickly as possible. The above placards are printed in large bold-faced type with red ink on six-ply cardboard, 11x8½. We furnish them in lots of 25 at 5c each; 50 at 4½c each; 100 at 3½c each. Orders for 100 are sent out express prepaid. Supply yourselves with these cards and tack them on the sides of every car of corn shipped by you. It will help facilitate its movement. Orders promptly filled.

THE ELLIS DRIER COMPANY, Chicago, U. S. A.

American Bale Ties

To conform with the rules of the National Hay Association, hay must be well baled. The use of American Bale Ties accomplishes this. A broken wire on a bale of hay condemns the hay. Broken bales cost more than Bale Ties.

OTHER USES:

For baling Excelsior, Shavings, Rags and Paper. For bundling Barrel Heading and Staves, and for Box Bands.

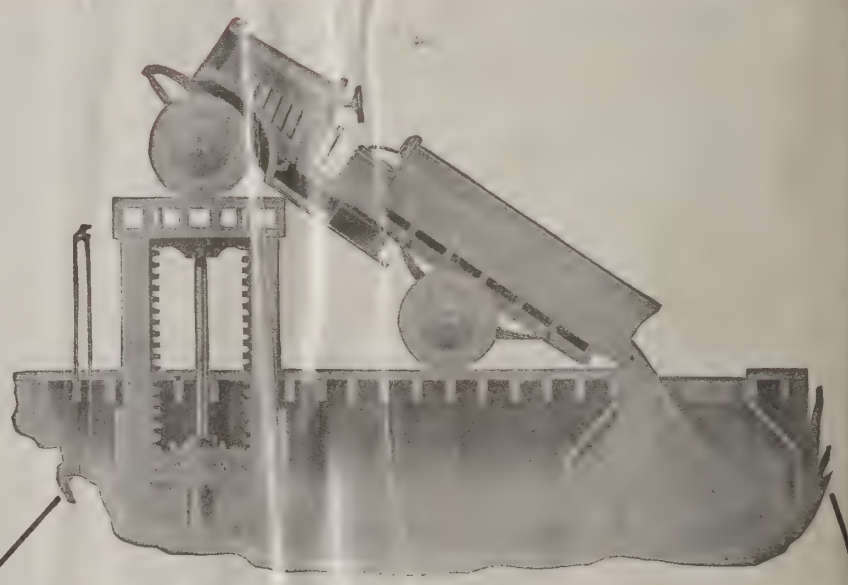
No other form of wire has to stand more strain and abuse. Bale Tie Wire must be made in the highest perfection possible. American Bale Ties meet every requirement for which they are intended.

Complete descriptive catalog sent free for the asking.

American Steel & Wire Company

Chicago New York

REVISED EDITION ROBINSON TELEGRAPHIC CIPHER CODE



With supplement all bound in one book, contains many new phrases that changes in business methods and new grades, railroads, etc., have called into use since last revision.

Most Extensively Used By

GRAIN AND PROVISION DEALERS

It is compact, small, and can be easily carried in the pocket. You can save time and expense and preserve secrecy by using this code. In universal use by receivers, shippers and track buyers. **Price, Cloth Binding, $1.50. Price, Leather Binding, gilt edges, $2.00.** Name in gilt letters on front cover 25c extra. Get the latest. Send all orders to
